Administrative News

Volume 2

ST. PAUL, MINN.
WEST PUBLISHING CO.

THESE VOLUMES

The 1989 Federal Tax Regulations comprise the thirty-sixth in the annual series. The series preserves in permanent form, the regulations promulgated by the Treasury Department that interpret statutory provisions relating to income, estate, gift, and employment taxes, that illustrate methods of compliance, and that govern practice before the Internal Revenue Service. The regulations are codified in Code of Federal Regulations, Title 26—Internal Revenue, or Title 31—Money and Finance, and the Internal Revenue Code references are identical to 26 U.S.C.A. sections.

These volumes contain regulations adopted through December 31, 1988. Changes through October 31, 1988 are incorporated in the principal text. Later changes are covered in the "Last Minute Regulations" at the end of Volume 4.

New Material

These volumes contain regulations adopted or amended in 1988 covering amendments, additions and repeals made by the Tax Reform Act of 1986 (Pub.L. 99–514, Oct. 22, 1986, 100 Stat. 2085) and subsequent legislation to the United States Code. The Tax Reform Act of 1986 was enacted by the 99th Congress, Second Session, to revise the tax laws of the United States and represents the most comprehensive revision of those laws in over thirty years.

Keeping Regulations to Date

Changes made during 1989 in the regulations appearing in these volumes will appear in U.S. CODE CONGRESSIONAL AND ADMINISTRATIVE NEWS pamphlets. A cumulative Table of Sections Affected appears in each U.S. CODE CONGRESSIONAL AND ADMINISTRATIVE NEWS pamphlet.

WESTLAW® ELECTRONIC RESEARCH GUIDE

---

1. Coordinating Legal Research with WESTLAW

The Federal Tax Regulations 1989 provide essential aid in solving legal problems involving tax law. WESTLAW provides additional resources. This guide will assist your use of WESTLAW to supplement research using this publication.

2. Databases

A database is an aggregation of documents with one or more features in common. A database may contain statutes, court decisions, administrative materials, or commentaries. Every database has its own identifier which is used to identify the database to be searched. For example, FTX–CS identifies federal tax cases; FTX–USC identifies federal tax statutes; FTX–CFR identifies the Code of Federal Regulations.

WESTLAW has a comprehensive group of databases covering administrative, legislative, and cases dealing with tax issues. The WESTLAW Directory provides a listing of databases, with information about each database, including the types of documents each contains.

3. Updating Statutes

WESTLAW statutory databases may be used to ascertain whether a particular statute has been amended after this volume was printed. After checking the coverage, sign on to FTX–USC database and using the desired title and section numbers, a query is entered in the following form:

ci(26 +3 213)

This will retrieve section 213 of the Internal Revenue Code.

4. Updating CFR

WESTLAW's FTX–FR database may be used to update CFR. After checking the coverage, sign on to FTX–FR database. Using the regulation's citation, enter a query in the following form:

addeddate (aft 1/1/87) & "26 CFR 601"

5. Retrieving Cases Citing A Statute

To retrieve cases citing a statutory provision, sign on to FTX–CS and enter a query using the following form:

"26 U.S." "26 U.S.C.***" "Title 26" Code /8 3304

6. Retrieving Cases Citing A Regulation

To retrieve cases citing a regulation, sign on to FTX-CS and enter a query using the following form:

26 /3 1.167(A)-3

7. Key Number Search

WESTLAW may be used to search any topic and key number in West's Key Number System. To retrieve cases with at least one headnote classified to the topic Internal Revenue ⚷3550, sign on to FTX-CS and enter:

220k3550

The topic name (Internal Revenue) is replaced by its numerical equivalent (220) and the ⚷ by the letter k. A list of topics and their numerical equivalents is in the WESTLAW Reference Manual and is also available in the WESTLAW Directory.

8. Retrieving A Cited Case

WESTLAW's FIND command can be used to quickly retrieve a cited case. Simply enter a command in this form:

FI 107 S.Ct. 782

9. Using Insta-Cite® For Retrieving Case History and Parallel Citations

Insta-Cite may be used to find any parallel citations and the history of a reported case. Enter a command in this form:

IC 726 F.2d 1292

10. Shepardizing™ a Case with WESTLAW

Shepard's® Citations may be displayed for a reported case. Enter a command in this form:

SH 572 F.2d 212

11. Additional Information

The information provided above illustrates some of the ways WESTLAW can complement research using the Federal Tax Regulations 1989. However, this brief overview illustrates only some of the power of WESTLAW. The full range of WESTLAW search techniques is available to support your research from this series. Please consult the WESTLAW manual for additional information.

appears in this volume

§ 1.381(a)–1 General rule relating to carryovers in certain corporate acquisitions.

(a) Allowance of carryovers. Section 381 provides that a corporation which acquires the assets of another corporation in certain liquidations and reorganizations shall succeed to, and take into account, as of the close of the date of distribution or transfer, the items described in section 381(c) of the distributor or transferor corporation. These items shall be taken into account by the acquiring corporation subject to the conditions and limitations specified in sections 381, 382(b), and 383 and the regulations thereunder.

(b) Determination of transactions and items to which section 381 applies—(1) Qualified transactions. Except to the extent provided in section 381(c)(20), relating to the carryover of unused pension trust deductions in certain liquidations, the items described in section 381(c) are required by section 381 to be carried over to the acquiring corporation (as defined in subparagraph (2) of this paragraph) only in the following liquidations and reorganizations:

(i) The complete liquidation of a subsidiary corporation upon which no gain or loss is recognized in accordance with the provisions of section 332, but only if the basis of the assets distributed to the acquiring corporation is not required by section 334(b)(2) to be the adjusted basis of the stock with respect to which the distribution is made;

(ii) A statutory merger or consolidation qualifying under section 368(a)(1)(A) to which section 361 applies;

(iii) A reorganization qualifying under section 368(a)(1)(C);

(iv) A reorganization qualifying under section 368(a)(1)(D) if the requirements of section 354(b)(1)(A) and (B) are satisfied; and

(v) A mere change in identity, form, or place of organization qualifying under section 368(a)(1)(F).

(2) Acquiring corporation defined. (i) Only a single corporation may be an acquiring corporation for purposes of section 381 and the regulations thereunder. The corporation which acquires the assets of its subsidiary corporation in a complete liquidation to which section 381(a)(1) applies is the acquiring corporation for purposes of section 381. Generally, in a transaction to which section 381(a)(2) applies, the acquiring corporation is that corporation which, pursuant to the plan of reorganization, ultimately acquires, directly or indirectly, all of the assets transferred by the transferor corporation. If, in a transaction qualifying under section 381(a)(2), no one corporation ultimately acquires all of the assets transferred by the transferor corporation, that corporation which directly acquires the assets so transferred shall be the acquiring corporation for purposes of section 381 and the regulations thereunder, even though such corporation ultimately retains none of the assets so transferred. Whether a corporation has acquired all of the assets transferred by the transferor corporation is a question of fact to be determined on the basis of all the facts and circumstances.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). Y Corporation, a wholly-owned subsidiary of X Corporation, directly acquired all the assets of Z Corporation solely in exchange for voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Y Corporation is the acquiring corporation for purposes of section 381.

Example (2). X Corporation acquired all the assets of Z Corporation solely in exchange for voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Thereafter, pursuant to the plan of reorganization X Corporation transferred all the assets so acquired to Y Corporation, its wholly-owned subsidiary (see section 368(a)(2)(C)). Y Corporation is the acquiring corporation for purposes of section 381.

Example (3). X Corporation acquired all the assets of Z Corporation solely in exchange for the voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Thereafter, pursuant to the plan of reorganization X Corporation transferred one-half of the assets so acquired to Y Corporation, its wholly-owned subsidiary, and retained the other half of such assets. X Corporation is the acquiring corporation for purposes of section 381.

Example (4). X Corporation acquired all the assets of Z Corporation solely in exchange for voting stock of X Corporation in a transaction qualifying under section 368(a)(1)(C). Thereafter, pursuant to the plan of reorganization X Corporation transferred one-half of the assets so acquired to Y Corporation, its wholly-owned subsidiary, and the other half of such assets to M Corporation, another wholly-owned subsidiary of X

Corporation. X Corporation is the acquiring corporation for purposes of section 381.

(3) **Transactions and items not covered by section 381.** (i) Section 381 does not apply to partial liquidations, divisive reorganizations, or other transactions not described in subparagraph (1) of this paragraph. Moreover, section 381 does not apply to the carryover of an item or tax attribute not specified in subsection (c) thereof. In a case where section 381 does not apply to a transaction, item, or tax attribute by reason of either of the preceding sentences, no inference is to be drawn from the provisions of section 381 as to whether any item or tax attribute shall be taken into account by the successor corporation.

(ii) If, pursuant to the provisions of subparagraph (2) of this paragraph, a corporation is considered to be the acquiring corporation even though a part of the acquired assets is transferred to one or more corporations controlled by the acquiring corporation, or all the acquired assets are transferred to two or more corporations controlled by the acquiring corporation, then the carryover of any item described in section 381(c) to such controlled corporation or corporations shall be determined without regard to section 381. Thus, for example, if a parent corporation is the acquiring corporation for purposes of section 381 notwithstanding the fact that, pursuant to the plan of reorganization, it transferred to its wholly-owned subsidiary property acquired from the transferor corporation which the transferor corporation had elected to inventory under the last-in first-out method, then the question whether the subsidiary corporation shall continue to use the same method of inventorying with respect to that property shall be determined without regard to section 381.

(c) **Foreign corporations.** A foreign corporation may be a distributor, transferor, or acquiring corporation for purposes of section 381. Thus, for example, the net operating loss carryovers of a foreign corporation, determined under the provisions of section 172 and subchapter N (section 861 and following), chapter 1 of the Code, may be carried over to a domestic acquiring corporation if the domestic corporation acquires the assets of the foreign corporation in a liquidation or reorganization described in section 381(a) and the requirements of § 1.367-1, if applicable, have been complied with.

(d) **Internal Revenue Code of 1939.** Any reference in the regulations under section 381 to any provision of the Internal Revenue Code of 1954 shall, where appropriate, be deemed also to refer to the corresponding provision of the Internal Revenue Code of 1939.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7343, 40 FR 1698, Jan. 9, 1975]

§ 1.381(b)-1 Operating rules applicable to carryovers in certain corporate acquisitions.

(a) **Closing of taxable year—(1) In general.** Except in the case of a reorganization qualifying under section 368(a)(1)(F), the taxable year of the distributor or transferor corporation shall end with the close of the date of distribution or transfer.

(2) **Reorganizations under section 368(a)(1)(F).** In the case of a reorganization qualifying under section 368(a)(1)(F) (whether or not such reorganization also qualifies under any other provision of section 368(a)(1)), the acquiring corporation shall be treated (for purposes of section 381) just as the transferor corporation would have been treated if there had been no reorganization. Thus, the taxable year of the transferor corporation shall not end on the date of transfer merely because of the transfer; a net operating loss of the acquiring corporation for any taxable year ending after the date of transfer shall be carried back in accordance with section 172(b) in computing the taxable income of the transferor corporation for a taxable year ending before the date of transfer; and the tax attributes of the transferor corporation enumerated in section 381(c) shall be taken into account by the acquiring corporation as if there had been no reorganization.

(b) **Date of distribution or transfer.** (1) The date of distribution or transfer shall be that day on which are distributed or transferred all those properties of the distributor or transferor corporation which are to be distributed or transferred pursuant to a liquidation or reorganization described in paragraph (b)(1) of § 1.381(a)-1. If the distribution or transfer of all such properties is not made on one day, then, except as provided in subparagraph (2) of this paragraph, the date of distribution or transfer shall be that day on which the distribution or transfer of all such properties is completed.

(2) If the distributor or transferor and acquiring corporations file the statements described in subparagraph (3) of this paragraph, the date of distribution or transfer shall be that day as of which (i) substantially all of the properties to be distributed or transferred have been distributed or transferred, and (ii) the distributor or transferor corporation has ceased all operations (other than liquidating

activities). Such day also shall be the date of distribution or transfer if the completion of the distribution or transfer is unreasonably postponed beyond the date as of which substantially all the properties to be distributed or transferred have been distributed or transferred and the distributor or transferor corporation has ceased all operations other than liquidating activities. A corporation shall be considered to have distributed or transferred substantially all of its properties to be distributed or transferred even though it retains money or other property in a reasonable amount to pay outstanding debts or preserve the corporation's legal existence. A corporation shall be considered to have ceased all operations, other than liquidating activities, when it ceases to be a going concern and its activities are merely for the purpose of winding up its affairs, paying its debts, and distributing any remaining balance of its money or other properties to its shareholders.

(3) The statements referred to in subparagraph (2) of this paragraph shall specify the day considered to be the date of distribution or transfer and shall specify, as of such date (i) the nature and amount of the total assets which were distributed or transferred and the dates so distributed or transferred, (ii) the nature and amount of the assets not distributed or transferred and the purpose for which they were retained, and (iii) the date on which the distributor or transferor corporation ceased all operations other than liquidating activities. Such statements shall be attached to the timely filed income tax return of the distributor or transferor corporation for its taxable year ending with such date of distribution or transfer and to the timely filed income tax return of the acquiring corporation for its first taxable year ending after such date, except that, with respect to any income tax return filed before October 11, 1960, any such statement shall be filed before October 11, 1960, with the district director with whom such return is filed.

(4) If—

(i) The last day of the acquiring corporation's taxable year is a Saturday, Sunday, or legal holiday, and

(ii) The day specified in subparagraph (1) or (2) of this paragraph as the date of distribution or transfer is the last business day before such Saturday, Sunday, or holiday,

then the last day of the acquiring corporation's taxable year shall be the date of distribution or transfer for purposes of section 381(b) and this section. For purposes of this subparagraph, the term "business day" means a day which is not a Saturday, Sunday, or legal holiday, and also means a Saturday, Sunday, or legal holiday if the date of distribution or transfer determined under subparagraph (1) or (2) of this paragraph is such Saturday, Sunday, or holiday.

(c) Return of distributor or transferor corporation. The distributor or transferor corporation shall file an income tax return for the taxable year ending with the date of distribution or transfer described in paragraph (b) of this section. If the distributor or transferor corporation remains in existence after such date of distribution or transfer, it shall file an income tax return for the taxable year beginning on the day following the date of distribution or transfer and ending with the date on which the distributor or transferor corporation's taxable year would have ended if there had been no distribution or transfer.

(d) Carryback of net operating losses. For provisions relating to the carryback of net operating losses of the acquiring corporation, see paragraph (b) of § 1.381(c)(1)–1.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960]

§ 1.381(c)(1)–1 Net operating loss carryovers in certain corporate acquisitions.

(a) Carryover requirement. (1) Section 381(c)(1) requires the acquiring corporation to succeed to, and take into account, the net operating loss carryovers of the distributor or transferor corporation. To determine the amount of these carryovers as of the close of the date of distribution or transfer, and to integrate them with any carryovers and carrybacks of the acquiring corporation for purposes of determining the taxable income of the acquiring corporation for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of section 172 in accordance with the conditions and limitations of section 381(c)(1) and this section. See also section 382(b) and the regulations thereunder.

(2) The net operating loss carryovers and carrybacks of the acquiring corporation determined as of the close of the date of distribution or transfer shall be computed without reference to any net operating loss of a distributor or transferor corporation. The net operating loss carryovers of a distributor or transferor corporation as of the close of the date of distribution or transfer shall be determined without reference to any net operating loss of the acquiring corporation.

(3) For purposes of the tax imposed under section 56, the acquiring corporation succeeding to and taking into account any net operating loss carryovers of the distributor or transferor corporation shall also succeed to and take into account along with such net operating loss carryforward any deferred tax liability under section 56(b) and the regulations thereunder attributable to such net operating loss carryover.

(b) **Carryback of net operating losses.** A net operating loss of the acquiring corporation for any taxable year ending after the date of distribution or transfer shall not be carried back in computing the taxable income of a distributor or transferor corporation. However, a net operating loss of the acquiring corporation for any such taxable year shall be carried back in accordance with section 172(b) in computing the taxable income of the acquiring corporation for a taxable year ending on or before the date of distribution or transfer. If a distributor or transferor corporation remains in existence after the date of distribution or transfer, a net operating loss sustained by it for any taxable year beginning after such date shall be carried back in accordance with section 172(b) in computing the taxable income of such corporation for a taxable year ending on or before that date, but may not be carried back or over in computing the taxable income of the acquiring corporation. This paragraph may be illustrated by the following examples:

Example (1). On December 31, 1954, X Corporation merged into Y Corporation in a statutory merger to which section 361 applies, and the charter of Y Corporation continued after the merger. Y Corporation sustained a net operating loss for the calendar year 1955. Y Corporation's net operating loss for 1955 may not be carried back in computing the taxable income of X Corporation but shall be carried back in computing the taxable income of Y Corporation.

Example (2). On December 31, 1954, X Corporation and Y Corporation transferred all their assets to Z Corporation in a statutory consolidation to which section 361 applies. Z Corporation sustained a net operating loss for the calendar year 1955. Z Corporation's net operating loss for 1955 may not be carried back in computing the taxable income of X Corporation or Y Corporation.

Example (3). On December 31, 1954, X Corporation ceased all operations (other than liquidating activities) and transferred substantially all its properties to Y Corporation in a reorganization qualifying under section 368(a)(1)(C). Such properties comprised all of X Corporation's properties which were to be transferred pursuant to the reorganization. In the process of liquidating its assets and winding up its affairs, X Corporation sustained a net operating loss for its taxable year beginning on January 1, 1955. This net operating loss of X Corporation shall be carried back in computing the taxable income of that corporation but may not be carried back or over in computing the taxable income of Y Corporation.

(c) **First taxable year to which carryovers apply.** (1) The net operating loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall first be carried to the first taxable year of the acquiring corporation ending after that date. This rule applies irrespective of whether the date of distribution or transfer is on the last day, or any other day, of the acquiring corporation's taxable year. Thus, such net operating loss carryovers shall first be used by the acquiring corporation with respect to the computation of its net operating loss deduction under section 172(a), and its taxable income determined under the provisions of section 172(b)(2), for such first taxable year. However, see paragraph (f) of this section.

(2) The net operating loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall be carried to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation. Thus, if a parent corporation owning 80 percent of all classes of stock of its subsidiary corporation were to acquire its share of the assets of the subsidiary corporation upon a complete liquidation described in paragraph (b)(1)(i) of § 1.381(a)–1, then, subject to the conditions and limitations of this section, 100 percent of the net operating loss carryovers available to the subsidiary corporation as of the close of the date of distribution would be carried over to the parent corporation.

(d) **Limitation on net operating loss deduction for first taxable year ending after date of distribution or transfer.** (1) That part of the acquiring corporation's net operating loss deduction, determined in accordance with sections 172(a) and 381(c)(1), for its first taxable year ending after the date of distribution or transfer which is attributable to the net operating loss carryovers of the distributor or transferor corporation, is limited by section 381(c)(1)(B) and this paragraph to an amount equal to the acquiring corporation's postacquisition part year taxable income. Such postacquisition part year taxable income is the amount which bears the same ratio to the acquiring corporation's taxable income for the first taxable year ending after the date of distribution or transfer (determined under section 63 without regard to any net operating loss deduction but taking into account other items to which the acquiring corporation succeeds under section 381) as the number of days in such first taxable year which follow the date of distribution or transfer bears to the total number of days in such taxable

year. Thus, if the date of distribution or transfer is the last day of the acquiring corporation's taxable year, the net operating loss carryovers of the distributor or transferor are allowed in full in computing under section 172(a) the net operating loss deduction of the acquiring corporation for its first taxable year ending after that date. In such instance, the number of days in the first taxable year which follow the date of distribution or transfer is the total number of days in such taxable year.

(2) The limitation provided by section 381(c)(1)(B) applies solely for the purpose of computing the net operating loss deduction of the acquiring corporation under section 172(a) for the acquiring corporation's first taxable year ending after the date of distribution or transfer. The limitation does not apply for purposes of determining the portion of any net operating loss (whether of the distributor, transferor, or acquiring corporation) which may be carried to any taxable year of the acquiring corporation following its first taxable year ending after the date of distribution or transfer since such determination is made pursuant to section 172(b) and section 381(c)(1)(C). See paragraphs (e) and (f) of this section.

(3) The limitation provided by section 381(c)(1)(B) shall be applied to the aggregate of the allowable net operating loss carryovers of the distributor or transferor corporation without reference to the taxable years in which the net operating losses were sustained by such corporation. If the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, then the limitation provided by section 381(c)(1)(B) shall be applied to the aggregate of the net operating loss carryovers from all of such distributor or transferor corporations.

(4) If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more different dates of distribution or transfer within one taxable year of the acquiring corporation, the limitation to be applied under section 381(c)(1)(B) to the aggregate of such carryovers shall be governed by the rules prescribed in paragraph (b) of § 1.381(c)(1)–2.

(5) Illustrations. The application of this paragraph may be illustrated by the following examples:

Example (1). (i) X Corporation and Y Corporation were organized on January 1, 1956, and make their returns on the calendar year basis. On December 16, 1957, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and taxable income (computed without the net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1956	($35,000)	($5,000)
Ending 12–16–57	(30,000)	xxx
1957	xxx	36,500

(ii) The aggregate of the net operating loss carryovers of X Corporation carried under section 381(c)(1)(A) to Y Corporation's taxable year ending December 31, 1957, is $65,000; but pursuant to section 381(c)(1)(B), only $1,500 of such aggregate amount ($\$36{,}500 \times {}^{15}\!/_{365}$) may be used in computing the net operating loss deduction of Y Corporation for such taxable year under section 172(a). This limitation applies even though Y Corporation's own net operating loss carryover to such year is only $5,000, with the result that Y Corporation has taxable income under section 63 of $30,000 for its taxable year ending December 31, 1957, that is, $36,500 less the sum of $5,000 and $1,500.

(iii) For rules determining the portion of any given loss of X Corporation or Y Corporation which may be carried to a taxable year of Y Corporation following its taxable year ending December 31, 1957, see sections 172(b)(2) and 381(c)(1)(C) and paragraph (f) of this section.

Example (2). (i) X Corporation was organized on January 1, 1954, and Y Corporation was organized on January 1, 1956. Each corporation makes its return on the basis of the calendar year. On December 31, 1956, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	($5,000)	xxx
1955	(15,000)	xxx
1956	(10,000)	$20,000
1957	xxx	40,000

(ii) The aggregate of the net operating loss carryovers of X Corporation carried under section 381(c)(1)(A) to Y Corporation's taxable year 1957 is $30,000, and the full amount of such carryovers is allowed in such taxable year to Y Corporation as a deduction under section 172(a), since such amount does not exceed the limitation ($40,000 × 365/365) for such taxable year under section 381(c)(1)(B).

Example (3). (i) X Corporation, Y Corporation, and Z Corporation were organized on January 1, 1954, and each corporation makes its return on the basis of the calendar year. On September 30, 1956, X Corporation and Y Corporation transferred all their assets to Z Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the three corporations are as follows, the

assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (transferor)	Z Corporation (acquirer)
1954	($5,000)	($3,000)	($40,000)
1955	(4,000)	(2,000)	10,000
Ending 9–30–56	(1,000)	(9,000)	xxx
1956	xxx	xxx	73,200

(ii) The aggregate of the net operating loss carryovers of X Corporation and Y Corporation carried under section 381(c)(1)(A) to Z Corporation's taxable year 1956 is $24,000; but, pursuant to section 381(c)(1)(B), only $18,400 of such aggregate amount ($73,200 × 92/366) may be used in computing the net operating loss deduction of Z Corporation for such taxable year under section 172(a). For this purpose, Z Corporation may not use the total of the aggregate carryovers ($10,000) from X Corporation plus the aggregate carryovers ($14,000) from Y Corporation, even though each such aggregate of carryovers is separately less than the limitation ($18,400) applicable under section 381(c)(1)(B) and this section.

(iii) For rules determining the portion of any given loss of X Corporation, Y Corporation, or Z Corporation which may be carried to a taxable year of Z Corporation following its taxable year ending December 31, 1956, see sections 172(b)(2) and 381(c)(1)(C) and paragraph (f) of this section.

(e) Computation of carryovers and carrybacks; general rule—(1) Sequence for applying losses and computation of taxable income. The portion of any net operating loss which is carried back or carried over to any taxable year is the excess, if any, of the amount of the loss over the sum of the taxable income for each of the prior taxable years to which the loss may be carried under sections 172(b)(1) and 381. In determining the taxable income for each such prior taxable year for this purpose, the various net operating loss carryovers and carrybacks to such prior taxable year are considered to be applied in reduction of the taxable income in the order of the taxable years in which the net operating losses are sustained, beginning with the loss for the earliest taxable year. The application of this rule to the taxable income of the acquiring corporation for any taxable year ending after the date of distribution or transfer involves the use of carryovers of the distributor or transfer corporation, and of carryovers and carrybacks of the acquiring corporation. In such instance, the sequence for the use of loss years remains the same, and the requirement is to begin with the net operating loss of the earliest taxable year, whether or not it is a loss of the distributor, transferor, or acquiring corporation. The taxable income of the acquiring corporation for any taxable year ending after the date of distribution or transfer shall be determined in the manner prescribed by section 172(b)(2), except that, if the date of distribution or transfer is on a day other than the last day of a taxable year of the acquiring corporation, the taxable income of such corporation for the taxable year which includes such date shall be computed in the special manner prescribed by section 381(c)(1)(C) and paragraph (f) of this section.

(2) Loss year of transferor or distributor considered prior taxable year. Section 381(c)(1)(C) provides that, for the purpose of determining the net operating loss carryovers under section 172(b)(2), a net operating loss for a loss year of a distributor or transferor corporation which ends on or before the last day of a loss year of the acquiring corporation shall be considered to be a net operating loss for a year prior to such loss year of the acquiring corporation. In a case where the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, the loss years of the distributor or transferor corporations shall be taken into account in the order in which such loss years terminate; if any one of the loss years of a distributor or transferor corporation ends on the same day as the loss year of another distributor or transferor corporation, either loss year may be taken into account before the other.

(3) Years to which losses may be carried. The taxable years to which a net operating loss shall be carried back or carried over are prescribed by section 172(b)(1). Since the taxable year of the distributor or transferor corporation ends with the close of the date of distribution or transfer, such taxable year and the first taxable year of the acquiring corporation which ends after that date shall be considered two separate taxable years to which a net operating loss of the distributor or transferor corporation for any taxable year ending before that date may be carried over. This rule applies even though the taxable year of the distributor or transferor corporation which ends on the date of distribution or transfer is a period of less than twelve months. However, for the purpose of determining under section 172(b)(1) the taxable years to which a net operating loss of the acquiring corporation is carried over or carried back, the first taxable year of the acquiring corporation which ends after the date of distribution or transfer shall be treated as only one taxable year even though such taxable year is considered under section 381(c)(1)(C) and paragraph (f)(2) of this section as two taxable years. The application of this subparagraph may be illustrated by the following example:

Example. X Corporation was organized on January 1, 1954, and thereafter it sustained net operating losses in its calendar

years 1954, 1955, and 1956. On June 30, 1957, X Corporation transferred all its assets to Y Corporation, which was organized on January 1, 1955, in a statutory merger to which section 361 applies. In its taxable year ending June 30, 1957, X Corporation sustained a net operating loss. Y Corporation sustained net operating losses in its calendar years 1955, 1956, and 1958, but had taxable income for the year 1957. The years to which these losses of X Corporation and Y Corporation shall be carried, and the sequence in which carried, are as follows:

Loss year	
X 1954	X 1955, X 1956, X 6/30/57, Y 1957, Y 1958.
X 1955	X 1954, X 1956, X 6/30/57, Y 1957, Y 1958, Y 1959.
Y 1955	Y 1956, Y 1957, Y 1958, Y 1959, Y 1960.
X 1956	X 1954, X 1955, X 6/30/57, Y 1957, Y 1958, Y 1959, Y 1960.
Y 1956	Y 1955, Y 1957, Y 1958, Y 1959, Y 1960, Y 1961.
X 6–30–57	X 1955, X 1956, Y 1957, Y 1958, Y 1959, Y 1960, Y 1961.
Y 1958	Y 1955, Y 1956, Y 1957, Y 1959, Y 1960, Y 1961, Y 1962, Y 1963.

(4) Computation of carryovers in a case where the date of distribution or transfer occurs on last day of acquiring corporation's taxable year. The computation of the net operating loss carryovers from the distributor or transferor corporation and from the acquiring corporation in a case where the date of distribution or transfer occurs on the last day of a taxable year of the acquiring corporation may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1955, and each corporation makes its return on the basis of the calendar year. On December 31, 1956, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1955	($2,000)	($11,000)
1956	(3,000)	10,000
1957	xxx	(15,000)

The sequence in which the losses of X Corporation and Y Corporation are applied, and the computation of the carryovers to Y Corporation's calendar year 1958, may be illustrated as follows:

(i) X Corporation's 1955 loss. The carryover to 1958 is $2,000, computed as follows:

Net operating loss		$2,000
Less:		
X's 1956 taxable income	0	
Y's 1957 taxable income	0	
		0
Carryover		2,000

(ii) Y Corporation's 1955 loss. The carryover to 1958 is $1,000, computed as follows:

Net operating loss		$11,000
Less:		
Y's 1956 taxable income	$10,000	
Y's 1957 taxable income	0	
		10,000
Carryover		1,000

(iii) X Corporation's 1956 loss. The carryover to 1958 is $3,000, computed as follows:

Net operating loss		$3,000
Less:		
X's 1955 taxable income	0	
Y's 1957 taxable income	0	
		0
Carryover		3,000

(iv) Y Corporation's 1957 loss. The carryover to 1958 is $15,000, computed as follows:

Net operating loss			$15,000
Less:			
Y's 1955 taxable income		0	
Y's 1956 taxable income before net operating loss deduction	$10.000		
Minus Y's 1956 net operating loss deduction (i.e., Y's 1955 carryover)	11,000	0	
		0	
Carryover			15,000

(v) Summary of carryovers to 1958. The aggregate of the net operating loss carryovers to 1958 is $21,000, computed as follows:

X's 1955 loss	$2,000
Y's 1955 loss	1,000
X's 1956 loss	3,000
Y's 1957 loss	15,000
Total	21,000

(f) Computation of carryovers and carrybacks when date of distribution or transfer is not on last day of acquiring corporation's taxable year—(1) General rule. Pursuant to the provisions of section 381(c)(1)(C), the taxable income of the acquiring corporation for its taxable year which is a prior taxable year for purposes of section 172(b)(2) and paragraph (e) of this section shall be determined in the manner prescribed in this paragraph, if the date of distribution or transfer occurs within, but not on the last day of, such taxable year.

(2) Taxable year considered as two taxable years. Such taxable year of the acquiring corporation shall be considered as though it were two taxable years, but only for the limited purpose of applying section 172(b)(2). The first of such two

taxable years shall be referred to in this section as the preacquisition part year; the second, as the postacquisition part year. For purposes of section 172(b)(2), a net operating loss of the acquiring corporation shall be carried to the preacquisition part year and then to the postacquisition part year, whereas a net operating loss of a distributor or transferor corporation shall be carried to the postacquisition part year and then to the acquiring corporation's subsequent taxable years. In determining under section 172(b)(2) and this paragraph the portion of any net operating loss of a distributor or transferor corporation which is carried to any taxable year of the acquiring corporation ending after the postacquisition part year, the taxable income (as determined under this paragraph) of the postacquisition part year shall be taken into account but the taxable income of the preacquisition part year (as so determined) shall not be taken into account. Though considered as two separate taxable years for purposes of section 172(b)(2), the preacquisition part year and the postacquisition part year are treated as one taxable year in determining the years to which a net operating loss is carried under section 172(b)(1). See paragraph (e)(3) of this section.

(3) **Preacquisition part year.** The preacquisition part year shall begin with the beginning of such taxable year of the acquiring corporation and shall end with the close of the date of distribution or transfer.

(4) **Postacquisition part year.** The postacquisition part year shall begin with the day following the date of distribution or transfer and shall end with the close of such taxable year of the acquiring corporation.

(5) **Division of taxable income.** The taxable income for such taxable year (computed with the modifications specified in section 172(b)(2)(A) but without any net operating loss deduction) of the acquiring corporation shall be divided between the preacquisition part year and the postacquisition part year in proportion to the number of days in each. Thus, if in a statutory merger to which section 361 applies Y Corporation acquires the assets of X Corporation on June 30, 1960, and Y Corporation has taxable income (computed in the manner so prescribed) of $36,600 for its calendar year 1960, then the preacquisition part year taxable income would be $18,200 ($36,600 × 182/366) and the postacquisition part year taxable income would be $18,400 ($36,600 × 184/366).

(6) **Net operating loss deduction.** After obtaining the taxable income of the preacquisition part year and of the postacquisition part year in the manner described in subparagraph (5) of this paragraph, it is necessary to compute the net operating loss deduction for each such part year. This deduction shall be determined in the manner prescribed by section 172(b)(2)(B) but subject to the provisions of this subparagraph. The net operating loss deduction for the preacquisition part year shall, for purposes of section 172(b)(2) only, be determined in the same manner as that prescribed by section 172(b)(2)(B) but shall be computed without taking into account any net operating loss of the distributor or transferor corporation. Therefore, only net operating loss carryovers and carrybacks of the acquiring corporation to the preacquisition part year shall be taken into account in computing the net operating loss deduction for such part year. The net operating loss deduction for the postacquisition part year shall, for purposes of section 172(b)(2) only, be determined in the same manner as that prescribed by section 172(b)(2)(B) and shall be computed by taking into account all the net operating loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer, as well as the net operating loss carryovers and carrybacks of the acquiring corporation to the postacquisition part year. The sequence in which the net operating losses of the two corporations shall be applied for purposes of this subparagraph shall be determined in the manner prescribed in paragraph (e) of this section.

(7) **Limitation on taxable income.** In no case shall the taxable income of the preacquisition part year or the postacquisition part year, as computed under this paragraph, be considered to be less than zero.

(8) **Cross reference.** If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributors or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the determination of the taxable income of the acquiring corporation for such year pursuant to section 381(c)(1)(C) shall be governed by the rules prescribed in paragraph (c) of § 1.381(c)(1)–2.

(9) **Illustration.** The application of this paragraph may be illustrated by the following example:

Example—(i) Facts. X Corporation was organized on January 1, 1955, and Y Corporation was organized on January 1, 1954. Each corporation makes its return on the basis of the calendar year. On June 30, 1956, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income (computed without any net operating loss deduction) of

the two corporations are as follows, the assumption being made that none of the modifications specified in section 172(b)(2)(A) apply to any taxable year:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	xxx	($5,000)
1955	($65,000)	(20,000)
Ending June 30, 1956	1,000	xxx
1956	xxx	36,600

(ii) **Y Corporation's 1954 loss.** The carryover to 1957 is $0, computed as follows:

Net operating loss		$5,000
Less:		
Y's 1955 taxable income		0
Carryover to Y's preacquisition part year		5,000
Less:		
Y's preacquisition part year taxable income computed under subparagraph (5) of this paragraph ($36,600 × 182/366)	$18,200	
Minus Y's net operating loss deduction for preacquisition part year	xxx	18,200
Carryover to Y's postacquisition part year and also to Y 1957		0

(iii) **X Corporation's 1955 loss.** The carryover to 1957 is $45,600, computed as follows:

Net operating loss		$65,000
Less:		
X's 6/30/56 year taxable income		1,000
Carryover to Y's postacquisition part year		64,000
Less:		
Y's postacquisition part year taxable income computed under subparagraph (5) of this paragraph ($36,-600×184/366)	$18,400	
Minus Y's net operating loss deduction for postacquisition part year (i.e., Y's 1954 carryover of $0 to such part year)		$18,400
Carryover to Y 1957		45,600

(iv) **Y Corporation's 1955 loss.** The carryover to 1957 is $6,800, computed as follows:

Net operating loss		$20,000
Less:		
Y's 1954 taxable income		0
Carryover to Y's preacquisition part year		20,000
Less:		
Y's preacquisition part year taxable income computed under subparagraph (5) of this paragraph	$18,200	
Minus Y's net operating loss deduction for preacquisition part year (i.e., Y's 1954 carryover to such part year)	5,000	
		13,200
Carryover to Y's postacquisition part year		6,800
Less:		
Y's postacquisition part year taxable income computed under subparagraph (5) of this paragraph	$18,400	
Minus Y's net operating loss deduction for postacquisition part year (i.e. Y's 1954 carryover of $0, and X's 1955 carryover of $64,000, to such part year)	64,000	
		0
Carryover to Y 1957		6,800

(v) **Summary of carryovers to 1957.** The aggregate of the net operating loss carryovers to 1957 is $52,400, determined as follows:

Y's 1954 loss	0
X's 1955 loss	$45,600
Y's 1955 loss	6,800
Total	52,400

(g) **Successive acquiring corporations.** An acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of sections 172 and 381, the net operating loss carryovers available to the first acquiring corporation under sections 172 and 381.

(h) **Illustration.** The application of this section may be further illustrated by the following example:

Example—(1) Facts. X Corporation was organized on January 1, 1954, and Y Corporation was organized on January 1, 1955. Each corporation makes its return on the basis of the calendar year. On August 31, 1957, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. The net operating losses and the taxable income of the two corporations for the taxable years involved are set forth in the tabulation below. The taxable income so shown is computed without the modifications required by section 172(b)(2)(A) and without the benefit of any net operating loss deduction. In its calendar year 1957, Y Corporation had a deduction of $365 which is disallowed by section 172(b)(2)(A).

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	($7,000)	xxx
1955	(10,000)	($10,000)
1956	(25,000)	(15,000)
Ending 8-31-57	1,000	xxx
1957	xxx	54,750
1958	xxx	(5,000)
1959	xxx	50,000

(2) **Computation of carryovers and carrybacks.** The sequence in which the losses of X Corporation and Y Corporation are applied and the computation of the carryovers to Y Corporation's calendar year 1959 may be illustrated as follows:

(i) **X Corporation's 1954 loss.** The carryover to 1958, which is the last year to which this loss may be carried, is $0, computed as follows:

Net operating loss		$7,000
Less:		
X's 1955 taxable income	0	
X's 1956 taxable income	0	
		0
Carryover to X's 8/31/57-year		7,000
Less:		
X's 8/31/57-year taxable income		1,000
Carryover to Y's postacquisition part year		6,000
Less:		
Y's postacquisition part year taxable income computed under paragraph (f)(5) of this section (($54,750 + $365) × 122/365)	$18,422	
Minus Y's net operating loss deduction for postacquisition part year	xxx	
		18,422
Carryover to Y 1958		0

(ii) **X Corporation's 1955 loss.** The carryover to 1959 is $0, computed as follows:

Net operating loss		$10,000
Less:		
X's 1954 taxable income	0	
X's 1956 taxable income	0	
		0
Carryover to X's 8/31/57-year		10,000
Less:		
X's 8/31/57-year taxable income before net operating loss deduction	$1,000	
Minus X's net operating loss deduction for 8/31/57-year (i.e., X's 1954 carryover)	7,000	
		0
Carryover to Y's postacquisition part year		10,000
Less:		
Y's postacquisition part year taxable income computed under paragraph (f)(5) of this section	$18,422	
Minus Y's net operating loss deduction for postacquisition part year (i.e., X's 1954 carryover to such part year)	6,000	
		12,422
Carryover to Y 1958 and Y 1959		0

(iii) **Y Corporation's 1955 loss.** The carryover to 1959 is $0, computed as follows:

Net operating loss		$10,000
Less:		
Y's 1956 taxable income		0
Carryover to Y's preacquisition part year		10,000
Less:		
Y's preacquisition part year taxable income computed under paragraph (f)(5) of this section (($54,750 + $365) × 243/365)	$36,693	
Minus Y's net operating loss deduction for preacquisition part year	xxx	
		36,693
Carryover to Y's postacquisition part year, to Y 1958, and to Y 1959		0

(iv) **X Corporation's 1956 loss.** The carryover to 1959 is $22,578, computed as follows:

Net operating loss			$25,000
Less:			
X's 1954 taxable income		0	
X's 1955 taxable income		0	
X's 8/31/57-year taxable income before net operating loss deduction	$1,000		
Minus X's net operating loss deduction for 8/31/57-year (i.e., X's 1954 carryover of $7,000 and X's 1955 carryover of $10,000)	$17,000	0	0
Carryover to Y's postacquisition part year			$25,000
Less:			
Y's postacquisition part year taxable income computed under paragraph (f)(5) of this section		$18,422	
Minus Y's net operating loss deduction for postacquisition part year (i.e., X's 1954 carryover of $6,000, X's 1955 carryover of $10,000 and Y's 1955 carryover of $0, to such part year)		16,000	
			2,422
Carryover to Y 1958			22,578
Less:			
Y's 1958 taxable income			0
Carryover to Y 1959			22,578

(v) **Y Corporation's 1956 loss.** The carryover to 1959 is $0, computed as follows:

Net operating loss		$15,000
Less:		
Y's 1955 taxable income		0
Carryover to Y's preacquisition part year		15,000
Less:		
Y's preacquisition part year taxable income computed under paragraph (f)(5) of this section	$36,693	
Minus Y's net operating loss deduction for preacquisition part		

year (i.e., Y's 1955 carryover to such part year)	10,000	
		26,693
Carryover to Y's postacquisition part year, to Y 1958, and to Y 1959		0

(vi) Y Corporation's 1958 loss. The carryover to 1959 is $0, computed as follows:

Net operating loss		$5,000
Less:		
Y's 1955 taxable income [1]	0	
Y's 1956 taxable income	0	
		0
Carryback to Y's preacquisition part year		$5,000
Less:		
Y's preacquisition part year taxable income computed under paragraph (f)(5) of this section	$36,693	
Minus Y's net operating loss deduction for preacquisition part year (i.e., Y's 1955 carryover of $10,000, and Y's 1956 carryover of $15,000, to such part year)	25,000	
		11,693
Carryback to Y's postacquisition part year and carryover to Y 1959		0

[1] Three-year carryback in case of loss years ending after December 31, 1957.

(vii) Summary of carryovers to 1959. The aggregate of the net operating loss carryovers to 1959 is $22,578, computed as follows:

X's 1955 loss	0
Y's 1955 loss	0
X's 1956 loss	$22,578
Y's 1956 loss	0
Y's 1958 loss	0
Total	22,578

(3) **Net operating loss deduction for 1957.** (i) The net operating loss deduction available to Y Corporation under section 172(a) for the calendar year 1957, determined in accordance with paragraph (d) of this section, is $48,300, computed as follows:

Aggregate of the net operating loss carryovers available to the transferor corporation as of the close of August 31, 1957, but limited by paragraph (d) of this section to $18,300 (Y's 1957 taxable income of $54,750, computed without any net operating loss deduction, multiplied by 122/365)		
Carryover of X's 1954 loss	$6,000	
Carryover of X's 1955 loss	10,000	
Carryover of X's 1956 loss	25,000	
	$41,000	
Aggregate of carryovers, limited as above		$18,300
Carryover of Y's 1955 loss		10,000
Carryover of Y's 1956 loss		15,000
Carryback of Y's 1958 loss		5,000
Net operating loss deduction		48,800

(ii) The taxable income under section 63 for 1957 is $6,450, computed as follows:

Taxable income determined without any net operating loss deduction	$54,750
Less:	
Net operating loss deduction for 1957, as determined under subdivision (i) of this subparagraph	$48,300
Taxable income under section 63	6,450

(4) **Net operating loss deduction for 1959.** The taxable income under section 63 for 1959 is $27,422, computed as follows:

Taxable income determined without any net operating loss deduction	$50,000
Less:	
Net operating loss deduction for 1959 (i.e., the aggregate carryovers determined under subparagraph (2)(vii) of this paragraph)	22,578
Taxable income under section 63	27,422

(5) **Years to which losses may be carried.** The taxable years to which the losses of X Corporation and Y Corporation may be carried, and the sequence in which carried, are as follows:

Loss year	Carried to
X 1954	X 1955, X 1956, X 8/31/57, Y 1957, Y 1958.
X 1955	X 1954, X 1956, X 8/31/57, Y 1957, Y 1958, Y 1959.
Y 1955	Y 1956, Y 1957, Y 1958, Y 1959, Y 1960.
X 1956	X 1954, X 1955, X 8/31/57, Y 1957, Y 1958, Y 1959, Y 1960.
Y 1956	Y 1955, Y 1957, Y 1958, Y 1959, Y 1960, Y 1961.
Y 1958	Y 1955, Y 1956, Y 1957, Y 1959, Y 1960, Y 1961, Y 1962, Y 1963.

[T.D. 6500, 25 FR 11607, Nov. 26, 1960, as amended by T.D. 7564, 43 FR 40493, Sept. 12, 1978]

§ 1.381(c)(1)–2 Net operating loss carryovers; two or more dates of distribution or transfer in the taxable year.

(a) **In general.** If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer within one taxable year of the acquiring corporation, the limitation to be applied under section 381(c)(1)(B) to the aggregate of the net operating loss carryovers to that taxable year from all of the distributor or transferor corporations shall be determined by applying the rules prescribed in paragraph (b) of this section, and the taxable income of the acquiring corporation for that taxable year under sections 381(c)(1)(C) and 172(b)(2) shall be determined by applying the rules prescribed in paragraph (c) of this section. For purposes of this section, the term "postacquisition income" means postacquisition part year taxable income deter-

mined under paragraph (d)(1) of § 1.381(c)(1)–1 by treating the first date of distribution or transfer as though it were the only date of distribution or transfer during the taxable year of the acquiring corporation.

(b) Determination of limitation under section 381(c)(1)(B)—(1) In general. If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, and if the amount of the net operating loss carryovers acquired on the first date of distribution or transfer equals or exceeds the postacquisition income, then the limitation under section 381(c)(1)(B) shall be an amount equal to such postacquisition income. If the amount of the net operating loss carryovers acquired on the first date of distribution or transfer is less than such postacquisition income, then the limitation under section 381(c)(1)(B) shall be determined as provided in subparagraphs (2) through (5) of this paragraph.

(2) Allocation of postacquisition income among partial postacquisition years. That part of the taxable year of the acquiring corporation beginning on the day following the first date of distribution or transfer and ending with the close of the taxable year of the acquiring corporation shall be divided into the same number of partial postacquisition years as the number of dates of distribution or transfer on which the acquiring corporation succeeds to net operating loss carryovers during its taxable year. The first partial postacquisition year shall begin with the day following the first date of distribution or transfer and shall end with the close of the second date of distribution or transfer. The second and succeeding partial postacquisition years shall begin with the day following the close of the preceding such partial year and shall end with the close of the succeeding date of distribution or transfer, or, if there is no such succeeding date, then with the close of the taxable year of the acquiring corporation. The postacquisition income of the acquiring corporation shall be allocated among the partial postacquisition years in proportion to the number of days in each such partial year.

(3) Two dates of distribution or transfer. If the acquiring corporation succeeds to the net operating loss carryovers of two distributor or transferor corporations on two dates of distribution or transfer during the same taxable year of the acquiring corporation, and if the amount of the net operating loss carryovers acquired on the first date equals or exceeds the income for the first partial postacquisition year, the limitation provided by section 381(c)(1)(B) shall be the amount of the postacquisition income. If the income for the first partial postacquisition year exceeds the net operating loss carryovers acquired on the first date of distribution or transfer, the limitation provided by section 381(c)(1)(B) shall be the amount of the postacquisition income reduced by the amount of such excess. The application of this subparagraph may be illustrated by the following example:

Example. (i) X Corporation has taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1955. During 1955, X Corporation acquires the assets of Y and Z Corporations in statutory mergers to each of which section 361 applies, the dates of transfer being January 1 and December 1, respectively. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carryovers	Income for partial years	Reduction
Y........	$ 1,000	$33,400 ($36,500 × 334/365)	$32,400
Z........	50,000	3,000 ($36,500 × 30/365)	0
	51,000	36,400	32,400

(ii) The limitation provided by section 381(c)(1)(B) equals the postacquisition income of $36,400 reduced by $32,400, the excess of the income for the first partial year ($33,400) over the net operating loss carryovers acquired on the first date of transfer ($1,000). Accordingly, the limitation is $4,000 ($36,400 minus $32,400). Therefore, although X Corporation acquired carryovers aggregating $51,000 during 1955, it can utilize only $4,000 of such carryovers in computing its net operating loss deduction for 1955.

(4) Three dates of distribution or transfer. If the acquiring corporation succeeds to the net operating loss carryovers of three distributor or transferor corporations on three dates of distribution or transfer during the same taxable year of the acquiring corporation, and if the amount of the net operating loss carryovers acquired on the first date equals or exceeds the income for the first and second partial postacquisition years, the limitation provided by section 381(c)(1)(B) shall be the amount of the postacquisition income. If the amount of the carryovers acquired on the first date equals or exceeds the income for the first partial postacquisition year but does not equal or exceed the income for the first and second partial postacquisition years, the limitation shall be the amount of the postacquisition income reduced by the excess of the income for the first and second partial postacquisition years over the amount of carryovers acquired on the first and second dates of distribution or transfer. If the income for the first partial postacquisition year exceeds the carryovers acquired on the first date, the limitation shall be the postacquisition income reduced by the sum of

the amount of such excess plus the amount, if any, by which the income for the second partial postacquisition year exceeds the carryovers acquired on the second date. This subparagraph may be illustrated by the following examples:

Example (1). (i) X Corporation has taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1955. During 1955, X Corporation acquires the assets of M, N, and Z Corporations in statutory mergers to each of which section 361 applies, the dates of transfer being January 1, January 31, and December 1, respectively. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carry overs	Income for partial years	Reduction
M	$ 4,000	$ 3,000 ($36,500 × 30/365)	$23,400
N	6,000	30,400 ($36,500 × 304/365)	
Z........	50,000	3,000 ($36,500 × 30/365)	0
	60,000	36,400	23,400

(ii) Since the carryovers of $4,000 acquired on the first date of transfer exceed the income for the first partial year ($3,000), the limitation provided by section 381(c)(1)(B) is the amount of the postacquisition income ($36,400) reduced by the excess of the income for the first and second partial years ($33,400) over the carryovers acquired on the first and second dates of transfer ($10,000). Therefore, the limitation is $13,000 ($36,400 less $23,400).

Example (2). (i) Assume the same facts as in example (1) except that the amount of the net operating loss carryovers acquired from M Corporation is $1,000. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carry overs	Income for partial years	Reduction
M	$ 1,000	$ 3,000 ($36,500 × 30/365)	$ 2,000
N	6,000	30,400 ($36,500 × 304/365)	24,400
Z........	50,000	3,000 ($36,500 × 30/365)	0
	57,000	36,400	26,400

(ii) Since the income for the first partial year ($3,000) exceeds the $1,000 of carryovers acquired on the first date by $2,000, the limitation provided by section 381(c)(1)(B) is the postacquisition income of $36,400 reduced by such excess and also reduced by the excess of the income for the second partial year ($30,400) over the carryovers acquired on the second date of transfer ($6,000). Therefore, the limitation is $10,000 ($36,400 less the sum of $2,000 and $24,400).

Example (3). (i) Assume the same facts as in example (2) except that the carryovers acquired from N Corporation are $75,000. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carry overs	Income for partial years	Reduction
M	$ 1,000	$ 3,000 ($36,500 × 30/365)	$2,000
N	75,000	30,400 ($36,500 × 304/365)	0
Z........	50,000	3,000 ($36,500 × 30/365)	0
	126,000	36,400	2,000

(ii) Since the income for the first partial year ($3,000) exceeds the $1,000 of carryovers acquired on the first date by $2,000, the limitation provided by section 381(c)(1)(B) is the postacquisition income of $36,400 reduced by $2,000, or $34,400. No further reduction is made since the income for the second partial year ($30,400) does not exceed the carryovers of $75,000 acquired on the second date of transfer.

(5) Four or more dates of distribution or transfer. If the acquiring corporation succeeds to the net operating loss carryovers of four or more distributor or transferor corporations on four or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the limitation provided by section 381(c)(1)(B) shall be determined consistently with the methods prescribed in subparagraphs (3) and (4) of this paragraph. The application of this subparagraph may be illustrated by the following example:

Example. (i) X Corporation has taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1955. During 1955, X Corporation acquired the assets of M, N, O, Y, and Z Corporations in statutory mergers to each of which section 361 applied, the dates of transfer being, respectively, January 1, January 31, March 3, April 2, and December 1. The net operating loss carryovers of each transferor corporation and the income for each partial postacquisition year are:

Corp.	Carry overs	Income for partial years	Reduction
M	$ 1,000	$ 3,000 ($36,500 × 30/365)	$2,000
N	4,000	3,100 ($36,500 × 31/365)	
O........	1,000	3,000 ($36,500 × 30/365)	1,100
Y........	10,000	24,300 ($36,500 × 243/365)	14,300
Z........	20,000	3,000 ($36,500 × 30/365)	0
	36,000	36,400	17,400

(ii) The limitation provided by section 381(c)(1)(B) equals the postacquisition income of $36,400 reduced by the sum of (a) the $2,000 excess of the income for the first partial year ($3,000) over the carryovers acquired from M Corporation ($1,000), (b) the $1,100 excess of the income for the second and third partial years ($6,100) over the carryovers acquired from N and O Corporations ($5,000), and (c) the $14,300 excess of the income for the fourth partial year ($24,300) over the carryovers acquired from Y Corporation ($10,000). Accordingly, the limitation is $19,000 ($36,400 minus $17,400). Therefore, although X Corporation acquired carryovers aggregating $36,000 during 1955, it can utilize only $19,000 of such carryovers in computing its net operating loss deduction for 1955.

(c) Determination of taxable income of acquiring corporation under section 381(c)(1)(C)—(1) In general. If the acquiring corporation succeeds to the net operating loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer within one taxable year of the acquiring corporation, then pursuant to section 381(c)(1)(C) the taxable income of the acquiring corporation for its taxable year which is a prior taxable year for purposes of section 172(b)(2) and paragraph (e) of § 1.381(c)(1)-1 shall be determined as provided in this paragraph.

(2) **Division of taxable income.** The taxable income of the acquiring corporation (computed with the modifications specified in section 172(b)(2)(A) but without any net operating loss deduction) shall be allocated proportionately on a daily basis among a preacquisition part year (determined under paragraph (f)(3) of § 1.381(c)(1)-1 by treating the first date of distribution or transfer as though it were the only date of distribution or transfer during the taxable year of the acquiring corporation) and two or more partial postacquisition years (determined as provided in paragraph (b)(2) of this section). The preacquisition part year and each partial postacquisition year shall be considered a separate taxable year, but only for the limited purpose of applying sections 172(b)(2) and 381(c)(1)(C).

(3) **Net operating loss deduction.** The net operating loss deduction of the preacquisition part year and the partial postacquisition years shall be determined consistently with the manner described in paragraph (f)(6) of § 1.381(c)(1)-1 but by taking into account, in the case of any partial postacquisition year, only the net operating loss carryovers and carrybacks of the acquiring corporation and those net operating loss carryovers from a distributor or transferor corporation which become available to the acquiring corporation as of the close of those dates of distribution or transfer which occur before the beginning of that specific partial postacquisition year. The sequence in which the net operating losses of the distributor or transferor and acquiring corporations shall be applied for this purpose shall be determined in the manner described in paragraph (e) of § 1.381(c)(1)-1. Subject to the preceding sentence, the net operating loss carryovers to any specific partial postacquisition year, whether from a distributor, transferor, or acquiring corporation, shall be taken into account in the order of the taxable years in which the net operating losses arose, beginning with the loss for the earliest taxable year.

(4) **Illustration.** The application of this paragraph may be illustrated by the following example:

Example—(i) Facts. X Corporation, which was organized on January 1, 1957, sustained a net operating loss of $20,000 for its calendar year 1957 and had taxable income (computed without any net operating loss deduction) of $36,500 for its calendar year 1958. During 1958, X Corporation acquired the assets of Y and Z Corporations in statutory mergers to each of which section 361 applied, the dates of transfer being June 30 and September 30, respectively. None of the modifications specified in section 172(b)(2)(A) apply to any of the corporations for any taxable year. The taxable income (computed without any net operating loss deduction) and net operating losses of Y and Z Corporations (which were organized on January 1, 1957, and January 1, 1954, respectively) are set forth below:

Taxable year	Acquiring corporation X	Transferor corporation Y	Transferor corporation Z
1954	xxx	xxx	($30,000)
1955	xxx	xxx	1,000
1956	xxx	xxx	1,000
1957	($20,000)	($25,000)	1,000
Ending 6-30-58	xxx	1,000	xxx
Ending 9-30-58	xxx	xxx	1,000
1958	36,500	xxx	xxx

The sequence in which the losses of the acquiring corporation and the transferor corporations are applied and the computation of the carryovers to X Corporation's calendar year 1959 are illustrated in the following subdivisions of this example.

(ii) Computation of taxable income. X Corporation's taxable income, determined in the manner described in subparagraph (2) of this paragraph, for the preacquisition part year and for the partial postacquisition years is as follows:

Year	Taxable income	Computation
Preacquisition part year	$18,100	$36,500 × 181/365
Partial No. 1	9,200	36,500 × 92/365
Partial No. 2	9,200	36,500 × 92/365

(iii) Z Corporation's 1954 loss. The carryover to 1959 is $0, computed as follows:

Net operating loss	$30,000
Less:	
Z's 1955, 1956, 1957, and 9/30/58-3 year income	4,000
Net operating loss carryover to Partial No. 2 year	26,000
Less:	
Partial No. 2 year taxable income	9,200
	16,800

The balance of $16,800 is not carried over to 1959 since X Corporation's taxable year 1958 is the last of the five years to which Z's 1954 loss may be carried under section 172(b)(1).

(iv) Y Corporation's 1957 loss. The carryover to 1959 is $14,800, computed as follows:

Net operating loss		$25,000
Less:		
Y's 6/30/58-year income		1,000
Net operating loss carryover to Partial No. 1 year		24,000
Less:		
Partial No. 1 year taxable income		9,200
Carryover to Partial No. 2 year		14,800
Less:		
X's Partial No. 2 year taxable income	$9,200	
Minus X's net operating loss deduction for Partial No. 2 year (i.e., Z's 1954 carryover of $26,000 to such partial year)	26,000	
		0
Carryover to 1959		14,800

(v) *X Corporation's 1957 loss.* The carryover to 1959 is $1,900, computed as follows:

Net operating loss		$20,000
Less:		
X's preacquisition part year taxable income		18,100
Carryover to Partial No. 1 year		1,900
Less:		
Partial No. 1 year taxable income	$9,200	
Minus X's net operating loss deduction for Partial No. 1 year (i.e., Y's 1957 carryover of $24,000 to such partial year)	24,000	
		0
Carryover to Partial No. 2 year		1,900
Less:		
Partial No. 2 year taxable income	$9,200	
Minus X's net operating loss deduction for Partial No. 2 year (i.e., Z's 1954 carryover of $26,000, and Y's 1957 carryover of $14,800, to such partial year)	40,800	
		0
Carryover to 1959		$1,900

(vi) *Summary of carryovers to 1959.* The aggregate of the net operating loss carryovers to 1959 is $16,700, computed as follows:

Z's 1954 loss	xxx
Y's 1957 loss	$14,800
X's 1957 loss	91,900
Total	16,700

[T.D. 6500, 25 FR 11607, Nov. 26, 1960]

§ 1.381(c)(2)–1 Earnings and profits.

(a) *In general.* (1) Section 381(c)(2) requires the acquiring corporation in a transaction to which section 381(a) applies to succeed to, and take into account, the earnings and profits, or deficit in earnings and profits, of the distributor or transferor corporation as of the close of the date of distribution or transfer. In determining the amount of such earnings and profits, or deficit, to be carried over, and the manner in which they are to be used by the acquiring corporation after such date, the provisions of section 381(c)(2) and this section shall apply. For purposes of section 381(c)(2) and this section, if the distributor or transferor corporation accumulates earnings and profits, or incurs a deficit in earnings and profits, after the date of distribution or transfer and before the completion of the reorganization or liquidation, such earnings and profits, or deficit, shall be deemed to have been accumulated or incurred as of the close of the date of distribution or transfer.

(2) If the distributor or transferor corporation has accumulated earnings and profits as of the close of the date of distribution or transfer, such earnings and profits shall (except as hereinafter provided in this section) be deemed to be received by, and to become a part of the accumulated earnings and profits of, the acquiring corporation as of such time. Similarly, if the distributor or transferor corporation has a deficit in accumulated earnings and profits as of the close of the date of distribution or transfer, such deficit shall (except as hereinafter provided in this section) be deemed to be incurred by the acquiring corporation as of such time. In no event, however, shall the accumulated earnings and profits, or deficit, of the distribution or transferor corporation be taken into account in determining earnings and profits of the acquiring corporation for the taxable year during which occurs the date of distribution or transfer.

(3) Any part of the accumulated earnings and profits, or deficit in accumulated earnings and profits, of the distributor or transferor corporation which consists of earnings and profits, or deficits, accumulated before March 1, 1913, shall be deemed to become earnings and profits, or deficits, of the acquiring corporation accumulated before March 1, 1913, and any part of the accumulated earnings and profits of the distributor or transferor corporation which consists of increase in value of property accrued before March 1, 1913, shall be deemed to become earnings and profits of the acquiring corporation consisting of increase in value of property accrued before March 1, 1913.

(4) If the acquiring corporation and each distributor or transferor corporation has accumulated earnings and profits as of the close of the date of distribution or transfer, or if each of such corporations has a deficit in accumulated earnings and profits as of such time, then the accumulated earnings and profits (or deficit) of each such corporation shall be consolidated as of the close of the date of distribution or transfer in the accumulated earnings and profits account of the acquiring corporation. See subparagraph (6) of this paragraph for determination of the accumulated earnings and profits (or deficit) of the acquiring corporation as of the close of the date of distribution or transfer.

(5) If (i) one or more corporations a party to a distribution or transfer has accumulated earnings and profits as of the close of the date of distribution or transfer, and (ii) one or more of such corporations has a deficit in accumulated earnings and profits as of such time, the total of any such deficits shall be used only to offset earnings and profits accumulated, or deemed to have been accu-

mulated under subparagraph (6) of this paragraph, by the acquiring corporation after the date of distribution or transfer. In such instance, the acquiring corporation will be considered as maintaining two separate earnings and profits accounts after the date of distribution or transfer. The first such account shall contain the total of the accumulated earnings and profits as of the close of the date of distribution or transfer of each corporation which has accumulated earnings and profits as of such time, and the second such account shall contain the total of the deficits in accumulated earnings and profits of each corporation which has a deficit as of such time. The total deficit in the second account may not be used to reduce the accumulated earnings and profits in the first account (although such earnings and profits may be offset by deficits incurred, or deemed to have been incurred, after the date of distribution or transfer) but shall be used only to offset earnings and profits accumulated, or deemed to have been accumulated under subparagraph (6) of this paragraph, by the acquiring corporation after the date of distribution or transfer.

(6) In any case in which it is necessary to compute the accumulated earnings and profits, or the deficit in accumulated earnings and profits, of the acquiring corporation as of the close of the date of distribution or transfer and such date is a day other than the last day of a taxable year of the acquiring corporation—

(i) If the acquiring corporation has earnings and profits for its taxable year during which occurs the date of distribution or transfer, such earnings and profits (a) shall be deemed to have accumulated as of the close of such date in an amount which bears the same ratio to the undistributed earnings and profits of such corporation for such year as the number of days in the taxable year preceding the date following the date of distribution or transfer bears to the total number of days in the taxable year, and (b) shall be deemed to have accumulated after the date of distribution or transfer in an amount which bears the same ratio to the undistributed earnings and profits of such corporation for such year as the number of days in the taxable year following such date bears to the total number of days in such taxable year. For purposes of the preceding sentence, the undistributed earnings and profits of the acquiring corporation for such taxable year shall be the earnings and profits for such taxable year reduced by any distributions made therefrom during such taxable year.

(ii) If the acquiring corporation has an operating deficit for its taxable year during which occurs the date of distribution or transfer, then, unless the actual accumulated earnings and profits, or deficit, as of such date can be shown, such operating deficit shall be deemed to have accumulated in a manner similar to that described in subdivision (i) of this subparagraph.

(7) This paragraph may be illustrated by the following examples, in which it is assumed that none of the accumulated earnings and profits, or deficits, consist of earnings and profits or deficits accumulated, or increase in value of property accrued, before March 1, 1913.

Example (1). (i) M and N Corporations make their returns on the basis of the calendar year. On June 30, 1959, M Corporation transfers all its assets to N Corporation in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	M Corporation (transferor)	N Corporation (acquirer)
Accumulated earnings and profits at close of calendar year 1958	$100,000	$150,000
Earnings and profits of taxable year ending June 30, 1959	15,000	....
Earnings and profits of calendar year 1959	....	36,500
Distributions during calendar year 1959	0	0

(ii) As of the close of June 30, 1959, N acquires from M accumulated earnings and profits of $115,000. Since M and N each has accumulated earnings and profits as of the close of the date of transfer, M's accumulated earnings and profits are added to N's accumulated earnings and profits as of such time. However, no part of M's accumulated earnings and profits is taken into account in determining N's earnings and profits for the calendar year 1959. Therefore, N's earnings and profits for the calendar year 1959 are $36,500.

Example (2). (i) X and Y Corporations make their returns on the basis of the calendar year. On June 30, 1959, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (acquirer)
Accumulated earnings and profits at close of calendar year 1958	$20,000	$100,000
Deficit in earnings and profits for taxable year ending June 30, 1959	80,000	....
Earnings and profits of calendar year 1959	....	36,500
Distributions during calendar year 1959	0	0

(ii) As of the close of June 30, 1959, Y acquires from X a deficit in accumulated earnings and profits in the amount of $60,000. This deficit may be used only to reduce those earnings and profits of Y which are accumulated, or deemed to

have accumulated, after June 30, 1959. Accordingly, as of December 31, 1959, the accumulated earnings and profits of Y amount to $118,100; at such time Y also has a separate deficit in accumulated earnings and profits in the amount of $41,600. These amounts are determined as follows:

Accumulated earnings and profits of Y as of the close of 1958	$100,000
Add:	
Portion of undistributed earnings and profits of Y for 1959 deemed to have accumulated as of close of June 30, 1959 ($36,500 × 181/365)	18,100
Accumulated earnings and profits of Y as of close of June 30, 1959, and also as of Dec. 31, 1959	118,100
Portion of undistributed earnings and profits of Y for 1959 deemed to have accumulated after June 30, 1959 ($36,500 × 184/365)	18,400
Less:	
Deficit in accumulated earnings and profits acquired by Y from X Corporation as of close of June 30, 1959	60,000
Separate deficit in accumulated earnings and profits of Y as of Dec. 31, 1959	41,600

Example (3). Assume the same facts as in example (2), except that on September 15, 1959, Y Corporation makes a cash distribution of $96,500. The entire distribution is a dividend: $36,500 from earnings and profits for the taxable year 1959 and $60,000 from earnings and profits accumulated as of December 31, 1958. Accordingly, as of December 31, 1959, Y has accumulated earnings and profits of $40,000, and also has a separate deficit in accumulated earnings and profits of $60,000. These amounts are determined as follows:

Earnings and profits of Y for calendar year 1959	$36,500
Accumulated earnings and profits of Y as of close of 1958	100,000
Total	136,500
Less:	
Distributions during 1959	96,500
Accumulated earnings and profits of Y as of Dec. 31, 1959	40,000
Deficit in accumulated earnings and profits acquired from X as of close of June 30, 1959	60,000
Less:	
Portion of Y's undistributed earnings and profits for 1959 deemed to have accumulated after June 30, 1959	0
Separate deficit in accumulated earnings and profits of Y as of Dec. 31, 1959	60,000

Example (4). (i) M and N Corporations make their returns on the basis of the calendar year. On June 30, 1959, M Corporation transfers all its assets to N Corporation in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	M Corporation (transferor)	N Corporation (acquirer)
Accumulated earnings and profits at close of calendar year 1958	$100,000	$50,000
Earnings and profits for taxable year ending June 30, 1959	10,000	....
Deficit in earnings and profits for calendar year 1959	....	146,000
Distributions during calendar year 1959	0	0

(ii) Assuming that N has not shown its actual accumulated earnings and profits, or deficit, as of the close of June 30, 1959, N has a deficit in accumulated earnings and profits at such time which amounts to $22,400, determined as follows:

Accumulated earnings and profits of N as of close of 1958	$50,000
Less:	
Portion of deficit in earnings and profits of N for 1959 deemed to have accumulated as of close of June 30, 1959 ($146,000 × 181/365)	72,400
Deficit in accumulated earnings and profits of N as of close of June 30, 1959, and also as of Dec. 31, 1959	22,400

As of the close of June 30, 1959, N acquires from M accumulated earnings and profits in the amount of $110,000, no part of which may be offset by N's own deficit of $22,400; however, such earnings and profits may be offset by deficits incurred, or deemed incurred, by N after June 30, 1959. Thus, as of December 31, 1959, N has the above-mentioned deficit of $22,400; at such time N also has accumulated earnings and profits in the amount of $36,400, determined as follows:

Accumulated earnings and profits acquired from M as of close of June 30, 1959	$110,000
Less:	
Portion of deficit in earnings and profits of N for 1959 deemed to have accumulated after June 30, 1959 ($146,000 × 184/365)	73,600
Accumulated earnings and profits of N as of Dec. 31, 1959	36,400

Example (5). Assume the same facts as in example (4), except that on September 9, 1959, N Corporation makes a cash distribution of $100,000. The amount of $82,000 is a dividend from accumulated earnings and profits, computed as follows:

Accumulated earnings and profits acquired from M as of close of June 30, 1959	$110,000
Less:	
Deficit in earnings and profits of N for 1959 deemed to have accumulated from June 30 through Sept. 8, 1959 ($146,000 × 70/365)	28,000
Accumulated earnings and profits as of close of Sept. 8, 1959	82,000

As of December 31, 1959, N Corporation has a deficit in accumulated earnings and profits of $68,000, computed as follows:

Deficit in accumulated earnings and profits of N as of close of June 30, 1959	$22,400
Add:	
Portion of N's deficit in earnings and profits for 1959 deemed to have accumulated after Sept. 8, 1959 ($146,000 × 114/365)	45,600
Deficit in accumulated earnings and profits of N as of Dec. 31, 1959	68,000

Example (6). (i) X, Y, and Z Corporations make their returns on the basis of the calendar year. On June 30, 1959, X

Corporation and Y Corporation transfer all their assets to Z Corporation in a statutory merger to which section 361 applies. The books of the three corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (transferor)	Z Corporation (acquirer)
Accumulated earnings and profits (or deficit) at close of calendar year 1958	$35,000	($25,000)	($20,000)
Earnings and profits (or deficit) for taxable year ended June 30, 1959	5,000	(5,000)	....
Earnings and profits for calendar year 1959	....	....	36,500
Distributions during 1959	0	0	0

(ii) As of the close of June 30, 1959, Z acquires from Y a deficit in accumulated earnings and profits of $30,000. As of such time, Z's own deficit in accumulated earnings and profits amounts to $1,900, determined as follows:

Deficit in accumulated earnings and profits of Z as of close of 1958	$20,000
Less:	
Portion of undistributed earnings and profits of Z for 1959 deemed to have accumulated as of close of June 30, 1959 ($36,500 × 181/365)	18,100
Deficit in accumulated earnings and profits as of close of June 30, 1959	1,900

The total deficit of $31,900 may be used only to offset earnings and profits of Z accumulated, or deemed to have accumulated, after June 30, 1959; such deficit may not be used to reduce the accumulated earnings and profits of $40,000 acquired from X as of the close of June 30, 1959. Thus, as of December 31, 1959, the accumulated earnings and profits of Z amount to $40,000; at such time Z Corporation also has a separate deficit in accumulated earnings and profits in the amount of $13,500, determined as follows:

Deficit in accumulated earnings and profits as of close of June 30, 1959	$31,900
Less:	
Portion of undistributed earnings and profits of Z for 1959 deemed to have accumulated after June 30, 1959 ($36,500 × 184/365)	18,400
Separate deficit in accumulated earnings and profits as of Dec. 31, 1959	13,500

Example (7). X and Y Corporations make their returns on the basis of the calendar year. On December 31, 1954, X transfers all its assets to Y in a statutory merger to which section 361 applies. The books of the two corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (acquirer)
Accumulated earnings and profits (or deficit) at close of calendar year 1954	($50,000)	$210,000
Earnings and profits (or deficit) for calendar year:		
1955	....	5,000
1956	....	(20,000)
1957	....	70,000
1958	....	60,000
1959	....	55,000
Cash distributions on:		
Sept. 1, 1957	....	80,000
Sept. 1, 1958	....	40,000
Sept. 1, 1959	....	30,000

The balances in the accumulated earnings and profits account and the separate deficit account of Y Corporation at the close of the taxable year involved are as follows:

Year	Deficit acquired from X Corporation	Accumulated earnings and profits of Y Corporation
1954	$50,000	$210,000
1955	45,000	210,000
1956	45,000	190,000
1957	45,000	180,000
1958	25,000	180,000
1959	None	180,000

(b) **Successive acquisitions.** (1) If, as of the date of distribution or transfer, either the acquiring corporation, or the distributor or transferor corporation, or both, is considered under paragraph (a) of this section to be maintaining separate earnings and profits accounts as the result of a prior transaction or transactions to which section 381(a) applied, the accumulated earnings and profits, or deficit in accumulated earnings and profits, of each such corporation shall be combined with the appropriate earnings and profits account of the other such corporation. For example, if, as of the date of transfer, the acquiring corporation and the transferor corporation are each maintaining separate accounts, one containing accumulated earnings and profits and the other containing a deficit in accumulated earnings and profits, the amounts in the two accumulated earnings and profits accounts shall be combined into one account, and the amounts in the two deficit accounts shall be combined into a second account, and the amount in one combined account may not be used to offset the amount in the other combined account.

(2) This paragraph may be illustrated by the following examples, in which it is assumed that none of the accumulated earnings and profits, or deficits, consist of earnings and profits or deficits

accumulated, or increase in value of property accrued, before March 1, 1913.

Example (1). (i) X, Y, and Z Corporations make their returns on the basis of the calendar year. On June 30, 1958, X Corporation transfers all its assets to Z Corporation in a statutory merger to which section 361 applies, and on August 31, 1958, Y Corporation transfers all its assets to Z Corporation in another statutory merger to which section 361 applies. The books of the three corporations reveal the following information:

Description	X Corporation (transferor)	Y Corporation (transferor)	Z Corporation (acquirer)
Accumulated earnings and profits (deficit) at close of calendar year 1957	($40,000)	$10,000	$60,000
Deficit in earnings and profits for taxable year ending June 30, 1958....	(5,000)	....	....
Earnings and profits for taxable year ending Aug. 31, 1958	....	2,000	....
Earnings and profits of calendar year 1958	....	....	36,500
Distributions during calendar year 1958	0	0	0

(ii) As of the close of June 30, 1958, Z acquires from X a deficit in accumulated earnings and profits in the amount of $45,000, which deficit may be used only to reduce those earnings and profits of Z which are accumulated, or deemed to have been accumulated, after June 30, 1958. As of the close of August 31, 1958, Z acquires from Y earnings and profits of $12,000, no portion of which may be reduced by the deficit acquired by Z from X. Accordingly, as of December 31, 1958, Z has accumulated earnings and profits of $90,100, and also has a separate deficit in accumulated earnings and profits of $26,600. These amounts are determined as follows:

Accumulated earnings and profits of Z as of Dec. 31, 1957	$60,000
Add:	
Portion of undistributed earnings and profits of Z for 1958 deemed to have accumulated as of close of June 30, 1958 ($36,500 × 181/365)	18,100
Accumulated earnings and profits of Z as of June 30, 1958	78,100
Add:	
Accumulated earnings and profits acquired by Z from Y as of close of Aug. 31, 1958	12,000
Accumulated earnings and profits of Z as of close of Aug. 31, 1958, and also as of Dec. 31, 1958	90,100
Deficit in accumulated earnings and profits acquired by Z from X as of close of June 30, 1958..................................	45,000
Less:	
Portion of undistributed earnings and profits of Z for 1958 deemed to have accumulated from June 30 through Aug. 31, 1958 ($36,500 × 62/365)..................	6,200
Separate deficit in accumulated earnings and profits of Z as of Aug. 31, 1958	38,800
Less:	
Portion of undistributed earnings and profits of Z for 1958 deemed to have accumulated after Aug. 31, 1958 ($36,500 × 122/365)...........................	12,200
Separate deficit in accumulated earnings and profits of Z as of Dec. 31, 1958	26,600

Example (2). (i) Assume the same facts as in example (1), plus the additional fact that on June 30, 1959, Z Corporation transfers all its assets to M Corporation (which makes its return on the basis of the calendar year) in a statutory merger to which section 361 applies, and that as of such time M Corporation is considered to be maintaining separate earnings and profits accounts as the result of a previous transaction to which section 381(a) applied. The books of the two corporations reveal the following information:

Description	Z Corporation (transferor)	M Corporation (acquirer)
Accumulated earnings and profits as of Dec. 31, 1958..........	$90,100	$50,000
Separate deficit in accumulated earnings and profits as of Dec. 31, 1958	26,600	30,000
Earnings and profits for taxable year ending June 30, 1959	5,000	....
Earnings and profits of calendar year 1959	....	36,500
Distributions during 1959	0	0

(ii) As of June 30, 1959, M acquires from Z accumulated earnings and profits of $90,100, which amount is combined with M's own accumulated earnings and profits of $50,000; M also acquires from Z a deficit in accumulated earnings and profits of $21,600 ($26,600 minus $5,000), which amount is combined with M's own deficit of $11,900. The total deficit of $33,500 may be used only to reduce earnings and profits of M which are accumulated, or deemed to have accumulated, after June 30, 1959. Accordingly, as of December 31, 1959, M has accumulated earnings and profits of $140,100, and also has a separate deficit in accumulated earnings and profits in the amount of $15,100. These amounts are determined as follows:

Deficit of M as of Dec. 31, 1958	$30,000
Less:	
Portion of M's undistributed earnings and profits for 1959 deemed to have accumulated as of close of June 30, 1959 ($36,500 × 181/365)	18,100
Deficit of M as of June 30, 1959........	11,900
Plus:	
Deficit of Z as of June 30, 1959	21,600
Combined deficit of M as of close of June 30, 1959	33,500
Less:	
Portion of M's undistributed earnings and profits for 1959 deemed to have accumulated after June 30, 1959 ($36,500 × 184/365)	18,400
Separate deficit of M as of Dec. 31, 1959	15,100
Accumulated earnings and profits of M as of Dec. 31, 1958, and also as of June 30, 1959	50,000

Accumulated earnings and profits of Z as of Dec. 31, 1958, and also as of June 30, 1959	90,100
Combined accumulated earnings and profits of M as of close of June 30, 1959, and also as of Dec. 31, 1959	140,100

(c) Distribution of earnings and profits pursuant to reorganization or liquidation. (1) If, in a reorganization to which section 381(a)(2) applies, the transferor corporation pursuant to the plan of reorganization distributes to its stockholders property consisting not only of property permitted by section 354 to be received without recognition of gain, but also of other property or money, then the accumulated earnings and profits of the transferor corporation as of the close of the date of transfer shall be computed by taking into account the amount of earnings and profits properly applicable to the distribution, regardless of whether such distribution occurs before or after the close of the date of transfer.

(2) If, in a distribution to which section 381(a)(1) (relating to certain liquidations of subsidiaries) applies, the acquiring corporation receives less than 100 percent of the assets distributed by the distributor corporation, then the accumulated earnings and profits of the distributor corporation as of the close of the date of distribution shall be computed by taking into account the amount of earnings and profits properly applicable to the distributions to minority stockholders, regardless of whether such distributions occur before or after the close of the date of distribution.

(d) Treatment of earnings and profits where assets are transferred to a corporation controlled by the acquiring corporation. If, pursuant to the provisions of paragraph (b)(2) of § 1.381(a)–1, a corporation is considered to be the acquiring corporation even though a part of the acquired assets is transferred to one or more corporations controlled by the acquiring corporation, or all the acquired assets are transferred to two or more corporations controlled by the acquiring corporation, then whether any portion of the earnings and profits received by the acquiring corporation under section 381(c)(2) is allocable to such controlled corporation or corporations shall be determined without regard to section 381. See paragraph (a) of § 1.312–11.

[T.D. 6586, 26 FR 12550, Dec. 28, 1961, as amended by T.D. 6692, 28 FR 12817, Dec. 3, 1963]

§ 1.381(c)(3)–1 Capital loss carryovers.

(a) Carryover requirement. (1) Section 381(c)(3) requires the acquiring corporation in a transaction to which section 381(a) applies to succeed to, and take into account, the capital loss carryovers of the distributor or transferor corporation. To determine the amount of these carryovers as of the close of the date of distribution or transfer, and to integrate them with the capital loss carryovers of the acquiring corporation for purposes of determining the taxable income of the acquiring corporation for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of section 1212 in accordance with the conditions and limitations of section 381(c)(3) and this section.

(2) The capital loss carryovers of the acquiring corporation as of the close of the date of distribution or transfer shall be determined without reference to any capital gains or capital losses of the distributor or transferor corporation. The capital loss carryovers of a distributor or transferor corporation as of the close of the date of distribution or transfer shall be determined without reference to any capital gains or capital losses of the acquiring corporation.

(3) This section contains rules applicable to capital loss carryovers determined without reference to the amendment of section 1212(a) made by section 7 of the Act of September 2, 1964 (Public Law 88–571, 78 Stat. 860) in respect of foreign expropriation capital losses. If the distributor, transferor, or acquiring corporation sustains a net capital loss in a taxable year ending after December 31, 1958, any portion of which is attributable to a foreign expropriation capital loss, such portion shall be carried over to each of the ten succeeding taxable years consistently with the rules prescribed in this section and paragraph (a)(2) of § 1.1212–1.

(b) First taxable year to which carryovers apply. (1) The capital loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall first be carried to the first taxable year of the acquiring corporation ending after that date. This rule applies irrespective of whether the date of distribution or transfer is on the last day, or any other day, of the acquiring corporation's taxable year.

(2) The capital loss carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall be carried to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

(c) Limitation on capital loss carryovers for first taxable year ending after date of distribution or transfer. **(1)** Any capital loss carryover of a distributor or transferor corporation which is available to the acquiring corporation as of the close of the date of distribution or transfer shall be a short-term capital loss of the acquiring corporation in each of the taxable years to which the net capital loss giving rise to such carryover may be carried to the extent provided in section 1212 and this section. However, in the first taxable year of the acquiring corporation ending after the date of distribution or transfer, the total capital loss carryovers of the distributor or transferor corporation which may be treated in that year as short-term capital losses of the acquiring corporation is limited by section 381(c)(3)(B) to an amount which bears the same ratio to the acquiring corporation's capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such first taxable year (determined without regard to any capital loss carryovers) as the number of days in such first taxable year which follow the date of distribution or transfer bears to the total number of days in such taxable year. Thus, if the date of distribution or transfer is the last day of the acquiring corporation's taxable year, there is no limitation under section 381(c)(3)(B) on the amount of such carryovers which may be treated as short-term capital losses of the acquiring corporation for its first taxable year ending after that date.

(2) The limitation provided by section 381(c)(3)(B) shall be applied to the aggregate of the capital loss carryovers of the distributor or transferor corporation without reference to the taxable years in which the net capital losses giving rise to the carryovers were sustained. If the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, then the limitation provided by section 381(c)(3)(B) shall be applied to the aggregate of the capital loss carryovers from all of such distributor or transferor corporations.

(3) If the acquiring corporation succeeds to the capital loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the limitation to be applied under section 381(c)(3)(B) to the aggregate of such carryovers shall be determined consistently with the rules prescribed in paragraph (b) of § 1.381(c)(1)–2.

(4) The application of this paragraph may be illustrated by the following example:

Example. (i) X and Y Corporations are organized on January 1, 1954, and make their returns on the basis of the calendar year. On July 4, 1957, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The net capital losses and the net capital gains (capital gain net income for taxable years beginning after December 31, 1976), (computed without regard to any capital loss carryovers) of the two corporations are as follows:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1954	($5,000)	0
1955	(10,000)	$5,000
1956	(25,000)	(7,000)
Ending 7–4–57	(8,000)	....
1957	....	36,500

(ii) The capital loss carryovers of X Corporation which are available to Y Corporation as of the close of July 4, 1957, amount to $48,000 in the aggregate; but only $18,000 ($36,500 × 180/365) of such amount may be treated as short-term capital losses of Y Corporation for 1957.

(d) Computation of carryovers; general rule—(1) Sequence for applying losses and determination of capital gain net income. Section 1212 provides that a net capital loss sustained in any taxable year (hereinafter referred to as the "loss year") shall be carried over to each of the five succeeding taxable years and treated in each of such succeeding years as a short-term capital loss to the extent not allowed as a deduction against any capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of any taxable years intervening between the loss year and the taxable year to which such loss is carried. For this purpose, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of any intervening taxable year is determined without regard to the net capital loss for the loss year or for any taxable year thereafter, and the various capital loss carryovers from taxable years preceding the loss year to any such intervening taxable year are considered to be applied in reduction of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such year in the order of the taxable years in which the losses were sustained, beginning with the loss for the earliest preceding taxable year. The application of these rules to the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for any taxable year ending after the date of distribution or transfer involves the use of carryovers of the distributor or transferor corporation and of the acquiring corporation. In determining the order in which the capital loss carry-

overs of the distributor or transferor and acquiring corporations from taxable years ending on or before the date of distribution or transfer are considered to be applied in reduction of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for any intervening taxable year ending after such date, the following rules shall apply:

(i) Each taxable year of the distributor or transferor and acquiring corporations which, with respect to the first taxable year of the acquiring corporation ending after the date of distribution or transfer, constitutes a first preceding taxable year, shall be treated as if each such year ended on the same day, whether or not such taxable years actually end on the same day. In like manner, each taxable year of the distributor or transferor and acquiring corporations which, with respect to such first taxable year of the acquiring corporation ending after the date of distribution or transfer, constitutes a second preceding taxable year, shall be treated as if each such year ended on the same day (whether or not such taxable years actually end on the same day), and a similar rule shall be applied with respect to those taxable years of the distributor or transferor and acquiring corporations which constitute third, fourth, and fifth preceding taxable years;

(ii) If in the same preceding taxable year both the distributor or transferor and acquiring corporations incurred a net capital loss which is a carryover to an intervening taxable year of the acquiring corporation ending after the date of distribution or transfer, then in applying such losses in reduction of the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such an intervening year, either such loss may be taken into account before the other; and

(iii) The rules of subdivisions (i) and (ii) of this subparagraph shall apply regardless of the number of distributor or transferor corporations the assets of which are acquired by the acquiring corporation on the same date of distribution or transfer.

(2) **Cross reference.** If the date of distribution or transfer is a day other than the last day of a taxable year of the acquiring corporation, then in determining the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for its first taxable year ending after the date of distribution or transfer, section 1212 and this paragraph shall be applied in the special manner set forth in paragraph (e) of this section.

(3) **Years to which losses may be carried.** The taxable years to which a net capital loss shall be carried are prescribed by section 1212. Since the taxable year of a distributor or transferor corporation ends with the close of the date of distribution or transfer, such taxable year and the first taxable year of the acquiring corporation which ends after that date are considered two separate taxable years to which a net capital loss of the distributor or transferor corporation for any taxable year ending before that date shall be carried. This rule applies even though the taxable year of the distributor or transferor corporation which ends on the date of distribution or transfer is a period of less than twelve months. However, the distribution or transfer has no effect in determining under section 1212 the taxable years to which a net capital loss of the acquiring corporation is carried. For this purpose, the first taxable year of the acquiring corporation which ends after the date of distribution or transfer constitutes only one taxable year even though such taxable year is considered under paragraph (e) of this section as two taxable years for certain purposes. The application of this subparagraph may be illustrated by the following example:

Example. R and S Corporations are organized on January 1, 1954, and both corporations make their returns on the basis of the calendar year. R Corporation has net capital losses for its years 1954, 1955, and 1957, and S Corporation has net capital losses for its years 1954 and 1956. On June 30, 1958, R Corporation transfers all its assets to S Corporation in a statutory merger to which section 361 applies. The taxable years to which these losses of R and S Corporations may be carried are as follows:

Loss year	Carried to
R1954	R1955, R1956, R1957, R6/30/58, S1958.
S1954	S1955, S1956, S1957, S1958, S1959.
R1955	R1956, R1957, R6/30/58, S1958, S1959.
S1956	S1957, S1958, S1959, S1960, S1961.
R1957	R6/30/58, S1958, S1959, S1960, S1961.

(4) **Computation of carryovers in case where date of distribution or transfer occurs on last day of acquiring corporation's taxable year.** The computation of the capital loss carryovers from the distributor or transferor corporation and from the acquiring corporation in a case where the date of distribution or transfer occurs on the last day of a taxable year of the acquiring corporation may be illustrated by the following example:

Example. X and Y Corporations are organized on January 1, 1955, and make their returns on the basis of the calendar year. On December 31, 1956, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The net capital losses and the net capital gains (capital gain net income for taxable years beginning after December 31, 1976) (computed without regard to any capital loss carryovers) of the two corporations are as follows:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1955	($20,000)	($2,000)
1956	(10,000)	(8,000)
1957		$25,000
1958		10,000

The sequence in which the net capital losses of X and Y Corporations are applied, and the computation of the capital loss carryovers to Y Corporation's taxable year 1959, may be illustrated as follows. (For purposes of this example, the carryover from a preceding taxable year of the transferor corporation will be applied before the carryover from the same preceding taxable year of the acquiring corporation):

(i) X Corporation's 1955 loss. The carryover to 1959 is $0, computed as follows:

Net capital loss		$20,000
Less: Y's 1957 net capital gain (computed without regard to any capital loss carryovers)		25,000
Carryover to Y 1958 and Y 1959		0

(ii) Y Corporation's 1955 loss. The carryover to 1959 is $0, computed as follows:

Net capital loss		$2,000
Less:		
Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	$25,000	
Minus capital loss carryovers to Y 1957 (i.e., carryover of $20,000 from X 1955)	20,000	
		5,000
Carryover to Y 1958 and Y 1959		0

(iii) X Corporation's 1956 loss. The carryover to 1959 is $0, computed as follows:

Net capital loss		$10,000
Less:		
Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	$25,000	
Minus capital loss carryovers to Y 1957 (i.e., carryovers of $20,000 from X 1955 and $2,000 from Y 1955)	22,000	
		3,000
Carryover to Y 1958		7,000
Less:		
Y's 1958 net capital gain (computed without regard to any capital loss carryovers)	$10,000	
Minus capital loss carryovers to Y 1958	0	
		10,000
Carryover to Y 1959		0

(iv) Y Corporation's 1956 loss. The carryover to 1959 is $5,000, computed as follows:

Net capital loss		$8,000
Less:		
Y's 1957 net capital gain (computed without regard to any capital loss carryovers)	$25,000	
Minus capital loss carryovers to Y 1957 (i.e., carryovers of $20,000 from X 1955, $2,000 from Y 1955, and $10,000 from X 1956)	32,000	
		0
Carryover to Y 1958		8,000
Less:		
Y's 1958 net capital gain (computed without regard to any capital loss carryovers)	$10,000	
Minus capital loss carryovers to Y 1958 (i.e., carryover of $7,000 from X 1956)	7,000	
		3,000
Carryover to Y 1959		5,000

(e) **Computation of carryovers when date of distribution or transfer is not on last day of acquiring corporation's taxable year—(1) General rule.** If, in determining under paragraph (d) of this section the portion of a net capital loss for any taxable year which is carried over to a succeeding taxable year, an intervening taxable year is a taxable year of the acquiring corporation which includes, but does not end on, the date of distribution or transfer, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of such intervening year shall be determined by applying section 1212 in the special manner provided by this paragraph.

(2) **Taxable year considered as two taxable years.** Such intervening taxable year of the acquiring corporation shall be considered as though it were two taxable years, but only for the limited purpose of computing capital loss carryovers to subsequent taxable years. The first of such two taxable years shall be referred to in this paragraph as the preacquisition part year; the second, as the postacquisition part year. Though considered as two separate taxable years for purposes of this paragraph, the preacquisition part year and the postacquisition part year are treated as one taxable year in determining the years to which a net capital loss is carried under section 1212. See paragraph (d)(3) of this section.

(3) **Preacquisition part year.** The preacquisition part year shall begin with the beginning of such taxable year of the acquiring corporation and shall end with the close of the date of distribution or transfer.

(4) **Postacquisition part year.** The postacquisition part year shall begin with the day following the date of distribution or transfer and shall end with the close of such taxable year of the acquiring corporation.

(5) **Division of capital gain net income.** The capital gain net income (net capital gain for taxable years beginning before January 1, 1977) for such intervening taxable year (computed without regard to any capital loss carryovers) of the acquiring corporation shall be divided between the preacquisition part year and the postacquisition part year in proportion to the number of days in each. Thus, if in a statutory merger to which section 361 applies Y Corporation acquires the assets of X Corporation on June 30, 1956, and Y Corporation has net capital gain (computed in the manner so prescribed) of $36,600 for its calendar year 1956, then the preacquisition part year capital gain net income (net capital gain for taxable years beginning before January 1, 1977) would be $18,200 ($36,600 × 182/366) and the postacquisition part year capital gain net income (net capital gain for taxable years beginning before January 1, 1977) would be $18,400 ($36,600 × 184/366).

(6) **Application of capital loss carryovers.** After obtaining the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the preacquisition part year and postacquisition part year in the manner described in subparagraph (5) of this paragraph, it is necessary to determine the capital loss carryovers which are taken into account with respect to each such part year. The carryovers to be taken into account and the sequence in which such carryovers are applied, shall be determined in accordance with paragraph (d)(1) of this section but subject to the provisions of this subparagraph. With respect to the preacquisition part year, no capital loss carryovers of the distributor or transferor corporation shall be taken into account; that is, only capital loss carryovers of the acquiring corporation shall be taken into account. With respect to the postacquisition part year, capital loss carryovers of both the distributor or transferor corporation and the acquiring corporation shall be taken into account.

(7) **Cross reference.** If an intervening taxable year is a taxable year of the acquiring corporation during which the acquiring corporation succeeds to the capital loss carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer, the capital gain net income (net capital gain for taxable years beginning before January 1, 1977) of the acquiring corporation for such intervening taxable year shall be determined consistently with the rules prescribed in paragraph (c) of § 1.381(c)(1)-2, except that the sequence in which the capital loss carryovers of the distributor or transferor and acquiring corporations shall be applied shall be determined under paragraph (d)(1) of this section.

(8) **Illustration.** The application of this paragraph may be illustrated as follows:

Example. X Corporation is organized on April 1, 1959, and makes its return on the basis of the fiscal year ending March 31. Y Corporation is organized on January 1, 1959, and makes its return on the basis of the calendar year. On June 30, 1961, X Corporation transfers all its assets to Y Corporation in a statutory merger to which section 361 applies. The net capital losses and the net capital gains (capital gain net income for taxable years beginning after December 31, 1976) (computed without regard to any capital loss carryovers) of the two corporations are as follows:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
1959		($24,000)
Ending 3-31-60	($19,000)	
1960		(6,000)
Ending 3-31-61	(5,000)	
Ending 6-30-61	0	
1961		36,500
1962		12,000

The following table shows those taxable years of the transferor and acquiring corporations which, with respect to Y Corporation's calendar year 1961, are first, second, and third preceding taxable years:

Taxable year	X Corporation (transferor)	Y Corporation (acquirer)
First preceding year	Ending June 30, 1961	1960
Second preceding year	Ending March 31, 1961	1959
Third preceding year	Ending March 31, 1960	

The sequence in which the net capital losses of X and Y Corporations are applied, and the computation of the capital loss carryovers to Y Corporation's calendar year 1963, may be illustrated as follows. (For purposes of this example, the carryover from a preceding taxable year of the acquiring corporation will be applied before the carryover from the same preceding taxable year of the transferor corporation):

(i) **X Corporation's 3/31/60 loss.** The carryover to 1963 is $0, computed as follows:

Net capital loss	$19,000
Less: Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph ($36,500 × 184/365)	18,400
Carryover to Y 1962	600
Less: Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	12,000
Carryover to Y 1963	0

(ii) **Y Corporation's 1959 loss.** The carryover to 1963 is $0, computed as follows:

Net capital loss	$24,000

Less: Y's preacquisition part year net capital gain computed under subparagraph (5) of this paragraph ($36,500 × 181/365)		18,100
Carryover to Y's postacquisition part year		5,900
Less:		
Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,400	
Minus capital loss carryovers to postacquisition part year (i.e., carryover of $19,000 from X 3/31/60)	19,000	0
Carryover to Y 1962		5,900
Less:		
Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	$12,000	....
Minus capital loss carryovers to Y 1962 (i.e., carryover of $600 from X 3/31/60)	600	11,400
Carryover to Y 1963		0

(iii) X Corporation's 3/31/61 loss. The carryover to 1963 is $0, computed as follows:

Net capital loss		$5,000
Less:		
Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,400	
Minus capital loss carryovers to postacquisition part year (i.e., carryovers of $19,000 from X 3/31/60 and $5,900 from Y 1959)	24,900	
		0
Carryover to Y 1962		5,000
Less:		
Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	$12,000	
Minus capital loss carryovers to Y 1962 (i.e., carryovers of $600 from X 3/31/60 and $5,900 from Y 1959)	6,500	
		5,500
Carryover to Y 1963		0

(iv) Y Corporation's 1960 loss. The carryover to 1963 is $5,500, computed as follows:

Net capital loss		$6,000
Less:		
Y's preacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,100	
Minus capital loss carryovers to preacquisition part year (i.e., carryover of $24,000 from Y 1959)	24,000	
		0
Carryover to Y's postacquisition part year		6,000
Less:		
Y's postacquisition part year net capital gain computed under subparagraph (5) of this paragraph	$18,400	
Minus capital loss carryovers to postacquisition part year (i.e., carryovers of $19,000 from X 3/31/60, $5,900 from Y 1959, and $5,000 from X 3/31/61)	29,900	0
		0
Carryover to Y 1962		6,000
Less:		
Y's 1962 net capital gain (computed without regard to any capital loss carryovers)	$12,000	
Minus capital loss carryovers to Y 1962 (i.e., carryovers of $600 from X 3/31/60, $5,900 from Y 1959, and $5,000 from X 3/31/61)	11,500	
		$500
Carryover to Y 1963		5,500

(f) Successive acquiring corporations. An acquiring corporation which, in a transaction to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of sections 1212 and 381, the capital loss carryovers available to the first acquiring corporation under sections 1212 and 381.

[T.D. 6552, 26 FR 1985, March 8, 1961, as amended by T.D. 6867, 30 FR 15094, Dec. 12, 1965; T.D. 7728, 45 FR 72650, Nov. 3, 1980]

§ 1.381(c)(4)–1 Method of accounting.

(a) **Carryover requirement—(1) General rule.** (i) Section 381(c)(4) provides that, in a transaction to which section 381(a) applies, an acquiring corporation shall use the same method of accounting used by the distributor or transferor corporation on the date of distribution or transfer unless different methods of accounting were used on that date by several distributor or transferor corporations or by a distributor or transferor corporation and the acquiring corporation. If different methods of accounting were used, the acquiring corporation shall use the method or combination of methods of accounting adopted pursuant to this section.

(ii) The acquiring corporation shall take into its accounts the dollar balances of those accounts of the distributor or transferor corporation representing items of income or deduction which, because of its method of accounting, were not required or permitted to be included or deducted by the distributor or transferor corporation in computing

taxable income for taxable years ending on or before the date of distribution or transfer. The acquiring corporation shall similarly take into its accounts the dollar balances of those accounts of the distributor or transferor corporation which represents reserves in respect of which the distributor or transferor corporation has taken a deduction for taxable years ending on or before the date of distribution or transfer. The acquiring corporation shall also take into its accounts the dollar balance of that account of the distributor or transferor corporation which represents a suspense account established by the distributor or transferor corporation under section 166(f)(4) in taxable years ending on or before the date of distribution or transfer. Items of income and deduction shall have the same character in the hands of the acquiring corporation as they would have had in the hands of the distributor or transferor corporation or corporations if no distribution or transfer had occurred. This section shall have no application to items of income or deduction, or dollar balances, to the extent they are attributable to assets or liabilities not distributed or transferred, and shall have no application to items the tax treatment of which is specifically provided for in other paragraphs of section 381(c). In the case of an obligation of the distributor or transferor corporation which is assumed by the acquiring corporation and which gives rise to a liability (within the meaning of paragraph (a)(4) of § 1.381(c)(16)–1) after the date of distribution or transfer, the deductibility of such an item is determined under this section if it is not deductible under section 381(c)(16) and the regulations thereunder. The amount of the adjustments necessary to reflect a change in accounting method pursuant to this section, the manner in which they are to be taken into account, and the tax attributable thereto shall be determined and computed under section 481 and the regulations thereunder, subject to the rules provided in paragraphs (c) and (d) of this section. Where such change is a change from the accrual to the installment method by a dealer in personal property, section 453(c) and the regulations thereunder apply.

(2) Rules of application. For purposes of section 381(c)(4) and this section, the term "method of accounting" shall have the same meaning as that provided under section 446 and the regulations thereunder. This section shall not be construed as preventing the exercise of any election which may be made by the acquiring corporation without consent of the Commissioner, or preventing the application of section 269 or 482, or the regulations thereunder. For provisions defining the date of distribution or transfer, see paragraph (b) of § 1.381(b)–1. See other paragraphs of section 381(c) and the regulations thereunder for other rules regarding the treatment of the carryover of certain items specifically enumerated therein.

(b) Conditions for continuation of methods of accounting—(1) No differences in methods of accounting. If all the parties to a section 381(a) transaction used the same method of accounting on the date of distribution or transfer, the acquiring corporation shall continue to use such method of accounting, unless the acquiring corporation has obtained the consent of the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a different method of accounting. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation and Y Corporation use the accrual method as their overall method of accounting. Both corporations have established a reserve for bad debts under section 166(c). Pursuant to elections made by each corporation, they are amortizing trademark and trade name expenditures over a 60-month period under section 177, expensing intangible drilling and development costs under section 263(c), and accruing real property taxes ratably under section 461(c). It is assumed that there are no other items to which paragraph (a) of this section might apply. Y Corporation acquires all of the assets of X Corporation in a transaction to which section 381(a) applies. On and after the date of distribution or transfer Y Corporation must continue, without further election, to use the same overall method of accounting and the same accounting treatment of the specified items, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change the methods of accounting. Thus, Y Corporation shall carry over the balance in X Corporation's reserve for bad debts account, shall continue to amortize and deduct over the remaining portion of the 60-month period the unamortized portion of the trademark and trade name expenditures carried over from X Corporation, and shall continue the same treatment of intangible drilling and development costs and of real property taxes.

Example (2). M Corporation and N Corporation use the cash receipts and disbursements method of accounting. N Corporation acquires all of the assets and assumes all the obligations of M Corporation in a transaction to which section 381(a) applies. M Corporation, immediately prior to the transaction, is entitled to receive $10,000 for unbilled services performed, and has billed but not received payment for services performed in an amount of $20,000. It has received but not paid invoices amounting to $18,000, and has received services in the amount of $5,000 for which no invoices have been received. Since M Corporation and N Corporation are both on the cash receipts and disbursements method, N Corporation must continue to use that method, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change its method of accounting. Accordingly, N Corporation must include in income when received the unrealized receivables of M Corporation and may deduct the payment of those obligations of M Corporation which would have been deductible by such corporation if paid by it. Thus, N Corporation shall treat as ordinary income the receipt by it of M Corporation's $30,000 of receivables, and may deduct

upon payment the amount of M Corporation's $23,000 of payables which would have been deductible by it.

Example (3). S Corporation and T Corporation are both publishers and use the accrual method as their overall method of accounting. Both corporations have elected under section 455 to defer prepaid subscription income to the taxable years during which the liability to furnish the newspaper, magazine, or other periodical exists. T Corporation, in a transaction to which section 381(a) applies, acquires all the assets of S Corporation and assumes the liability of such corporation to furnish or deliver the newspaper, magazine, or other periodical. On and after the date of the transfer, T Corporation must continue, without further election, to use the accrual method as its overall method of accounting and to defer prepaid subscription income under section 455, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change the method of accounting. T Corporation shall carry over the closing balance of S Corporation's prepaid subscription income account. The principles in this example would be equally applicable if both corporations had been deferring prepaid subscription income under a method permitted by subsection (e) of section 455.

(2) Separate businesses. If, after the date of distribution or transfer, the trades or businesses of the parties to a transaction described in section 381(a) are operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then the method of accounting employed by the parties to the transaction on the date of distribution or transfer with respect to each trade or business shall be used by the acquiring corporation, unless the acquiring corporation has obtained the consent of the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a different method of accounting, or unless the Commissioner prescribes a different method of accounting under paragraph (b)(1) of § 1.446–1. However, if only a single method of accounting may be employed by a taxpayer with respect to a particular item regardless of the number of separate and distinct trades or businesses operated by such taxpayer, but different methods were employed by the several corporations on the date of distribution or transfer with respect to such item, then the acquiring corporation shall adopt the principal method of accounting determined under paragraph (c) of this section (see subparagraph (2)(iv) thereof) for such item, or the method of accounting determined in accordance with paragraph (d) of this section, whichever is applicable. This subparagraph may be illustrated by the following examples:

Example (1). M Corporation is engaged in a personal service business and uses the cash receipts and disbursements method of accounting. N Corporation is engaged in a retail furniture business and uses the accrual method of accounting. N Corporation acquires the assets of M Corporation in a transaction to which section 381(a) applies. In accordance with paragraph (d) of § 1.446–1, N Corporation operates as a separate and distinct trade or business the personal service business formerly operated by M Corporation. Unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1 to change the method of accounting, N Corporation shall continue to use the cash receipts and disbursements method of accounting with respect to the personal service business formerly operated by M Corporation, and shall use the accrual method of accounting with respect to the retail furniture business.

Example (2). Assume the same facts as in example (1), except that M Corporation has elected under section 171 to amortize bond premium with respect to fully taxable bonds. N Corporation has not made the election to amortize bond premium with respect to such bonds owned by it. N Corporation may not continue separate accounting methods as to amortizable bond premium but must consistently apply only a single method of accounting with respect to such bond premium since the election to amortize bond premium applies to all fully taxable bonds held by the taxpayer. N Corporation shall use the principal method of accounting determined under paragraph (c) of this section for such bond premium, unless it is determined in accordance with paragraph (d) of this section that a different method of accounting is to be used. However, if such principal or different method of accounting is not to amortize bond premium N Corporation is not precluded from making a new election to the extent permitted by section 171.

(3) Integrated businesses. (i) If, after the date of distribution or transfer, any of the trades or business of the parties to a transaction in section 381(a) are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then, to the extent that the same methods of accounting were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or are required to be integrated in accordance with section 446(d) and the regulations thereunder, the acquiring corporation shall continue to employ such methods of accounting, unless the acquiring corporation has obtained the consent of the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a different method of accounting, or unless the Commissioner prescribes a different method of accounting under paragraph (b)(1) of § 1.446–1.

(ii) If, after the date of distribution or transfer, any of the trades or businesses of the parties to a transaction described in section 381(a) are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then, to the extent that different methods of accounting were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or required to be integrated in accordance with section 446(d) and the regulations thereunder, this paragraph shall not apply and the acquiring corporation shall adopt the principal method of accounting determined under paragraph (c) of this section or the method of accounting determined in accordance with paragraph (d) of this section, whichever is applicable.

(iii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). M Corporation and N Corporation both use the accrual method as an overall method of accounting. M Corporation has established a reserve for bad debts while N Corporation uses the specific charge-off method with respect to its bad debts. N Corporation acquires all of the assets of M Corporation in a transaction to which section 381(a) applies and integrates the business formerly operated by M Corporation into the business operated by N Corporation before the date of distribution or transfer. N Corporation shall continue to use the accrual method as its overall method of accounting, unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446-1 to change its method of accounting. N Corporation shall use the principal method of accounting determined under paragraph (c) of this section with respect to bad debts, or the method of accounting determined in accordance with paragraph (d) of this section, whichever is applicable.

Example (2). X Corporation conducts two separate and distinct trades or businesses, a personal service business with respect to which the cash receipts and disbursements method of accounting is used and a manufacturing business with respect to which the accrual method of accounting is used. Y Corporation conducts a manufacturing business and uses the accrual method of accounting. Y Corporation acquires all of the assets of X Corporation in a transaction to which section 381(a) applies. After the date of distribution or transfer, Y integrates the manufacturing business formerly operated by X Corporation into the manufacturing business operated by it and continues to operate as a separate and distinct trade or business the personal service business formerly operated by X Corporation. Unless consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446-1 to change the method of accounting, Y Corporation shall continue to use the accrual method of accounting with respect to the integrated manufacturing business and shall continue to use the cash receipts and disbursements method of accounting with respect to the personal service business.

(4) Rules of application. In any case where the method of accounting employed on the date of distribution or transfer is continued, it will be unnecessary for the acquiring corporation to renew any election previously made by it or by any distributor or transferor corporation with respect to such method of accounting. Also, the acquiring corporation is bound by any election previously made by it or by any distributor or transferor corporation with respect to such method of accounting which is in effect on the date of distribution or transfer to the same extent as though the distribution or transfer had not occurred. If, on the date of distribution or transfer, any party to a section 381(a) transaction had no established method of accounting for any item, or came into existence as a result of the transaction, such party shall not be considered to be using a method of accounting for such item or having an overall method of accounting different from that used by the other parties to the transaction. Where under other sections of the Internal Revenue Code or regulations thereunder a taxpayer is permitted to elect a method of accounting on a project-by-project, job-by-job, or other similar basis (such as the election to charge taxes and carrying charges to capital account under § 1.266-1), that method elected with respect to each project or job shall be deemed to be an established method of accounting only for the project or job for which it is elected. Accordingly, unless two or more of the parties were working on the same project or job and were using different methods of accounting for such project or job before the date of distribution or transfer, the method of accounting previously elected for each project or job must be continued.

(c) Change of method of accounting without consent of Commissioner—(1) General rule. If the acquiring corporation may not continue to use, under the provisions of paragraph (b) of this section, the method of accounting used by it or the distributor or transferor corporation or corporations on the date of distribution or transfer, the acquiring corporation shall use the principal method of accounting of such corporation (as determined under subparagraph (2) of this paragraph), provided that (i) such method of accounting clearly reflects the income of the acquiring corporation, and (ii) the use of such method is not inconsistent with the provisions of any closing agreement entered into under section 7121 and the regulations thereunder. If the principal method of accounting does not meet these requirements, or if there is no principal method of accounting, see subdivision (i) of paragraph (d)(1) of this section. If the acquiring corporation wishes to use a method of accounting other than the principal method of accounting, see subdivision (ii) of paragraph (d)(1) of this section. Whenever this paragraph applies, the increase or decrease in tax resulting from the change from the method of accounting previously used by any of the corporations involved shall be taken into account by the acquiring corporation. The adjustments necessary to reflect such change and such increase or decrease in tax shall be determined and computed in the same manner as if on the date of distribution or transfer each of the several corporations whose method or methods of accounting are required to be changed in accordance with this section had initiated a change in accounting method. In addition, the acquiring corporation shall take into account the portion of such adjustments which is attributable to pre-1954 Code years to the extent not taken into account by any of the other corporations in accordance with the rules provided in section 481(b)(4) and this paragraph. If the principal method of accounting is adopted under this paragraph, it will be unnecessary for the acquiring corporation to renew any

election previously made by it or by any distributor or transferor corporation with respect to such principal method of accounting. Also, in such event, the acquiring corporation is bound by any election previously made by it or by any distributor or transferor corporation with respect to such principal method of accounting which is in effect on the date of distribution or transfer to the same extent as though the distribution or transfer had not occurred.

(2) Principal method of accounting. (i) The determination of the principal method of accounting shall be made with respect to each integrated trade or business operated by the acquiring corporation immediately after the date of distribution or transfer, except with respect to items for which only a single method of accounting may be used by any one taxpayer. See subdivision (iv) of this subparagraph. Such determination for an integrated trade or business shall be made by reference to the methods of accounting used immediately preceding the date of distribution or transfer by each of the component trades or businesses which now constitute the integrated trade or business of the acquiring corporation. The method of accounting for items other than those for which special methods of accounting are provided under chapter 1 of the Code and the regulations thereunder (see § 1.446-1(c)(1)(iii)) shall be governed by the principal overall method determined for such trade or business under subdivision (ii) of this subparagraph. The method of accounting for items for which special methods of accounting are provided under chapter 1 of the Code and the regulations thereunder shall be determined under subdivision (iii) of this subparagraph.

(ii) The principal overall method of accounting of an integrated trade or business is determined by making a comparison of—

(a) The total of the adjusted bases of the assets (determined under section 1011 and the regulations thereunder) immediately preceding the date of distribution or transfer, and

(b) The gross receipts for a representative period (ordinarily the most recent period of 12 consecutive calendar months ending on or prior to the date of distribution or transfer)

of the component trades or businesses which are integrated or are required to be integrated. If more than one component trade or business used the same overall method, then such total assets and gross receipts of each of the component trades or businesses shall be aggregated and compared with the aggregate of such total assets and gross receipts of other component trades or businesses which used a different overall method. If this comparison shows that the one or more component trades or businesses (using a common overall method of accounting) having the greatest total of the adjusted bases of assets also has the greatest amount of gross receipts, then the overall method of accounting of such one or more component trades or businesses shall be the principal overall method of accounting. If this comparison shows that the one or more component trades or businesses (using a common overall method of accounting) having the greatest total of the adjusted bases of assets does not also have the greatest amount of gross receipts, then there is no principal overall method of accounting, and the acquiring corporation shall request the Commissioner to determine the appropriate overall method of accounting for such integrated trade or business in accordance with paragraph (d) of this section.

(iii) The principal method of accounting for an item for which a special method or methods of accounting are provided under chapter 1 of the Code and the regulations thereunder is determined by comparing the amounts of such item and related accounts for the component trades or businesses in accordance with the principles of subdivision (ii) of this subparagraph. Thus, for example, in the case of bad debts, trades or businesses which are components of the integrated trade or business and which had been using the reserve method of accounting will be compared with the other component trades or businesses which had been using the specific charge-off method of accounting. In such a case, the following factors would ordinarily be used in determining the principal method of accounting for bad debts: (a) Sales on account for the most recent period of 12 consecutive calendar months ending on or prior to the date of distribution or transfer, (b) accounts receivable immediately before the date of distribution or transfer, and (c) the amount of debts which became worthless within the meaning of section 166(a) and the regulations thereunder during the most recent period of 12 consecutive calendar months ending on or prior to the date of distribution or transfer. If this comparison shows that the one or more component trades or businesses using the same method of accounting with respect to bad debts have the greater amounts of such sales, accounts receivable, and bad debts, then the method of accounting with respect to bad debts for such one or more component trades or businesses shall be the principal method of accounting. If such comparison shows that the one or more component trades or businesses using the same method of accounting with

respect to bad debts do not have the greater amounts of all of such items, then there is no principal method of accounting with respect to bad debts, and the acquiring corporation shall request the Commissioner to determine the appropriate method of accounting for bad debts for such integrated trade or business in accordance with paragraph (d) of this section.

(iv) If a single method of accounting must be employed by a taxpayer with respect to a particular item regardless of the number of separate and distinct trades or businesses operated by the taxpayer, the principal method of accounting for such item shall be determined by comparing the aggregate amount of the item and related accounts for all the parties to the transaction using a common method, with the aggregate amount of the item and related accounts for those parties to the transaction which use a different common method. The method of accounting of the party having the greatest aggregate amount of such item and related accounts shall be the principal method of accounting for such item.

(3) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). M Corporation, which commenced business in 1955, uses the cash receipts and disbursements method of accounting, while N Corporation uses the accrual method. On June 30, 1961, N Corporation acquires all of the assets of M Corporation in a transaction to which section 381(a) applies. N Corporation then integrates its own business with that of M Corporation. Immediately prior to the transfer the total of the adjusted bases of the assets of N Corporation was greater than that of M Corporation, and for the 12-month period ending on June 30, 1961, the gross receipts of N Corporation were greater than that of M Corporation. Under such circumstances, the accrual method of accounting is the principal overall method of accounting and N Corporation shall use such method for the integrated business, provided it clearly reflects income, unless consent of the Commissioner is obtained in accordance with paragraph (d) of this section to use a different method of accounting. Except as to items for which N Corporation had no established method of accounting and items for which a special method of accounting is provided under chapter 1 of the Code and the regulations thereunder, all adjustments necessary to place the accounts of M Corporation on the accrual method shall be made in accordance with section 481. Any increase or decrease in tax resulting from such adjustments shall be taken into account by N Corporation. Such adjustments and such increase or decrease in tax shall be determined and computed in the same manner as if M Corporation had initiated a change in method of accounting on June 30, 1961.

Example (2). Assume the same facts as in example (1) except that the gross receipts of M Corporation were greater than those of N Corporation for the 12-month period ending on June 30, 1961. N Corporation must, under such circumstances, request the Commissioner to determine the appropriate overall method of accounting, in accordance with the provisions of paragraph (d) of this section. The necessary adjustments to be made by the corporation whose method of accounting is changed shall be made in accordance with section 481 to place the integrated business on the method so adopted. Any increase or decrease in tax resulting from such adjustments shall be taken into account by N Corporation. Such adjustments and such increase or decrease in tax shall be determined and computed in the same manner as if the corporation whose method is changed had initiated a change in method of accounting on June 30, 1961.

Example (3). Assume the same facts as in example (1). Assume further that M Corporation's deduction for wages and salaries for the 12 calendar months ending on June 30, 1961, is larger than N Corporation's deduction for wages and salaries for such period. Since wages and salaries is not an item for which a special method of accounting is provided under chapter 1 of the Code or the regulations thereunder, the necessary adjustments shall be made in accordance with section 481 to place the wages and salary account of M Corporation on the accrual method of accounting, provided such accrual method clearly reflects income, unless consent of the Commissioner is obtained in accordance with paragraph (d) of this section to use a different method of accounting. Any increase or decrease in tax resulting from such adjustments shall be taken into account by N Corporation. Such adjustments and such increase or decrease in tax shall be determined and computed in the same manner as if M Corporation had initiated a change in method of accounting on June 30, 1961.

Example (4). Assume the same facts as in example (1). Assume further that M Corporation used the specific charge-off method with respect to bad debts, and that N Corporation has established a reserve for bad debts. M Corporation's sales on account and bad debts for the 12 calendar months ending June 30, 1961, were larger than those of N Corporation. Also M Corporation's accounts receivable immediately prior to June 30, 1961, were larger than those of N Corporation. Since the method of accounting for bad debts is a special method of accounting under section 166, M Corporation's method of accounting for bad debts is the principal method of accounting for such item. Assuming such method clearly reflects income, appropriate adjustments shall be made in accordance with section 481 to the accounts of N Corporation to place N Corporation on the specific charge-off method with respect to all of its bad debts, as if N Corporation had initiated a change in method of accounting on June 30, 1961, and N Corporation shall include the amount of its reserve for bad debts in gross income, unless consent of the Commissioner is obtained in accordance with paragraph (d) of this section to use a different method of accounting.

Example (5). Assume the same facts as in example (1) except that M Corporation commenced business in 1945. In addition assume that N Corporation is a calendar-year taxpayer and that of the total amount of the adjustments required by section 481 to place the accounts of M Corporation on the accrual method $40,000 is attributable to pre-1954 Code years as described in section 481(b)(4) and the regulations thereunder. Assume further that M Corporation does not elect, under section 481(b)(6), to take the $40,000 portion of the adjustments into account in the manner described in section 481(b)(1) or (2). In computing the increase in tax of M Corporation attributable to the $40,000 portion of the adjustment for the fiscal year ended June 30, 1961, only one-tenth, or $4,000, will be taken into account. The resulting increase in tax shall be taken into account by N Corporation. The remaining nine-tenths of the $40,000 portion of the adjustments, or $36,000, shall be taken into account by N Corporation in the amount of $4,000 in each of the calendar years 1962 through 1970.

(d) Change of method of accounting with consent of Commissioner—(1) General rule. (i) If the acquiring corporation may not continue to use,

under paragraph (b), the method of accounting used by it or the distributor or transferor corporation or corporations on the date of distribution or transfer, and may not under paragraph (c) use the principal method of accounting, or, if there is no principal method of accounting, then the Commissioner shall determine the appropriate method or combination of methods of accounting to be used.

(ii) If an acquiring corporation wishes to use a method or combination of methods of accounting other than the principal method of accounting which is required to be used by paragraph (c) of this section, it shall apply to the Commissioner for permission to use such other method or combination of methods of accounting. Permission to use such other method or combination of methods of accounting will not be granted unless the acquiring corporation and the Commissioner agree to the terms, conditions, and adjustments under which the change to such method or combination of methods will be effected.

(iii) The increase or decrease in tax resulting from the change from the method of accounting previously used by any of the corporations involved shall be taken into account by the acquiring corporation. The adjustments necessary to reflect such change and such increase or decrease in tax shall be determined and computed in the same manner as if, on the date of distribution or transfer, each of the several corporations that were not using the method or combination of methods of accounting adopted pursuant to subdivision (i) or (ii) of this subparagraph had initiated a change in accounting method.

(2) Time and manner of making application. Applications under subparagraph (1) of this paragraph for permission to use a method of accounting or requests for determination of the method of accounting to be used shall be filed with the Commissioner of Internal Revenue, Attention: T:R, Washington, D.C., 20224, not later than 90 days after the date of distribution or transfer, except that in cases where the date of distribution or transfer occurs before August 5, 1964, such applications or requests shall be filed not later than November 3, 1964. The application shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the difference in accounting methods used by the corporations concerned; the method or methods of accounting proposed to be used by the acquiring corporation; and the various amounts, if any, of items of income or deduction which will be duplicated or omitted in the computation of taxable income under such proposed method or methods. The Commissioner may also require such other information as may be necessary in order to determine the appropriate method or combination of methods of accounting to be used by the acquiring corporation.

(e) Special rules applicable to distributions or transfers before August 5, 1964—(1) Statute of limitations bars assessment or refund. If the date of distribution or transfer was before August 5, 1964, and if the assessment of any deficiency or the refund or credit of any overpayment for the taxable year of the acquiring corporation which includes the date of distribution or transfer or any subsequent taxable year is prevented by the operation of any law or rule of law, then this section does not authorize the Commissioner or the acquiring corporation to change any method or methods of accounting in any taxable year of the acquiring corporation. However, the Commissioner or the acquiring corporation may change such method or methods of accounting under the provisions of section 446 and the regulations thereunder or, where applicable, any section of the Internal Revenue Code (other than section 381(c)(4)), or the regulations thereunder, in accordance with which such changes may be made without the consent of the Commissioner.

(2) Statute of limitations does not bar assessment and refund. Except as provided in subparagraph (1) of this paragraph—

(i) If the date of distribution or transfer was before August 5, 1964, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer, (a) adopted or continued a method of accounting consistent with the rules of this section, (b) been granted permission by the Commissioner in accordance with paragraph (e) of § 1.446–1 to use a method or combination of methods of accounting, or (c) adopted a method of accounting that under other sections of the Internal Revenue Code, or regulations thereunder, may be adopted without the consent of the Commissioner, then the method or methods of accounting adopted or continued in the manner described in (a), (b), and (c) shall not be changed, by reason of the rules contained in this section, by the Commissioner or the acquiring corporation for any taxable year ending after the date of distribution or transfer. However, the Commissioner or the acquiring corporation may change such methods of accounting for any such taxable year under the provisions of, and to the extent permitted by, section 446 and the regula-

tions thereunder or, where applicable, any section of the Internal Revenue Code (other than section 381(c)(4)), or regulations thereunder, in accordance with which such change may be made without the consent of the Commissioner.

(ii) If the date of distribution or transfer was before August 5, 1964, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer, adopted or continued a method or methods of accounting other than in the manner described in (a), (b), and (c) of subdivision (i) of this subparagraph, then the acquiring corporation may—

(a) Continue to use the method or methods of accounting so adopted or continued if such method or methods clearly reflect income and if proper adjustments were made to reflect the adoption of such method or methods, or

(b) Adopt the method or methods of accounting prescribed by this section. Such method or methods of accounting shall be adopted by filing an amended return (which includes the proper adjustments required by this section) for the taxable year of the acquiring corporation which includes the date of distribution or transfer, and by filing amended returns for all subsequent taxable years of the acquiring corporation for which returns have previously been filed. Such amended return or returns shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the difference in accounting methods used by the corporations concerned; the method or methods of accounting originally adopted by the acquiring corporation; the method or methods of accounting adopted on the amended return or returns; and the computation of the amount of the adjustments and the resulting increase or decrease in tax.

[T.D. 6750, 29 FR 11263, Aug. 5, 1964, as amended by T.D. 8071, 51 FR 2481, Jan. 17, 1986]

§ 1.381(c)(5)–1 Inventories.

(a) Carryover requirement—(1) General rule. Section 381(c)(5) provides that in a transaction to which section 381(a) applies and in which inventories are received by the acquiring corporation (as defined in § 1.381(a)–1(b)(2)) such inventories shall be taken by the acquiring corporation (in determining its income) on the same basis on which such inventories were taken by the distributor or transferor corporation on the date of distribution or transfer unless different inventory methods were used on that date by several distributor or transferor corporations or by a distributor or transferor corporation and the acquiring corporation. If different methods were used, the acquiring corporation shall use the method or combination of methods of taking inventories adopted pursuant to the provisions of this section.

(2) **Rules of application.** Reference in this section to a method or methods of taking inventories are to be construed as referring to both the method or methods of identifying the goods and the method or methods of valuing the goods. The method or methods of taking inventories shall be determined on the date of distribution or transfer, and any corporation, a party to a section 381(a) transaction whose taxable year does not end on such date shall be considered as using the method or methods of taking inventories that it would have employed had its taxable year ended on such date. The amount of the adjustments necessary to reflect the change in method of taking inventories pursuant to this section, the manner in which they are to be taken into account by the acquiring corporation, and the tax attributable thereto shall be determined and computed under section 481 and the regulations thereunder, subject to the rules provided in paragraphs (c) and (d) of this section. However, in the case of any party to a section 381(a) transaction which changes its method of taking inventories to the last-in, first-out method of identification, the adjustments required by section 472(d) shall be applicable. See paragraph (e) of this section. This section shall not be construed as preventing any party to a section 381(a) transaction from adopting an inventory method which, under the provisions of section 471 or 472, and the regulations thereunder, may be adopted without the consent of the Commissioner. For provisions defining the date of distribution or transfer, see paragraph (b) of § 1.381(b)–1.

(b) Conditions for continuation of methods of taking inventories—(1) No difference in method of taking inventories. (i) If all the parties to a section 381(a) transaction used the same method of taking inventories on the date of distribution or transfer, the acquiring corporation, whether or not immediately after the date of distribution or transfer it operates separate or integrated trades or businesses, shall continue to use such method of taking inventories, unless the acquiring corporation has, in accordance with paragraph (e) of § 1.446–1, obtained the consent of the Commissioner to use a different method of taking inventories. For purposes of this determination, a corporation shall be deemed to be using the last-in, first-out method of taking inventories with respect

to a particular type of goods on the date of the distribution or transfer, if such corporation elects, under the provisions of section 472, to adopt the last-in, first-out method with respect to such goods for its taxable year within which or with which the date of distribution or transfer occurs.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. O and P corporations are manufacturing companies which compute their entire inventories by the use of the last-in, first-out method of identification and the cost basis of valuation. In applying the last-in, first-out method both corporations use the dollar-value method, use the double-extension method, pool under the natural business unit method, and value annual inventory increases by reference to the actual cost of goods most recently purchased. P corporation acquires the assets of O corporation in a transaction to which section 381(a) applies. Under the provisions of this subparagraph, on and after the date of distribution or transfer P corporation must continue to use the last-in, first-out method of identification, the cost basis of valuation, and, in applying the last-in, first-out method, must continue to use the dollar-value method, use the double-extension method, pool under the natural business unit method, and value annual inventory increases by reference to the actual cost of goods most recently purchased, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking inventories.

(2) Separate businesses. (i) If, immediately after the date of distribution or transfer, any of the trades or businesses of the parties to a section 381(a) transaction are operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then the method or methods of taking inventories employed by such parties to the transaction on the date of distribution or transfer with respect to such trades or businesses shall be used by the acquiring corporation, unless the acquiring corporation has, in accordance with paragraph (e) of § 1.446–1, obtained the consent of the Commissioner to use a different method of taking inventories. This subparagraph shall not be construed as precluding the Commissioner under section 471 or 472, and the regulations thereunder, from requiring that the method of taking inventories used in a particular trade or business be used in another trade or business with respect to similar types of goods, if, in the opinion of the Commissioner, the use of such method of taking inventories is necessary for a clear reflection of income.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. R Corporation is engaged in the production of radios and television sets and S Corporation is engaged in the production of washers and driers. In computing their inventories both corporations use the cost basis of valuation. R Corporation uses the last-in, first-out method of identification, whereas S Corporation uses the first-in, first-out method. T Corporation acquires the assets of R Corporation and S Corporation in a transaction to which section 381(a) applies. T Corporation operates as a separate and distinct trade or business, within the meaning of paragraph (d) of § 1.446–1, each of the businesses formerly operated by R Corporation and S Corporation. Under the provisions of this subparagraph, T Corporation is required to continue to use the method of taking inventories previously used by R Corporation and S Corporation, respectively, with respect to each trade or business, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the methods of taking inventories, on and after the dates of transfer. However, the Commissioner may require T Corporation, in accordance with § 1.472–2, to use the last-in, first-out method with respect to that portion of the goods in the trades or businesses formerly operated by S Corporation and T Corporation which are similar to goods in the trade or business formerly operated by R Corporation, if, in his opinion, the use of the last-in, first-out method with respect to such similar goods is necessary for a clear reflection of income.

(3) Integrated businesses—(i) Same inventory method. If, immediately after the date of distribution or transfer, any of the trades or businesses of the parties to a section 381(a) transaction are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then, to the extent that the same methods of taking inventories for particular types of goods were employed on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or are required to be integrated in accordance with paragraph (d) of § 1.446–1, the acquiring corporation shall continue to employ such methods of taking inventories for such types of goods, unless, in accordance with paragraph (e) of § 1.446–1, the acquiring corporation has obtained the consent of the Commissioner to use a different method of taking inventories. This subdivision shall not be construed as precluding the Commissioner under section 471 or 472, and the regulations thereunder, from requiring that the method of taking inventories used with respect to particular types of goods in a particular trade or business operated by the acquiring corporation after the date of distribution or transfer be used with respect to similar types of goods in another trade or business operated by it after such date if, in the opinion of the Commissioner, the use of such method of taking inventories is necessary for a clear reflection of income.

(ii) Different inventory methods. If, immediately after the date of distribution or transfer, any of the trades or businesses of the parties to a section 381(a) transaction are not operated as separate and distinct trades or businesses within the meaning of paragraph (d) of § 1.446–1, then, to the extent that different methods of taking inventories for particular types of goods were employed

on the date of distribution or transfer by the parties to the transaction with respect to any trades or businesses which are integrated or required to be integrated in accordance with paragraph (d) of § 1.446–1, the acquiring corporation shall not be permitted to continue to use such different methods of taking inventories, and shall adopt the method of taking inventories described in paragraph (c) of this section for such types of goods unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

(iii) Examples. The provisions of this subparagraph may be illustrated by the following examples:

Example (1). O and P corporations are manufacturing companies which compute their entire inventories by the use of the last-in, first-out method of identification and the cost basis of valuation. In applying the last-in, first-out method both corporations use the dollar-value method and the double-extension method. However, O corporation pools under the natural business unit method while P corporation pools under the multiple pool method. In addition, O corporation determines the cost of its annual inventory increase by reference to the actual cost of goods most recently purchased, whereas P corporation determines the cost of such increase by reference to the actual cost of the goods purchased during the taxable year in the order of acquisition. P corporation acquires the assets of O corporation in a transaction to which section 381(a) applies and integrates the business formerly operated by O corporation into the business which was operated by P corporation before the date of distribution or transfer. Under the provisions of subdivision (i) of this subparagraph (relating to the same inventory methods in an integrated trade or business), P corporation shall continue to use the last-in, first-out method of identification, the cost basis of valuation, and in applying the last-in, first-out method, shall continue to use the dollar-value method and the double-extension method, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking inventories. However, under the provisions of subdivision (ii) of this subparagraph (relating to different inventory methods in an integrated trade or business), P corporation shall use the method of taking inventories described in paragraph (c) of this section with respect to the method of pooling and the method of determining the cost of annual inventory increases, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

Example (2). Y and Z corporations are engaged in the manufacture of cereal products. Y corporation uses the first-in, first-out method of identification and the cost or market, whichever is lower, method of valuing its inventories, including oats. Z corporation uses the first-in, first-out method of identification and the cost or market, whichever is lower, method of valuing its inventories, except oats which are valued on the cost method. Y corporation acquires all of the assets of Z corporation in a transaction to which section 381(a) applies and integrates the business formerly operated by Z corporation into the business which was operated by Y corporation before the date of distribution or transfer. Under the provisions of subdivision (i) of this subparagraph (relating to the same inventory methods in an integrated trade or business), Y corporation must continue to use the first-in, first-out method with respect to all of its inventories and must continue to use the cost or market, whichever is lower, method of valuing all inventories except oats, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking inventories. In addition, under the provisions of subdivision (ii) of this subparagraph (relating to different inventory methods in an integrated trade or business), Y corporation shall use the method described in paragraph (c) of this section in valuing its inventory of oats, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of valuing its oats.

(4) Rules of application. (i) In any case where the method of taking inventories employed on the date of distribution or transfer is continued, it will be unnecessary for the acquiring corporation to renew any election previously made by it or by any distributor or transferor corporation with respect to such method of taking inventories, and the acquiring corporation is bound by any such elections. If, on the date of distribution or transfer, any party to a section 381(a) transaction had no inventories of a particular type of goods, or such party came into existence as a result of the transaction, such party shall not be considered to be using a method of taking inventories for the particular type of goods different from that used by the other parties to the transaction. If, on the date of distribution or transfer, any one of the parties to the transaction is using the cash receipts and disbursements method of accounting and is not required to take inventories, the determination as to whether such method of accounting is to be continued by the acquiring corporation shall be made in accordance with section 381(c)(4) and the regulations thereunder.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). M corporation is engaged in manufacturing and computes its inventories under the first-in, first-out method of identification and the cost or market, whichever is lower, method of valuation. N corporation is also engaged in manufacturing and computes its inventories under the first-in, first-out method of identification and the cost method of valuation. M corporation acquires the assets of N corporation in a transaction to which section 381(a) applies and M corporation integrates the business formerly operated by N corporation into the business which was operated by M corporation before the date of distribution or transfer. On the date of distribution or transfer, N corporation has inventories of sheet steel while M corporation has no inventories of this particular type of goods. In all other respects the inventories of the two corporations consist of similar types of goods. Under the provisions of this subparagraph, M corporation must use the first-in, first-out method of identification and the cost method of valuation of inventories of sheet steel, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of taking such inventories. For other goods in its inventories M corporation must use the first-in, first-out method of identification (as required by subparagraph (3)(i) of this paragraph), and with respect to the method of valuation, must use the method of taking inventories described

in paragraph (c) of this section, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

Example (2). W corporation is engaged in the business of raising cattle and uses the cash receipts and disbursements method of computing taxable income. Inventories, therefore, are not required. X corporation is also engaged in the business of raising cattle and uses the accrual method of computing taxable income under which it has elected to use the "farm-price method" of valuing inventories. The assets of W corporation are acquired by X corporation in a transaction to which section 381(a) applies and X corporation integrates the business formerly operated by W corporation into the business which was operated by X corporation before the date of distribution or transfer. Under the provisions of this subparagraph, whether X corporation is required to take inventories will depend upon which method of accounting is used by X corporation after the date of distribution or transfer, in accordance with the provisions of section 381(c)(4) and the regulations thereunder. Therefore, if X corporation uses the cash receipts and disbursements method, it will not be required to take inventories into account in computing its taxable income. However, if X corporation uses the accrual method, it must use the "farm-price method" of taking inventories, unless, in accordance with paragraph (d) of this section, consent of the Commissioner is obtained to use a different method of taking inventories.

(c) Change of method of taking inventories without consent of Commissioner—(1) General rule. If, under the provisions of paragraph (b) of this section, the acquiring corporation is not permitted to continue to use the method of taking inventories used by it or by the distributor or transferor corporation or corporations on the date of distribution or transfer, the acquiring corporation shall use the principal method of taking inventories for each particular type of goods of such corporations, as determined under subparagraph (2) of this paragraph: Provided, That:

(i) Such method clearly reflects the income of the acquiring corporation after the distribution or transfer as provided by sections 446(a) and 471 and the regulations thereunder, and

(ii) The use of such method is not inconsistent with the provisions of any closing agreement entered into under section 7121 and the regulations thereunder.

If the principal method does not satisfy the requirements of subdivisions (i) and (ii) of this subparagraph, or if the acquiring corporation wishes to use a method other than the principal method, see paragraph (d)(1) of this section. If the principal method of taking inventories is adopted under this paragraph, it will not be necessary for the acquiring corporation or corporations to renew any election previously made by it or by the distributor or transferor corporation with respect to such principal method of taking inventories, and the acquiring corporation is bound by any such election.

(2) Principal method of taking inventories. The determination of the principal method of taking inventories shall be made with respect to each particular type of goods of each integrated trade or business operated by the acquiring corporation immediately after the date of distribution or transfer. Such determination for each integrated trade or business shall be made by reference to the methods of taking inventories previously used in the component trades or businesses for such types of goods which constitute the subsequent integrated trade or business of the acquiring corporation. For purposes of this determination, a corporation shall be deemed to be using the last-in, first-out method of taking inventories with respect to a particular type of goods on the date of the distribution or transfer, if such corporation elects, under the provisions of section 472, to adopt the last-in, first-out method with respect to such goods for its taxable year within which or with which the date of distribution or transfer occurs. The fair market value of the particular types of goods of each group of component trades or businesses with respect to which one method of taking inventories common to all was employed shall be compared with the fair market value of comparable types of goods of other groups of component trades or businesses with respect to which another method of taking inventories common to all was employed. For purposes of the above comparison and to the extent that particular types of goods are included in inventory by grouping or pooling, then such group or pool shall be considered as a single unit. The total fair market value of such group or pool shall be the basis for comparison in determining the principal method of taking inventories. The method of taking inventories of the group of component trades or businesses having the largest fair market value of such inventories shall be the principal method of taking inventories. For purposes of this subparagraph, the fair market value of the inventories of a component trade or business shall be determined immediately after the date of distribution or transfer.

(3) Examples. The provisions of this paragraph may be illustrated by the following examples:

Example (1). (i) X, Y, and Z corporations are all engaged in the manufacture of sheet metal. In addition, Y and Z corporations are engaged in the manufacture of paper containers. X and Y corporations use the first-in, first-out method of identifying goods and the cost method of valuing all inventories, while Z corporation uses the first-in, first-out method of identifying goods and the cost or market, whichever is lower, method of valuing all inventories. X, Y, and Z corporations enter into a transaction to which section 381(a) applies, and the acquiring corporation integrates the sheet metal businesses formerly operated by X, Y, and Z corporations and also integrates the paper

container businesses formerly operated by Y and Z corporations. Each corporation has the same types of goods in the inventories of its sheet metal business and Y and Z corporations have the same types of goods in the inventories of their paper container businesses. Immediately after the date of distribution or transfer the fair market values of the respective inventories are as follows:

	X	Y	Z
Sheet metal	$10,000	$7,000	$15,000
Paper container....	....	6,000	7,000

(ii) Since X, Y, and Z corporations all used the first-in, first-out method of identifying their inventories as of the date of distribution or transfer, then, under the provisions of paragraph (b)(3)(i) of this section, the acquiring corporation shall continue to use the first-in, first-out method of identifying all goods unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of accounting.

(iii) Since the acquired corporations used different methods of valuing inventories in their sheet metal business and their paper container business, when the businesses were integrated the acquiring corporation must, under the provisions of this paragraph, determine which method of inventory valuation used by the acquired corporations on the date of distribution or transfer is the principal method of inventory valuation for each of such businesses.

(a) In determining which is the principal method of valuing inventories for the sheet metal business pursuant to subparagraph (2) of this paragraph, the total fair market value of the sheet metal inventories of X and Y corporations, $17,000 (*i.e.*, $10,000 + $7,000 = $17,000), is compared with the fair market value of the sheet metal inventory of Z corporation, $15,000. Since the total fair market value of the sheet metal inventories of X and Y corporations ($17,000) exceeds the fair market value of the sheet metal inventory of Z corporation ($15,000), the cost method of valuation used by X and Y corporations is the principal method of taking such inventories, and must be used by the acquiring corporation in valuing such inventories, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

(b) In determining which is the principal method of valuing inventories for the paper container business pursuant to subparagraph (2) of this paragraph, the fair market value of the paper container inventory of Y corporation ($6,000) is compared with the fair market value of the paper container inventory of Z corporation ($7,000). Since the fair market value of the paper container inventory of Z corporation ($7,000) exceeds the fair market value of the paper container inventory of Y corporation ($6,000), the cost or market, whichever is lower, method of valuation used by Z corporation is the principal method of taking such inventories, and must be used by the acquiring corporation in valuing such inventories, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

Example (2). (i) X, Y, and Z corporations are all engaged in the manufacture of electrical appliances. In addition, X and Z corporations are engaged in the manufacture of plastic containers. X corporation uses the first-in, first-out method of identifying goods and the cost method of valuing all inventories. Y and Z corporations use the last-in, first-out method of identifying goods and the cost method of valuing all inventories. In applying the last-in, first-out method, Y corporation uses the dollar value method, the double-extension method, and pools under the natural business unit method, while Z corporation uses the dollar value method, the double-extension method, and pools under the multiple pooling method for all inventories. X, Y, and Z corporations enter into a transaction to which section 381(a) applies, and the acquiring corporation integrates the electric appliance businesses formerly operated by X, Y, and Z corporations and also integrates the plastic container businesses formerly operated by X and Z corporations. Each corporation has the same types of goods in the inventories of its electric appliance business and X and Z corporations have the same types of goods in the inventories of their plastic container businesses. Immediately after the date of distribution or transfer, the fair market values of the respective inventories are as follows:

	X	Y	Z
Electric appliance ..	$13,000	$10,000	$5,000
Plastic container ...	7,000	....	6,000

(ii) Since X, Y, and Z corporations all used the cost method of valuing their inventories as of the date of distribution or transfer, then, under the provisions of paragraph (b)(3)(i) of this section, the acquiring corporation shall continue to use the cost method of valuing all goods unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of accounting.

(iii) Since the acquired corporations used different methods of identifying inventories in their electric appliance business and their plastic container business, when the businesses were integrated the acquiring corporation must, under the provisions of this paragraph, determine which method of inventory identification used by the acquired corporations on the date of distribution or transfer is the principal method of inventory identification for each of such businesses.

(a)(1) In determining which is the principal method of identifying inventories for the electric appliance business pursuant to subparagraph (2) of this paragraph, the fair market value of the electric appliance inventory of X corporation, $13,000, is compared with the total fair market value of the electric appliance inventories of Y and Z corporations, $15,000 (*i.e.*, $10,000 + $5,000 = $15,000). Since the total fair market value of the electric appliance inventories of Y and Z corporations ($15,000) exceeds the fair market value of the electric appliance inventory of X corporation ($13,000), the last-in, first-out method of identification is the principal method of taking the electric appliance inventories and must be used by the acquiring corporation, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

(2) Since Y and Z corporations used different pooling methods, in applying the last-in, first-out method, the acquiring corporation must, under the provisions of this paragraph, determine which pooling method as used by Y and Z corporations on the date of distribution or transfer is the principal method. In making such determination pursuant to subparagraph (2) of this paragraph, the fair market value of the electric appliance inventory of Y corporation ($10,000) is compared with the fair market value of the electric appliance inventory of Z corporation ($5,000). Since the fair market value of the electric appliance inventory of Y corporation ($10,000) exceeds the fair market value of the electric appliance inventory of Z corporation ($5,000), the natural business unit method is the principal method of pooling and must be used by the acquiring corporation in applying the last-in, first-out method with respect to the electric appliance business, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

In addition, under the provisions of paragraph (b)(3)(i) of this section, the acquiring corporation must use the dollar value method and the double-extension method for valuing goods in its electric appliance inventory since Y and Z corporations both used such methods in valuing their electric appliance invento-

ries as of the date of distribution or transfer, unless, in accordance with paragraph (e) of § 1.446–1, consent of the Commissioner is obtained to change the method of accounting.

(b) In determining which is the principal method of identifying inventories for the plastic container business pursuant to subparagraph (2) of this paragraph, the fair market value of the plastic container inventory of X corporation ($7,000) is compared with the fair market value of the plastic container inventory of Z corporation ($6,000). Since the fair market value of the plastic container inventory of X corporation. ($7,000) exceeds the fair market value of the plastic container inventory of Z corporation ($6,000) the first-in, first-out method of identification, as used by X corporation, is the principal method of taking the plastic container inventories and must be used by the acquiring corporation, if the conditions set forth in subparagraph (1) of this paragraph are satisfied.

(d) Change of method of taking inventories with consent of the Commissioner—(1) General rule—(i) Carryover and principal method not permitted. If the acquiring corporation is not permitted, under paragraph (b) of this section, to continue to use the method of taking inventories used by it or the distributor or transferor corporation or corporations on the date of distribution or transfer, and is not permitted, under paragraph (c) of this section, to use the principal method of taking inventories, then such acquiring corporation must request the Commissioner to determine the appropriate method of taking inventories.

(ii) Principal method required. If the acquiring corporation wishes to use a method of taking inventories other than the principal method of taking inventories which is required to be used under paragraph (c) of this section, it shall apply to the Commissioner for permission to use such other method of taking inventories. Permission to use such other method of taking inventories will not be granted unless the acquiring corporation and the Commissioner agree to the terms, conditions, and adjustments under which the change to such method will be effected.

(2) Time and manner of making application. Request for a determination of the method of taking inventories to be used under subparagraph (1)(i) of this paragraph or applications for permission to use a method of taking inventories under subparagraph (1)(ii) of this paragraph shall be filed with the Commissioner of Internal Revenue, Attention: T:I:C, Washington, D.C. 20224, not later than 90 days after the date of distribution or transfer, except that in cases where the date of distribution or transfer occurs before January 15, 1975, such applications or requests shall be filed not later than 90 days after such date. The application shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the differences in methods of taking inventories used by the corporations concerned; the method of taking inventories proposed to be used by the acquiring corporations; and the amount of adjustments necessary to prevent duplication or omission of items in the computation of taxable income under such proposed method. The Commissioner may also require such other information as may be necessary in order to determine the proper method of taking inventories to be used by the acquiring corporation.

(e) Treatment of layers of inventories by the acquiring corporation and rules for making adjustments—(1) In general. This paragraph provides rules for treating layers of inventories by the acquiring corporation and rules for making adjustments, once the acquiring corporation's method of taking inventories for its taxable year including the date of distribution or transfer has been determined in accordance with the rules set forth in paragraphs (a) through (d) of this section. Thus, for example, if the acquiring corporation uses the last-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, either because such corporation elects the last-in, first-out method of taking inventories under the provisions of section 472 for such year or because such method is otherwise determined to be the principal method of taking inventories under paragraph (c)(2) of this section, then such corporation shall integrate its layers of inventories and make the necessary adjustments in accordance with the rules under paragraph (e)(2) of this section.

(2) Acquiring corporation uses last-in, first-out method—(i) Dollar-value method—(a) Distributor or transferor corporation using last-in, first-out method. In any case where the acquiring corporation is required or permitted to use the dollar value method of pricing inventories on the last-in, first-out method for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which used the last-in, first-out method for its taxable year in which the distribution or transfer occurred shall be placed on the dollar value method pursuant to the rules contained in paragraph (f) of § 1.472–8, and then such inventories shall be integrated with the inventories of the acquiring corporation. If pools of each corporation are permitted or required to be combined, they shall be combined in accordance with the principles set forth in paragraph (g)(2) of § 1.472–8. For purposes of combining pools, all base-year inventories or layers of increment which occur in taxable years includ-

ing the same December 31 shall be combined. A base-year inventory or layer of increment occurring in any short taxable year not including a December 31 or in the final taxable year of a distributor or transferor corporation shall be merged with and considered a layer of increment of its immediately preceding taxable year.

(b) Distributor or transferor corporation not using last-in, first-out method. In any case where the acquiring corporation is required or permitted to use the last-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which did not use the last-in, first-out method for its taxable year in which the distribution or transfer occurred shall be treated by the acquiring corporation as having been acquired at their average unit cost in a single transaction on the date of distribution or transfer. Thus, where the acquiring corporation is required or permitted to use the dollar value method of pricing inventories, if an item of inventory is to be combined in an existing dollar value pool, such item shall be treated as if it were purchased at its average unit cost on the date of distribution or transfer with respect to such pool. On the other hand, if such item is not to be combined in an existing pool and the taxpayer otherwise uses LIFO with respect to such item, such item will be treated as if it were purchased at its average unit cost on the date of distribution or transfer with respect to a new pool (if any), with the base-year being the year of distribution or transfer. Adjustments resulting from a restoration to cost of any write-down to market value of such inventories of a distributor or transferor corporation shall be taken into account by such corporation in its final taxable year (where such year is closed by reason of section 381(b)). See section 472(d).

(ii) **Specific goods method**—(a) Distributor or transferor corporation using last-in, first-out method. In any case where the acquiring corporation is required or permitted to use the specific goods method of pricing inventories on the last-in, first-out method for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which used the last-in, first-out method for its taxable year in which the distribution or transfer occurred shall be treated by the acquiring corporation as having the acquisition dates and costs of the distributor or transferor corporation.

(b) Distributor or transferor not using last-in, first-out method. See paragraph (e)(1)(i)(b) of this section.

(3) **Acquiring corporation uses first-in, first-out method**—(i) **Distributor or transferor corporations not using first-in, first-out method.** In any case where the acquiring corporation is permitted or required to use the first-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which did not use the first-in, first-out method shall be treated by the acquiring corporation as having the same acquisition dates and costs which such inventory would have had if the distributor or transferor corporation had been using the first-in, first-out method for its taxable year in which the distribution or transfer occurred. However, if the acquiring corporation values its inventories at cost or market, whichever is lower, then the acquired inventories shall be treated as having been acquired at cost or market, whichever is lower.

(ii) **Distributor or transferor corporation using first-in, first-out method.** In any case where the acquiring corporation is required or permitted to use the first-in, first-out method of taking inventories for its taxable year including the date of distribution or transfer, the inventories of each distributor or transferor corporation which used such method for its taxable year in which the distribution or transfer occurred shall be treated by the acquiring corporation as having the same acquisition dates and costs as the distributor or transferor corporations. However, where the acquiring corporation values its inventories at cost or market, whichever is lower, then the acquiring corporation shall treat the acquired inventories as having been acquired at cost or market, whichever is lower.

(4) **Adjustments.** Except as provided in paragraph (e)(1) of this section with respect to any adjustments under section 472(d), the adjustments necessary to reflect the change from the method of taking inventories previously used by any of the corporations involved (including any adjustments required by section 481), shall be determined and computed in the same manner as if on the date of distribution or transfer, each of the several corporations that were not using the method of taking inventories used by the acquiring corporation for its taxable year including the date of distribution or transfer had initiated a change in the method of taking inventories. However, such adjustments (as an item of income or deduction, as the case may be) shall be taken into account solely by the acquiring corporation in computing its taxable income.

(f) Basis of inventories received. The basis of inventories received by the acquiring corporation from a distributor or transferor corporation shall be determined in accordance with section 334(b)(1) or 362(b), and the regulations thereunder. See also section 1013, and the regulations thereunder.

(g) Additional rules applicable to distributions or transfers before January 15, 1975—(1) Statute of limitations bars assessment or refund. If the date of distribution or transfer was before January 15, 1975, and if the assessment of any deficiency or the refund or credit of any overpayment for the taxable year of the acquiring corporation which includes the date of distribution or transfer or any subsequent taxable year is prevented by the operation of any law or rule of law, then this section does not authorize the Commissioner or the acquiring corporation to change any method or methods of computing inventories in any taxable year of the acquiring corporation. However, the Commissioner or the acquiring corporation may change such method or methods of computing inventories under the provisions of section 446, 471, or 472 and the regulations thereunder.

(2) Statute of limitations does not bar assessment and refund. Except as provided in subparagraph (1) of this paragraph—

(i) If the date of distribution or transfer was before January 15, 1975, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer:

(a) Adopted or continued a method or methods of taking inventories consistent with the rules of this section,

(b) Been granted permission by the Commissioner, in accordance with section 446, 471, or 472 and the regulations thereunder, to use a method or methods of taking inventories, or

(c) Adopted a method or methods of taking inventories that, under section 446, 471, or 472 and the regulations thereunder may be adopted without the consent of the Commissioner,

then the method or methods of taking inventories adopted or continued in the manner described in (a), (b), or (c) of this subdivision, shall not be changed, by reason of the rules contained in this section, by the Commissioner or by the acquiring corporation for any taxable year ending after the date of distribution or transfer. However, the Commissioner or the acquiring corporation may change such method or methods of taking inventories for any such taxable year under the provisions of, and to the extent permitted by, section 446, 471, or 472 and the regulations thereunder.

(ii) If the date of distribution or transfer was before January 15, 1975, and the acquiring corporation has, for the taxable year which includes the date of distribution or transfer, adopted or continued a method or methods of taking inventories other than in the manner described in (a), (b), or (c) of subdivision (i) of this subparagraph, then the acquiring corporation may—

(a) Continue to use the method or methods of taking inventories so adopted or continued if such method or methods clearly reflect income and if proper adjustments were made to reflect the adoption of such method or methods, or

(b) Adopt the method or methods of taking inventories prescribed by this section.

Such method or methods of taking inventories shall be adopted by filing an amended return (which includes the proper adjustments required by this section) for the taxable year of the acquiring corporation which includes the date of distribution or transfer, and by filing amended returns for all subsequent taxable years of the acquiring corporation for which returns have previously been filed. Such amended return or returns shall be accompanied by a copy of the statement described in paragraph (b)(3) of § 1.381(b)–1, and by a statement specifying the nature of the transaction which causes section 381 to apply; the difference in methods of taking inventories used by the corporation concerned; the method or methods of taking inventories originally adopted by the acquiring corporation; the method or methods of taking inventories adopted on the amended return or returns; and the computation of the amount of the adjustments and the resulting increase or decrease in tax.

(h) Effective date. This section is applicable with respect to taxable years beginning after January 15, 1975. However, if a taxpayer wishes to rely on the rules stated in this section for taxable years beginning before January 15, 1975 it may do so, subject to the provisions of paragraph (g) of this section.

[T.D. 7344, 40 FR 2684, 3289, Jan. 15, 1975]

§ 1.381(c)(6)–1 Depreciation method.

(a) Carryover requirement—(1) Distributions in taxable years ending before July 25, 1969. (i) Section 381(c)(6) provides that if, in a transaction in a taxable year which ends before July 25, 1969, to which section 381(a) applies, an acquiring cor-

poration acquires depreciable property from a distributor or transferor corporation which computes its allowance for the depreciation of the property under section 167(b)(2), (3), or (4), the acquiring corporation shall compute its depreciation allowance by the same method used by the distributor or transferor corporation with respect to such property. Thus, if the distributor or transferor corporation used the sum of the years-digits method under section 167(b)(3) with respect to an asset distributed or transferred to an acquiring corporation, the acquiring corporation will be required to use the sum of the years-digits method with respect to such asset acquired. The computation of the depreciation allowance with respect to the property acquired shall be made under the provisions of section 167 and the regulations thereunder.

(ii) The rules provided in section 381(c)(6) and subdivision (i) of this subparagraph will apply only with respect to that part or all of the basis of the property in the hands of the acquiring corporation immediately after the date of distribution or transfer as does not exceed the basis of the property in the hands of the distributor or transferor corporation on the date of the distribution or transfer. For this purpose, the basis of the property in the hands of the distributor or transferor corporation shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. For provisions defining the date of distribution or transfer see § 1.381(b)–1(b).

(2) Distributions in taxable years ending after July 24, 1969. (i) Section 381(c)(6) provides that if, in a transaction in a taxable year ending after July 24, 1969, to which section 381(a) applies, an acquiring corporation acquires depreciable property from a distributor or transferor corporation which computes its allowances for the depreciation of the property under subsection (b), (j), or (k) of section 167, the acquiring corporation shall compute its depreciation allowance by the same method used by the distributor or transferor corporation with respect to such property. Thus, if the distributor or transferor corporation used the straight line method under section 167(b)(1) with respect to an asset distributed or transferred to an acquiring corporation, the acquiring corporation will be required to use the straight line method with respect to such asset. Similarly, if the distributor or transferor corporation elected to compute depreciation under section 167(k) with respect to property attributable to rehabilitation expenditures, and such property is transferred to an acquiring corporation, the acquiring corporation will be required to compute depreciation under section 167(k) with respect to the property acquired. The computation of the depreciation allowance with respect to the property acquired shall be made under the provisions of section 167 and the regulations thereunder.

(ii) The rules provided in section 381(c)(6) and subdivision (i) of this subparagraph shall apply only with respect to that part or all of the basis of the property in the hands of the acquiring corporation immediately after the date of distribution or transfer as does not exceed the basis of the property in the hands of the distributor or transferor corporation on the date of the distribution or transfer. For this purpose, the basis of the property in the hands of the distributor or transferor corporation shall be the adjusted basis provided in section 1011 for the purpose of determining gain on the sale or other disposition of such property. For provisions defining the date of distribution or transfer see § 1.38(b)–1(b).

(b) Portion in excess of distributor or transferor corporation's basis—(1) General rule. With respect to that part of the basis of the depreciable property (other than certain section 1250 property described in subparagraph (2) of this paragraph) which in the hands of the acquiring corporation exceeds the adjusted basis to the distributor or transferor corporation, the acquiring corporation may use any reasonable method of computing depreciation, other than the methods provided in section 167(b)(2), (3), or (4). See paragraph (b) of § 1.167(b)–0 for methods which are acceptable under section 167(a) with respect to such property. See also sections 334(b)(1) and 362(b) for the determination of basis of property in the hands of the acquiring corporation in connection with a transaction to which section 381(a) applies.

(2) Section 1250 property. With respect to that part of the basis of section 1250 property acquired after July 24, 1969, which in the hands of the acquiring corporation exceeds the adjusted basis to the distributor or transferor corporation, the acquiring corporation shall be subject to the limitations contained in section 167(j)(4) (relating to used section 1250 property) or 167(j)(5) (relating to used residential rental property). Thus, for example, if section 1250 property which is not residential rental property is acquired in a section 381(a) transaction after July 24, 1969, the straight line method of depreciation (or other method allowable under section 167(j)(4)(B)) is the only acceptable method with respect to that portion of the basis of the property which, in the hands of the

acquiring corporation, exceeds the adjusted basis to the transferor or distributor corporation.

(c) Records required. Records shall be maintained in sufficient detail to identify any depreciable property to which this section applies, and to establish the basis thereof.

(d) Agreement under section 167(d). To the extent not inconsistent with paragraph (b) of this section, an acquiring corporation shall be treated as the distributor or transferor corporation in the case of an agreement between the distributor or transferor corporation and the district director under section 167(d) and § 1.167(d)–1 with respect to property to which section 381(c)(6) and this section apply. Thus, in the case where the basis of an asset in the hands of an acquiring corporation exceeds the basis of such asset in the hands of the distributor or the transferor corporation, such an agreement will not have the effect of permitting the acquiring corporation to compute its depreciation allowance with respect to such excess basis under the methods provided in section 167(b)(2), (3), or (4). However, the provisions of the agreement will continue to apply with respect to the useful life of the asset.

(e) Change of method of depreciation. Although the acquiring corporation is required to use the method of computing depreciation used by the distributor or transferor with respect to depreciable property to which this section applies, such acquiring corporation may use another method with respect to such property if consent of the Commissioner is obtained in accordance with paragraph (e) of § 1.446–1. Further, subject to the provisions of paragraph (b) of § 1.167(e)–1 the acquiring corporation may change from the declining balance method described in section 167(b)(2) to the straight line method without consent of the Commissioner.

(f) Successive transactions to which section 381(a) applies. The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, for example, if X Corporation, a transferor corporation, used the sum of the years-digits method under section 167(b)(3) with respect to an asset transferred to Y Corporation, an acquiring corporation, in a transaction to which section 381(a) applies, and subsequently Y Corporation, using the same method, transfers such asset to Z Corporation in a transaction to which section 381(a) also applies, then Z Corporation shall be required to use the sum of the years-digits method with respect to such asset.

(g) Illustration. The application of this section may be illustrated by the following example:

Example. M and N Corporations compute their taxable incomes on the basis of the calendar year. On December 31, 1959, M Corporation transfers all of its assets to N Corporation in a transaction to which section 381(a) applies. Included among these assets is an item of depreciable property which on that date has an adjusted basis (for determining gain) of $800,000 after M Corporation takes into account for 1959 its allowance for depreciation under section 167(b)(2). The basis attributable to the asset under section 362(b) is determined to be $900,000 in the hands of N Corporation. Under the provisions of section 381(c)(6) and paragraph (a) of this section, N Corporation is required to compute its allowance for the depreciation of the asset under section 167(b)(2) for 1960 and subsequent years but only in respect of $800,000 of its basis. N Corporation may use any reasonable method other than the methods provided in section 167(b)(2), (3), or (4) in computing its depreciation allowance of the remaining $100,-000.

[T.D. 6559, 26 FR 2983, April 7, 1961, as amended by T.D. 7166, 37 FR 5246, March 11, 1972; 37 FR 6400, March 29, 1972]

§ 1.381(c)(8)–1 Installment method.

(a) Carryover requirement. (1) Section 381(c)(8) provides that if, in a transaction to which section 381(a) applies, an acquiring corporation acquires installment obligations, the income from which the distributor or transferor corporation has elected under section 453 and the regulations thereunder to report on the installment method, then the acquiring corporation shall be treated as the distributor or transferor corporation would have been treated under section 453 had it not transferred the installment obligations. Thus, if the distributor or transferor corporation had properly elected to return income from the sale or other disposition of property giving rise to the obligations on the installment method, then the acquiring corporation shall be required to return the income from all such installment obligations in the same manner and to the same extent as the distributor or transferor corporation, unless consent of the Commissioner to use another method is obtained in accordance with paragraph (e) of § 1.446–1. Amounts received by the acquiring corporation on or after the date of distribution or transfer with respect to an installment sale made by the distributor or transferor corporation will not be taken into account in applying the limitation under section 453(b)(2) with respect to the amount of payments received in the year of sale or other disposition.

(2) Section 381(c)(8) and this section have no application to sales or other dispositions of property made by the acquiring corporation on or after the date of distribution or transfer. For provisions defining the date of distribution or transfer, see

§ 1.381(b)–1(b). See section 381(c)(4) and the regulations thereunder for rules relating to the proper method or combination of methods of accounting to be used by the acquiring corporation.

(b) Basis of obligations. The basis in the hands of an acquiring corporation of installment obligations described in section 381(c)(8) and paragraph (a) of this section shall be the same as in the hands of the distributor or transferor corporation.

(c) Repossession of property sold in prior years. If the acquiring corporation repossesses property, previously sold by the distributor or transferor corporation, by reason of default by the purchaser in payment of the acquired installment obligations, then the acquiring corporation shall be treated as though it were the vendor corporation for purposes of determining, under section 453 and the regulations thereunder, the gain, loss, income, or deduction with respect to the property repossessed.
[T.D. 6559, 26 FR 2983, April 7, 1961]

§ 1.381(c)(9)–1 Amortization of bond discount or premium.

(a) Carryover requirement. If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for the payment of bonds of a distributor or transferor corporation which were issued at a discount or premium, then under the provisions of section 381(c)(9) the acquiring corporation is to be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of determining the amount of amortization allowable, or includible, with respect to such discount or premium in computing taxable income. Thus, if subsequent to February 28, 1913, a distributor or transferor corporation issues bonds at a premium and the liability for them is assumed by the acquiring corporation in a transaction to which section 381(a) applies, then the net amount of the premium is income which should be prorated or amortized over the life of the bonds, including the period during which the acquiring corporation is liable upon the obligations assumed. On the other hand, if a distributor or transferor corporation issues bonds at a discount and the liability for them is assumed by the acquiring corporation in a transaction to which section 381(a) applies, then the net amount of the discount is deductible in computing taxable income but should be prorated or amortized over the life of the bonds, including the period during which the acquiring corporation is liable upon the obligations assumed.

(b) Expense incurred upon issuance of bonds. If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for bonds of a distributor or transferor corporation which were issued at a discount or premium, the acquiring corporation shall be treated as the distributor or transferor corporation after the date of distribution or transfer with respect to the expense incurred upon the issuance of such bonds.

(c) Purchase of bonds. If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for bonds of a distributor or transferor corporation which were issued at a discount or premium and if the acquiring corporation subsequently purchases such bonds, then the acquiring corporation shall be treated as the distributor or transferor corporation for the purpose of determining the amount of any income or deduction resulting from the purchase. See paragraph (c) of § 1.61–12. For rules relating to the exchange or substitution of bonds issued by the acquiring corporation for bonds of a distributor or transferor corporation, see paragraph (d) of this section.

(d) Exchange of new for old bonds. Notwithstanding any other provision of this section, if—

(1) In a transaction to which section 381(a) applies, bonds of the acquiring corporation are exchanged or substituted for bonds of a distributor or transferor corporation which were issued at a discount or premium, or

(2) Bonds of the acquiring corporation are exchanged or substituted for bonds of a distributor or transferor corporation which were issued at a discount or premium and in respect of which the acquiring corporation has assumed the liability in a transaction to which section 381(a) applies,

then, with respect to any unamortized discount, premium, or expense of issuance attributable to such bonds of the distributor or transferor corporation, the acquiring corporation shall be treated as the distributor or transferor corporation.

(e) Bonds of a distributor or transferor corporation. For purposes of applying section 381(c)(9), the term "bonds of a distributor or transferor corporation" includes not only bonds issued by the distributor or transferor corporation but also bonds for which the distributor or transferor corporation has assumed liability. Thus, if the distributor or transferor corporation has assumed liability for bonds in a transaction in which any unamortized discount or premium attributable to such bonds carried over to such corporation, then the acquiring corporation assuming liability for the

bonds shall be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of determining the amount of amortization allowable, or includible, with respect to such discount or premium. On the other hand, if the distributor or transferor corporation has assumed liability for bonds in a transaction in which any unamortized discount or premium attributable to such bonds did not carry over to such corporation, then there can be no carryover to the acquiring corporation under this section.

[T.D. 6532, 26 FR 405, Jan. 19, 1961]

§ 1.381(c)(10)–1 Deferred exploration and development expenditures.

(a) Carryover requirement. **(1)** If for any taxable year a distributor or transferor corporation has elected under section 615 or section 616 (or corresponding provisions of prior law) to defer and deduct on a ratable basis any exploration or development expenditures made in connection with any ore, mineral, mine, or other natural deposit transferred to the acquiring corporation in a transaction described in section 381(a), then under the provisions of section 381(c)(10) the acquiring corporation shall be entitled to deduct such expenditures on a ratable basis in the same manner, and to the same extent, as they would have been deductible by the distributor or transferor corporation in the absence of the distribution or transfer. For this purpose, the acquiring corporation shall be treated as though it were the distributor or transferor corporation. The principles set forth in paragraph (e) of § 1.615–3 and paragraph (f) of § 1.616–2 are applicable in computing the amount of the deduction allowable to the acquiring corporation in respect of expenditures deferred by a distributor or transferor corporation.

Example. X and Y Corporations are both organized on January 1, 1955, and both corporations compute their taxable income on the basis of the calendar year. During 1955, X Corporation purchases a mineral property which it begins to develop in 1956. During 1956, X Corporation incurs development expenditures of $500,000 in respect of such property which it elects to defer under section 616(b). On December 31, 1956, Y Corporation acquires all of the assets of X Corporation in a reorganization to which section 381(a) applies, no gain being recognized to X Corporation on the transfer. In 1957, Y Corporation sells 150,000 units of produced ore benefited by the development expenditures incurred and deferred by X Corporation, and the number of units remaining as of the end of 1957, plus the number of units sold during that year, is estimated to be 1,000,000. In addition to its deduction for depletion, Y Corporation is, in 1957, entitled to a deduction under sections 616(b) and 381(c)(10) of $75,000 of the development expenditures previously deferred by X Corporation, that is, $500,000 × 150,000/1,000,000.

(2) If a distributor or transferor corporation has elected under section 615 or section 616 (or corresponding provisions of prior law) to defer exploration or development expenditures in respect of a mine or other natural deposit which it subsequently disposes of except for a retained economic interest therein, such as the right to royalty income or in-ore payments, and such retained economic interest is transferred to the acquiring corporation in a transaction to which section 381(a) applies, then the acquiring corporation shall be entitled to deduct such deferred expenditures attributable to the economic interest retained on a ratable basis to the same extent they would have been deductible by the distributor or transferor corporation in the absence of the distribution or transfer. See paragraph (c) of § 1.615–3 and paragraph (c) of § 1.616–2.

(3) For purposes of this section, the terms "exploration expenditures" and "development expenditures" shall have the same meaning as that ascribed to them in the regulations under sections 615 and 616 of the Internal Revenue Code of 1954, or under sections 23(cc) and 23(ff) of the Internal Revenue Code of 1939, whichever applies. See, for example, paragraph (a) of § 1.615–1 and paragraph (a) of § 1.616–1.

(b) Effect and identification of election previously made. **(1)** The election made by a distributor or transferor corporation under the provisions of section 615 or section 616 (or corresponding provisions of prior law) to defer exploration or development expenditures in respect of any taxable year may not be revoked by the acquiring corporation for any reason whatsoever.

(2) When filing its return for the first taxable year for which it deducts exploration or development expenditures which were deferred under section 615 or section 616 (or corresponding provisions of prior law) by a distributor or transferor corporation, the acquiring corporation shall attach thereto a statement properly identifying the taxable year for which the election to defer was made by the distributor or transferor corporation, the name of the corporation which made the election, and the district director with whom the election was filed.

(3) It is unnecessary for an acquiring corporation to renew an election to defer exploration or development expenditures which was made by a distributor or transferor corporation.

(c) Successive transactions to which section 381(a) applies. If, by virtue of section 381(c)(10), the acquiring corporation is entitled to deduct exploration or development expenditures deferred

by a distributor or transferor corporation, then such acquiring corporation shall be deemed to have made the election to defer such expenditures for purposes of applying section 381(c)(10) to any subsequent transaction in which such acquiring corporation is a distributor or transferor corporation.

(d) Carryover of limitation requirements. (1) If a distributor or transferor corporation transfers any mineral property to the acquiring corporation in a transaction described in section 381(a) and the acquiring corporation pays or incurs exploration expenditures in a taxable year ending after the date of the distribution or transfer, then in applying the 4-year or $400,000 limitations described in section 615(c) and paragraphs (a) and (b) of § 1.615–4, whichever is applicable, the acquiring corporation shall be deemed to have been allowed any deduction which, for any taxable year ending on or before the date of distribution or transfer, was allowed to the distributor or transferor corporation under section 615(a), or under section 23(ff)(1) of the Internal Revenue Code of 1939, or to have made any election which, for any such preceding year, was made by the distributor or transferor corporation under section 615(b), or under section 23(ff)(2) of the Internal Revenue Code of 1939. Thus, in such instance, the acquiring corporation shall take into account the years in which the distributor or transferor corporation exercised the election to deduct or defer exploration expenditures and any amounts so deducted or deferred. For this purpose, it is immaterial whether the deduction has been allowed to, or the election has been made by, the distributor or transferor corporation with respect to the specific mineral property transferred by that corporation to the acquiring corporation.

(2) Generally, for purposes of applying the 4-year limitation described in paragraph (a) of § 1.615–4, if there are two or more distributor or transferor corporations that transfer any mineral property to the acquiring corporation, each taxable year of any such corporation ending on or before the date of distribution or transfer in which exploration expenditures were deducted or deferred shall be treated as a separate taxable year regardless of the fact that the taxable years of two or more such corporations normally end on the same date. However, if the date of distribution or transfer is the same with respect to more than one distributor or transferor corporation, then the taxable years of such corporations ending on the same date of distribution or transfer shall be considered as one taxable year for purposes of applying the 4-year limitation even though more than one such corporation deducted or deferred exploration expenditures for such taxable years.

(3) For purposes of applying the $400,000 limitation described in paragraph (b) of § 1.615–4, if there are two or more distributor or transferor corporations that transfer any mineral property to the acquiring corporation, any exploration expenditures which were deducted or treated as deferred expenses by such corporations for taxable years ending after December 31, 1950, shall be taken into account by the acquiring corporation.

(4) If a distributor or transferor corporation that transfers any mineral property to the acquiring corporation was required to take into account any taxable years or amounts of its transferor, as provided by paragraph (e) of § 1.615–4, for purposes of either the 4-year limitation described in paragraph (a) of § 1.615–4 or the $400,000 limitation described in paragraph (b) of § 1.615–4, then the acquiring corporation shall also take these taxable years and amounts into account in applying the same limitations.

(5) The provisions of this paragraph may be illustrated by the following examples:

Example (1). M and N Corporations were organized on January 1, 1956, and each corporation computes its taxable income on the basis of the calendar year. For each of its taxable years 1956 and 1957, M Corporation expended $60,000 for exploration expenditures and exercised the option to deduct such amounts under section 615(a). N Corporation made no exploration expenditures during its taxable years 1956 and 1957. On December 31, 1957, M Corporation transferred all of its assets to N Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. N Corporation made exploration expenditures of $100,000, $120,000, $110,000, and $100,000 for the years 1958, 1959, 1960, and 1961, respectively, which expenditures it desired to deduct under section 615(a) to the extent allowable. On the basis of these facts, N Corporation may deduct up to $100,000 for each of the years 1958 and 1959. No deduction or deferral is allowable for 1960 since the benefits of section 615(c) were previously availed of for 4 taxable years. However, N Corporation may deduct $80,000 for 1961 (the 4-year limitation not applying to such year) but, if such deduction is made, N Corporation will not be allowed any further deductions or deferrals since the $400,000 limitation of paragraph (b) of § 1.615–4 will have been reached.

Example (2). R and S Corporations were organized on January 1, 1955, and each corporation computes its income on the basis of the calendar year. For the 1955 taxable year neither corporation made any exploration expenditures under section 615(a). On June 30, 1956, R Corporation transferred all its assets to S Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. During its short taxable year ending June 30, 1956, R Corporation made exploration expenditures of $60,000 which it elected to deduct under section 615. For its taxable year ending December 31, 1956, S Corporation may deduct or defer exploration expenditures up to $100,000 since this is a separate election for purposes of utilizing section

615 and is not affected by the $60,000 previously deducted by R Corporation. Assuming S Corporation exercises an election under section 615 for its taxable year ending December 31, 1956, S Corporation may elect to apply the benefits of section 615 to exploration expenditures for two more taxable years. However, for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), S Corporation is entitled under section 615 to deduct or defer exploration expenditures made in such years to the extent that the combined deductions and deferrals by R and S Corporations in prior years did not exceed $400,000.

Example (3). O and P Corporations were organized on January 1, 1955, and each corporation computes its taxable income on the basis of the calendar year. For their taxable years 1955, 1956, and 1957, each corporation deducted exploration expenditures made in such years under section 615(a). On June 30, 1958, O Corporation transferred all its assets to P Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. If, during its short taxable year ending June 30, 1958, O Corporation made additional exploration expenditures, it may deduct or defer such expenditures (up to $100,000) under section 615 since O Corporation has utilized section 615 in only three previous taxable years. For its taxable years ending after June 30, 1958, and beginning before July 7, 1960, P Corporation may not deduct or defer exploration expenditures under section 615, since the benefits of that section were utilized by O and P Corporations for 4 taxable years. However, for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), P is entitled under section 615 to deduct or defer exploration expenditures made in such years to the extent that the combined deductions and deferrals by O and P Corporations in prior years do not exceed $400,000. See paragraph (b) of § 1.615–4.

Example (4). X, Y, and Z Corporations were organized on January 1, 1955, and each corporation computes its taxable income on the basis of the calendar year. For their taxable years ending December 31, 1955, X and Y Corporations each deferred $100,000 for exploration expenditures made in such taxable years under section 615(b). Z Corporation made no exploration expenditures during its taxable year ending December 31, 1955. On March 31, 1956, X and Y Corporations transferred all their assets to Z Corporation in a transaction to which section 381(a) applies, no gain being recognized to the transferor corporations on the transfer. X and Y Corporations each made exploration expenditures of $75,000 during their short taxable years ending March 31, 1956, which they deducted under section 615(a). For purposes of taxable years beginning before July 7, 1960, Z Corporation must take into account the taxable years in which X and Y Corporations deducted or deferred exploration expenditures. In so doing, each taxable year in which exploration expenditures were deducted or deferred must be taken into account except that the taxable years of X and Y Corporations ending on March 31, 1956, shall be considered as one taxable year. Therefore, Z Corporation may deduct or defer exploration expenditures in accordance with section 615 for any one taxable year ending after March 31, 1956, and beginning before July 7, 1960. However, for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), Z Corporation must take into account for purposes of the $400,000 limitation all of the $350,000 of exploration expenditures deducted or deferred by X, Y, and Z Corporations during taxable years ending after December 31, 1950. Therefore, Z Corporation, assuming it has not deducted or deferred any exploration expenditures, is entitled under section 615 to deduct or defer in taxable years beginning after July 6, 1960, up to $50,000 for exploration expenditures made in such years.

Example (5). For purposes of this example, assume that each taxpayer computes taxable income on the basis of the calendar year. Taxpayer A, an individual who has deducted exploration expenditures of $75,000 under section 23(ff) of the Internal Revenue Code of 1939 for each of his taxable years 1952 and 1953, transferred a mineral property to K Corporation on January 1, 1954, in a transaction in which the basis of the mineral property in the hands of K Corporation is determined under section 362(a). For its taxable year 1954 and pursuant to section 615(a), K Corporation deducted exploration expenditures of $100,000 which it made in such year. K Corporation had made no exploration expenditures in any preceding taxable year. On December 31, 1954, K Corporation transferred all its assets to L Corporation in a reorganization to which section 381(a) applies, no gain being recognized to the transferor corporation on the transfer. Assuming that L Corporation has not deducted or deferred exploration expenditures in any preceding taxable year, L Corporation may deduct or defer exploration expenditures (up to $100,000) in accordance with section 615 for any one taxable year ending after December 31, 1954, and beginning before July 7, 1960, in view of the 4-year limitation. However, if L Corporation does not deduct or defer exploration expenditures in that period, then for taxable years beginning after July 6, 1960 (the 4-year limitation not applying), L Corporation is entitled to deduct or defer up to $150,000 (but not to exceed $100,000 per year) for exploration expenditures made in such years. See paragraph (b) of § 1.615–4.

[T.D. 6552, 26 FR 1988, March 8, 1961, as amended by T.D. 6685, 28 FR 11406, Oct. 24, 1963]

§ 1.381(c)(11)–1 Contributions to pension plan, employees' annuity plans, and stock bonus and profit-sharing plans.

(a) Carryover requirement. Section 381(c)(11) provides that, for purposes of determining amounts deductible under section 404 for any taxable year, the acquiring corporation shall be considered after the date of distribution or transfer to be the distributor or transferor corporation in respect of any pension, annuity, stock bonus, or profit-sharing plan.

(b) Nature of carryover. **(1)** Primarily, section 381(c)(11) and this section apply to the amount of any unused deductions or excess contributions carryovers which, in the absence of the transaction causing section 381 to apply, would have been available to the distributor or transferor corporation under section 404. Thus, for example, this section applies to unused deductions under a profit-sharing or stock bonus trust which, in accordance with the second sentence of section 404(a)(3)(A) and § 1.404(a)–9, would have been available in succeeding taxable years to the transferor corporation if the transfer of assets to the acquiring corporation had not occurred.

(2) Section 381(c)(11) also permits or requires the acquiring corporation to be treated as though it were the distributor or transferor corporation for the purpose of satisfying any conditions which

would have been required of the distributor or transferor corporation in the absence of the distribution or transfer, so that it may be determined whether the distributor or transferor corporation, or the acquiring corporation, is entitled to take a deduction under section 404 in respect of a trust or plan established by the distributor or transferor corporation. Thus, for example, in a case when the taxable year of the transferor corporation ends on the date of transfer pursuant to section 381(b)(1), that corporation is entitled, pursuant to the provisions of section 404(a)(6) and paragraph (c) of § 1.404(a)–1, to a deduction in such taxable year for a payment to a qualified trust of that corporation made by the acquiring corporation after the close of such taxable year but within the time specified in section 404(a)(6). In further illustration, if the transferor corporation were to establish a qualified plan, and if the plan were maintained as a qualified plan by the acquiring corporation, then any contributions paid under the plan by the acquiring corporation (other than those which are deductible by the transferor corporation by reason of section 404(a)(6)) would be deductible under section 404 by the acquiring corporation even though the plan were exclusively for the benefit of former employees of the transferor corporation. Also, for example, if the transferor corporation were to adopt an annuity plan during its taxable year ending on the date of transfer, the acquiring corporation would be entitled, subject to the provisions of section 401(b) and § 1.401–5, to amend the plan so as to make it retroactively satisfy the requirements of section 401(a)(3), (4), (5), and (6) for the period beginning with the date on which the plan was put into effect.

(c) Taxable year of deduction. The first taxable year of the acquiring corporation in which any amount shall be allowed as a deduction to that corporation by reason of section 381(c)(11) and this section shall be its first taxable year ending after the date of distribution or transfer.

(d) Requirements for deductions. (1) In order for any amount paid by the acquiring corporation (other than amounts deductible under section 404(a)(5)) to be deductible by the acquiring corporation by reason of this section in respect of a trust or nontrusteed annuity plan which is established by a distributor or transferor corporation and maintained by the acquiring corporation, the contributions must be paid (or deemed to have been paid under section 404(a)(6)) by the acquiring corporation in a taxable year of that corporation which ends with or within a year of the trust for which it is exempt under section 501(a), or, in the case of a nontrusteed annuity plan, for which it meets the requirements of section 404(a)(2). See, however, section 404(a)(4) and § 1.404(a)–11 for rules relating to deductions for contributions to foreign-situs trusts. The trust or plan which is established by the distributor or transferor corporation and maintained by the acquiring corporation may separately satisfy the requirements of section 401(a) or section 404(a)(2) or may, together with other trusts or plans of the acquiring corporation, constitute a single plan which qualifies under section 401(a) or meets the requirements of section 404(a)(2).

(2) Excess contributions paid under a qualified trust or plan established by the transferor or distributor corporation may be carried over and, subject to the applicable limitations, deducted by the acquiring corporation in a taxable year ending after the date of distribution or transfer regardless of whether the trust is exempt, or the plan meets the requirements of section 404(a)(2), during such taxable year. There are, however, special rules for computing the limitations on the amount of excess contributions which are deductible in a taxable year ending after the trust or plan has terminated (see § 1.404(a)–7, paragraph (e) of § 1.404(a)–9, and paragraph (a) of § 1.404(a)–13). For this purpose, the pension, annuity, stock bonus, or profit-sharing plan of the distributor or transferor corporation under which the excess contributions were made shall be considered continued (and not terminated) by the acquiring corporation if, after the date of distribution or transfer, the acquiring corporation continues the plan as a separate and distinct plan of its own which continues to qualify under section 401(a), or to meet the requirements of section 404(a)(2), or consolidates or replaces that plan with a comparable plan. See subparagraph (4) of this paragraph for rules relating to what constitutes a "comparable" plan.

(3) In order for any amount paid by the acquiring corporation to be deductible by the acquiring corporation as an unused deduction carried over from a qualified profit-sharing or stock bonus trust established by a distributor or transferor corporation, the acquiring corporation must continue such trust established by the distributor or transferor corporation as a separate and distinct trust of its own which continues to qualify under section 401(a), or must consolidate or replace that trust with a comparable trust. In addition, the amount paid by the acquiring corporation will be deductible as an unused deduction carried over from the transferor or distributor corporation only if it is paid into the profit-sharing or stock bonus

trust established by the transferor or distributor corporation, or the comparable trust, in a taxable year of the acquiring corporation which ends with or within a year of such trust (or such comparable trust) for which it meets the requirements of section 401(a) and is exempt under section 501(a). See subparagraph (4) of this paragraph for rules relating to what constitutes a "comparable" trust.

(4) For purposes of subparagraphs (2) and (3) of this paragraph, a plan under which deductions are determined pursuant to paragraph (1) or (2) of section 404(a) shall be considered comparable to another plan under which deductions are determined pursuant to either of those paragraphs, and a plan under which deductions are determined pursuant to paragraph (3) of section 404(a) shall be considered comparable to another plan under which deductions are determined pursuant to such paragraph (3). Thus, a profit-sharing plan (which qualifies under section 401(a)) established by the transferor or distributor corporation shall, for purposes of subparagraphs (2) and (3) of this paragraph, be considered terminated if, after the date of distribution or transfer, the acquiring corporation transfers the funds accumulated under the profit-sharing plan into a pension plan covering the same employees. In such a case, excess contributions paid under the profit-sharing plan by the distributor or transferor corporation may be carried over and deducted by the acquiring corporation in a taxable year ending after the date of distribution or transfer subject to the limitations in section 404(a)(3)(A) computed in accordance with the rules in paragraph (e)(2) of § 1.404(a)–9 for computing limitations when a profit-sharing plan has terminated. On the other hand, unused deductions attributable to the profit sharing plan may not be carried over and used by the acquiring corporation as a basis for deducting amounts contributed by it to the pension plan.

(e) Effect of consolidation or replacement of plan on prior contributions. If a pension, annuity, stock bonus, or profit-sharing plan which was established by a distributor or transferor corporation is terminated after the date of distribution or transfer because of consolidation or replacement with a comparable plan of the acquiring corporation, then the contributions paid to or under its plan by the distributor or transferor corporation on or before the date of distribution or transfer shall not be disallowed under section 404 merely because of the termination of the plan which was established by that corporation, provided that the termination does not cause the plan to fail to qualify under section 401(a).

(f) Amounts deductible under section 404. Section 381(c)(11) and this section apply only to amounts which are otherwise deductible under section 404 and the regulations thereunder. See §§ 1.404(a)–1 through 1.404(d)–1. Thus, to be deductible by reason of this section, contributions paid by the acquiring corporation must be expenses which otherwise satisfy the conditions of section 162 (relating to trade or business expenses). No deduction shall be allowed by reason of section 381(c)(11) and this section for a contribution which is allowable under section 162 but is not allowable under section 404. Thus, the acquiring corporation shall not be allowed a deduction by reason of this section in respect of a plan established by a distributor or transferor corporation if the contribution would not otherwise be deductible under section 404 by reason of section 404(c) and § 1.404(c)–1. On the other hand, any unused deductions or excess contributions of a distributor or transferor corporation which are carried over from 1939 Code years shall be deductible by the acquiring corporation if the requirements of this section, section 404(d), and § 1.404(d)–1 are satisfied.

(g) Cost of past service credits. In computing the cost of past service credits under a plan with respect to employees of the distributor or transferor corporation, the acquiring corporation may include the cost of credits for periods during which the employees were in the service of the distributor or transferor corporation.

(h) Separate carryovers required. The excess contributions which are available to a distributor or transferor corporation under the provisions of section 404(a)(1)(D) and section 404(a)(3)(A) at the close of the date of distribution or transfer and are carried over to the acquiring corporation under this section shall be kept separate and distinct from each other and from any excess contributions which are available to the distributor or transferor corporation at that time under the provisions of section 404(a)(7) and are carried over to the acquiring corporation under this section. If there are excess contributions carried over to the acquiring corporation from more than one transferor or distributor corporation, the excess contributions of each transferor or distributor corporation shall be kept separate and distinct from those of the other transferor or distributor corporations and, with respect to each such transferor or distributor corporation, shall be kept separate and distinct as provided in the preceding sentence. See, however, paragraph (i) of this section for rules for applying the provisions of section 404(a)(3)(A) when the

acquiring corporation maintains two or more profit-sharing or stock bonus trusts, one or more of which was established by a distributor or transferor corporation. The requirements in this paragraph shall apply with respect to any excess contributions which are carried over to the acquiring corporation from a distributor or transferor corporation under the provisions of section 404(d) and this section.

(i) **Limitations applicable to profit-sharing or stock bonus trusts.** When contributions are paid by the acquiring corporation after the date of distribution or transfer to two or more profit-sharing or stock bonus trusts, and one or more of such trusts was established by a distributor or transferor corporation, such trusts shall be considered as a single trust in applying the provisions of section 404(a)(3)(A) under this section. Accordingly, in determining its secondary limitation, and its excess contributions carryover, under section 404(a)(3)(A) and § 1.404(a)–9 in any taxable year ending after the date of distribution or transfer, the acquiring corporation shall take into accounts its primary limitations, and the deductions allowed or allowable to it, for all prior years under the limitations provided in those sections, and also the primary limitations of, and deductions allowed or allowable to, the distributor or transferor corporation or corporations for all prior years under the limitations provided in those sections.

(j) **Successive carryovers.** The provisions of section 381(c)(11) and this section shall apply to an acquiring corporation which, in a distribution or transfer to which section 381(a) applies acquires the assets of a distributor or transferor corporation which has previously acquired the assets of another corporation in a transaction to which section 381(a) applies, even though, in computing an unused deductions or excess contributions carryover to the second acquiring corporation, it is necessary to take into account contributions paid by, and limitations applicable to, the first distributor or transferor corporation.

(k) **Information to be furnished by acquiring corporation.** The acquiring corporation shall furnish such information with respect to a plan established by a distributor or transferor corporation as will, consistently with the principles of section 404, establish that the provisions of such section and this section apply. For purposes of this section, the district director may require any other information that he considers necessary to determine deductions allowable under section 404 and this section or qualification under section 401. Any unused deductions or excess contributions carried over from a distributor or transferor corporation pursuant to this section shall be properly identified with the corporation which would have been permitted to use those deductions or contributions in the absence of the transaction causing section 381 to apply.

(*l*) **Illustration.** The application of this section may be illustrated by the following example:

Example. In 1955, X Corporation, which makes its return on the basis of the calendar year, paid $400,000 to completely fund past service credits under a qualified pension plan and deducted 10 percent ($40,000) of that cost in each of the taxable years 1955, 1956, and 1957. The pension plan established by X Corporation had an anniversary date of January 1. On December 31, 1957, on which date the undeducted part of the cost amounted to $280,000, X Corporation transferred all its assets to Y Corporation in a statutory merger to which section 361 applies. Y Corporation, which also makes its return on the basis of the calendar year, had a qualified pension plan and trust which also had an anniversary date of January 1. Since Y Corporation had many more employees than X Corporation on the date of transfer, it covered the former employees of X Corporation under its own plan. Y Corporation is entitled to deductions under section 404(a)(1)(D) and this section in 1958 and succeeding taxable years, in order of time, with respect to the undeducted balance of $280,000, to the extent of the difference between the amount paid and deductible by that corporation in each such taxable year and the maximum amount deductible by that corporation for such taxable year in accordance with the applicable limitations of section 404(a)(1). In computing the maximum amount deductible by Y Corporation for 1958 and 1959 under section 404(a)(1)(C), that corporation may include $40,000 for each year, the amount that X Corporation could have included for each of those years in computing the maximum amount that would have been deductible by X Corporation under section 404(a)(1)(C) if the merger had not occurred. Thus, assuming that Y Corporation's appropriate limitation so computed under section 404(a)(1)(C) is $1,000,000 (including the $40,000 carried over from X Corporation under this section) for each of those taxable years, and that Y Corporation contributed $925,000 to its trust in 1958 and $975,000 in 1959, then Y Corporation is entitled under section 404(a)(1)(D) and this section to deduct in 1958 $75,000, and in 1959 $25,000, of the amount ($280,000) carried over from X Corporation. The undeducted balance of such amount ($180,000) available to Y Corporation on December 31, 1959, would be deductible by that corporation in succeeding taxable years in accordance with section 404(a)(1)(D) and this section.

[T.D. 6556, 26 FR 2405, March 22, 1961, as amended by T.D. 7168, 37 FR 5024, March 9, 1972]

§ 1.381(c)(12)–1 Recovery of bad debts, prior taxes, or delinquency amounts.

(a) **Carryover requirement.** (1) If, as a result of a distribution or transfer to which section 381(a) applies, the acquiring corporation is entitled to the recovery of a bad debt, prior tax, or delinquency amount on account of which a deduction or credit was allowed to a distributor or transferor corporation for a prior taxable year, and such debt, tax, or amount is recovered by the acquiring corporation

after the date of distribution or transfer, then under the provisions of section 381(c)(12) the acquiring corporation is required to include in its gross income for the taxable year of recovery the same amount of income attributable to the recovery as the distributor or transferor corporation would have been required to include under section 111 and the regulations thereunder had the distribution or transfer not occurred.

(2) The rule prescribed by paragraph (a)(1) of this section and by section 381(c)(12) with respect to bad debts, prior taxes, and delinquency amounts applies equally with respect to the recovery by the acquiring corporation of all other losses, expenditures, and accruals made the basis of deductions from the gross income of a distributor or transferor corporation for prior taxable years, including war losses referred to in section 127 of the Internal Revenue Code of 1939, but not including deductions with respect to depreciation, depletion, amortization, or amortizable bond premiums. An item which is not a "section 111 item" for purposes of the regulations under section 111 is not subject to the provisions of section 381(c)(12). The provisions of section 111(c) shall be applied with respect to a recovery by the acquiring corporation in the same manner as they would have been applied by the distributor or transferor corporation.

(b) Amount of recovery exclusion allowable for year of recovery. For the year of any recovery by the acquiring corporation, the amount of the recovery exclusion for the original taxable year shall be determined in accordance with paragraph (b) of § 1.111–1. For the purpose of this paragraph and section 381(c)(12), the recovery exclusion for any year with respect to section 111 items of the acquiring corporation shall be kept separate from the recovery exclusion for any year with respect to section 111 items of each distributor or transferor corporation. The recovery by the acquiring corporation of any section 111 item of such corporation after the date of the distribution or transfer shall be considered separately from recoveries by the acquiring corporation of any such item which was deducted or credited by a distributor or transferor corporation. Any recovery by the acquiring corporation of a section 111 item shall be excluded from the gross income of the acquiring corporation to the extent of the recovery exclusion (1) determined for the original year for which that item was deducted or credited by the specific corporation which claimed the deduction or credit and (2) reduced by the excludable recoveries (whether made by the acquiring corporation, or by the distributor or transferor corporation) in intervening years with respect to the recovery exclusion of such corporation for such original year. There shall be taken into account the effect of net operating loss carryovers and carrybacks or capital loss carryovers.

(c) Illustration of carryover of recovery exclusion—(1) Facts. (i) The application of section 381(c)(12) may be illustrated by the following example. M and N Corporations are both organized on January 1, 1957, and both corporations compute their taxable income on the basis of the calendar year. On December 31, 1959, M Corporation transfers all its assets to N Corporation in a reorganization to which section 381(a) applies.

(ii) The section 111 items of the two corporations for the following taxable years are as follows, identification of such items being made by an appropriate letter:

Taxable year of deduction or credit	M Corporation (transferor)	N Corporation (acquirer)
1957	$500(g)	$200(h)
1958	300(i)	400(j)
1959	600(k)	100(m)

(iii) The recovery exclusions in respect of such taxable years, computed in accordance with § 1.111–1(b)(2), are assumed to be as follows:

Taxable year	M Corporation (transferor)	N Corporation (acquirer)
1957	$400	$150
1958	200	300
1959	500	75

(iv) The recoveries of the above-mentioned section 111 items by the two corporations are as follows:

Taxable year of recovery	M Corporation (transferor)	N Corporation (acquirer)
1958	$25(g)	$50(h)
1959	50(g)	
	30(i)	20(h)
1960	......	15(j)
		350(g)
		225(i)
		550(k)
		100(h)
		350(j)
		85(m)

(2) M Corporation's 1958 recovery.

Total recovery of section 111 items for 1957	$25
Less: Recovery exclusion for 1957	400

Amount included in gross income of M Corporation for 1958 0

(3) M Corporation's 1959 recoveries.

(i) Total recovery of section 111 items for 1957 .... $50
Less: Recovery exclusion for 1957 .... $400
Minus excludable recovery 25
375
Amount included in gross income of M Corporation for 1959 0

(ii) Total recovery of section 111 items for 1958 30
Less: Recovery exclusion for 1958 200
Amount included in gross income of M Corporation for 1959 0

(4) N Corporation's 1958 recovery.

Total recovery of section 111 items for 1957 .... $50
Less: Recovery exclusion for 1957 150
Amount included in gross income of N Corporation for 1958 0

(5) N Corporation's 1959 recoveries.

(i) Total recovery of section 111 items for 1957 .... $20
Less: Recovery exclusion for 1957 .... $150
Minus excludable recovery in 1958 50
100
Amount included in gross income of N Corporation for 1959 0

(ii) Total recovery of section 111 items for 1958 15
Less: Recovery exclusion for 1958 300
Amount included in gross income of N Corporation for 1959 0

(6) N Corporation's 1960 recoveries.

(i) Total recovery of section 111 items of M Corporation for 1957 .... $350
Less: Recovery exclusion of M Corporation for 1957 .... $400
Minus: Excludable recovery in 1959 .... $50
Excludable recovery in 1958 25
75
325
Amount included in gross income of N Corporation for 1960 25

(ii) Total recovery of section 111 items of M Corporation for 1958 225
Less: Recovery exclusion of M Corporation for 1958 .... $200
Minus excludable recovery in 1959 30
170
Amount included in gross income of N Corporation for 1960 55

(iii) Total recovery of section 111 items of M Corporation for 1959 550
Less: Recovery exclusion of M Corporation for 1959 500
Amount included in gross income of N Corporation for 1960 50

(iv) Total recovery of section 111 items of N Corporation for 1957 100
Less: Recovery exclusion of N Corporation for 1957 .... $150
Minus: Excludable recovery in 1959 .... $20
Excludable recovery in 1958 50
70
80
Amount included in gross income of N Corporation for 1960 20

(v) Total recovery of section 111 items of N Corporation for 1958 .... $350
Less: Recovery exclusion of N Corporation for 1958 .... $300
Minus excludable recovery in 1959 15
285
Amount included in gross income of N Corporation for 1960 65

(vi) Total recovery of section 111 items of N Corporation for 1959 85
Less: Recovery exclusion of N Corporation for 1959 75
Amount included in gross income of N Corporation for 1960 10

(7) Summary of recoveries included in gross income of N Corporation for 1960.

(i) Recovery of M Corporation items for:
1957 .... $25
1958 55
1959 50
$130

(ii) Recovery of N Corporation items for:
1957 20
1958 65
1959 10
95

Total amount included in gross income 225

[T.D. 6559, 26 FR 2984, April 7, 1961]

§ 1.381(c)(13)–1 Involuntary conversions.

(a) **Carryover requirement—(1) General rule.** Section 381(c)(13) requires that after the date of distribution or transfer the acquiring corporation, in a transaction to which section 381(a) applies, shall be treated as the distributor or transferor corporation for purposes of applying section 1033, relating to involuntary conversions. This rule shall apply even though the property similar or related in service or use to the property converted, or the stock of a corporation owning such similar property, is purchased by the acquiring corporation after the date of distribution or transfer and is not received from the distributor or transferor corporation in the transaction to which section 381(a) applies. Accordingly, if any factor essen-

tial to the application of section 1033 occurs on or before the date of distribution or transfer and any other such factor also occurs after that date, then, in accordance with section 381(c)(13) and this section, the provisions of section 1033 shall apply to the acquiring corporation in the same manner that they would have applied to the distributor or transferor corporation in the absence of the distribution or transfer. For purposes of this section, the terms "involuntary conversion" and "disposition of the converted property" shall have the meaning ascribed to them by the regulations under section 1033.

(2) Application to other transactions. The provisions of this section shall apply to any transaction which, under provisions of the Internal Revenue Code of 1954, is treated as though it were an involuntary conversion within the meaning of section 1033. See, for example, section 1071, relating to gain from a sale or exchange to effectuate the policies of the Federal Communications Commission; and sections 1332(b)(3) and 1333(3), relating to war loss recoveries.

(b) Conversion into similar property. Section 1033(a)(1) provides that no gain shall be recognized if property is involuntarily converted only into property which is similar or related in service or use to the property so converted. If there is a disposition of property of a distributor or transferor corporation and, subsequent to the date of distribution or transfer, property similar or related in service or use to the property disposed of is received by the acquiring corporation as compensation for the property so disposed of, then no gain shall be recognized to the acquiring corporation, provided that no gain would have been recognized under section 1033(a)(1) if the similar property had been received directly by the distributor or transferor corporation.

Example. Property of S Corporation with an adjusted basis of $100 is condemned by the local government. Shortly after the property is so condemned, S Corporation liquidates and distributes its assets to P Corporation in a distribution to which section 381(a) applies. Subsequent to the date of distribution, P Corporation receives from the government (in settlement of the condemnation proceedings) property with a market value of $500 which is similar or related in service or use to the property so condemned. No gain is recognized to either corporation upon P Corporation's receipt of the similar property, and the property so received has a basis of $100 in the hands of P Corporation on the date of its acquisition.

(c) Conversion into money or dissimilar property when disposition occurs after December 31, 1950—(1) General rule. Section 1033(a)(3) and § 1.1033(a)–2 provide rules for involuntary conversions of property into money or dissimilar property where the disposition of the converted property occurs after December 31, 1950. In such a case, the gain on the conversion, if any, shall be recognized, at the election of the taxpayer, only to the extent that the amount realized on the conversion exceeds the cost of other property purchased by the taxpayer which is similar or related in service or use to the property so converted, or exceeds the cost of stock purchased by the taxpayer in the acquisition of control of a corporation owning such other property, provided (i) the taxpayer purchases such other property or stock for the purpose of replacing the property so converted and (ii) the purchase occurs during the period of time specified in section 1033(a)(3)(B). The provisions of this paragraph shall apply to involuntary conversions where the disposition of the property occurs after December 31, 1950, and where the election to have section 1033(a)(3) apply to the treatment of the gain upon the conversion is contingent upon activities of both the distributor or transferor corporation and the acquiring corporation. For purposes of section 381(c)(13), the period of time specified in section 1033(a)(3)(B) shall be determined by taking into account taxable years of, and extensions of time granted to, both the distributor or transferor corporation and the acquiring corporation.

(2) Replacement period. The period during which the purchase of similar property or stock must be made in order to prevent the recognition of gain on the involuntary conversion terminates 2 years (or, in the case of a disposition occurring before Dec. 31, 1969, 1 year) after the close of the first taxable year in which any part of the gain upon the conversion is realized, or at the close of such later date as may be designated pursuant to an application of the taxpayer. See paragraph (c)(3) of § 1.1033(a)–2. Therefore, if, in a case to which this subparagraph applies, the first taxable year in which gain is realized is the taxable year of the distributor or transferor corporation ending with the close of the date of distribution or transfer, the acquiring corporation will have a maximum of only 2 years (or, in the case of a disposition occurring before Dec. 31, 1969, 1 year) after that date in which to purchase the similar property or stock, unless an extension of time has been granted upon application by the distributor, transferor, or acquiring corporation within the time prescribed. See paragraph (a) of § 1.381(b)–1 as to the termination of the taxable year of the distributor or transferor corporation. See paragraph (c)(3) of § 1.1033(a)–2 as to applications to extend the period within which to replace the converted property. In addition to the information otherwise required under paragraph (c)(3) of

§ 1.1033(a)–2, the application shall contain sufficient detail in connection with the distribution or transfer to establish that section 381(c)(13) applies to the involuntary conversion involved.

(3) *Examples.* The application of this paragraph may be illustrated by the following examples:

Example (1). A and B Corporations compute their taxable income on the basis of the calendar year, and both corporations use the cash method of accounting. During 1970 property of A Corporation is destroyed by fire, and in January 1971, A Corporation receives $15,000 from an insurance company as compensation for its loss of property. The adjusted basis of the property on the date of destruction is $10,000; as a consequence, A Corporation realizes a gain of $5,000 on the involuntary conversion. On June 30, 1971, B Corporation acquires all of the assets of A Corporation in a reorganization to which section 381(a) applies. In accordance with paragraph (c)(2) of § 1.1033(a)–2, A Corporation reports in its return for the short taxable year ending June 30, 1971, all the details in connection with the involuntary conversion but does not include the realized gain in gross income, thereby electing to have the gain recognized only to the extent provided in section 1033(a)(3). On June 15, 1973, B Corporation purchases for $20,000 property which is similar or related in service or use to the property previously destroyed. In its return for 1973, B Corporation reports all of the details in connection with its replacement of the property, as required by paragraph (c)(2) of § 1.1033(a)–2. As a result of this replacement by B Corporation, none of the gain realized by A Corporation is recognized. The replacement property which is purchased by B Corporation has a basis to that corporation of $15,000 on the date of its purchase, that is, the cost of such property ($20,000) decreased by the amount of gain not recognized to A Corporation on the involuntary conversion ($5,000).

Example (2). Assume the same facts as in example (1), except that B Corporation does not purchase similar property on or before June 30, 1973, and does not apply on or before that date (in accordance with paragraph (c)(3) of § 1.1033(a)–2) for an extension of time in which to make a replacement. In such event, the gain realized by A Corporation is recognized to that corporation for its taxable year ending June 30, 1971. A Corporation's tax liability for such taxable year must be recomputed in accordance with paragraph (c)(2) of § 1.1033(a)–2 in order to reflect this additional income.

Example (3). Assume the same facts as in example (1), except that the property of A Corporation is destroyed in 1968, A Corporation receives the $15,000 from an insurance company in January 1969, B Corporation acquires all of the assets of A Corporation on June 30, 1969, and A Corporation's return is filed for the short taxable year ending June 30, 1969. B Corporation would have to purchase property which is similar or related in service or use to the property previously destroyed by June 30, 1970, in order to take advantage of the provisions of section 1033.

Example (4). M and N Corporations compute their taxable income on the basis of the calendar year, and both corporations use the cash method of accounting. During 1970, property of M Corporation is destroyed by fire. The adjusted basis of the property on the date of destruction is $10,000. The property is insured against loss by fire, but the insurance claim is not satisfied on or before June 30, 1971, the date on which N Corporation acquires all of the assets (including the insurance claim) of M Corporation in a reorganization to which section 381(a) applies. On September 1, 1972, N Corporation receives $15,000 from the insurance company as compensation for the fire loss suffered by M Corporation. Upon receipt of the insurance proceeds, N Corporation realizes a gain of $5,000 upon the involuntary conversion; however, in its return for 1972, N Corporation elects under the provisions of paragraph (c)(2) of § 1.1033(a)–2 to have the gain recognized only to the extent provided by section 1033(a)(3). On December 30, 1974, N Corporation purchases for $20,000 property which is similar or related in service or use to the property previously destroyed in the hands of M Corporation. As a result of this replacement by N Corporation, none of the gain realized by N Corporation in 1972 is recognized. The replacement property which is purchased by N Corporation has a basis to that corporation of $15,000 on the date of its purchase, that is, the cost of such property ($20,000) decreased by the amount of gain not recognized to N Corporation on the involuntary conversion ($5,000).

Example (5). R and S Corporations compute their taxable income on the basis of the calendar year, and both corporations use the cash method of accounting. During 1970 property of R Corporation is destroyed by fire. The adjusted basis of the property on the date of destruction is $10,000. In anticipation of taking the benefit of section 1033(a)(3), R Corporation purchases for $20,000 on June 1, 1971, property which is similar or related in service or use to the destroyed property. In its return for 1971, R Corporation reports all of the details in connection with the replacement of the property, as required by paragraph (c)(2) of § 1.1033(a)–2. The property destroyed in 1970 is insured against loss by fire, but the insurance claim is not satisfied on or before March 1, 1972, the date on which S Corporation acquires all of the assets (including the insurance claim) of R Corporation in a reorganization to which section 381(a) applies. On October 1, 1972, S Corporation receives $12,000 from the insurance company as compensation for the fire loss suffered by R Corporation. Upon receipt of the insurance proceeds, S Corporation realizes a gain of $2,000 upon the involuntary conversion; however, in its return for 1972, S Corporation elects under the provisions of paragraph (c)(2) of § 1.1033(a)–2 to have the gain recognized only to the extent provided by section 1033(a)(3). As a result of the replacement by R Corporation, none of the gain realized by S Corporation in 1972 is recognized. Assuming there are no adjustments for depreciation, the replacement property has a basis on October 1, 1972, of $18,000, that is, the cost of such property ($20,000) decreased by the amount of gain not recognized to S Corporation on the involuntary conversion ($2,000)

(d) *Conversion into money when disposition occurs before January 1, 1951.* Section 1033(a)(2) provides that, if property is disposed of in an involuntary conversion before January 1, 1951, and money is received as compensation for the conversion, no gain shall be recognized if such money is forthwith expended in the acquisition of other property similar or related in service or use to the property so converted, or in the acquisition of control of a corporation owning such other property, or in the establishment of a replacement fund. That section also provides that, if any part of the money is not so expended, the gain, if any, shall be recognized to the extent of the money which is not so expended. For example, if, pursuant to section 381(c)(13) and section 1033(a)(2), property of a distributor or transferor corporation is disposed of before January 1, 1951, in an invol-

untary conversion, and the proceeds from the conversion are received by the acquiring corporation so that the gain on the conversion is realized by that corporation, the acquiring corporation may avoid recognition of the gain if it complies with the provisions of section 1033(a)(2) for nonrecognition of gain. Thus, the acquiring corporation must forthwith expend the proceeds in the acquisition of similar property or stock, or in the establishment of a replacement fund, in order to avoid recognition of the gain, if the disposition occurred before January 1, 1951. See the provisions of §§ 1.1033(a)-3 and 1.1033(a)-4 relating to involuntary conversions and replacement funds when disposition of the converted property occurred before January 1, 1951.

(e) **Successive acquiring corporations.** An acquiring corporation which, in a transaction to which section 381(a) applies, acquires the assets of a corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall be treated as such other corporation for purposes of applying sections 381(c)(13) and 1033 (relating to involuntary conversions). Thus, for example, if any factor essential to the application of section 1033 occurs on or before the date of distribution or transfer in one transaction to which section 381(a) applies, and any other such factor occurs after the date of distribution or transfer in a subsequent transaction to which section 381(a) applies, then the acquiring corporation in such subsequent transaction shall be treated as the first distributor or transferor corporation subject to the rules and limitations of this section for purposes of sections 381(c)(13) and 1033.

[T.D. 6552, 26 FR 1989, March 8, 1961, as amended by T.D. 7075, 35 FR 17995, Nov. 24, 1970]

§ 1.381(c)(14)-1 Dividend carryover to personal holding company.

(a) **Carryover requirement.** Section 381(c)(14) provides that an acquiring corporation shall succeed to and take into account the dividend carryover (described in section 564) of a distributor or transferor corporation in computing its dividends paid deduction under section 561 for taxable years ending after the date of distribution or transfer for which the acquiring corporation is a personal holding company under section 542. To determine the amount of such dividend carryover and to integrate it with the dividend carryover of the acquiring corporation in computing the dividends paid deduction for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of section 564 and § 1.564-1 in accordance with this section.

(b) **Manner of computing dividend carryover—(1) Preceding taxable years.** If the acquiring corporation is a personal holding company under section 542 for its first taxable year ending after the date of distribution or transfer, the taxable year of the distributor or transferor corporation ending with such date is a first preceding taxable year for purposes of section 564, and the taxable year of the distributor or transferor corporation immediately preceding such first preceding year is a second preceding taxable year for purposes of section 564. If the acquiring corporation is a personal holding company for its second taxable year ending after the date of distribution or transfer, the taxable year of the distributor or transferor corporation ending with such date is a second preceding taxable year for purposes of section 564.

(2) **Determination of dividends paid deduction and taxable income.** The dividends paid deduction of any distributor or transferor corporation (determined under section 561 but without regard to any dividend carryover) and the taxable income of any such corporation (adjusted as provided in section 545(b)) for any taxable year ending on or before the date of distribution or transfer shall be determined without reference to any dividends paid deduction, or taxable income, of the acquiring corporation or any other distributor or transferor corporation; in like manner, the dividends paid deduction and the taxable income of the acquiring corporation for any such taxable year shall be determined without reference to any dividends paid deduction, or taxable income, of a distributor or transferor corporati[illegible]

(3) **Computation of dividend carryover.** (i) For the purpose of determining the dividend carryover to the first taxable year of the acquiring corporation ending after the date of distribution or transfer, the amount of the dividend carryover from the distributor or transferor corporation shall be determined under section 564 without reference to the dividends paid deduction or taxable income of the acquiring corporation or any other corporation. If two or more transactions to which section 381(a) applies have the same date of distribution or transfer, or if a particular taxable year of the acquiring corporation is the first taxable year ending after the dates of distribution or transfer of two or more such transactions occurring on different dates, the amount of the dividend carryover from each distributor or transferor corporation shall be determined separately as provided in the preceding sentence. Except as provided in subdi-

vision (iii) of this subparagraph, the aggregate of the dividend carryovers from each distributor or transferor corporation and the dividend carryover of the acquiring corporation (computed without regard to this section) shall constitute the dividend carryover under section 561(a)(3) of the acquiring corporation for its first taxable year ending after the date (or dates) of distribution or transfer.

(ii) For the purpose of determining the dividend carryover to the second taxable year of the acquiring corporation ending after the date (or dates) of distribution or transfer, the excess, if any, of the dividends paid deduction (determined under section 561 without regard to any dividend carryover) over the taxable income (adjusted as provided in section 545(b)) for the taxable year of each distributor or transferor corporation and the acquiring corporation referred to as a second preceding taxable year shall be determined separately without reference to the dividends paid deduction or taxable income of any other of such corporations. The excesses thus determined shall be aggregated, and such aggregate shall be—

(a) Increased by the excess of the dividends paid deduction (determined without regard to any dividend carryover) over the taxable income (adjusted as provided in section 545(b)), or

(b) Reduced by the excess of the taxable income (adjusted as provided in section 545(b)) over the dividends paid deduction (determined without regard to any dividend carryover),

for the first preceding taxable year of the acquiring corporation. Except as provided in subdivision (iii) of this subparagraph, the amount thus determined shall constitute the dividend carryover under section 561(a)(3) of the acquiring corporation for its second taxable year ending after the date (or dates) of distribution or transfer.

(iii) If a particular taxable year of the acquiring corporation is its first taxable year ending after the date (or dates) of distribution or transfer of one or more transactions to which section 381(a) applies, and if the same taxable year of the acquiring corporation is also its second taxable year ending after the date (or dates) of distribution or transfer of one or more other transactions to which section 381(a) applies, then, for the purpose of determining the dividend carryover to such taxable year of the acquiring corporation, the rules contained in both subdivisions (i) and (ii) of this subparagraph shall be applied. Insofar as such taxable year constitutes the first taxable year ending after the date (or dates) of distribution or transfer of any transaction, the amount of the dividend carryover from any distributor or transferor corporation involved in such transaction shall be determined separately as provided in subdivision (i) of this subparagraph. Insofar as such taxable year constitutes the second taxable year ending after the date (or dates) of distribution or transfer of any transaction, the amount of the dividend carryover from any distributor or transferor corporation involved in the transaction and the acquiring corporation shall be determined as provided in subdivision (ii) of this subparagraph. The aggregate of the dividend carryovers thus determined shall constitute the dividend carryover under section 561(a)(3) of the acquiring corporation for such taxable year. See example (4) in paragraph (c) of this section.

(c) **Illustrations.** The rules set forth in paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). (i) **Facts.** N Corporation acquired on June 30, 1960, all the assets of M Corporation in a reorganization to which section 381(a) applies. Both corporations compute taxable income on the basis of the calendar year. N Corporation is a personal holding company for its taxable years ending December 31, 1960, and December 31, 1961.

(ii) **Dividend carryover to N Corporation's taxable year ending December 31, 1960.** With respect to N Corporation's taxable year ending December 31, 1960, the taxable years referred to as first preceding taxable years and second preceding taxable years are—

(a) M Corporation's taxable years ending June 30, 1960, and December 31, 1959, respectively; and

(b) N Corporation's taxable years ending December 31, 1959, and December 31, 1958, respectively.

The dividend carryover to N Corporation's taxable year ending December 31, 1960, is $22,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	M Corporation		*N Corporation*	
Second preceding taxable year:				
Dividends paid deduction	$25,000		$12,000	
Taxable income	15,000		13,000	
Excess dividends paid deduction		$10,000		
First preceding taxable year:				
Dividends paid deduction	23,000		20,000	
Taxable income	21,000		10,000	
Excess dividends paid deduction		2,000		$10,000
Separate dividend carryovers		12,000		10,000

The aggregate dividend carryover of $22,000 is the sum of $12,000 (the separate dividend carryover from M Corporation) and $10,000 (the separate dividend carryover from N Corporation's own preceding taxable years).

(iii) Dividend carryover to N Corporation's taxable year ending December 31, 1961. With respect to N Corporation's taxable year ending December 31, 1961, the first preceding taxable year is N Corporation's taxable year ending December 31, 1960; and the taxable years referred to as second preceding taxable years are M Corporation's taxable year ending June 30, 1960, and N Corporation's taxable year ending December 31, 1959. The dividend carryover to N Corporation's taxable year ending December 31, 1961, is $17,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

Second preceding taxable year	M Corporation	N Corporation
Dividends paid deduction	$23,000	$20,000
Taxable income	21,000	10,000
Separate excess of dividends paid deduction over taxable income	2,000	10,000

The aggregate excess of dividends paid deduction over taxable income for the second preceding taxable year is $12,000, the sum of $2,000 (separate excess from N Corporation) and $10,000 (separate excess from N Corporation). Such aggregate excess is increased by the excess dividends paid deduction, or is reduced by the excess of taxable income, for the first preceding taxable year as follows:

Aggregate excess of dividends paid deduction for second preceding taxable year		$12,000
Dividends paid deduction of N Corporation for first preceding taxable year	$50,000	
Taxable income of N Corporation for first preceding taxable year	45,000	
		$5,000
Dividend carryover to N Corporation's taxable year ending December 31, 1961		17,000

Example (2). (i) Facts. X Corporation is organized on May 1, 1956, and computes its taxable income on the basis of the fiscal year ending April 30. Y Corporation and Z Corporation are both organized on January 1, 1955, and both compute their taxable income on the basis of the calendar year. On July 31, 1957, X Corporation and Y Corporation transfer all their assets to Z Corporation in a statutory merger to which section 381(a) applies. For its taxable years ending December 31, 1957, and December 31, 1958, Z Corporation is a personal holding company.

(ii) Dividend carryover to Z Corporation's taxable year ending December 31, 1957. With respect to Z Corporation's taxable year ending December 31, 1957, the taxable years referred to as first preceding taxable years and second preceding taxable years are—

(a) X Corporation's taxable years ending July 31, 1957, and April 30, 1957, respectively;

(b) Y Corporation's taxable years ending July 31, 1957, and December 31, 1956, respectively; and

(c) Z Corporation's taxable years ending December 31, 1956, and December 31, 1955, respectively.

The dividend carryover to Z Corporation's taxable year ending December 31, 1957, is $40,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	X Corporation		*Y Corporation*		*Z Corporation*	
Second preceding taxable year:						
Dividends paid deduction	$56,000		$19,000		$6,000	
Taxable income	24,000		17,000		5,000	
Excess		$32,000		$2,000		$1,000
First preceding taxable year:						
Dividends paid deduction	9,000		4,000		10,000	
Taxable income	7,000		8,000		5,000	
Excess		2,000		(4,000)		5,000
Separate dividend carryovers		34,000		0		6,000

The aggregate dividend carryover of $40,000 is the sum of $34,000 (the separate dividend carryover from X Corporation) and $6,000 (the separate dividend carryover from Z Corporation's own preceding taxable years).

(iii) Dividend carryover to Z Corporation's taxable year ending December 31, 1958. With respect to Z Corporation's taxable year ending December 31, 1958, the first preceding taxable year is Z Corporation's taxable year ending December 31, 1957; and the taxable years referred to as second preceding taxable years are X Corporation's taxable year ending July 31, 1957, Y Corporation's taxable year ending July 31, 1957, and Z Corporation's taxable year ending December 31, 1956. The dividend carryover to Z Corporation's taxable year ending December 31, 1958, is $1,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	X Corporation	*Y Corporation*	*Z Corporotion*
Second preceding taxable year:			
Dividends paid deduction	$9,000	$4,000	$10,000
Taxable income	7,000	8,000	5,000
Separate excess of dividends paid deduction over taxable income	2,000	0	5,000

The aggregate excess of dividends paid deduction over taxable income for the second preceding taxable year is $7,000, the sum of $2,000 (separate excess from X Corporation) and $5,000 (separate excess from Z Corporation). Such aggregate excess is increased by the excess dividends paid deduction, or is reduced by the excess of taxable income, for the first preceding taxable year as follows:

Aggregate excess of dividends paid deduction for second preceding taxable year		$7,000
Dividends paid deduction of Z Corporation for first preceding taxable year	$102,000	
Taxable income of Z Corporation for first preceding taxable year	108,000	(6,000)
Dividend carryover to Z Corporation's taxable year ending December 31, 1958		1,000

Example (3). Assume the facts stated in example (2), except that Y Corporation transferred all its assets to Z Corporation on May 31, 1957. Assume also that the facts for Y Corporation's taxable year ending May 31, 1957, are otherwise the same as those stated for its taxable year in example (2) ending July 31, 1957. In such case, the dividend carryovers to Z Corporation's taxable years ending on December 31, 1957, and December 31, 1958, are the same as in example (2) notwithstanding the fact that the transfers from X Corporation and Y Corporation occurred on the different dates.

Example (4). (i) **Facts.** T Corporation acquired on June 30, 1960, all the assets of U Corporation in a statutory merger to which section 381(a) applies, and in a like transaction acquired on June 30, 1961, all the assets of V Corporation. Such corporations all compute taxable income on the basis of the calendar year. T Corporation is a personal holding company for its taxable years 1960 and 1961.

(ii) Dividend carryover to T Corporation's taxable year 1960. With respect to T Corporation's taxable year ending December 31, 1960, the taxable years referred to as first preceding taxable years and second preceding taxable years are—

(a) U Corporation's taxable years ending June 30, 1960, and December 31, 1959, respectively; and

(b) T Corporation's taxable years ending December 31, 1959, and December 31, 1958, respectively.

The dividend carryover to T Corporation's taxable year ending December 31, 1960, is $7,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

	U Corporation		*T Corporatian*	
Second preceding taxable year:				
Dividends paid deduction	$16,000		$10,000	
Taxable income	12,000		13,000	
Excess		$4,000		0
First preceding taxable year:				
Dividends paid deduction	7,000		17,000	
Taxable income	5,000		16,000	
Excess		2,000		$1,000
Separate dividend carryovers		6,000		1,000

The aggregate dividend carryover of $7,000 is the sum of $6,000 (the separate dividend carryover from U Corporation) and $1,000 (the separate dividend carryover from T Corporation's own first preceding taxable year).

(iii) Dividend carryover to T Corporation's taxable year 1961. Inasmuch as T Corporation's taxable year 1961 is the second taxable year ending after the date of distribution or transfer from U Corporation, paragraph (b)(3)(ii) of this section governs the determination of the dividend carryover from taxable years of T Corporation and U Corporation. On the other hand, inasmuch as T Corporation's taxable year 1961 is the first taxable year ending after the date of distribution or transfer from V Corporation, paragraph (b)(3)(i) governs the determination of the dividend carryover from taxable years of V Corporation.

(a) Application of paragraph (b)(3)(ii) of this section. With respect to T Corporation's taxable year 1961, the first preceding taxable year is T Corporation's taxable year ending December 31, 1960; and the taxable years referred to as second preceding taxable year are T Corporation's taxable year ending December 31, 1959, and U Corporation's taxable year ending June 30, 1960. The dividend carryover from taxable years of T Corporation and U Corporation is $1,500 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

Second preceding taxable year	U Corporation	T Corporation
Dividends paid deduction	$7,000	$17,000
Taxable income	5,000	16,000
Separate excess of dividends paid deduction over taxable income	2,000	1,000

The aggregate excess of dividends paid deduction over taxable income for the second preceding taxable year is $3,000, the sum of $2,000 (separate excess from U Corporation) and $1,000 (separate excess from T Corporation). Such aggregate is increased by the excess dividends paid deduction, or is reduced by the excess of taxable income, for the first preceding taxable year as follows:

		T Corporation
Aggregate excess of dividends paid deduction for second preceding taxable year		$3,000
First preceding taxable year:		
Dividends paid deduction of T Corporation	$21,000	
Taxable income of T Corporation	22,500	
Excess taxable income		(1,500)
Separate dividend carryover (without regard to V Corporation)		1,500

(b) Application of paragraph (b)(3)(i) of this section. With respect to T Corporation's taxable year 1961, V Corporation's taxable year ending June 30, 1961, is a first preceding taxable year, and its taxable year ending December 31, 1960, is a second preceding taxable year. The separate dividend carryover from V Corporation is $8,000 computed as follows, assuming the dividends paid deduction before dividend carryovers, and the taxable income after section 545(b) adjustments, to be as stated in the computation:

Second preceding taxable year		V Corporation
Dividends paid deduction	$11,000	
Taxable income	6,000	
Excess		$5,000
First preceding taxable year:		
Dividends paid deduction	$9,000	
Taxable income	6,000	
Excess	3,000	
Separate dividend carryover from V Corporation		8,000

(c) Dividend carryover. The dividend carryover to T Corporation's taxable year 1961 is $9,500, the sum of $8,000 (the separate dividend carryover from V Corporation) and $1,500 (the aggregate dividend carryover from T Corporation and U Corporation).

(d) Successive carryovers. The provisions of this section shall apply for the purpose of determining a dividend carryover to an acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which has previously acquired the assets of another corporation in a transaction to which section 381(a) applies; even though, in computing the dividend carryover to such second acquiring corporation, it is necessary to take into account the deduction for dividends paid, and the adjusted taxable income, of the first distributor or transferor corporation.

(e) Acquiring corporation not receiving all the assets. The dividend carryover acquired from a distributor or transferor corporation by an acquiring corporation in a transaction to which section 381(a) applies is not reduced by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

(f) Dividends paid after the close of taxable year. A transaction to which section 381(a) applies does not prevent the application of section 563(b) to a dividend paid by a distributor or transferor corporation after the close of its taxable year ending with the date of distribution or transfer but on or before the 15th day of the third month following the close of such taxable year. However, dividends paid by the acquiring corporation may not be taken into account under section 563(b) for the purpose of determining the dividends paid deduction of the distributor or transferor corporation for its taxable year ending with the date of distribution or transfer.

[T.D. 6532, 26 FR 406, Jan. 19, 1961]

§ 1.381(c)(15)–1 Indebtedness of certain personal holding companies.

(a) Qualified indebtedness—(1) Carryover requirement. If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for any indebtedness which was qualified indebtedness (as defined in section 545(c) and § 1.545–3) in the hands of the distributor or transferor corporation immediately before the assumption of such indebtedness, then, under section 381(c)(15), in computing its undistributed personal holding company income for any taxable year beginning after December 31, 1963, and ending after the date of distribution or transfer, the acquiring corporation shall be considered the distributor or transferor corporation for purposes of computing the deduction under section 545(c) and § 1.545–3. Such deduction shall be allowed to the acquiring corporation in accordance with section 545(c) and § 1.545–3.

(2) Successive transactions to which section 381(a) applies. If in a transaction to which section 381(a) applies, an acquiring corporation assumes liability for qualified indebtedness, such acquiring corporation shall be deemed to have incurred such qualified indebtedness for the purpose of applying section 381(c)(15) to any subsequent transaction in which such acquiring corporation is the distributor or transferor corporation.

(b) Pre-1934 indebtedness—(1) Carryover requirement. If, in a transaction to which section 381(a) applies, the acquiring corporation assumes liability for any indebtedness incurred, or assumed, before January 1, 1934, by a distributor or transferor corporation, then under section 381(c)(15) the acquiring corporation shall be allowed, in computing its undistributed personal holding company income for any taxable year ending after the date of distribution or transfer, a deduction under section 545(b)(7) for amounts used or irrevocably set aside to pay or to retire such indebtedness. Such deduction shall be allowed to the acquiring corporation in accordance with section 545(b)(7) and paragraph (g) of § 1.545–2 as though the indebtedness had been incurred, or assumed, by the acquiring corporation before January 1, 1934.

(2) Successive transactions to which section 381(a) applies. If, in a transaction to which section 381(a) applies, an acquiring corporation as-

sumes liability for indebtedness described in subparagraph (1) of this paragraph, such acquiring corporation shall be deemed to have incurred the indebtedness before January 1, 1934, for the purpose of applying section 381(c)(15) to any subsequent transaction in which such acquiring corporation is the distributor or transferor corporation.

(c) **Special rule.** For purposes of this section, if, in a transaction otherwise described in this section, an acquiring corporation acquires real estate—(1) of which the distributor or transferor corporation is the legal or equitable owner immediately before the acquisition, and (2) which is subject to indebtedness that, with respect to the distributor or transferor corporation, is indebtedness described in this section immediately before the acquisition, then the acquiring corporation will be treated as having assumed such indebtedness, provided it shows to the satisfaction of the Commissioner that under all the facts and circumstances it bears the burden of discharging such indebtedness.

[T.D. 6532, 26 FR 406, Jan. 19, 1961, as amended by T.D. 6949, 33 FR 5524, April 9, 1968; 33 FR 6091, April 20, 1968]

§ 1.381(c)(16)-1 Obligations of distributor or transferor corporation.

(a) **Deduction allowed to acquiring corporation.** (1) If, in a transaction to which section 381(a) applies, the acquiring corporation assumes an obligation of a distributor or transferor corporation which gives rise to a liability after the date of distribution or transfer and if the distributor or transferor corporation would be entitled to deduct such liability in computing taxable income were it paid or accrued after that date by such corporation, then, under the provisions of section 381(c)(16) and this section, the acquiring corporation shall be entitled to deduct such liability as if it were the distributor or transferor corporation. However, in the case of a transaction to which section 381(a)(2) applies, section 381(c)(16) shall not apply to an obligation which is reflected in the amount of consideration, that is, the stock, securities, or other property, transferred by the acquiring corporation to a transferor corporation or its shareholders in exchange for the property of that transferor corporation. An obligation which is so reflected in the amount of consideration will be treated as an item or tax attribute not specified in section 381(c)(16). Such an obligation is subject to section 381(c)(4). See subparagraph (2) of this paragraph. Any deduction allowed under section 381(c)(16) to the acquiring corporation shall be taken by that corporation in the taxable year ending after the date of distribution or transfer in which the liability is paid or accrued by that corporation, as the case may be.

(2) In order to determine whether, in the case of obligations of a distributor or transferor corporation assumed by an acquiring corporation, section 381(c)(16) and this section, or section 381(c)(4) and the regulations thereunder, apply, the following rules shall govern:

(i) If the obligation gave rise to a liability before the date of distribution or transfer, see section 381(c)(4) and the regulations thereunder.

(ii) If the obligation gives rise to a liability after the date of distribution or transfer, and the obligation was not reflected in the amount of consideration transferred by the acquiring corporation to the distributor or transferor corporation or its shareholders in exchange for the property of the distributor or transferor corporation, then section 381(c)(16) and this section shall apply.

(iii) In the case of a transaction to which section 381(a)(1) applies, if the obligation gives rise to a liability after the date of a distribution, and the obligation was reflected in the amount of consideration transferred by the acquiring corporation to the distributor corporation or its shareholders in exchange for the property of the distributor corporation, then section 381(c)(16) and this section shall apply.

(iv) In the case of a transaction to which section 381(a)(2) applies, if the obligation gives rise to a liability after the date of a transfer, and the obligation was reflected in the amount of consideration transferred by the acquiring corporation to the transferor corporation or its shareholders in exchange for the property of the transferor corporation, then see section 381(c)(4) and the regulations thereunder.

(3) The rules of this section apply to obligations assumed by agreement of the parties as well as by operation of law.

(4) For purposes of this section, an obligation of a distributor or transferor corporation gives rise to a liability when the liability would be accruable by a taxpayer using the accrual method of accounting notwithstanding the fact that the distributor or transferor corporation is not using the accrual method of accounting. See paragraph (a)(2) of § 1.461-1.

(5) In the case of a transaction to which section 381(a)(2) applies, the determination as to whether

or not an obligation was reflected in the amount of consideration transferred by the acquiring corporation to the transferor corporation or its shareholders in exchange for the property of the transferor corporation shall be made on the basis of all the facts of each particular transfer. Where, on the date of distribution or transfer, the parties were aware of the existence of a specific obligation and reduced the amount of consideration to be transferred by the acquiring corporation by a specific amount because of the existence of such obligation, then such obligation shall be considered to have been reflected in the amount of consideration transferred. In the absence of such facts, it shall be presumed that the obligation was not reflected in the amount of consideration transferred.

(b) **Distribution or transfer occurring under the Internal Revenue Code of 1939.** Subject to the provisions of section 381(c)(16) and this section, a corporation which would have been an acquiring corporation (under the provisions of paragraph (b) of § 1.381(a)–1) in a transaction to which section 381(a) applies if the date of distribution or transfer had occurred on or after the effective date of the provisions of subchapter C, chapter 1 of the Internal Revenue Code of 1954, applicable to a liquidation or reorganization, as the case may be, shall be entitled to take a deduction for amounts paid or accrued in any taxable year beginning after December 31, 1953, in respect of any obligation which it has assumed from a corporation which would have been a distributor or transferor corporation in such transaction. However, this paragraph shall have no application to a situation described in paragraph (a)(2)(iv) of this section.

(c) **Examples.** The application of the foregoing rules may be illustrated by the following examples:

Example (1). X Corporation and Y Corporation compute their taxable income on the basis of the calendar year, and both corporations use an accrual method of accounting. On December 31, 1954, Y Corporation acquires the assets of X Corporation in a transfer to which section 381(a)(2) applies. By reason of State law, Y Corporation assumes responsibility for all of the obligations for which X Corporation is then, or may become, liable. The parties have no knowledge of any specific obligations of X Corporation which are not yet fixed and ascertainable, but it is agreed to reduce the amount of consideration that Y Corporation is to transfer in exchange for the assets of X Corporation by $5,000 to reflect any unforeseen contingent liabilities of X Corporation for which Y Corporation might subsequently become liable. After the date of the transfer, a claim for damages on account of the alleged negligence of an alleged agent of X Corporation is filed. After commencement of legal action by the claimant and in order to eliminate the possibility of injury to its business, Y Corporation settles the claim in 1955 by paying the claimant the amount of $3,000. Assuming that such sum would have been deductible under section 162 if paid by X Corporation, Y Corporation is entitled to deduct such sum in accordance with the provisions of section 381(c)(16) and this section in computing its taxable income for 1955, since the claim gave rise to a liability after the date of transfer, the parties were not aware of a specific obligation, and the specific obligation was not reflected in the consideration transferred by Y Corporation in exchange for the assets of X Corporation.

Example (2). Assume the same facts as in example (1), except that the claim for damages was filed prior to the transfer of X Corporation's assets to Y Corporation, but the parties considered the chances for recovery by the claimant so remote that no specific amount other than the $5,000 reduction in consideration for all contingent liabilities as a whole is reflected in the consideration transferred by Y Corporation in exchange for the assets of X Corporation. Assuming that such sum would have been deductible under section 162 if paid by X Corporation, the $3,000 paid by Y Corporation in 1955 is deductible in accordance with the provisions of section 381(c)(16) and this section in 1955.

Example (3). Assume the same facts as in example (1), except that the parties consider the chances of recovery by the claimant of sufficient probability that Y Corporation reduces the amount of consideration it transfers in exchange for the assets of X Corporation by $1,000 in addition to the $5,000 reduction for all other contingent liabilities. The $3,000 paid by Y Corporation in 1955 is not deductible under section 381(c)(16) and this section, since the specific obligation was reflected in the consideration transferred by Y Corporation in exchange for the assets of X Corporation. The deductibility of the payment is accordingly governed by the provisions of section 381(c)(4) and the regulations thereunder. Similarly, if in this case Y Corporation had transferred $10,000 less in consideration for the assets of X Corporation because of this particular claim, Y Corporation would not be entitled to any deduction for the $3,000 paid in 1955 under section 381(c)(16) and this section, and the deductibility of the payment would be governed by the provisions of section 381(c)(4) and the regulations thereunder. If the date of transfer of X Corporation's assets had occurred prior to the effective date of subchapter C, chapter 1 of the Internal Revenue Code of 1954, applicable to a reorganization, no deduction would be allowed to Y Corporation under that section.

[T.D. 6750, 29 FR 11267, Aug. 5, 1964]

§ 1.381(c)(17)–1 Deficiency dividend of personal holding company.

(a) **Carryover requirement.** If a determination (as defined in section 547(c)) establishes that a distributor or transferor corporation in a transaction to which section 381(a) applies is liable for personal holding company tax imposed by section 541 (or by a corresponding provision of prior income tax law) for any taxable year ending on or before the date of distribution or transfer, then in computing such tax the deduction described in section 547 shall be allowed pursuant to section 381(c)(17) to such corporation for the amount of deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation. Except as otherwise provided in this section, the provisions of section 547 and the regulations thereunder apply with respect to a deficiency dividend deduction allowable pursuant to section 381(c)(17).

(b) Deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation. A deficiency dividend paid by the acquiring corporation with respect to the distributor or transferor corporation is a distribution that would satisfy the definition of a deficiency dividend under section 547(d)(1) if paid by the distributor or transferor corporation to its own shareholders except that it shall be paid by the acquiring corporation to its own shareholders and shall be paid after the date of distribution or transfer and on, or within 90 days after, the date of the determination but before the acquiring corporation files claim under paragraph (c) of this section.

(c) Claim for deduction. A claim for a deduction under this section shall be made by the acquiring corporation on Form 976, and shall be filed within 120 days after the date of the determination. The form shall contain, or be accompanied by, the information required under paragraph (b)(2) of § 1.547–2 in sufficient detail to properly identify the facts with the distributor or transferor corporation and the acquiring corporation. The statement required with respect to the shareholders on the date of payment of the deficiency dividend shall relate to the shareholders of the acquiring corporation, and the required certified copy of the resolution authorizing the payment of the dividend shall be that of the board of directors, or other authority, of the acquiring corporation. Necessary changes may be made in Form 976 in order to carry out the provisions of this paragraph. The claim shall be filed with the district director for the internal revenue district in which the return of the distributor or transferor corporation to which such claim relates was filed.

(d) Effect on dividends paid deduction. A deficiency dividend paid by the acquiring corporation, which is allowable as a deduction to a distributor or transferor corporation pursuant to section 381(c)(17), shall not become a part of the dividends paid deduction of the acquiring corporation under section 561 for any taxable year.

(e) Successive transactions to which section 381(a) applies. The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, if X Corporation transfers its assets to Y Corporation in a transaction to which section 381(a) applies and if Y Corporation transfers its assets to Z Corporation in a subsequent transaction to which section 381(a) applies, then, subject to the provisions of this section, X Corporation may take a deficiency dividend deduction for the amount of deficiency dividends paid by Z Corporation with respect to X Corporation.

(f) Example. The provisions of this section may be illustrated by the following example:

Example. M Corporation, a personal holding company, computes its taxable income on the basis of the calendar year. On December 31, 1956, N Corporation acquires the assets of M Corporation in a transaction to which section 381(a) applies. On July 31, 1958, a determination (as defined in section 547(c)) establishes that M Corporation is liable for the taxable year 1955 for personal holding company tax in the amount of $35,500 based on undistributed personal holding company income of $42,000 for such taxable year. N Corporation complies with the provisions of this section and on September 30, 1958, distributes $42,000 to its shareholders as deficiency dividends with respect to M Corporation's taxable year 1955. The distribution of $42,000 by N Corporation is a taxable dividend under section 316(b)(2) regardless of whether N Corporation is a personal holding company for the taxable year 1958 or whether it had any current or accumulated earnings and profits. See example (3) in paragraph (e) of § 1.316–1. Because N Corporation has paid deficiency dividends of $42,000 in accordance with this section, M Corporation is entitled to a deficiency dividend deduction of $42,000 for the taxable year 1955 and is thus relieved of its liability for personal holding company tax of $35,500 for such taxable year. To prevent a duplication of deductions, the amount distributed by N Corporation in 1958 does not become a part of N Corporation's dividends paid deduction under section 561 for any taxable year.

[T.D. 6532, 26 FR 409, Jan. 19, 1961, as amended by T.D. 7604, 44 FR 18661, March 29, 1979; T.D. 7767, 45 FR 11264, Feb. 6, 1981]

§ 1.381(c)(18)–1 Depletion on extraction of ores or minerals from the waste or residue of prior mining.

(a) Carryover requirement. Section 381(c)(18) provides that the acquiring corporation in a transaction described in section 381(a) shall be considered as though it were the distributor or transferor corporation after the date of distribution or transfer for the purpose of determining the applicability of section 613(c)(3) (relating to extraction of ores or minerals from the ground). Thus, an acquiring corporation which has acquired the waste or residue of prior mining from a distributor or transferor corporation in a transaction described in section 381(a) shall be entitled, after the date of distribution or transfer, to an allowance for depletion under section 611 in respect of ores or minerals extracted from such waste or residue if the distributor or transferor corporation would have been entitled to such an allowance for depletion in the absence of the distribution or transfer. See paragraph (f) of § 1.613–4 to determine whether a distributor or transferor corporation is entitled to an allowance for depletion with respect to the waste or residue of prior mining.

(b) Application of section 614 to waste or residue of prior mining. If, in a transaction described in section 381(a), the acquiring corporation acquires waste or residue of prior mining from a distributor or transferor corporation, then the acquiring corporation shall be considered as though it were the distributor or transferor corporation for the purpose of applying section 614 and the regulations thereunder to the waste or residue so acquired. Thus, if the distributor or transferor corporation was required under paragraph (c) of § 1.614–1 to treat the waste or residue as part of the mineral deposit from which it was extracted and if the acquiring corporation acquires both the waste or residue and the mineral deposit from which it was extracted in a transaction described in section 381(a), then such waste or residue shall be treated as a part of such mineral deposit in the hands of the acquiring corporation. On the other hand, if the waste or residue was required to be treated as a separate mineral deposit in the hands of the distributor or transferor corporation, such waste or residue shall be treated as a separate mineral deposit in the hands of the acquiring corporation.

[T.D. 6552, 26 FR 1991, March 8, 1961, as amended by T.D. 7170, 37 FR 5373, March 15, 1972]

§ 1.381(c)(19)–1 Charitable contribution carryovers in certain acquisitions.

(a) Carryover requirement. Section 381(c)(19) provides that, in computing taxable income for its taxable years which begin after the date of distribution or transfer to which section 381(a) applies, the acquiring corporation shall take into account any charitable contributions made by a distributor or transferor corporation during the taxable year ending on the date of distribution or transfer, and in certain immediately preceding taxable years, which are in excess of the maximum amount deductible for those taxable years under section 170(b)(2) in the following manner:

(1) If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins before January 1, 1962, the acquiring corporation shall, in computing taxable income for its first 2 taxable years which begin after the date of such distribution or transfer, take into account the excess contributions made by the distributor or transferor corporation in the taxable year ending on the date of distribution or transfer and in the immediately preceding taxable year;

(2) If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1961, the acquiring corporation shall, in computing taxable income for certain taxable years which begin after the date of distribution or transfer, take into account the excess contributions made by the distributor or transferor corporation in the taxable year ending on such date of distribution or transfer and in any of the four taxable years immediately preceding such taxable year but excluding any taxable year beginning before January 1, 1962 (see paragraph (c)(3) of this section). Notwithstanding the preceding sentence, if the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1961, and before January 1, 1963, the acquiring corporation shall, in computing taxable income for its first taxable year which begins after the date of distribution or transfer, also take into account the excess contributions made by the distributor or transferor corporation in the taxable year immediately preceding the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer (see paragraph (c)(2) of this section).

To determine the amount of excess contributions made by a distributor or transferor corporation and to integrate them with contributions made by the acquiring corporation for the purpose of determining the charitable contributions deductible by the acquiring corporation for its taxable years beginning immediately after the date of distribution or transfer, it is necessary to apply the provisions of section 170(b)(2) and § 1.170–3 (or, if applicable, section 170(b)(2) and (d)(2) and § 1.170A–11) in accordance with the conditions and limitations of section 381(c)(19) and this section. For taxable years beginning before January 1, 1970, see section 170 for provisions of section 170(b)(2) as referred to in this section. For taxable years beginning after December 31, 1969, see section 170A for provisions of section 170(b)(2) or (d)(2) as referred to in this section. For special rules for applying section 170(d)(2) with respect to contributions paid, or treated as paid, in taxable years beginning before January 1, 1970, see paragraph (d) of § 1.170A–11.

(b) Manner of computing excess charitable contribution carryovers. (1) The amount of any charitable contribution made by a distributor or transferor corporation in any taxable year ending on or before the date of distribution or transfer, or made by the acquiring corporation in any taxable year before its taxable year beginning after the date of distribution or transfer, in excess of the amount allowable as a deduction to such corporation for

such taxable year under section 170(b)(2) shall be determined by taking into account the taxable income of, and the contributions made by, that corporation only.

(2) An acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of sections 170 and 381, the charitable contribution carryovers available to the first acquiring corporation under sections 170 and 381, including those derived by such first acquiring corporation from its distributor or transferor corporation.

(3) The excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer and in certain immediately preceding taxable years (see paragraph (c) of this section) which are not deductible by the distributor or transferor corporation because of the 5-percent limitation of section 170(b)(2) shall be available to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation. Thus, if a parent corporation owning 80 percent of all classes of stock of its subsidiary corporation were to acquire its share of the assets of the subsidiary corporation upon a complete liquidation described in paragraph (b)(1)(i) of § 1.381(a)–1, then, subject to the conditions and limitations of this section, 100 percent of the excess contributions made by the subsidiary corporation would be available to the acquiring corporation.

(c) Taxable years to which carryovers apply and amount deductible—(1) Taxable years beginning before January 1, 1962. If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins before January 1, 1962:

(i) The excess charitable contributions made by a distributor or transferor corporation in its taxable year immediately preceding that ending on the date of distribution or transfer, to the extent not deductible by it because of the limitations of section 170(b)(2) in its taxable year ending on that date, shall be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) in its first taxable year beginning after the date of distribution or transfer. Any portion of such excess which is not deductible under this section by the acquiring corporation in such first taxable year shall not be deducted by that corporation in any other taxable year.

(ii) The excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer shall first be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) and this section in its first taxable year beginning after that date and then, to the extent prescribed by section 170(b)(2) and this section, in its second taxable year beginning after that date. Any portion of such excess which is not deductible under this section by the acquiring corporation in such first and second taxable years shall not be deducted by that corporation in any other taxable year.

(2) Taxable years beginning in 1962. If the taxable year of the distributor or transferor corporation ending on the date of distribution or transfer begins after December 31, 1961, and before January 1, 1963:

(i) The excess charitable contributions made by a distributor or transferor corporation in its taxable year immediately preceding that ending on the date of distribution or transfer, to the extent not deductible by it because of the limitations of section 170(b)(2) in its taxable year ending on that date, shall be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) in its first taxable year beginning after the date of distribution or transfer. Any portion of such excess which is not deductible under this section by the acquiring corporation in such first year shall not be deducted by that corporation in any other taxable year.

(ii) The excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer and beginning after December 31, 1961, and before January 1, 1963, shall first be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) and this section in its first taxable year beginning after that date and then, to the extent prescribed by section 170(b)(2) and this section, in its second, third, fourth, and fifth taxable year, in order of time, beginning after that date. Any portion of such excess which is not deductible under this section by the acquiring corporation in such 5 taxable years shall not be deducted by that corporation in any other taxable year.

(3) Taxable years beginning after December 31, 1962. (i) If the taxable year of the distributor or

transferor corporation ending on the date of distribution or transfer begins after December 31, 1962, the excess charitable contributions made by a distributor or transferor corporation in its taxable year ending on the date of distribution or transfer and in each of its four immediately preceding taxable years (excluding any taxable year beginning before January 1, 1962), to the extent not deductible by it because of the limitations of section 170(b)(2) in its taxable year ending on the date of distribution or transfer or its prior taxable years, shall be deductible by the acquiring corporation to the extent prescribed by section 170(b)(2) (or, if applicable, section 170(d)(2)) and subdivision (ii) of this subparagraph, in its taxable years which begin after the date of distribution or transfer. However, any portion of the excess charitable contributions made by a distributor or transferor corporation in a particular taxable year, to which this subparagraph is applicable, which is not deductible under this section within the 5 taxable years immediately following the taxable year in which the contribution was paid by the distributor or transferor corporation shall not be deductible by the acquiring corporation in any other taxable year.

(ii) For purposes of determining the 5 taxable years in which the excess contributions may be deducted, all taxable years of the distributor or transferor corporation subsequent to the taxable year in which the excess contribution was made, including the taxable year ending on the date of distribution or transfer shall be treated as taxable years of the acquiring corporation.

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example. X Corporation and Y Corporation both compute taxable income on the calendar year basis. X Corporation has excess charitable contributions for 1962 and 1964. On December 31, 1966, X Corporation distributes all its assets to Y Corporation in a complete liquidation to which section 381(a) applies. The excess 1962 charitable contributions of X Corporation (to the extent not deductible by X because of the limitations of section 170(b)(2) in its taxable years 1963 through 1966) may be deducted by Y Corporation only in 1967. Y Corporation's taxable year 1967 is the fifth taxable year succeeding the taxable year 1962 (the year in which the excess contributions were made), and the portion of such excess contributions which is not deductible in the 5 taxable years immediately succeeding 1962 (1963 through 1967) is not deductible by Y Corporation in any other taxable year. Any excess charitable contributions for 1964 to which Y Corporation may be entitled must be deducted by Y Corporation (if deductible at all) in 1967, 1968, and 1969 since such years are the third, fourth, and fifth taxable years succeeding the taxable year 1964 (the year in which the excess contributions were paid).

(4) General rules. No excess charitable contributions made by a distributor or transferor corporation shall be deductible by the acquiring corporation in its taxable year which includes the date of distribution or transfer. In addition, an excess charitable contribution made by a distributor or transferor corporation in a taxable year prior to the taxable year of the transfer is only deductible by the distributor or transferor corporation, subject to the limitations of section 170(b)(2) (or, if applicable, section 170(d)(2)), in its subsequent taxable years which begin on or before the date of distribution or transfer, and by the acquiring corporation in its taxable year or years beginning after the date of distribution or transfer.

(d) **Rules governing amounts deductible by acquiring corporations.** (1) In applying the provisions of section 170(b)(2) (or, if applicable, section 170(d)(2)) for the purpose of determining the amount of excess charitable contributions which are deductible by the acquiring corporation in its taxable years beginning after the date of distribution or transfer, all taxable years of the distributor or transferor and acquiring corporations which, with respect to a particular taxable year beginning after the date of distribution or transfer, constitute the same numbered preceding taxable year shall together be considered as a 1 taxable year even though the taxable years involved may not end on the same date. Thus, for example, all taxable years of the distributor or transferor and acquiring corporations which, with respect to the first taxable year of the acquiring corporation beginning after the date of distribution or transfer, constitutes the second preceding taxable year shall together be considered as 1 taxable year even though the taxable years involved may not end on the same date. Any excess charitable contributions carried over from preceding taxable years which are considered as 1 taxable year shall be taken into account by the acquiring corporation as one amount, without regard to the extent to which the contributions were made by a distributor or transferor corporation or the acquiring corporation.

(2) For purposes of this paragraph, each taxable year of the distributor or transferor corporation beginning on or before the date of distribution or transfer shall be treated as a preceding taxable year with reference to the acquiring corporation's taxable years beginning after such date. For example, the taxable year of a distributor or transferor corporation which ends on the date of distribution or transfer shall be considered a first preceding taxable year with reference to the acquiring corporation's first taxable year beginning after that date, a second preceding taxable year with reference to the acquiring corporation's second taxable

year beginning after that date, and so forth with respect to succeeding taxable years of the acquiring corporation. Also, for example, the taxable year of a distributor or transferor corporation which immediately precedes its taxable year ending on the date of distribution or transfer shall be considered a second preceding taxable year with reference to the acquiring corporation's first taxable year beginning after that date.

(e) **Illustration.** The application of this section may be illustrated by the following example:

Example. (i) X Corporation is organized on April 1, 1956, and computes its taxable income on the basis of the fiscal year ending March 31. Y Corporation is organized on July 1, 1955, and computes its taxable income on the basis of the fiscal year ending June 30. Z Corporation is organized on January 1, 1956, and computes its taxable income on the basis of the calendar year. On June 30, 1957, X Corporation distributes all its assets to Y Corporation in a complete liquidation to which section 381(a) applies. On November 30, 1957, Y Corporation transfers all its assets to Z Corporation in a statutory merger to which section 381(a) applies.

(ii) The 5-percent limitation (computed in the manner prescribed by section 170(b)(2)), the charitable contributions actually paid, and the excess contributions with respect to each such corporation during the taxable years involved are as follows:

Name of corporation	*X*	*X*	
Taxable year ending	*3–31–57*	*6–30–57*	
5-percent limitation	$20,000	$9,000	
Current contributions	32,000	15,000	
(Excess contributions)	(12,000)	(6,000)	
Name of corporation	*Y*	*Y*	*Y*
Taxable year ending	*6–30–56*	*6–30–57*	*11–30–57*
5-percent limitation	$15,000	$10,000	$18,000
Current contributions	29,000	0	17,000
(Excess contributions)	(14,000)		
Balance of 5-percent limitation		10,000	1,000
Name of corporation	*Z*	*Z*	*Z*
Taxable year ending	*12–31–56*	*12–31–57*	*12–31–58*
5-percent limitation	$10,000	$30,000	$58,000
Current contributions	40,000	28,000	92,000
(Excess contributions)	(30,000)		
Balance of 5-percent limitation		2,000	56,000

(iii) X Corporation was in existence for two taxable years, in each of which it made charitable contributions in excess of the maximum amount deductible for those years under section 170(b)(2). The excess contributions made in the year ending March 31, 1957, of $12,000, are deductible by X Corporation in its short taxable year ending June 30, 1957, and then by Y Corporation in its short taxable year ending November 30, 1957, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section. The excess contributions made by X Corporation in the year ending June 30, 1957, of $6,000, are deductible by Y Corporation in its short taxable year ending November 30, 1957, and then by Z Corporation in its taxable year 1958, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section.

(iv) Y Corporation was in existence for three taxable years. In the year ended June 30, 1956, its contributions in excess of the amount deductible for that year under section 170(b)(2) amounted to $14,000. Such excess is deductible by Y Corporation in its taxable year ending June 30, 1957, and, together with X Corporation's excess contributions of $18,000, in its short taxable year ending November 30, 1957, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section. Accordingly, since Y Corporation made no contributions in its taxable year ending June 30, 1957, its deduction for that year on account of excess contributions carried over is $10,000, an amount equal to the 5-percent limitation of section 170(b)(2). The deduction is attributable to excess contributions made by Y Corporation in the taxable year ended June 30, 1956; thus, the excess of those contributions over $10,000, namely, $4,000, is deductible by Y Corporation in its short taxable year ending November 30, 1957, in the manner and to the extent prescribed by section 170(b)(2) and this section. With respect to the short taxable year ending November 30, 1957, the excess contributions of the second preceding year are X Corporation's excess contributions of $12,000 made in the year ending March 31, 1957, and Y Corporation's excess contributions of $4,000 made in the year ending June 30, 1956, which were not deductible by Y Corporation in the taxable year ending June 30, 1957, because of the 5-percent limitation prescribed by section 170(b)(2), an aggregate of $16,000. Inasmuch as Y Corporation's limitation for the short taxable year ended November 30, 1957, exceeds the contributions made in that year by $1,000, the excess contributions of the second preceding taxable year are deductible in the taxable year ending November 30, 1957, to the extent of $1,000 and the remainder ($15,000) is not deductible by any corporation in any taxable year. The excess contributions of the first preceding taxable year, namely, X Corporation's excess contributions made in the short taxable year ending June 30, 1957, are deductible by Z Corporation in its taxable year 1958, in the manner and to the extent prescribed in section 170(b)(2) and this section.

(v) Z Corporation has been in existence for 3 taxable years. The contributions made in 1956 in excess of the amount deductible for that year under section 170(b)(2) amounted to $30,000. Such excess is deductible by Z Corporation in its taxable year 1957 and, together with X Corporation's excess contributions of $6,000 (derived through Y Corporation) made in the taxable year ending June 30, 1957, in the taxable year 1958, in each instance in the manner and to the extent prescribed by section 170(b)(2) and this section. Thus, $2,000 of the $30,000 excess contributions made in the year 1956 are deducted in 1957 and the remainder ($28,000), together with X Corporation's excess contributions of $6,000 made in the short taxable year ending June 30, 1957, are deducted in 1958 since the aggregate of such amounts plus the contributions actually made in that year does not exceed the 5-percent limitation prescribed by section 170(b)(2).

[T.D. 6552, 26 FR 1992, March 8, 1961, as amended by T.D. 6900, 31 FR 14642, Nov. 17, 1966; T.D. 7207, 37 FR 20795, Oct. 5, 1972]

§ 1.381(c)(21)–1 Pre-1954 adjustments resulting from change in method of accounting.

(a) **Carryover requirement.** Section 381(c)(21) provides that, in a transaction to which section

381(a) applies, an acquiring corporation shall take into account the net amount of any adjustments described in section 481(b)(4) (relating to adjustments arising from changes in accounting methods initiated by the taxpayer attributable to pre-1954 Code years) of the distributor or transferor corporation to the extent that such net amount of such adjustments has not been taken into account in any taxable year, including a short taxable year, by the distributor or transferor corporation. The acquiring corporation shall take into account in each taxable year beginning with the taxable year ending after the date of distribution or transfer the net amount of such adjustments in the same manner and at the same time as such net amount would have been taken into account by the distributor or transferor corporation. Thus, the amount of any such adjustment which the acquiring corporation shall take into account in each taxable year shall be the same amount that would have been taken into account in each taxable year by the distributor or transferor corporation.

(b) This section may be illustrated by the following example:

Example. On January 1, 1960, X Corporation, a calendar year taxpayer, voluntarily changed its method of accounting giving rise to a $50,000 adjustment under section 481(a), of which $20,000 is attributable to pre-1954 Code years. Under section 481(b)(4) the $20,000 adjustment is to be spread over 1960 and the following 9 years at the rate of $2,000 each year. On November 1, 1963, all the assets of X Corporation are acquired by Y Corporation in a transaction to which section 381(a) applies. Y Corporation reports its income on a fiscal year ending June 30. X and Y Corporations must take into account the $20,000 adjustment at the rate of $2,000 in each taxable year in the following time and manner:

X Corporation		
Calendar years 1960–62 ($2,000 × 3)	$6,000	
Short taxable year ending Nov. 1, 1963 ($2,000 × 1)	2,000	$8,000
Y Corporation		
Fiscal years ending:		
June 30, 1964 ($2,000 × 1)	2,000	
June 30, 1965–69 ($2,000 × 5)	10,000	12,000
		20,000

(c) Successive transactions to which section 381(a) applies. The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, if R Corporation, which was taking into account adjustments described in section 481(b)(4), distributes or transfers its assets to S Corporation in a transaction to which section 381(a) applies, and S Corporation was required to take into account any remaining portion of such adjustments under section 381(c)(21) and this section, and if subsequently S Corporation distributes or transfers its assets to T Corporation in a transaction to which section 381(a) applies, then T Corporation, under section 381(c)(21) and this section, shall take into account any remaining portion of such adjustments not previously taken into account by R and S Corporations.

(d) Acquiring corporation not receiving all the assets. The adjustments described in this section acquired from a distributor or transferor corporation by an acquiring corporation in a transaction to which section 381(a) applies is not reduced by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

[T.D. 6553, 26 FR 2171, March 15, 1961]

§ 1.381(c)(22)–1 Successor life insurance company.

(a) Carryover requirement. If in a taxable year beginning after December 31, 1957, a distributor or transferor corporation which is a life insurance company (as defined in section 801(a)) is acquired by a corporation which is a life insurance company (as defined in section 801(a)), in a transaction to which section 381(a) applies, section 381(c)(22) provides that the acquiring corporation shall take into account the appropriate items which the distributor or transferor corporation was required to take into account for purposes of part I, subchapter L, chapter 1 of the Code. Furthermore, except as otherwise provided by this section, the acquiring corporation shall take into account the items described in paragraphs (2) through (21), other than paragraphs (14), (15), and (17), of section 381(c) and the regulations thereunder. For example, the acquiring corporation shall take into account the reserves described in section 810(c) distributed or transferred to it as of the close of the date of distribution or transfer by the distributor or transferor corporation in accordance with the provisions of section 381(c)(4) and the regulations thereunder. For provisions defining the date of distribution or transfer, see paragraph (b) of § 1.381(b)–1.

(b) Items required to be taken into account by acquiring corporation. If a transaction meets the requirements of paragraph (a) of this section, the acquiring corporation shall, except as otherwise provided, take into account as of the close of the date of distribution or transfer the following items of the distributor or transferor corporation:

(1) The operations loss carryovers (as determined under section 812), subject to conditions and limitations consistent with the conditions and

limitations prescribed in section 381(c)(1) and the regulations thereunder. For example, a loss from operations for a loss year of a distributor or transferor corporation which ends on or before the last day of a loss year of the acquiring corporation shall be considered to be a loss from operations for a year prior to such loss year of the acquiring corporation. All references in section 381(c)(1) and the regulations thereunder to section 172 shall be construed as referring to the appropriate corresponding provisions of section 812. Thus, a reference to section 172(b) shall be construed as referring to section 812(b) and (d). In determining the span of years for which a loss from operations may be carried, the number of taxable years for which the distributor or transferor corporation was authorized to do business as an insurance company shall be taken into account. For purposes of this determination, the taxable year of the distributor or transferor corporation which ends on the date of distribution or transfer shall be taken into account even though such taxable year is a period of less than 12 months.

(2)(i) The investment yield and the beginning of the year asset balance for the distributor or transferor corporation's taxable year ending with the close of the date of distribution or transfer. Such items shall be integrated with the investment yield and beginning of the year asset balance of the acquiring corporation for its first taxable year ending after such date of distribution or transfer for purposes of determining the current earnings rate of the acquiring corporation for such taxable year. Furthermore, for purposes of determining the average earnings rate of the acquiring corporation, the investment yield and mean of the assets of the distributor or transferor corporation for its 4 taxable years immediately preceding its taxable year which closes with the date of distribution or transfer shall be integrated with the investment yield and mean of the assets of the acquiring corporation for such corresponding taxable years.

(ii) The provisions of this subparagraph may be illustrated by the following examples:

Example (1). X qualified as a life insurance company in 1949. Y qualified as a life insurance company in 1951. On June 30, 1961, at which time both X and Y were life insurance companies (as defined in section 801(a)), X transferred all its assets to Y in a statutory merger to which section 361 applies. For its taxable year ending on June 30, 1961, X had investment yield of $15 and assets at the beginning of such taxable year of $450. For purposes of determining its current earnings rate for its taxable year ending on December 31, 1961, Y had investment yield of $45 (including the $15 of investment yield of X), assets at the beginning of such taxable year of $1,250 (including the $450 of X's assets at the beginning of its taxable year 1961), and assets at the end of such taxable year of $1,750 (after the application of section 806(a)). Under the provisions of subdivision (i) of this subparagraph, the current earnings rate of Y for the taxable year 1961 would be 3 percent, determined by dividing the investment yield of Y, $45, by the mean of the assets of Y, $1,500 ($1,250+$1,750÷2). In order to determine its average earnings rate and adjusted reserves rate for the taxable year 1961, Y would make up the following schedule:

Taxable year	Investment yield			Mean of assets			Current earnings rate of Y
	Column 1—X	Column 2—Y	Column 3 (Col. 1 + Col. 2) integrated investment yield	Column 4—X	Column 5—Y	Column 6 (Col. 4 + Col. 5) integrated means of assets	Column 7 (Col. 3 ÷ Col. 6)
1960	$16	$26	$42	$400	$800	$1,200	3.5
1959	16	24	40	500	750	1,250	3.2
1958	17	22	39	650	650	1,300	3.0
1957	19	21	40	700	500	1,200	3.3

For the taxable year 1961, Y would have an average earnings rate of 3.2 percent, computed by taking into account the current earnings rates for the taxable year 1961 and each of the 4 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 3 percent since the current earnings rate of 3 percent for 1961 is lower than the average earnings rate of 3.2 percent.

Example (2). The facts are the same as in example (1), except that the taxable year in issue is 1962, and the current earnings rate of Y for such taxable year was 3.8 percent. For the taxable year 1962, Y would have an average earnings rate of 3.3 percent, computed by taking into account only the current earnings rates for the taxable year 1962 and each of the 4 taxable years immediately preceding such taxable year. The adjusted reserves rate for such taxable year would be 3.3 percent since the average earnings rate of 3.3 percent is lower than the 1962 current earnings rate of 3.8 percent.

(3) To the extent there are any amounts accrued for discounts in the nature of interest which have not been included as interest paid under section 805(e)(3), the acquiring corporation shall be treated as the distributor or transferor corporation for purposes of including such amounts as interest paid.

(4) Any adjustment required by section 806(b) with respect to an item described in section 810(c) shall be made by the acquiring corporation in its

first taxable year which begins after the date of distribution or transfer.

(5) The amount of the deduction provided by section 809(d)(6), as limited by section 809(f), for all taxable years of the distributor or transferor corporation which end on and before the date of distribution or transfer (irrespective of whether or not the distributor or transferor corporation claimed this deduction for such taxable years) for the purpose of determining the limitation under section 809(d)(6).

(6)(i) To the extent there are any remaining net increases or net decreases in reserves required to be taken into account by the distributor or transferor corporation under section 810(d)(1), the acquiring corporation shall be treated as the distributor or transferor corporation as of its first taxable year which begins after the date of distribution or transfer.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. Assume that the amount of an item described in section 810(c) of X, a life insurance company, at the beginning of the taxable year 1959 is $100. Assume that at the end of the taxable year 1959, as a result of a change in the basis used in computing such item during the taxable year, the amount of the item (computed on the new basis) is $200 but computed on the old basis would have been $150. Since the amount of the item at the end of the taxable year computed on the new basis, $200, exceeds the amount of the item at the end of the taxable year computed on the old basis, $150, by $50, section 810(d)(1) provides that one-tenth of the amount of such excess, or $5, shall be taken into account by X as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of the 10 taxable years immediately following the taxable year 1959. Assume further that on June 30, 1961, X transferred all its assets to Y, a life insurance company, in a statutory merger to which section 361 applies. Under the provisions of section 810(d)(1), X would include $5 as a net increase under section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for its taxable years 1960 and 1961. Thus, the remaining net increase to be taken into account by X under section 810(d)(1) is $40 (eight-tenths of $50). Accordingly, Y shall take into account $5 as a net increase referred to in section 809(d)(2) and paragraph (a)(2) of § 1.809–5 in determining gain or loss from operations for each of its 8 taxable years beginning in 1962 ($\$5 \times 8 = \$40$).

(7)(i) The dollar balances in the shareholders surplus account, policyholders surplus account, and other accounts provided, however, that the acquiring corporation is a stock life insurance company. The dollar balance in the policyholders surplus account shall reflect the amount (if any) treated as a subtraction from such account by reason of the application of the limitation provided under section 815(d)(4) immediately prior to the close of the date of distribution or transfer. To the extent that any amount must be added to the shareholders surplus account as a result of the application of the limitation provided under section 815(d)(4), the acquiring corporation shall be treated as the distributor or transferor corporation as of its first taxable year which begins after the date of distribution or transfer.

(ii) If the acquiring corporation is a mutual life insurance company, the dollar balances in the shareholders surplus account, policyholders surplus account, and other accounts shall not be taken into account by such acquiring corporation and the distributor or transferor corporation shall be subject to the provisions of section 815(d)(2)(A) as of the close of the date of distribution or transfer.

(8) To the extent that any amount must be added to the shareholders surplus account as a result of an election made under section 815(d)(1) by the distributor or transferor corporation, the acquiring corporation shall be treated as the distributor or transferor corporation as of its first taxable year which begins after the date of distribution or transfer.

(9) The amount of the life insurance reserves at the end of 1958, but only for the purpose of applying the limitation provided under section 815(d)(4)(B).

(10) To the extent there are amounts subject to the provisions of section 817(d), the acquiring corporation shall be treated as the distributor or transferor corporation.

(11) To the extent there are any installments of tax imposed by section 818(e)(3)(A) remaining to be paid, the acquiring corporation shall be treated as the distributor or transferor corporation for the purpose of paying such installments.

(12) The capital loss carryovers, subject to conditions and limitations consistent with the conditions and limitations prescribed in section 381(c)(3) and the regulations thereunder, except that any net capital loss of the distributor or transferor corporation for a taxable year beginning before January 1, 1959, shall not be taken into account. See section 817(c).

[T.D. 6625, 27 FR 12541, Dec. 19, 1962]

§ 1.381(c)(23)–1 Investment credit carryovers in certain corporate acquisitions.

(a) Carryover requirement. **(1)** Section 381(c)(23) requires the acquiring corporation in a transaction to which section 381 applies to succeed

to and take into account under such regulations as may be prescribed by the Secretary or his delegate, the investment credit carryovers of the distributor or transferor corporation. To determine the amount of these carryovers as of the close of the date of distribution or transfer, and to integrate them with any carryovers and carrybacks of the acquiring corporation for purposes of determining the amount of credit allowed by section 38 to the acquiring corporation for taxable years ending after the date of distribution or transfer, it is necessary to apply the provisions of sections 46, 47, and 48 in accordance with the conditions and limitations of this section.

(2) The investment credit carryovers and carrybacks of the acquiring corporation determined as of the close of the date of distribution or transfer shall be computed without reference to any unused credit of a distributor or transferor corporation. The investment credit carryovers of a distributor or transferor corporation as of the close of the date of distribution or transfer shall be determined without reference to any unused credit of the acquiring corporation.

(b) Carryback of unused credits. An unused credit of the acquiring corporation for any taxable year ending after the date of distribution or transfer shall not be carried back in computing the credit allowed by section 38 to a distributor or transferor corporation. However, an unused credit of the acquiring corporation for any such taxable year shall be carried back in accordance with section 46(b)(1) in computing the credit allowed to the acquiring corporation for a taxable year ending on or before the date of distribution or transfer. If a distributor or transferor corporation remains in existence after the date of distribution or transfer, an unused credit sustained by it for any taxable year beginning after such date shall be carried back in accordance with section 46(b)(1) in computing the credit allowed by section 38 to such corporation for a taxable year ending on or before that date, but may not be carried back or over in computing the credit allowed by section 38 to the acquiring corporation.

(c) Computation of carryovers and carrybacks. (1) Subject to the modifications set forth in this paragraph, the provisions of § 1.46-2 shall apply in computing carryovers and carrybacks of unused credits to taxable years of the acquiring corporation.

(2)(i) The investment credit carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall first be carried to the first taxable year of the acquiring corporation ending after that date. This rule applies whether the date of distribution or transfer is on the last day, or any other day, of the acquiring corporation's taxable year.

(ii) The investment credit carryovers available to the distributor or transferor corporation as of the close of the date of distribution or transfer shall be carried to the acquiring corporation without diminution by reason of the fact that the acquiring corporation does not acquire 100 percent of the assets of the distributor or transferor corporation.

(3) An unused credit of a distributor or transferor corporation for a taxable year which ends on or before the last day of a taxable year of the acquiring corporation shall be considered to be an unused credit for a year prior to such taxable year of the acquiring corporation. If the acquiring corporation has acquired the assets of two or more distributor or transferor corporations on the same date of distribution or transfer, the unused credit years of the distributor or transferor corporations shall be taken into account in the order in which such years terminate. If any one of the unused credit years of a distributor or transferor corporation ends on the same day as the unused credit year of another distributor or transferor corporation, either unused credit year may be taken into account before the other.

(4) The extent to which an investment credit carryover of a distributor or transferor corporation or of an acquiring corporation from an unused credit year ending before January 1, 1971, may be taken into account by the acquiring corporation for a taxable year beginning after December 31, 1970, shall be determined without regard to the credit earned by the acquiring corporation for such year. Thus, in such a case, the amount of unused credit from such unused credit years which may be taken into account in a taxable year of the acquiring corporation beginning after December 31, 1970, shall be determined solely with reference to the limitation based on amount of tax for such taxable year (without reduction for the credit earned for such year).

(d) Computation of carryovers when date of distribution or transfer occurs on last day of acquiring corporation's taxable year. The computation of the investment credit carryovers from the distributor or transferor corporation and from the acquiring corporation in a case where the date of distribution or transfer occurs on the last day of a

taxable year of the acquiring corporation may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1971, and each corporation files its return on the calendar year basis. On December 31, 1972, X transfers all its assets to Y in a statutory merger to which section 361 applies. X's credit earned and its limitation based on amount of tax for its taxable years 1971 and 1972 are as follows:

X Corporation's taxable year	Credit earned	Limitation based on amount of tax
1971	$10,000	$5,000
1972	5,000	3,000

Y's credit earned and its limitation based on amount of tax for its taxable years 1971 through 1973 are as follows:

Y Corporation's	Credit earned	Limitation based on amount of tax
1971	$6,000	$5,000
1972	5,000	3,000
1973	3,000	10,000

The sequence for the allowance of unused credits of X Corporation and Y Corporation, and the computation of the carryovers to Y Corporation's calendar year 1974, may be illustrated as follows:

(1) X Corporation's 1971 unused credit. The carryover to Y 1974 is $0, computed as follows:

Unused credit	$5,000
Excess of X's 1972 limitation based on tax over credit earned	0
Carryover to Y's year 1973	5,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Carryover to Y's year 1974	0

(2) Y Corporation's 1971 unused credit. The carryover to Y 1974 is $0, computed as follows:

Unused credit	$1,000
Excess of Y's 1972 limitation based on tax over credit earned	0
Carryover to Y's year 1973	1,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Less: X's $5,000 carryover from 1971	5,000
	2,000
Carryover to Y's year 1974	0

(3) X Corporation's 1972 unused credit. The carryover to Y 1974 is $1,000, computed as follows:

Unused credit	$2,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Less: X's $5,000 carryover from 1971 and Y's $1,000 carryover from 1971	6,000
	1,000
Carryover to Y's year 1974	1,000

(4) Y Corporation's 1972 unused credit. The carryover to Y 1974 is $2,000, computed as follows:

Unused credit	$2,000
Excess of Y's 1973 limitation based on tax over credit earned	7,000
Less: X's $5,000 carryover from 1971, Y's $1,000 carryover from 1971 and X's $1,000 carryover from 1972	7,000
	0
Carryover to Y's year 1974	2,000

(5) The aggregate of the investment credit carryovers to Y's year 1974 is $3,000, computed as follows:

X's 1972 unused credit	$1,000
Y's 1972 unused credit	2,000
Total	3,000

(e) Computation of carryovers when date of distribution or transfer is not on last day of acquiring corporation's taxable year. (1) If the date of distribution or transfer occurs on any day other than the last day of a taxable year of the acquiring corporation, the amount which may be added to the amount allowable as a credit by section 38 for the first taxable year of the acquiring corporation ending after the date of distribution or transfer (hereinafter called the "year of acquisition") shall be determined in the following manner. The year of acquisition shall be considered as though it were 2 taxable years. The first of such 2 taxable years shall be referred to in this paragraph as the preacquisition part year and shall begin with the beginning of the year of acquisition and end with the close of the date of distribution or transfer. The second of such 2 taxable years shall be referred to in this paragraph as the postacquisition part year and shall begin with the day following the date of distribution or transfer and shall end with the close of the year of acquisition.

(2) The excess limitation for the year of acquisition (*i.e.*, the excess of the limitation based on the amount of tax for such year over the amount of credit earned for such year) shall be divided between the preacquisition part year and the postacquisition part year in proportion to the number of days in each. Thus, if in a statutory merger to which section 361 applies Y Corporation, a calendar year taxpayer, acquires the assets of X Corporation on June 30, 1975, and Y Corporation has an excess limitation of $36,500 for its calendar year 1975, then the excess limitation for the preacquisition part year would be $18,100 ($36,500 × 181/365) and the excess limitation for the postacquisition part year would be $18,400 ($36,500 × 184/365).

(3) An unused credit of the acquiring corporation shall be carried to and applied against the excess limitation for the preacquisition part year and then carried to and applied against the excess limitation for the postacquisition part year, whereas an unused credit of the distributor or transferor corporation shall not be carried to the preacquisition part year but shall only be carried to and applied against the excess limitation for the postacquisition part year. For special rule relating to carryovers from taxable years ending before January 1, 1971, to taxable years beginning after December 31, 1970, see subparagraph (6) of this paragraph.

(4) Though considered as two separate taxable years for purposes of this paragraph, the preacquisition part year and the postacquisition part year are treated as one taxable year in determining the years to which an unused credit is carried under section 46(b)(1).

(5) The preceding subparagraphs may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1971, and each corporation files its return on the calendar year basis. On May 1, 1972, X transfers all its assets to Y in a statutory merger to which section 361 applies. X's credit earned and its limitation based on amount of tax for its taxable years 1971 and ending May 1, 1972, are as follows:

X Corporation's taxable year	Credit earned	Limitation based on amount of tax
1971	$11,000	$5,000
Ending 5–1–72	3,000	6,000

Y's credit earned and its limitation based on amount of tax for its taxable years 1971 and 1972 are as follows:

Y Corporation's taxable year	Credit earned	Limitation based on amount of tax
1971	$7,000	$3,000
1972	3,000	9,000

The sequence for the allowance of unused credits of X Corporation and Y Corporation, and the computation of carryovers to Y Corporation's calendar year 1973, may be illustrated as follows:

(i) **X Corporation's 1971 unused credit.** The carryover to Y 1973 is $0, computed as follows:

Unused credit	$6,000
Excess of X's 5–1–72 limitation based on tax over credit earned	3,000
Carryover to Y's postacquisition part year 1972	3,000
Excess limitation for Y's postacquisition part year ($6,000 × 244/366)	4,000
Carryover to Y's year 1973	0

(ii) **Y Corporation's 1971 unused credit.** The carryover to Y 1973 is $1,000, computed as follows:

Unused credit	$4,000
Excess limitation for Y's preacquisition part year ($6,000 × 122/366)	2,000
Carryover to Y's postacquisition part year	2,000
Excess limitation for Y's postacquisition part year ($6,000 × 244/366)	4,000
Less: X's $3,000 carryover from 1971	3,000
	1,000
Carryover to Y's year 1973	1,000

(iii) The aggregate of the investment credit carryovers to Y's year 1973 is $1,000, computed as follows:

X's 1971 unused credit	0
Y's 1971 unused credit	$1,000
Total	1,000

(6) If the year of acquisition is a taxable year beginning after December 31, 1970, and if there is an unused credit of the distributor or transferor corporation or of the acquiring corporation arising in an unused credit year ending before January 1, 1971, which may be carried to such year of acquisition (see paragraph (c)(4) of this section), then in applying subparagraphs (1), (2), and (3) of this paragraph, in lieu of dividing the excess limitation for the year of acquisition between the preacquisition and postacquisition part years, only the limitation based on the amount of tax for such year (*i.e.*, without reduction for the credit earned) shall be divided between the preacquisition and postacquisition part years. If there is also an unused credit arising in an unused credit year ending after December 31, 1970, which may be carried to the year of acquisition, then for the purpose of determining the amount of such unused credit which may be taken into account for such year of acquisition, the credit earned for the year of acquisition shall first be applied against the limitation based on amount of tax for the preacquisition part year (reduced by any investment credit carryovers to such part year from unused credit years ending before January 1, 1971) and the excess, if any, shall then be applied against the limitation based on amount of tax for the postacquisition part year (also reduced by any investment credit carryovers to such part year from unused credit years ending before January 1, 1971).

(7) Subparagraph (6) of this paragraph may be illustrated by the following example:

Example. X Corporation and Y Corporation were organized on January 1, 1970, and each corporation files its return on the calendar year basis. On May 1, 1972, X transfers all its assets to Y in a statutory merger to which section 361 applies. X's credit earned and its limitation based on amount of tax for its taxable years 1970, 1971, and ending May 1, 1972, are as follows:

X Corporation's taxable year.........	Credit earned	Limitation based on amount of tax
1970..................	$300	....
1971..................	100	....
Ending 5–1–72	200	....

Y's credit earned and its limitation based on amount of tax for its taxable years 1970 through 1972 are as follows:

Y Corporation's taxable year..	Credit earned	Limitation based on amount of tax
1970..........................	$100	....
1971..........................	200	
1972..........................	300	$900

The sequence for the allowance of unused credits of X Corporation and Y Corporation, and the computation of carryovers to Y Corporation's calendar year 1973, may be illustrated as follows:

(i) **X Corporation's 1970 unused credit.** The carryover to Y 1973 is $0, computed as follows:

Unused credit	$300
X Corporation's 1971 limitation based on tax	0
X Corporation's 5–1–72 limitation based on tax	0
Carryover to Y's postacquisition part year 1972.................................	300
Limitation based on tax for Y's postacquisition part year 1972 ($900 × 244/366)	600
Carryover to Y's year 1973	0

(ii) **Y Corporation's 1970 unused credit.** The carryover to Y 1973 is $0, computed as follows:

Unused credit	$100
Y Corporation's 1971 limitation based on tax	0
Carryover to Y's preacquisition part year 1972	100
Limitation based on tax for Y's preacquisition part year 1972 ($900 × 122/366)	300
Carryover to Y's postacquisition part year 1972	0

(iii) **Y Corporation's credit earned for 1972.** The carryover to Y 1973 is $0, computed as follows:

Credit earned............................	$300
Limitation based on tax for preacquisition part year 1972 ($900 × 122/366)............	300
Less: Y's $100 carryover from 1970	100
	$200
Carryover to Y's postacquisition part year 1972	100
Limitation based on tax for postacquisition part year 1972 ($900 × 244/366)	600
Less: X's $300 carryover from 1970	$300
	300
Carryover to Y's year in 1973	0

(iv) **X Corporation's 1971 unused credit.** The carryover to Y 1973 is $0, computed as follows:

Unused credit	$100
Excess of X's 1972 limitation based on tax over credit earned	0
Carryover to Y's postacquisition part year 1972	100
Limitation based on tax for postacquisition part year 1972 ($900 × 244/366)	600
Less:	
X's $300 carryover from 1970.............	300
Y's 1972 credit earned for postacquisition part year	100
	400
	200
Carryover to Y's year 1973	0

(v) **Y Corporation's 1971 unused credit.** The carryover to Y 1973 is $100, computed as follows:

Unused credit	$200
Limitation based on tax for preacquisition part year 1972 ($900 × 122/366)............	300
Less:	
Y's $100 carryover from 1970.............	100
Y's 1972 credit earned for preacquisition part year 1972	200
	300
	0
Carryover to Y's postacquisition part year	200
Limitation based on tax for postacquisition part year 1972 ($900 × 244/366)	600
Less:	
X's $300 carryover from 1970.............	300
Y's 1972 credit earned for postacquisition part year 1972	100
X's $100 carryover from 1971.............	100
	500
	100
Carryover to Y's year 1973	100

(vi) **X Corporation's 5–1–72 unused credit.** The carryover to Y 1973 is $200, computed as follows:

Unused credit	$200
Limitation based on tax for postacquisition part year 1972 ($900 × 244/366)	600
Less:	
X's $300 carryover from 1970...........	300
Y's 1972 credit earned for postacquisition part year 1972.......................	100
X's $100 carryover from 1971, and Y's $100 carryover from 1971	200
	600
	0
Carryover to Y's year 1973	200

(vii) The aggregate of the investment credit carryovers to Y 1973 is $300, computed as follows:

Y's 1971 unused credit	$100
X's 1972 unused credit	200
Total	300

(8) If the year of acquisition is a taxable year to which the limitation provided in § 1.46–2(b)(2) (relating to 20-percent limitation on carryovers and carrybacks to certain taxable years) applies, then for purposes of applying such limitation the preacquisition part year and the postacquisition part year shall each be considered a fractional part of a year, but, if the date of distribution or transfer is not on the last day of a month, the entire month in which the date of distribution or transfer occurs shall be considered as included in the preacquisition part year and no portion thereof shall be considered as included in the postacquisition part year.

(9) If the acquiring corporation succeeds to the investment credit carryovers of two or more distributor or transferor corporations on two or more dates of distribution or transfer during the same taxable year of the acquiring corporation, the manner in which the unused credits of the distributor or transferor corporations shall be applied shall be determined consistently with the rules prescribed in paragraph (c) of § 1.381(c)(1)–2.

(f) Successive acquiring corporations. An acquiring corporation which, in a distribution or transfer to which section 381(a) applies, acquires the assets of a distributor or transferor corporation which previously acquired the assets of another corporation in a transaction to which section 381(a) applies, shall succeed to and take into account, subject to the conditions and limitations of § 1.46–2 and this section, the investment credit carryovers available to the first acquiring corporation under § 1.46–2 and this section.

(g) Recomputation of credit allowed by section 38 on certain property of acquiring corporation.— If section 38 property acquired by an acquiring corporation in a transaction to which section 381(a) applies is disposed of, or otherwise ceases to be section 38 property (or becomes public utility property) with respect to the acquiring corporation, before the close of the estimated useful life which was taken into account in computing the distributor or transferor corporation's qualified investment, see paragraph (e) of § 1.47–3.

(h) Electing small business corporation. An unused credit of a distributor or transferor corporation arising in an unused credit year for which such corporation is not an electing small business corporation (as defined in section 1371(b)) may not be carried over in a transaction to which section 381 applies to a taxable year of the acquiring corporation for which such corporation is an electing small business corporation and may not be added to the amount allowable as a credit under section 38 to the shareholders of the acquiring corporation for such taxable year. However, in such a case, a taxable year for which the acquiring corporation is an electing small business corporation shall be counted as a taxable year for purposes of determining the taxable years to which such unused credit may be carried.

(i) [Reserved]

(j) Carryover of operating capacity for qualified intercity bus. For rules for determining an acquiring corporation's qualified investment for the energy credit for a qualified intercity bus, see § 1.48–9(q)(11).

[T.D. 7289, 38 FR 30554, Nov. 6, 1973; as amended by T.D. 7982, 49 FR 39544, Oct. 9, 1984; 49 FR 41246, Oct. 22, 1984]

§ 1.381(c)(24)–1 Work incentive program credit carryovers in certain corporate acquisitions.

The computation of carryovers and carrybacks of unused WIN credits in a transaction to which section 381 applies shall be made under the principles of § 1.381(c)(23)–1 (relating to the computation of carryovers and carrybacks of unused investment credits), except that the provisions of paragraph (c)(4) and paragraph (e)(6), (7), and (8) of such section shall not apply.

[T.D. 7289, 38 FR 30557, Nov. 6, 1973]

§ 1.381(c)(25)–1 Deficiency dividend of a qualified investment entity.

(a) Carryover requirement. If a distributor or transferor corporation in a transaction to which section 381(a) applies—

(1) Was a qualified investment entity (within the meaning of section 860(b)) for any taxable year ending on or before the date of distribution or transfer, and

(2) A determination (as defined in section 860(e)) establishes that the transferor or distributor corporation is liable for the tax imposed by section 11(a), 56(a), 852(b), 857(b)(1), 857(b)(3)(A), or 1201(a) for such taxable year, then in determining the liability for such tax the deduction described in section 860 shall be allowed pursuant to section 381(c)(25) to such corporation for the amount of deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation. Except as otherwise provided in this section, the provisions of section 860 and the regulations thereunder apply with

respect to a deficiency dividend deduction allowable pursuant to section 381(c)(25).

(b) Deficiency dividends paid by the acquiring corporation with respect to the distributor or transferor corporation. A deficiency dividend paid by the acquiring corporation with respect to the distributor or transferor corporation must be a distribution that would satisfy the definition of a deficiency dividend under section 860(f) if paid by the distributor or transferor corporation to its own shareholders. The distribution, however, shall be paid by the acquiring corporation to its own shareholders. The distribution also shall be paid after the date of distribution or transfer and on, or within 90 days after, the date of the determination but before the acquiring corporation files a claim under paragraph (c) of this section.

(c) Claim for deduction. A claim for deduction under this section shall be made by the acquiring corporation on Form 976 and shall be filed within 120 days after the date of the determination. The form shall contain, or be accompanied by, the information required under § 1.860–2(b)(2) in sufficient detail to properly identify the facts with respect to the distributor or transferor corporation and the acquiring corporation. The required certified copy of the resolution authorizing the payment of the dividend shall be that of the trustees, board of directors, or other authority, of the acquiring corporation. Necessary changes may be made in Form 976 in order to carry out the provisions of this paragraph. The claim shall be filed with the district director, or director of the internal revenue service center, with whom the return of the distributor or transferor corporation to which the claim relates was filed.

(d) Effect on dividends paid deduction. A deficiency dividend paid by the acquiring corporation that is allowable as a deduction to a distributor or transferor corporation pursuant to section 381(c)(25) shall not become a part of the dividends paid deduction of the acquiring corporation under section 561 for any taxable year.

(e) Successive transactions to which section 381(a) applies. The provisions of this section shall apply in the case of successive transactions to which section 381(a) applies. Thus, if X corporation transfers its assets to Y corporation in a transaction to which section 381(a) applies and if Y corporation transfers its assets to Z corporation in a subsequent transaction to which section 381(a) applies, then, subject to the provisions of this section, X corporation may take a deficiency dividend deduction for the amount of deficiency dividends paid by Z corporation with respect to X corporation.

[T.D. 7767, 46 FR 11264, Feb. 6, 1981, as amended by T.D. 7936, 49 FR 2106, Jan. 18, 1984]

§ 1.381(c)(26)–1 Credit for employment of certain new employees.

(a) Carryovers and carrybacks. For taxable years beginning before January 1, 1984, the computation of carryovers and carrybacks of unused targeted jobs credit (new jobs credit in the case of wages paid before 1979) under section 44B (as in effect prior to enactment of the Tax Reform Act of 1984) in a transaction to which section 381(a) applies shall be made under the principles of § 1.381(c)(23)–1 (relating to the computation of carryovers and carrybacks of unused investment credit), except that the provisions of paragraph (c)(4) and paragraph (e)(6), (7) and (8) of such section shall not apply.

(b) Other items. See § 1.51–1(h) for a rule that applies to certain transfers of a trade or business in which a member of a targeted group is employed.

[T.D. 7921, 48 FR 52903, Nov. 23, 1983; T.D. 8062, 50 FR 46003, Nov. 6, 1985]

§ 1.381(d)–1 Operations loss carryovers of life insurance companies.

For the application of part V, subchapter C, chapter 1 of the Code to operations loss carryovers of life insurance companies, see section 812(f) and § 1.812–7 and section 381(c)(22) and § 1.381(c)(22)–1.

[T.D. 6625, 27 FR 12543, Dec. 19, 1962]

§ 1.382–1T Limitation on net operating loss carryforwards and certain built-in losses following ownership change (temporary).

In order to facilitate use of § 1.382–2T, this section lists the paragraphs, subparagraphs, and subdivisions contained in § 1.382–2T.

(a) Ownership change.

(1) In general.

(2) Events requiring a determination of whether an ownership change has occurred.

(i) Testing date.

(ii) Information statement required.

(iii) Records to be maintained by loss corporation.

(h) Constructive ownership of stock.

(1) In general.

(2) Attribution from corporations, partnerships, estates and trusts.

(i) In general.

(ii) Limitation on attribution from entities with respect to certain interests.

(iii) Limitation on attribution from certain entities.

(iv) Examples.

(3) Attribution to corporations, partnerships, estates and trusts.

(4) Option attribution.

(i) In general.

(ii) Examples.

(iii) Contingencies.

(iv) Series of options.

(v) Interests that are similar to options.

(vi) Actual exercise of options.

(A) In general.

(B) Actual exercise within 120 days of deemed exercise.

(vii) Effect of deemed exercise of options on the outstanding stock of the loss corporation.

(A) Right of obligation to issue stock.

(B) Right or obligation to acquire outstanding stock by the loss corporation.

(C) Effect on value of old loss corporation.

(viii) Options that lapse or are forfeited.

(ix) Option rule inapplicable if pre-change losses are de minimis.

(x) Options not subject to attribution

(A) Long-held options with respect to actively traded stock.

(B) Right to receive or obligation to issue a fixed dollar amount of value of stock upon maturity of certain debt.

(C) Right or obligation to redeem stock of the loss corporation.

(D) Options exercisable only upon death, disability or mental incompetency.

(E) Right to receive or obligation to issue stock as interest or dividends.

(F) Options outstanding following an ownership change.

(1) In general.

(2) Example.

(G) Right to acquire loss corporation stock pursuant to a default under loan agreement.

(H) Agreement to acquire or sell stock owned by certain shareholders upon retirement.

(xi) Certain transfers of options disregarded.

(xii) Exercise of an option that has not been treated as stock.

(5) Stock transferred under certain agreements.

(6) Family attribution.

(i) [Reserved]

(j) Aggregation and segregation rules.

(1) Aggregation of public shareholders and public owners into public groups.

(i) Public group.

(ii) Treatment of public group that is a 5-percent shareholder.

(iii) Presumption of no cross-ownership.

(iv) Identification of the public groups treated as 5-percent shareholders.

(A) Analysis of highest tier entities.

(B) Analysis of other higher tier entities and first tier entities.

(C) Aggregation of the public shareholders.

(v) Appropriate adjustments.

(vi) Examples.

(2) Segregation rules applicable to transactions involving the loss corporation.

(i) In general.

(ii) Direct public group.

(iii) Transactions to which segregation rules apply.

(A) In general.

(B) Certain equity structure shifts and transactions to which section 1032 applies.

(1) In general.

(2) Examples.

(C) Redemption-type transactions.

(1) In general.

(2) Examples.

(D) Acquisition of loss corporation stock as the result of the ownership of a right to acquire stock.

(1) In general.

(2) Example.

(E) Transactions identified in the Internal Revenue Bulletin.

(F) Issuance of rights to acquire loss corporation stock.

(1) In general.

(2) Example.

(iv) Combination of de minimis public groups.

(A) In general.

(B) Example.

(v) Multiple transactions.

(A) In general.

(B) Example.

(vi) Acquisitions made by either a 5-percent shareholder or the loss corporation following application of the segregation rules.

(3) Segregation rules applicable to transactions involving first tier entities or higher tier entities.

(i) Dispositions.

(ii) Example.

(iii) Other transactions affecting direct public groups of a first tier entity or higher tier entity.

(iv) Examples.

(v) Acquisitions made by a 5-percent shareholder, a higher tier entity, or a first tier entity following application of the segregation rules.

(k) Operating rules.

(1) Presumptions regarding stock ownership.

(i) Stock subject to regulation by the Securities and Exchange Commission.

(ii) Statements under penalties of perjury.

(2) Actual knowledge regarding stock ownership.

(3) Duty to inquire as to actual stock ownership in the loss corporation.

(4) Ownership interests structured to avoid the section 382 limitation.

(5) Example.

(6) First tier entity or higher tier entity that is a foreign corporation or entity. [Reserved.]

(*l*) Changes in percentage ownership which are attributable to fluctuations in value. [Reserved]

(m) Effective date.

(1) In general.

(2) Plan of reorganization.

(3) Earliest commencement of the testing period.

(4) Transitional rules.

(i) Rules provided in paragraph (j) of this section for testing dates before September 4, 1987.

(ii) Example.

(iii) Rules provided in paragraph (j) of this section for testing dates on or after September 4, 1987.

(iv) Rules provided in paragraphs (f)(18) (ii) and (iii) of this section.

(v) Rules provided in paragraph (a)(2)(ii) of this section.

(5) Bankruptcy proceedings.

(i) In general.

(ii) Example.

(6) Transactions of domestic building and loan associations.

(7) Transactions not subject to section 382.

(i) Application of old section 382.

(ii) Effect on testing period.

(iii) Termination of old section 382. [Reserved]

(8) Options issued or transferred before January 1, 1987.

(i) Options issued before May 6, 1986.

(ii) Options issued on or after May 6, 1986 and before September 18, 1986.

(iii) Options issued on or after September 18, 1986 and before January 1, 1987.

(9) Examples.

[T.D. 8149, 52 FR 29674, Aug. 11, 1987]

§ 1.382–2 Election of application of sections 382 and 383, as amended by the Tax Reform Act of 1976.

(a) In general. (1) An election may be made under this section to have sections 382(a) and 383 (as it relates to section 382(a)), as amended by the Tax Reform Act of 1976, apply with respect to transactions specified in section 382(a), as so amended, occurring—

(i) During the first taxable year beginning after June 30, 1978, of the loss corporation; and

(ii) Pursuant to a written binding contract or option entered into before September 27, 1978.

(2) An election may be made under this section to have sections 382(b) and 383 (as it relates to section 382(b)), as amended by the Tax Reform Act of 1976, apply with respect to any reorganization specified in section 382(b), as so amended, occurring—

(i) Pursuant to a plan adopted on or after January 1, 1978, and before the end of the first taxable year beginning after June 30, 1978, of either the acquired or the acquiring corporation, whichever ends later; and

(ii) Pursuant to a written binding contract or option entered into before September 27, 1978.

(b) Taxpayer making election. (1) The election described in paragraph (a)(1) of this section shall be made by the loss corporation.

(2) In the case of a reorganization described in section 368(a)(1)(B), the election described in paragraph (a)(2) of this section shall be made by the loss corporation. In the case of all other reorganizations specified in section 382(b), as amended, the election shall be made by the acquiring corporation, as defined in § 1.381(a)–1(b)(2).

(3) For rules in the case where the loss corporation becomes a member of an affiliated group of corporations which files a consolidated return, see paragraph (d) of this section.

(c) Time and manner of making. (1)(i) Except as provided in paragraph (c)(2) of this section, the taxpayer shall make the election described in paragraph (a) of this section by making a written statement on its income tax return for the taxable year in which the transaction(s) or reorganization occurs. For the election to be valid, this return must be filed no later than the time prescribed by law (including extensions) for filing the return (hereafter "timely filed"). If the taxpayer takes a net operating loss deduction on this return, the statement shall be made on the schedule showing the computation of this deduction. Otherwise, the statement shall be made on a separate sheet of paper physically attached to the return. The statement shall briefly describe the transaction(s) or reorganization involved, and indicate that the taxpayer elects to have section 382(a) or (b) and section 383, as amended by the Tax Reform Act of 1976, apply with respect to such transaction(s) or reorganization.

(ii) If the taxpayer's return for the taxable year in which the transaction(s) or reorganization occurs is timely filed on or before November 26, 1979, and the election described in paragraph (a) of this section is made with that return, the election will be valid regardless of whether the election is made in the manner provided in paragraph (c)(1)(i) of this section.

(2) If the taxpayer's return for the taxable year in which the transaction(s) or reorganization occurs was due before February 6, 1979, and the taxpayer made the election described in paragraph (a) of this section before February 6, 1979, the election is valid regardless of whether the election was made with the taxpayer's timely-filed return for that year.

(d) Consolidated returns. If the loss corporation becomes a member of an affiliated group of corporations which files a consolidated return for the taxable year in which the transaction(s) or reorganization occurs, the election described in paragraph (a) of this section may be made by the common parent. If this paragraph (d) applies, the election shall be made as provided in paragraph (c) of this section, treating the common parent as the taxpayer and the consolidated return for the taxable year in which the transaction(s) or reorganization occurs as the relevant income tax return.

(e) Effect of election. (1) Generally, a person who acquires more than one loss corporation during the period in which the effective dates of the amendments to sections 382 and 383, made by the Tax Reform Act of 1976, would be postponed by section 368(a) of the Revenue Act of 1978 may not choose to have the 1976 Act amendments apply with respect to some but not all of these acquisitions. Accordingly, if an election is made under paragraph (a) of this section, sections 382 and 383, as amended, shall apply with respect to all such

acquisitions made by that person during this period.

(2) For purposes of this paragraph, an acquisition means either of the following:

(i) An increase in ownership of the total fair market value of the outstanding stock of the loss corporation of 50 percentage points or more, during the period described in section 381(a), as amended, attributable to transactions described in that section. For purposes of this subdivision, "stock" means all shares except nonvoting stock which is limited and preferred as to dividends. In addition, as under section 382(a), a person's increase in stock ownership in the loss corporation shall be taken into account under this subdivision only to the extent the increase is reflected in that person's stock ownership on the last day of the corporation's taxable year.

(ii) A reorganization specified in section 382(b), as amended, in which the person, directly or indirectly, is the acquiring corporation.

[T.D. 7650, 44 FR 61593, Oct. 26, 1979]

§ 1.382–2T Definition of ownership change under section 382, as amended by the Tax Reform Act of 1986 (temporary).

(a) Ownership change—(1) In general. A corporation is a new loss corporation and thus subject to limitation under section 382 only if an ownership change has occurred with respect to such corporation. An ownership change occurs with respect to a corporation if it is a loss corporation on a testing date and, immediately after the close of the testing date, the percentage of stock of the corporation owned by one or more 5-percent shareholders has increased by more than 50 percentage points over the lowest percentage of stock of such corporation owned by such shareholders at any time during the testing period. See paragraph (a)(2)(i) of this section for the definition of testing date. See paragraph (d) of this section for the definition of testing period. See paragraphs (f) (1) and (3) of this section for the respective definition of loss corporation and new loss corporation. See paragraph (g) of this section for the definition of 5-percent shareholder.

(2) Events requiring a determination of whether an ownership change has occurred—(i) Testing date. Except as otherwise provided in this paragraph (a)(2)(i), a loss corporation is required to determine whether an ownership change has occurred immediately after any owner shift, any equity structure shift, or any transaction in which an option with respect to stock of the loss corporation is—

(A) Transferred to (or by) a 5-percent shareholder (or a person who would be 5-percent shareholder if the option were treated as exercised), or

(B) Issued by the loss corporation, a first tier entity, or a higher tier entity that owns five percent or more of the loss corporation (determined without regard to the application of paragraph (h)(2)(i)(A) of this section). Notwithstanding the preceding sentence, any transfer of stock of the loss corporation (or an option with respect to such stock) in any of the circumstances described in section 382(l)(3)(B), or any equity structure shift that is not also an owner shift, is not an event that requires the loss corporation to make a determination of whether an ownership change has occurred. For purposes of this section, each date on which a loss corporation is required to make a determination of whether an ownership change has occurred is referred to as a testing date, all computations of increases in percentage ownership are to be made as of the close of the testing date, and any transactions described in this paragraph (a)(2)(i) that occur on that date are treated as occurring simultaneously at the close of the testing date. See paragraphs (e) (1) and (2) of this section for the respective definitions of owner shift and equity structure shift. See paragraphs (f) (9) and (14) of this section for the respective definitions of first tier entity and higher tier entity.

(ii) Information statement required. A loss corporation must file a statement with its income tax return for each taxable year that it is a loss corporation. The statement must—

(A) Indicate whether any testing dates occurred during the taxable year;

(B) Identify each testing date, if any, on which an ownership change occurred;

(C) Identify the testing date, if any, that occurred during and closest to the end of each of the three month periods ending on March 31, June 30, September 30 and December 31 during the taxable year, regardless of whether an ownership change occurred on the testing date,

(D) Identify each 5-percent shareholder on each such testing date;

(E) State the percentage ownership of the stock of the loss corporation for each 5-percent shareholder as of each such testing date and the increase, if any, in such ownership during the testing period; and

(F) Disclose the extent to which the loss corporation relied upon the presumptions regarding stock ownership under paragraph (k)(i) of this section to determine whether an ownership change occurred on any identified testing date.

(iii) Records to be maintained by loss corporation. A loss corporation shall keep such records as are necessary to determine: (A) The identity of its 5-percent shareholders, (B) the percentage of its stock owned by each such 5-percent shareholder, and (C) whether the section 382 limitation is applicable. Such records shall be retained so long as they may be material in the administration of any internal revenue law.

(b) Nomenclature and assumptions. For purposes of the example in this section—

(1) L is a loss corporation, and, if there is more than one loss corporation, they are designated as L_1, L_2, L_3, etc.

(2) P is a corporation that is not a loss corporation, and, if there is more than one such corporation, they are designated as P_1, P_2, P_3, etc.

(3) HC is a corporation whose assets consist solely of the stock of other corporations.

(4) E is an entity other than a corporation (e.g., a partnership), and, if there is more than one such entity, they are designated as E_1, E_2, E_3, etc.

(5) Unless otherwise stated—

(i) A, B, C, D, AA, BB, CC, and DD are unrelated individuals who own interests in corporations or other entities only to the extent expressly stated,

(ii) All corporations have one class of stock outstanding and each share of stock has the same fair market value as each other share,

(iii) The capital structure of the loss corporation and its business do not change over time, and

(iv) The rules of paragraphs (k) (2) and (4) of this section are not applicable.

(6) Public L represents a group of unrelated individuals and entities that own direct (and not indirect) stock ownership interests in loss corporation L, each of whom owns less than five percent of the stock of the loss corporation, and, if there is more than one loss corporation, such groups are designated as Public L_1, Public L_2, Public L_3, etc.

(7) Public P represents a group of unrelated individuals and entities that own direct (and not indirect) stock ownership interests in corporation P, each of whom owns less than five percent of the stock of the corporation, and, if there is more than one corporation, such groups are designated as Public P_1, P_2, P_3, etc.

(8) Public E represents a group of unrelated individuals and entities that own direct (and not indirect) ownership interests in entity E, each of whom owns less than five percent of the entity, and, if there is more than one entity, such groups are designated as Public E_1, Public E_2, Public E_3, etc.

(c) Computing the amount of increases in percentage ownership—(1) In general. In order to determine whether an ownership change has occurred on a testing date, the loss corporation must identify each 5-percent shareholder whose percentage of stock ownership in the loss corporation immediately after the close of the testing date has increased, compared to such shareholder's lowest percentage of stock ownership in such corporation at any time during the testing period. The amount of the increase in the percentage of stock ownership in the loss corporation of each 5-percent shareholder must be computed separately by comparing the percentage ownership of each such 5-percent shareholder immediately after the close of the testing date to such shareholder's lowest percentage ownership at any time during the testing period. Each such increase in the percentage ownership of a 5-percent shareholder is then added together with any other such increases of other 5-percent shareholders to determine whether an ownership change has occurred. Because only those 5-percent shareholders whose percentages of stock ownership have increased are taken into account, a 5-percent shareholder is disregarded if his percentage of stock ownership, immediately after the close of the testing date, has decreased (or has remained the same), compared to his lowest percentage ownership interest on any previous date during the testing period.

(2) Example.

(i) A and B each own 40 percent of the outstanding L stock. The remaining 20 percent of the L stock is owned by 100 unrelated individuals, none of whom own as much as five percent of L stock ("Public L"). C negotiates with A and B to purchase all their stock in L.

(ii) The acquisitions from both A and B are completed on September 13, 1990. C's acquisition of 80 percent of L stock results in an ownership change because C's percentage ownership has increased by 80 percentage points as of the testing date, compared to his lowest percentage ownership in L at any time during the testing period (0 percent).

(3) Related and unrelated increases in percentage stock ownership. The determination whether an ownership change has occurred is made with-

out regard to whether the changes in stock ownership of the loss corporation (by one or more 5-percent shareholders) result from related or unrelated events.

(4) Example.

(i) L has outstanding 200 shares of common stock. A, B and C respectively own 100, 50 and 50 shares of the L stock. On January 2, 1988, A sells 60 shares of L stock to B. Thus, B's percentage ownership interest in L increases by 30 percentage points, from 50 shares to 110 shares. On January 1, 1989, A purchases C's entire interest in L. Thus, A's percentage ownership interest in L increases by 25 percentage points, compared to his lowest percentage ownership interest in L, from 40 shares immediately following the January 2, 1988 sale to B to 90 shares. Even though A's ownership interest in L as of January 1, 1989 has decreased, compared to his 50 percent ownership interest at the beginning of the testing period, A is a 5-percent shareholder who must be taken into account for purposes of the computation required under paragraph (c)(1) of this section because his interest in L on that testing date (45 percent) has increased, compared to his lowest percentage ownership interest in L at any time during the testing period (20 percent following the sale to B).

(ii) Accordingly, although A and B jointly have increased their aggregate total ownership interest in L between January 2, 1988 and January 1, 1989 by only 25 percentage points (i.e., the total ownership interest in L held by A and B at all times is not less than a 75 percent interest), the total of their separate increases in the percentage stock ownership of L, compared to their respective lowest percentage ownership interests at any time during the testing period, is 55 percentage points. Thus, an ownership change occurs as a result of A's acquisition of L stock on January 1, 1989.

(d) Testing period—(1) In general. Except as otherwise provided in paragraphs (d) and (m) of this section, the testing period for any testing date is the three-year period ending on the testing date. See paragraph (a)(2)(i) of this section for the definition of testing date.

(2) Effect of a prior ownership change. Following an ownership change, the testing period for determining whether a subsequent ownership change has occurred shall begin no earlier than the first day following the change date of the most recent ownership change. See paragraph (f)(19) of this section for the definition of change date.

(3) Commencement of the testing period—(i) In general. Except as otherwise provided in paragraph (d)(3)(ii) of this section, the testing period for any loss corporation shall not begin before the earlier of the first day of either—

(A) The first taxable year from which there is a loss or excess credit carryforward to the first taxable year ending after the testing date, or

(B) The taxable year in which the testing date occurs.

(ii) Exception for corporations with net unrealized built-in loss. Paragraph (d)(3)(i) of this section shall not apply if the corporation has a net unrealized built-in loss (determined after application of section 382(h)(3)(B)) on the testing date, unless the loss corporation establishes the taxable year in which the net unrealized built-in loss first accrued.

In that event, the testing period shall not begin before the earlier of—

(A) The first day of the taxable year in which the net unrealized built-in loss first accrued, or

(B) The day described in paragraph (d)(3)(i) of this section. See section 382(h) for the definition of net unrealized built-in loss.

(4) Disregarding testing dates. Any testing date that occurs before the beginning of the testing period shall be disregarded for purposes of this section.

(5) Example.

(i) A owns all 100 outstanding shares of L stock. A sells 40 shares to B on January 1, 1988. C purchases 20 shares of L stock from A on July 1, 1991. In determining if an ownership change occurs on the July 1, 1991 testing date, B's acquisition of L stock is disregarded because it occurred before the testing period that ends on such testing date. Thus, B's ownership interest in L does not increase during the testing period, and no ownership change results from C's acquisition.

(ii) The facts are the same as in (i), except that throughout the period during which B negotiated his stock purchase transaction with A, B knew that C intended to attempt to acquire a significant stock interest in L. Also, B and C have been partners in a number of significant business ventures. The result is the same as in (i).

(e) Owner shift and equity structure shift—(1) Owner shift.— (i) Defined. For purposes of this section, an owner shift is any change in the ownership of the stock of a loss corporation that affects the percentage of such stock owned by any 5-percent shareholder. See paragraph (g) of this section for the definition of a 5-percent shareholder. An owner shift includes, but is not limited to, the following transactions:

(A) A purchase of disposition of loss corporation stock by a 5-percent shareholder,

(B) A section 351 exchange that affects the percentage of stock owned by a 5-percent shareholder,

(C) A redemption or a recapitalization that affects the percentage of stock owned by a 5-percent shareholder,

(D) An issuance of loss corporation stock that affects the percentage of stock owned by a 5-percent shareholder, and

(E) An equity structure shift that affects the percentage of stock owned by a 5-percent shareholder.

(ii) Transactions between persons who are not 5-percent shareholders disregarded. Transfers of loss corporation stock between persons who are not 5-percent shareholders of such corporation (and between members of separate public groups resulting from the application of the segregation rules of paragraphs (j)(2) and (3)(iii) of this section) are not owner shifts and thus are not taken into account. See paragraph (h)(4)(xi) of this section for a similar rule applicable to transfers of options.

(iii) Examples.

Example (1). A has owned all 1000 shares of outstanding L stock for more than three years. On June 15, 1988, A sells 300 of his L shares to B. This transaction is an owner shift. No other 5-percent shareholder has increased his percentage ownership of L stock during the testing period. Thus, the owner shift resulting from B's acquisition does not result in an ownership change, because B has increased his stock ownership in L by only 30 percentage points.

Example (2). The facts are the same as in Example (1). In addition, on June 15, 1989, L issues 100 shares to each of C, D and AA. The stock issuance is an owner shift. The transaction, however, does not result in an ownership change, because B, C, D and AA (the 5-percent shareholders whose stock ownership has increased as of the testing date, compared to any other time during the testing period) have increased their percentage of stock ownership in L by a total of only 46.2 percentage points during the testing period (by 23.1 percentage points [300 shares/1300 shares] for B, and 7.7 percentage points [100 shares/1300 shares] for each of C, D and AA].

Example (3). All 1000 shares of L stock are owned by a group of 100 unrelated individuals, none of whom own as much as five percent of L stock ("Public L"). Several of the members of Public L sell their L stock, amounting to a 30 percent ownership interest in L, to B on June 15, 1988. The sale of stock to B is an owner shift. Between June 16, 1988 and June 15, 1989, each of the remaining individuals in Public L sells his stock to another person who is not a 5-percent shareholder. Under paragraph (e)(1)(ii) of this section, trading activity among the members of Public L is disregarded and does not result in an owner shift. On June 15, 1989, L issues 100 shares to each of C, D and AA. The only sale transactions by members of Public L that are taken into account in determining whether an ownership change occurs on June 15, 1989 are the sales to B on June 15, 1988. Because B, C, D and AA together have increased their percentage ownership of L stock as a result of B's purchase and the stock issuance by an amount not in excess of 50 percentage points during the testing period ending on June 15, 1988, an ownership change does not occur on that date.

Example (4). The facts are the same as in Example (2). In addition, on December 15, 1989, L redeems 200 of the L shares from A. The redemption is an owner shift that results in an ownership change, because B, C, D and AA are 5-percent shareholders whose percentage ownership of L increase by a total of 54.6 percentage points during the testing period (by 27.3 percentage points [300 shares/1100 shares] for B and 9.1 percentage points [100 shares/1100 shares] for each of C, D and AA).

Example (5). L is owned entirely by 10,000 unrelated shareholders, none of whom owns as much as five percent of the stock of L ("Public L"). Accordingly, Public L is L's only 5-percent shareholder. See paragraph (j)(1) of this section. There are one million shares of common stock outstanding. On December 1, 1988, L issues two million new shares of its common stock to members of the public, none of whom owned any L stock prior to the issuance. Following the public offering, no shareholder of L owns, directly or indirectly, five percent or more of L stock. Under paragraph (j)(2) of this section, however, all of the newly issued stock is treated as acquired by a 5-percent shareholder ("Public NL") that is unrelated to Public L. Therefore, the public offering constitutes an owner shift that results in an ownership change because Public NL's percentage of stock ownership in L increased by 66⅔ percentage po.nts (two million shares acquired in the public offering/three million shares outstanding following the offering) over its lowest percentage ownership during the testing period (0 percent prior to the offering).

Example (6). The facts are the same as in Example (5), except that L issues only 500,000 new shares of L stock on December 1, 1988, and Public NL's percentage ownership interest in L increases by only 33⅓ percentage points (500,000 shares acquired in the public offering/1.5 million shares outstanding following the offering). During the two years following December 2, 1988, 14 percent of the stock outstanding on that date is sold over a public stock exchange. On December 3, 1990, A purchases five percent of L stock (75,000 shares) over a public stock exchange. The purchase of five percent of L stock by A is an owner shift and is presumed to have been made proportionately from Public L and Public NL under paragraph (j)(1)(vi) of this section. Under paragraph (e)(1)(ii) of this section, transfers of L stock in transactions not involving A (i.e., in transactions among or between members of separate public groups resulting from the application of paragraphs (j)(2) and (3) of this section) are not taken into account, and do not constitute owner shifts. (Transfers between members of Public NL and Public L, which are treated as separate 5-percent shareholders solely by virtue of paragraph (j)(2) of this section, are disregarded even if L has actual knowledge of any such transfers.) A and Public NL, the only 5-percent shareholders whose interests in L have increased during the testing period, have increased there respective stock ownership by only 36⅔ percentage points—five percentage points for A [75,000 shares/1.5 million shares outstanding] and 31⅔ percentage points for Public NL [((500,000 shares issued in the public offering)—(5 percent × 500,000 shares presumed to have been acquired by A)) /1.5 million shares outstanding]. Accordingly, there is no ownership change with respect to L notwithstanding that, taking into account the public trading, a change of more than 50 percentage points in the ultimate beneficial ownership of L stock occurred during the three-year period ending on the December 3, 1990 testing date.

Example 7. The facts are the same as in Example 6, except that five percent of the L stock has always been owned by P which, in turn, has always been owned by Public P. On December 6, 1990, P sells all of its L stock over a public stock exchange. Although the trading of P stock among persons that are not 5-percent share-holders (without regard to the segregation rules of paragraph (j) of this section) are disregarded under paragraph (e)(1)(ii) of this section, the disposition of the L stock by P is not disregarded because the L stock is transferred in a transaction that is subject to paragraph (j)(3)(i) of this section.

(2) Equity structure shift—(i) Tax-free reorganizations. An equity structure shift is any reorganization within the meaning of section 368 with

respect to which the loss corporation is a party to the reorganization, except that such term does not include a reorganization described in—

(A) Section 368(a)(1) (D) or (G) unless the requirements of section 354(b)(1) are met, or

(B) Section 368(a)(1)(F).

(ii) Transactions designated under section 382(g)(3)(B) treated as equity structure shifts. [Reserved]

(iii) Overlap of owner shift and equity structure shift. Any equity structure shift that affects the percentage of loss corporation stock owned by a 5-percent shareholder also constitutes an owner shift. See paragraph (e)(i)(E) of this section

(iv) Examples.

Example (1). A owns all of the stock of L and B owns all of the stock of P. On October 13, 1988, L merges into P in a reorganization described in section 368a(1)(A). As a result of the merger, A and B own 25 and 75 percent, respectively, of the stock of P. The merger is an equity structure shift (and, because it affects the percentage of L stock owned by 5-percent shareholders, it also constitutes an owner shift). On the October 13, 1988 testing date, B is a 5-percent shareholder whose stock ownership in the loss corporation following the merger has increased by 75 percentage points over his lowest percentage of stock ownership in L at any time during the testing period (0 percent prior to the merger). Accordingly, an ownership change occurs as a result of the merger. P is thus a new loss corporation and L's pre-change losses are subject to limitation under section 382. See paragraph (f)(1)(iii) of this section requiring P to account separately for L's pre-change losses.

Example (2). (i) A owns 100 percent of L_1 stock and B owns 100 percent of L_2 stock. On January 1, 1988, L_1 merges into L_2 in a reorganization described in section 368(a)(1)(A). Immediately after the merger, A and B own 40 percent and 60 percent, respectively, of the L_2 stock. There is an equity structure shift (as well as an owner shift) with respect to both L_1 and L_2 on January 1, 1988.

(ii) Because the percentage of L_2 stock owned by B immediately after the merger (60 percent) increases by more than 50 percentage points over the lowest percentage of the stock of L_1 owned by B during the testing period (0 percent prior to the merger), there is an ownership change with respect to L_1 . L_2 is a new loss corporation and thus, under paragraph (f)(1))(iii) of this section, the pre-change losses of L_1 must be accounted for separately by L_2 from the losses of L_2 (immediately before the ownership change) and are subject to limitation under section 382.

(iii) L_2 is a new loss corporation because it is a successor corporation to L_1. There is no ownership change with respect to L_2, however, because A's stock ownership in L_2 increased by only 40 percentage points (to 40 percent) over the amount owned by A prior to the merger (0 percent). Therefore, the pre-change losses of L_2 are not limited under section 382 as a result of the merger, but must be separately accounted for under paragraph (f)(1)(iii) of this section.

Example (3). The result in Example (2) would be the same if L_1 had survived the merger (i.e., L_2 merged into L_1) with A and B owning 40 and 60 percent, respectively, of L_1 stock. L_1's pre-change losses would be accounted for separately and limited under section 382 and the pre-change losses of $_2$ would be accounted for separately under paragraph (f)(1)(iii) of this section, but would not be limited under section 382. See paragraph (f)(1)(ii) for the treatment of $_2$ following the transaction.

Example (4). The facts are the same as Example (2), except, instead of acquiring^1 in a merger,^{2} acquires all of the^1 stock from A on January 1, 1988, solely in exchange for stock representing a 40 percent interest in^2 , in a reorganization described in section 368(a)(1)(B). The acquisition of stock by^2 is an equity structure shift (as well as an owner shift) with respect to^1 that results in an ownership change with respect to^1 because the percentage of^1 stock owned by B immediately after the reorganization (60 percent, by virtue of B's ownership of^2, through the operation of the constructive ownership rules of paragraph (h) of this section) increases by more than 50 percentage points over the lowest percentage of^1 stock owned by B at any time during the testing period (0 percent prior to the reorganization). The acquisition also results in an equity structure shift and an owner shift with respect to^2, but^2 incurs no ownership change, because A's stock ownership in^2 increased by only 40 percentage points over the percentage of^2 stock owned by A prior to the reorganization (0 percent).

(f) Definitions. For purposes of this section—

(1) Loss corporation—(i) In general. The term "loss corporation" means a corporation entitled to use a net operating loss carryforward or having a net operating loss for the taxable year in which an owner shift, equity structure shift or other transaction described in paragraph (a)(2)(i) of this section occurs (determined for purposes of this paragraph (f)(1) without regard to whether the corporation is a loss corporation). The term loss corporation also includes any corporation with a net unrealized built-in loss (determined for purposes of this paragraph (f)(1) by treating the date on which such determination is made as the change date). See section 382(h)(3) for the definition of net unrealized built-in loss. Any predecessor or successor to a loss corporation described in this paragraph (f)(1) also is a loss corporation.

(ii) Distributor or transferor loss corporation in a transaction under section 381. Notwithstanding that a loss corporation ceases to exist under state law, if its net operating loss carryforwards (or other items described in section 381(c)) are succeeded to and taken into account by an acquiring corporation in a transaction described in section 381(a), such loss corporation shall be treated as continuing in existence until—

(A) Any pre-change losses (determined as if the date of such transaction were the change date) are fully absorbed or expire under section 172, and

(B) Any net unrealized built-in losses (determined as if the date of such transaction were the change date) may no longer be treated as pre-change losses.

Following a transaction described in the preceding sentence, the stock of the acquiring corporation shall be treated as the stock of the loss corporation for purposes of determining whether an ownership change occurs with respect to the pre-change losses and net unrealized built-in losses that may be treated as pre-change losses of the distributor or transferor corporation.

(iii) Separate accounting required for losses of an acquiring corporation and a distributor or transferor loss corporation. Pre-change losses (determined as if the testing date were the change date and treating the amount of any net unrealized built-in loss as a pre-change loss) that are succeeded to and taken into account by an acquiring corporation in a transaction to which section 381(a) applies must be accounted for separately from losses of the acquiring corporation for purposes of applying this section. See Example (2) of paragraph (e)(2)(iv) of this section.

(2) Old loss corporation. The term "old loss corporation" means any corporation with respect to which there is an ownership change and that was a loss corporation immediately before the ownership change.

(3) New loss corporation. The term "new loss corporation" means a corporation with respect to which there is an ownership change if, immediately after such change, it is a loss corporation. A successor corporation to the corporation described in the preceding sentence also is a new loss corporation.

(4) Successor corporation. A successor corporation is a distributee or transferee corporation that succeeds to and takes into account items described in section 381(c) from a loss corporation as the result of an acquisition of assets described in section 381(a).

(5) Predecessor corporation. A predecessor corporation is a distributor or transferor corporation that distributes or transfers its assets to an acquiring corporation in a transaction described in section 381(a).

(6) Shift. As the context may require, a shift means an equity structure shift, an owner shift or both.

(7) Entity. An entity is any corporation, estate, trust, association, company, partnership, or similar organization.

(8) Direct ownership interest. A direct ownership interest means the interest a person owns in an entity, including a loss corporation, without regard to the constructive ownership rules of paragraph (h) of this section.

(9) First tier entity. A first tier entity is an entity that, at any time during the testing period, owns a five percent or more direct ownership interest in the loss corporation.

(10) 5-percent owner. A 5-percent owner is any individual that, at any time during the testing period, owns a five percent or more direct ownership interest in a first tier entity or a higher tier entity. See paragraph (g) of this section for rules to determine whether, as a result of the constructive ownership rules of paragraph (h) of this section, a 5-percent owner is a 5-percent shareholder.

(11) Public shareholder. A public shareholder is any individual, entity, or other person with a direct ownership interest in a loss corporation of less than five percent at all times during the testing period.

(12) Public owner. A public owner is any individual, entity, or other person that, at all times during the testing period, owns less than a five percent direct ownership interest in a first tier entity or any higher tier entity.

(13) Public group. A public group is a group of individuals, entities, or other persons each of whom owns, directly or constructively, less than five percent of the loss corporation. See paragraphs (g) and (j) of this section for the rules applicable to identify public groups and to determine whether a public group is a 5-percent shareholder.

(14) Higher tier entity. A higher tier entity is any entity that, at any time during the testing period, owns a five percent or more direct ownership interest in a first tier entity or in any higher tier entity.

(15) Indirect ownership interest. An indirect ownership is an interest a person owns in an entity determined solely as a result of the application of the constructive ownership rules of paragraph (h) of this section and without regard to any direct ownership interest (or other beneficial ownership interest) in the entity.

(16) Highest tier entity. A highest tier entity is a first tier entity or a higher tier entity that is not owned, in whole or in part, at any time during the testing period by a higher tier entity.

(17) Next lower tier entity. The next lower tier entity with respect to a first tier entity is the loss corporation. The next lower tier entity with respect to a higher tier entity is any first tier entity

or other higher tier entity in which the higher tier entity owns, at any time during the testing period, a five percent or more direct ownership interest.

(18) Stock—(i) In general. Except as provided in this paragraph (f)(18), the term "stock" means stock other than stock described in section 1504(a)(4). Notwithstanding the preceding sentence, stock that is not described in section 1504(a)(4) solely because it is entitled to vote as a result of dividend arrearages shall be treated as so described and thus shall not be considered stock. Stock described in section 1504(a)(4), however, is not excluded for purposes of determining the value of the loss corporation under section 382(e). The determination of the percentage of stock of any corporation owned by any person shall be made on the basis of the relative fair market value of the stock owned by such person to the total fair market value of the outstanding stock of the corporation.

(ii) Treating stock as not stock. Any ownership interest that otherwise would be treated as stock under paragraph (f)(18)(i) of this section shall not be treated as stock if—

(A) As of the time of its issuance or transfer to (or by) a 5-percent shareholder, the likely participation of such interest in future corporate growth is disproportionately small when compared to the value of such stock as a proportion of the total value of the outstanding stock of the corporation,

(B) Treating the interest as not constituting stock would result in an ownership change, and

(C) The amount of the pre-change loss (determined as if the testing date were the change and treating the amount of any net unrealized built-in loss as a pre-change loss) is more than twice the amount determined by multiplying (1) the value of the loss corporation (as determined under section 382(e)) on the testing date, by (2) the long-term tax exempt rate (as defined in section 382(f)) for the calendar month in which the testing date occurs. Stock that is not treated as stock under this paragraph (f)(18)(ii), however, is taken into account for purposes of determining the value of the loss corporation under section 382(e).

(iii) Treating interests not constituting stock as stock. Any ownership interest that would not be treated as stock under paragraph (f)(18)(i) of this section (other than an option that is subject to paragraph (h)(4) of this section) shall be treated as constituting stock if—

(A) As of the time of its issuance or transfer to (or by) a 5-percent shareholder (or a person who would be a 5-percent shareholder if the interest not constituting stock were treated as stock), such interest offers a potential significant participation in the growth of the corporation,

(B) Treating the interest as constituting stock would result in an ownership change, and

(C) The amount of the pre-change losses (determined as if the testing date were the change date and treating the amount of any net unrealized built-in loss as a pre-change loss) is more than twice the amount determined by multiplying

(1) The value of the loss corporation (as determined under section 382(e)) on the testing date, by

(2) The long-term tax exempt rate (as defined in section 382(f)) for the calendar month in which the testing date occurs.

An ownership interest is that treated as stock under this paragraph (f)(18)(iii) is taken into account for purposes of determining the value of the loss corporation under section 382(e).

(iv) Stock of the loss corporation. The stock of the loss corporation means stock of such corporation within the meaning of this paragraph (f)(18) and, as the context may require, includes any indirect ownership interest in the loss corporation.

(19) Change date. The change date means the date on which a shift (or any other transaction described in paragraph (a)(2)(i) of this section) that is the last component of an ownership change occurs.

(20) Year. A year, or any multiple thereof, means a 365-day period (or a 366-day period in the case of a leap year), or any multiple thereof, unless the year is specifically identified as a taxable year.

(21) Old section 382. Old section 382 means section 382, as in effect prior to the effective date of section 382 in the Tax Reform Act of 1986 (the "Act"), but taking into account section 621(f)(2) of the Act.

(22) Pre-change loss. The term pre-change loss means—

(i) Any net operating loss carryforward of the old loss corporation to the taxable year ending on the change date or in which the change date occurs,

(ii) Any net operating loss of the old loss corporation for the taxable year in which the ownership change occurs to the extent such loss is allocable

to the period in such year on or before the change date, and

(iii) Any recognized built-in loss for any recognition period taxable year (within the meaning of section 382(h)).

(23) **Unrelated.** Any two persons are unrelated if the constructive ownership rules of paragraph (h) of this section do not apply to treat either person as owning stock that is owned, directly or constructively, by the other person.

(24) **Percentage ownership interest.** A person's percentage ownership interest in—

(i) A corporation shall be determined under the rules of this section that are applicable to the determination of a shareholder's percentage stock ownership interest in a loss corporation (see paragraphs (f)(18) (i) through (iii) of this section),

(ii) A partnership shall be equal to the relative fair market value of such person's partnership interest to the total fair market value of all outstanding partnership interests, determined without regard to any limited and preferred partnership interest that is described in paragraph (h)(2)(ii)(C) of this section,

(iii) A trust shall be determined in accordance with the principles of section 318(a)(2)(B) for determining the constructive ownership of stock,

(iv) An estate shall be determined in accordance with the principles of section 318(a)(2)(A) for determining the constructive ownership of stock, and

(v) All other entities shall be determined by reference to the person's relative economic interest in the entity, taking into account all of the relevant facts and circumstances.

(g) **5-percent shareholder—(1) In general.** Subject to the rules of paragraphs (k) (2) and (4) of this section, the term "5-percent shareholder" means—

(i) An individual that owns, at any time during the testing period,

(A) A direct ownership interest in the stock of the loss corporation of five percent or more or

(B) An indirect ownership interest in the stock of the loss corporation of five percent or more by virtue of an ownership interest in any one first tier entity or higher tier entity,

(ii) A public group, of either a first tier entity or a higher tier entity, identified as a 5-percent shareholder under paragraph (j)(1)(iv) (A) or (B) of this section,

(iii) A public group of the loss corporation identified as a 5-percent shareholder under paragraph (j)(1)(iv)(C) of this section, and

(iv) A public group, of the loss corporation, a first tier entity or a higher tier entity, identified as a 5-percent shareholder under paragraph (j) (2) or (3) of this section. An individual owning five percent or more of the stock of the loss corporation at any time during the testing period is a 5-percent shareholder notwithstanding that the individual may own less than five percent of the stock of the loss corporation on the testing date. See paragraph (g)(5)(i)(B) of this section for rules permitting a loss corporation to make an adjustment in cases described in the preceding sentence.

(2) **Determination of whether a person is a 5-percent shareholder.** Except as provided in paragraphs (k) (2) and (4) of this section, a person shall be treated as constructively owning stock of the loss corporation pursuant to paragraph (h)(2) of this section only if the loss corporation stock is attributed to such person in the person's capacity as a higher tier entity or a 5-percent owner of the first tier entity or higher tier entity from which such stock is attributed. See paragraph (k)(3) of this section for rules explaining the extent of the obligation of the loss corporation to determine the identity of its 5-percent shareholders. Nothing in this paragraph (g)(2), however, shall limit the attribution of loss corporation stock under section 318(a)(2) and paragraph (h) of this section to a public owner.

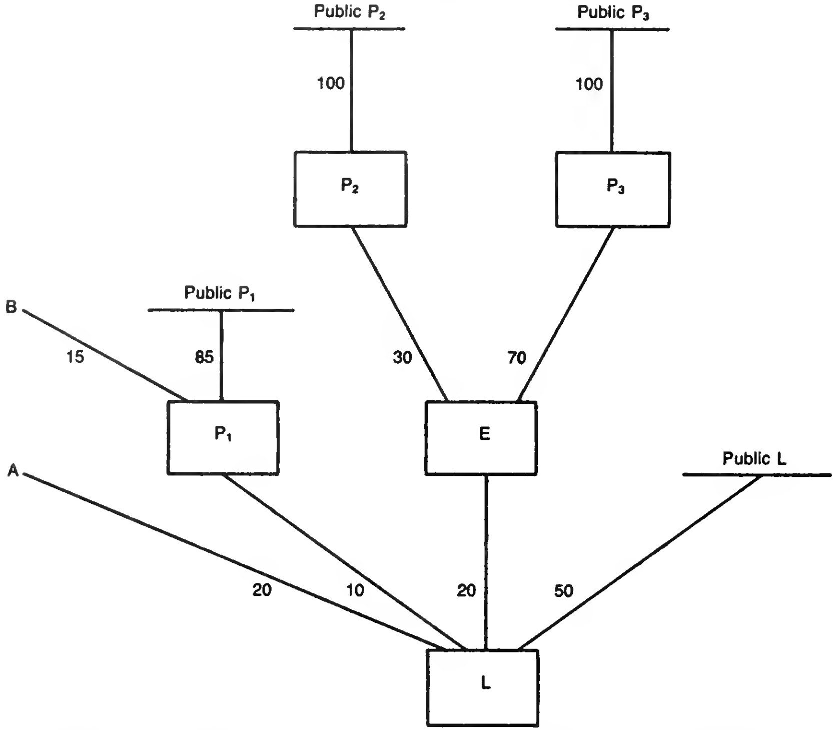
(3) **Determination of the percentage stock ownership interest of a 5-percent shareholder.** Subject to the rules of paragraphs (k)(2) and (4) of this section, in determining a 5-percent shareholder's percentage ownership interest in the loss corporation, the shareholder's direct ownership interest, if any, and each indirect ownership interest that he may have in the loss corporation in his capacity as a 5-percent owner of any one first tier entity or higher tier entity, if any, are required to be added together and taken into account with respect to such shareholder only to the extent that each such direct or indirect ownership interest constitutes five percent or more of the stock of the loss corporation.

(4) **Examples.**

Example (1). (i) Twenty percent of L stock is owned by A, 10 percent is owned by P_1, 20 percent is owned by E, a joint venture, and the remaining 50 percent of L stock is owned by Public L. P_1 is owned 15 percent by B and 85 percent by Public P_1. E is owned 30 percent by P_2 and 70 percent by P_3,

which, in turn, are owned by Public P_2 and Public P_3, respectively.

(ii) The ownership structure of L is illustrated by the following chart:

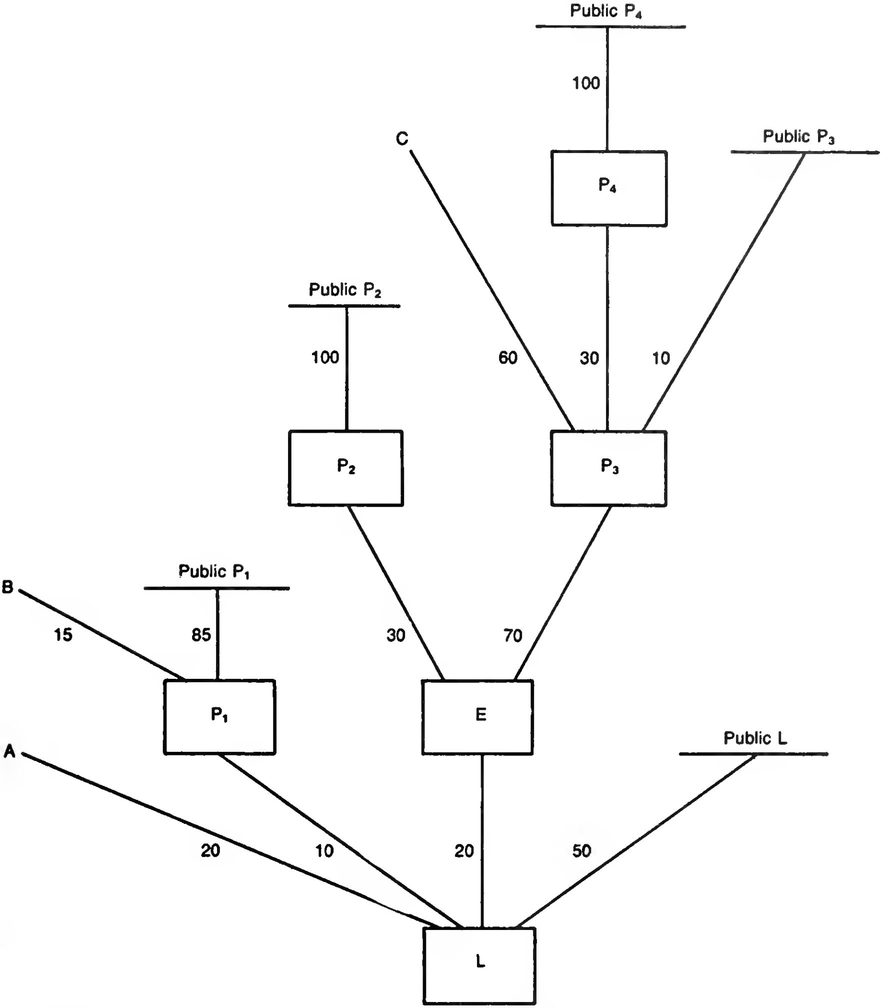


(iii) P_1 and E, each of which has a direct ownership interest in L of five percent or more, are first tier entities. The shareholders with direct ownership interests in L who individually own less than five percent of L are public shareholders (Public L). B, who has a direct ownership interest of five percent or more in P_1, is a 5-percent owner of P. P_2 and P_3, and P_3, each of which has a direct ownership interest in a first tier entity (E) of five percent or more, are higher tier entities with respect to L and, because neither entity is owned at any time during the testing period by a higher tier entity, they also are highest tier entities. The shareholders of P_2 and P_3 (Public P_2 and Public P_3, respectively) are public owners of such entities, because none of those shareholders own five percent or more of either entity at any time during the testing period.

(iv) A, who has a 20 percent direct ownership interest in L, is a 5-percent shareholder of L. Because, by application of the constructive ownership rules of paragraph (h) of this section, B owns only 1.5 percent of L stock in his capacity as a 5-percent owner of P_1 (15 percent ownership of P_1 × 10 percent ownership of L), B is not a 5-percent shareholder of L, even though he is a 5-percent owner of P_1. Under the rules of paragraph (j) of this section, therefore, B is treated as a member of Public P_1. See Example (3) of paragraph (j)(1)(vi) of this section for a determination of which public owners and public shareholders constitute public groups that are treated as 5-percent shareholders of L.

Example (2). (i) The facts are the same as in Example (1), except that P_3 is owned 60 percent by C, 30 percent by P_4, and 10 percent by Public P_3. The stock of P_4 is owned by a group of persons (Public P_4), none of whom own five percent or more of the stock of P_4.

(ii) The ownership structure of L is illustrated by the following chart:



(iii) The defined terms are the same as in Example (1), except that P_3 is a higher tier entity, not a highest tier entity, because five percent or more of P_3 is, in turn, owned by another entity (P_4). P_4, which owns five percent or more of a higher tier entity (P_3), also is a higher tier entity and, because it is not owned at any time during any testing period by any entity that is also a higher tier entity, P_4 is a highest tier entity. All of the shareholders of P_4, none of which own a direct ownership interest of five percent or more in P_4, are public owners of P_4.

(iv) C is a 5-percent owner of P_3 and, under the constructive ownership rules of paragraph (h) of this section, C indirectly owns 8.4 percent of L ([60 percent ownership of P_3] × [70 percent ownership of E] × [20 percent ownership of L]), in his capacity as a 5-percent owner of P_3. B is a 5-percent owner of P_1 and, under the constructive ownership rules of paragraph (h) of his section, B owns 1.5 percent of L ([15 percent ownership of P_1] × [10 percent ownership of L]) in his capacity as a 5-percent owner of P_1. Therefore, C is a 5-percent shareholder of L, but B is not a 5-percent shareholder of L, even though he is a 5-percent owner of P_1. See Example (4) of paragraph (j)(1)(vi) of this section for a determination of which public

owners and public shareholders constitute public groups that are treated as separate 5-percent shareholders of L.

Example (3). (i) L is owned 30 percent by A and 70 percent by P. A owns six percent of P stock and the balance (94 percent) is owned equally by 500 unrelated shareholders ("Public P").

(ii) A is a 5-percent shareholder because he directly owns 30 percent of L. Even though A is a 5-percent owner of P, A's 4.2 percent indirect ownership interest in L (six percent ownership interest in P × P's 70 percent ownership of L) is generally not taken into account in determining A's ownership interest, because such indirect ownership interest is less than five percent. Instead, A's 4.2 percent indirect interest is treated under paragraph (j)(1)(iv) of this section as owned by Public P. If, however, L has actual knowledge of A's less-than-five-percent indirect ownership interest in L and is thus subject to paragraph (k)(2) of this section, or paragraph (k)(4) of this section otherwise applies, L must take A's total 34.2 percent ownership interest into account in determining A's percentage ownership in L.

Example (4). The facts are the same as in Example (3), except that A owns ten percent of P's stock. Because A's indirect ownership interest in L in his capacity as a 5-percent owner of P is five percent or more, both A's 30 percent direct ownership interest in L and his seven percent indirect ownership interest in L (10 percent ownership interest in P × P's 70 percent ownership of L) are taken into account in determining his ownership interest in L, without regard to L's actual knowledge or whether paragraph (k)(4) of this section applies.

(5) Stock ownership presumptions in connection with certain acquisitions, and dispositions of loss corporation stock—(i) In general. For purposes of this section—

(A) If an individual owns less than five percent of the stock of a loss corporation during the testing period (excluding the testing date) and acquires an amount of such stock so that the individual becomes a 5-percent shareholder on the testing date, the loss corporation may treat any interest in the loss corporation owned by such individual prior to that acquisition as owned by a public group during the period of such individual's ownership of that interest and as not owned by the 5-percent shareholder during the same period, and

(B) If a 5-percent shareholder's percentage ownership interest in the loss corporation is reduced to less than five percent, the loss corporation may presume that the remaining stock owned by such 5-percent shareholder immediately after such reduction is the stock owned by such shareholder for each subsequent testing date having a testing period that includes the date on which the reduction occurred as long as such shareholder continues to own less than five percent of the stock of the loss corporation. In that event, such ownership interest shall be treated as owned by a separate public group for purposes of the rules of paragraph (j)(2)(vi) of this section.

(ii) Example.

L has 100,000 shares of stock outstanding. All of the L stock is owned equally by 40 unrelated, individual shareholders, including A (who owns 2.5 percent of L stock). Because no person owns as much as five percent of L stock, Public L is the only 5-percent shareholder of L. See paragraph (j)(1) of this section. A purchases 5,000 shares of L stock over a public stock exchange on June 8, 1989. The purchase is an owner shift. When added to his ownership interest before that date (the testing date), A owns 7,500 shares of L stock (7.5 percent). Under paragraph (g)(5)(i)(A) of this section, L may treat A and Public L as having owned 0 percent and 100 percent, respectively, at all times prior to June 8, 1989 (rather than having owned 2.5 percent by A and 97.5 percent by Public L, even if L has actual knowledge of A's less than five percent ownership interest). The increase in A's stock ownership of L as of June 8, 1989 thus would be 7.5 percentage points, rather than 5.0 percentage points, for purposes of determining whether an ownership change occurs on that testing date and any subsequent testing date.

(h) Constructive ownership of stock—(1) In general. Subject to certain modifications set forth in this section and section 382(*l*)(3), the constructive ownership rules of section 318(a) generally apply for purposes of determining ownership of loss corporation stock.

(2) Attribution from corporations, partnerships, estates and trusts—(i) In general. Stock owned (directly or indirectly) by an entity shall be attributed to its owners—

(A) Except as otherwise provided in this section, by treating the stock attributed pursuant to section 318(a)(2) as no longer being owned by the entity from which it is attributed, and

(B) If attribution is from a corporation, without regard to the 50 percent stock ownership limitation contained in section 318(a)(2)(C).

(ii) Limitation on attribution from entities with respect to certain interests. Section 318(a)(2) shall not apply to treat the stock of the loss corporation that is owned directly by a first tier entity (or indirectly by any higher tier entity) as being indirectly owned by any person that has an ownership interest in the first tier entity (or any higher tier entity) to the extent that such interest is (or is attributable to)—

(A) Stock of any such entity that is described in section 1504(a)(4),

(B) Any ownership interest in any such entity that does not constitute stock under paragraph (f)(18)(ii) of this section, or

(C) If the entity is not a corporation, any ownership interest in any such entity that has characteristics similar to the interests described in paragraph (h)(2)(ii) (A) or (B) of this section.

The ownership interests described in this paragraph (h)(2)(ii) shall not be taken into account in determining a person's percentage ownership interest in an entity under paragraph (f)(24) of this section.

(iii) Limitation on attribution from certain entities. For purposes of this section, except as provided in paragraphs (k)(2) and (4) of this section, each of the following shall be treated as an individual who is unrelated to any other owner (direct or indirect) of the loss corporation—

(A) Any entity other than a higher tier entity that owns five percent or more of the loss corporation stock (determined without regard to paragraph (h)(2)(i)(A) of this section) on a testing date, a first tier entity or the loss corporation,

(B) A qualified trust described in section 401(a),

(C) Any State, any possession of the United States, the District of Columbia, the United States (or any agency or instrumentality thereof), any foreign government, or any political subdivision of any of the foregoing, and

(D) Any other person designated by the Internal Revenue Service in the Internal Revenue Bulletin.

Stock of a loss corporation that is owned by any such person shall thus not be attributed to any other person for purposes of this section. See paragraph (g)(2) of this section limiting attribution from a first tier entity or a higher tier entity to any person that is not a 5-percent owner or a higher tier entity.

(iv) Examples.

Example (1). All the stock of L is owned by A. B and C respectively own 70 and 30 percent of the outstanding P stock. P acquires 60 percent of the outstanding L stock from A on July 1, 1988 (a testing date). After the acquisition, P is a first tier entity and a higher tier entity of L. B and C are each 5-percent owners of P and also are 5-percent shareholders of L having a 42 percent and 18 percent stock ownership interest in L, respectively, through the operation of the constructive ownership rules of paragraph (h) of this section. Because B and C together have increased their ownership in L by more than 50 percentage points during the testing period ending on the testing date (60 percent on the testing date and 0 percent prior thereto), an ownership change occurs with respect to L on July 1, 1988.

Example (2). The facts are the same as in Example (1), except that B and C are not shareholders in a corporation, but instead are partners in a general partnership, E. B and C respectively own 70 percent and 30 percent of E. E acquires 60 percent of the L stock on July 1, 1988. The results are the same as in Example (1).

Example (3). The facts are the same as in Example (1), except that the acquisition is accomplished in a transaction that qualifies under section 351(a). In that transaction, HC is formed through (i) a contribution of money by P in exchange for 60 shares of HC common stock and (ii) a contribution of all the outstanding shares of L stock plus cash by A in exchange for 40 shares of HC common stock and 30 shares of HC preferred stock that is described in section 1504(a)(4). The respective values of each share of HC stock, common and preferred, are equal. The stock of L is attributed to A through his interest in HC common stock, but not through his interest in HC preferred stock (see paragraph (h)(2)(ii)(A) of this section). Thus, A is treated as owning indirectly only 40 percent of L. B and C are 5-percent shareholders of L having indirect ownership interests in L of 42 percent and 18 percent, respectively, through their ownership of HC common stock. The results are therefore the same as in Example (1).

(3) Attribution to corporations, partnerships, estates and trusts. Except as otherwise provided by regulation under section 382 or by the Internal Revenue Service in the Internal Revenue Bulletin, the rules of section 318(a)(3) shall not apply in determining the ownership of stock under this section.

(4) Option attribution—(i) In general. Solely for the purpose of determining whether there is an ownership change on any testing date, stock of the loss corporation that is subject to an option shall be treated as acquired on any such date, pursuant to an exercise of the option by its owner on that date, if such deemed exercise would result in an ownership change. The preceding sentence shall be applied separately with respect to—

(A) Each class of options (i.e., options with terms that are identical, issued by the same issuer, and issued on the same date) owned by each 5-percent shareholder (or person who would be a 5-percent shareholder if the option were treated as exercised), and

(B) Each 5-percent shareholder, each owner of an option who would be a 5-percent shareholder if the option were treated as exercised, and each combination of such persons.

(ii) Examples.

Example (1). (i) A owns all of the 100 shares of outstanding L stock. A grants options for the purchase of his L stock, exercisable for 10 years from the date of issuance, in the following transactions: An option to B for four shares (issued January 1, 1988), an option to C for six shares (issued June 1, 1989), and an option to D for 15 shares (issued July 30, 1989). On July 30, 1990, A sells 41 shares of his L stock to BB.

(ii) Pursuant to paragraph (a)(2)(i) of this section, the date on which each option is acquired is a testing date. The issuance of options to acquire L stock to each of B, C, and D is not treated as an acquisition of the underlying stock on any such testing date since such treatment with respect to any one of the option owners (or any combination thereof) would not have resulted in an ownership change on any of those testing dates.

(iii) The date on which BB acquires 41 shares also is a testing date. BB's acquisition of 41 percent of the L stock, taken together with the shift in ownership that would result if the options held by B, C and D were exercised, would result in an ownership change, because the stock owned or treated as

owned by Public L (a group including only B, the sole shareholder who owns less than five percent of L stock), C, D and BB would have increased by 66 percentage points (four, six, 15, and 41 percentage points, respectively) during the testing period. Subject to paragraph (h)(4)(ix) of this section, the options are treated as exercised and an ownership change occurs on July 30, 1990, pursuant to paragraph (h)(4)(i) of this section. Accordingly, no new testing period can begin before July 31, 1990. Under paragraph (h)(4)(x)(F) of this section, the option attribution rules of paragraph (h)(4)(i) of this section shall not be applicable with respect to any of the options owned by B, C, and D immediately before the ownership change until such time, if any, that such options are transferred to (or by) 5-percent shareholder (or a person who would be a 5-percent shareholder if such option were exercised). In addition, the subsequent exercise of any of those options by A, B, or C (the persons owning such options immediately before the ownership change) is disregarded. See paragraph (h)(4)(vi) of this section. Also see paragraph (h)(4)(viii) of this section for the treatment of options that lapse or are forfeited.

(iv) The facts are the same as in (i), except that the sale of A's 41 shares of L stock to BB occurs on July 30, 1995. Because the options are treated as exercised and the related stock is treated as acquired on the July 30, 1995 testing date, the results are the same as described in (iii).

Example (2). (i) A owns all of the outstanding 100 shares of the stock of L. On July 22, 1988, the value of A's stock in L is $500 and the following agreements are entered into: (i) A sells 40 shares of his L stock to B for $200, (ii) in exchange for $10, A grants B an option to acquire the balance of his L stock for $305 at any time before July 22, 1992, and (iii) L grants A an option to acquire 100 shares of L stock at a price of $600 exercisable until such time as B's option is no longer outstanding.

(ii) If the stock subject to the options owned by both A and B were treated as acquired on the July 22, 1988 testing date, B would have increased his ownership interest in L by only 50 percentage points to 50 percent ([40 shares purchased + 60 shares acquired pursuant to the option]/200 outstanding shares of L stock, including 100 shares deemed outstanding pursuant to the option issued to A by L) as compared with 0 percent prior to July 22, 1988. In determining whether the options with respect to the stock of L would, if exercised, result in an ownership change, paragraph (h)(4)(i)(B) of this section requires that such options be treated as exercised separately with respect to each 5-percent shareholder, each person who would be a 5-percent shareholder if the option were treated as exercised or each combination of such persons. Therefore, by treating the option owned by A as not having been exercised and the option owned by B as having been exercised, B's interest in L increases by 100 percentage points during the testing period. An ownership change with respect to L therefore results from the transactions occurring on July 22, 1988.

(iii) Contingencies. Except as provided in paragraph (h)(4)(x)(D) of this section, the extent to which an option is contingent or otherwise not currently exercisable shall be disregarded for purposes of this section.

(iv) Series of options. For purposes of this section, an option to acquire an option with respect to the stock of the loss corporation, and each one of a series of such options, shall be considered as an option to acquire such stock.

(v) Interests that are similar to options. For purposes of this section,

(A) An interest that is similar to an option includes, but is not limited to, a warrant, a convertible debt instrument, an instrument other than debt that is convertible into stock, a put, a stock interest subject to risk of forfeiture, and a contract to acquire or sell stock, and

(B) Any such interest shall be treated as an option.

(vi) Actual exercise of options—(A) In general. The actual exercise of any option in existence immediately before and after an ownership change, whether or not the option was treated as exercised in connection with the ownership change under paragraph (h)(4)(i) of this section, shall be disregarded for purposes of this section, but only if the option is exercised by the 5-percent shareholder (or person who would have been a 5-percent shareholder if the options owned by such person had been exercised immediately before the ownership change) who owned the option immediately before and after such ownership change.

(B) Actual exercise within 120 days of deemed exercise. If the actual exercise of an option occurs on or before the end of the period which is 120 days after the date on which the option is treated as exercised under paragraph (h)(4)(i) of this section, the loss corporation may elect to treat paragraphs (h)(4)(i) and (vi)(A) of this section as not applying to such option and take into account only the acquisition of loss corporation stock resulting from the actual exercise of the option. An election under this paragraph (h)(4)(vi)(B) shall have no effect on the determination of whether an ownership change occurs, but shall apply only for the purpose of determining the date on which the change date occurs. An election under this paragraph (h)(4)(vi)(B) shall be made in the statement described in paragraph (a)(2)(ii) of this section.

(vii) Effect of deemed exercise of options on the outstanding stock of the loss corporation—(A) Right or obligation to issue stock. Solely for purposes of determining whether an ownership change has occurred under paragraph (h)(4)(i) of this section, the deemed exercise of an option with respect to unissued stock (or treasury stock) of a corporation shall result in a corresponding increase in the amount of its total outstanding stock.

(B) Right or obligation to acquire outstanding stock by the loss corporation. Solely for purposes of determining whether an ownership change has occurred under paragraph (h)(4)(i) of this section,

the deemed exercise of a right to transfer outstanding stock to the issuing corporation (or a right of the issuing corporation to acquire its stock) shall result in a corresponding decrease in the amount of its total outstanding stock.

(C) Effect on value of old loss corporation. The deemed exercise of an option with respect to unissued stock (or treasury stock) under paragraph (h)(4)(i) of this section shall have no effect on the determination of the value of the old loss corporation and the computation of the section 382 limitation. See section 382(*l*)(1)(B) disregarding capital contributions made during the two-year period preceding the change date for purposes of computing the section 382 limitation.

(viii) Options that lapse or are forfeited. If an option that is treated as exercised under paragraph (h)(4)(i) of this section lapses unexercised or the owner of such option irrevocably forfeits his right to acquire stock pursuant to the option, the option shall be treated for purposes of this section as if it never had been issued. In that case, the loss corporation may file an amended return for prior years (subject to any applicable statute of limitations) if the section 382 limitation was thus inapplicable. If paragraph (h)(4)(i) of this section applied to an option (or options) with respect to a taxable year for which an income tax return has not been filed by the date that the option (or options) lapses or is irrevocably forfeited, the loss corporation may treat paragraph (h)(4)(i) of this section as inapplicable to such option (or options).

(ix) Option rule inapplicable if pre-change losses are de minimis. Paragraph (h)(4)(i) of this section shall not apply to treat the stock of the loss corporation as acquired by the owner of an option if, on a testing date, the amount of pre-change losses (determined as if the testing date were a change date and treating the amount of any net unrealized built-in loss as a pre-change loss) is less than twice the amount determined by multiplying.

(A) The value of the loss corporation (as determined under section 382(e)) on the testing date, by

(B) The long-term tax exempt rate (as defined in section 382(f)) for the calendar month in which the testing date occurs.

(x) Options not subject to attribution. Paragraph (h)(4)(i) of this section shall not apply to—

(A) Long-held options with respect to actively traded stock. Any option with respect to stock of the loss corporation which stock is actively traded on an established securities market (within the meaning of section 1273(b)) for which market quotations are readily available, if such option has been continuously owned by the same 5-percent shareholder (or a person who would be a 5-percent shareholder if such option were exercised) for at least three years, but only until the earlier of such time as—

(1) The option is transferred by or to a 5-percent shareholder (or a person who would be a 5-percent shareholder if such option were exercised), or

(2) The fair market value of the stock that is subject to the option exceeds the exercise price for such stock on the testing date. For purposes of this paragraph (h)(4)(x)(A), options with respect to the stock of a loss corporation that are assumed (or substituted) in a reorganization and converted into options with respect to the stock of another party to the reorganization shall not be treated as transferred, provided that there are no changes in the terms of the options, other than that the stock that may be acquired pursuant to the option is that of another party to the reorganization and that the amount of stock subject to the option is adjusted only to reflect the exchange ratio for the exchange of stock of the loss corporation in the reorganization.

(B) Right to receive or obligation to issue a fixed dollar amount of value of stock upon maturity of certain debt. Any right to receive or obligation to issue stock pursuant to the terms of a debt instrument that, in economic terms, is equivalent to nonconvertible debt because the right to receive stock of the issuer of a fixed dollar amount is based upon the fair market value for such stock determined at or about the date the stock is transferred pursuant to such right or obligation (i.e., the amount of the stock transferred pursuant to the option is equal to a fixed dollar amount, divided by the value of each share of such stock at or about the date of the stock transfer). This paragraph (h)(4)(x)(B) shall not apply if the method for determining the fair market value of the stock of the issuer is intended to or, in fact, provides the owner of the debt instrument with a participation in any appreciation of any stock of the issuer.

(C) Right or obligation to redeem stock of the loss corporation. Any right or obligation of the loss corporation to redeem any of its stock at the time such stock is issued, but only to the extent such stock is issued to persons who are not 5-percent shareholders immediately before the issuance.

(D) Options exercisable only upon death, disability or mental incompetency. Any option en-

tered into between owners of the same entity (or an owner and the entity in which the owner has a direct ownership interest) with respect to such owner's ownership interest in the entity that is exercisable only upon the death, complete disability or mental incompetency of such owner.

(E) Right to receive or obligation to issue stock as interest or dividends. Any right to receive or obligation to issue stock of a corporation in payment of interest or dividends by the issuing corporation. (For an example illustrating this exception, see paragraph (j)(2)(iv)(B) of this section.)

(F) Options outstanding following an ownership change—(1) In general. Any option in existence immediately before and after an ownership change, whether or not the option was treated as exercised in connection with the ownership change under paragraph (h)(4)(i) of this section, but only so long as the option continues to be owned by the 5-percent shareholder (or person who was treated as a 5-percent shareholder) who owned the option immediately before and after such ownership change.

(2) Example (i) A, B, C and D own all of the outstanding stock of L. A owns 70 shares of L stock and each of B, C and D own 10 shares of L stock. On July 12, 1988, L issues warrants to each of its shareholders entitling them to acquire an additional 8.5 shares of L stock for each share of stock owned.

(ii) If B, C and D, but not A, each exercise their respective rights to acquire an additional 85 shares of L stock (10 shares × 8.5 shares that may be acquired for each share owned) on July 12, 1988, their combined ownership interest in L on that date would exceed 80 percent (255 shares deemed to be acquired + 30 shares actually owned)/355 shares outstanding (actual and deemed). B, C and D thus would increase their ownership interest in L by 50.3 percentage points during the testing period, causing an ownership change, because, under paragraph (h)(4)(i)(B) of this section, the options are treated as exercised if the exercise would cause an ownership change.

(iii) Following the ownership change, paragraph (h)(4)(i) of this section applies to prevent A's right to acquire 595 shares of L stock (70 shares x 8.5 shares that may be acquired for each share owned) or the rights held by B, C, or D, to be treated as exercised on any subsequent testing date, except to the extent that those rights are transferred. To the extent any of those options are transferred following the ownership change, paragraph (h)(4)(i) of this section will apply to any such options on the date of the transfer and on any subsequent testing date.

(G) Right to acquire loss corporation stock pursuant to a default under a loan agreement. Any right to acquire stock of a corporation by a bank (as that term is defined in section 581), an insurance company (as that term is defined in § 1.801-3(a)), or a trust qualified under section 401(a) solely as the result of a default under a loan agreement entered into in the ordinary course of the trade or business of such bank, life insurance company or qualified trust.

(H) Agreement to acquire or sell stock owned by certain shareholders upon retirement. Any option entered into between noncorporate owners of the same entity (or a noncorporate owner and the entity in which the owner has a direct ownership interest) with respect to such owner's ownership interest in the entity, but only if each of such owners actively participate in the management of the entity's trade or business, the option is issued at a time that the loss corporation is not a loss corporation and the option is exercisable solely upon the retirement of such owner. An option with terms described in both this paragraph (h)(4)(x)(H) and in paragraph (h)(4)(x)(D) of this section shall also not be subject to paragraph (h)(4)(i) of this section.

(xi) Certain transfers of options disregarded. Transfers of options between persons who are not 5-percent shareholders (and between members of separate public groups resulting from the application of the segregation rules of paragraphs (j)(2) and (3)(iii) of this section) are not taken into account. Transfers of options in any of the circumstances described in section 382(*l*)(3)(B) are also disregarded and the transferee shall be treated as having owned the option for the period that it was owned by the transferor.

(xii) Exercise of an option that has not been treated as stock. The acquisition of stock pursuant to the actual exercise of an option (other than an option described in paragraph (h)(4)(vi)(A) of this section) shall not be disregarded.

(5) Stock transferred under certain agreements. Notwithstanding paragraph (h)(4) of this section, no shift results solely because under section 1058(a)—

(i) A shareholder transfers stock of a corporation pursuant to an agreement that meets the requirements of section 1058(b), or

(ii) A person having rights under such an agreement exchanges those rights for stock identical to the stock transferred pursuant to the agreement.

(6) Family attribution. For purposes of this section—

(i) Paragraphs (1) and (5)(B) of section 318(a) shall not apply,

(ii) An individual and all members of his family described in section 318(a)(1) shall be treated as one individual,

(iii) Subject to paragraph (k)(2) of this section, paragraph (h)(6)(ii) of this section shall not apply to members of a family who, without regard to that paragraph (h)(6)(ii), would not be 5-percent shareholders, and

(iv) If under paragraph (h)(6)(ii) of this section, an individual may be treated as a member of more than one family, and each family that is treated as one individual is a 5-percent shareholder (or would be treated as a 5-percent shareholder if such individual were treated as a member of such family), then such individual shall be treated only as a member of the family that results in the smallest increase in the total percentage stock ownership of the 5-percent shareholders on the testing date and shall not be treated as the member of any other family.

(i) [Reserved]

(j) Aggregation and segregation rules. For purposes of this section, except as provided in paragraphs (k) (2) and (4) of this section—

(1) Aggregation of public shareholders and public owners into public groups—(i) Public group. Under this paragraph (j), a loss corporation or other entity can be treated as owned, in whole or in part, by one or more public groups. A public group can include public shareholders, public owners, and 5-percent owners who are not 5-percent shareholders of the loss corporation.

(ii) Treatment of a public group that is a 5-percent shareholder. Each public group that is treated as a 5-percent shareholder under paragraph (g)(1) (ii), (iii) or (iv) of this section shall be treated as one individual. See paragraph (j)(2)(iv) for a rule combining certain de minimis public groups.

(iii) Presumption of no cross-ownership. The public owners, 5-percent owners who are not 5-percent shareholders and public shareholders in any public group, subject to paragraphs (j)(2)(iii), (k)(2) and (k)(4) of this section, are presumed not to be members of any other public group. It also is presumed that each such person is unrelated to all other shareholders (direct and indirect) of the loss corporation. See paragraph (h)(6)(iii) of this section. The members of a public group that exists by virtue of its direct ownership interest in an entity are presumed not to be members (and not to be related to a member) of any other public group that exists at any time by virtue of its direct ownership interest in any other entity. To the extent that the presumptions adopted in this paragraph (j)(1)(iii) are not applicable because the loss corporation has actual knowledge of facts to the contrary and is thus subject to paragraph (k)(2) of this section, public shareholders, public owners and 5-percent owners who are not 5-percent shareholders may be aggregated into additional public groups.

(iv) Identification of the public groups treated as 5-percent shareholders—(A) Analysis of highest tier entities. The loss corporation must identify first tier entities and higher tier entities in order to identify any highest tier entities that must be identified under paragraph (k)(3) of this section. The loss corporation must then identify any 5-percent owners of each such highest tier entity who indirectly own, at any time during the testing period, five percent or more of the loss corporation through the ownership interest in such highest tier entity. Under paragraph (g)(1)(i)(B) of this section, any such 5-percent owner is a 5-percent shareholder. See paragraph (k)(3) of this section for rules explaining the extent of the obligation of the loss corporation to determine the identity of its shareholders. Each person who has an ownership interest in any highest tier entity and who is not treated as a 5-percent shareholder (i.e., persons who are public owners or 5-percent owners who are not 5-percent shareholders) is a member of the public group of that highest tier entity. A public group, so identified, that indirectly owns five percent or more of the loss corporation on the testing date is treated under paragraph (g)(1)(ii) of this section as a 5-percent shareholder. If the public group so identified owns less than five percent of the loss corporation on the testing date, such public group is treated as part of the public group of the next lower tier entity.

(B) Analysis of other higher tier entities and first tier entities. The analysis and aggregation of public groups described in paragraph (j)(1)(iv)(A) of this section is repeated for any next lower tier entity and successively for any next lower tier entity of any entity described in this paragraph (j)(1)(iv)(B) until applied to each first tier entity.

(C) Aggregation of the public shareholders. The public shareholders are aggregated and, under paragraph (g)(1)(iii) of this section, are treated as a public group that is a 5-percent shareholder without regard to whether such group, at any time during the testing period, owns five percent or more of the loss corporation. For this purpose, if the public group of any first tier entity indirectly owns less than five percent of the loss corporation on the testing date, and is thus not treated as a 5-percent shareholder, but is treated as part of the public group of the loss corporation under paragraph (j)(1)(iv) (A) or (B) of this section, the ownership interest of that group is included in the public group of the loss corporation referred to in the preceding sentence.

(v) Appropriate adjustments. A loss corporation may apply the principles of paragraph (g)(5) of this section with respect to—

(A) Any public group that is treated as a 5-percent shareholder on the testing date if such public group, at any time during the testing period, was treated as part of the public group of the next lower tier entity, or

(B) Any public group that is treated as part of the public group of a next lower tier entity if such public group, at any time during the testing period, was part of the public group of a higher tier entity that was treated as a 5-percent shareholder and had a direct or indirect ownership interest in such lower tier entity.

(vi) Examples.

Example (1). (i) All of the stock of L is owned by 1,000 shareholders, none of whom own as much as five percent of L stock ("Public L"). All of the stock of P is owned by 150,000 shareholders, none of whom own as much as five percent of P stock ("Public P"). Between July 12, 1988 and August 13, 1988, P purchases all of the L stock through a series of transactions on the public stock exchange. P's percentage of direct stock ownership in L increases from 4.9 percent to five percent on July 15, 1988, and from 50 percent to 51 percent on July 30, 1988.

(ii) Before July 15, 1988, P is a public shareholder of L. On and after July 15, 1988, P is a first tier entity (and a highest tier entity) of L. Accordingly, under the rules of paragraph (j)(1) of this section, Public P, on and after July 15, 1988, is treated as a public group that is a 5-percent shareholder. Each acquisition by P on and after such date affects the percentage of L stock that is owned by Public P and thus constitutes an owner shift.

(iii) Immediately after the transaction on July 30, 1988, P owns 51 percent of L stock. Under paragraph (j)(1)(iv)(A) of this section, Public P thus owns 51 percent of L. Under paragraph (j)(1)(iv)(C) of this section, Public L, the public group that includes the public shareholders of L, is treated as a 5-percent shareholder that owns 49 percent of L. Under paragraph (j)(1)(iii) of this section, Public L and Public P are presumed not to have any common members and it is also presumed that no member of either public group is related to any other member of either of the two public groups.

(iv) Assuming that the presumption provided in paragraph (j)(1)(iii) of this section (i.e., that no person owns stock in both P and L) is not rebutted to any extent, Public P is treated as a 5-percent shareholder whose stock ownership in L, as of the July 30, 1988 testing date, has increased by 51 percentage points over its lowest percentage of stock ownership in L at any time during the testing period (0 percent prior to July 12, 1988). Accordingly, an ownership change with respect to L occurs as a result of P's acquisition on July 30, 1988. L is thus a new loss corporation and its pre-change losses are subject to limitation under section 382.

Example (2). (i) All of the stock of P is owned by 1,000 unrelated shareholders, none of whom owns as much as five percent of P stock. L_1 is a wholly owned subsidiary of P. On January 2, 1988, P distributes all of the L_1 stock pro rata to its shareholders.

(ii) Prior to the stock distribution, the public owners of P are members of a public group ("Public P") that is treated as a 5-percent shareholder owning 100 percent of the stock of L_1.

See paragraph (j)(1)(iv)(A) of this section. Following the stock distribution to the P shareholders, L_1 is owned by 1,000 public shareholders that are members of a public group ("Public L_1") that is treated as a 5-percent shareholder owning 100 percent of the stock of L_1. See paragraph (j)(1)(iv)(C) of this section.

(iii) Public P and Public L_1 are treated as unrelated, individual 5-percent shareholders under paragraph (j)(1)(iii) of this section. Although the members of one public group are presumed not to be members of any other public group under paragraph (j)(1)(iii) of this section, L_1 has actual knowledge that all of its public shareholders immediately following the distribution (Public L_1) received L_1 stock pro rata in respect to the outstanding P stock and thus were also members of Public P. Applying paragraph (k)(2) of this section, the loss corporation may take into account the identity of ownership interests between Public L_1 and Public P to establish that Public L_1 did not increase its percentage ownership in L_1. Accordingly, the transaction would not constitute an owner shift.

Example (3). (i) The facts are the same as in Example (1) of paragraph (g)(4) of this section. Thus, 20 percent of L stock is owned by A, 10 percent is owned by P_1, 20 percent is owned by E, a joint venture, and the remaining 50 percent of L stock is owned by Public L. P_1 is owned 15 percent by B and 85 percent by Public P_1. E is owned 30 percent by P_2 and 70 percent by P_3, which are owned by Public P_2 and Public P_3, respectively. See Example (1)(ii) of paragraph (g)(4) of this section for a chart illustrating this ownership structure.

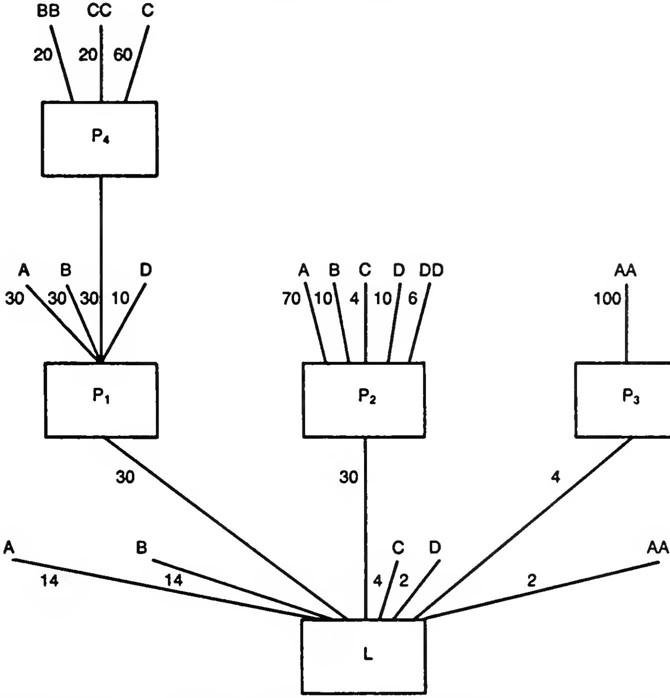
(ii) The public owners of P_2 and P_3 (Public P_2 and Public P_3, respectively), are public groups that are treated as 5-percent shareholders of L, because each such public group indirectly owns five percent or more of L stock (six percent by Public P_2 [(30 percent ownership of E)$\times$(20 percent ownership of L)] and 14 percent by Public P_3 [(70 percent ownership of E)$\times$(20 percent ownership of L)]). The public owners of P_1 ("Public P_1"), who indirectly own 8.5 percent of L stock [(85 percent ownership of P_1)$\times$(10 percent ownership of L)] and B, who indirectly owns 1.5 percent of L and is thus included in Public P_1 under paragraph (j)(1)(iv)(A) of this section, are members of a public group that is treated as a 5-percent shareholder of L that owns ten percent of L stock. Finally, the public group of L ("Public L") is a 5-percent shareholder that owns 50 percent of L. Accordingly, A, Public L, Public P_1 (including B), Public P_2, and Public P_3 are the only 5-percent shareholders of L.

Example (4). (i) The facts are the same as Example (3) above, except that P_3 is owned 60 percent by C, 30 percent by P_4, and 10 percent by P_3. The stock of P_4 is publicly traded and is owned by Public P_4. The facts are thus the same as in Example (2) in paragraph (g)(4) of this section. See Example (2)(ii) of paragraph (g)(4) of this section for a chart illustrating this ownership structure.

(ii) The public owners of P_4 (a highest tier entity) are members of a public group that indirectly owns 4.2 percent of L ([30 percent ownership of P_3]×[70 percent ownership of E]×[20 percent ownership of L]). For purposes of identifying public groups that are 5-percent shareholders, L is not required to identify P_4 as a highest tier entity under paragraph (k)(3) of this section because P_4 does not own five percent or more of L stock. Moreover, under paragraph (h)(2)(iii) of this section, P_4 generally is treated as an individual from which there is no attribution of loss corporation stock. The public group of P_3 (including P_4) indirectly owns 5.6 percent of L ([40 percent of P_3]×[70 percent ownership of E]×[20 percent of L]), and is thus a 5-percent shareholder of L. The public groups of P_2 and P_1 (both Public P_1 and B), respectively, also own five percent or more of L stock and are thus 5-percent shareholders of L. In addition, the public group of L is a 5-percent shareholder regardless of whether it owns five percent of L stock. Accordingly, A, Public L, Public P_3 (including P_4), Public P_2, and Public P_1 (including B), are the only 5-percent shareholders of L.

Example (5). (i) On September 4, 1987, L is owned 14 percent by each of A and B, 30 percent by each of P_1 and P_2, four percent by each of C and P_3, and two percent by each of D and AA. P_1 is owned 30 percent by each of A, B, and P_4 and 10 percent by D. P_2 is owned 70 percent by A, 10 percent by each of B and D, six percent by DD and four percent by C. AA owns 100 percent of the stock of P_3. P_4 is owned 60 percent by C and 20 percent by each of BB and CC.

(ii) The ownership structure of L is illustrated by the following chart:



(iii) In order to identify L's 5-percent shareholders and their respective ownership interests in L on September 4, 1987, the rules of paragraph (j)(1) of this section apply to identify the public groups that are treated as separate 5-percent shareholders. Analysis begins with any highest tier entity, such as P_4. Each of P_4's shareholders is a 5-percent owner of P_4. C^4 owns 5.4 percent of L in his capacity as a 5-percent owner of P_4 and therefore is a 5-percent shareholder. Notwithstanding that C actually owns, directly and by attribution, 10.6 percent of L (four percent directly, 5.4 percent indirectly through P_4, and 1.2 percent through P_2), C's ownership interest in L as a 5-percent shareholder is presumed to include only the 5.4 percent indirect ownership through P_4. (Under paragraphs (g) and (k)(2) of this section, however, L must account for C's direct and indirect ownership interests in determining whether an ownership change occurs on any testing date if it has actual knowledge of such ownership on or before the date that its income tax return is filed for the taxable year that includes the testing date). Although BB and CC are each 5-percent owners of P_4, they are not 5-percent shareholders and therefore are

members of the public group of P_4. Because the public group of P_4 indirectly owns only 3.6 percent of L, it is treated under paragraph (j)(1)(iv)(A) of this section as part of the public group of the next lower tier entity, P_1.

(iv) With respect to P_1, a first tier entity, each of its shareholders are 5-percent owners. Because A and B each indirectly own nine percent of L as 5-percent owners of P_1 and A indirectly owns 21 percent of L as a 5-percent owner of P_2, they are each 5-percent shareholders without regard to their direct ownership interests in L. A's ownership interest in L as a 5-percent shareholder is 44 percent (14 percent directly, nine percent in his capacity as a 5-percent owner of P_1, and 21 percent in his capacity as a 5-percent owner of P_2). B's ownership interest in L as a 5-percent shareholder is 23 percent (14 percent directly and nine percent in his capacity as a 5-percent and nine percent in his capacity as a 5-percent owner of P_1). B's ownership interest as a 5-percent shareholder does not include the three percent interest he owns indirectly through P_2. (Under paragraphs (g) and (k)(2) of this section, however, L must account for B's direct and indirect ownership interests, including his three percent interest through P_2, in determining whether an ownership change occurs on any testing date if L has actual knowledge of such ownership on or before the date that its income tax return is filed for the taxable year that includes the testing date.) D is a 5-percent owner of P_1. Although D owns eight percent of L (two percent directly, three percent indirectly through P_1, and three percent indirectly through P_2), he is not a 5-percent shareholder because he does not own five percent or more of L stock either directly or in his capacity as a 5-percent owner of either P_1 or P_2. (Under paragraphs (g) and (k)(2) of this section, however, L must account for D's direct and indirect ownership interests in determining whether an ownership change occurs on any testing date to the extent L has actual knowledge of such ownership amounting to five percent or more of L stock before the date that its income tax return is filed for the taxable year that includes the testing date.) The public group of P_1 (comprised of the public group of P_4 and D's direct ownership interest in P_1) has a 6.6 percent interest in L and is therefore treated as a separate 5-percent shareholder.

(v) With respect to highest tier entity P_2, D is a 5-percent owner who is not a 5-percent shareholder for the reason described in the preceding subdivision. DD is a 5-percent owner of P_2, who is not a 5-percent shareholder, because DD indirectly owns only 1.8 percent of L. Assuming that L does not have actual knowledge of B's and C's direct ownership interest in P_2, those interests are accounted for in computing the ownership interest of the public group of P_2. Therefore, each of P_2's shareholders, except A who is a 5-percent shareholder in his capacity as a 5-percent owner of P_2, are treated as members of the public group of P_2 that owns nine percent of L and is thus treated as a separate 5-percent shareholder.

(vi) Because the direct ownership interest of P_3 is less than five percent, it is a public shareholder. Therefore, assuming that L does not have actual knowledge of C's, D's, or AA's direct and/or indirect ownership interests in L, the public group of L is a separate 5-percent shareholder owning 12 percent of L (comprised of the direct ownership interests of C, D, AA and P_3).

(2) Segregation rules applicable to transactions involving the loss corporation—(i) In general. For purposes of this section, if—

(A) A transaction is described in paragraph (j)(2)(iii) of this section, and

(B) The loss corporation has one or more direct public groups immediately before and after the transaction,

the stock owned by such direct public group or groups is subject to the segregation rules described in paragraph (j)(2)(iii) of this section for purposes of determining whether an ownership change has occurred on the date of the transaction (and on any subsequent testing date with a testing period that includes the date of such transaction). See paragraph (j)(3) of this section for the application of the rules of this paragraph (j)(2) to transactions involving first tier entities or higher tier entities.

(ii) Direct public group. For purposes of this section, a direct public group is any public group of the loss corporation described in paragraph (j)(1)(iv)(C) of this section or any public group of the loss corporation resulting from the application of paragraph (j)(2)(iii) or (j)(3)(i) of this section.

(iii) Transactions to which segregation rules apply—(A) In general. The segregation rules of this paragraph (j)(2)(iii) apply to any transaction described in paragraph (j)(2)(iii) (B), (C), (D), (E), or (F) of this section in the manner specified. The presumptions adopted by this paragraph (j)(2)(iii) shall not apply only if, and to the extent that, the loss corporation either has actual knowledge of facts to the contrary regarding its stock ownership and is thus subject to paragraph (k)(2) of this section, or is subject to paragraph (k)(4) of this section. Any direct public group that is required to be identified as a result of a transaction described in paragraph (j)(2)(iii) of this section shall be treated as a 5-percent shareholder under paragraph (g)(1)(iv) of this section without regard to whether such group, at any time during the testing period, owns five percent or more of the loss corporation stock. To the extent that the presumptions are rebutted, the public shareholders, public owners and 5-percent owners who are not 5-percent shareholders may be aggregated into additional public groups.

(B) Certain equity structure shifts and transactions to which section 1032 applies—(*1*) In general. In the case of—

(*i*) A transaction that is an equity structure shift that also is described in section 381(a)(2) and in which the loss corporation is a party to the reorganization, or

(*ii*) A transfer of the stock of the loss corporation (including treasury stock) by the loss corporation in any other transaction to which section 1032 applies,

each direct public group that exists immediately after such transaction shall be segregated so that each direct public group that existed immediately before the transaction is treated separately from the direct public group that acquires stock of the loss corporation in the transaction. The direct public group that acquires stock of the loss corporation in the transaction is presumed not to include any members of any direct public group that existed immediately before the transaction. For purposes of this paragraph (j)(2)(iii)(B), a person is treated as acquiring stock of the loss corporation in a reorganization as the result of the person's ownership interest in another corporation that succeeds to the loss corporation's pre-change losses (determined as if the testing date were the change date and treating the amount of any net unrealized built-in loss as a pre-change loss) in a transaction to which section 381(a)(2) applies. In determining whether a transaction is described in section 1032 for purposes of this paragraph (j)(2)(iii)(B), the transfer by the loss corporation of any interest not constituting stock that is treated as stock under paragraph (f)(18)(iii) of this section shall be treated as the transfer of stock.

(2) Examples.

Example (1). (i) P_1 owns 60 percent of the stock of L. The remaining L stock (40 percent) is owned by Public L. A owns 40 percent of the P_1 stock. The remaining P_1 stock (60 percent) is owned by Public P_1. P_2 is a publicly traded corporation owned by shareholders who each own less than five percent of P_2 stock (Public P_2).

(ii) On May 22, 1988, L merges into P_2 in a transaction described in section 368(a)(1)(A), with the shareholders of L receiving an amount of P_2 stock equal to 70 percent of the value of P_2 immediately after the reorganization.

(iii) Immediately before the merger, L's 5-percent shareholders were Public L (40 percent), Public P_1 (36 percent), and A (24 percent). Although the shareholders of P_2 (immediately before the merger) do not acquire any stock in the merger, they are treated as acquiring a direct ownership interest in the loss corporation in the reorganization because P_2 succeeds to the pre-change losses of L in a transaction to which section 381(a)(2) applies. As a result of the merger, which constitutes a transaction described in (j)(2)(iii)(B)(1) of this section, L's direct public group, Public L, must be segregated from the direct public group that would otherwise exist after the transaction (Public L and Public P_2). Public L, the direct public group that exists before the merger, has a continuing 28 percent interest in the loss corporation [70 percent of P_2 shares received in the merger x 40 percent shares of L owned prior to the merger] that must be segregated from the interests acquired by Public P_2.

(iv) In addition, Public P_1, which owns five percent or more of the stock of P_2 through P_1's ownership interest in P_2. also is segregated from any other public group (i.e., both Public L and Public P_2) under paragraph (j)(1) of this section. Therefore, under paragraphs (j)(1) and (2) of this section, Public P_2 (excluding the members of Public L and Public P_1 immediately before the merger) is treated as a separate public group and 5-percent shareholder.

(v) The only 5-percent shareholder whose interest in the loss corporation, P_2, has increased during the testing period is Public P_2. Its interest has increased by 30 percentage points. Accordingly, no ownership change results from the merger. For purposes of measuring the shift in ownership of P_2 on any subsequent testing date with a testing period that includes May 22, 1988 (the date on which L merged into P_2), Public P_2 will continue to be treated as a direct public group, separate from Public L (the members of which own P_2 stock as a result of the merger) and Public P_1 .

Example (2). (i) P and L are each owned by 21 equal shareholders. Each of 14 of the shareholders of P and L are owners of both corporations ("common owners"). L has actual knowledge of this cross ownership. therefore, as a group, these persons own 66⅔ percent of each of P and L. P stock has a value of $600 and L stock has a value of $400.

(ii) P merges into L under section 368(a)(1)(A) on June 10, 1988. Ordinarily, the direct public group of L that exists immediately before the transaction would be segregated from the direct public group that acquires stock in the merger (the public group of P immediately before the merger). In view of the common ownership of P and L, however, a third group may be created under paragraph (j)(2)(iii)(A) of this section so that L's owners following the merger would be: The common owners (66⅔ percent), Public L, less the common owners, 13 ⅓ percent), and Public P, less the common owners (20 percent). Accordingly, the only 5-percent shareholder increasing its ownership interest by 20 percentage points and no ownership change occurs as a result of the merger.

Example (3). (i) L is entirely owned by Public L. L commences and completes a public offering of common stock on January 22, 1988, with the result that its outstanding stock increases from 100,000 shares to 300,000 shares. No person owns as much as five percent of L stock following the public offering.

(ii) The public offering of L stock is a transaction to which section 1032 applies. Immediately before the public offering, L's only 5-percent shareholder was Public L, a direct public group. Therefore, Public L (as in existence immediately before the transaction) must be segregated from the direct public group that would otherwise exist immediately after the transaction. Under paragraph (j)(2)(iii)(B)(1) of this section, the acquisition of 200,000 shares of L stock in the public offering must be treated as acquired by a direct public group ("New Public L") that is separate from Public L. Each such public group is treated as an individual that is a separate 5-percent shareholder. See paragraphs (g)(1)(iv) and (j)(1)(ii) of this section.

(iii) As a result of the public offering, L has two 5-percent shareholders, Public L and New Public L, which own 33⅓ percent and 66⅔ percent of the stock of L, respectively. Because the members of New Public L are presumed not to be members of Public L (and not to be related to any such members), the ownership interest of New Public L immediately prior to the offering of stock was 0 percent.

(iv) New Public L is a 5-percent shareholder that has increased its ownership interest in L by more than 50 percentage points during the testing period (by 66⅔ percentage points). Thus, there is an ownership change with respect to L. For purposes of subsequent transactions, Public L and New Public L will not be segregated into two public groups because a new testing period commences on the day following the change date, January 23, 1988 (i.e., any subsequent testing date will not have a testing period that includes the date of the public offering).

Example (4). The facts are the same as in Example (3), but L establishes that 60,000 shares of the newly issued L stock

were acquired by its shareholders of record on the date of the stock issuance (i.e., members of Public L, referred to as Acquiring Public L) by persons owning 27 percent of the L stock immediately before the stock issuance. Accordingly, L has actual knowledge that New Public L acquired no more than 140,000 shares of L stock in the public offering. Under paragraphs (j)(2)(iii) and (k)(2) of this section, New Public L may be treated as having increased its ownership interest in L by 46⅔ percentage points (140,000 shares acquired in the offering/300,000 shares outstanding). L also has actual knowledge that the members of Public L owning 27 percent of L stock immediately before the stock issuance (27,000 shares/100,000 shares outstanding) own 29 percent of L stock immediately after such issuance ([27,000 shares + 60,000 shares acquired in the offering]/300,000 shares outstanding). Assuming that L chooses to take its actual knowledge into account for purposes of determining whether an ownership change occurred on January 22, 1988, Public L is segregated into two direct public groups immediately before the stock issuance so that the two percentage point increase in the ownership interest in L by Acquiring Public L is taken into account. The total increased ownership interest in L by New Public L and Acquiring Public L on the testing date over their lowest ownership interest during the testing period is 48 ⅔ percent. Thus, no ownership change occurs with respect to L.

Example (5). (i) L is owned entirely by 10,000 unrelated individuals, none of whom own as much as five percent of L stock ("Public L"). P is owned entirely by 1,500 unrelated individuals, none of whom own as much as five percent of P stock ("Public P"). On December 22, 1988, L acquires all of the P stock from Public P in exchange for L stock representing 25 percent of the value of L, in a transaction described in section 368(a)(1)(B).

(ii) Under paragraph (j)(2)(iii)(B)(1) of this section, Public L, the direct public group that owns L stock immediately before and after the transaction to which section 1032 applies, is treated separately from Public P, the direct public group that acquires L stock in the transaction. Because Public P's percentage ownership interest in L increases to only 25 percent (as compared with 0 percent before the acquisition), no ownership change occurs. For purposes of determining whether an ownership change occurs on any testing date with a testing period that includes December 22, 1988, Public L and Public P will continue to be treated as separate 5-percent shareholders.

(iii) See Example (4) in paragraph (j)(3)(iv) of this section for the application of paragraph (j)(2)(iii)(B) of this section to a reorganization under section 368(a)(1)(B) in which the loss corporation is acquired.

(C) Redemption-type transactions—(1) In general. In the case of a transaction in which the loss corporation acquires its stock in exchange for property, each direct public group that exists immediately before the transaction shall be segregated at that time (and thereafter) so that the stock that is acquired in the transaction is treated as owned by a separate public group from each public group that owns the stock that is not acquired. For purposes of the preceding sentence, the term property shall include stock described in section 1504(a)(4) and stock described in paragraph (f)(18)(ii) of this section. Each direct public group that owned the stock that is acquired in the transaction is presumed not to own any such stock immediately after the transaction.

(2) Examples.

Example (1). L is entirely owned by Public L. There are 500,000 shares of L stock outstanding. On July 12, 1988, L acquires 150,000 shares of its stock for cash. Because L's acquisition is a redemption, Public L is segregated into two different public groups immediately before the transaction (and thereafter) so that the redeemed interests ("Public RL") are treated as part of a public group that is separate from the ownership interests that are not redeemed ("Public CL"). Therefore, as a result of the redemption, Public CL's interest in L increases by 30 percentage points (from 70 percent (350,000/500,000) to 100 percent) on the July 12, 1988 testing date. Because the resulting increase is not more than 50 percentage points, no ownership change occurs. For purposes of determining whether an ownership change occurs on any subsequent testing date having a testing period that includes such redemption, Public CL is treated as a 5-percent shareholder whose percentage ownership interests in L increased by 30 percentage points as a result of the redemption.

Example (2). L is entirely owned by Public L. There are 250,000 shares of L common stock outstanding. On April 22, 1988, L acquires 100,000 shares of its outstanding common stock in exchange for 100,000 shares of preferred stock described in section 1504(a)(4). (The transaction thus constitutes a recapitalization within the meaning of section 368(a)(1)(E).) As a result of the recapitalization, which is a transaction described in paragraph (j)(2)(iii)(C) of this section, Public L is segregated into two different public groups immediately before the transaction (and thereafter) so that the stock acquired by L is treated as owned by a public group ("Public RL") that is separate from the public group that owns the stock that is not so acquired ("Public CL"). Therefore, as a result of the transaction, Public CL's interest in L increases by 40 percentage points (from 60 percent to 100 percent). Because the resulting increase is not more than 50 percentage points, no ownership change occurs. For purposes of determining whether an ownership change occurs on any subsequent testing date with a testing period that includes the date of the recapitalization, Public CL is treated as a separate 5-percent shareholder whose percentage ownership interest increased by 40 percentage points as a result of the redemption type transaction.

(D) Acquisition of loss corporation stock as the result of the ownership of a right to acquire stock—(1) In general. In the case of a deemed acquisition of stock of the loss corporation as the result of the ownership of a right issued by the loss corporation to acquire such stock (see paragraph (h)(4) of this section), each direct public group that exists immediately after such acquisition shall be segregated so that each direct public group that existed immediately before the transaction is treated separately from the direct public group that is deemed to acquire stock of the loss corporation as a result of the ownership of the right to acquire such stock. The direct public group that is treated as acquiring stock of the loss corporation in the transaction is presumed not to include any members of any direct public group that existed immediately before the transaction. In applying the rules of paragraph (h)(4) of this section, the segregation rules of this paragraph (j)(2)(iii)(D) shall

apply before making the determination required under that paragraph (h)(4) of this section.

(2) Example.

(i) L has 700,000 shares of common stock outstanding. Public L owns all of the outstanding L common stock. On May 20, 1988, L issues a class of debentures to the public that, in the aggregate, may be converted into 300,000 shares of L common stock. On September 7, 1988, P_1 acquires 210,000 shares of L common stock over a public stock exchange. None of the L debentures have been converted as of that date.

(ii) By virtue of L's issuance of convertible debentures, May 20, 1988 is a testing date. See paragraph (a)(2)(i) of this section. Immediately before the issuance of the convertible debentures, L's only 5-percent shareholder was Public L, a direct public group. Therefore, under paragraph (j)(2)(iii)(D) of this section, Public L must be segregated from the direct public group that would otherwise exist immediately after the transaction for the purpose of applying paragraph (h)(4) of this section, so that any acquisition of L stock through the conversion of L's debentures is treated as made by a public group other than Public L ("New Public L"). Assuming the largest increase in the total percentage stock ownership of New Public L on the testing date (see paragraph (h)(4) of this section), New Public L would have increased its ownership interest in L by 30 percentage points. Therefore, the stock of L would not be treated as acquired pursuant to a deemed conversion of the L debentures on May 20, 1988, under paragraph (h)(4) of this section, because the conversion would not cause an ownership change.

(iii) P_1's acquisition of L common stock results in second testing date. For the purpose of applying paragraph (h)(4) of this section, Public L must again be segregated from the direct public group that would otherwise result from conversion of the debentures, so that a deemed acquisition of L stock through the conversion of L's debentures on September 7, 1988 is treated as made by a public group other than Public L ("New Public L"). As on the previous testing date, New Public L would have increased its ownership interest in L by 30 percentage points if it were treated as having acquired L common stock pursuant to the conversion of the L debentures. The increase in New Public L's ownership, taken together with P_1's 21 percentage point ownership increase in L during the testing period [210,000 shares deemed converted/(700,000 (actual) + 300,000 (deemed) shares outstanding)], results in an ownership change.

(E) Transactions identified in the Internal Revenue Bulletin. Any transaction that is designated by the International Revenue Service in the Internal Revenue Bulletin shall be subject to the rules, as provided in such bulletin, similar to the rules described in this paragraph (j)(2)(iii).

(F) Issuance of rights to acquire loss corporation stock—(1) In general. In the case of any transaction that is described in paragraph (j)(2)(iii) (B), (D) or (E) of this section in which the loss corporation issues rights to acquire its stock to the members of more than one public group, those rights shall be presumed to be exercised pro rata by each such public group as those rights are actually exercised.

(2) Example.

(i) L, which has six million shares outstanding, is owned entirely by Public L and P is owned entirely by Public P. On November 30, 1988, P merges into L in a transaction qualifying under section 368(a)(1)(A) with Public P receiving four million shares of L stock as a result of the reorganization. Under paragraph (j)(2)(iii)(B) of this section, Public L and Public P continue to be treated as separate public groups following the merger. Pursuant to the plan of reorganization, L also issues an amount of warrants in L stock pro rata to Public L and Public P that, if exercised, would result in the issuance of an additional two million shares of L stock. On November 30, 1989, when only one-half of the outstanding warrants have been exercised, A acquires all of the unexercised warrants.

(ii) Without regard to the warrants distributed in reorganization, Public P's ownership interest in L increases by 40 percentage points on November 30, 1988, relative to its lowest ownership interest in L at any time during the testing period (0 percent prior to the merger). For purposes of determining whether an ownership change occurs on November 30, 1988, the segregation rules of paragraphs (j)(2)(iii) (B) and (D) of this section does not require that a third direct public group be separately identified and treated as acquiring the warrants, because L has actual knowledge that Public L and Public P acquired the distributed warrants in proportion to their respective ownership interests in L stock. Because the largest increase in the ownership of L on the testing date results from treating only Public P as exercising the distributing warrants, in which event, its ownership interest would increase by 44.4 percentage points ([four million shares acquired in the merger + 800,000 shares deemed acquired]/10.8 million (actual and deemed) shares outstanding), the issuance of the warrants by L does not cause an ownership change on November 30, 1988.

(iii) Under paragraph (j)(2)(iii)(F)(1) of this section, each actual exercise of warrants to acquire one million shares of L stock between November 30, 1988 and November 30, 1989 is treated as made pro rata by Public L and Public P (600,000 shares to Public L and 400,000 shares to Public P). Accordingly, as a result of the actual exercises of warrants during that period the ownership interests of the only 5-percent shareholders, Public L and Public P, are proportionately increased.

(iv) A's acquisition of all of the outstanding warrants on November 30, 1989 requires the determination whether there has been an ownership change with respect to L, because A would be 5-percent shareholder under paragraph (g)(1)(i) of this section owning 8⅓ percent of the L stock if the acquired warrants were exercised (one million shares deemed acquired/12 million (actual and deemed) shares outstanding). See paragraph (a)(2)(i) of this section. Under paragraph (h)(4)(i) of this section, A is not treated as having exercised those warrants, because an ownership change would not result. (Public P's 36⅔ percentage point increase [(four million shares acquired in the merger + 400,000 shares deemed acquired)/12 million (actual and deemed) shares outstanding] and A's 8⅓ percentage point increase is not greater than 50 percentage points).

(iv) Combination of de minimis public groups— (A) In general. Notwithstanding paragraph (j)(2)(iii)(A) of this section, any public group first identified during a taxable year, as a result of any transaction described in paragraph (j)(2)(iii) (B), (D), (E), or (F) of this section, that owns less than five percent of loss corporation stock may be combined, at the option of the loss corporation, with any other such groups also first identified as

a result of any such transaction that occurs during such taxable year.

(B) Example.

(i) L is widely held with no person owning as much as five percent of the L stock at any time ("Public L"). L's taxable year ends on December 31. On January 1, 1989, L issues a class of debt maturing on December 31, 2019 ("Class A Debentures") with respect to which it will semi-annually issue L stock in discharge of its interest obligation. In addition, L issues an amount of L stock to the public in two separate transactions during 1989. As a percentage of the L stock outstanding at the close of L's taxable year on December 31, 1989, L issued .45 percent of its stock on each of two dates in payment of interest with respect to the Class A Debentures, 4.5 percent of its stock in the first stock offering and six percent of its stock in the second stock offering. During 1990, L did not issue stock other than in payment of interest with respect to the Class A Debentures. As a percentage of L stock outstanding on December 31, 1990, L issued .41 percent of its stock on each of two dates during 1990 with respect to its outstanding debt.

(ii) Under paragraph (h)(4)(x)(E) of this section, L's obligation to issue stock in satisfaction of the interest with respect to the Class A Debentures until December 31, 2019, is not subject to paragraph (h)(4)(i) of this section and thus is taken into account only as such stock is issued.

(iii) The application of the segregation rules of paragraphs (j)(2) (iii)(B) and (iv) of this section require the identification of at least two additional, separate direct public groups during 1989. First, the persons who acquire six percent of L stock in a public offering to which section 1032 applies must be treated as a separate 5-percent shareholder ("Public 1L"). See paragraph (j)(2)(iii)(B) of this section. Even though this group was first identified in 1989, it may not be combined with other public groups also first identified in 1989 because it owns five percent or more of L stock. Second, although each of the three other issuances of L stock during the year ordinarily result in the identification of an additional, separate direct public group, each such direct public group may be combined with the two other such groups into a single public group ("Public 2L"). As of the end of 1989, Public 2L would own a total of 5.4 percent of the stock of L.

(iv) The application of the segregation rules of paragraphs (j)(2) (iii)(B) and (iv) of this section require the identification of at least one additional, direct public group during 1990. Because each additional, direct public group first identified in 1990 acquires less than five percent of L stock, they may be combined into a single public group ("Public 3L") owning .82 percent of the stock of L. Public 3L is treated as a five percent shareholder even though it owns less than five percent of the stock of L. See paragraph (j)(2)(iv)(A) of this section.

(v) Multiple transactions—(A) In general. If a transaction (or any part thereof) is described by more than one subdivision of paragraph (j)(2)(iii) of this section, each such subdivision shall apply to the transaction (or each part of the transaction) in the manner that results in the largest increase in the percentage stock ownership by the 5-percent shareholders.

(B) Example.

(i) All of the common stock of L is owned by 1,000 unrelated persons, none of whom owns as much as five percent of the L stock ("Public CL"). L has outstanding a class of preferred stock described in section 1504(a)(4) that is owned in equal amounts by 500 unrelated persons ("Public PL").

(ii) On September 4, 1988, L rearranges its capital structure by redeeming 70 percent of the common stock owned by 700 of the shareholders in exchange for cash. In addition, all of the preferred stock is exchanged for a new class of common stock (nonvoting) representing 40 percent of the value of L.

(iii) With respect to the part of the transaction that is treated as a redemption under paragraph (j)(2)(iii)(C) of this section (the exchange of common stock for cash), Public CL is segregated into two different public groups immediately before the transaction (and thereafter) so that the owners of the redeemed stock ("Public RCL") are treated as part of a public group that is separate from the public group comprised of the owners of the stock that is not redeemed ("Public CCL"). As a result of the redemption, Public CCL's percentage ownership interest in L thus increases by 30 percentage points from 30 percent to 60 percent (taking into account all transactions occurring on the testing date, because the change in ownership is measured under paragraph (a)(1)(i) of this section by reference to each 5-percent shareholder's ownership interest immediately after the testing date). In addition, the exchange of preferred stock for nonvoting common stock is a transaction to which section 1032 applies. Under paragraph (j)(2)(v) of this section, the part of the transaction to which section 1032 applies is also subject to the segregation rules in the manner specified in paragraph (j)(2)(iii)(B) of this section. Accordingly, Public PL, the direct public group that acquires L nonvoting common stock in exchange for L preferred stock, must be treated as a separate public group from the other direct public groups, Public CCL and Public RCL. As a separate public group, Public PL's percentage stock ownership in L increases by 40 points (as compared to 0 percent prior to the transaction).

(iv) In summary, Public CCL increases its percentage ownership in L by 30 percentage points and Public PL increases its percentage ownership by 40 percentage points. Consequently, an ownership change occurs with respect to L on September 4, 1988.

(vi) Acquisitions made by either a 5-percent shareholder or the loss corporation following application of the segregation rules. Unless a different proportion is established by either the loss corporation or the Internal Revenue Service, the acquisition of loss corporation stock by either a 5-percent shareholder or the loss corporation on any date on which more than one public group of the loss corporation exists by virtue of the application of the rules of this paragraph (j)(2) shall be treated as being made proportionately from each public group existing immediately before such acquisition. See paragraph (g)(5)(i)(B) of this section for the application of this paragraph to the ownership interest of a 5-percent shareholder that owns less than five percent of the stock of the loss corporation on the testing date.

(3) Segregation rules applicable to transactions involving first tier entities or higher tier entities—(i) Dispositions. If a loss corporation is owned, in whole or in part, by a public group (or groups), the rules of paragraphs (j)(2) (iii)(B) and (iv) of this section shall apply to any transaction in which a first tier entity or an individual that owns a

direct ownership interest in the loss corporation of five percent or more transfers a direct ownership interest in the loss corporation to public shareholders. Therefore, each direct public group that exists immediately after such a disposition shall be segregated so that the ownership interests of each public group that existed immediately before the transaction are treated separately from the public group that acquires stock of the loss corporation as a result of the disposition by the individual or first tier entity. The principles of this paragraph (j)(3)(i) shall also apply to transactions in which an ownership interest in a higher tier entity that owns five percent or more of the loss corporation (determined without regard to the application of paragraph (h)(2)(i)(A) of this section) or a first tier entity is transferred to a public owner or 5-percent owner who is not a 5-percent shareholder.

(ii) Example.

(A) L is owned equally by Public L, P and E. Public L consists of 150 equal, unrelated shareholders. P is owned by Public P, a group consisting of 1,500 equal, unrelated shareholders. E is a partnership and none of its partners are 5-percent owners. On October 22, 1988, E sells its entire interest in L over a public stock exchange. No individual or entity acquires as much as five percent of L's stock as the result of E's disposition of the L stock.

(B) The disposition of the L stock by E is a transaction that causes the segregation of L's direct public group that exists immediately before the transaction (Public L) from the direct public group that acquires L stock in the transaction (Public EL). As a result, L has three 5-percent shareholders, Public L, Public P (through the application of paragraph (j)(1) of this section) and Public EL, each of which owns 33⅓ percent of L stock. Therefore, Public EL is a 5-percent shareholder that has increased its ownership interest in L by 33⅓ percentage points during the testing period. For purposes of subsequent transactions, Public L and Public EL will continue to be treated as separate direct public groups until any subsequent testing date that does not have a testing period that includes E's disposition of L stock.

(iii) Other transactions affecting direct public groups of a first tier entity or higher tier entity. The rules of paragraphs (j)(2) (i), (iii), (iv) and (v) of this section shall apply to transactions described in such paragraphs that involve either a higher tier entity that owns five percent or more of the loss corporation (determined without regard to the application of paragraph (h)(2)(i)(A) of this section) or a first tier entity. In applying those rules for purposes of this paragraph (j)(3)(iii), each direct public group of a first tier entity or a higher tier entity is any public group of any such entity identified in paragraph (j)(1)(iv) (A) or (B) of this section or resulting from the application of this paragraph (j)(3)(iii). The principles of paragraph (j)(2)(iii)(C) of this section also shall apply to any transaction that has the effect of a redemption-type transaction (e.g., an acquisition by the loss corporation of stock in a first tier entity).

(iv) Examples.

Example (1). The facts are the same as in Example (1) of paragraph (j)(2)(iii)(B)(2) of this section, except that Public L and P_1 own 40 percent and 60 percent, respectively, of the stock of HC which, in turn, owns 100 percent of L and HC merges into P_2. Under paragraph (j)(3)(iii) of this section, the rules of paragraph (j)(2)(iii)(B) of this section apply to segregate HC's direct public group (Public L) immediately before the merger from the direct public group (Public P_2) that acquires loss corporation stock in the merger. The consequences of the merger of HC into P_2 are thus the same as in Example (1) of paragraph (j)(2)(iii)(B)(2) of this section.

Example (2). (i) Twenty-five individual shareholders each own four percent of L ("Public L"). Public L is therefore the only 5-percent shareholder of L. Each of the shareholders of L contribute their L stock to a newly formed corporation, HC. In exchange for their contribution of L stock, HC issues 100 percent of each of its two classes of common stock (voting and nonvoting).

(ii) The formation of HC, a first tier entity of L, is a transaction to which section 1032 applies. Under paragraph (j)(3)(iii) of this section, the rules of paragraphs (j)(1)(iii) and (j)(2)(iii)(B) of this section are applied to this transaction with the result that the shareholders of HC, immediately after the issuance of HC stock, are presumed not to include any persons that previously had a direct or indirect ownership interest in L. The presumption underlying those rules, however, is rebutted by establishing that all of the HC stock outstanding immediately after the transaction was issued solely in exchange for L stock. Thus, Public HC (immediately after the transaction) and Public L (immediately before the transaction) would be treated owned by the same direct public group.

Example (3). (i) All of the stock of L is owned by unrelated shareholders, none of whom owns as much as five percent of L stock. P also is owned by unrelated shareholders, none of whom owns as much as five percent of P stock. On November 22, 1988, P incorporates P_1 with a contribution of P stock. Immediately thereafter, P_1 acquires all of the properties of L in exchange for its P stock in a forward triangular merger qualifying under sections 368 (a)(1)(A) and (a)(2)(D). The P stock transferred by P_1 equals 45 percent of the total outstanding P stock.

(ii) Immediately before the merger of L into P_1, P's only 5-percent shareholder was Public P, a direct public group of P. The rules of paragraph (j)(2)(iii)(B) of this section thus apply to the transaction under paragraph (j)(3)(i) of this section since P, a first tier entity, is a party to the reorganization described in such paragraph. Although Public P does not acquire any stock in the merger, it is treated as acquiring stock in the loss corporation, P_1, because such corporation succeeds to the pre-change losses of L in a transaction to which 381(a) applies. As a result of the merger, Public P, the direct public group of P that exists immediately before the merger, must be segregated from the direct public groups acquiring P stock in the reorganization. Public P is, therefore, treated as acquiring 55 percent of the outstanding stock of the loss corporation, P_1, in the transaction. The transaction, therefore, results in an ownership change for P_1.

Example (4). (i) L is owned 20 percent by A and 80 percent by 1,000 unrelated individuals and entities, none of whom owns as much as five percent of L stock ("Public L"). P is owned 10 percent by B, 40 percent by E, and 50 percent by 5,000 unrelated individuals, none of whom owns as much as five percent of P stock ("Public P"). E is owned 30 percent by C

and 70 percent by 30 unrelated individuals, none of whom owns as much as five percent of E ("Public E").

(ii) On October 31, 1987, P acquires all of the L stock from A and Public L in exchange for P stock representing 20 percent of the value of P (determined immediately after the acquisition) in a transaction described in section 368(a)(1)(B). After the acquisition, P is owned eight percent by B, 32 percent by E, four percent by A, and 56 percent by 6,000 unrelated individuals, none of whom owns as much as five percent of P. Because L is wholly owned by P immediately after the acquisition, L, under paragraph (j)(1) of this section, is treated as owned as follows: Eight percent by B, 9.6 percent by C (through C's ownership interest in E, a highest tier entity, and E's ownership interest in P, a first tier entity), 22.4 percent by Public E (through its ownership interest in E and E's ownership interest in P), four percent by A, and 56 percent by the shareholders who each own less than five percent of L through their ownership interest in P.

(iii) Under paragraph (j)(3)(iii) of this section, the rules of paragraph (j)(2)(iii)(B) of this section apply to the reorganization since the transaction involved a first tier entity of L. Thus, the direct public group of P that exists immediately after the transaction must be segregated into two public groups—the direct public group of P that existed immediately before the acquisition (Public P) is treated separately from the direct public group consisting of the persons who acquire P stock in the transaction (Public L). Accordingly, immediately after the reorganization, Public P and Public L own 40 percent and 16 percent of L, respectively. See paragraph (h) of this section. (Under paragraph (g)(5)(ii)(B) of this section, L may treat the four percent of L stock owned by A immediately after the reorganization as the amount of L stock owned by A for each subsequent testing date having a testing period that includes the reorganization.)

(iv) In summary, after applying the rules of paragraphs (j) (1) and (3) of this section, L is treated as owned as follows:

5-percent shareholder	Percentage ownership interest
A	4.0
B	8.0
C	9.6
Public E	22.4
Public P	40.0
Public L	16.0

(v) The reorganization results in an ownership change, because B, C, Public E and Public P, all of whom are 5-percent shareholders, together have increased their percentage ownership in L by 80 percentage points as compared to their lowest percentage ownership in L at any time during the testing period (0 percent prior to the acquisition).

(v) Acquisitions made by a 5-percent shareholder, a higher tier entity, or a first tier entity following application of the segregation rules. The rules of paragraph (j)(2)(vi) of this section shall apply to the acquisition of an ownership interest in a first tier entity (or higher tier entity) if more than one direct public group of any such entity are segregated under the rules of this paragraph (j)(3). Accordingly, an acquisition by such an entity or a 5-percent shareholder of any ownership interest in such an entity shall be treated as made proportionately from the direct public groups resulting from the application of this paragraph (j)(3).

(k) Operating rules—(1) Presumptions regarding stock ownership. Subject to paragraphs (k) (2) and (4) of this section, for purposes of applying paragraphs (f), (g), (h), and (j)(1) of this section—

(i) Stock subject to regulation by the Securities and Exchange Commission. With respect to loss corporation stock that is described in Rule 13d-1(d) of Regulation 13D-G (or any rule or regulation to generally the same effect), promulgated by the Securities and Exchange Commission under the Securities and Exchange Act of 1934 ("registered stock"), a loss corporation may rely on the existence and absence of filings of Schedules 13D and 13G (or any similar schedules) as of any date to identify all of the corporation's shareholders who have a direct ownership interest of five percent or more (both individuals and first tier entities) on such date. A loss corporation may similarly rely on the existence and absence of such filings as of any date with respect to registered stock of any first tier entity or any higher tier entity to identify the 5-percent owners of any such entities on such date who indirectly own five percent or more of the loss corporation stock, and are thus 5-percent shareholders, and to identify any higher tier entities of such entities.

(ii) Statements under penalties of perjury. A loss corporation may rely on a statement, signed under penalties of perjury, by an officer, director, partner, trustee, executor or similar responsible person, on behalf of a first tier entity or a higher tier entity to establish the extent, if any, to which the ownership interests of any 5-percent owners or higher tier entities with respect to such entities have changed during a testing period. A loss corporation may not rely on such a statement (A) that it knows to be false or (B) that is made by either a first tier entity or higher tier entity that owns 50 percent or more of the stock of the loss corporation. For purposes of the preceding sentence, any first tier entities and higher tier entities that are known by the loss corporation to be members of the same controlled group (within the meaning of section 267(f)) shall be treated as one corporation.

(2) Actual knowledge regarding stock ownership. For purposes of this section (other than paragraphs (g)(5) and (j)(1)(v) of this section), to the extent that the loss corporation has actual knowledge of stock ownership on any testing date (or acquires such knowledge before the date that

the income tax return is filed for the taxable year in which the testing date occurs) by—

(i) An individual who would be a 5-percent shareholder, but for the application of paragraphs (h)(2)(iii), (h)(6)(iii) or (g)(2) of this section, or

(ii) A 5-percent shareholder that would be taken into account, but for paragraphs (h)(2)(iii), (h)(6)(iii) or (g)(3) of this section,

the loss corporation must take such stock ownership into account for purposes of determining whether an ownership change has occurred on that testing date. If a loss corporation acquires such knowledge after such income tax return is filed, the loss corporation may take such ownership into account for purposes of determining whether an ownership change occurred on that testing date and, if appropriate, file an amended income tax return (subject to any applicable statute of limitations). To the extent the loss corporation has actual knowledge on or after any testing date regarding the ownership interest in the loss corporation by members of one public group (described in paragraphs (g)(1) (ii), (iii) or (iv) of this section) and the ownership interest of those members in the loss corporation as members in another such public group, the loss corporation may take such ownership into account for purposes of determining whether an ownership change occurred on that testing date.

(3) Duty to inquire as to actual stock ownership in the loss corporation. For purposes of this section, the loss corporation is required to determine the stock ownership on each testing date (and, except as otherwise provided in this section, the changes in the stock ownership during the testing period) of—

(i) Any individual shareholder who has a direct ownership interest of five percent or more in the loss corporation,

(ii) Any first tier entity,

(iii) Any higher tier entity that has an indirect ownership interest of five percent or more in the loss corporation (determined without regard to paragraph (h)(2)(i)(A) of this section), and

(iv) Any 5-percent owner who indirectly owns five percent or more of the stock of the loss corporation in his capacity as a 5-percent owner in any one first tier entity or higher tier entity.

The loss corporation does not have any obligation to inquire or to determine facts relating to the stock ownership of any shareholders other than those described in the preceding sentence. In addition, the loss corporation does not have any obligation to inquire or to determine if the actual facts relating to the stock ownership of any shareholder are consistent with the ownership interests of the loss corporation as determined by applying the presumptions and other rules of paragraphs (g), (h), (j) or (k)(1) of this section.

(4) Ownership interest structured to avoid the section 382 limitation. For purposes of this section, if the ownership interests in a loss corporation are structured by a person with a direct or indirect ownership interest in the loss corporation to avoid treating a person as a 5-percent shareholder (or to permit the loss corporation to rely on the presumption provided in paragraph (g)(5)(i)(B) of this section) for a principal purpose of circumventing the section 382 limitation, then—

(i) Paragraph (h)(2)(iii) of this section shall not apply with respect to the ownership interests so structured and the constructive ownership rules of paragraph (h)(2)(i) of this section shall thus apply to attribute stock from any entity without regard to the amount of stock it owns in the loss corporation or any other corporation,

(ii) Paragraphs (g) (2) and (3) of this section shall be modified with respect to the ownership interests so structured so that the ownership interest of a person includes all of an individual's direct and indirect ownership in the loss corporation, without regard to whether each such interest represents five percent or more of the stock of the loss corporation, and

(iii) Paragraph (g)(5)(i)(B) of this section shall not apply with respect to the ownership interests so structured so that the ownership interest of a person takes into account his actual ownership interest in the loss corporation.

This paragraph (k)(4) shall apply, however, only if application would result in an ownership change.

(5) Example.

L is owned by 25 individuals who each own four percent of the outstanding L stock. A purchases 40 percent of L stock from such shareholders on August 13, 1988. Thereafter, B plans to acquire 15 percent of the L stock. B is advised concerning the potential application of section 382 to L. On February 1, 1989, B acquires a 15 percent interest in L pursuant to a program in which each of four corporations, P_1 through P_4, each of which is wholly-owned by B, acquire a 3.75 percent interest in L. A principal purpose of acquiring the L stock through four corporations is to avoid treating B as owning any ownership interest in L amounting to as much as five percent, and thus to circumvent the section 382 limitation by avoiding an ownership change. Under paragraph (k)(4) of this section, the limitation on the constructive ownership rules of paragraph (h)(2)(iii) of this section are disregarded and B is treated as a 5-percent shareholder owning 15 percent of the

stock of L by virtue of his ownership interests in P_1 through P_4, notwithstanding paragraph (g)(2) of this section. Accordingly, an ownership change occurs with respect to L.

(6) First tier entity or higher tier entity that is a foreign corporation or entity. [Reserved]

(*l*) Changes in percentage ownership which are attributable to fluctuations in value. [Reserved.]

(m) Effective Date—(1) In general. Except as provided in this paragraph (m), section 382 shall apply to any ownership change that occurs immediately after an owner shift or an equity structure shift that occurs after December 31, 1986, or any other event occurring after such date that requires the determination of whether an ownership change has occurred under paragraph (a)(2)(i) of this section. In the case of an equity structure shift (including an equity structure shift that also constitutes an owner shift), any equity structure shift completed pursuant to a plan of reorganization adopted before January 1, 1987, shall be treated as occurring on the date such plan was adopted. Therefore, section 382 shall apply to any ownership change occurring immediately after—

(i) An owner shift (excluding an owner shift that also constitutes an equity structure shift) that occurs on or after January 1, 1987,

(ii) An equity structure shift that occurs after December 31, 1986, if it is completed pursuant to a plan of reorganization adopted on or after January 1, 1987, or

(iii) Any transfer or issuance of an option, or other interest that is similar to an option, that occurs on or after January 1, 1987 and that is taken into account under paragraph (a)(2)(i) of this section.

With respect to equity structure shifts completed pursuant to plans adopted before January 1, 1987, section 382 shall be inapplicable only if the equity structure shift that is treated as occurring on the date the plan of reorganization for such shift was adopted (or other event occurring after the adoption of such plan) results in an ownership change before January 1, 1987. In that event, a new testing period for the loss corporation shall begin on the day after such ownership change.

(2) Plan of reorganization. For purposes of paragraph (m)(1) of this section, a plan of reorganization shall be treated as adopted on the earlier of—

(i) The first date that the boards of directors of all the parties to the reorganization have adopted the plan or have recommended adoption to their shareholders, or

(ii) The date the shareholders approve such reorganization.

If there is an ownership change with respect to a subsidiary as the result of a reorganization of the parent, the treatment of the subsidiary under this paragraph (m)(2) shall be governed by the classification of the parent-level transaction. For purposes of the preceding sentence, a corporation shall be treated as a subsidiary of another corporation only if the other corporation owns stock in that corporation meeting the requirements of section 1504(a)(2).

(3) Earliest commencement of the testing period. For purposes of determining if an ownership change has occurred at any time after May 5, 1986, the testing period shall begin no earlier than May 6, 1986. Under paragraph (d)(4) of this section, therefore, shifts in the ownership of stock of the loss corporation prior to May 6, 1986 are disregarded.

(4) Transitional rules—(i) Rules provided in paragraph (j) of this section for testing dates before September 4, 1987. For purposes of determining whether an ownership change occurs for any testing date before September 4, 1987—

(A) The rules of paragraph (j)(1) of this section shall apply only to stock of the loss corporation acquired after May 5, 1986, by any first tier entity or higher tier entity and shall not apply to any stock acquired by such an entity on or before that date,

(B) The rules of paragraph (j)(2) of this section shall apply only to equity structure shifts in which more than one corporation is a party to the reorganization and shall not apply to any other transactions, and

(C) The rules of paragraph (j)(3) of this section shall apply only to—

(1) Dispositions of stock acquired by an individual, a first tier entity or higher tier entity after May 5, 1986 (and shall not apply to dispositions of stock acquired on or before such date), and

(2) Equity structure shifts in which more than one corporation is a party to the reorganization (and shall not apply to any other transactions).

For any testing date before September 4, 1987, however, the loss corporation is permitted to apply all of the rules of paragraph (j) of this section. A loss corporation that applies the rules of paragraph (j) of this section under the preceding sentence must apply all of the rules of such paragraph in

determining whether any ownership change occurs on any testing dates after May 5, 1986.

(ii) Example.

(i) L is owned entirely by 10,000 unrelated individuals, none of whom owns as much as five percent of the stock of L ("Public L"). P is owned entirely by 1,000 unrelated individuals, none of whom owns as much as five percent of the stock of P ("Public P").

(ii) Between March 1, 1987 and June 1, 1987, P acquires 45 percent of L stock in a series of transactions. On June 15, 1987, L redeems 20 percent of the L stock from Public L.

(iii) Under paragraph (m)(4)(i)(A) of this section, the rules of paragraph (j)(1) of this section apply to the acquisitions made by P, because they occurred after May 5, 1986. Accordingly, following those acquisitions, the stock of L is owned 45 percent by Public P and 55 percent by Public L. Because the increase in the percentage ownership by Public P as a result of P's stock purchases is not more than 50 percent, no ownership change occurs as the result of P's purchases.

(iv) On or after September 4, 1987, the rules of paragraph (j)(2)(iii)(C) of this section apply to treat any L stock that is redeemed as owned by a public group that is separate from the public group owning the stock that is not redeemed. (Under paragraph (j)(2)(iii)(C) of this section, the continuing shareholders of Public L, who owned 35 percent of the stock of L before the redemption ([55 percent—20 percent]/100 percent) increase their ownership interest in L by 8.8 percentage points as a result of such redemption (43.8 percent—35 percent)). Those rules, however, do not apply to the June 15, 1987 redemption because it occurs before the date that paragraph (j)(2)(iii) of this section generally is effective. (Until September 4, 1987, paragraph (j)(2)(iii) of this section generally is effective only for equity structure shifts in which more than one corporation is a party to the reorganization.) Solely because of the application of paragraph (j)(1) of this section to P's acquisitions of L stock, Public P's ownership interest in L as a result of the redemption has increased from 45 percentage points to 56.2 percentage points which, compared to its lowest percentage ownership interest at any time during the testing period (0 percent prior to March 1, 1987), is a more than 50 percentage point increase thus causing an ownership change with respect to L on June 15, 1987.

(iii) Rules provided in paragraph (j) of this section for testing dates on or after September 4, 1987. For purposes of determining whether an ownership change occurs for any testing date on or after September 4, 1987, the rules of paragraphs (j) (2) and (3) of this section shall not apply to identify any public group resulting from—

(A) Any transaction described in such paragraphs (j) (2) and (3), unless that transaction is also described in paragraph (m)(4)(i) (B) or (C) of this section, or

(B) Any disposition of stock acquired on or before May 5, 1986, but only if such disposition or other transaction occurs before September 4, 1987. Thus, for example, the rules of paragraph (j)(2)(iii)(D) of this section shall apply only to rights to acquire stock of the loss corporation issued on or after such date.

(iv) Rules provided in paragraphs (f)(18) (ii) and (iii) of this section. For purposes of determining whether an ownership change occurs for any testing date, the rules of paragraphs (f)(18) (ii) and (iii) of this section apply only to stock (or any other ownership interest) that is—

(A) Issued on or after September 4, 1987, or

(B) Transferred to (or by) a person who is a 5-percent shareholder (or would be a 5-percent shareholder if paragraph (f)(18)(iii) of this section were applicable) on or after September 4, 1987.

(v) Rules provided in paragraph (a)(2)(ii) of this section. The information statement required under paragraph (a)(2)(ii) of this section is not required to be filed with respect to any taxable year for which the due date (including extensions) of the income tax return of the loss corporation is on or before October 5, 1987.

(5) Bankruptcy proceedings—(i) In general. In the case of a reorganization described in section 368(a)(1)(G) or an exchange of debt for stock in a Title 11 or similar case (within the meaning of section 368(a)(3)), section 382 shall not apply to any ownership change resulting from such a reorganization or proceeding if a petition in such case was filed with the court before August 14, 1986. Accordingly, any shift in ownership in the loss corporation arising out of such reorganization or proceeding shall not be taken into account for purposes of determining whether an ownership change occurs on any testing date that occurs after December 31, 1986.

(ii) Example.

(i) L filed a petition in bankruptcy on September 29, 1985. As a result of a title 11 bankruptcy reorganization of L that is confirmed by a court on February 2, 1988, there is a shift in the ownership of L so that JK increased her interest in L by 24 percentage points relative to her lowest ownership interest in L during the testing period. JK is the only 5-percent shareholder of L following the reorganization whose interest in L increased as a result of the transaction. On December 25, 1988, GK purchases 42 percent of the outstanding stock of L from shareholders other than JK.

(ii) There is no ownership change on December 25, 1988 because the 24 percentage point increase in JK's ownership interest in L is not taken into account under paragraph (m)(6)(i) of this section.

(iii) The facts are the same as in (i), except that the acquisitions by JK and GK occurred on August 5, 1986 and September 26, 1986, respectively. Because paragraph (m)(6)(i) of this section is only applicable with respect to the determination of whether an ownership change has occurred on any testing date that occurs after December 31, 1986, there is an ownership change as a result of GK's acquisition on September 26, 1986. Accordingly, section 382 is inapplicable to such ownership change under paragraph (m)(1) of this section because it occurred prior to January 1, 1987. Under paragraph

(d)(2) of this section, the testing period for determining whether an ownership change occurs on any subsequent testing date shall commence no earlier than September 27, 1986.

(6) Transactions of domestic building and loan associations. The rules of paragraph (j)(2)(iii)(B) of this section (and the application of those rules by virtue of paragraph (j)(3) of this section) shall not apply to a public offering of stock by a domestic building and loan association described in section 591 (or any corporation that owns stock in the association meeting the requirements of section 1504(a)(2)) prior to January 1, 1989. In the case of any transaction described in the preceding sentence, any transitory ownership of stock by any entity that is an underwriter shall be disregarded so that the rules of paragraph (j)(1) of this section shall not apply to treat such stock as owned by the owners of the underwriter and thus the rules of paragraph (j)(3)(i) of this section shall not apply to the disposition of such stock by the underwriter. For purposes of this paragraph (m)(7)—

(i) Ownership shall be considered transitory only with respect to an underwriter acquiring stock in a firm commitment underwriting to the extent the stock is disposed of pursuant to the offer (but in no event later than sixty (60) days after the initial offering) and,

(ii) To the extent a transaction may be described both by paragraph (j)(2)(iii)(B) of this section and any other provision of paragraph (j)(2)(iii) or (3) of this section, paragraph (j)(2)(v)(A) of this section shall not apply and the transaction shall be treated as described solely by paragraph (j)(2)(iii)(B) of this section.

(7) Transactions not subject to section 382—(i) Application of old section 382. Old section 382 shall not apply to a loss corporation on or after the date on which an ownership change occurs, but only if such ownership change results in the application of the section 382 limitation (as defined in section 382(b)) with respect to the loss corporation.

(ii) Effect on testing period. The application of old section 382 to a transaction is disregarded for purposes of paragraph (d)(2) of this section unless the transaction that results in such application is the last component of an ownership change after May 5, 1986 that is not subject to section 382 under the effective date rules of this paragraph (m) (e.g., an ownership change occurring as the result of an individual's purchase of more than 50 percent of L stock on any date on or before December 31, 1986).

(iii) Termination of old section 382. [Reserved]

(8) Options issued or transferred before January 1, 1987—(i) Options issued before May 6, 1986. An option issued before May 6, 1986, is subject to the rules of paragraph (h)(4) of this section only if it is transferred by (or to) a 5-percent shareholder (or a person who would be a 5-percent shareholder if the option were treated as exercised) on or after such date. In all other cases, such an option shall not be subject to paragraph (h)(4)(i) of this section, but shall be subject to paragraph (h)(4)(xii) of this section. Thus, for example, a warrant to acquire stock of the loss corporation issued before May 6, 1986 shall not be subject to paragraph (h)(4) of this section unless the warrant is transferred by (or to) a 5-percent shareholder. The exercise of such a warrant, however, would be taken into account as required by this paragraph (m)(8)(i) and paragraph (h)(4)(xii) of this section.

(ii) Options issued on or after May 6, 1986 and before September 18, 1986. An option issued or transferred on or after May 6, 1986, and before September 18, 1986, is subject to the rules of paragraph (h)(4) of this section.

(iii) Options issued on or after September 18, 1986 and before January 1, 1987. An option issued or transferred on or after September 18, 1986, and before January 1, 1987, is subject to the rules of paragraph (h)(4) of this section, except that the option shall be treated for purposes of this section as if it never had been issued in the event that either—

(A) The option lapses unexercised or is irrevocably forfeited by the holder thereof, or

(B) On the date the option was issued, there was no significant likelihood that such option would be exercised within the five-year period from the date of such issuance and a purpose for the issuance of the option was to cause an ownership change prior to January 1, 1987.

(9) Examples. The rules of this paragraph (m) may be illustrated by the following examples.

Example (1). (i) A owns all 100 outstanding shares of L stock. A sells 11 shares to B on January 1, 1986. The January 1, 1986 testing date is disregarded under paragraph (m)(3) of this section. A sells another 40 shares to B on January 1, 1988. B's second stock purchase is an owner shift that does not result in an ownership change. B's percentage ownership interest on the testing date (51 percent) is only 40 percentage points greater than the lowest percentage of L stock owned by B at any time during the testing period (11 percent on and after May 6, 1986).

(ii) The facts are the same as in (i). In addition A sells 20 shares of his L stock to C on July 1, 1990. C's stock purchase is an owner shift. Because B and C together have increased

their respective ownership interests in L by 40 and 20 percentage points relative to their lowest percentage stock ownership interests in L at any time during the testing period, C's purchase causes an ownership change. The testing period for any subsequent ownership change begins on the first day following C's acquisition, July 2, 1990.

Example (2). (i) C has owned 100 percent of L since March 22, 1980. On October 13, 1986, P merges into L. As a result of the merger, 40 percent of L stock is acquired by A, the sole shareholder of P. The merger of P into L is both an equity structure shift and an owner shift. The transaction, however, is not an ownership change with respect to L, because A's percentage ownership interest has increased by only 40 percentage points. On August 22, 1987, B purchases 15 percent of the L stock from C. B's purchase constitutes an owner shift resulting in an ownership change that is subject to section 382 because the aggregate increases in percentage ownership by B and C (respectively 40 percent and 15 percent) is more than 50 percentage points.

(ii) The facts are the same as in (i), except that the plan of reorganization is adopted on October 13, 1986, and the merger is completed on July 22, 1987. The result is the same as in (i).

(iii) The facts are the same as in (ii), except that the reorganization is completed on August 22, 1987, and B's purchase of the L stock occurs one month earlier, on July 22, 1987. Assume that after the reorganization on August 22, 1987, A and B own 40 percent and 15 percent, respectively, of L stock. Although the merger occurred pursuant to a plan of reorganization adopted before 1987, L is subject to section 382 following the equity structure shift, because the merger would not have caused an ownership change if it had been completed in 1986 after the commencement of the L's testing period.

(iv) The facts are the same as in (ii), except that B's purchase occurs on June 7, 1986. Assume that immediately after the reorganization on August 22, 1987, A and B own 40 percent and 15 percent, respectively, of L stock. Since the reorganization pursuant to a plan adopted before 1987, taken together with the other shifts in the ownership of L's stock between May 5, 1986, and December 31, 1986, would have caused an ownership change, section 382 does not apply as a result of the merger. Since an ownership change occurs as a result of the merger, L's testing period for purposes of any subsequent ownership change begins on October 14, 1986.

(v) The facts are the same as in (iv), except that B makes an additional purchase from C of one percent of L's stock on February 14, 1987. The result is the same as in (iv). B's additional purchase, however, is taken into account for the purpose of determining whether there is a second ownership change with respect to L.

[T.D. 8149, 52 FR 29675, Aug. 11, 1987]

§ 1.382(a)–1 Purchase of a corporation and change in its trade or business.

(a) In general. (1) Section 382(a) provides for the complete elimination of the net operating loss carryovers of a corporation (hereinafter called a "loss corporation") if certain circumstances exist. In general, section 382(a) applies only if, at the end of a loss corporation's taxable year, there has been a change (occurring in specified ways) since the beginning of such year, or since the beginning of the prior taxable year, of at least 50 percent in the ownership of the corporation's outstanding stock (hereinafter called a "change of ownership"), and only if the corporation has not continued to carry on substantially the same trade or business as that conducted before such change. If section 382(a) is applicable at the end of a taxable year, then the entire net operating loss carryovers from prior taxable years of such corporation are excluded in computing the net operating loss deduction for such taxable year and for subsequent taxable years.

(2) For purposes of this section, (i) section 318(a) shall apply in determining ownership of stock, except that section 318(a)(2)(C) and (3)(C) shall be applied without regard to the 50-percent limitation contained therein, and (ii) stock acquired by the exercise of an option shall be considered as having been acquired on the date the option was acquired. Thus, if A acquires on December 15, 1959, an option to purchase 50 percent of the outstanding stock of X Corporation and if A acquires the stock by exercising the option on January 15, 1961, A will be considered as having purchased the stock on December 15, 1959.

(3) For the definition of the term "stock" as used in this section, see § 1.382(c)–1.

(b) Circumstances under which section 382(a) is applicable. Section 382(a) applies if, at the end of a taxable year of a loss corporation, all of the following circumstances exist:

(1) Any one or more of those persons described in paragraph (c) of this section own, actually and constructively, a percentage of the total fair market value of the outstanding stock of such corporation which is at least 50 percentage points more than such person or persons owned at the beginning of such taxable year or at the beginning of the prior taxable year;

(2) The increase in percentage points referred to in subparagraph (1) of this paragraph is attributable to (i) a purchase or purchases (as defined in section 382(a)(4) and paragraph (e) of this section) by the person or persons specified in subparagraph (1) of this paragraph of such stock or the stock of another corporation owning stock in such loss corporation, (ii) the purchase or purchases by such person or persons of an interest in a partnership or trust owning stock in such loss corporation, (iii) a decrease in the amount of outstanding stock of such loss corporation or in the amount of outstanding stock of another corporation owning stock in such loss corporation, except a decrease resulting from a redemption to pay death taxes to which section 303 applies, or (iv) a combination of

the transactions described in subdivisions (i), (ii), and (iii) of this subparagraph; and

(3) The loss corporation has not continued to carry on a trade or business substantially the same as that conducted before any increase in percentage points described in subparagraph (2) of this paragraph.

(c) Description of person or persons. (1) The persons specified in paragraph (b)(1) of this section shall be the 10 persons who own, actually and constructively, the greatest percentage of the fair market value of the outstanding stock of a loss corporation at the end of a taxable year (or such lesser number as there are persons owning the outstanding stock at the end of such taxable year), except that if any two or more persons own the same percentage of such stock and it is necessary to include one such person in order to select the 10 persons, then all of such persons shall be included. Any such persons so selected who are so related that stock owned by one is attributed to another under the constructive ownership rule specified in paragraph (a)(2) of this section shall be considered as only one person solely for the purpose of selecting such 10 persons. Although considered as one person for purposes of selecting such 10 persons, such related persons are considered as separate persons for all other purposes of section 382(a).

(2) In selecting the 10 persons (more or less) described in subparagraph (1) of this paragraph, the following procedure shall be used:

(i) First, determine those persons who own, actually and constructively, stock of the loss corporation and determine the fair market value of the stock owned, actually and constructively by such persons.

(ii) Second, select from such persons the number of persons required by the first sentence of subparagraph (1) of this paragraph.

(iii) Third, if any of the persons so selected are so related that stock of one is attributed to another under the rule specified in paragraph (a)(2) of this section, such persons shall be considered as one person.

(iv) Fourth, if, as the result of considering two or more persons as one person, the number of persons previously selected drops below ten, additional persons shall be selected in the manner prescribed in subdivision (ii) of this subparagraph.

(v) Finally, if any such additional persons are related under the rule specified in paragraph (a)(2) of this section to persons previously selected, or to one another, then the principles of subdivisions (iii) and (iv) of this subparagraph shall again be applied.

(3) The application of this paragraph may be illustrated by the following example:

Example. (i) Assume that the outstanding stock of a loss corporation (based on fair market value) is owned, actually and constructively, at the end of a taxable year by the following individuals and partnership:

Person	Percentage of stock actually owned	Percentage of stock owned actually and constructively
A	15	15
B (A's wife)	0	15
C (A's son)	0	15
D (A's daughter)	0	15
GH (a partnership)	0	20
E	16	20
F	15	15
G (a 50-percent partner in GH)	10	15
H (a 50-percent partner in GH)	10	15
I	5	5
J	5	5
K	5	5
L (E's grandson)	4	4
M	4	4
N	3	3
O	2	2
P	2	2
Q	2	2
R	2	2

(ii) The persons selected under subparagraph (2)(ii) of this paragraph are the following 12 persons: A, B, C, D, partnership GH, E, F, G, H, I, J, and K (I, J, and K must all be included because each owns the same percentage of stock). However, A, B, C, and D are considered as one person for purposes of this paragraph because they are related under the rule specified in paragraph (a)(2) of this section, and G, H, and partnership GH are considered as one person for the same reason. Therefore, it is necessary to select three additional persons, L, M, and N, in order to reach the required number of ten. However, since L is related to one of the persons previously selected, he cannot be considered a separate person. It therefore becomes necessary to select an additional person and since O, P, Q, and R each owns the same percentage of stock, they all must be selected. Accordingly, the 10 persons (more or less) who own the greatest percentage of the fair market value of the outstanding stock are individuals A through R and partnership GH.

(d) Change of ownership. (1) The determination of whether a change of ownership has occurred under section 382(a) is made as of the close of a taxable year of a loss corporation. A "change of ownership" has occurred only if the stock ownership of the 10 persons (more or less) selected under paragraph (c) of this section has increased at least 50 percentage points during a prescribed period and such increase is attributable to a transaction or transactions described in section

382(a)(1)(B) and in paragraphs (e), (f), and (g) of this section. The aggregate increase of at least 50 percentage points may occur at any one time during the taxable year or during the prior taxable year, or may take place in several transactions occurring during such 2-year period. An increase of 50 percentage points is not the same thing as an increase of 50 percent. Thus, a stockholder who owns 4 percent of the fair market value of the stock of a corporation and who increases his ownership to 6 percent has had a 50-percent increase in ownership but an increase in percentage points of only 2.

(2)(i) It is unnecessary to determine whether a "change of ownership" has occurred unless, as of the end of any taxable year (hereinafter called a "current taxable year"), the loss corporation has changed its trade or business after the date of the first increase in percentage points during such taxable year, or during the prior taxable year, which would be taken into account under subparagraph (3) of this paragraph in determining whether a "change of ownership" has occurred.

(ii) If, as of the end of the current taxable year, the loss corporation has changed its trade or business after the date of the first increase in percentage points during such current year, then in determining whether a "change of ownership" has occurred it is first necessary to compare ownership of the outstanding stock at the end of the current taxable year with such ownership at the beginning of such current taxable year. If a "change of ownership" has not occurred as a result of such comparison, then it is necessary to compare ownership of the outstanding stock at the end of the current taxable year with such ownership at the beginning of the prior taxable year.

(iii) If, as of the end of the current taxable year, the loss corporation has not changed its trade or business after the date of the first increase in percentage points during such current year, but the corporation has changed its trade or business after the date of the first increase in percentage points during the prior taxable year, then in determining whether a "change of ownership" has occurred it is necessary to compare ownership of the outstanding stock at the end of the current taxable year with such ownership at the beginning of the prior taxable year.

(iv) For purposes of subdivisions (ii) and (iii) of this subparagraph, an increase in percentage points means only an increase in percentage ownership which would be taken into account under subparagraph (3) of this paragraph in determining whether a "change of ownership" has occurred.

(v) A loss corporation has changed its trade or business during a period between one date and another date only if, as of the later date, the corporation has not continued to carry on a trade or business substantially the same as that conducted immediately before the earlier date. See paragraph (h) of this section for rules relating to change in trade or business.

(3) In determining whether a "change of ownership" has occurred, the following procedure shall be used:

(i) First, as of the close of a taxable year, the percentage of the total fair market value of stock owned, actually and constructively, by each of the 10 persons (more or less) selected under paragraph (c) of this section shall be computed. For this purpose, each person included in selecting such 10 persons shall be treated as a separate person even though any such persons are considered as only one person under such paragraph (c) in selecting the 10 persons who own the greatest percentage of the fair market value of the outstanding stock.

(ii) Second, the percentage of the total fair market value of stock owned, actually and constructively, by each of such persons as of the beginning of the current taxable year or the prior taxable year, whichever is applicable, shall be computed.

(iii) Third, after computing the percentage of the total fair market value of stock owned by each of the persons as of the close of the current taxable year and as of the beginning of the applicable year, a comparison shall be made between the percentages owned by each such person as of each such date.

(iv) Fourth, with respect to each person who sustained an increase in percentage ownership, the portion of such increase which is attributable to a transaction or transactions described in paragraphs (e), (f), and (g) of this section shall be determined.

(v) Finally, the increases in percentage ownership attributable to such transaction or transactions shall be totaled and the resulting figure shall be used in determining whether a "change of ownership" has occurred.

(4) This paragraph may be illustrated by the following examples:

Example (1). Assume that a loss corporation has changed its trade or business during the current taxable year ending on December 31, 1960. Assume further that the following table shows the percentage of the fair market value of the outstanding stock owned by each stockholder as of December 31, 1960,

and the percentages owned by such stockholders as of January 1, 1960, and January 1, 1959. The percentage of stock actually owned is followed in parentheses by the percentage owned actually and constructively under section 318(a). It is assumed that all increases in actual ownership are attributable to a purchase or purchases of stock described in paragraph (e) of this section.

Stockholder	Dec. 31, 1960 (Percent)	Jan. 1, 1960 (Percent)	Jan. 1, 1959 (Percent)
A	10(23)	15(15)	15(15)
B (A's wife)	10(23)	0(15)	0(15)
C	10(25)	10(25)	0(0)
D (C's wife)	5(25)	5(25)	0(10)
E (son of C and D)	5(20)	5(20)	0(0)
F (daughter of C and D)	5(20)	5(20)	0(0)
G	10(10)	10(10)	0(0)
H	5(5)	0(0)	0(0)
I	5(5)	0(0)	0(0)
J	5(5)	0(0)	0(0)
K	5(5)	0(0)	0(0)
L	5(5)	5(5)	5(5)
M	4(4)	0(0)	0(0)
N	4(4)	0(0)	0(0)
O	3(3)	3(3)	3(3)
P	3(3)	3(3)	3(3)
Q	3(3)	3(3)	3(3)
R (grandson of A and B)	3(3)	0(0)	0(0)
(D's father)	0(15)	0(15)	10(10)

(i) The 10 persons (more or less) who own the greatest percentage of the fair market value of the outstanding stock on December 31, 1960 (as selected under paragraph (c) of this section), are A through N and S. Each of such persons is treated as a separate person in computing increases in percentage ownership.

(ii) A and B each owns, actually and constructively, 23 percent of the outstanding stock on December 31, 1960, 15 percent on January 1, 1960, and 15 percent on January 1, 1959. Therefore, as of December 31, 1960, A and B each has sustained an increase of 8 percentage points since January 1, 1960, and a similar increase since January 1, 1959. A's increase is not attributable to a purchase by him. B's increase, however, is attributable to a purchase by her of 10 percent of the outstanding stock. Therefore, B's increase of 8 percentage points is taken into account in determining whether a "change of ownership" has occurred.

(iii) C owns, actually and constructively, 25 percent of the outstanding stock on December 31, 1960, 25 percent on January 1, 1960, and none on January 1, 1959. Therefore, as of December 31, 1960, C has sustained no increase since January 1, 1960, but he has sustained an increase of 25 percentage points since January 1, 1959. Of this increase 10 percentage points are attributable to a purchase by C.

(iv) D owns, actually and constructively, 25 percent of the outstanding stock on December 31, 1960, 25 percent on January 1, 1960, and 10 percent on January 1, 1959. Therefore, as of December 31, 1960, D has sustained no increase since January 1, 1960, but she has sustained an increase of 15 percentage points since January 1, 1959. Of this increase 5 percentage points are attributable to a purchase by D.

(v) E and F each owns, actually and constructively, 20 percent of the outstanding stock on December 31, 1960, 20 percent on January 1, 1960, and none on January 1, 1959. Therefore, as of December 31, 1960, E and F each has sustained an increase of 20 percentage points since January 1, 1959, of which 5 percentage points in each case are attributable to a purchase.

(vi) G has sustained an increase of 10 percentage points since January 1, 1959, all of which are attributable to a purchase by G.

(vii) H, I, J, and K each has sustained an increase of 5 percentage points since January 1, 1960, and a similar increase since January 1, 1959, all of which are attributable to purchases.

(viii) L has sustained no increase in percentage points.

(ix) M and N each has sustained an increase of 4 percentage points since January 1, 1960, and a similar increase since January 1, 1959, all of which are attributable to purchases.

(x) S has sustained an increase of 5 percentage points since January 1, 1959, but the increase is not attributable to a purchase by S.

(xi) The aggregate increase in percentage ownership (attributable to purchases) since January 1, 1960, is 36 percentage points (8 points from B, 5 each from H, I, J, and K, and 4 each from M and N).

(xii) Since an aggregate increase (attributable to transactions described in paragraph (e)) in stock ownership of at least 50 percentage points has not occurred since January 1, 1960, the beginning of the taxable year, it is necessary to determine whether such an increase has occurred since January 1, 1959, the beginning of the prior taxable year. The aggregate increase in percentage ownership (attributable to purchases) since January 1, 1959, is 71 percentage points (8 from B, 10 each from C and G, 5 each from D, E, F, H, I, J, and K, and 4 each from M and N). Therefore, section 382(a) applies as of December 31, 1960, to eliminate any net operating loss carryovers from 1959 and earlier taxable years to 1960 and subsequent taxable years.

Example (2). Assume that a loss corporation has changed its trade or business during the current taxable year ending on December 31, 1960. Assume further that the following table shows the percentage of the fair market value of the outstanding stock owned by each stockholder as of December 31, 1960, and the percentages owned by such stockholders as of January 1, 1960. The percentage of stock actually owned is followed in parentheses by the percentage owned actually and constructively under section 318(a). It is assumed that all increases in actual ownership are attributable to a purchase or purchases of stock described in paragraph (e) of this section.

Stockholder	Dec. 31, 1960 (Percent)	Jan. 1, 1960 (Percent)
Partnership A B	20(100)	0(40)
A (a 50-percent partner in A B)	40(70)	40(40)
B (a 50-percent partner in A B)	30(70)	0(20)
C (B's wife)	10(70)	0(20)

(i) Since there are less than 10 stockholders as of December 31, 1960, all of such stockholders are included among the persons who own the greatest percentage of stock.

(ii) Since partnership AB owns, actually and constructively, 100 percent of the outstanding stock on December 31, 1960, and 40 percent on January 1, 1960, AB has sustained an increase of 60 percentage points. Of this increase 20 percentage points are attributable to a purchase by AB.

(iii) A has sustained an increase of 30 percentage points, but none of such increase is attributable to a purchase by A.

(iv) B has sustained an increase of 50 percentage points, of which 30 are attributable to a purchase by B.

(v) C has sustained an increase of 50 percentage points, of which 10 are attributable to a purchase by C.

(vi) Since there has been an aggregate increase (attributable to transactions described in paragraph (e) of this section) of 60 percentage points since January 1, 1960, section 382(a) applies as of December 31, 1960, to eliminate any net operating loss carryovers from 1959 and earlier taxable years to 1960 and subsequent taxable years.

Example (3). (i) Assume that on June 15, 1959, A, an individual, purchases (within the meaning of section 382(a)(4) and paragraph (e) of this section) 100 percent of the outstanding stock of X Corporation, a loss corporation which makes its return on the basis of the calendar year. On June 30, 1959, A transfers such stock to Y Corporation, the entire outstanding stock of which is owned by A. During September 1959, the business of X Corporation is changed.

(ii) Since, as of December 31, 1959, A is considered under section 318(a) as owning 100 percent of the outstanding stock of X Corporation and he owned none of such stock on January 1, 1959, and since A's increase in percentage points is attributable to a purchase of such stock by him, section 382(a) applies as of December 31, 1959, to eliminate any net operating loss carryovers from 1958 and earlier taxable years to 1959 and subsequent taxable years.

(e) Meaning of "purchase". (1) In determining whether a "change of ownership" has occurred, an increase in stock ownership which is attributable to an acquisition of stock by the person sustaining the increase (whether the stock acquired is stock of the loss corporation or of a corporation owning stock in the loss corporation) shall be taken into account only if such increase is attributable to a purchase (or purchases) by such person, as defined in section 382(a)(4) and this paragraph. There is a "purchase" of stock only if—

(i) The basis of such stock is determined solely by reference to its cost to the acquirer thereof, and

(ii) Immediately before its acquisition the ownership of such stock would not be attributed to the acquirer by application of the constructive ownership rule of paragraph (a)(2) of this section.

For purposes of subdivision (i) of this subparagraph, if the basis of the stock is determined by reference to its basis in the hands of the transferor thereof or of another person, or by reference to the basis of property (other than cash or its equivalent) exchanged for such stock, then the basis of such stock is not determined solely by reference to its cost to the acquirer. Thus, an acquisition of stock by gift or bequest is not a purchase. However, if stock is received in a taxable exchange, its basis is considered to be determined solely by reference to its cost to the acquirer. Thus, if A owns a house which he exchanges for stock in a loss corporation, the basis of the stock is determined solely by reference to its cost to A. For purposes of subdivision (ii) of this subparagraph, if, immediately before any acquisition of stock, the acquirer would be considered under the constructive ownership rule of paragraph (a)(2) of this section as owning less than 100 percent of the stock owned by the transferor, then the acquirer shall be considered as owning, immediately before such acquisition, only that proportion of the stock so acquired as is equal to the proportion of the total stock owned by the transferor which the acquirer would be so considered as owning at such time. Thus, if A acquires stock from B, his wife, A has not made a "purchase" because all the stock so acquired would be considered as owned by A immediately before the acquisition. However, if C and D (who are otherwise unrelated) are equal partners in a partnership and if C acquires 50 shares of stock from D, only 25 of such shares will be considered as owned by C immediately before the acquisition.

(2) If a person acquires stock (or an interest in a partnership, trust, or estate) with a view to invoking the constructive ownership rule of paragraph (a)(2) of this section so that a later acquisition of stock by, or from, such person will not qualify as a "purchase" under section 382(a)(4), the earlier acquisition will be disregarded solely for the purpose of determining whether the later acquisition is a "purchase". Moreover, in determining whether an acquisition of stock is a "purchase" under section 382(a)(4), negligible holdings of stock or of an interest in a partnership, trust, or estate will be disregarded. This subparagraph may be illustrated by the following example:

Example. A owns all or part of the outstanding stock of X Corporation, a loss corporation. A desires to sell his stock to Y Corporation and Y Corporation desires to purchase such stock. However, Y Corporation wishes to avoid the provisions of section 382(a). Therefore, A buys stock of Y Corporation and thereafter Y Corporation acquires for cash all or part of A's stock in X Corporation. Since the purpose of A's acquisition of stock in Y Corporation is avoidance of the provisions of section 382(a), such acquisition is ignored and Y Corporation's acquisition from A of stock in X Corporation is considered a "purchase" under section 382(a)(4).

(f) Increase in percentage points attributable to an indirect purchase of stock. (1) An increase in percentage points may be attributable to a purchase of stock of a corporation which owns stock of the loss corporation. For example, if X Corporation owns 100 shares of stock of Y Corporation and if A purchases 20 percent in value of the outstanding stock of X Corporation, this will be considered a purchase by A of 20 shares of stock of Y Corporation.

(2) An increase in percentage points may also be attributable to a purchase of an interest in a

partnership or trust which owns stock of the loss corporation. For example, if a partnership owns 100 shares of the stock of Y Corporation, a purchase by A of a 20-percent interest in the partnership will be considered a purchase by A of 20 shares of the stock of Y Corporation. Similarly, if a trust owns 100 shares of stock of a loss corporation, and if A purchases an interest in the trust which on an actuarial basis is worth 20 percent, this will be considered a purchase by A of 20 shares of stock of the loss corporation.

(g) **Increase in percentage points attributable to a decrease in outstanding stock.** (1) An increase in percentage points may be attributable to a decrease in the amount of outstanding stock of a loss corporation. For example, if A and B each owns 50 percent in value of the outstanding stock of X Corporation, a redemption by X Corporation of all of B's stock will increase A's ownership of stock by 50 percentage points.

(2) An increase in percentage points may also be attributable to a decrease in the outstanding stock of a corporation owning, directly or indirectly, stock in the loss corporation. For example, if X Corporation owns 100 percent of the outstanding stock of Y Corporation, a loss corporation, and if A and B each owns 50 percent of the value of the outstanding stock of X Corporation, a redemption by X Corporation of all of B's stock will increase A's indirect ownership of the outstanding stock of Y Corporation by 50 percentage points.

(3) If a decrease in the amount of outstanding stock of a corporation (whether a loss corporation or a corporation owning, directly or indirectly, stock in a loss corporation) results from a redemption to pay death taxes to which section 303 applies, such decrease shall not be taken into account in determining whether there has occurred an increase of at least 50 percentage points under paragraph (d) of this section. For purposes of the preceding sentence, a decrease in outstanding stock results from a redemption to which section 303 applies only to the extent that the amount distributed in redemption does not exceed the sum of the items described in paragraphs (1) and (2) of section 303(a). Thus, if the amount of $100,000 is distributed in redemption of 100 shares and if the sum of the items described in paragraphs (1) and (2) of section 303(a) is $60,000, a decrease in outstanding stock of only 60 shares will be considered to result from a redemption to which section 303 applies.

(h) **Change in trade or business.** (1) The provisions of section 382(a) are applicable only if the loss corporation has not continued to carry on a trade or business substantially the same as that conducted before any increase in stock ownership which is taken into account in determining under paragraph (d) of this section whether a change of ownership has occurred. The change in trade or business may occur at any time on or after the date of the earliest such increase during the period beginning on the first day of the loss corporation's prior taxable year. For example, assume that on December 31, 1958 (the end of the corporation's taxable year), the following shareholders own a percentage of the fair market value of the outstanding stock which is greater than each owned at the beginning of the corporation's prior taxable year (January 1, 1957) and that all increases are attributable to purchases within the meaning of paragraph (e) of this section. The increase in percentage points and the date of purchase is shown for each such shareholder:

Shareholder	Increase (Percent)	Date of purchase
A	20	Sept. 15, 1958
B	20	June 15, 1958
C	10	Mar. 15, 1958
D	10	June 15, 1957

Since there have been increases in stock ownership which aggregate at least 50 percentage points, section 382(a) is applicable if the corporation has not continued to carry on a trade or business substantially the same as that conducted immediately before June 15, 1957, the date on which the first purchase occurred during the 2-year period.

(2) Section 382(a) may apply as of the close of a taxable year even though neither a change of ownership nor a change in trade or business has occurred during such year. For example, if during 1958 there is a purchase of at least 50 percent of the fair market value of a corporation's outstanding stock followed by a change in the corporation's trade or business, section 382(a) will apply as of December 31, 1958, to eliminate any net operating loss carryovers from 1957 and prior taxable years to 1958 and subsequent taxable years, and, even though no changes in stock ownership occur during 1959, section 382(a) will also apply as of December 31, 1959, to eliminate any net operating loss carryover from 1958 to 1959 and subsequent taxable years.

(3) A change in the trade or business of a corporation made in contemplation of a change in stock ownership will be treated as if such change in trade or business had occurred after such

change in stock ownership. For example, if a loss corporation changes its business as part of a plan initiated by, or on behalf of, prospective buyers of the loss corporation's stock who wish to avoid the provisions of section 382(a), a subsequent sale of stock to such buyers will cause the change in business to be treated as if it had occurred after the sale.

(4) For purposes of this paragraph, the holding, purchase, or sale for investment purposes of stock, securities, or similar property shall not be considered a trade or business unless such activities historically have constituted the primary activities of the corporation.

(5) In determining whether a corporation has not continued to carry on a trade or business substantially the same as that conducted before any increase in the ownership of its stock, all the facts and circumstances of the particular case shall be taken into account. Among the relevant factors to be taken into account are changes in the corporation's employees, plant, equipment, product, location, customers, and other items which are significant in determining whether there is, or is not, a continuity of the same business enterprise. These factors shall be evaluated in the light of the general objective of section 382(a) to disallow net operating loss carryovers where there is a purchase of the stock of a corporation and its loss carryovers are used to offset gains of a business unrelated to that which produced the losses. However, the prohibited utilization of net operating loss carryovers to offset gains of a business unrelated to that which produced the losses is not dependent upon considerations of purpose, motive, or intent, but rather is established by the objective facts of the particular case. The principles set forth in this subparagraph shall be applied in accordance with the rules set forth in the following subparagraphs of this paragraph.

(6) A corporation has not continued to carry on a trade or business substantially the same as that conducted before any increase in the ownership of its stock if the corporation is not carrying on an active trade or business at the time of such increase in ownership. Thus, if the corporation is inactive at the time of such an increase and subsequently is reactivated in the same line of business as that originally conducted, the corporation has not continued to carry on a trade or business substantially the same as that conducted before such increase in stock ownership. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation is engaged in the business of manufacturing and selling machinery. On January 1, 1958, the corporation suspends its manufacturing activities and begins to reduce its inventory of finished products because of general adverse business conditions and lack of profits. During the period between January 1 and September 1, 1958, the business of the corporation remains dormant. On September 1, 1958, A, an individual, purchases at least 50 percent in value of X Corporation's outstanding stock. On October 1, 1958, the corporation begins to manufacture the same type of machinery it manufactured before January 1, 1958. The reactivation of the corporation in the same line of business as that conducted before January 1, 1958, does not constitute the carrying on of a trade or business substantially the same as that conducted before the increase in stock ownership.

Example (2). Y Corporation is engaged in the business of manufacturing machinery. On January 1, 1958, the corporation suspends its manufacturing activities because of a fire which disrupts the operation of its plant. During the period between January 1 and June 1, 1958, substantial efforts are made to reactivate the business of the corporation by reconstructing the damaged plant. On June 1, 1958, A, an individual, purchases at least 50 percent in value of Y Corporation's outstanding stock. On July 1, 1958, the corporation resumes its normal manufacturing activities. The fact that the corporation's normal activities are temporarily suspended at the time of the increase in ownership does not of itself constitute a failure to carry on a trade or business substantially the same as that conducted before the increase in stock ownership.

(7) A corporation has not continued to carry on a trade or business substantially the same as that conducted before an increase in the ownership of its stock if the corporation discontinues more than a minor portion of its business carried on before such increase. In determining whether the discontinued activities are more than "minor" for purposes of the preceding sentence, consideration shall be given to whether the discontinuance of the activities has the effect of utilizing loss carryovers to offset gains of a business unrelated to that which produced the losses. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation, a calendar-year taxpayer, is engaged in three separate businesses, A, B, and C. Approximately one-half of X Corporation's total business activities (measured in terms of capital invested, gross income, size of payroll, and similar factors) relates to business A, 30 percent to business B, and the remaining 20 percent to business C. On December 31, 1957, X Corporation has substantial net operating loss carryovers all of which are attributable to the operation of business C. On June 1, 1958, Y Corporation purchases at least 50 percent in value of X Corporation's outstanding stock and during 1959 X Corporation discontinues business C. As of December 31, 1959, X Corporation has not continued to carry on substantially the same trade or business as that conducted prior to the increase in ownership.

Example (2). Assume the same facts as in example (1), except that all of X Corporation's net operating loss carryovers are attributable to business A and that the capital released by the discontinuance of business C is used to revitalize business A. Since the discontinuance of business C does not result in the utilization of net operating losses attributable to one business to offset gains of a business unrelated to that which produced the losses, the discontinuance of such business does not of itself constitute the failure to carry on substantially the

same trade or business as that conducted prior to the increase in ownership.

(8) If, after an increase in ownership, the corporation continues to carry on its prior business activities substantially undiminished, the addition by the corporation of a new trade or business does not constitute a failure to carry on substantially the same trade or business. This subparagraph may be illustrated by the following example:

Example. X Corporation, a calendar-year taxpayer, is engaged in the manufacture and sale of electrical appliances and has sustained substantial net operating losses. On June 30, 1958, Y Corporation purchases 100 percent of X Corporation's outstanding stock. During 1959, X Corporation continues substantially undiminished its activities in the manufacture and sale of electrical appliances and also diversifies its activities by acquiring a cement manufacturing plant. The addition of the cement manufacturing business by X Corporation does not of itself constitute a failure to carry on substantially the same trade or business even though net operating loss carryovers attributable to the electrical appliance business are used to offset profits of the cement manufacturing business. See, however, section 269 and the regulations thereunder.

(9) A corporation has not continued to carry on a trade or business substantially the same as that conducted before any increase in the ownership of its stock if the corporation changes the location of a major portion of its activities and as a result of such change in location the business of the corporation is substantially altered. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation, a calendar-year taxpayer, is engaged in the business of manufacturing in State A and has sustained substantial net operating losses. On June 30, 1958, Y Corporation purchases all of X Corporation's outstanding stock. During 1959, X Corporation transfers its operations to State B which is several hundred miles distant from State A. In order to effect the change in location, X Corporation disposes of its plant and a large portion of its machinery located in State A. The distance between State A and State B makes it necessary for the majority of the employees of X Corporation to terminate their employment with X Corporation. During 1959, X Corporation resumes its manufacturing activities in State B and continues to make the same product and to serve substantially the same group of customers. However, by reason of the changes in location, employees, plant, and equipment, X Corporation, on December 31, 1959, is not carrying on substantially the same trade or business as that conducted prior to the increase in ownership.

Example (2). Y Corporation, a calendar-year taxpayer, is engaged in the operation of a department store in city A. On June 30, 1958, Z Corporation purchases all of the outstanding stock of Y Corporation. During 1959, Y Corporation transfers its operations to town B, a suburb of city A. By reason of the change in location, Y Corporation disposes of its interest in the building formerly occupied by it in city A and also substitutes new equipment for a major portion of the equipment formerly utilized by it in city A. After the change in location, Y Corporation continues to sell substantially the same products to substantially the same customers or to customers drawn from substantially the same area and retains substantially all of the employees formerly employed in city A. Under such circumstances, the change of location does not result in a failure to carry on substantially the same trade or business as that conducted before the increase in ownership.

Example (3). Z Corporation, a calendar-year taxpayer, operates a retail liquor store in town M, utilizing the services of 10 employees. On June 30, 1958, individual A purchases all of the stock of Z Corporation. During 1959, Z Corporation transfers its operations to town O, a distance of 5 miles from its former location. By reason of the change in location, Z Corporation disposes of its interest in the premises formerly occupied by it and also disposes of the license and franchise issued by town M. During 1959, Z Corporation transfers its inventory of liquor to its new location and resumes its retail liquor activities under a license and franchise issued by town O. Z Corporation continues to employ 5 of the 10 employees formerly employed in town M, but the corporation does not serve substantially the same customers or customers drawn from substantially the same area. Under these circumstances, the change of location results in a failure to carry on substantially the same trade or business as that conducted before the increase in ownership.

(10) A corporation has not continued to carry on a trade or business substantially the same as that conducted before any increase in the ownership of its stock if the corporation is primarily engaged in the rendition of services by a particular individual or individuals and, after the increase in ownership, the corporation is primarily engaged in the rendition of services by different individuals. This subparagraph may be illustrated by the following examples:

Example (1). X Corporation, a calendar-year taxpayer, is engaged in the business of selling real estate and insurance primarily through the services of individual A as broker. On June 30, 1958, individual B purchases all of the stock of X Corporation, and individual A retires from the business. During the latter part of 1958, X Corporation is engaged primarily in rendering the brokerage services of individual B in the sale of insurance and real estate. On December 31, 1958, the corporation has not continued to carry on a trade or business substantially the same as that conducted before the increase in ownership.

Example (2). Y Corporation, a calendar-year taxpayer, is engaged in the business of operating a beauty salon with 10 employees under the supervision of individual A, who owns all of the stock of Y Corporation and who is held out to the public as the corporation's principal beauty consultant. However, the quality of the services rendered by each of the 10 employees is primarily responsible for attracting the corporation's clientele. On June 30, 1958, individual B purchases all of the outstanding stock of Y Corporation and individual A retires from the business. During 1959, Y Corporation continues to operate the beauty salon in the same location and continues to serve substantially the same group of customers with substantially the same employees under the supervision of individual B, who is held out to the public as the corporation's principal beauty consultant. On December 31, 1959, Y Corporation has continued to carry on substantially the same trade or business as that conducted before the increase in ownership.

[T.D. 6616, 27 FR 10733, Nov. 3, 1962, as amended by T.D. 6969, 33 FR 12000, Aug. 23, 1968]

§ 1.382(b)–1 Change of ownership as the result of a reorganization.

(a) *In general.* (1) Section 382(b)(1) provides that if, in the case of a reorganization described in

section 381(a)(2), either the transferor corporation or the acquiring corporation has a net operating loss carryover which is a carryover to the first taxable year of the acquiring corporation ending after the date of transfer, the amount of such carryover which may be used by the acquiring corporation is reduced unless the stockholders (immediately before the reorganization) of the corporation possessing the carryover (hereinafter called the "loss corporation") own, immediately after the reorganization, at least 20 percent of the fair market value of the outstanding stock of the acquiring corporation. See paragraph (b) of § 1.381(b)-1 for determination of the date of transfer, and paragraph (b) of this section for computation of the amount of the reduction.

(2) The ownership of at least 20 percent of the fair market value of the stock of the acquiring corporation after the reorganization must result from the ownership of stock in the loss corporation immediately before the reorganization. Thus, if stockholders of a transferor-loss corporation before the reorganization also own stock of the acquiring corporation at such time, such stock of the acquiring corporation is not considered as owned after the reorganization by such stockholders as a result of owning stock in the loss corporation in determining whether the 20-percent requirement is satisfied. Moreover, the stockholders (immediately before the reorganization) of a transferor-loss corporation shall not be regarded as owning, immediately after the reorganization, any stock of the acquiring corporation which is not distributed to such stockholders pursuant to the plan of reorganization.

(3) If the net operating loss carryovers of a loss corporation are reduced under section 382(b)(1), then in computing the net operating loss deduction of the acquiring corporation for its first taxable year ending after the date of transfer, that portion of such deduction which is attributable to the net operating loss carryovers of the loss corporation is limited to the amount of such carryovers minus the reduction. Thus, if the net operating loss carryovers of the loss corporation are $100,000 and if the amount of the reduction is $60,000, only $40,000 of such carryovers may be used by the acquiring corporation in computing its net operating loss deduction under section 172(a) for its first taxable year ending after the date of transfer. The reduction provided in section 382(b)(1) is applied to the aggregate of the allowable net operating loss carryovers of the loss corporation without regard to the taxable years in which the net operating losses were sustained.

(4) See paragraph (e) of this section for the effect of the reduction in subsequent taxable years of the acquiring corporation.

(5) The reduction provided by section 382(b)(1) may apply to the carryovers of more than one corporation as party to the reorganization. For example, assume that X Corporation acquires the assets of Y Corporation and of Z Corporation in a reorganization described in section 381(a)(2) and that both X Corporation and Y Corporation have net operating loss carryovers at the date of the reorganization. The reduction under section 382(b)(1) will apply to the net operating loss carryovers of X Corporation unless the stockholders (immediately before the reorganization) of X Corporation own, immediately after the reorganization, at least 20 percent of the fair market value of the outstanding stock of X Corporation. Similarly, the reduction under section 382(b)(1) will apply to the net operating loss carryovers from Y Corporation unless the stockholders (immediately before the reorganization) of Y Corporation own, immediately after the reorganization, at least 20 percent of the fair market value of the outstanding stock of X Corporation.

(6) Section 382(b) applies only with respect to those reorganizations described in section 381(a)(2). However, a series of transactions which purport to be a reorganization qualifying under section 368(a)(1)(B) followed by a liquidation qualifying under section 332, but which in substance comprise a reorganization qualifying under section 368(a)(1)(C), will be considered as a reorganization of the last-described type for purposes of section 382(b) and this section.

(7) See § 1.382(c)-1 for definition of the term "stock" as used in this section.

(b) Amount of reduction. (1) The amount of the reduction provided in section 382(b)(1) shall be determined as follows:

(i) Determine the percentage of the fair market value of the outstanding stock of the acquiring corporation owned, immediately after the reorganization, by the stockholders (immediately before the reorganization) of the loss corporation, which is attributable to their ownership of stock in the loss corporation immediately before the reorganization.

(ii) If the percentage determined under subdivision (i) of this subparagraph is less than 20 percent, compute the difference between such percentage and 20 percent, and multiply such difference by five. The resulting product is the percentage

by which the net operating loss carryovers are reduced.

(2) Subparagraph (1) of this paragraph may be illustrated by the following example:

Example. Assume that X Corporation acquires the assets of Y Corporation, a loss corporation, in a reorganization described in section 381(a)(2), and that immediately after the reorganization the former stockholders of Y Corporation, as the result of owning stock of Y Corporation, own 8 percent of the fair market value of X Corporation's outstanding stock. The difference between 8 percent and 20 percent is 12 percent, which when multiplied by five produces 60 percent. Therefore, the amount of the reduction is equal to 60 percent of the net operating loss carryovers from the loss corporation, so that if the net operating loss carryovers from Y Corporation amounted to $100,000, the amount of the reduction would be $60,000.

(c) Acquisitions designed to avoid section 382(b). The purpose of the 20-percent requirement of section 382(b)(1) is to ensure that the net operating loss carryovers from a corporation a party to a reorganization will be allowed in full only when the shareholders of the loss corporation have a substantial continuing interest in the acquiring corporation, thereby ensuring that the carryovers will be utilized to some extent for the benefit of those persons who were owners of the loss corporation before the reorganization. Therefore, in applying section 382(b)(1), any acquisition of stock of a loss corporation will be disregarded if made for the purpose of avoiding the 20-percent continuity of interest requirement. Moreover, two or more successive reorganizations will be treated as if they had occurred simultaneously in cases where they are undertaken with a view to avoiding the 20-percent continuity requirement. These rules may be illustrated by the following examples:

Example (1). Assume that X Corporation desires to merge into Y Corporation, a loss corporation, in a reorganization. A and B, who are the controlling stockholders of X Corporation, with a view to avoiding the 20-percent continuity of interest requirement of section 382(b)(1), acquire for cash 40 percent of the fair market value of the outstanding stock of Y Corporation (or acquire an option to purchase such stock, which option they exercise shortly after the merger). Thereafter, Y Corporation acquires the assets of X Corporation in a reorganization to which section 381(a) applies. In determining whether the 20-percent continuity requirement is satisfied (and, if not, the amount of the reduction under section 382(b)(2)), the stock of Y Corporation purchased by A and B (or acquired upon their exercise of the option) will be considered as outstanding immediately after the reorganization but will not be considered as owned by persons who were stockholders of Y Corporation immediately before the reorganization.

Example (2). Assume that X Corporation, which has a net worth of $2,000,000, desires to acquire the assets of Y Corporation, a loss corporation, which has a net worth of $100,000. X Corporation also desires to acquire the assets of Z Corporation, which has a net worth of $400,000. With a view to avoiding the 20-percent continuity requirement, Z Corporation acquires the assets of Y Corporation in a reorganization to which section 381(a) applies. Immediately after the reorganization, the former stockholders of Y Corporation own 20 percent of the fair market value of the outstanding stock of Z Corporation. Shortly thereafter, X Corporation acquires the assets of Z Corporation in a reorganization to which section 381(a) applies. Immediately after the reorganization, the former stockholders of Y Corporation own 4 percent of the fair market value of the outstanding stock of X Corporation. Under these circumstances, the application of section 382(b)(1) to the net operating loss carryovers of Y Corporation shall be determined by reference to the fair market value of the outstanding stock of X Corporation owned, immediately after the successive reorganizations, by the stockholders (immediately before the successive reorganizations) of Y Corporation. Therefore, the net operating loss carryovers from Y Corporation will be reduced by 80 percent.

(d) Exception to application of section 382(b). (1) Section 382(b)(3) provides an exception to the application of the reduction provided in section 382(b)(1). Under this exception there is no reduction if, immediately before the reorganization, the transferor corporation and the acquiring corporation are owned substantially by the same persons in the same proportion. If the acquiring corporation is not in existence immediately before the reorganization (as in the case of a statutory consolidation), the requirements of section 382(b)(3) are not met unless the transferor corporations immediately before the reorganization are owned substantially by the same persons in the same proportion.

(2) The transferor corporation and the acquiring corporation will be considered as owned substantially by the same persons in the same proportion only if the same persons own substantially all the stock of the corporations in substantially the same proportion. This rule may be illustrated by the following examples:

Example (1). A and B each owns 50 percent of the fair market value of the outstanding stock of X Corporation. A owns 52 percent and B owns 48 percent of the fair market value of the outstanding stock of Y Corporation. Y Corporation acquires the assets of X Corporation in a reorganization to which section 381(a) applies. The exception provided in section 382(b)(3) is applicable.

Example (2). A and B each owns 50 percent of the fair market value of the outstanding stock of X Corporation. A owns 60 percent and B owns 40 percent of the fair market value of the outstanding stock of Y Corporation. Y Corporation acquires the assets of X Corporation in a reorganization to which section 381(a) applies. The exception provided in section 382(b)(3) is not applicable.

Example (3). A and B each owns 48 percent of the fair market value of the outstanding stock of X Corporation and of Y Corporation. C owns the remaining 4 percent of X Corporation and D owns the remaining 4 percent of Y Corporation. Y Corporation acquires the assets of X Corporation in a reorganization to which section 381(a) applies. The exception provided in section 382(b)(3) is applicable.

Example (4). A and B each owns 40 percent of the fair market value of the outstanding stock of X Corporation and of Y Corporation. C owns the remaining 20 percent of X Corporation and D owns the remaining 20 percent of Y Corporation. Y Corporation acquires the assets of X Corpora-

tion in a reorganization to which section 381(a) applies. The exception provided in section 382(b)(3) is not applicable.

(3) If stock of the transferor or acquiring corporation is acquired or disposed of for the purpose of meeting the requirements of section 382(b)(3), then for purposes of such section such stock shall not be considered to be owned by the person who acquired it. For example, if A, owning 100 percent of the outstanding stock of X Corporation and 75 percent of the outstanding stock of Y Corporation, a loss corporation, acquires the remaining 25 percent of the outstanding stock of Y Corporation with a view to merging the two corporations, then for purposes of section 382(b)(3) such 25 percent shall not be considered to be owned by A.

(e) Carryovers to subsequent years. **(1)** The reduction provided in section 382(b)(1) applies only to net operating loss carryovers to the first taxable year of the acquiring corporation ending after the date of transfer. However, section 382(b)(4) contains a rule to ensure that the portion of the carryovers equal to the amount of the reduction will not be available for deduction in subsequent taxable years of the acquiring corporation. This rule provides that if a reduction is applicable under section 382(b)(1), then in computing net operating loss carryover from taxable years of the transferor and acquiring corporations ending on or before the date of transfer to taxable years of the acquiring corporation subsequent to the first taxable year ending after the date of transfer, the income of the acquiring corporation for such first taxable year, as computed under section 172(b)(2) (without regard to the fact that the deduction under section 172(a) is reduced by the amount computed under section 382(b)(2)), shall be increased by the amount of the reduction computed under section 382(b)(2) for that year. The preceding rule may be illustrated by the following example:

Example. X Corporation and Y Corporation are organized on January 1, 1957, and each makes its return on the basis of the calendar year. On December 31, 1958, Y Corporation acquires the assets of X Corporation in a reorganization to which section 381(a) applies. Immediately after the reorganization, those persons who were stockholders of X Corporation immediately before the reorganization own 10 percent of the fair market value of the outstanding stock of Y Corporation. The net operating losses and the taxable income (computed without any net operating loss deduction) of the two corporations are as follows:

		X Corporation (transferor)	Y Corporation (acquirer)
Year:			
1957		($5,000)	($5,000)
1958		(15,000)	(1,000)
1959			5,000
The computation of the carryovers to Y Corporation's calendar year 1960 may be illustrated as follows:			
(i) X Corporation's 1957 loss. The carryover to 1960 is $0, computed as follows:			
Net operating loss			$5,000
Less:			
X's 1958 taxable income		0	
Y's 1959 taxable income before adjustment under section 382(b)(4)	$5,000		
Plus amount of reduction computed under section 382(b)(2) (50% of $20,000)	10,000		
		$15,000	
			15,000
Carryover to 1960			0
(ii) Y Corporation's 1957 loss. The carryover to 1960 is $0, computed as follows:			
Net operating loss			$5,000
Less:			
Y's 1958 taxable income		0	
Y's 1959 taxable income before net operating loss deduction and adjustment under section 382(b)(4)	$5,000		
Minus Y's 1959 net operating loss deduction (i.e., X's 1957 carryover)	5,000		
Plus amount of reduction under section 382(b)(2)	10,000		
		$10,000	
			10,000
Carryover to 1960			
(iii) X Corporation's 1968 loss. The carryover to 1960 is $10,000, computed as follows:			
Net operating loss			$15,000
Less:			
X's 1957 taxable income		0	

		X Corporation (transferor)	Y Corporation (acquirer)
Y's 1959 taxable income before net operating loss deduction and adjustment under section 382(b)(4)	$5,000		
Minus Y's 1959 net operating loss deduction (i.e., X's 1957 carryover of $5,000 and Y's 1957 carryover of $5,000)	10,000		
Plus amount of reduction under section 382(b)(2)	10,000		
		$5,000	
			5,000
Carryover to 1960			10,000

(iv) Y Corporation's 1958 loss. The carryover to 1960 is $1,000, computed as follows:

Net operating loss			$1,000
Less:			
Y's 1957 taxable income		0	
Y's 1959 taxable income before net operating loss deduction and adjustment under section 382(b)(4)	$5,000		
Minus Y's 1959 net operating loss deduction (i.e., X's 1957 carryover of $5,000, Y's 1957 carryover of $5,000, and X's 1958 carryover of $15,000)	25,000		
Plus amount of reduction under section 382(b)(2)	10,000		
		0	
			0
Carryover to 1960			1,000

(v) Summary of carryovers to 1960. The aggregate of the net operating loss carryovers to 1960 is $11,000, computed as follows:

X's 1958 loss	$10,000
Y's 1958 loss	1,000
Total	11,000

(2) If the date of transfer is on a day other than the last day of a taxable year of the acquiring corporation, and if the reduction provided in section 382(b)(1) applies to net operating loss carryovers of the transferor corporation, then for purposes of section 381(c)(1)(C), the adjustment provided in section 382(b)(4) shall be considered as an increase in income of the "postacquisition part year" and no portion of such adjustment shall be considered as an increase in income of the "preacquisition part year."

(f) Attribution of ownership. (1) Section 382(b)(5) provides a special rule for determining whether the reduction provided in section 382(b)(1) applies in cases where, immediately before the reorganization, either the transferor corporation or the acquiring corporation owns outstanding stock of the loss corporation. Under this rule, the transferor or acquiring corporation (whichever owns stock of the loss corporation) is treated as owning, immediately after the reorganization, a percentage, A, of the fair market value of the acquiring corporation's outstanding stock which bears the same ratio to B (the percentage of the fair market value of the stock of the loss corporation owned, immediately before the reorganization, by such transferor or acquiring corporation) as C (the fair market value of the outstanding stock of the loss corporation immediately before the reorganization) bears to D (the fair market value of the outstanding stock of the acquiring corporation immediately after the reorganization). Stated algebraically, the percentage of the fair market value of the acquiring corporation's outstanding stock treated as owned by the transferor or acquiring corporation immediately after the reorganization, A, equals—

Value of stock of loss corporation immediately before reorganization (C)/Value of stock of acquiring corporation immediately after reorganization (D)×Percentage of stock of loss corporation owned by transferor or acquiring corporation immediately before reorganization (B).

The preceding rule may be illustrated by the following examples:

Example (1). Assume that X Corporation owns 25 percent of the fair market value of the outstanding stock of Y Corporation, a loss corporation; that X Corporation acquires the assets of Y Corporation in a reorganization to which section 381(a) applies; that immediately before the reorganization the total outstanding stock of Y Corporation has a fair market value of $10,000; and that immediately after the reorganization the total outstanding stock of X Corporation has a fair market value of $50,000. For the purpose of determining whether the reduction provided in section 382(b)(1) is applicable (and, if so, the amount of the reduction computed under section 382(b)(2)), X Corporation is treated as owning (immediately after the reorganization) 5 percent of the fair market value of its outstanding stock, determined as follows:

$$[\$10{,}000(C)/\$50{,}000(D)] \times 25\%(B) = 5\%(A)$$

Thus, if the other former stockholders of Y Corporation own, after the reorganization at least 15 percent of the fair market value of the outstanding stock of X Corporation as the result of owning stock in Y Corporation, there will be no reduction under section 382(b)(1).

Example (2). Assume the same facts as in example (1), except that Y Corporation acquires the assets of X Corporation in a reorganization to which section 381(a) applies and that immediately after the reorganization the total outstanding stock of Y Corporation has a fair market value of $50,000. The result is the same as that in example (1). X Corporation is treated as owning (immediately after the reorganization) 5 percent of the fair market value of the outstanding stock of Y Corporation. Thus, there will be no reduction under section

382(b)(1) if those persons (other than X Corporation) who were stockholders of Y Corporation immediately before the reorganization own at least 15 percent of the fair market value of the outstanding stock of Y Corporation immediately after the reorganization.

(2) The provisions of paragraph (5) of section 382(b) do not apply with respect to an interest in a loss corporation which is acquired for the purpose of avoiding the 20-percent continuity of interest requirement of section 382(b)(1). Thus, paragraph (5) of section 382(b) does not apply with respect to stock of a loss corporation which is acquired by another corporation with a view to causing a merger of the two corporations. For example, if X Corporation owns 15 percent of the fair market value of the outstanding stock of Y Corporation, a loss corporation, and if X Corporation purchases an additional 15 percent with a view to causing a merger of the two corporations, paragraph (5) of section 382(b) applies only with respect to the stock previously held by X Corporation and not to the stock so purchased.

(g) Stock of corporation controlling acquiring corporation. **(1)** Section 382(b)(6) provides a special rule for determining whether the reduction provided in section 382(b)(1) applies in cases where the transferor corporation is a loss corporation and the former stockholders of the loss corporation own, as a result of the reorganization, stock in a corporation which controls (within the meaning of section 368(c)) the acquiring corporation. In such cases, the former stockholders of the loss corporation are treated as owning, after the reorganization, stock of the acquiring corporation equal in value to the fair market value of their stock in the controlling corporation. This rule may be illustrated by the following example:

Example. X Corporation owns 100 percent of the stock of Y Corporation. In a reorganization to which section 381(a) applies, Y Corporation acquires the assets of Z Corporation, a loss corporation, in exchange for stock of X Corporation. Immediately after the reorganization the total outstanding stock of Y Corporation has a fair market value of $50,000, and the stockholders (immediately before the reorganization) of the loss corporation own, as a result of the reorganization, stock of X Corporation having a fair market value of $20,000. For the purpose of determining whether the reduction provided in section 382(b)(1) is applicable (and, if so, the amount of the reduction computed under section 382(b)(2)), the former stockholders of the loss corporation are treated as owning stock of Y Corporation worth $20,000 (the value of their stock in X Corporation), which is 40 percent ($20,000 divided by $50,000) of the fair market value of the outstanding stock of the acquiring corporation.

(2) The 20-percent continuity of interest requirement of section 382(b)(1) applies with respect to an interest in the corporation desiring to utilize the net operating loss carryovers from the loss corporation. Thus, the provisions of section 382(b)(6) and of subparagraph (1) of this paragraph apply only if, at the time of the reorganization, it is intended that the acquiring corporation itself, and not the corporation which controls the acquiring corporation, shall make use of the net operating loss carryovers from the loss corporation. Section 382(b)(6) and subparagraph (1) of this paragraph do not apply if the loss corporation is acquired by a controlled corporation with a view to the liquidation of the controlled corporation into its parent at a time when a substantial part of the net operation loss carryovers from the loss corporation remain to be utilized. (This requirement is satisfied in any case in which such action was contemplated at the time of the reorganization by those persons in a position to determine the policies of the controlled corporation.) In such case, it is the controlling corporation, instead of the controlled corporation, in which the former stockholders of the loss corporation must own a 20-percent interest. Thus, assume in the example appearing in subparagraph (1) of this paragraph, that the total fair market value of the outstanding stock of X Corporation immediately after the reorganization is $200,000 and that X Corporation causes Y Corporation to be liquidated at a time when a substantial part of the loss carryovers from Z Corporation remain to be utilized. Under these circumstances, the former stockholders of the loss corporation would own after the reorganization only 10 percent ($20,000 divided by $200,000) of the fair market value of the outstanding stock of the controlling corporation and the net operating loss carryovers from Z Corporation to the first taxable year of Y Corporation ending after the date of transfer would accordingly be reduced by 50 percent.

(h) Minimum tax for tax preferences. For purposes of the tax imposed under section 56, the acquiring corporation succeeding to and taking into account any net operating loss carryovers of the transferor corporation shall also succeed to and take into account along with such net operating loss carryover any deferred tax liability under section 56(b) and the regulations thereunder attributable to such net operating loss carryover. Any reduction of net operating loss effected pursuant to section 382 and the regulations thereunder shall, for purposes of section 56(b) and the regulations thereunder and section 1.58–7, be deemed to reduce the portions of such net operating loss described in such provisions proportionately.

[T.D. 6616, 27 FR 10738, Nov. 3, 1962, as amended by T.D. 7564, 43 FR 40493, Sept. 12, 1978]

§ 1.382(c)–1 Definition of stock.

Section 382(c) contains the definition of the term "stock" for purposes of section 382(a) and (b). For these purposes, the term "stock" means all outstanding shares except nonvoting stock which is limited and preferred as to dividends. [T.D. 6616, 27 FR 10741, Nov. 3, 1962]

§ 1.383–1 Special limitations on carryovers of unused investment credits, work incentive program credits, foreign taxes, and capital losses.

Section 383 provides that if the ownership and business of a corporation are changed in the manner described in section 382(a)(1) or, in the case of a reorganization specified in section 381(a)(2), if there is a change in ownership described in section 382(b)(1)(B), then the limitations provided in section 382 in such cases with respect to the carryover of net operating losses shall apply in the same manner, as provided under regulations prescribed by the Secretary or his delegate, with respect to any unused investment credit of the corporation which can otherwise be carried forward under section 46(b), to any unused work incentive program credit of the corporation which can otherwise be carried forward under section 50A(b), to any unused foreign taxes of the corporation which can otherwise be carried forward under section 904(d), and to any net capital loss of the corporation which can otherwise be carried forward under section 1212. Sections 1.383–2 and 1.383–3 are prescribed pursuant to the authority granted the Secretary or his delegate by section 383 to prescribe regulations governing the manner in which the limitations provided in section 382 shall apply with respect to the above-mentioned items. For the election to apply sections 382 and 383, as amended by the Tax Reform Act of 1976, see § 382–2.

[T.D. 7343, 40 FR 1698, Jan. 9, 1975, as amended by T.D. 7650, 44 FR 61573, May 26, 1979]

§ 1.383–2 Purchase of a corporation and change in its trade or business.

(a) In general. If the ownership and business of a corporation are changed in the manner described in section 382(a) and the regulations thereunder, then the limitation applicable in such cases to the carryover of the net operating losses of such corporation shall also apply to the carryover of the unused investment credits of such corporation which could otherwise be carried forward under section 46(b), the unused work incentive program credits of such corporation which could otherwise be carried forward under section 50A(b), the unused foreign taxes of such corporation which could otherwise be carried forward under section 904(d), and the net capital losses of such corporation which could otherwise be carried forward under section 1212. Thus, if the limitation provided in section 382(a) is applicable at the end of a corporation's taxable year, then all investment credit carryovers, all work incentive program credit carryovers, all unused foreign tax carryovers, and all capital loss carryovers from prior taxable years of such corporation are excluded in computing tax liability for such taxable year and for subsequent taxable years.

(b) Effective date. **(1)** The limitation provided in this section shall apply only with respect to changes in ownership occurring after December 10, 1971, pursuant to a contract entered into on or after September 29, 1971.

(2) For purposes of applying section 382(a) in determining whether the limitation provided in this section applies, the beginning of the taxable years specified in clauses (i) and (ii) of section 382(a)(1)(A) shall be the beginning of such taxable years or December 10, 1971, whichever occurs later. Thus, if X Corporation made its returns for 1971 and 1972 on the basis of the calendar year, then in determining whether section 382(a) would apply as of December 31, 1971, the beginning of the taxable years specified in clauses (i) and (ii) of section 382(a)(1)(A) would be December 10, 1971, and in determining whether section 382(a) would apply as of December 31, 1972, the beginning of the taxable year specified in clause (i) of section 382(a)(1)(A) would be January 1, 1972, and the beginning of the taxable year specified in clause (ii) of section 382(a)(1)(A) would be December 10, 1971.

[T.D. 7343, 40 FR 1698, Jan. 9, 1975]

§ 1.383–3 Change in ownership as the result of a reorganization.

(a) In general. **(1)** If, in the case of a reorganization specified in section 381(a)(2), (i) the transferor corporation or the acquiring corporation has an unused investment credit, an unused work incentive program credit, an unused foreign tax or a net capital loss which may be carried forward to the first taxable year of the acquiring corporation ending after the date of transfer, and (ii) as a result of the reorganization there is a change in ownership of such corporation within the meaning of section 382(b)(1)(B), then the limitation applicable in such cases to the carryover of the net operating

losses of such corporation shall apply in the manner provided in this section to the carryover of any unused investment credits, any unused work incentive program credits, any unused foreign taxes, and any net capital losses of such corporation. Thus, if the limitation provided in section 382(b)(1) would apply in such a case to the net operating loss carryovers of a corporation (whether or not such corporation has any such carryovers), a similar limitation, computed with the modifications provided in this paragraph, shall apply to the investment credit carryovers, to the work incentive program credit carryovers, to the foreign tax carryovers, and to the capital loss carryovers of such corporation.

(2)(i) If there is a change in ownership of a corporation within the meaning of section 382(b)(1)(B), then the amount of the reduction provided in section 382(b)(1) shall be determined with respect to the total carryovers of such corporation from taxable years ending on or before the date of transfer which may otherwise be carried to the first taxable year of the acquiring corporation ending after such date. In such a case, for purposes of computing carryovers of the transferor and acquiring corporations from taxable years ending on or before the date of transfer to taxable years of the acquiring corporation ending after the date of transfer, the amount of the reduction shall be applied against the earliest carryover, whether a carryover of the transferor corporation or of the acquiring corporation, which may otherwise be carried to the acquiring corporation's first taxable year ending after the date of transfer, then against the next earliest carryover which may otherwise be carried to such first taxable year, etc. To the extent of the amount of the reduction, such carryovers shall be eliminated and shall not be included in computing the total carryover to the acquiring corporation's first taxable year ending after the date of transfer or to subsequent taxable years.

(ii) For purposes of this subparagraph, if the date of transfer is on a day other than the last day of a taxable year of the acquiring corporation, then the amount of the reduction shall be applied only against the carryovers of the transferor corporation or of the acquiring corporation which may be carried to the acquiring corporation's postacquisition part year under the principles of § 1.381(c)(23)–1(e) (relating to investment credit carryovers).

(iii) For purposes of this subparagraph, a carryover from a taxable year of the transferor corporation ending on or before the last day of a taxable year of the acquiring corporation shall be considered to be a carryover from a taxable year prior to such taxable year of the acquiring corporation.

(3) The provisions of paragraph (a)(2) of this section may be illustrated by the following example dealing with the carryover of unused investment credit:

Example. X Corporation and Y Corporation are organized on January 1, 1970, and each makes its return on the basis of the calendar year. On December 31, 1972, Y acquires the assets of X in a reorganization described in section 381(a)(2). Immediately after the reorganization, those persons who were stockholders of X immediately before the reorganization, as the result of owning stock of X, own 10 percent of the fair market value of the outstanding stock of Y, so that the investment credit carryovers of X as of the close of the date of transfer are reduced under section 382(b)(2) by 50 percent. The investment credit carryovers as of the close of the date of transfer of X Corporation and Y Corporation for taxable years 1970 through 1972 are as follows:

Taxable years	X Corporation (transferor)	Y Corporation (acquiring)
1970	$100	$100
1971	100	100
1972	500	200

For the first taxable year ending after the date of transfer, the acquiring corporation has an excess limitation of $500 (i.e., the excess of the limitation based on the amount of tax for such year over the amount of credit earned for such year). The computation of investment credit carryovers from prior taxable years of the transferor and acquiring corporations to the acquiring corporation's first taxable year ending after the date of transfer and to subsequent taxable years is as follows:

(i) The amount of the reduction computed under subparagraph (1) of this paragraph with respect to the investment credit carryovers from prior taxable years of X Corporation is $350 ($700 × 50%). One hundred dollars of such reduction is first applied against and eliminates X's $100 carryover from 1970; $100 of such reduction is applied against and eliminates Y's $100 carryover from 1970; $100 of such reduction is applied against and eliminates X's $100 carryover from 1971; the remaining $50 of such reduction is applied against Y's $100 carryover from 1971 and reduces such carryover to $50. After the reduction, the total carryover to the first taxable year of the acquiring corporation ending after the date of transfer is $750 (i.e., Y's $50 carryover from 1971, X's $500 carryover from 1972, and Y's $200 carryover from 1972).

(ii) Since the excess limitation for the acquiring corporation's first taxable year ending after the date of transfer is $500, Y's $50 carryover from 1971 and $450 of X's carryover from 1972 may be added to the amount of credit allowed by section 38 for such year. The total carryover to taxable years of the acquiring corporation subsequent to such first taxable year is $250 (i.e., the remainder of X's carryover from 1972, $50, plus Y's $200 carryover from 1972).

(b) Special rules for foreign tax carryovers. (1) The amount of unused foreign tax of a transferor corporation which may be carried to taxable years of the acquiring corporation ending after the date of transfer shall be determined under the principles of section 381(c)(23) and the regulations thereunder (relating to the carryover of unused investment

credit). Thus, to determine the amount of such carryovers as of the close of the date of transfer, and to integrate them with any carryovers and carrybacks of the acquiring corporation for purposes of determining the amount of credit allowed by section 901 to the acquiring corporation for taxable years ending after the date of transfer, it is necessary to apply the provisions of section 904(d) in accordance with the principles of section 381(c)(23) and the regulations thereunder.

(2) If the limitation provided in section 382(b)(1) applies to the carryover of unused foreign taxes of a corporation, then for purposes of computing the amount of the reduction under paragraph (a) of this section, the following rules shall apply. If all of the unused foreign tax carryovers from prior taxable years of the corporation are of the same origin, the amount of the reduction shall be determined by applying the percentage computed under section 382(b)(2) to the total of such carryovers. If the unused foreign tax carryovers from prior taxable years of the corporation are not of the same origin, that is, where one or more carryovers originated in taxable years to which the per-country limitation applied and one or more carryovers originated in taxable years to which the overall limitation applied, or where, even though all the carryovers originated in per-country limitation years, all of such carryovers are not attributable to taxes paid or accrued to the same foreign country or possession of the United States, the amount of the reduction shall be determined separately with respect to carryovers of the same origin. That is, the percentage computed under section 382(b)(2) shall be applied separately to the total of the carryovers originating in overall limitation years and separately to the total of the carryovers attributable to taxes paid or accrued to each particular country or United States possession in per-country limitation years. Thus, if a corporation has (as of the close of the date of transfer) total unused foreign tax carryovers of $200 attributable to taxes paid or accrued to country X and total unused foreign tax carryovers of $150 attributable to taxes paid or accrued to country Y from one or more taxable years to which the per-country limitation applied, and also has total unused foreign tax carryovers of $100 from taxable years to which the overall limitation applied, and if the percentage computed under section 382(b)(2) is 50 percent, then the amount of reduction in carryovers attributable to taxes paid or accrued to country X is $100, the amount of reduction in carryovers attributable to taxes paid or accrued to country Y is $75, and the amount of reduction in carryovers from taxable years to which the overall limitation applied is $50.

(3) After having determined the reduction or reductions under subparagraph (2) of this paragraph, it is necessary, for purposes of computing unused foreign tax carryovers of the transferor and acquiring corporations from taxable years ending on or before the date of transfer to taxable years of the acquiring corporation ending after the date of transfer, to apply such reduction or reductions against the earliest carryover of the same origin, whether a carryover of the transferor corporation or of the acquiring corporation, which may otherwise be carried to the first taxable year of the acquiring corporation ending after the date of transfer, then against the next earliest carryover of the same origin which may otherwise be carried to such first taxable year, etc. To the extent of the amount of the reduction, such carryovers shall be eliminated and shall not be included in computing the total carryover to the acquiring corporation's first taxable year ending after the date of transfer or to subsequent taxable years.

(4) The provisions of subparagraphs (2) and (3) of this paragraph may be illustrated by the following example:

Example. T, a domestic corporation, and S, a domestic corporation, are organized on January 1, 1970, and each makes its return on the basis of the calendar year. On December 31, 1972, S Corporation acquires the assets of T Corporation in a reorganization described in section 381(a)(2). Immediately after the reorganization, those persons who were stockholders of T Corporation immediately before the reorganization, as the result of owning stock of T, own 10 percent of the fair market value of the outstanding stock of S, so that T's foreign tax carryovers as of the close of the date of transfer are reduced by 50 percent. The unused foreign tax carryovers as of the close of the date of transfer of T Corporation and S Corporation for taxable years 1970 through 1972 are as follows:

UNUSED FOREIGN TAX CARRYOVERS FROM YEAR(S) OF ORIGIN

Taxable year	T Corporation (transferor)	S Corporation (acquiring)
1970	Per country:	Per country:
	Country X—50	Country X—100.
	Country Y—100	Country Y—50.
	Country Z—100	
1971	Per country:	Overall:
	Country X—150	Aggregate—50.
	Country Y—100	
1972	Overall:	Overall:
	Aggregate—200	Aggregate—100.

For the first taxable year ending after the date of transfer, the acquiring corporation, which has elected the overall limitation, has an excess limitation of $200 (i.e., the excess of the limitation based on amount of tax for such year over the amount of credit earned for such year). The computation of unused foreign tax carryovers from prior taxable years of the transferor and acquiring corporations to the acquiring corporation's first

taxable year ending after the date of transfer and to subsequent taxable years is as follows:

(i) Unused foreign tax carryovers attributable to country X. The amount of the reduction computed under subparagraph (2) of this paragraph with respect to the total unused foreign tax carryovers from prior taxable years of T Corporation attributable to taxes paid or accrued to country X is $100 ($200 × 50%). Fifty dollars of such reduction is applied against and eliminates T's $50 carryover from 1970. The remaining $50 of such reduction is then applied against S's $100 carryover from 1970 and reduces such carryover to $50. After the reduction, the total carryover to the first taxable year of the acquiring corporation ending after the date of transfer attributable to taxes paid or accrued to country X is $200 (i.e., S's $50 carryover from 1970 and T's $150 carryover from 1971). Since the acquiring corporation has elected the overall limitation for its first taxable year ending after the date of transfer, the carryovers attributable to country X from per-country limitation years may not be applied in such first taxable year and the total $200 is carried to the next succeeding taxable year.

(ii) Unused foreign tax carryovers attributable to country Y. The amount of the reduction computed under subparagraph (2) of this paragraph with respect to the total unused foreign tax carryovers from prior taxable years of T Corporation attributable to taxes paid or accrued to country Y is $100 ($200 × 50%). The total $100 reduction is applied against and eliminates T's carryover from 1970. After the reduction, the total carryover to the first taxable year of the acquiring corporation ending after the date of transfer attributable to taxes paid or accrued to country Y is $150 (i.e., S's $50 carryover from 1970 and T's $100 carryover from 1971). Since the acquiring corporation has elected the overall limitation for its first taxable year ending after the date of transfer, the carryovers attributable to country Y from per-country limitation years may not be applied in such first taxable year and the total $150 is carried to the next succeeding taxable year.

(iii) Unused foreign tax carryovers attributable to country Z. The amount of reduction computed under subparagraph (2) of this paragraph with respect to the total unused foreign tax carryovers from prior taxable years of T Corporation attributable to taxes paid or accrued to country Z is $50 ($100 × 50%). The total $50 reduction is applied against T's $100 carryover from 1970 and thus reduces such carryover to the first taxable year of the acquiring corporation ending after the date of transfer to $50. Since the acquiring corporation has elected the overall limitation for its first taxable year ending after the date of transfer, the carryover attributable to country Z from the per-country limitation year may not be applied in such first taxable year and the total $50 is carried to the next succeeding taxable year.

(iv) Unused foreign tax carryovers from overall limitation years. The amount of the reduction computed under subparagraph (2) of this paragraph with respect to the total unused foreign tax carryovers from prior taxable years of T Corporation to which the overall limitation applied is $100 ($200 × 50%). Fifty dollars of such reduction is applied against and eliminates S's $50 carryover from 1971 and the remaining $50 of such reduction is applied against T's $200 carryover from 1972 and reduces such carryover to $150. After the reduction, the total carryover to the first taxable year of the acquiring corporation ending after the date of transfer attributable to taxes paid or accrued in taxable years to which the overall limitation applied is $250 (i.e., T's $150 carryover from 1972 and S's $100 carryover from 1972). Since for such first taxable year the acquiring corporation has an excess limitation of $200 with respect to carryovers arising in overall limitation years, T's $150 carryover from 1972 and $50 of S's $100 carryover from 1972 may be added to the amount of credit allowed by section 901 for such year. The total carryover to taxable years of the acquiring corporation subsequent to such first taxable year attributable to taxes paid or accrued in overall limitation years is $50 (i.e., the remainder of S's carryover from 1972, $50).

(c) Effective date. (1) The limitation provided in this section shall apply only with respect to reorganizations occurring after December 10, 1971, pursuant to a plan of reorganization or a contract entered into on or after September 29, 1971.

(2) For purposes of subparagraph (1) of this paragraph, a reorganization shall be considered to occur on the date of transfer as defined in section 381(b)(2) and § 1.381(b)–1(b).

(3) For purposes of subparagraph (1) of this paragraph, a plan of reorganization or a contract shall be considered to have been entered into on the date on which the duly authorized representatives of the transferor and acquiring corporations enter into an agreement evidencing the plan of reorganization, or on the date on which the plan of reorganization is adopted by the shareholders of the transferor and acquiring corporations, whichever occurs earlier.

[T.D. 7343, 40 FR 1699, Jan. 9, 1975]

DEFERRED COMPENSATION, ETC.

Pension, Profit-sharing, Stock Bonus Plans, Etc.

§ 1.401–0 Scope and definitions.

(a) In general. Sections 1.401 through 1.401–14 (inclusive) reflect the provisions of section 401 prior to amendment by the Employee Retirement Income Security Act of 1974. The sections following § 1.401–14 and preceding § 1.402(a)–1 (hereafter referred to in this section as the "Post-ERISA Regulations") reflect the provisions of section 401 after amendment by such Act.

(b) Definitions. For purposes of the Post-ERISA regulations—

(1) Qualified plan. The term "qualified plan" means a plan which satisfies the requirements of section 401(a).

(2) Qualified trust. The term "qualified trust" means a trust which satisfies the requirements of section 401(a).

[T.D. 7501, 42 FR 42320, Aug. 23, 1977]

§ 1.401–1 Qualified pension, profit-sharing, and stock bonus plans.

(a) Introduction. **(1)** Sections 401 through 405 relate to pension, profit- sharing, stock bonus, and annuity plans, compensation paid under a deferred-payment plan, and bond purchase plans. Section 401(a) prescribes the requirements which must be met for qualification of a trust forming part of a pension, profit-sharing, or stock bonus plan.

(2) A qualified pension, profit-sharing, or stock bonus plan is a definite written program and arrangement which is communicated to the employees and which is established and maintained by an employer—

(i) In the case of a pension plan, to provide for the livelihood of the employees or their beneficiaries after the retirement of such employees through the payment of benefits determined without regard to profits (see paragraph (b)(1)(i) of this section);

(ii) In the case of a profit-sharing plan, to enable employees or their beneficiaries to participate in the profits of the employer's trade or business, or in the profits of an affiliated employer who is entitled to deduct his contributions to the plan under section 404(a)(3)(B), pursuant to a definite formula for allocating the contributions and for distributing the funds accumulated under the plan (see paragraph (b)(1)(ii) of this section); and

(iii) In the case of a stock bonus plan, to provide employees or their beneficiaries benefits similar to those of profit-sharing plans, except that such benefits are distributable in stock of the employer, and that the contributions by the employer are not necessarily dependent upon profits. If the employer's contributions are dependent upon profits, the plan may enable employees or their beneficiaries to participate not only in the profits of the employer, but also in the profits of an affiliated employer who is entitled to deduct his contributions to the plan under section 404(a)(3)(B) (see paragraph (b)(1)(iii) of this section).

(3) In order for a trust forming part of a pension, profit-sharing, or stock bonus plan to constitute a qualified trust under section 401(a), the following tests must be met:

(i) It must be created or organized in the United States, as defined in section 7701(a)(9), and it must be maintained at all times as a domestic trust in the United States;

(ii) It must be part of a pension, profit-sharing, or stock bonus plan established by an employer for the exclusive benefit of his employees or their beneficiaries (see paragraph (b)(2) through (5) of this section);

(iii) It must be formed or availed of for the purpose of distributing to the employees or their beneficiaries the corpus and income of the fund accumulated by the trust in accordance with the plan, and, in the case of a plan which covers (as defined in paragraph (a)(2) of § 1.401–10) any self-employed individual, the time and method of such distribution must satisfy the requirements of section 401(a)(9) with respect to each employee covered by the plan (see paragraph (e) of § 1.401–11);

(iv) It must be impossible under the trust instrument at any time before the satisfaction of all liabilities with respect to employees and their beneficiaries under the trust, for any part of the corpus

or income to be used for, or diverted to, purposes other than for the exclusive benefit of the employees or their beneficiaries (see § 1.401-2);

(v) It must be part of a plan which benefits prescribed percentages of the employees, or which benefits such employees as qualify under a classification set up by the employer and found by the Commissioner not to be discriminatory in favor of certain specified classes of employees (see § 1.401-3 and, in addition, see § 1.401-12 for special rules as to plans covering owner-employees);

(vi) It must be part of a plan under which contributions or benefits do not discriminate in favor of certain specified classes of employees (see § 1.401-4);

(vii) It must be part of a plan which provides the nonforfeitable rights described in section 401(a)(7) (see § 1.401-6);

(viii) If the trust forms part of a pension plan, the plan must provide that forfeitures must not be applied to increase the benefits any employee would receive under such plan (see § 1.401-7);

(ix) It must, if the plan benefits any self-employed individual who is an owner-employee, satisfy the additional requirements for qualification contained in section 401(a)(10) and (d).

(4) For taxable years beginning after December 31, 1962, self-employed individuals may be included in qualified plans. See §§ 1.401-10 through 1.401-13.

(b) General rules. (1)(i) A pension plan within the meaning of section 401(a) is a plan established and maintained by an employer primarily to provide systematically for the payment of definitely determinable benefits to his employees over a period of years, usually for life, after retirement. Retirement benefits generally are measured by, and based on, such factors as years of service and compensation received by the employees. The determination of the amount of retirement benefits and the contributions to provide such benefits are not dependent upon profits. Benefits are not definitely determinable if funds arising from forfeitures on termination of service, or other reason, may be used to provide increased benefits for the remaining participants (see § 1.401-7, relating to the treatment of forfeitures under a qualified pension plan). A plan designed to provide benefits for employees or their beneficiaries to be paid upon retirement or over a period of years after retirement will, for the purposes of section 401(a), be considered a pension plan if the employer contributions under the plan can be determined actuarially on the basis of definitely determinable benefits, or, as in the case of money purchase pension plans, such contributions are fixed without being geared to profits. A pension plan may provide for the payment of a pension due to disability and may also provide for the payment of incidental death benefits through insurance or otherwise. However, a plan is not a pension plan if it provides for the payment of benefits not customarily included in a pension plan such as layoff benefits or benefits for sickness, accident, hospitalization, or medical expenses (except medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401-14).

(ii) A profit-sharing plan is a plan established and maintained by an employer to provide for the participation in his profits by his employees or their beneficiaries. The plan must provide a definite predetermined formula for allocating the contributions made to the plan among the participants and for distributing the funds accumulated under the plan after a fixed number of years, the attainment of a stated age, or upon the prior occurrence of some event such as layoff, illness, disability, retirement, death, or severance of employment. A formula for allocating the contributions among the participants is definite if, for example, it provides for an allocation in proportion to the basic compensation of each participant. A plan (whether or not it contains a definite predetermined formula for determining the profits to be shared with the employees) does not qualify under section 401(a) if the contributions to the plan are made at such times or in such amounts that the plan in operation discriminates in favor of officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or highly compensated employees. For the rules with respect to discrimination, see §§ 1.401-3 and 1.401-4. A profit-sharing plan within the meaning of section 401 is primarily a plan of deferred compensation, but the amounts allocated to the account of a participant may be used to provide for him or his family incidental life or accident or health insurance.

(iii) A stock bonus plan is a plan established and maintained by an employer to provide benefits similar to those of a profit-sharing plan, except that the contributions by the employer are not necessarily dependent upon profits and the benefits are distributable in stock of the employer company. For the purpose of allocating and distributing the stock of the employer which is to be shared among his employees or their beneficiaries, such a

plan is subject to the same requirements as a profit-sharing plan.

(iv) As to inclusion of full-time life insurance salesmen within the class of persons considered to be employees, see section 7701(a)(20).

(2) The term "plan" implies a permanent as distinguished from a temporary program. Thus, although the employer may reserve the right to change or terminate the plan, and to discontinue contributions thereunder, the abandonment of the plan for any reason other than business necessity within a few years after it has taken effect will be evidence that the plan from its inception was not a bona fide program for the exclusive benefit of employees in general. Especially will this be true if, for example, a pension plan is abandoned soon after pensions have been fully funded for persons in favor of whom discrimination is prohibited under section 401(a). The permanency of the plan will be indicated by all of the surrounding facts and circumstances, including the likelihood of the employer's ability to continue contributions as provided under the plan. In the case of a profit-sharing plan, other than a profit-sharing plan which covers employees and owner-employees (see section 401(d)(2)(B)), it is not necessary that the employer contribute every year or that he contribute the same amount or contribute in accordance with the same ratio every year. However, merely making a single or occasional contribution out of profits for employees does not establish a plan of profit-sharing. To be a profit-sharing plan, there must be recurring and substantial contributions out of profits for the employees. In the event a plan is abandoned, the employer should promptly notify the district director, stating the circumstances which led to the discontinuance of the plan.

(3) If the plan is so designed as to amount to a subterfuge for the distribution of profits to shareholders, it will not qualify as a plan for the exclusive benefit of employees even though other employees who are not shareholders are also included under the plan. The plan must benefit the employees in general, although it need not provide benefits for all of the employees. Among the employees to be benefited may be persons who are officers and shareholders. However, a plan is not for the exclusive benefit of employees in general if, by any device whatever, it discriminates either in eligibility requirements, contributions, or benefits in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or the highly compensated employees. See section 401(a)(3), (4), and (5). Similarly, a stock bonus or profit-sharing plan is not a plan for the exclusive benefit of employees in general if the funds therein may be used to relieve the employer from contributing to a pension plan operating concurrently and covering the same employees. All of the surrounding and attendant circumstances and the details of the plan will be indicative of whether it is a bona fide stock bonus, pension, or profit-sharing plan for the exclusive benefit of employees in general. The law is concerned not only with the form of a plan but also with its effects in operation. For example, section 401(a)(5) specifies certain provisions which of themselves are not discriminatory. However, this does not mean that a plan containing these provisions may not be discriminatory in actual operation.

(4) A plan is for the exclusive benefit of employees or their beneficiaries even though it may cover former employees as well as present employees and employees who are temporarily on leave, as, for example, in the Armed Forces of the United States. A plan covering only former employees may qualify under section 401(a) if it complies with the provisions of section 401(a)(3)(B), with respect to coverage, and section 401(a)(4), with respect to contributions and benefits, as applied to all of the former employees. The term "beneficiaries" of an employee within the meaning of section 401 includes the estate of the employee, dependents of the employee, persons who are the natural objects of the employee's bounty, and any persons designated by the employee to share in the benefits of the plan after the death of the employee.

(5)(i) No specific limitations are provided in section 401(a) with respect to investments which may be made by the trustees of a trust qualifying under section 401(a). Generally, the contributions may be used by the trustees to purchase any investments permitted by the trust agreement to the extent allowed by local law. However, such a trust will be subject to tax under section 511 with respect to any "unrelated business taxable income" (as defined in section 512) realized by it from its investments.

(ii) Where the trust funds are invested in stock or securities of, or loaned to, the employer or other person described in section 503(b), full disclosure must be made of the reasons for such arrangement and the conditions under which such investments are made in order that a determination may be made whether the trust serves any purpose other than constituting part of a plan for the exclusive benefit of employees. The trustee

shall report any of such investments on the return which under section 6033 it is required to file and shall with respect to any such investment furnish the information required by such return. See § 1.6033-1.

(c) Portions of years. A qualified status must be maintained throughout the entire taxable year of the trust in order for the trust to obtain any exemption for such year. But see section 401(a)(6) and § 1.401-3.

(d) Plan of several employers. A trust forming part of a plan of several employers for their employees will be qualified if all the requirements are otherwise satisfied.

(e) Determination of exemptions and returns. **(1)** An employees' trust may request a determination letter as to its qualification under section 401 and exemption under section 501. For the procedure for obtaining such a determination letter see paragraph (*l*) of § 601.201 of this chapter (Statement of Procedural Rules).

(2) A trust which qualifies under section 401(a) and which is exempt under section 501(a) must file a return in accordance with section 6033 and the regulations thereunder. See §§ 1.6033-1 and 1.6033-2(a)(3). In case such a trust realizes any unrelated business taxable income, as defined in section 512, such trust is also required to file a return with respect to such income. See paragraph (e) of § 1.6012-2 and paragraph (a)(5) of § 1.6012-3 for requirements with respect to such returns. For information required to be furnished periodically by an employer with respect to the qualification of a plan, see §§ 1.404(a)-2, 1.404(a)-2A, and 1.6033-2(a)(2)(ii)(*i*.)

[T.D. 6500, 25 FR 11670, Nov. 26, 1960, as amended by T.D. 6675, 28 FR 10118, Sept. 17, 1963; T.D. 6722, 29 FR 5071, April 14, 1964; T.D. 7168, 37 FR 5024, March 9, 1972; T.D. 7428, 41 FR 34619, Aug. 16, 1976]

§ 1.401-2 Impossibility of diversion under the trust instrument.

(a) In general. **(1)** Under section 401(a)(2) a trust is not qualified unless under the trust instrument it is impossible (in the taxable year and at any time thereafter before the satisfaction of all liabilities to employees or their beneficiaries covered by the trust) for any part of the trust corpus or income to be used for, or diverted to, purposes other than for the exclusive benefit of such employees or their beneficiaries. This section does not apply to funds of the trust which are allocated to provide medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401-14. For the rules prohibiting diversion of such funds and the requirement of reversion to the employer after satisfaction of all liabilities under the medical benefits account, see paragraph (c)(4) and (5) of § 1.401-14. For rules permitting reversion to the employer of amounts held in a section 415 suspense account, see § 1.401(a)-2(b).

(2) As used in section 401(a)(2), the phrase "if under the trust instrument it is impossible" means that the trust instrument must definitely and affirmatively make it impossible for the nonexempt diversion or use to occur, whether by operation or natural termination of the trust, by power of revocation or amendment, by the happening of a contingency, by collateral arrangement, or by any other means. Although it is not essential that the employer relinquish all power to modify or terminate the rights of certain employees covered by the trust, it must be impossible for the trust funds to be used or diverted for purposes other than for the exclusive benefit of his employees or their beneficiaries.

(3) As used in section 401(a)(2), the phrase "purposes other than for the exclusive benefit of his employees or their beneficiaries" includes all objects or aims not solely designed for the proper satisfaction of all liabilities to employees or their beneficiaries covered by the trust.

(b) Meaning of "liabilities". **(1)** The intent and purpose in section 401(a)(2) of the phrase "prior to the satisfaction of all liabilities with respect to employees and their beneficiaries under the trust" is to permit the employer to reserve the right to recover at the termination of the trust, and only at such termination, any balance remaining in the trust which is due to erroneous actuarial computations during the previous life of the trust. A balance due to an "erroneous actuarial computation" is the surplus arising because actual requirements differ from the expected requirements even though the latter were based upon previous actuarial valuations of liabilities or determinations of costs of providing pension benefits under the plan and were made by a person competent to make such determinations in accordance with reasonable assumptions as to mortality, interest, etc., and correct procedures relating to the method of funding. For example, a trust has accumulated assets of $1,000,000 at the time of liquidation, determined by acceptable actuarial procedures using reasonable assumptions as to interest, mortality, etc., as being necessary to provide the benefits in accordance with the provisions of the plan. Upon such liquidation it is found that $950,000 will

satisfy all of the liabilities under the plan. The surplus of $50,000 arises, therefore, because of the difference between the amounts actuarially determined and the amounts actually required to satisfy the liabilities. This $50,000, therefore, is the amount which may be returned to the employer as the result of an erroneous actuarial computation. If, however, the surplus of $50,000 had been accumulated as a result of a change in the benefit provisions or in the eligibility requirements of the plan, the $50,000 could not revert to the employer because such surplus would not be the result of an erroneous actuarial computation.

(2) The term "liabilities" as used in section 401(a)(2) includes both fixed and contingent obligations to employees. For example, if 1,000 employees are covered by a trust forming part of a pension plan, 300 of whom have satisfied all the requirements for a monthly pension, while the remaining 700 employees have not yet completed the required period of service, contingent obligations to such 700 employees have nevertheless arisen which constitute "liabilities" within the meaning of that term. It must be impossible for the employer (or other nonemployee) to recover any amounts other than such amounts as remain in the trust because of "erroneous actuarial computations" after the satisfaction of all fixed and contingent obligations. Furthermore, the trust instrument must contain a definite affirmative provision to this effect, irrespective of whether the obligations to employees have their source in the trust instrument itself, in the plan of which the trust forms a part, or in some collateral instrument or arrangement forming a part of such plan, and regardless of whether such obligations are, technically speaking, liabilities of the employer, of the trust, or of some other person forming a part of the plan or connected with it.

[T.D. 6500, 25 FR 11672, Nov. 26, 1960, as amended by T.D. 6722, 29 FR 5072, April 14, 1964; T.D. 7748, 46 FR 1695, Jan. 7, 1981]

§ 1.401–3 Requirements as to coverage.

(a)(1) In order to insure that stock bonus, pension, and profit-sharing plans are utilized for the welfare of employees in general, and to prevent the trust device from being used for the principal benefit of shareholders, officers, persons whose principal duties consist in supervising the work of other employees, or highly paid employees, or as a means of tax avoidance, a trust will not be qualified unless it is part of a plan which satisfies the coverage requirements of section 401(a)(3). However, if the plan covers any individual who is an owner-employee, as defined in section 401(c)(3), the requirements of section 401(a)(3) and this section are not applicable to such plan, but the plan must satisfy the requirements of section 401(d) (see § 1.401–12).

(2) The percentage requirements in section 401(a)(3)(A) refer to a percentage of all the active employees, including employees temporarily on leave, such as those in the Armed Forces of the United States, if such employees are eligible under the plan.

(3) The application of section 401(a)(3)(A) may be illustrated by the following example:

Example. A corporation adopts a plan at a time when it has 1,000 employees. The plan provides that all full-time employees who have been employed for a period of two years and have reached the age of 30 shall be eligible to participate. The plan also requires participating employees to contribute 3 percent of their monthly pay. At the time the plan is made effective 100 of the 1,000 employees had not been employed for a period of two years. Fifty of the employees were seasonal employees whose customary employment did not exceed five months in any calendar year. Twenty-five of the employees were part-time employees whose customary employment did not exceed 20 hours in any one week. One hundred and fifty of the full-time employees who had been employed for two years or more had not yet reached age 30. The requirements of section 401(a)(3)(A) will be met if 540 employees are covered by the plan, as shown by the following computation:

(i) Total employees with respect to whom the percentage requirements are applicable (1,000 minus 175 (100 plus 50 plus 25))	825
(ii) Employees not eligible to participate because of age requirements	150
(iii) Total employees eligible to participate	675
(iv) Percentage of employees in item (i) eligible to participate	81+%
(v) Minimum number of participating employees to qualify the plan (80 percent of 675)	540

If only 70 percent, or 578, of the 825 employees satisfied the age and service requirements, then 462 (80 percent of 578) participating employees would satisfy the percentage requirements.

(b) If a plan fails to qualify under the percentage requirements of section 401(a)(3)(A), it may still qualify under section 401(a)(3)(B) provided always that (as required by section 401(a)(3) and (4)) the plan's eligibility conditions, benefits, and contributions do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or the highly compensated employees.

(c) Since, for the purpose of section 401, a profit-sharing plan is a plan which provides for distributing the funds accumulated under the plan after a fixed number of years, the attainment of a stated age, or upon the prior occurrence of some

event such as illness, disability, retirement, death, layoff, or severance of employment, employees who receive the amounts allocated to their accounts before the expiration of such a period of time or the occurrence of such a contingency shall not be considered covered by a profit-sharing plan in determining whether the plan meets the coverage requirements of section 401(a)(3)(A) and (B). Thus, in case a plan permits employees to receive immediately the amounts allocated to their accounts, or to have such amounts paid to a profit-sharing plan for them, the employees who receive the shares immediately shall not, for the purpose of section 401, be considered covered by a profit-sharing plan.

(d) Section 401(a)(5) sets out certain classifications that will not in themselves be considered discriminatory. However, those so designated are not intended to be exclusive. Thus, plans may qualify under section 401(a)(3)(B) even though coverage thereunder is limited to employees who have either reached a designated age or have been employed for a designated number of years, or who are employed in certain designated departments or are in other classifications, provided the effect of covering only such employees does not discriminate in favor of officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees. For example, if there are 1,000 employees, and the plan is written for only salaried employees, and consequently only 500 employees are covered, that fact alone will not justify the conclusion that the plan does not meet the coverage requirements of section 401(a)(3)(B). Conversely, if a contributory plan is offered to all of the employees but the contributions required of the employee participants are so burdensome as to make the plan acceptable only to the highly paid employees, the classification will be considered discriminatory in favor of such highly paid employees.

(e)(1) Section 401(a)(5) contains a provision to the effect that a classification shall not be considered discriminatory within the meaning of section 401(a)(3)(B) merely because all employees whose entire annual remuneration constitutes "wages" under section 3121(a)(1) (for purposes of the Federal Insurance Contributions Act, chapter 21 of the Code) are excluded from the plan. A reference to section 3121(a)(1) for years after 1954 shall be deemed a reference to section 1426(a)(1) of the Internal Revenue Code of 1939 for years before 1955. This provision, in conjunction with section 401(a)(3)(B), is intended to permit the qualification of plans which supplement the old-age, survivors, and disability insurance benefits under the Social Security Act (42 U.S.C. ch. 7). Thus, a classification which excludes all employees whose entire remuneration constitutes "wages" under section 3121(a)(1), will not be considered discriminatory merely because of such exclusion. Similarly, a plan which includes all employees will not be considered discriminatory solely because the contributions or benefits based on that part of their remuneration which is excluded from wages under section 3121(a)(1) differ from the contributions or benefits based on that part of their remuneration which is not so excluded. However, in making his determination with respect to discrimination in classification under section 401(a)(3)(B), the Commissioner will consider whether the total benefits resulting to each employee under the plan and under the Social Security Act, or under the Social Security Act only, establish an integrated and correlated retirement system satisfying the tests of section 401(a). If, therefore, a classification of employees under a plan results in relatively or proportionately greater benefits for employees earning above any specified salary amount or rate than for those below any such salary amount or rate, it may be found to be discriminatory within the meaning of section 401(a)(3)(B). If, however, the relative or proportionate differences in benefits which result from such classification are approximately offset by the old-age, survivors, and disability insurance benefits which are provided by the Social Security Act and which are not attributable to employee contributions under the Federal Insurance Contributions Act, the plan will be considered to be properly integrated with the Social Security Act and will, therefore, not be considered discriminatory.

(2)(i) For purposes of determining whether a plan is properly integrated with the Social Security Act, the amount of old-age, survivors, and disability insurance benefits which may be considered as attributable to employer contributions under the Federal Insurance Contributions Act is computed on the basis of the following:

(a) The rate at which the maximum monthly old-age insurance benefit is provided under the Social Security Act is considered to be the average of (1) the rate at which the maximum benefit currently payable under the Act (*i.e.*, in 1971) is provided to an employee retiring at age 65, and (2) the rate at which the maximum benefit ultimately payable under the Act (*i.e.*, in 2010) is provided to an employee retiring at age 65. The resulting figure is 43 percent of the average monthly wage on which such benefit is computed.

(b) The total old-age, survivors, and disability insurance benefits with respect to an employee is considered to be 162 percent of the employee's old-age insurance benefits. The resulting figure is 70 percent of the average monthly wage on which it is computed.

(c) In view of the fact that social security benefits are funded through equal contributions by the employer and employee, 50 percent of such benefits is considered attributable to employer contributions. The resulting figure is 35 percent of the average monthly wage on which the benefit is computed.

Under these assumptions, the maximum old-age, survivors, and disability insurance benefits which may be attributed to employer contributions under the Federal Insurance Contributions Act is an amount equal to 35 percent of the earnings on which they are computed. These computations take into account all amendments to the Social Security Act through the Social Security Amendments of 1971 (85 Stat. 6). It is recognized, however, that subsequent amendments to this Act may increase the percentages described in (a) or (b) of this subdivision (i), or both. If this occurs, the method used in this subparagraph for determining the integration formula may result in a figure under (c) of this subdivision (i) which is greater than 35 percent and a plan could be amended to adopt such greater figure in its benefit formula. In order to minimize future plan amendments of this nature, an employer may anticipate future changes in the Social Security Act by immediately utilizing such a higher figure, but not in excess of 37½ percent, in developing its benefit formula.

(ii) Under the rules provided in this subparagraph, a classification of employees under a noncontributory pension or annuity plan which limits coverage to employees whose compensation exceeds the applicable integration level under the plan will not be considered discriminatory within the meaning of section 401(a)(3)(B), where:

(a) The integration level applicable to an employee is his covered compensation, or is (1) in the case of an active employee, a stated dollar amount uniformly applicable to all active employees which is not greater than the covered compensation of any active employee, and (2) in the case of a retired employee an amount which is not greater than his covered compensation. (For rules relating to determination of an employee's covered compensation, see subdivision (iv) of this subparagraph.)

(b) The rate at which normal annual retirement benefits are provided for any employee with respect to his average annual compensation in excess of the plan's integration level applicable to him does not exceed 37½ percent.

(c) Average annual compensation is defined to mean the average annual compensation over the highest 5 consecutive years.

(d) There are no benefits payable in case of death before retirement.

(e) The normal form of retirement benefits is a straight life annuity, and if there are optional forms, the benefit payments under each optional form are actuarially equivalent to benefit payments under the normal form.

(f) In the case of any employee who reaches normal retirement age before completion of 15 years of service with the employer, the rate at which normal annual retirement benefits are provided for him with respect to his average annual compensation in excess of the plan's integration level applicable to him does not exceed 2½ percent for each year of service.

(g) Normal retirement age is not lower than age 65.

(h) Benefits payable in case of retirement or any other severance of employment before normal retirement age cannot exceed the actuarial equivalent of the maximum normal retirement benefits, which might be provided in accordance with (a) through (g) of this subdivision (ii), multiplied by a fraction, the numerator of which is the actual number of years of service of the employee at retirement or severance, and the denominator of which is the total number of years of service he would have had if he had remained in service until normal retirement age. A special disabled life mortality table shall not be used in determining the actuarial equivalent in the case of severance due to disability.

(iii)(a) If a plan was properly integrated with old-age and survivors insurance benefits on July 5, 1968 (hereinafter referred to as an "existing plan"), then, notwithstanding the fact that such plan does not satisfy the requirements of subdivision (ii) of this subparagraph, it will continue to be considered properly integrated with such benefits until January 1, 1972. Such plan will be considered properly integrated after December 31, 1971, so long as the benefits provided under the plan for each employee equal the sum of—

(1) The benefits to which he would be entitled under a plan which, on July 5, 1968, would have been considered properly integrated with old-age and survivors insurance benefits, and under which benefits are provided at the same (or a lesser) rate with respect to the same portion of compensation with respect to which benefits are provided under the existing plan, multiplied by the percentage of his total service with the employer performed before a specified date not later than January 1, 1972; and

(2) The benefits to which he would be entitled under a plan satisfying the requirements of subdivision (ii) of this subparagraph, multiplied by the percentage of his total service with the employer performed on and after such specified date.

(b) A plan which, on July 5, 1968, was properly integrated with old-age and survivors insurance benefits will not be considered not to be properly integrated with such benefits thereafter merely because such plan provides a minimum benefit for each employee (other than an employee who owns, directly or indirectly, stock possessing more than 10 percent of the total combined voting power or value of all classes of stock of the employer corporation) equal to the benefit to which he would be entitled under the plan as in effect on July 5, 1968, if he continued to earn annually until retirement the same amount of compensation as he earned in 1967.

(c) If a plan was properly integrated with old-age and survivors insurance benefits on May 17, 1971, notwithstanding the fact that such plan does not satisfy the requirements of subdivision (ii) of this subparagraph, it will continue to be considered properly integrated with such benefits until January 1, 1972.

(iv) For purposes of this subparagraph, an employee's covered compensation is the amount of compensation with respect to which old-age insurance benefits would be provided for him under the Social Security Act (as in effect at any uniformly applicable date occurring before the employee's separation from the service) if for each year until he attains age 65 his annual compensation is at least equal to the maximum amount of earnings subject to tax in each such year under the Federal Insurance Contributions Act. A plan may provide that an employee's covered compensation is the amount determined under the preceding sentence rounded to the nearest whole multiple of a stated dollar amount which does not exceed $600.

(v) In the case of an integrated plan providing benefits different from those described in subdivision (ii) or (iii) (whichever is applicable) of this subparagraph, or providing benefits related to years of service, or providing benefits purchasable by stated employer contributions, or under the terms of which the employees contribute, or providing a combination of any of the foregoing variations, the plan will be considered to be properly integrated only if, as determined by the Commissioner, the benefits provided thereunder by employer contributions cannot exceed in value the benefits described in subdivision (ii) or (iii) (whichever is applicable) of this subparagraph. Similar principles will govern in determining whether a plan is properly integrated if participation therein is limited to employees earning in excess of amounts other than those specified in subdivision (iv) of this subparagraph, or if it bases benefits or contributions on compensation in excess of such amounts, or if it provides for an offset of benefits otherwise payable under the plan on account of old-age, survivors, and disability insurance benefits. Similar principles will govern in determining whether a profit-sharing or stock bonus plan is properly integrated with the Social Security Act.

(3) A plan supplementing the Social Security Act and excluding all employees whose entire annual remuneration constitutes "wages" under section 3121(a)(1) will not, however, be deemed discriminatory merely because, for administrative convenience, it provides a reasonable minimum benefit not to exceed $20 a month.

(4) Similar considerations, to the extent applicable in any case, will govern classifications under a plan supplementing the benefits provided by other Federal or State laws. See section 401(a)(5).

(5) If a plan provides contributions or benefits for a self-employed individual, the rules relating to the integration of such a plan with the contributions or benefits under the Social Security Act are set forth in paragraph (c) of § 1.401-11 and paragraph (h) of § 1.401-12.

(f) An employer may designate several trusts or a trust or trusts and an annuity plan or plans as constituting one plan which is intended to qualify under section 401(a)(3), in which case all of such trusts and plans taken as a whole may meet the requirements of such section. The fact that such combination of trusts and plans fails to qualify as one plan does not prevent such of the trusts and plans as qualify from meeting the requirements of section 401(a).

(g) It is provided in section 401(a)(6) that a plan will satisfy the requirements of section 401(a)(3), if

on at least one day in each quarter of the taxable year of the plan it satisfies such requirements. This makes it possible for a new plan requiring contributions from employees to qualify if by the end of the quarter-year in which the plan is adopted it secures sufficient contributing participants to meet the requirements of section 401(a)(3). It also affords a period of time in which new participants may be secured to replace former participants, so as to meet the requirements of either subparagraph (A) or (B) of section 401(a)(3).

[T.D. 6500, 25 FR 11672, Nov. 26, 1960, as amended by T.D. 6675, 28 FR 10119, Sept. 17, 1963; T.D. 6982, 33 FR 16499, Nov. 13, 1968; T.D. 7134, 36 FR 13592, July 22, 1971; 36 FR 13990, July 29, 1971]

§ 1.401–4 Discrimination as to contributions or benefits.

(a)(1)(i) In order to qualify under section 401(a), a trust must not only meet the coverage requirements of section 401(a)(3), but, as provided in section 401(a)(4), it must also be part of a plan under which there is no discrimination in contributions or benefits in favor of officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees as against other employees whether within or without the plan.

(ii) Since, for the purpose of section 401, a profit-sharing plan is a plan which provides for distributing the funds accumulated under the plan after a fixed number of years, the attainment of a stated age, or upon the prior occurrence of some event such as illness, disability, retirement, death, layoff, or severance of employment, any amount allocated to an employee which is withdrawn before the expiration of such a period of time or the occurrence of such a contingency shall not be considered in determining whether the contributions under the plan discriminate in favor of officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees. Thus, in case a plan permits employees to receive immediately the whole or any part of the amounts allocated to their accounts, or to have the whole or any part of such amounts paid to a profit-sharing plan for them, any amounts which are received immediately shall not, for the purpose of section 401, be considered contributed to a profit-sharing plan.

(iii) Funds in a stock bonus or profit-sharing plan arising from forfeitures on termination of service, or other reason, must not be allocated to the remaining participants in such a manner as will effect the prohibited discrimination. With respect to forfeitures in a pension plan, see § 1.401–7.

(2)(i) Section 401(a)(5) sets out certain provisions which will not in and of themselves be discriminatory within the meaning of section 401(a)(3) or (4). See § 1.401–3. Thus, a plan will not be considered discriminatory merely because the contributions or benefits bear a uniform relationship to total compensation or to the basic or regular rate of compensation, or merely because the contributions or benefits based on that part of the annual compensation of employees which is subject to the Federal Insurance Contributions Act (chapter 21 of the Code) differ from the contributions or benefits based on any excess of such annual compensation over such part. With regard to the application of the rules of section 401(a)(5) in the case of a plan which benefits a self-employed individual, see paragraph (c) of § 1.401–11.

(ii) The exceptions specified in section 401(a)(5) are not an exclusive enumeration, but are merely a recital of provisions frequently encountered which will not of themselves constitute forbidden discrimination in contributions or benefits.

(iii) Variations in contributions or benefits may be provided so long as the plan, viewed as a whole for the benefit of employees in general, with all its attendant circumstances, does not discriminate in favor of employees within the enumerations with respect to which discrimination is prohibited. Thus, benefits in a stock bonus or profit-sharing plan which vary by reason of an allocation formula which takes into consideration years of service, or other factors, are not prohibited unless they discriminate in favor of such employees.

(b) A plan which excludes all employees whose entire remuneration constitutes wages under section 3121(a)(1) (relating to the Federal Insurance Contributions Act), or a plan under which the contributions or benefits based on that part of an employee's remuneration which is excluded from "wages" under such act differs from the contributions or benefits based on that part of the employee's remuneration which is not so excluded, or a plan under which the contributions or benefits differ because of any retirement benefit created under State or Federal law, will not be discriminatory because of such exclusion or difference, provided the total benefits resulting under the plan and under such law establish an integrated and correlated retirement system satisfying the tests of section 401(a).

(c)(1) Although a qualified plan may provide for termination at will by the employer or discontinuance of contributions thereunder, this will not of itself prevent a trust from being a qualified trust. However, a qualified pension plan must expressly incorporate provisions which comply with the restrictions contained in subparagraph (2) of this paragraph at the time the plan is established, unless (i) it is reasonably certain at the inception of the plan that such restrictions would not affect the amount of contributions which may be used for the benefit of any employee, or (ii) the Commissioner determines that such provisions are not necessary to prevent the prohibited discrimination that may occur in the event of any early termination of the plan. Although these provisions are the only provisions required to be incorporated in the plan to prevent the discrimination that may arise because of an early termination of the plan, the plan may in operation result in the discrimination prohibited by section 401(a)(4), unless other provisions are later incorporated in the plan. Any pension plan containing a provision described in this paragraph shall not fail to satisfy section 411(a), (d)(2) and (d)(3) merely by reason of such a plan provision. Paragraph (c)(7) of this section sets forth special early termination rules applicable to certain qualified defined benefit plans for plan years affected by the Employee Retirement Income Security Act of 1974 ("ERISA"). Paragraph (c)(7) of this section does not contain all the rules required by the enactment of ERISA.

(2)(i) If employer contributions under a qualified pension plan may be used for the benefit of an employee who is among the 25 highest paid employees of the employer at the time the plan is established and whose anticipated annual pension under the plan exceeds $1,500, such plan must provide that upon the occurrence of the conditions described in subdivision (ii) of this subparagraph, the employer contributions which are used for the benefit of any such employee are restricted in accordance with subdivision (iii) of this subparagraph.

(ii) The restrictions described in subdivision (iii) of this subparagraph become applicable if—

(a) The plan is terminated within 10 years after its establishment,

(b) The benefits of an employee described in subdivision (i) of this subparagraph become payable within 10 years after the establishment of the plan, or

(c) The benefits of an employee described in subdivision (i) of this subparagraph become payable after the plan has been in effect for 10 years, and the full current costs of the plan for the first 10 years have not been funded.

In the case of an employee described in (b) of this subdivision, the restrictions will remain applicable until the plan has been in effect for 10 years, but if at that time the full current costs have been funded the restrictions will no longer apply to the benefits payable to such an employee. In the case of an employee described in (b) or (c) of this subdivision, if at the end of the first 10 years the full current costs are not met, the restrictions will continue to apply until the full current costs are funded for the first time.

(iii) The restrictions required under subdivision (i) of this subparagraph must provide that the employer contributions which may be used for the benefit of an employee described in such subdivision shall not exceed the greater of $20,000, or 20 percent of the first $50,000 of the annual compensation of such employee multiplied by the number of years between the date of the establishment of the plan and—

(a) The date of the termination of the plan,

(b) In the case of an employee described in subdivision (ii)(b) of this subparagraph, the date the benefit of the employee becomes payable, if before the date of the termination of the plan, or

(c) In the case of an employee described in subdivision (ii)(c) of this subparagraph, the date of the failure to meet the full current costs of the plan. However, if the full current costs of the plan have not been met on the date described in (a) or (b) of this subdivision, whichever is applicable, then the date of the failure to meet such full current costs shall be substituted for the date referred to in (a) or (b) of this subdivision. For purposes of determining the contributions which may be used for the benefit of an employee when (b) of this subdivision applies, the number of years taken into account may be recomputed for each year if the full current costs of the plan are met for such year.

(iv) For purposes of this subparagraph, the employer contributions which, at a given time, may be used for the benefits of an employee include any unallocated funds which would be used for his benefits if the plan were then terminated or the employee were then to withdraw from the plan, as well as all contributions allocated up to that time exclusively for his benefits.

(v) The provisions of this subparagraph apply to a former or retired employee of the employer, as

well as to an employee still in the employer's service.

(vi) The following terms are defined for purposes of this subparagraph—

(a) The term "benefits" includes any periodic income, any withdrawal values payable to a living employee, and the cost of any death benefits which may be payable after retirement on behalf of an employee, but does not include the cost of any death benefits with respect to an employee before retirement nor the amount of any death benefits actually payable after the death of an employee whether such death occurs before or after retirement.

(b) The term "full current costs" means the normal cost, as defined in § 1.404(a)–6, for all years since the effective date of the plan, plus interest on any unfunded liability during such period.

(c) The term "annual compensation" of an employee means either such employee's average regular annual compensation, or such average compensation over the last five years, or such employee's last annual compensation if such compensation is reasonably similar to his average regular annual compensation for the five preceding years.

(3) The amount of the employer contributions which can be used for the benefit of a restricted employee may be limited either by limiting the annual amount of the employer contributions for the designated employee during the period affected by the limitation, or by limiting the amount of funds under the plan which can be used for the benefit of such employee, regardless of the amount of employer contributions.

(4) The restrictions contained in subparagraph (2) of this paragraph may be exceeded for the purpose of making current retirement income benefit payments to retired employees who would otherwise be subject to such restrictions, if—

(i) The employer contributions which may be used for any such employee in accordance with the restrictions contained in subparagraph (2) of this paragraph are applied either (a) to provide level amounts of annuity in the basic form of benefit provided for under the plan for such employee at retirement (or, if he has already retired, beginning immediately), or (b) to provide level amounts of annuity in an optional form of benefit provided under the plan if the level amount of annuity under such optional form of benefit is not greater than the level amount of annuity under the basic form of benefit provided under the plan;

(ii) The annuity thus provided is supplemented, to the extent necessary to provide the full retirement income benefits in the basic form called for under the plan, by current payments to such employee as such benefits come due; and

(iii) Such supplemental payments are made at any time only if the full current costs of the plan have then been met, or the aggregate of such supplemental payments for all such employees does not exceed the aggregate employer contributions already made under the plan in the year then current.

If disability income benefits are provided under the plan, the plan may contain like provisions with respect to the current payment of such benefits.

(5) If a plan has been changed so as to increase substantially the extent of possible discrimination as to contributions and as to benefits actually payable in event of the subsequent termination of the plan or the subsequent discontinuance of contributions thereunder, then the provisions of this paragraph shall be applied to the plan as so changed as if it were a new plan established on the date of such change. However, the provision in subparagraph (2)(iii) of this paragraph that the unrestricted amount of employer contributions on behalf of any employee is at least $20,000 is applicable to the aggregate amount contributed by the employer on behalf of such employee from the date of establishment of the original plan, and, for purposes of determining if the employee's anticipated annual pension exceeds $1,500, both the employer contributions on the employee's behalf prior to the date of the change in the plan and those expected to be made on his behalf subsequent to the date of the change (based on the employee's rate of compensation on the date of the change) are to be taken into account.

(6) This paragraph shall apply to taxable years of a qualified plan commencing after September 30, 1963. In the case of an early termination of a qualified pension plan during any such taxable year, the employer contributions which may be used for the benefit of any employee must conform to the requirements of this paragraph. However, any pension plan which is qualified on September 30, 1963, will not be disqualified merely because it does not expressly include the provisions prescribed in this paragraph.

(7)(i) A qualified defined benefit plan subject to section 412 (without regard to section 412(h)(2)) shall not be required to contain the restriction described in paragraph (c)(2)(ii)(c) of this section

applicable to an employee in a plan whose full current costs for the first 10 years have not been funded.

(ii) A qualified defined benefit plan covered by section 4021(a) of ERISA ("qualified Title IV plan") shall satisfy the restrictions in paragraph (c)(2) of this section only if the plan satisfies this paragraph (c)(7). A plan satisfies this paragraph (c)(7) by providing that employer contributions which may be used for the benefit of an employee described in paragraph (c)(2) of this section who is a substantial owner, as defined in section 4022(b)(5) of ERISA, shall not exceed the greater of the dollar amount described in paragraph (c)(2)(iii) of this section or a dollar amount which equals the present value of the benefit guaranteed for such employee under section 4022 of ERISA, or if the plan has not terminated, the present value of the benefit that would be guaranteed if the plan terminated on the date the benefit commences, determined in accordance with regulations of the Pension Benefit Guaranty Corporation ("PBGC").

(iii) A plan satisfies this paragraph (c)(7) by providing that employer contributions which may be used for the benefit of all employees described in paragraph (c)(2) of this section (other than an employee who is a substantial owner as defined in section 4022(b)(5) of ERISA) shall not exceed the greater of the dollar amount described in paragraph (c)(2)(iii) of this section or a dollar amount which equals the present value of the maximum benefit described in section 4022(b)(3)(B) of ERISA (determined on the date the plan terminates or on the date benefits commence, whichever is earlier and determined in accordance with regulations of PBGC) without regard to any other limitations in section 4022 of ERISA.

(iv) A plan provision satisfying this paragraph (c)(7) may be adopted by amendment or by incorporation at the time of establishment. Any allocation of assets attributable to employer contributions to an employee which exceeds the dollar limitation in this paragraph (c)(7) may be reallocated to prevent prohibited discrimination.

(v) The early termination rules in the preceding subparagraphs (1) through (6) apply to a qualified Title IV plan except where such rules are determined by the Commissioner to be inconsistent with the rules of this paragraph (c)(7), § 1.411(d)–2, and section 4044(b)(4) of ERISA. The early termination rules of this paragraph (c)(7) contain some of the rules under section 401(a)(4) and (a)(7), as in effect on September 2, 1974, and section 411(d)(2) and (3). Section 1.411(d)–2 also contains certain discrimination and vesting rules which are applicable to plan terminations.

(vi) Paragraph (c)(7) of this section applies to plan terminations occurring on or after March 12, 1984. For distributions not on account of plan terminations, paragraph (c)(7) applies to distributions in plan years beginning after December 31, 1983. However, a plan may elect to apply that paragraph to distributions not on account of plan termination on or after January 10, 1984.

[T.D. 6500, 25 FR 11674, Nov. 26, 1960, as amended by T.D. 6675, 28 FR 10119, Sept. 17, 1963; T.D. 7934, 49 FR 1183, Jan. 10, 1984; 49 FR 2104, Jan. 18, 1984]

§ 1.401–5 Period for which requirements of section 401(a)(3), (4), (5), and (6) are applicable with respect to plans put into effect before September 2, 1974.

A pension, profit-sharing, stock bonus, or annuity plan shall be considered as satisfying the requirements of section 401(a)(3), (4), (5), and (6) for the period beginning with the date on which it was put into effect and ending with the 15th day of the third month following the close of the taxable year of the employer in which the plan was put into effect, if all the provisions of the plan which are necessary to satisfy such requirements are in effect by the end of such period and have been made effective for all purposes with respect to the whole of such period. Thus, if an employer in 1954 adopts such a plan as of January 1, 1954, and makes a return on the basis of the calendar year, he will have until March 15, 1955, to amend his plan so as to make it satisfy the requirements of section 401(a)(3), (4), (5), and (6) for the calendar year 1954 provided that by March 15, 1955, all provisions of such plan necessary to satisfy such requirements are in effect and have been made retroactive for all purposes to January 1, 1954, the effective date of the plan. If an employer is on a fiscal year basis, for example, April 1 to March 31, and in 1954 adopts such a plan effective as of April 1, 1954, he will have until June 15, 1955, to amend his plan so as to make it satisfy the requirements of section 401(a)(3), (4), (5), and (6) for the fiscal year beginning April 1, 1954, provided that by June 15, 1955, all provisions of such plan necessary to satisfy such requirements are in effect and have been made retroactive for all purposes to April 1, 1954, the effective date of the plan. It should be noted that under section 401(b) the period in which a plan may be amended to qualify under section 401(a) ends before the date on which taxpayers other than corporations are required to

file income tax returns. See section 6072. This section shall not apply to any pension, profit-sharing, stock bonus, or annuity plan put into effect after September 1, 1974, and shall not apply with respect to any disqualifying provision to which § 1.401(b)–1 applies.

[T.D. 6500, 25 FR 11674, Nov. 26, 1960, as amended by T.D. 7436, 41 FR 42653, Sept. 28, 1976]

§ 1.401–6 Termination of a qualified plan.

(a) General rules. (1) In order for a pension, profit-sharing, or stock bonus trust to satisfy the requirements of section 401, the plan of which such trust forms a part must expressly provide that, upon the termination of the plan or upon the complete discontinuance of contributions under the plan, the rights of each employee to benefits accrued to the date of such termination or discontinuance, to the extent then funded, or the rights of each employee to the amounts credited to his account at such time, are nonforfeitable. As to what constitutes nonforfeitable rights of an employee, see paragraph (a)(2) of § 1.402(b)–1.

(2)(i) A qualified plan must also provide for the allocation of any previously unallocated funds to the employees covered by the plan upon the termination of the plan or the complete discontinuance of contributions under the plan. Such provision may be incorporated in the plan at its inception or by an amendment made prior to the termination of the plan or the discontinuance of contributions thereunder.

(ii) Any provision for the allocation of unallocated funds is acceptable if it specifies the method to be used and does not conflict with the provisions of section 401(a)(4) and the regulations thereunder. The allocation of unallocated funds may be in cash or in the form of other benefits provided under the plan. However, the allocation of the funds contributed by the employer among the employees need not necessarily benefit all the employees covered by the plan. For example, an allocation may be satisfactory if priority is given to benefits for employees over the age of 50 at the time of the termination of the plan, or those who then have at least 10 years of service, if there is no possibility of discrimination in favor of employees who are officers, shareholders, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees.

(iii) Subdivisions (i) and (ii) of this subparagraph do not require the allocation of amounts to the account of any employee if such amounts are not required to be used to satisfy the liabilities with respect to employees and their beneficiaries under the plan (see section 401(a)(2)).

(b) Termination defined. (1) Whether a plan is terminated is generally a question to be determined with regard to all the facts and circumstances in a particular case. For example, a plan is terminated when, in connection with the winding up of the employer's trade or business, the employer begins to discharge his employees. However, a plan is not terminated, for example, merely because an employer consolidates or replaces that plan with a comparable plan. Similarly, a plan is not terminated merely because the employer sells or otherwise disposes of his trade or business if the acquiring employer continues the plan as a separate and distinct plan of its own, or consolidates or replaces that plan with a comparable plan. See paragraph (d)(4) of § 1.381(c)(11)–1 for the definition of comparable plan. In addition, the Commissioner may determine that other plans are comparable for purposes of this section.

(2) For purposes of this section, the term "termination" includes both a partial termination and a complete termination of a plan. Whether or not a partial termination of a qualified plan occurs when a group of employees who have been covered by the plan are subsequently excluded from such coverage either by reason of an amendment to the plan, or by reason of being discharged by the employer, will be determined on the basis of all the facts and circumstances. Similarly, whether or not a partial termination occurs when benefits or employer contributions are reduced, or the eligibility or vesting requirements under the plan are made less liberal, will be determined on the basis of all the facts and circumstances. However, if a partial termination of a qualified plan occurs, the provisions of section 401(a)(7) and this section apply only to the part of the plan that is terminated.

(c) Complete discontinuance defined. (1) For purposes of this section, a complete discontinuance of contributions under the plan is contrasted with a suspension of contributions under the plan, which is merely a temporary cessation of contributions by the employer. A complete discontinuance of contributions may occur although some amounts are contributed by the employer under the plan if such amounts are not substantial enough to reflect the intent on the part of the employer to continue to maintain the plan. The determination of whether a complete discontinuance of contributions under the plan has occurred

will be made with regard to all the facts and circumstances in the particular case, and without regard to the amount of any contributions made under the plan by employees.

(2) In the case of a pension plan, a suspension of contributions will not constitute a discontinuance if—

(i) The benefits to be paid or made available under the plan are not affected at any time by the suspension, and

(ii) The unfunded past service cost at any time (which includes the unfunded prior normal cost and unfunded interest on any unfunded cost) does not exceed the unfunded past service cost as of the date of establishment of the plan, plus any additional past service or supplemental costs added by amendment.

(3) In any case in which a suspension of a profit-sharing plan is considered a discontinuance, the discontinuance becomes effective not later than the last day of the taxable year of the employer following the last taxable year of such employer for which a substantial contribution was made under the profit-sharing plan.

(d) Contributions or benefits which remain forfeitable. The provisions of this section do not apply to amounts which are reallocated to prevent the discrimination prohibited by section 401(a)(4) (see paragraph (c) of § 1.401–4).

(e) Effective date. This section shall apply to taxable years of a qualified plan commencing after September 30, 1963. In the case of the termination or complete discontinuance (as defined in this section) of any qualified plan during any such taxable year, the rights accorded to each employee covered under the plan must conform to the requirements of this section. However, a plan which is qualified on September 30, 1963, will not be disqualified merely because it does not expressly include the provisions prescribed by this section. [T.D. 6675, 28 FR 10120, Sept. 17, 1963]

§ 1.401–7 Forfeitures under a qualified pension plan.

(a) General rules. In the case of a trust forming a part of a qualified pension plan, the plan must expressly provide that forfeitures arising from severance of employment, death, or for any other reason, must not be applied to increase the benefits any employee would otherwise receive under the plan at any time prior to the termination of the plan or the complete discontinuance of employer contributions thereunder. The amounts so forfeited must be used as soon as possible to reduce the employer's contributions under the plan. However, a qualified pension plan may anticipate the effect of forfeitures in determining the costs under the plan. Furthermore, a qualified plan will not be disqualified merely because a determination of the amount of forfeitures under the plan is made only once during each taxable year of the employer.

(b) Examples. The rules of paragraph (a) of this section may be illustrated by the following examples:

Example (1). The B Company Pension Trust forms a part of a pension plan which is funded by individual level annual premium annuity contracts. The plan requires ten years of service prior to obtaining a vested right to benefits under the plan. One of the company's employees resigns his position after two years of service. The insurance company paid to the trustees the cash surrender value of the contract—$750. The B Company must reduce its next contribution to the pension trust by this amount.

Example (2). The C Corporation's trusteed pension plan has been in existence for 20 years. It is funded by individual contracts issued by an insurance company, and the premiums thereunder are paid annually. Under such plan, the annual premium accrued for the year 1966 is due and is paid on January 2, 1966, and on July 1 of the same year the plan is terminated due to the liquidation of the employer. Some forfeitures were incurred and collected by the trustee with respect to those participants whose employment terminated between January 2 and July 1. The plan provides that the amount of such forfeitures is to be applied to provide additional annuity benefits for the remaining employees covered by the plan. The pension plan of the C Corporation satisfies the provisions of section 401(a)(8). Although forfeitures are used to increase benefits in this case, this use of forfeitures is permissible since no further contributions will be made under the plan.

(c) Effective date. This section applies to taxable years of a qualified plan commencing after September 30, 1963. However, a plan which is qualified on September 30, 1963, will not be disqualified merely because it does not expressly include the provisions prescribed by this section. [T.D. 6675, 28 FR 10121, Sept. 17, 1963]

§ 1.401–8 Custodial accounts prior to January 1, 1974.

(a) Treatment of a custodial account as a qualified trust. For taxable years of a plan beginning after December 31, 1962, a custodial account may be used, in lieu of a trust, under any pension, profit-sharing, or stock bonus plan, described in section 401 if the requirements of paragraph (b) of this section are met. A custodial account may be used under such a plan, whether the plan covers common-law employees, self-employed individuals who are treated as employees by reason of section 401(c), or both. The use of a custodial account as

part of a plan does not preclude the use of a trust or another custodial account as part of the same plan. A plan under which a custodial account is used may be considered in connection with other plans of the employer in determining whether the requirements of section 401 are satisfied. For regulations relating to the period after December 31, 1973, see § 1.401(f)–11.

(b) Rules applicable to custodial accounts. **(1)** A custodial account shall be treated for taxable years beginning after December 31, 1962, as a qualified trust under section 401 if such account meets the following requirements described in subdivisions (i) through (iii) of this subparagraph:

(i) The custodial account must satisfy all the requirements of section 401 that are applicable to qualified trusts. See subparagraph (2) of this paragraph.

(ii) The custodian of the custodial account must be a bank.

(iii) The custodial agreement provides that the investment of the funds in the account is to be made—

(a) Solely in stock of one or more regulated investment companies which is registered in the name of the custodian or its nominee and with respect to which an employee who is covered by the plan is the beneficial owner, or

(b) Solely in annuity, endowment, or life insurance contracts, issued by an insurance company and held by the custodian until distributed pursuant to the terms of the plan. For purposes of the preceding sentence, a face-amount certificate described in section 401(g) and § 1.401–9 is treated as an annuity issued by an insurance company. See subparagraphs (3) and (4) of this paragraph.

(2) As a result of the requirement described in subparagraph (1)(i) of this paragraph (relating to the requirements applicable to qualified trusts), the custodial account must, for example, be created pursuant to a written agreement which constitutes a valid contract under local law. In addition, the terms of the contract must make it impossible, prior to the satisfaction of all liabilities with respect to the employees and their beneficiaries covered by the plan, for any part of the funds of the custodial account to be used for, or diverted to, purposes other than for the exclusive benefit of the employees or their beneficiaries as provided for in the plan (see paragraph (a) of § 1.401–2).

(3) The requirement described in subparagraph (1)(iii) of this paragraph, relating to the investment of the funds of the plan, applies, for example, to the employer contributions under the plan, any employee contributions under the plan, and any earnings on such contributions. Such requirement also applies to capital gains realized upon the sale of stock described in (a) of such subdivision, to any capital gain dividends received in connection with such stock, and to any refunds described in section 852(b)(3)(D)(ii) (relating to undistributed capital gains of a regulated investment company) which is received in connection with such stock. However, since such requirement relates only to the investment of the funds of the plan, the custodian may deposit funds with a bank, in either a checking or savings account, while accumulating sufficient funds to make additional investments or while awaiting an appropriate time to make additional investments.

(4) The requirement in subparagraph (1)(iii)(a) of this paragraph that an employee covered by the plan be the beneficial owner of the stock does not mean that the employee who is the beneficial owner must have a nonforfeitable interest in the stock. Thus, a plan may provide for forfeitures of an employee's interest in such stock in the same manner as plans which use a trust. In the event of a forfeiture of an employee's beneficial ownership in the stock of a regulated investment company, the beneficial ownership of such stock must pass to another employee covered by the plan.

(c) Effects of qualification. **(1)** Any custodial account which satisfies the requirements of section 401(f) shall be treated as a qualified trust for all purposes of the Internal Revenue Code of 1954. Accordingly, such a custodial account shall be treated as a separate legal person which is exempt from the income tax by section 501(a). On the other hand, such a custodial account is required to file the returns described in sections 6033 and 6047 and to supply any other information which a qualified trust is required to furnish.

(2) In determining whether the funds of a custodial account are distributed or made available to an employee or his beneficiary, the rules which under section 402(a) are applicable to trusts will also apply to the custodial account as though it were a separate legal person and not an agent of the employee.

(d) Effect of loss of qualification. If a custodial account which has qualified under section 401 fails to qualify under such section for any taxable year, such custodial account will not thereafter be treated as a separate legal person, and the funds in such account shall be treated as made available

within the meaning of section 402(a)(1) to the employees for whom they are held.

(e) **Definitions.** For purposes of this section—

(1) The term "bank" means a bank as defined in section 401(d)(1).

(2) The term "regulated investment company" means any domestic corporation which issues only redeemable stock and is a regulated investment company within the meaning of section 851(a) (but without regard to whether such corporation meets the limitations of section 851(b)).

[T.D. 6675, 28 FR 10121, Sept. 17, 1963, as amended by T.D. 7565, 43 FR 41204, Sept. 15, 1978. Redesignated and amended by T.D. 7748, 46 FR 1695, Jan. 7, 1981]

§ 1.401–9 Face-amount certificates—nontransferable annuity contracts.

(a) **Face-amount certificates treated as annuity contracts.** Section 401(g) provides that a face-amount certificate (as defined in section 2(a)(15) of the Investment Company Act of 1940 (15 U.S.C. sec. 80a–2)) which is not transferable within the meaning of paragraph (b)(3) of this section shall be treated as an annuity contract for purposes of sections 401 through 404 for any taxable year of a plan subject to such sections beginning after December 31, 1962. Accordingly, there may be established for any such taxable year a qualified plan under which such face-amount certificates are purchased for the participating employees without the creation of a trust or custodial account. However, for such a plan to qualify, the plan must satisfy all the requirements applicable to a qualified annuity plan (see section 403(a) and the regulations thereunder).

(b) **Nontransferability of face-amount certificates and annuity contracts.** (1)(i) Section 401(g) provides that, in order for any face-amount certificate, or any other contract issued after December 31, 1962, to be subject to any provision under sections 401 through 404 which is applicable to annuity contracts, as compared to other forms of investment, such certificate or contract must be nontransferable at any time when it is held by any person other than the trustee of a trust described in section 401(a) and exempt under section 501(a). Thus, for example, in order for a group or individual retirement income contract to be treated as an annuity contract, if such contract is not held by the trustee of an exempt employees' trust, it must satisfy the requirements of this section. Furthermore, a face-amount certificate or an annuity contract will be subject to the tax treatment under section 403(b) only if it satisfies the requirements of section 401(g) and this section. Any certificate or contract in order to satisfy the provisions of this section must expressly contain the provisions that are necessary to make such certificate or contract not transferable within the meaning of this paragraph.

(ii) In the case of any group contract purchased by an employer under a plan to which sections 401 through 404 apply, the restriction on transferability required by section 401(g) and this section applies to the interest of the employee participants under such group contract but not to the interest of the employer under such contract.

(2) If a trust described in section 401(a) which is exempt from tax under section 501(a) distributes any annuity, endowment, retirement income, or life insurance contract, then the rules relating to the taxability of the distributee of any such contract are set forth in paragraph (a)(2) of § 1.402(a)–1.

(3) A face-amount certificate or an annuity contract is transferable if the owner can transfer any portion of his interest in the certificate or contract to any person other than the issuer thereof. Accordingly, such a certificate or contract is transferable if the owner can sell, assign, discount, or pledge as collateral for a loan or as security for the performance of an obligation or for any other purpose his interest in the certificate or contract to any person other than the issuer thereof. On the other hand, for purposes of section 401(g), a face-amount certificate or annuity contract is not considered to be transferable merely because such certificate or contract, or the plan of which it is a part, contains a provision permitting the employee to designate a beneficiary to receive the proceeds of the certificate or contract in the event of his death, or contains a provision permitting the employee to elect to receive a joint and survivor annuity, or contains other similar provisions.

(4) A material modification in the terms of an annuity contract constitutes the issuance of a new contract regardless of the manner in which it is made.

(c) **Examples.** The rules of this section may be illustrated by the following examples:

Example (1). The P Employees' Annuity Plan is a nontrusteed plan which is funded by individual annuity contracts issued by the Y Insurance Company. Each annuity contract issued by such company after December 31, 1962, provides, on its face, that it is "NOT TRANSFERABLE". The terms of each such contract further provide that, "This contract may not be sold, assigned, discounted, or pledged as collateral for a loan or as security for the performance of an obligation or for any other purpose, to any person other than this company."

The annuity contracts of the P Employees' Annuity Plan satisfy the requirements of section 401(g) and this section.

Example (2). The R Company Pension Trust forms a part of a pension plan which is funded by individual level premium annuity contracts. Such contracts are purchased by the trustee of the R Company Pension Trust from the Y Insurance Company. The trustee of the R Company Pension Trust is the legal owner of each such contract at all times prior to the distribution of such contract to a qualifying annuitant. The trustee purchases such a contract on January 3, 1963, in the name of an employee who qualifies on that date for coverage under the plan. At the time such contract is purchased, and while the contract is held by the trustee of the R Company Pension Trust, the contract does not contain any restrictions with respect to its transferability. The annuity contract purchased by the trustee of the R Company Pension Trust satisfies the requirements of section 401(g) and this section while it is held by the trustee.

Example (3). A is the trustee of the X Corporation's Employees' Pension Trust. The trust forms a part of a pension plan which is funded by individual level premium annuity contracts. The trustee is the legal owner of such contracts, but the employees covered under the plan obtain beneficial interests in such contracts after ten years of service with the X Corporation. On January 15, 1980, A distributes to D an annuity contract issued to A in D's name on June 25, 1959, and distributes to E an annuity contract issued to A in E's name on September 30, 1963. The contract issued to D need not be nontransferable, but the contract issued to E must be nontransferable in order to satisfy the requirements of section 401(g) and this section.

Example (4). The corpus of the Y Corporation's Employees' Pension Plan consists of individual insurance contracts in the names of the covered employees and an auxiliary fund which is used to convert such policies to annuity contracts at the time a beneficiary of such trust retires. F retires on June 15, 1963, and the trustee converts the individual insurance contract on F's life to a life annuity which is distributed to him. The life annuity issued on F's life must be nontransferable in order to satisfy the requirements of section 401(g) and this section. [T.D. 6675, 28 FR 10122, Sept. 17, 1963]

§ 1.401–10 Definitions relating to plans covering self-employed individuals.

(a) In general. (1) Certain self-employed individuals may be covered by a qualified pension, annuity, or profit-sharing plan for taxable years beginning after December 31, 1962. This section contains definitions relating to plans covering self-employed individuals. The provisions of §§ 1.401–1 through 1.401–9, relating to requirements which are applicable to all qualified plans, are also generally applicable to any plan covering a self-employed individual. However, in addition to such requirements, any plan covering a self-employed individual is subject to the rules contained in §§ 1.401–11 through 1.401–13. Section 1.401–11 contains general rules which are applicable to any plan covering a self-employed individual who is an employee within the meaning of paragraph (b) of this section. Section 1.401–12 contains special rules which are applicable to plans covering self-employed individuals when one or more of such individuals is an owner-employee within the meaning of paragraph (d) of this section. Section 1.401–13 contains rules relating to excess contributions by, or for, an owner-employee. The provisions of this section and of §§ 1.401–11 through 1.401–13 are applicable to taxable years beginning after December 31, 1962.

(2) A self-employed individual is covered under a qualified plan during the period beginning with the date a contribution is first made by, or for, him under the qualified plan and ending when there are no longer funds under the plan which can be used to provide him or his beneficiaries with benefits.

(b) Treatment of a self-employed individual as an employee. (1) For purposes of section 401, a self-employed individual who receives earned income from an employer during a taxable year of such employer beginning after December 31, 1962, shall be considered an employee of such employer for such taxable year. Moreover, such an individual will be considered an employee for a taxable year if he would otherwise be treated as an employee but for the fact that the employer did not have net profits for that taxable year. Accordingly, the employer may cover such an individual under a qualified plan during years of the plan beginning with or within a taxable year of the employer beginning after December 31, 1962.

(2) If a self-employed individual is engaged in more than one trade or business, each such trade or business shall be considered a separate employer for purposes of applying the provisions of sections 401 through 404 to such individual. Thus, if a qualified plan is established for one trade or business but not the others, the individual will be considered an employee only if he received earned income with respect to such trade or business and only the amount of such earned income derived from that trade or business shall be taken into account for purposes of the qualified plan.

(3)(i) The term "employee", for purposes of section 401, does not include a self-employed individual when the term "common-law" employee is used or when the context otherwise requires that the term "employee" does not include a self-employed individual. The term "common-law" employee also includes an individual who is treated as an employee for purposes of section 401 by reason of the provisions of section 7701(a)(20), relating to the treatment of certain full-time life insurance salesmen as employees. Furthermore, an individual who is a common-law employee is not a

self-employed individual with respect to income attributable to such employment, even though such income constitutes net earnings from self-employment as defined in section 1402(a). Thus, for example, a minister who is a common-law employee is not a self-employed individual with respect to income attributable to such employment, even though such income constitutes net earnings from self-employment as defined in section 1402(a).

(ii) An individual may be treated as an employee within the meaning of section 401(c)(1) of one employer even though such individual is also a common-law employee of another employer. For example, an attorney who is a common-law employee of a corporation and who, in the evenings maintains an office in which he practices law as a self-employed individual is an employee within the meaning of section 401(c)(1) with respect to the law practice. This example would not be altered by the fact that the corporation maintained a qualified plan under which the attorney is benefited as a common-law employee.

(4) For the purpose of determining whether an employee within the meaning of section 401(c)(1) satisfies the requirements for eligibility under a qualified plan established by an employer, such an employer may take into account past services rendered by such an employee both as a self-employed individual and as a common-law employee if past services rendered by other employees, including common-law employees, are similarly taken into account. However, an employer cannot take into account only past services rendered by employees within the meaning of section 401(c)(1) if past services rendered to such employer by individuals who are, or were, common-law employees are not taken into account. Past service as described in this subparagraph may be taken into account for the purpose of determining whether an individual who is, or was, an employee within the meaning of section 401(c)(1) satisfies the requirements for eligibility even if such service was rendered prior to January 1, 1963. On the other hand, past service cannot be taken into account for purposes of determining the contributions which may be made on such an individual's behalf under a qualified plan.

(c) Definition of earned income—(1) General rule. For purposes of section 401 and the regulations thereunder, "earned income" means, in general, net earnings from self-employment (as defined in section 1402(a)) to the extent such net earnings constitute compensation for personal services actually rendered within the meaning of section 911(b).

(2) Net earnings from self-employment. (i) The computation of the net earnings from self-employment shall be made in accordance with the provisions of section 1402(a) and the regulations thereunder, with the modifications and exceptions described in subdivisions (ii) through (iv) of this subparagraph. Thus, an individual may have net earnings from self-employment, as defined in section 1402(a), even though such individual does not have self-employment income, as defined in section 1402(b), and, therefore, is not subject to the tax on self-employment income imposed by section 1401.

(ii) Items which are not included in gross income for purposes of chapter 1 of the Code and the deductions properly attributable to such items must be excluded from the computation of net earnings from self-employment even though the provisions of section 1402(a) specifically require the inclusion of such items. For example, if an individual is a resident of Puerto Rico, so much of his net earnings from self-employment as are excluded from gross income under section 933 must not be taken into account in computing his net earnings from self-employment which are earned income for purposes of section 401.

(iii) In computing net earnings from self-employment for the purpose of determining earned income, a self-employed individual may disregard only deductions for contributions made on his own behalf under a qualified plan. However, such computation must take into account the deduction allowed by section 404 or 405 for contributions under a qualified plan on behalf of the common-law employees of the trade or business.

(iv) For purposes of determining whether an individual has net earnings from self-employment and, thus, whether he is an employee within the meaning of section 401(c)(1), the exceptions in section 1402(c)(4) and (5) shall not apply. Thus, certain ministers, certain members of religious orders, doctors of medicine, and Christian Science practitioners are treated for purposes of section 401 as being engaged in a trade or business from which net earnings from self-employment are derived. In addition, the exceptions in section 1402(c)(2) shall not apply in the case of any individual who is treated as an employee under section 3121(d)(3)(A), (C), or (D). Therefore, such individuals are treated, for purposes of section 401, as being engaged in a trade or business from which net earnings from self-employment may be derived.

(3) Compensation for personal services actually rendered. (i) For purposes of section 401, the term "earned income" includes only that portion of an individual's net earnings from self-employment which constitutes earned income as defined in section 911(b) and the regulations thereunder. Thus, such term includes only professional fees and other amounts received as compensation for personal services actually rendered by the individual. There is excluded from "earned income" the amount of any item of income, and any deduction properly attributable to such item, if such amount is not received as compensation for personal services actually rendered. Therefore, an individual who renders no personal services has no "earned income" even though such an individual may have net earnings from self-employment from a trade or business.

(ii) If a self-employed individual is engaged in a trade or business in which capital is a material income-producing factor, then, under section 911(b), his earned income is only that portion of the net profits from the trade or business which constitutes a reasonable allowance as compensation for personal services actually rendered. However, such individual's earned income cannot exceed 30 percent of the net profits of such trade or business. The net profits of the trade or business is not necessarily the same as the net earnings from self-employment derived from such trade or business.

(4) Minimum earned income when both personal services and capital are material income-producing factors. (i) If a self-employed individual renders personal services on a full-time, or substantially full-time, basis to only one trade or business, and if with respect to such trade or business capital is a material income-producing factor, then the amount of such individual's earned income from the trade or business is considered to be not less than so much of his share in the net profits of such trade or business as does not exceed $2,500.

(ii) If a self-employed individual renders substantial personal services to more than one trade or business, and if with respect to all such trades or businesses such self-employed individual actually renders personal services on a full-time, or substantially full-time, basis, then the earned income of the self-employed individual from trades or businesses for which he renders substantial personal services and in which both personal services and capital are material income-producing factors is considered to be not less than—

(a) So much of such individual's share of the net profits from all trades or businesses in which he renders substantial personal services as does not exceed $2,500, reduced by

(b) Such individual's share of the net profits of any trade or business in which only personal services is a material income-producing factor.

However, in no event shall the share of the net profits of any trade or business in which capital is a material income-producing factor be reduced below the amount which would, without regard to the provisions of this subdivision, be treated as the earned income derived from such trade or business under section 911(b). In making the computation required by this subdivision, any trade or business with respect to which the individual renders substantial personal services shall be taken into account irrespective of whether a qualified plan has been established by such trade or business.

(iii) If the provisions of subdivision (ii) of this subparagraph apply in determining the earned income of a self-employed individual, and such individual is engaged in two or more trades or businesses in which capital and personal services are material income-producing factors, then the total amount treated as the earned income shall be allocated to each such trade or business for which he performs substantial personal services in the same proportion as his share of net profits from each such trade or business bears to his share of the total net profits from all such trades or businesses. Thus, in such case, the amount of earned income attributable to any such trade or business is computed by multiplying the total earned income as determined under subdivision (ii) of this subparagraph by the individual's net profits from such trade or business and dividing that product by the individual's total net profits from all such trades or businesses.

(iv) For purposes of this subparagraph, the determination of whether an individual renders personal services on a full-time, or substantially full-time, basis is to be made with regard to the aggregate of the trades and businesses with respect to which the employee renders substantial personal services as a common-law employee or as a self-employed individual. However, for all other purposes in applying the rules of this subparagraph, a trade or business with respect to which an individual is a common-law employee shall be disregarded.

(d) Definition of owner-employee. For purposes of section 401 and the regulations thereunder, the term "owner-employee" means a proprie-

tor of a proprietorship, or, in the case of a partnership, a partner who owns either more than 10 percent of the capital interest, or more than 10 percent of the profits interest, of the partnership. Thus, an individual who owns only 2 percent of the profits interest but 11 percent of the capital interest of a partnership is an owner-employee. A partner's interest in the profits and the capital of the partnership shall be determined by the partnership agreement. In the absence of any provision regarding the sharing of profits, the interest in profits of the partners will be determined in the same manner as their distributive shares of partnership taxable income. However, a guaranteed payment (as described in section 707(c)) is not considered a distributive share of partnership income for such purpose. See section 704(b), relating to the determination of the distributive share by the income or loss ratio, and the regulations thereunder. In the absence of a provision in the partnership agreement, a partner's capital interest in a partnership shall be determined on the basis of his interest in the assets of the partnership which would be distributable to such partner upon his withdrawal from the partnership, or upon liquidation of the partnership, whichever is the greater.

(e) Definition of employer. (1) For purposes of section 401, a sole proprietor is considered to be his own employer, and the partnership is considered to be the employer of each of the partners. Thus, an individual partner is not an employer who may establish a qualified plan with respect to his services to the partnership.

(2) Regardless of the provision of local law, a partnership is deemed, for purposes of section 401, to be continuing until such time as it is terminated within the meaning of section 708, relating to the continuation of a partnership.

[T.D. 6675, 28 FR 10123, Sept. 17, 1963]

§ 1.401–11 General rules relating to plans covering self-employed individuals.

(a) Introduction. This section provides certain rules which supplement, and modify, the rules of §§ 1.401–1 through 1.401–9 in the case of a qualified pension, annuity, or profit-sharing plan which covers a self-employed individual who is an employee within the meaning of section 401(c)(1). The provisions of this section apply to taxable years beginning after December 31, 1962. Except as otherwise provided, paragraphs (b) through (m) of this section apply to taxable years beginning after December 31, 1962. Paragraph (n) of this section applies to plan years determined in accordance with paragraph (n)(1) of this section.

(b) General rules. (1) If the amount of employer contributions for common-law employees covered under a qualified plan is related to the earned income (as defined in section 401(c)(2)) of a self-employed individual, or group of self-employed individuals, such a plan is a profit-sharing plan (as described in paragraph (b)(1)(ii) of § 1.401–1) since earned income is dependent upon the profits of the trade or business with respect to which the plan is established. Thus, for example, a plan, which provides that the employer will contribute 10 percent of the earned income of a self-employed individual but no more than $2,500, and that the employer contribution on behalf of common-law employees shall be the same percentage of their salaries as the contribution on behalf of the self-employed individual bears to his earned income, is a profit-sharing plan, since the amount of the employer's contribution for common-law employees covered under the plan is related to the earned income of a self-employed individual and thereby to the profits of the trade or business. On the other hand, for example, a plan which defines the compensation of any self-employed individual as his earned income and which provides that the employer will contribute 10 percent of the compensation of each employee covered under the plan is a pension plan since the contribution on behalf of common-law employees is fixed without regard to whether the self-employed individual has earned income or the amount thereof.

(2) The Self-Employed Individuals Tax Retirement Act of 1962 (76 Stat. 809) permits self-employed individuals to be treated as employees and therefore included in qualified plans, but it is clear that such law requires such self-employed individuals to provide benefits for their employees on a non-discriminatory basis. Self-employed individuals will not be considered as providing contributions or benefits for an employee to the extent that the wages or salary of the employee covered under the plan are reduced at or about the time the plan is adopted.

(3) In addition to permitting self-employed individuals to participate in qualified plans, the Self-Employed Individuals Tax Retirement Act of 1962 extends to such individuals some of the tax benefits allowed common-law employee-participants in such plans. However, the tax benefits allowed a self-employed individual are restricted by the limits which are placed on the deductions allowed for contributions on such an individual's behalf. In view of these restrictions on the tax benefits extended to any self-employed individual, a self-em-

ployed individual participating in a qualified plan may not participate in any forfeitures. Therefore, in the case of a qualified plan which covers any self-employed individual, a separate account must be established for each self-employed individual to which no forfeitures can be allocated.

(c) Requirements as to coverage. (1) In general, section 401(a)(3) and the regulations thereunder prescribe the coverage requirements which a qualified plan must satisfy. However, if such a plan covers self-employed individuals who are not owner-employees, it must, in addition to satisfying such requirements, satisfy the requirements of this paragraph. If any owner-employee is covered under a qualified plan, the provisions of this paragraph do not apply, but the provisions of section 401(d), including section 401(d)(3), do apply (see § 1.401–12).

(2)(i) Section 401(a)(3)(B) provides that a plan may satisfy the coverage requirements for qualification if it covers such employees as qualify under a classification which is found not to discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist in supervising the work of other employees, or highly compensated employees. Section 401(a)(5) sets forth certain classifications that will not in themselves be considered discriminatory. Under such section, a classification which excludes all employees whose entire remuneration constitutes "wages" under section 3121(a)(1), will not be considered discriminatory merely because of such exclusion. Similarly, a plan which includes all employees will not be considered discriminatory solely because the contributions or benefits based on that part of their remuneration which is excluded from "wages" under section 3121(a)(1) differ from the contributions or benefits based on that part of their remuneration which is not so excluded. However, in determining if a classification is discriminatory under section 401(a)(3)(B), consideration will be given to whether the total benefits resulting to each employee under the plan and under the Social Security Act, or under the Social Security Act only, establish an integrated and correlated retirement system satisfying the tests of section 401(a). A plan which covers self-employed individuals, none of whom is an owner-employee, may also be integrated with the contributions or benefits under the Social Security Act. In such a case, the portion of the earned income (as defined in section 401(c)(2)) of such an individual which does not exceed the maximum amount which may be treated as self-employment income under section 1402(b)(1), and which is derived from the trade or business with respect to which the plan is established, shall be treated as "wages" under section 3121(a)(1) subject to the tax imposed by section 3111 (relating to the tax on employers) for purposes of applying the rules of paragraph (e)(2) of § 1.401–3, relating to the determination of whether a plan is properly integrated. However, if the plan covers an owner-employee, the rules relating to the integration of the plan with the contributions or benefits under the Social Security Act contained in paragraph (b) of § 1.401–12 apply.

(ii) Certain of the classifications enumerated in section 401(a)(5) do not apply to plans which provide contributions or benefits for any self-employed individual. Since self-employed individuals are not salaried or clerical employees, the provision in section 401(a)(5) permitting a plan, in certain cases to cover only this type of employee is inapplicable to plans which cover any self-employed individual.

(iii) The classifications enumerated in section 401(a)(5) are not exclusive, and it is not necessary that a qualified plan cover all employees or all full-time employees. Plans may qualify even though coverage is limited in accordance with a particular classification incorporated in the plan, provided the effect of covering only such employees as satisfy such eligibility requirement does not result in the prohibited discrimination.

(d) Discrimination as to contributions or benefits—(1) In general. In order for a plan to be qualified, there must be no discrimination in contributions or benefits in favor of employees who are officers, shareholders, supervisors, or highly compensated, as against other employees whether within or without the plan. A self-employed individual, by reason of the contingent nature of his compensation, is considered to be a highly-compensated employee, and thus is a member of the group in whose favor discrimination is prohibited. In determining whether the prohibited discrimination exists, the total employer contribution on behalf of a self-employed individual shall be taken into account regardless of the fact that only a portion of such contribution is allowed as a deduction. For additional rules relating to discrimination as to contributions or benefits with regard to plans covering any owner-employee, see § 1.401–12.

(2) Base for computing contributions or benefits. (i) A plan which is otherwise qualified is not considered discriminatory merely because the contributions or benefits provided under the plan bear a uniform relationship to the total compensation,

basic compensation, or regular rate of compensation of the employees, including self-employed individuals, covered under the plan.

(ii) In the case of a self-employed individual who is covered under a qualified plan, the total compensation of such individual is the earned income (as defined in section 401(c)(2)) which such individual derives from the employer's trade or business, or trades or businesses, with respect to which the qualified plan is established. Thus, for example, in the case of a partner, his total compensation includes both his distributive share of partnership income, whether or not distributed, and guaranteed payments described in section 707(c) made to him by the partnership establishing the plan, to the extent that such income constitutes earned income as defined in section 401(c)(2).

(iii) (a) The basic or regular rate of compensation of any self-employed individual is that portion of his earned income which bears the same ratio to his total earned income derived from the trade or business, or trades or businesses, with respect to which the qualified plan is established as the aggregate basic or regular compensation of all common-law employees covered under the plan bears to the aggregate total compensation of such employees derived from such trade or business, or trades or businesses.

(b) If an employer establishes two or more plans which satisfy the requirements of section 401(a) separately, and only one such plan covers a self-employed individual, the determination of the basic or regular rate of compensation of such self-employed individual is made with regard to the compensation of common-law employees covered under the plan which provides contributions or benefits for such self-employed individual. On the other hand, if two or more plans must be considered together in order to satisfy the requirements of section 401(a), the computation of the basic or regular rate of compensation of a self-employed individual must be made with regard to the compensation of the common-law employees covered by so many of such plans as are required to be taken together in order to satisfy the qualification requirements of section 401(a).

(3) Discriminatory contributions. If a discriminatory contribution is made by, or for, a self-employed individual who is an employee within the meaning of section 401(c)(1) because of an erroneous assumption as to the earned income of such individual, the plan will not be considered discriminatory if adequate adjustment is made to remove such discrimination. In the case of any self-employed individual who is an owner-employee, the amount of any excess contribution to be returned and the manner in which it is to be repaid are determined by the provisions of section 401(d)(8) and (e). However, if any self-employed individual, including any owner-employee, has not made the full contribution permitted to be made on his behalf as an employee, then, if the plan expressly provides, so much of any excess contribution by such self-employed individual's employer as may, under the provisions of the plan, be treated as a contribution made by such individual as an employee can be so treated.

(e) Distribution of entire interest. (1) If a trust forms part of a plan which covers a self-employed individual, such trust shall constitute a qualified trust under section 401 only if the plan of which such trust is a part expressly provides that the entire interest of each employee, including any common-law employee, will be distributed in accordance with the provisions of subparagraph (2) or (3) of this paragraph.

(2) Unless the provisions of subparagraph (3) of this paragraph apply, the entire interest of each employee (including contributions he has made on his own behalf, contributions made on his behalf by his employer, and interest thereon) must be actually distributed to such employee—

(i) In the case of an employee, other than an individual who is, or has been, an owner-employee under the plan, not later than the last day of the taxable year of such employee in which he attains the age of 70 ½, or not later than the last day of the taxable year in which such employee retires, whichever is later, and

(ii) In the case of an employee who is, or has been, an owner-employee under the plan, not later than the last day of the taxable year in which he attains the age of 70 ½.

(3) In lieu of distributing an employee's entire interest in a qualified plan as provided in subparagraph (2) of this paragraph, such interest may be distributed commencing no later than the last taxable year described in such subparagraph (2). In such case, the plan must expressly provide that the entire interest of such an employee shall be distributed to him and his beneficiaries, in a manner which satisfies the requirements of subparagraph (5) of this paragraph, over any of the following periods (or any combination thereof)—

(i) The life of the employee, or

(ii) The lives of the employee and his spouse, or

(iii) A period certain not longer than the life expectancy of the employee, or

(iv) A period certain not longer than the joint life and last survivor expectancy of the employee and his spouse.

(4) For purposes of subparagraphs (3) and (5) of this paragraph, the determination of the life expectancy of the employee or the joint life and last survivor expectancy of the employee and his spouse is to be made either (i) only once, at the time the employee receives the first distribution of his entire interest under the plan, or (ii) periodically, in a consistent manner. Such life expectancy or joint life and last survivor expectancy cannot exceed the period computed by the use of the expected return multiples in § 1.72–9, or, in the case of payments under a contract issued by an insurance company, the period computed by use of the life expectancy tables of such company.

(5) If an employee's entire interest is to be distributed over a period described in subparagraph (3) of this paragraph, then the amount to be distributed each year must be at least an amount equal to the quotient obtained by dividing the entire interest of the employee under the plan at the time the distribution is made (expressed in either dollars or units) by the life expectancy of the employee, or joint life and last survivor expectancy of the employee and his spouse (whichever is applicable), determined in accordance with the provisions of subparagraph (4) of this paragraph. However, no distribution need be made in any year, or a lesser amount may be distributed, if the aggregate amounts distributed by the end of that year are at least equal to the aggregate of the minimum amounts required by this subparagraph to have been distributed by the end of such year.

(6) If an employee's entire interest is distributed in the form of an annuity contract, then the requirements of section 401(a)(9) are satisfied if the distribution of such contract takes place before the end of the latest taxable year described in subparagraph (2) of this paragraph, and if the employee's interest will be paid over a period described in subparagraph (3) of this paragraph and at a rate which satisfies the requirements of subparagraph (5) of this paragraph.

(7) The requirements of section 401(a)(9) do not preclude contributions from being made on behalf of an owner-employee under a qualified plan subsequent to the taxable year in which the distribution of his entire interest is required to commence. Thus, if all other requirements for qualification are satisfied, a qualified plan may provide contributions for an owner-employee who has already attained age 70 ½. However, a distribution of benefits attributable to contributions made on behalf of an owner-employee in a taxable year beginning after the taxable year in which he attains the age of 70 ½ must satisfy the requirements of subparagraph (3) of this paragraph. Thus, if an owner-employee has already attained the age of 70 ½ at the time the first contribution is made on his behalf, the distribution of his entire interest must commence in the year in which such contribution is first made on his behalf.

(8) This paragraph shall not apply and an otherwise qualified trust will not be disqualified if the method of distribution under the plan is one which was designated by a common-law employee prior to October 10, 1962, and such method of distribution is not in accordance with the provisions of section 401(a)(9). Such exception applies regardless of whether the actual distribution of the entire interest of an employee making such a designation, or any portion of such interest, has commenced prior to October 10, 1962.

[T.D. 6675, 28 FR 10124, Sept. 17, 1963, as amended by T.D. 6982, 33 FR 16500, Nov. 13, 1968]

§ 1.401–12 Requirements for qualification of trusts and plans benefiting owner-employees.

(a) Introduction. This section prescribes the additional requirements which must be met for qualification of a trust forming part of a pension or profit-sharing plan, or of an annuity plan, which covers any self-employed individual who is an owner-employee as defined in section 401(c)(3). However, to the extent that the provisions of § 1.401–11 are not modified by the provisions of this section, such provisions are also applicable to a plan which covers an owner-employee. The provisions of this section apply to taxable years beginning after December 31, 1962. Except as otherwise provided, paragraphs (b) through (m) of this section apply to taxable years beginning after December 31, 1962. Paragraph (n) of this section applies to plan years determined in accordance with paragraph (n)(1) of the section.

(b) General rules. (1) The qualified plan and trust of an unincorporated trade or business does not have to satisfy the additional requirements for qualification merely because an owner-employee derives earned income (as defined in section 401(c)(2)) from the trade or business with respect to which the plan is established. Such additional requirements need be satisfied only if an owner-

employee is actually covered under the plan of the employer. An owner-employee may only be covered under a plan of an employer if such owner-employee has so consented. However, the consent of the owner-employee may be either expressed or implied. Thus, for example, if contributions are, in fact, made on behalf of an owner-employee, such owner-employee is considered to have impliedly consented to being covered under the plan.

(2) A qualified plan covering an owner-employee must be a definite written program and arrangement setting forth all provisions essential for qualification at the time such plan is established. Therefore, for example, even though the owner-employee is the only employee covered under the plan at the time the plan is established, the plan must incorporate all the provisions relating to the eligibility and benefits of future employees.

(c) **Bank trustee.** (1)(i) If a trust created after October 9, 1962, is to form a part of a qualified pension or profit-sharing plan covering an owner-employee, or if a trust created before October 10, 1962, but not exempt from tax on October 9, 1962, is to form part of such a plan, the trustee of such trust must be a bank as defined in paragraph (c)(2) of this section, unless an exception contained in paragraph (c)(4) of this section applies, or paragraph (n) of this section applies.

(ii) The provisions of this paragraph do not apply to an employees' trust created prior to October 10, 1962, if such trust was exempt from tax on October 9, 1962, even though the plan of which such trust forms a part is amended after December 31, 1962, to cover any owner-employee. Although the trustee of a trust described in the preceding sentence need not be a bank, all other requirements for the qualification of such a trust must be satisfied at the time an owner-employee is first covered under such plan.

(2) The term "bank" as used in this paragraph means—

(i) A bank as defined in section 581;

(ii) A corporation which, under the laws of the State of its incorporation or under the laws of the District of Columbia, is subject to both the supervision of, and examination by, the authority in such jurisdiction in charge of the administration of the banking laws;

(iii) In the case of a trust created or organized outside of the United States, that is, outside the States and the District of Columbia, a bank or trust company, wherever incorporated, exercising fiduciary powers and subject to both supervision and examination by governmental authority;

(iv) Beginning on January 1, 1974, an insured credit union (within the meaning of section 101(6) of the Federal Credit Union Act, 12 U.S.C. 1752(6)).

(3) Although a bank is required to be the trustee of a qualified trust, another person, including the employer, may be granted the power in the trust instrument to control the investment of the trust funds either by directing investments, including reinvestments, disposals, and exchanges, or by disapproving proposed investments, including reinvestments, disposals, or exchanges.

(4)(i) This paragraph does not apply to a trust created or organized outside the States and the District of Columbia before October 10, 1962, if, on October 9, 1962, such trust is described in section 402(c) as an organization treated as if it was a trust exempt from tax under section 501(a).

(ii) In addition, the requirement that the trustee must be a bank does not apply to a qualified trust forming a part of a pension or profit-sharing plan if—

(a) The investments of all the funds in such trust are in annuity, endowment, or life insurance contracts, issued by a company which is a life insurance company as defined in section 801(a) during the taxable year immediately preceding the year that such contracts are originally purchased;

(b) All the proceeds which are, or may become, payable under the contract are payable directly to the employee or his beneficiary;

(c) The plan contains a provision to the effect that the employer is to substitute a bank as a trustee or custodian of the contracts if the employer is notified by the district director that such substitution is required because the trustee is not keeping such records, or making such returns, or rendering such statements, as are required by forms or regulations.

However, a qualified trust may only purchase insurance protection to the extent permitted under a qualified plan (see paragraph (b)(1)(i) and (ii) of § 1.401–1).

(5) An employer may designate several trusts (or custodial accounts) or a trust or trusts and an annuity plan or plans as constituting parts of a single plan which is intended to satisfy the requirements for qualification. However, each trust (or custodial account) so designated which is part of a plan covering an owner-employee must satisfy the

requirements of this paragraph. Thus, for example, if all other requirements for qualification are satisfied by the plan, a qualified profit-sharing plan may provide that a portion of the contributions under the plan will be paid to a custodial account, the custodian of which is a bank, for investment in stock of a regulated investment company, and the remainder of such contributions will be paid to a trust, the trustee of which is not a bank, for investment in annuity contracts.

(d) Profit-sharing plan. (1) A profit-sharing plan, as defined in paragraph (b)(1)(ii) of § 1.401–1, which covers any owner-employee must contain a definite formula for determining the contributions to be made by the employer on behalf of employees, other than owner-employees. A formula to be definite must specify the portion of profits to be contributed to the trust and must also define profits for plan purposes. A definite formula may contain a variable factor, if the value of such factor may not vary at the discretion of the employer. For example, the percentage of profits to be contributed each year may differ depending on the amount of profits. On the other hand, a formula which, for example, specifies that profits for plan purposes are not to exceed the cash on hand at the time the employer contribution is made is not a definite formula. The requirement that the plan formula be definite is satisfied if such formula limits the amount to be contributed on behalf of all employees covered under the plan to the amount which permits self-employed individuals to obtain the maximum deduction under section 404(a). However, even though the plan formula is definite, the plan must satisfy all the other requirements for qualification, including the requirement that the contributions under the plan not discriminate in favor of any self-employed individual, and the requirement that the plan be for the exclusive benefit of the employees in general.

(2) A definite contribution formula constitutes an integral part of a qualified profit-sharing plan and may not be amended except for a valid business reason.

(3) The requirement that a profit-sharing plan contain a definite formula for determining the amount of contributions to be made on behalf of employees does not apply to contributions which are made on behalf of owner-employees. However, such contributions are subject to the requirement that they be nondiscriminatory with respect to other employees and must not exceed the limitations on allowable and deductible contributions which may be made by owner-employees.

(e) Requirements as to coverage—(1) Coverage of all employees. The coverage requirements contained in section 401(a)(3) do not apply to a plan which covers any owner-employee. However, such a plan must satisfy the coverage requirements of section 401(d), including section 401(d)(3). Accordingly, a plan which covers an owner-employee must benefit each employee of the trade or business (other than any owner-employee who does not consent to be covered under the plan) whose customary period of employment has been for more than 20 hours a week for more than five months during each of three consecutive periods of twelve calendar months. Therefore, a plan may not provide, for example, that an employee, other than an owner-employee, is ineligible to participate because he does not consent to be a participant or because he does not consent to make reasonable contributions under the plan.

(2) Period of service. (i) In determining whether an employee renders service to the same employer, and, therefore, must be covered under the plan of such employer, a partnership is considered to be one employer during the entire period prior to the time it is terminated within the meaning of section 708 (see paragraph (e)(2) of § 1.401–10).

(ii) In the case of a common-law employee who becomes an employee within the meaning of section 401(c)(1) with respect to the same trade or business, his period of employment is the aggregate of his service as a common-law employee and an employee within the meaning of section 401(c)(1).

(iii) In determining whether any employee, including any owner-employee, has three years of service, past service of any such employee may be taken into account as provided in paragraph (b) of § 1.401–10. Thus, if an employer takes into account past service for any owner-employee, he must take into account the past service of all his other employees to the same extent. However, a plan may provide for coverage after a period of service which is shorter than three years, but in no case may the plan require a waiting period for employees which is longer than that required for the owner-employees.

(f) Discrimination in contributions or benefits. (1) Variations in contributions or benefits may be provided under the plan so long as the plan does not discriminate, either as to contributions or benefits, in favor of officers, employees whose principal duties consist in supervising the work of other employees, or highly compensated employees, as

against other employees (see § 1.401–4). For the purpose of determining whether the provisions of a plan which provide contributions or benefits for an owner-employee result in the prohibited discrimination, an owner-employee, like other self-employed individuals, is considered a highly compensated employee (see paragraph (d) of § 1.401–11). Whether or not a plan is discriminatory is determined by the actual operation of the plan as well as by its formal provisions.

(2) The provisions of section 401(a)(5), relating to certain plan provisions which will not in and of themselves be considered discriminatory, are not applicable to any plan which covers any owner-employee. Such a plan must, instead, satisfy the requirements of section 401(a)(10) and section 401(d)(6). Accordingly, a plan is not discriminatory within the meaning of section 401(a)(4) merely because the contributions or benefits provided for the employees covered under the plan bear a uniform relationship to the total compensation, or to the basic or regular rate of compensation, of such employees. The total compensation or the basic or regular rate of compensation of an owner-employee is computed in accordance with the provisions of paragraph (d)(2) of § 1.401–11.

(3) Even though the contributions under the plan do not bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered thereunder and the plan would otherwise be considered discriminatory within the meaning of section 401(a)(4), the plan shall not be considered discriminatory if such variation is due to employer contributions on behalf of any owner-employee which are required, under the plan, to be applied to pay premiums or other consideration on one or more level premium contracts described in section 401(e)(3)(A). In a taxable year to which the foregoing exception applies and, therefore, one in which the contributions under the plan would otherwise be discriminatory, the employer contributions to pay such premiums or other consideration must be the only employer contributions made for the owner-employee, and the contributions for such taxable year under such plan must not be in excess of the amount permitted to be paid toward the purchase of such a contract under the provisions of section 401(e)(3). Furthermore, the exception described in this subparagraph only applies to contributions made under a plan which otherwise satisfies the requirements of section 401(a)(4) and the regulations thereunder. Thus, if a plan provides for the purchase, in accordance with section 401(e)(3), of a level premium contract for an owner-employee, then such plan must provide either that the benefits for all employees are nondiscriminatory or, in the case of a money-purchase type of plan, that the contributions for all employees are based on compensation determined in a non-discriminatory manner. For example, since the contributions on behalf of the owner-employee are based on his earned income during the period preceding the purchase of the contract, the contributions for other employees must be based on their compensation during the same period if this will result in larger contributions on their behalf.

(4) In the case of a plan which covers any owner-employee, the contributions or benefits provided under the plan cannot vary with respect to years of service except as provided in subparagraph (5) of this paragraph.

(5) The provisions of section 401(d)(3) do not preclude the coverage of employees with less than three years of service if such coverage is provided on a nondiscriminatory basis. However, a plan will not be disqualified merely because the contributions or benefits for employees who have less than three years of service are not as favorable as the contributions or benefits for employees having more than three years of service.

(g) **Nonforfeitable rights.** (1)(i) Except as provided in subparagraph (2) of this paragraph, if an owner-employee is covered under the plan of his employer, each employee's rights to the contributions, or to the benefits derived from the contributions, of such employer must be nonforfeitable at the time such contributions are paid to, or under, the plan. The employees who must obtain such nonforfeitable rights include the self-employed individuals who are covered under the plan. As to what constitutes nonforfeitable rights of an employee, see paragraph (a)(2) of § 1.402(b)–1.

(ii) Under section 401(d)(2), it is necessary that each employee obtain nonforfeitable rights to the employer contributions under the plan on his behalf from the time such contributions are paid. Thus, each employee must have a nonforfeitable interest to the portion of the funds under the plan which is allocable to the employer contributions made under the plan on his behalf.

(2) The provisions of subparagraph (1) of this paragraph do not apply to the extent that employer contributions on behalf of any employee must remain forfeitable in order to satisfy the requirements of paragraph (c) of § 1.401–4. However, employer contributions on behalf of employees whose rights are required to remain forfeitable to

satisfy such requirements must be nonforfeitable except for such contingency.

(h) Integration with social security. **(1)** If a qualified plan covers any owner-employee, then the rules relating to the integration of such plan with the contributions or benefits under the Social Security Act are provided in this paragraph. Accordingly, the provisions of paragraph (e) of § 1.401–3 and paragraph (c) of § 1.401–11 do not apply to such a plan. In the case of a plan which provides contributions or benefits for any owner-employee, integration of the plan with the Social Security Act for any taxable year of the employer can take place only if not more than one-third of the employer contributions under the plan which are deductible under section 404 for that year are made on behalf of the owner-employees. If such requirement is satisfied, then the plan may be integrated with the contributions or benefits under the Social Security Act in accordance with the rules of subparagraph (3) of this paragraph.

(2)(i) For purposes of subparagraph (1) of this paragraph, in determining the total amount of employer contributions which are deductible under section 404, the provisions of section 404(a), including the provisions of section 404(a)(9) (relating to plans benefiting self-employed individuals), and section 404(e) (relating to the special limitations for self-employed individuals) are taken into account, but the provisions of section 404(a)(10) (relating to the special limitation on the amount allowed as a deduction for self-employed individuals) are not taken into account.

(ii) The amount of deductible employer contributions which are made on behalf of all owner-employees for the year is compared with the amount of deductible employer contributions for the year made on behalf of all employees covered under the plan (including self-employed individuals who are not owner-employees and owner-employees) for the purpose of determining whether the deductible contributions by the employer on behalf of owner-employees are not more than one-third of the total deductible contributions.

(3) If a plan covering an owner-employee satisfies the requirement of subparagraph (1) of this paragraph, and if the employer wishes to integrate such plan with the contributions or benefits under the Social Security Act, then—

(i) The employer contributions under the plan on behalf of any owner-employee shall be reduced by an amount determined by multiplying the earned income of such owner-employee which is derived from the trade or business with respect to which the plan is established and which does not exceed the maximum amount which may be treated as self-employment income under section 1402(b)(1), by the rate of tax imposed under section 1401(a); and

(ii) The employer contributions under the plan on behalf of any employee other than an owner-employee may be reduced by an amount not in excess of the amount determined by multiplying the employee's wages under section 3121(a)(1) by the rate of tax imposed under section 3111(a). For purposes of this subdivision, the earned income of a self-employed individual which is derived from the trade or business with respect to which the plan is established and which is treated as self-employment income under section 1402(b)(1), shall be treated as "wages" under section 3121(a)(1).

(4) A money purchase pension plan or a profit-sharing plan may provide that such plan will be integrated with the Social Security Act only for such taxable years of the employer in which the requirements for integration are satisfied. However, a qualified plan cannot provide that employer contributions are only to be made for taxable years in which the integration requirements are satisfied.

(i) Limit on contributions on behalf of an owner-employee. **(1)** Section 401(d)(5) requires that a plan which covers any owner-employee must contain provisions which restrict the employer contributions that may be made on behalf of any owner-employee for each taxable year to an amount no greater than that which is deductible under section 404. In computing the amount deductible under section 404 for purposes of section 401(d)(5) and this paragraph, the limitations contained in section 404(a)(9) and (e), relating to special limitations for self-employed individuals, are taken into account, but such amount is determined without regard to section 404(a)(10), relating to the special limitation on the amount allowed as a deduction for self-employed individuals. Accordingly, a qualified plan which covers any owner-employee cannot permit employer contributions to be made on behalf of such owner-employee in excess of 10 percent of the earned income which is derived by such owner-employee from the trade or business with respect to which the plan is established, or permit the employer to contribute more than $2,500 on behalf of any such owner-employee for any taxable year.

(2)(i) In determining whether the plan permits contributions to be made in excess of the limitations of subparagraph (1) of this paragraph, employer contributions under the plan which are

allocable to the purchase of life, accident, health, or other insurance are not to be taken into account. To determine the amount of employer contributions under the plan which are allocable to the purchase of life, accident, health, or other insurance, see paragraph (f) of § 1.404(e)–1 and paragraph (b) of § 1.72–16. However, contributions for such insurance can be made only to the extent otherwise permitted under sections 401 through 404 and the regulations thereunder.

(ii) A further exception to the limit on the amount of contributions which an employer may make under the plan on behalf of an owner-employee is made in the case of contributions which are required, under the plan, to be applied to pay premiums or other consideration for one or more annuity, endowment, or life insurance contracts described in section 401(e)(3) (see section 401(e)(3) and the regulations thereunder).

(j) **Excess contributions.** The provisions of section 401(e) define the term "excess contribution" and indicate the consequences of making such a contribution (see § 1.401–13). However, section 401(d)(8) provides that a qualified plan which provides contributions or benefits for any owner-employee must contain certain provisions which complement the rules contained in section 401(e). Under section 401(d)(8), a qualified plan must provide that—

(1) The net amount of any excess contribution (determined in accordance with the provisions of § 1.401–13) must be returned to the owner-employee on whose behalf it is made, together with the net income earned on such excess contribution;

(2) For each taxable year for which the trust is considered to be a nonqualified trust with respect to an owner-employee under section 401(e)(2) because the net amount of an excess contribution and the earnings thereon have not been returned to such owner-employee, the income of the trust for that taxable year attributable to the interest of such owner-employee is to be paid to him.

(3) If an excess contribution is determined to be willfully made (within the meaning of section 401(e)(2)(E)), the entire interest of the owner-employee on whose behalf such contribution was made is required to be distributed to such owner-employee. Furthermore, the plan must require the distribution of an owner-employee's entire interest under the plan if a willful excess contribution is determined to have been made under any other plan in which the owner-employee is covered as an owner-employee.

(k) **Contributions of property under a qualified plan.** (1) The contribution of property, other than money, prior to January 1, 1975, by the person who is the employer (within the meaning of section 401(c)(4)) to a qualified trust forming a part of a plan which covers employees some or all of whom are owner-employees who control (within the meaning of section 401(d)(9)(B) and the regulations thereunder) the trade or business with respect to which the plan is established is a prohibited transaction between such trust and the employer-grantor of such trust (see section 503(g) prior to its repeal by sec. 2003(b)(5) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978)).

(2) A contribution of property, other than money, prior to January 1, 1975, to a qualified trust by an owner-employee who controls, or a member of a group of owner-employees who together control, the trade or business with respect to which the plan is established, or a contribution of property, other than money, to a qualified trust by a member of such an owner-employee's family (as defined in section 267(c)(4)), is a prohibited transaction. (See section 503(g) prior to its repeal by section 2003(b)(5) of the Employee Retirement Income Security Act of 1974 (88 Stat. 978)).

(3) See section 4975 and the regulations thereunder with respect to rules relating to the contribution of property, other than money, made after December 31, 1974.

(*l*) **Controlled trades or businesses—(1) Plans covering an owner-employee who controls another trade or business.** (i) A plan must not cover any owner-employee, or group of two or more owner-employees, if such owner-employee, or group of owner-employees, control (within the meaning of subparagraph (3) of this paragraph) any other trade or business, unless the employees of such other trade or business controlled by such owner-employee, or such group of owner-employees, are included in a plan which satisfies the requirements of section 401(a), including the qualification requirements of section 401(d). The employees who must be covered under the plan of the trade or business which is controlled include the self-employed individuals who are not owner-employees and the owner-employees who consent to be covered by such plan. Accordingly, the employer must determine whether any owner-employee, or group of owner-employees, who may participate in the plan which is established by such employer controls any other trade or business, and whether the requirements of this subparagraph are satisfied with respect to the plan established in such other

trade or business. The plan of an employer may exclude an owner-employee who controls another trade or business from coverage under the plan even though such owner-employee consents to be covered, if a plan which satisfies the requirements of subdivision (ii) of this subparagraph has not been established in the trade or business which such owner-employee controls.

(ii) The qualified plan which the owner-employee, or owner-employees, are required to provide for the employees of the trade or business which they control must provide contributions and benefits which are not less favorable than the contributions and benefits provided for the owner-employee, or owner-employees, under the plan of any trade or business which they do not control. Thus, for example, if the contributions or benefits for the owner-employee under the plan of the trade or business which he does not control are computed on the basis of his total (as compared to basic or regular rate) of compensation, then the contributions or benefits for employees covered under the plan of the trade or business which the owner controls must be computed on the basis of their total compensation. However, the requirements of this subdivision cannot be satisfied if the benefits and contributions provided under the plan for the employees of the trade or business which is controlled are not comparable to those provided under the plan covering the owner-employee, or group of owner-employees, in the trade or business which they do not control. Thus, for example, if the owner-employee is covered by a pension plan in the trade or business which he does not control, he may not satisfy the requirements of this subdivision by establishing a profit-sharing plan in the trade or business which he does control.

(iii) If an individual is covered as an owner-employee under the plans of two or more trades or businesses which he does not control and such individual controls a trade or business, then the contributions or benefits of the employees under the plan of the trade or business which he does control must be as favorable as those provided for him under the most favorable plan of the trade or business which he does not control.

(2) Owner-employees who control more than one trade or business. If the plan provides contributions or benefits for an owner-employee who controls, or group of owner-employees who together control, the trade or business with respect to which the plan is established, and such owner-employee, or group of owner-employees, also control as owner-employees one or more other trades or businesses, plans must be established with respect to such controlled trades or businesses so that when taken together they form a single plan which satisfies the requirements of section 401(a) and (d) with respect to the employees of all the controlled trades or businesses.

(3) Control defined. (i) For purposes of this paragraph, an owner-employee, or a group of two or more owner-employees, shall be considered to control a trade or business if such owner-employee, or such group of two or more owner-employees together—

(a) Own the entire interest in an unincorporated trade or business, or

(b) In the case of a partnership, own more than 50 percent of either the capital interest or the profits interest in such partnership.

In determining whether an owner-employee, or group of owner-employees, control a trade or business within the meaning of the preceding sentence, it is immaterial whether or not such individuals could be covered under a plan established with respect to the trade or business. For example, if an individual who is an owner-employee has a 60-percent capital interest in another trade or business, such individual controls such trade or business and the provisions of this paragraph apply even though the individual derives no earned income, as defined in section 401(c)(2), from the controlled trade or business. For purposes of determining the ownership interest of an owner-employee, or group of owner-employees, an owner-employee, or group of owner-employees, is treated as owning any interest in a partnership which is owned, directly or indirectly, by a partnership controlled by such owner-employee, or group of owner-employees.

(ii) The provisions of subparagraphs (1) and (2) of this paragraph apply only if the owner-employee who controls, or the group of owner-employees who control, a trade or business, or trades or businesses, within the meaning of subdivision (i) of this subparagraph is the same owner-employee, or group of owner-employees, covered under the plan intended to satisfy the requirements for qualification. Thus, for example, if A is a 50-percent partner in both the AB and AC partnership, and if the AB partnership wishes to establish a plan covering A and B, the provisions of subparagraphs (1) and (2) of this paragraph do not apply, since A does not control either partnership, and since B has no interest in the AC partnership.

(m) Distribution of benefits. (1)(i) Section 401(d)(4)(B) requires that a qualified plan which

provides contributions or benefits for any owner-employee must not provide for the payment of benefits to such owner-employee at any time before he has attained age 59 ½. An exception to the foregoing rule permits a qualified plan to provide for the distribution of benefits to an owner-employee prior to the time he attains age 59 ½ if he is disabled. For taxable years beginning after December 31, 1966, see section 72(m)(7) and paragraph (f) of § 1.72–17 for the meaning of disabled. For taxable years beginning before January 1, 1967, see section 213(g)(3) for the meaning of disabled. In general, both sections 72(m)(7) and 213(g)(3) provide that an individual is considered disabled if he is unable to engage in any substantial gainful activity because of a medically determinable physical or mental impairment which can be expected to result in death or to be of long-continued and indefinite duration. In addition, section 401(d)(4)(B) does not preclude the distribution of benefits to the estate or other beneficiary of a deceased owner-employee prior to the time the owner-employee would have attained age 59 ½ if he had lived.

(ii) A qualified plan must provide that if, despite the restrictions in the plan to the contrary, an amount is prematurely distributed, or made available, to a participant in such plan who is, or has been, an owner-employee, then no contribution shall be made under the plan by, or for, such individual during any of the 5 taxable years of the plan beginning after the distribution is made.

(2)(i) The provisions of subparagraph (1) of this paragraph preclude an owner-employee who is a participant in a qualified pension or profit-sharing plan of his employer from withdrawing any part of the funds accumulated on his behalf except as provided in such subparagraph (1). However, the distribution of an owner-employee's interest, or any portion of such interest, after he attains age 59 ½ is determined by the provisions of the plan. Thus, for example, if a qualified pension plan provides that the normal retirement age under the plan is age 65, an owner-employee would not be entitled to a distribution of an amount under the plan merely because he attained age 59 ½.

(ii) The provisions of subparagraph (1) of this paragraph do not preclude the establishment of a profit-sharing plan which provides for the distribution of all, or part, of participants' accounts after a fixed number of years. However, such a plan must not permit a distribution of any amount to any owner-employee prior to the time the owner-employee has attained age 59 ½ or becomes disabled within the meaning of section 72(m)(7) or section 213(g)(3), whichever is applicable. On the other hand, if a distribution would have been made under the plan to an owner-employee but for the fact that he had not attained age 59 ½, then the amount of such distribution (including any increment earned on such amount) must be distributed to such owner-employee at such time as he attains age 59 ½.

(3) A qualified pension, annuity, or profit-sharing plan which covers an owner-employee must provide that the distribution of an owner-employee's entire interest under the plan must begin prior to the end of the taxable year in which he attains the age of 70 ½, and such distribution must satisfy the requirements of section 401(a)(9) and paragraph (e) of § 1.401–11. Furthermore, section 401(d)(7) provides that, if an owner-employee dies prior to the time his entire interest has been distributed to him, such owner-employee's entire remaining interest under the plan must, in general, either be distributed to his beneficiary, or beneficiaries, within 5 years, or be used within that period to purchase an immediate annuity for his beneficiary, or beneficiaries. However, a distribution within 5 years of the death of the owner-employee is not required if the distribution of his interest has commenced and such distribution is for a term certain over a period not extending beyond the joint life and survivor expectancy of the owner-employee and his spouse. Thus, for example, an annuity for the joint life and survivor expectancy of an owner-employee and his spouse which guarantees payments for 10 years is a distribution which is payable over a period which does not exceed the joint life and survivor expectancy of the owner-employee and his spouse if such expectancy is at least 10 years at the time the distribution first commences.

(n) Nonbank trustee—(1) Effective dates—(i) General rule. For a plan not in existence on January 1, 1974, this paragraph shall apply to the first plan year commencing after September 2, 1974, and all subsequent plan years.

(ii) Existing plans. For a plan in existence on January 1, 1974, this paragraph shall apply to the first plan year commencing after December 31, 1975, and all subsequent plan years.

(2) In general. For plan years to which this paragraph applies, the trustee of a trust described in paragraph (c)(1)(i) of this section may be a person other than a bank if the person demonstrates to the satisfaction of the Commissioner that the manner in which the person will administer trusts will be consistent with the requirements of

section 401. The person must demonstrate by written application that the requirements of paragraph (n)(3) to (7) of this section will be met. The written application must be sent to the Commissioner of Internal Revenue, Attention: E:EP, Internal Revenue Service, Washington, D.C. 20224. For procedural and administrative rules, see paragraph (n)(8) of this section.

(3) Fiduciary ability. The applicant must demonstrate in detail its ability to act within the accepted rules of fiduciary conduct. Such demonstration must include the following elements of proof:

(i) Continuity. (A) The applicant must assure the uninterrupted performance of its fiduciary duties notwithstanding the death or change of its owners. Thus, for example, there must be sufficient diversity in the ownership of the applicant to ensure that the death or change of its owners will not interrupt the conduct of its business. Therefore, the applicant cannot be an individual.

(B) Sufficient diversity in the ownership of an incorporated applicant is demonstrated in the following circumstances:

(1) Individuals each of whom owns more than 20 percent of the voting stock in the applicant own, in the aggregate, no more than 50 percent of such stock;

(2) The applicant has issued securities registered under section 12 (b) of the Securities Exchange Act of 1934 (15 U.S.C. 78l(b)) or required to be registered under section 12(g)(1) of that Act (15 U.S.C. 78l(g)(1)); or

(3) The applicant has a parent corporation within the meaning of section 1563(a)(1) that has issued securities registered under section 12(b) of the Securities Exchange Act of 1934 (15 U.S.C. 78l(b)) or required to be registered under Section 12(g)(1) of that Act (15 U.S.C. 78l(g)(1)).

(C) Sufficient diversity in the ownership of an applicant that is a partnership means that—

(1) Individuals each of whom owns more than 20 percent of the profits interest in the partnership own, in the aggregate, no more than 50 percent of such profits interest, and

(2) Individuals each of whom owns more than 20 percent of the capital interest in the partnership own, in the aggregate, no more than 50 percent of such capital interest.

(D) For purposes of this subdivision, the ownership of stock and of capital and profits interests shall be determined in accordance with the rules for constructive ownership of stock provided in section 1563(e) and (f)(2). For this purpose, the rules for constructive ownership of stock provided in section 1563(e) and (f)(2) shall apply to a capital or profits interest in a partnership as if it were a stock interest.

(ii) Established location. The applicant must have an established place of business in the United States where it is accessible during every business day.

(iii) Fiduciary experience. The applicant must have fiduciary experience or expertise sufficient to ensure that it will be able to perform its fiduciary duties. Evidence of fiduciary experience must include proof that a significant part of the business of the applicant consists of exercising fiduciary powers similar to those it will exercise if its application is approved. Evidence of fiduciary expertise must include proof that the applicant employs personnel experienced in the administration of fiduciary powers similar to those the applicant will exercise if its application is approved.

(iv) Fiduciary responsibility. The applicant must assure compliance with the rules of fiduciary conduct set out in paragraph (n)(6) of this section.

(v) Financial responsibility. The applicant must exhibit a high degree of solvency commensurate with the obligations imposed by this paragraph. Among the factors to be taken into account are the applicant's net worth, its liquidity, and its ability to pay its debts as they come due.

(4) Capacity to account. The applicant must demonstrate in detail its experience and competence with respect to accounting for the interests of a large number of individuals (including calculating and allocating income earned and paying out distributions to payees). Examples of accounting for the interests of a large number of individuals include accounting for the interests of a large number of shareholders in a regulated investment company and accounting for the interests of a large number of variable annuity contract holders.

(5) Fitness to handle funds—(i) In general. The applicant must demonstrate in detail its experience and competence with respect to other activities normally associated with the handling of retirement funds.

(ii) Examples. Examples of activities normally associated with the handling of retirement funds include:

(A) To Receive, issue receipts for, and safely keep securities;

(B) To collect income;

(C) To execute such ownership certificates, to keep such records, make such returns, and render such statements as are required for Federal tax purposes;

(D) To give proper notification regarding all collections;

(E) To collect matured or called principal and properly report all such collections;

(F) To exchange temporary for definitive securities;

(G) To give proper notification of calls, subscription rights, defaults in principal or interest, and the formation of protective committees;

(H) To buy, sell, receive, or deliver securities on specific directions.

(6) Rules of fiduciary conduct. The applicant must demonstrate that under applicable regulatory requirements, corporate or other governing instruments, or its established operating procedures:

(i) Administration of fiduciary powers. (A)(1) The owners or directors of the applicant will be responsible for the proper exercise of fiduciary powers by the applicant. Thus, all matters pertinent thereto, including the determination of policies, the investment and disposition of property held in a fiduciary capacity, and the direction and review of the actions of all employees utilized by the applicant in the exercise of its fiduciary powers, will be the responsibility of the owners or directors. In discharging this responsibility, the owners or directors may assign to designated employees, by action duly recorded, the administration of such of the applicant's fiduciary powers as may be proper to assign.

(2) A written record will be made of the acceptance and of the relinquishment or closing out of all fiduciary accounts, and of the assets held for each account.

(3) If the applicant has the authority or the responsibility to render any investment advice with regard to the assets held in or for each fiduciary account, the advisability of retaining or disposing of the assets will be determined at least once during each period of 12 months.

(B) All employees taking part in the performance of the applicant's fiduciary duties will be adequately bonded. Nothing in this subdivision (i)(B) shall require any person to be bonded in contravention of section 412(d) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1112(d)).

(C) The applicant will employ or retain legal counsel who will be readily available to pass upon fiduciary matters and to advise the applicant.

(D) In order to segregate the performance of its fiduciary duties from other business activities, the applicant will maintain a separate trust division under the immediate supervision of an individual designated for that purpose. The trust division may utilize the personnel and facilities of other divisions of the applicant, and other divisions of the applicant may utilize the personnel and facilities of the trust division, as long as the separate identity of the trust division is preserved.

(ii) Adequacy of net worth. (A) The applicant will determine the value of the assets held by it in trust at least once in each calendar year and no more than 18 months after the preceding valuation. The assets will be valued at their fair market value, except that the assets of an employee pension benefit plan to which section 103(b)(3)(A) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1023(b)(3)(A)) applies will be considered to have the value stated in the most recent annual report of the plan.

(B) No fiduciary account will be accepted by the applicant unless the applicant's net worth (determined as of the end of the most recent taxable year) exceeds the greater of—

(1) $100,000, or

(2) Four percent (or, in the case of a passive trustee described in paragraph (n)(7)(i)(A) of this section, two percent) of the value of all of the assets held by the applicant in fiduciary accounts (determined as of the most recent valuation date).

(C) The applicant will take whatever lawful steps are necessary (including the relinquishment of fiduciary accounts) to ensure that its net worth (determined as of the close of each taxable year) exceeds the greater of—

(1) $50,000, or

(2) Two percent (or, in the case of a passive trustee described in paragraph (n)(7)(i)(A) of this section, one percent) of the value of all of the assets held by the applicant in fiduciary accounts (determined as of the most recent valuation date).

(iii) Audits. (A) At least once during each period of 12 months, the applicant will cause

detailed audits of the fiduciary books and records to be made by a qualified public accountant. At that time, the applicant will ascertain whether the fiduciary accounts have been administered in accordance with law, this paragraph, and sound fiduciary principles. The audits shall be conducted in accordance with generally accepted auditing standards, and shall involve whatever tests of the fiduciary books and records of the applicant are considered necessary by the qualified public accountant.

(B) In the case of an applicant which is regulated, supervised, and subject to periodic examination by a State or Federal agency, such applicant may adopt an adequate continuous audit system in lieu of the periodic audits required by paragraph (n)(6)(iii)(A) of this section.

(C) A report of the audits and examinations required under this subdivision, together with the action taken thereon, will be noted in the fiduciary records of the applicant.

(iv) Funds awaiting investment or distribution. Funds held in a fiduciary capacity by the applicant awaiting investment or distribution will not be held uninvested or undistributed any longer than is reasonable for the proper management of the account.

(v) Custody of investments. (A) Except for investments pooled in a common investment fund in accordance with the provisions of paragraph (n)(6)(vi) of this section, the investments of each account will not be commingled with any other property.

(B) Assets of accounts requiring safekeeping will be deposited in an adequate vault. A permanent record will be kept of assets deposited in or withdrawn from the vault.

(vi) Common investment funds. The assets of an account may be pooled in a common investment fund (as defined in paragraph (n)(6)(viii)(C) of this section) if the applicant is authorized under applicable law to administer a common investment fund and if pooling the assets in a common investment fund is not in contravention of the plan documents or applicable law. The common investment fund must be administered as follows:

(A) Each common investment fund must be established and maintained in accordance with a written agreement, containing appropriate provisions as to the manner in which the fund is to be operated, including provisions relating to the investment powers and a general statement of the investment policy of the applicant with respect to the fund; the allocation of income, profits and losses; the terms and conditions governing the admission or withdrawal of participations in the funds; the auditing of accounts of the applicant with respect to the fund; the basis and method of valuing assets held by the fund, setting forth specific criteria for each type of asset; the minimum frequency for valuation of assets of the fund; the period following each such valuation date during which the valuation may be made (which period in usual circumstances may not exceed 10 business days); the basis upon which the fund may be terminated; and such other matters as may be necessary to define clearly the rights of participants in the fund. A copy of the agreement must be available at the principal office of the applicant for inspection during all business hours, and upon request a copy of the agreement must be furnished to the employer, the plan administrator, any participant or beneficiary of an account, or the individual for whose benefit the account is established or that individual's beneficiary.

(B) All participations in the common investment fund must be on the basis of a proportionate interest in all of the investments.

(C) Not less frequently than once during each period of 3 months the applicant must determine the value of the assets in the fund as of the date set for the valuation of assets. No participation may be admitted to or withdrawn from the fund except (1) on the basis of such valuation and (2) as of such valuation date. No participation may be admitted to or withdrawn from the fund unless a written request for or notice of intention of taking such action has been entered on or before the valuation date in the fiduciary records of the applicant. No request or notice may be canceled or countermanded after the valuation date.

(D)(1) The applicant must at least once during each period of 12 months cause an adequate audit to be made of the common investment fund by a qualified public accountant.

(2) The applicant must at least once during each period of 12 months prepare a financial report of the fund which, based upon the above audit, must contain a list of investments in the fund showing the cost and current value of each investment; a statement for the period since the previous report showing purchases, with cost; sales, with profit or loss; any other investment changes; income and disbursements; and an appropriate notation as to any investments in default.

(3) The applicant must transmit and certify the accuracy of the financial report to the administrator of each plan participating in the common investment fund within 120 days after the end of the plan year.

(E) When participations are withdrawn from a common investment fund, distributions may be made in cash or ratably in kind, or partly in cash and partly in kind: *Provided,* That all distributions as of any one valuation date must be made on the same basis.

(F) If for any reason an investment is withdrawn in kind from a common investment fund for the benefit of all participants in the fund at the time of such withdrawal and such investment is not distributed ratably in kind, it must be segregated and administered or realized upon for the benefit ratably of all participants in the common investment fund at the time of withdrawal.

(vii) Books and records. (A) The applicant must keep its fiduciary records separate and distinct from other records. All fiduciary records must be so kept and retained for as long as the contents thereof may become material in the administration of any internal revenue law. The fiduciary records must contain full information relative to each account.

(B) The applicant must keep an adequate record of all pending litigation to which it is a party in connection with the exercise of fiduciary powers.

(viii) Definitions. For purposes of this subparagraph, subdivision (n)(3)(v), and subparagraph (n)(8) of this section—

(A) The term "account" or "fiduciary account" means a trust described in section 401(a) (including a custodial account described in section 401(f)), a custodial account described in section 403(b)(7), or an individual retirement account described in section 408(a) (including a custodial account described in section 408(h)).

(B) The term "plan administrator" means an administrator as defined in § 1.414(g)–1.

(C) The term "common investment fund" means a trust that satisfies the following requirements:

(1) The trust consists of all or part of the assets of several accounts that have been established with the applicant, and

(2) The trust is described in section 401(a) and is exempt from tax under section 501(a), or is a trust that is created for the purpose of providing a satisfactory diversification of investments or a reduction of administrative expenses for the participating accounts and that satisfies the requirements of section 408(c).

(D) The term "fiduciary records" means all matters which are written, transcribed, recorded, received or otherwise come into the possession of the applicant and are necessary to preserve information concerning the acts and events relevant to the fiduciary activities of the applicant.

(E) The term "qualified public accountant" means a qualified public accountant, as defined in section 103(a)(3)(D) of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1023(a)(3)(D), who is independent of the applicant.

(F) The term "net worth" means the amount of the applicant's assets less the amount of its liabilities, as determined in accordance with generally accepted accounting principles.

(7) **Special rules—(i) Passive trustee.** (A) An applicant that undertakes to act only as a passive trustee may be relieved of one or more of the requirements of this paragraph upon clear and convincing proof that such requirements are not germane, under all the facts and circumstances, to the manner in which the applicant will administer any trust. A trustee is a passive trustee only if under the written trust instrument the trustee has no discretion to direct the investment of the trust funds or any other aspect of the business administration of the trust, but is merely authorized to acquire and hold particular investments specified by the trust instrument. Thus, for example, in the case of an applicant that undertakes merely to acquire and hold the stock of regulated investment companies, the requirements of paragraph (n)(6)(i)(A)(3), (i)(D), and (vi) of this section shall not apply and no negative inference shall be drawn from the applicant's failure to demonstrate its experience of competence with respect to the activities described in paragraph (n)(5)(ii)(E) to (H) of this section.

(B) The notice of approval issued to an applicant that is approved by reason of this subdivision shall state that the applicant is authorized to act only as a passive trustee.

(ii) Federal or State regulation. Evidence that an applicant is subject to Federal or State regulation with respect to one or more relevant factors shall be given weight in proportion to the extent that such regulatory standards are consonant with the requirements of section 401. Such evidence

may be submitted in addition to, or in lieu of, the specific proofs required by this paragraph.

(iii) Savings account. (A) An applicant will be approved to act as trustee under this subdivision if the following requirements are satisfied:

(*1*) The applicant is a credit union, industrial loan company, or other financial institution designated by the Commissioner;

(*2*) The investment of the trust assets will be solely in deposits in the applicant;

(*3*) Deposits in the applicant are insured (up to the dollar limit prescribed by applicable law) by an agency or instrumentality of the United States, or by an organization established under a special statute the business of which is limited to insuring deposits in financial institutions and providing related services.

(B) Any applicant that satisfies the requirements of this subdivision is hereby approved, and (notwithstanding subparagraph (2) of this paragraph) is not required to submit a written application. This approval takes effect on the first day after December 22, 1976, on which the applicant satisfies the requirements of this subdivision, and continues in effect for so long as the applicant continues to satisfy those requirements.

(C) If deposits are insured, but not in the manner provided in paragraph (n)(7)(iii)(A)(*3*) of this section, the applicant must submit an application. The application, notwithstanding subparagraph (2) of this paragraph, will be limited to a complete description of the insurance of applicant's deposits. The applicant will be approved if the Commissioner approves of the applicant's insurance.

(iv) Notification of Commissioner. The applicant must notify the Commissioner in writing of any change that affects the continuing accuracy of any representation made in the application required by this paragraph, whether the change occurs before or after the applicant receives a notice of approval. The notification must be addressed to the Commissioner of Internal Revenue, Attention: E:EP, Internal Revenue Service, Washington, D.C. 20224.

(v) Substitution of trustee. No applicant will be approved unless the applicant undertakes to act as trustee only under trust instruments which contain a provision to the effect that the grantor is to substitute another trustee upon notification by the Commissioner that such substitution is required because the applicant has failed to comply with the requirements of this paragraph or is not keeping such records, or making such returns, or rendering such statements as are required by forms or regulations.

(8) Procedure and administration—(i) Notice of approval. If the applicant is approved, a written notice of approval will be issued to the applicant. The notice of approval will state the day on which it becomes effective, and (except as otherwise provided therein) will remain effective until revoked. This paragraph does not authorize the applicant to accept any fiduciary account before such notice of approval becomes effective.

(ii) Notice of disapproval. If the applicant is not approved, a written notice will be furnished to the applicant containing a statement of the reasons why the applicant has not been approved.

(iii) Copy to be furnished. The applicant must not accept a fiduciary account until after the plan administrator or the person for whose benefit the account is to be established is furnished with a copy of the written notice of approval issued to the applicant. This provision is effective six months after April 20, 1979 for new accounts accepted thereafter. For accounts accepted before that date, the administrator must be notified before the later of the effective date of this provision or six months after acceptance of the account.

(iv) Grounds for revocation. The notice of approval issued to an applicant will be revoked if the Commissioner determines that the applicant is unwilling or unable to administer fiduciary accounts in a manner consistent with the requirements of this paragraph. Generally, the notice will not be revoked unless the Commissioner determines that the applicant has knowingly, willfully, or repeatedly failed to administer fiduciary accounts in a manner consistent with the requirements of this paragraph, or has administered a fiduciary account in a grossly negligent manner.

(v) Procedures for revocation. The notice of approval issued to an applicant may be revoked in accordance with the following procedures:

(A) If the Commissioner proposes to revoke the notice of approval issued to an applicant, the Commissioner will advise the applicant in writing of the proposed revocation and of the reasons therefor.

(B) Within 60 days after the receipt of such written advice, the applicant may protest the proposed revocation by submitting a written statement of facts, law, and arguments opposing such revocation to Commissioner of Internal Revenue, Attention: E:EP, Internal Revenue Service, Wash-

ington, D.C. 20224. In addition, the applicant may request a conference in the National Office.

(C) If the applicant consents to the proposed revocation, either before or after a National Office conference, or if the applicant fails to file a timely protest, the Commissioner will revoke the notice of approval that was issued to the applicant.

(D) If, after considering the applicant's protest and any information developed in conference, the Commissioner determines that the applicant is unwilling or unable to administer fiduciary accounts in a manner consistent with the requirements of this paragraph, the Commissioner will revoke the notice of approval that was issued to the applicant and will furnish the applicant with a written statement of findings on which the revocation is based.

(E) If at any time the Commissioner determines that immediate action is necessary to protect the interest of the Internal Revenue Service or of any fiduciary account, the notice of approval issued to the applicant will be suspended at once, pending a final decision to be based on the applicant's protest and any information developed in conference.

(9) Supersession. This paragraph supersedes § 11.401(d)(1)–1 of the Temporary Income Tax Regulations Under the Employee Retirement Income Security Act of 1974.

[T.D. 6675, 28 FR 10126, Sept. 17, 1963, as amended by T.D. 6982, 33 FR 16500, Nov. 13, 1968; T.D. 6985, 33 FR 19815, Dec. 27, 1968; T.D. 7428, 41 FR 34619, Aug. 16, 1976; T.D. 7611, 44 FR 23520, April 20, 1979]

§ 1.401–13 Excess contributions on behalf of owner-employees.

(a) Introduction. **(1)** The provisions of this section prescribe the rules relating to the treatment of excess contributions made under a qualified pension, annuity, or profit-sharing plan on behalf of a self-employed individual who is an owner-employee (as defined in paragraph (d) of § 1.401–10). Paragraph (b) of this section defines the term "excess contribution". Paragraph (c) of this section describes an exception to the definition of an excess contribution in the case of contributions which are applied to pay premiums on certain annuity, endowment, or life insurance contracts. Paragraph (d) of this section describes the effect of making an excess contribution which is not determined to have been willfully made, and paragraph (e) of this section describes the effect of making an excess contribution which is determined to have been willfully made.

(2) Under section 401(c)(1), certain self-employed individuals are treated as employees for purposes of section 401. In addition, under section 401(c)(4), a proprietor is treated as his own employer, and the partnership is treated as the employer of the partners. Under section 404, certain contributions on behalf of a self-employed individual are treated as deductible and taken into consideration in determining the amount allowed as a deduction under section 404(a). Such contributions are treated under section 401 and the regulations thereunder as employer contributions on behalf of the self-employed individual. However, in some cases, additional contributions may be made on behalf of a self-employed individual. Such contributions are not taken into consideration in determining the amount deductible under section 404 and are not taken into consideration in computing the amount allowed as a deduction under section 404(a). For purposes of section 401 and the regulations thereunder, such contributions are treated as employee contributions by the self-employed individual. If a self-employed individual is an owner-employee within the meaning of section 401(c)(3) and paragraph (d) of § 1.401–10, then this section prescribes the rules applicable if contributions are made in excess of those permitted to be made under section 401.

(b) Excess contributions defined. **(1)(i)** Except as provided in paragraph (c) relating to contributions which are applied to pay premiums on certain annuity, endowment, or life insurance contracts, an excess contribution is any amount described in subparagraphs (2) through (4) of this paragraph.

(ii) For purposes of determining if the amount of any contribution made under the plan on behalf of an owner-employee is an excess contribution, the amount of any contribution made under the plan which is allocable to the purchase of life, accident, health, or other insurance is not taken into account. The amount of any contribution which is allocable to the cost of insurance protection is determined in accordance with the provisions of paragraph (f) of § 1.404(e)–1 and paragraph (b) of § 1.72–16.

(2)(i) In the case of a taxable year of the plan for which employer contributions are made on behalf of only owner-employees, an excess contribution is the amount of any contribution for such taxable year on behalf of such owner-employee which is not deductible under section 404 (determined without regard to section 404(a)(10)). This rule applies irrespective of whether the plan provides for contributions on behalf of common-law

employees, or self-employed individuals who are not owner-employees, when such employees or individuals become eligible for coverage under the plan, and irrespective of whether contributions are in fact made for such employees or such individuals for other taxable years of the plan.

(ii) In the case of a taxable year of the plan for which employer contributions are made on behalf of both owner-employees and either common-law employees or self-employed individuals who are not owner-employees, an excess contribution is the amount of any employer contribution on behalf of any owner-employee for such taxable year which exceeds the amount deductible under section 404 (determined without regard to section 404(a)(10)) unless such amount may be treated as an employee contribution under the plan in accordance with the rules of paragraph (d)(3) of § 1.401–11 and is a permissible employee contribution under subparagraph (3) of this paragraph.

(3)(i) In the case of a taxable year of the plan for which employer contributions are made on behalf of both an owner-employee and either common-law employees or self-employed individuals who are not owner-employees, employee contributions on behalf of an owner-employee may be made for such taxable year of the plan. However, the amount of such contributions, if any, which is described in subdivisions (ii), (iii), or (iv) of this subparagraph is an excess contribution.

(ii) An excess contribution is the amount of any employee contribution made on behalf of any owner-employee during a taxable year of the plan at a rate in excess of the rate of contributions which may be made as employee contributions by common-law employees, or by self-employed individuals who are not owner-employees, during such taxable year of the plan.

(iii) An excess contribution is the amount of any employee contribution made on behalf of an owner-employee which exceeds the lesser of $2,500 or 10 percent of the earned income (as defined in paragraph (c) of § 1.401–10) of such owner-employee for his taxable year in which such contributions are made.

(iv) In the case of a taxable year of an owner-employee in which contributions are made on behalf of such owner-employee under more than one plan, an excess contribution is the amount of any employee contribution made on behalf of such owner-employee under all such plans during such taxable year which exceeds $2,500. If such an excess contribution is made, the amount of the excess contribution made on behalf of the owner-employee with respect to any one of such plans is the amount by which the employee contribution on his behalf under such plan for the year exceeds an amount which bears the same ratio to $2,500 as the earned income of the owner-employee derived from the trade or business with respect to which the plan is established bears to his earned income derived from the trades or businesses with respect to which all such plans are established.

(4) An excess contribution is the amount of any contribution on behalf of an owner-employee for any taxable year of the plan with respect to which the plan is treated, under section 401(e)(2), as not meeting the requirements of section 401(d) with respect to such owner-employee.

(c) Contributions for premiums on certain annuity, endowment, or life insurance contracts. (1) The term "excess contribution" does not include the amount of any employer contributions on behalf of an owner-employee which, under the provisions of the plan, is expressly required to be applied (either directly or through a trustee) to pay the premiums or other consideration for one or more annuity, endowment, or life insurance contracts, if—

(i) The employer contributions so applied meet the requirements of subparagraphs (2) through (4) of this paragraph, and

(ii) The total employer contributions required to be applied annually to pay premiums on behalf of any owner-employee for contracts described in this paragraph do not exceed $2,500. For purposes of computing such $2,500 limit, the total employer contributions includes amounts which are allocable to the purchase of life, accident, health, or other insurance.

(2)(i) The employer contributions must be paid under a plan which satisfies all the requirements for qualification. Accordingly, for example, contributions can be paid under the plan for life insurance protection only to the extent otherwise permitted under sections 401 through 404 and the regulations thereunder. However, certain of the requirements for qualification are modified with respect to a plan described in this paragraph (see section 401(a)(10)(A)(ii) and (d)(5)).

(ii) A plan described in this paragraph is not disqualified merely because a contribution is made on behalf of an owner-employee by his employer during a taxable year of the employer for which the owner-employee has no earned income. On the other hand, a plan will fail to qualify if a contribution is made on behalf of an owner-em-

ployee which results in the discrimination prohibited by section 401(a)(4) as modified by section 401(a)(10)(A)(ii) (see paragraph (f)(3) of § 1.401–12).

(3) The employer contributions must be applied to pay premiums or other consideration for a contract issued on the life of the owner-employee. For purposes of this subparagraph, a contract is not issued on the life of an owner-employee unless all the proceeds which are, or may become, payable under the contract are payable directly, or through a trustee of a trust described in section 401(a) and exempt from tax under section 501(a), to the owner-employee or to the beneficiary named in the contract or under the plan. Accordingly, for example, a nontransferable face-amount certificate (as defined in section 401(g) and the regulations thereunder) is considered an annuity on the life of the owner-employee if the proceeds of such contract are payable only to the owner-employee or his beneficiary.

(4)(i) For any taxable year of the employer, the amount of contributions by the employer on behalf of the owner-employee which is applied to pay premiums under the contracts described in this paragraph must not exceed the average of the amounts deductible under section 404 (determined without regard to section 404(a)(10)) by such employer on behalf of such owner-employee for the most recent three taxable years of the employer (ending prior to the date the latest contract was entered into or modified to provide additional benefits), in which the owner-employee derived earned income from the trade or business with respect to which the plan is established. However, if such owner-employee has not derived earned income for at least three taxable years preceding such date, then, in determining the "average of the amounts deductible", only so many of such taxable years as such owner-employee was engaged in such trade or business and derived earned income therefrom are taken into account.

(ii) For the purpose of making the computation described in subdivision (i) of this subparagraph, the taxable years taken into account include those years in which the individual derived earned income from the trade or business but was not an owner-employee with respect to such trade or business. Furthermore, taxable years of the employer preceding the taxable year in which a qualified plan is established are taken into account. If such taxable years began prior to January 1, 1963, the amount deductible is determined as if section 404 included section 404(a)(8), (9), (10), and (e).

(5) The amount of any employer contribution which is not deductible but which is not treated as an excess contribution because of the provisions of this paragraph shall be taken into account as an employee contribution made on behalf of the owner-employee during the owner-employee's taxable year with, or within which, the taxable year of the person treated as his employer under section 401(c)(4) ends. However, such contribution is only treated as an employee contribution made on behalf of the owner-employee for the purpose of determining whether any other employee contribution made on behalf of the owner-employee during such period is an excess contribution described in paragraph (b)(3) of this section.

(d) Effect of an excess contribution which is not willfully made. **(1)** If an excess contribution (as defined in paragraph (b) of this section) is made on behalf of an owner-employee, and if such contribution is not willfully made, then the provisions of this paragraph describe the effect of such an excess contribution. However, if the excess contribution made on behalf of an owner-employee is determined to have been willfully made, then the provisions of paragraph (e) of this section are applicable to such contribution.

(2)(i) This paragraph does not apply to an excess contribution if the net amount of such excess contribution (as defined in subparagraph (4) of this paragraph) and the net income attributable to such amount are repaid to the owner-employee on whose behalf the excess contribution was made at any time before the end of six months beginning on the day on which the district director sends notice (by certified or registered mail) of the amount of the excess contribution to the trust, insurance company, or other person to whom such excess contribution was paid. The net income attributable to the net amount of the excess contribution is the aggregate of the amounts of net income attributable to the net amount of the excess contribution for each year of the plan beginning with the taxable year of the plan within which the excess contribution is made and ending with the close of the taxable year of the plan immediately preceding the taxable year of the plan in which the net amount of the excess contribution is repaid. The amount of net income attributable to the net amount of the excess contribution for each year is the amount of net income earned under the plan during the year which is allocated in a reasonable manner to the net amount of the excess contribution. For example, the amount of net income earned under the plan for the year which is attributable to the net amount of an excess contribution can be computed as the

amount which bears the same ratio to the amount of the "net income attributable to the interest of the owner-employee under the plan" for such taxable year (determined in accordance with the provisions of subparagraph (5)(ii) of this paragraph) as the net amount of the excess contribution bears to the aggregate amount standing to the account of the owner-employee at the end of that year (including the net amount of any excess contribution).

(ii) The notice described in subdivision (i) of this subparagraph shall not be mailed prior to the time that the amount of the tax under chapter 1 of the Code of the owner-employee to whom the excess contribution is to be repaid has been finally determined for his taxable year in which such excess contribution was made. For purposes of this subdivision, a final determination of the amount of tax liability of the owner-employee includes—

(a) A decision by the Tax Court of the United States, or a judgment, decree, or other order by any court of competent jurisdiction, which has become final;

(b) A closing agreement authorized by section 7121; or

(c) The expiration of the period of limitation on suits by the taxpayer for refund, unless suit is instituted prior to the expiration of such period.

(iii) For purposes of this subparagraph, an amount is treated as repaid to an owner-employee if an adequate adjustment is made to the account of the owner-employee. An adequate adjustment is made to the account of an owner-employee, for example, if the amount of the excess contribution (without any reduction for any loading or other administrative charge) and the net income attributable to such amount is taken into account as a contribution under the plan for the current year. In such a case, the gross income of the owner-employee for his taxable year in which such adjustment is made includes the amount of the net income attributable to the excess contribution.

(iv) If the net amount of the excess contribution and the net income attributable thereto is repaid, within the period described in subdivision (i) of this subparagraph, to the owner-employee on whose behalf such contribution was made, then the net income attributable to the excess contribution is, pursuant to section 61(a), includible in the gross income of the owner-employee for his taxable year in which such amount is distributed, or made available, to him. However, such amount is not a distribution to which section 402 or 403 and section 72 apply (see subparagraph (6) of this paragraph).

(3)(i) If the net amount of any excess contribution (as defined in subparagraph (4) of this paragraph) and the net income attributable to that excess contribution are not repaid to the owner-employee on whose behalf the excess contribution was made before the end of the six-month period described in subparagraph (2)(i) of this paragraph, the plan under which the excess contribution has been made is considered, for purposes of section 404, as not satisfying the requirements for qualification with respect to such owner-employee for all taxable years of the plan described in subdivision (ii) of this subparagraph. However, such disqualification only applies to the interest of the owner-employee on whose behalf an excess contribution has been made and does not disqualify the plan with respect to the other participants thereunder.

(ii) The taxable years referred to in subdivision (i) of this subparagraph include the taxable year of the plan within which the excess contribution is made and each succeeding taxable year of the plan until the beginning of the taxable year of the plan in which the trust, insurance company, or other person to whom such excess contribution was paid repays to such owner-employee—

(a) The net amount of the excess contribution, and

(b) The amount of income attributable to his interest under the plan which is includible in his gross income for any taxable year by reason of the provisions of subparagraph (5) of this paragraph.

(4) For purposes of this paragraph, the net amount of an excess contribution is the amount of such excess contribution, as defined in paragraph (b) of this section, reduced by the amount of any loading charge or other administrative charge ratably allocable to such excess contribution.

(5)(i) If a plan is considered as not meeting the requirements for qualification with respect to an owner-employee by reason of the provisions of subparagraph (3) of this paragraph for any taxable year of the plan, such owner-employee's gross income for any of his taxable years with or within which such taxable year of the plan ends shall, for purposes of chapter 1 of the Code, include the portion of the net income earned under the plan for such taxable year of the plan which is attributable to the interest of the owner-employee under the plan.

(ii) For purposes of this subparagraph, the term "net income" means the net income earned under the plan determined in accordance with generally accepted accounting principles consistently applied, and the "net income attributable to the interest of the owner-employee under the plan" is the amount which bears the same ratio to the aggregate amount of net income earned under the plan for the taxable year of the plan as the amount standing to the account of the owner-employee at the end of that year (including the amount of any excess contribution which is credited to his account) bears to the aggregate amount of all funds under the plan for all employees at the end of that year (including the aggregate amount of excess contributions credited to the accounts of all owner-employees for that year).

(iii) The provisions of this subparagraph may be illustrated by the following example:

Example. A is an owner-employee covered under the X Employees' Pension Trust who files his return on the basis of a calendar year. An excess contribution was made on behalf of A during the plan year beginning on January 1, 1966. The net amount of the excess contribution and the net income attributable thereto was not repaid to A before the end of the six-month period described in subparagraph (2)(i) of this paragraph. Accordingly, the net income earned under the plan during 1966 which is attributable to A's interest is to be included in his gross income for 1966. Assume that the trust which forms a part of the pension plan of the X Company also files its returns on a calendar year basis, and that during 1966 the trust had a gross income of $4,000 (including a long-term capital gain of $2,500) and expenses of $500. Assume, further, that the amount standing to A's account on December 31, 1966 (including the amount of the excess contribution), was $20,000, and that on that date the amount funded under the plan for all employees (including A) is $140,000. Then the net income of the trust for 1966 is $3,500 ($4,000–$500). The net income attributable to the interest of A under the plan is $500 (the amount which bears the same ratio to $3,500 as $20,000 bears to $140,000). Accordingly, $500 is included in A's gross income in accordance with the provisions of section 401(e)(2)(B) as the "net income attributable to the interest of the owner-employee under the plan".

(6) The provisions of section 402 or 403 and section 72 do not apply to any amount distributed, or made available, to an owner-employee which is described in this paragraph. Accordingly, for example, the provisions of section 72(m)(5)(A)(i), relating to amounts subject to the penalty tax imposed by section 72(m), do not apply to the amount of the net income attributable to the interest of an owner-employee (as defined in subparagraph (5)(ii) of this paragraph) which is includible in his gross income. Furthermore, in such a case, the provisions of section 401(d)(5)(C) do not apply to such amount.

(7) Certain adjustments will be required with respect to the interest of an owner-employee after any amount previously allocated to his account has been returned to him pursuant to the provisions of this paragraph. For example, if the determination of whether life insurance benefits provided under the plan are incidental is made, in part, with regard to the contributions allocated to the accounts of the participants covered under the plan, an adjustment may have to be made with respect to the life insurance purchased under the plan for any owner-employee after any amount previously allocated to his account has been repaid to him. Furthermore, if, for example, an owner-employee has received annuity payments which were taxable under the exclusion ratio rule of section 72, and if such exclusion ratio took into account any amount credited to the account of the owner-employee which is subsequently repaid to him, then such exclusion ratio must be recomputed after the adjustment in such owner-employee's account has taken place.

(8) Notwithstanding any other provision of law, in any case in which the plan is treated as not satisfying the requirements for qualification with respect to any owner-employee by reason of the provisions of section 401(e), the period for assessing, with respect to such owner-employee, any deficiency arising by reason of—

(i) The disallowance of any deduction under section 404 by reason of the provisions of subparagraph (3) of this paragraph, or

(ii) The inclusion of amounts in the gross income of the owner-employee by reason of the provisions of subparagraph (5) of this paragraph,

shall not expire prior to 18 months after the day the district director mails the notice with respect to the excess contribution (described in subparagraph (2)(i) of this paragraph) which gives rise to such disallowance or inclusion. Thus, for example, notwithstanding the provisions of section 6212(c) (relating to the restriction on the determination of additional deficiencies), if, after a final determination by the Tax Court of the income tax liability of an owner-employee for a taxable year in which an excess contribution was made, the amount of such excess contribution and the net income attributable thereto is not paid to the owner-employee before the end of the six-month period described in subparagraph (2)(i) of this paragraph, an additional deficiency assessment may be made for such taxable year with respect to such excess contribution.

(e) **Effect of an excess contribution which is determined to have been willfully made.** If an excess contribution (as defined in paragraph (b) of

this section) on behalf of an owner-employee is determined to have been willfully made, then—

(1) Only the provisions of this paragraph apply to such contribution;

(2) There shall be distributed to the owner-employee on whose behalf such contribution was willfully made his entire interest in all plans in which he is a participant as an owner-employee;

(3) The amount distributed under each such plan is an amount to which section 72 does apply (see section 72(m)(5)(A)(iii)); and

(4) For purposes of section 404, no plan in which such individual is covered as an owner-employee shall be considered as meeting the requirements for qualification with respect to such owner-employee for any taxable year of the plan beginning with or within the calendar year in which it is determined that the excess contribution has been willfully made and with or within the five calendar years following such year.

(f) Years to which this section applies. This section applies to contributions made in taxable years of employers beginning before January 1, 1976. Thus, for example, in the case of willful contributions made in taxable years of employers beginning before January 1, 1976, paragraphs (e)(1), (2), and (3) of this section apply to such taxable years beginning on or after such date. However, in such a case, because the application of paragraph (e)(4) of this section affects contributions made in taxable years of employers beginning on or after January 1, 1976, paragraph (e)(4) of this section does not apply to such taxable years; see paragraph (c) of § 1.401(e)–4 (relating to transitional rules for excess contributions).

[T.D. 6676, 28 FR 10139, Sept. 17, 1963; as amended by T.D. 7636, 44 FR 47053, Aug. 10, 1979]

§ 1.401–14 Inclusion of medical benefits for retired employees in qualified pension or annuity plans.

(a) Introduction. Under section 401(h) a qualified pension or annuity plan may make provision for the payment of sickness, accident, hospitalization, and medical expenses for retired employees, their spouses, and their dependents. The term "medical benefits described in section 401(h)" is used in this section to describe such payments.

(b) In general—(1) Coverage. Under section 401(h), a qualified pension or annuity plan may provide for the payment of medical benefits described in section 401(h) only for retired employees, their spouses, or their dependents. To be "retired" for purposes of eligibility to receive medical benefits described in section 401(h), an employee must be eligible to receive retirement benefits provided under the pension plan, or else be retired by an employer providing such medical benefits by reason of permanent disability. For purposes of the preceding sentence, an employee is not considered to be eligible to receive retirement benefits provided under the plan if he is still employed by the employer and a separation from employment is a condition to receiving the retirement benefits.

(2) Discrimination. A plan which provides medical benefits described in section 401(h) must not discriminate in favor of officers, shareholders, supervisory employees, or highly compensated employees with respect to coverage and with respect to the contributions or benefits under the plan. The determination of whether such a plan so discriminates is made with reference to the retirement portion of the plan as well as the portion providing the medical benefits described in section 401(h). Thus, for example, a plan will not be qualified under section 401 if it discriminates in favor of employees who are officers or shareholders with respect to either portion of the plan.

(3) Funding medical benefits. Contributions to provide the medical benefits described in section 401(h) may be made either on a contributory or noncontributory basis, without regard to whether the contributions to fund the retirement benefits are made on a similar basis. Thus, for example, the contributions to fund the medical benefits described in section 401(h) may be provided for entirely out of employer contributions even though the retirement benefits under the plan are determined on the basis of both employer and employee contributions.

(4) Definitions. For purposes of section 401(h) and this section:

(i) The term "dependent" shall have the same meaning as that assigned to it by section 152, and

(ii) The term "medical expense" means expenses for medical care as defined in section 213(e)(1).

(c) Requirements. The requirements which must be met for a qualified pension or annuity plan to provide medical benefits described in section 401(h) are set forth in subparagraphs (1) through (5) of this paragraph.

(1) Benefits. (i) The plan must specify the medical benefits described in section 401(h) which

will be available and must contain provisions for determining the amount which will be paid. Such benefits, when added to any life insurance protection provided for under the plan, must be subordinate to the retirement benefits provided by such plan. For purposes of this section, life insurance protection includes any benefit paid under the plan on behalf of an employee-participant as a result of the employee-participant's death to the extent such payment exceeds the amount of the reserve to provide the retirement benefits for the employee-participant existing at his death. The medical benefits described in section 401(h) are considered subordinate to the retirement benefits if at all times the aggregate of contributions (made after the date on which the plan first includes such medical benefits) to provide such medical benefits and any life insurance protection does not exceed 25 percent of the aggregate contributions (made after such date) other than contributions to fund past service credits.

(ii) The meaning of the term "subordinate" may be illustrated by the following example:

Example. The X Corporation amends its qualified pension plan to provide medical benefits described in section 401(h) effective for the taxable year 1964. The total contributions under the plan (excluding those for past service credits) for the taxable year 1964 are $125,000, allocated as follows: $100,000 for retirement benefits, $10,000 for life insurance protection, and $15,000 for medical benefits described in section 401(h). The medical benefits described in section 401(h) are considered subordinate to the retirement benefits since the portion of the contributions allocated to the medical benefits described in section 401(h) ($15,000) and to life insurance protection after such medical benefits were included in the plan ($10,000), or $25,000, does not exceed 25 percent of $125,000. For the taxable year 1965, the X Corporation contributes $140,000 (exclusive of contributions for past service credits) allocated as follows: $100,000 for retirement benefits, $10,000 for life insurance protection, and $30,000 for medical benefits described in section 401(h). The medical benefits described in section 401(h) are considered subordinate to the retirement benefits since the aggregate contributions allocated to the medical benefits described in section 401(h) ($45,000) and to life insurance protection after such medical benefits were included in the plan ($20,000) or $65,000 does not exceed 25 percent of $265,000, the aggregate of the contributions made in 1964 and 1965.

(2) **Separate accounts.** Where medical benefits described in section 401(h) are provided for under a qualified pension or annuity plan, a separate account must be maintained with respect to contributions to fund such benefits. The separation required by this section is for recordkeeping purposes only. Consequently, the funds in the medical benefits account need not be separately invested. They may be invested with funds set aside for retirement purposes without identification of which investment properties are allocable to each account. However, where the investment properties are not allocated to each account, the earnings on such properties must be allocated to each account in a reasonable manner.

(3) **Reasonable and ascertainable.** Section 401(h) further requires that amounts contributed to fund medical benefits therein described must be reasonable and ascertainable. For the rules relating to the deduction of such contributions, see paragraph (f) of § 1.404(a)–3. The employer must, at the time he makes a contribution, designate that portion of such contribution allocable to the funding of medical benefits.

(4) **Impossibility of diversion prior to satisfaction of all liabilities.** Section 401(h) further requires that it must be impossible, at any time prior to the satisfaction of all liabilities under the plan to provide for the payment of medical benefits described in section 401(h), for any part of the corpus or income of the medical benefits account to be (within the taxable year or thereafter) used for, or diverted to, any purpose other than the providing of such benefits. Consequently, a plan which, for example, under its terms, permits funds in the medical benefits account to be used for any retirement benefit provided under the plan does not satisfy the requirements of section 401(h) and will not qualify under section 401(a). However, the payment of any necessary or appropriate expenses attributable to the administration of the medical benefits account does not affect the qualification of the plan.

(5) **Reversion upon satisfaction of all liabilities.** The plan must provide that any amounts which are contributed to fund medical benefits described in section 401(h) and which remain in the medical benefits account upon the satisfaction of all liabilities arising out of the operation of the medical benefits portion of the plan are to be returned to the employer.

(6) **Forfeitures.** The plan must expressly provide that in the event an individual's interest in the medical benefits account is forfeited prior to termination of the plan an amount equal to the amount of the forfeiture must be applied as soon as possible to reduce employer contributions to fund the medical benefits described in section 401(h).

(d) **Effective date.** This section applies to taxable years of a qualified pension or annuity plan beginning after October 23, 1962.

[T.D. 6722, 29 FR 5072, April 14, 1964]

§ 1.401(a)–1 Post-ERISA qualified plans and qualified trusts; in general.

(a) Introduction—(1) In general. This section and the following regulation sections under section 401 reflect the provisions of section 401 after amendment by the Employee Retirement Income Security Act of 1974 (Pub.L. 93–406) ("ERISA").

(b) Requirements for pension plans—(1) Definitely determinable benefits. (i) In order for a pension plan to be a qualified plan under section 401(a), the plan must be established and maintained by an employer primarily to provide systematically for the payment of definitely determinable benefits to its employees over a period of years, usually for life, after retirement.

(ii) Section 1.401–1(b)(1)(i), a pre-ERISA regulation, provides rules applicable to this requirement, and that regulation is applicable except as otherwise provided.

(iii) The use of the type of plan provision described in § 1.415–1(d)(1) which automatically freezes or reduces the rate of benefit accrual or the annual addition to insure that the limitations of section 415 will not be exceeded, will not be considered to violate the requirements of this subparagraph provided that the operation of such provision precludes discretion by the employer.

[T.D. 7748, 46 FR 1695, Jan. 7, 1981]

§ 1.401(a)–2 Impossibility of diversion under qualified plan or trust.

(a) General rule. Section 401(a)(2) requires that in order for a trust to be qualified, it must be impossible under the trust instrument (in the taxable year and at any time thereafter before the satisfaction of all liabilities to employees or their beneficiaries covered by the trust) for any part of the trust corpus or income to be used for, or diverted to, purposes other than for the exclusive benefit of those employees or their beneficiaries. Section 1.401–2, a pre-ERISA regulation, provides rules under section 401(a)(2) and that regulation is applicable except as otherwise provided.

(b) Section 415 suspense account. Paragraph (a) of this section does not apply to amounts properly allocated to a suspense account pursuant to § 1.415–6(b)(6). The plan, or the trust forming part of the plan, may provide for the reversion to the employer, upon termination of the plan, of amounts held in the suspense account.

[T.D. 7748, 46 FR 1696, Jan. 7, 1981]

§ 1.401(a)–4 Optional forms of benefit.

Q-1: How does section 401(a)(4) apply to optional forms of benefits?

A-1: (a) In general.—(1) Scope. The nondiscrimination requirements of section 401(a)(4) apply to the amount of contributions or benefits, optional forms of benefit, and other benefits, rights and features (e.g., actuarial assumptions, methods of benefit calculation, loans, social security supplements, and disability benefits) under a plan. This section addresses the application of section 401(a)(4) only to optional forms of benefit under a plan. Generally, the determination of whether an optional form is nondiscriminatory under section 401(a)(4) is made by reference to the availability of such optional form, and not by reference to the utilization or actual receipt of such optional form. See Q&A-2 of this section. Even though an optional form of benefit under a plan may be nondiscriminatory under section 401(a)(4) and this § 1.401(a)-4 because the availability of such optional form does not impermissibly favor employees in the highly compensated group, such plan may fail to satisfy section 401(a)(4) with respect to the amount of contributions or benefits or with respect to other benefits, rights and features if, for example, the method of calculation or the amount or value of benefits payable under such optional form impermissibly favors the highly compensated group. See § 1.411(d)-4, Q&A-1 for the definition of "optional form of benefit."

(2) Nondiscrimination requirements. Each optional form of benefit provided under a plan is subject to the nondiscrimination requirement of section 401(a)(4) and thus the availability of each optional form of benefit must not discriminate in favor of the employees described in section 401(a)(4) in whose favor discrimination is prohibited (the "highly compensated group"). See paragraph (b) of this Q&A-1 for a description of the employees included in such group. This is true without regard to whether a particular optional form of benefit is the actuarial equivalent of any other optional form of benefit under the plan. Thus, for example, a plan may not condition, or otherwise limit, the availability of a single sum distribution of an employee's benefit in a manner that impermissibly favors the highly compensated group.

(b) Highly compensated group. For plan years commencing prior to the applicable effective date for the amendment made to section 401(a)(4) by section 1114 of the Tax Reform Act of 1986 (TRA '86), the highly compensated group consists of those employees who are officers, shareholders,

or highly compensated. For plan years beginning on or after the applicable effective date of the amendments to section 401(a)(4) made by TRA '86, the highly compensated group consists of those employees who are highly compensated within the meaning of section 414(q). The amendment to section 401(a)(4) made by section 1114 of TRA '86 is generally effective for plan years commencing after December 31, 1988. See section 1114(a) of TRA '86.

Q-2: How is it determined whether an optional form of benefit satisfies the nondiscrimination requirements of section 401(a)(4)?

A-2: (a) Nondiscrimination requirement.—(1) In general. An optional form of benefit under a plan is nondiscriminatory under section 401(a)(4) only if the requirements of paragraphs (a)(2) and (a)(3) of this Q&A-2 are satisfied with respect to such optional form. The determination of whether an optional form of benefit satisfies these requirements is made by reference to the availability of the optional form, and not by reference to the utilization or actual receipt of such optional form. Thus, an optional form of benefit that satisfies the requirements of paragraphs (a)(2) and (a)(3) of this Q&A-2 is nondiscriminatory under section 401(a)(2) even though the highly compensated group disproportionately utilizes such optional form. However, the composition of the group of employees who actually receive benefits in an optional form may be relevant in determining whether such optional form satisfies the requirement of paragraph (a)(3) of this Q&A-2 with respect to effective availability.

(2) Current availability—(i) Plan years prior to TRA '86 effective date. Except as provided in paragraph (a)(2)(iii) of this Q&A-2, for plan years prior to the effective date of the amendments made to section 401(b) by section 1112(a) of TRA '86, the requirement of this paragraph (a)(2) is satisfied only if the group of employees to whom the optional form is currently available satisfies either the seventy percent test of section 410(b)(1)(A) or the nondiscriminatory classification test of section 410(b)(1)(B).

(ii) Plan years commencing on or after TRA '86 effective date—(A) In general. Except as provided in paragraph (a)(2)(iii) of this Q&A-2, for plan years commencing on or after the effective date for the amendments made to section 410(b) by section 1112(a) of TRA '86, the requirement of this paragraph (a)(2) is satisfied only if the group of employees to whom the optional form is currently available satisfies either the percentage test set forth in section 410(b)(1)(A), the ratio test set forth in section 410(b)(1)(B), or the nondiscriminatory classification test set forth in section 410(b)(2)(A)(i) (and, in such case, the average benefit percentage test in section 410(b)(2)(A)(ii) is satisfied with respect to the employer).

(B) **Example.** In 1990, employer X maintains a defined benefit plan and a profit-sharing plan that is a qualified cash or deferred arrangement under section 401(k). Both plans satisfy the percentage test in section 410(b)(1)(A) with respect to coverage. The defined benefit plan provides for a single sum distribution available only to employees in the headquarters office. This group of employees fails the percentage and ratio tests of section 410(b), but satisfies the nondiscriminatory classification test set forth in section 410(b)(2)(A)(i). However, the employer does not satisfy the average benefit percentage test in section 401(b)(2)(A)(ii). Therefore, the current availability of the optional form of benefit does not satisfy the requirement of this paragraph (a)(2).

(iii) Special rule for certain governmental or church plans. Plans described in section 410(c) will be treated as satisfying the current availability test of this paragraph (a)(2) if the group of employees with respect to whom the optional form is currently available satisfies the requirements of section 401(a)(3) as in effect on September 1, 1974.

(iv) Effective data for TRA '86 amendments to section 410(b). The amendments to section 410(b) made by section 1112(a) of TRA '86 are generally effective for plan years commencing after December 31, 1988. See section 1112(e)(1) of TRA '86.

(v) Elimination of optional forms—(A) In general. Notwithstanding paragraphs (a)(2)(i) and (a)(2)(ii) of this Q&A-2, in the case of an optional form of benefit that has been eliminated under a plan with respect to specified employees for benefits accrued after the later of the eliminating amendment's adoption date or effective date, the determination of whether such optional form satisfies this paragraph (a)(2) with respect to such employees is to be made immediately prior to the elimination. Accordingly, if, as of the later of the adoption date or effective date of an amendment eliminating an optional form with respect to future benefit accruals, the current availability of such optional form immediately prior to such amendment satisfies this paragraph (a)(2), then the optional form will be treated as satisfying this paragraph (a)(2) for all subsequent years.

(B) **Example.** A profit-sharing plan that provides for a single sum distribution available to all employees on termination of employment is amended January 1, 1990, to eliminate such single sum optional form of benefit with respect to benefits accrued after January 1, 1991. As of January 1, 1991, the single sum optional form of benefit is available to a group of employees that satisfies the percentage test of section 410(b)(1)(A). As of January 1, 1995, all nonhighly compensated employees who were entitled to the single sum optional form of benefit have terminated from employment with the employer and taken a distribution of their benefits. The only remaining

employees who have a right to take a portion of their benefits in the form of a single sum distribution on termination of employment are highly compensated employees. Because the availability of the single sum optional form of benefit satisfied the current availability test as of January 1, 1991, the availability of such optional form of benefit is deemed to continue to satisfy the current availability test of this paragraph (a)(2).

(3) Effective availability—(i) In general. The requirement of this paragraph (a)(3) is satisfied only if, based on the facts and circumstances, the group of employees to whom the optional form is effectively available does not substantially favor the highly compensated group. This is the case even if the optional form is, or has been, currently available to a group of employees that satisfies the applicable requirements in paragraph (a)(2) (i) or (ii) of this Q&A-2.

(ii) Examples. The provisions of paragraph (a)(3)(i) of this Q&A-2 can be illustrated by the following examples:

Example 1. Employer X maintains a defined benefit plan that covers both of the 2 highly compensated employees of the employer and 8 of the twelve nonhighly compensated employees of the employer. Plan X provides for a normal retirement benefit payable as an annuity and based on a normal retirement age of 65, and an early retirement benefit payable upon termination in the form of an annuity to employees who terminate from service with the employer on or after age 55 with 30 or more years of service. Each of the 2 employees of employer X who are in the highly compensated group currently meet the age and service requirement, or will have 30 years of service by the time they reach age 55. All but 2 of the 8 nonhighly compensated employees of employer X who are covered by the plan were hired on or after age 35 and thus, cannot qualify for the early retirement benefit provision. Even though the group of employees to whom the early retirement benefit is currently available does not impermissibly favor the highly compensated group by reason of disregarding age and service, these facts and circumstances indicate that the effective availability of the early retirement benefit in plan X substantially favors the highly compensated group.

Example 2. Assume the same facts as in Example 1 except that the early retirement benefit is added by a plan amendment first adopted, announced and effective December 1, 1991, and is available only to employees who terminate from employment with the employer prior to December 15, 1991. Further assume that all employees were hired prior to attaining age 25, and that the group of employees who have, or will have attained age 55 with 30 years of service, by December 15, 1991, satisfies the ratio test of section 410(b)(1)(B). Finally, assume that the only employees who terminate from employment with the employer during the two week period in which the early retirement benefit is available are employees in the highly compensated group. These facts and circumstances indicate that the effective availability of the early retirement benefit substantially favors the highly compensated group. This is the case even though the limitation of the early retirement benefit to a specified period satisfies section 411(d)(6).

Example 3. Employer Y amends plan Y on June 30, 1990, to provide for a single sum distribution for employees who terminate from employment with the employer after June 30, 1990, and prior to January 1, 1991. The availability of this single sum distribution is conditioned on the employee having a particular disability at the time of termination of employment. The only employee of the employer who meets this disability requirement at the time of the amendment and thereafter through December 31, 1990, is a highly compensated employee. Generally, a disability condition with respect to the availability of a single sum distribution may be disregarded in determining whether the current availability of such optional form of benefit is discriminatory. However, these facts and circumstances indicate that the effective availability of the optional form of benefit substantially favors the highly compensated group.

Example 4. Employer Z maintains a money purchase pension plan that covers all employees of the employer. The plan provides for distribution in the form of a joint and survivor annuity, a life annuity, or equal installments over 10 years. During the 1992 calendar year the employer winds up his business. In December of 1992, only two employees remain in the employment of the employer, both of whom are highly compensated. Employer Z then amends the plan to provide for a single sum distribution to employees who terminate from employment on or after the date of the amendment. Both highly compensated employees terminate from employment on December 31, 1992, taking a single sum distribution of their benefits. These facts and circumstances indicate that the effective availability of the single sum optional form of benefit substantially favors the highly compensated group.

(b) Application of tests—(1) Current availability—(i) In general. Except as otherwise provided in this paragraph (b), in determining whether an optional form of benefit that is subject to specified eligibility conditions is currently available to an employee for purposes of paragraph (a) of this Q&A-2, the determination of current availability generally is to be based on the current facts and circumstances with respect to the employee (e.g., the employee's current compensation or the employee's current net worth). Thus, for example, the fact that an employee may, in the future, satisfy an eligibility condition generally does not cause an optional form of benefit to be treated as currently available to such employee.

(ii) Exceptions for age, service, employment termination and certain other conditions—(A) Age and service conditions. For purposes of applying paragraph (a)(2) of this Q&A-2, except as provided in paragraph (b)(1)(ii)(B) of this Q&A-2, an age condition, a service condition, or both are to be disregarded. For example, an employer that maintains a plan that provides for an early retirement benefit payable as an annuity for employees in division A, subject to a requirement that the employee has attained his or her 55th birthday and has at least twenty years of service with the employer, is to disregard the age and service conditions in determining the group of employees to whom the early retirement annuity benefit is currently available. Thus, the early retirement annuity benefit is treated as currently available to all employees of division A, without regard to their ages or years of service and without regard to whether they could potentially meet the age and

service conditions prior to attaining the plan's normal retirement age.

(B) Exception for certain age and service conditions. Age and service conditions that must be satisfied within a specified period of time may not be disregarded pursuant to paragraph (b)(1)(ii)(A) of this Q&A-2. However, in determining the current availability of an optional form of benefit subject to such an age condition, service condition, or both, an employer may project the age and service of employees to the last date on which the optional form of benefit subject to the age condition or service condition (or both) is available under the plan. An employer's ability to protect age and service to the last date on which the optional form of benefit is available under the plan is not cut off by a plan termination occurring prior to that date. Thus, for example, assume that an employer maintaining a plan that permits employees terminating from employment on or after age 55 between June 1, 1991 to May 31, 1992, to elect a single sum distribution, decides to terminate the plan on December 31, 1991. In determining the group of employees to whom the single sum optional form of benefit is currently available, this employer may project employees' ages through May 31, 1992.

(C) Certain other conditions disregarded. Conditions on the availability of optional forms of benefit requiring termination of employment, death, satisfaction of a specified health condition (or failure to meet such condition), disability, hardship, marital status, default on a plan loan secured by a participant's account balance, or execution of a covenant not to compete may be disregarded in determining the group of employees to whom an optional form of benefit is currently available.

(2) Employees taken into account. For purposes of applying paragraph (a) of this Q&A-2, the tests are to be applied on the basis of the employer's nonexcludable employees (whether or not they are participants in the plan) in the same manner as such tests would be applied in determining whether the plan providing the optional form of benefit satisfies the tests under section 410(b).

(3) Definition of "plan". For purposes of applying paragraph (a) of this Q&A-2, the term "plan" has the meaning that such term has for purposes of determining whether the amount of contributions or benefits and whether other benefits, rights, and features are nondiscriminatory under section 401(a)(4).

(4) Restructuring optional forms of benefit—(i) In general. For purposes of applying paragraph (a) of this Q&A-2, the availability of two or more optional forms of benefit under a plan may be tested by restructuring such benefits into two or more restructured optional forms of benefit and testing the availability of such restructured optional forms of benefit. If two or more optional forms of benefit under a plan contain both common and distinct components, such optional forms of benefit may be restructured as a single optional form of benefit comprising the common component, and one or more optional forms of benefit comprising each distinct component. Components of optional forms of benefit may be treated as common only if they are identical with respect to all characteristics taken into account under Q&A-1(b) of § 1.411(d)-4. The availability of each restructured optional form of benefit must satisfy the applicable nondiscrimination requirements of paragraph (a) of this Q&A-2.

(ii) **Example.** A profit-sharing plan covering all the employees of an employer provides a single sum distribution option upon termination from employment for all employees earning less than $50,000 and a single sum distribution option upon termination from employment after the attainment of age 55 for all employees earning $50,000 or more. These distribution options are identical in all other respects. For purposes of applying section 401(a)(4), such optional forms of benefit may be restructured into two different optional forms of benefit: (A) a single sum distribution option upon termination from employment after the attainment of age 55 for all employees (i.e., the common component), and (B) a single sum distribution option upon termination from employment before the attainment of age 55 for all employees earning less than $50,000. The availability of each of these restructured optional forms of benefit must satisfy section 401(a)(4).

(c) Commissioner may provide additional tests. The Commissioner may provide such additional factors, tests, and safe harbors as are necessary or appropriate for purposes of determining whether the availability of an optional form of benefit is discriminatory under section 401(a)(4). In addition, the Commissioner may provide that additional eligibility conditions not related directly or indirectly to compensation or wealth may be disregarded under paragraph (b)(1)(ii)(C) of this Q&A-2 in determining the current availability of an optional form of benefit. The Commissioner may provide such additional guidance only through the publication of revenue rulings, notices or other documents of general applicability.

Q-3: May a plan condition the availability of an optional form of benefit on employer discretion?

A-3: No. Even if the availability of an optional form of benefit that is conditioned on employer discretion satisfies the nondiscrimination requirements of section 401(a)(4), the plan providing the optional form of benefit will fail to satisfy certain other requirements of section 401(a), including, in applicable circumstances, the definitely determin-

able requirement of section 401(a) and the requirements of section 401(a)(25) and section 411(d)(6). See § 1.411(d)-4.

Q-4: Will a plan provision violate section 401(a)(4) merely because it requires that an employee who terminates from service with the employer receive a single sum distribution in the event that the present value of the employee's benefit is not more than $3,500, as permitted by sections 411(a)(11) and 417(e)?

A-4: No. A plan will not be treated as discriminatory under section 401(a)(4) merely because the plan mandates a single sum distribution when the present value of an employee's benefit is not more than $3,500, as permitted by sections 411(a)(11) and 417(e). This is an exception to the general principles of this section. (No similar provision exists excepting such single sum distributions from the limits on employer discretion under section 411(d)(6). See § 1.411(d)-4 Q&A-4.)

Q-5: If the availability of an optional form of benefit discriminates, or may reasonably be expected to discriminate, in favor of the highly compensated group, what acceptable alternatives exist for amending the plan without violating section 411(d)(6)?

A-5: (a) Transitional rules—(1) In general. The following rules apply for purposes of making necessary amendments to existing plans (as defined in Q&A-6 of this section) under which the availability of an optional form of benefit violates the nondiscrimination requirements of section 401(a)(4) or may reasonably be expected to violate such requirements. These transitional rules are provided under the authority of section 411(d)(6), which allows the elimination of certain optional forms of benefit if permitted by regulations, and section 7805(b).

(2) Nondiscrimination—(i) In general. The determination of whether the availability of an optional form of benefit violates section 401(a)(4) is to be made in accordance with Q&A-2 of this section. In addition, the availability of a particular optional form of benefit may reasonably be expected to violate the nondiscrimination requirements of section 401(a)(4) if, under the applicable facts and circumstances, there is a significant possibility that the current availability of such optional form of benefit will impermissibly favor the highly compensated group. This determination must be made on the basis of the seventy percent test of section 410(b)(1)(A) or the nondiscriminatory classification test of section 410(b)(1)(B) as such tests existed prior to the effective date of the amendments made to section 410(b) by section 1112(a) of TRA '86. Thus, a condition may not reasonably be expected to discriminate for purposes of these rules merely because it results in a significant possibility that discrimination will result because of the amendments made to section 410(b) by section 1112(a) of TRA '86. In addition, the availability of an optional form of benefit may not reasonably be expected to discriminate merely because of an age or service condition that may be disregarded in determining the current availability of such optional form of benefit under paragraph (b)(1)(ii)(A) of Q&A-2 of this section. Similarly, the availability of an optional form of benefit may not reasonably be expected to discriminate merely because of an age or service condition that, after permitted projection, does not cause such optional form to fail to satisfy the requirement of this paragraph (a)(2).

(ii) Examples. The provisions of paragraph (a)(2)(i) of this Q&A-5 can be illustrated by the following examples:

Example (1). A plan provides that a single sum distribution option is available only to (A) employees earning $50.000 or more in the final year of employment, (B) employees who furnish evidence that they have a net worth above a certain specified amount, and (C) employees who present a letter from an accountant or attorney declaring that it is in the employee's best interest to receive a single sum distribution. Whether the availability of such optional form of benefit discriminates depends on whether it meets the requirements of Q&A-2 of this § 1.401(a)-4. However, each of the specified conditions limiting the availability of the optional form of benefit may reasonably be expected to discriminate in favor of the highly compensated group in operation because of the likelihood of a significant positive correlation between the ability to meet any of the specified conditions and membership in the highly compensated group.

Example (2). A plan limits the availability of a single sum distribution option to employees employed in one particular division of the employer's company. All the employees of the company are participants in the plan. During the 1988 plan year, the division employs individuals who represent a nondiscriminatory classification of that company's employees (under section 410(b)(1)(B) prior to the effective date of the amendments made to section 410(b) by section 1112(a) of TRA '86) and is unlikely to cease employing such a nondiscriminatory classification in the future. The availability of a single sum distribution under this plan does not result in discrimination during the 1988 plan year and may not reasonably be expected to do so.

(b) Transitional alternatives. If the availability of an optional form of benefit under an existing plan is discriminatory under section 401(a)(4), the plan must be amended either to eliminate the optional form of benefit or to make the availability of the optional form of benefit nondiscriminatory. For example, the availability of an optional form of benefit may be made nondiscriminatory by making such benefit available to sufficient additional employees who are not in the highly compensated

group or by imposing nondiscriminatory objective criteria on its availability such that the group of employees to whom the benefit is available is nondiscriminatory. See Q&A-6 of § 1.411(d)-4 for requirements with respect to such objective criteria. If, under an existing plan, the availability of an optional form of benefit may reasonably be expected to discriminate, the plan may be amended in the same manner permitted where the availability of an optional form of benefit is discriminatory. See paragraph (d) of this Q&A-5 for rules limiting the period during which the availability of optional forms of benefit may be eliminated or reduced under this paragraph.

(c) Compliance and amendment date provisions—(1) Operational compliance requirement. On or before the applicable effective date for the plan (see Q&A-6 of this section), the plan sponsor must select one of the alternatives permitted under paragraph (b) of this Q&A-5 with respect to each affected optional form of benefit and the plan must be operated in accordance with this selection. This is an operational requirement and does not require a plan amendment prior to the period set forth in paragraph (c)(2) of this Q&A-5. There is no special reporting requirement under the Code or this section with respect to this selection.

(2) Deferred amendment date. If paragraph (c)(1) of this Q&A-5 is satisfied, a plan amendment conforming the plan to the particular alternative selected under paragraph (b) of this Q&A-5 must be adopted within the time period permitted for amending plans in order to meet the requirements of section 410(b) as amended by TRA '86. Such conforming amendment must be consistent with the sponsor's selection as reflected by plan practice during the period from the effective date to the date the amendment is adopted. Thus, for example, if an existing calendar year noncollectively bargained defined benefit plan has a single sum distribution form subject to a discriminatory condition, that was available as of January 30, 1986 (subject to such condition), and such employer makes one or more single sum distributions available on or after the first day of the first plan year commencing on or after January 1, 1989, and before the plan amendment, then such employer may not adopt a plan amendment eliminating the single sum distribution form. Instead, such employer must adopt an amendment making the distribution form available to a nondiscriminatory group of employees while retaining the availability of such distribution form with respect to the group of employees to whom the benefit is already available. Similarly, any objective criteria that are adopted as part of such amendment must be consistent with the plan practice for the applicable period prior to the amendment. A conforming amendment under this paragraph (c)(2) must be made with respect to each optional form of benefit for which such amendment is required and must be retroactive to the applicable effective date.

(d) Limitation on transitional alternatives. The transitional alternatives permitting the elimination or reduction of optional forms of benefit will not violate section 411(d)(6) during the period prior to the applicable effective date for the plan (see Q&A-6 of this section). After the applicable effective date, any amendment (other than one described in paragraph (c)(2) of this Q&A-5) that eliminates or reduces an optional form of benefit or imposes new objective criteria restricting the availability of such optional form of benefit will fail to qualify for the exception to section 411(d)(6) provided in this Q&A-5. This is the case without regard to whether the availability of the optional form of benefit is discriminatory or may reasonably be expected to be discriminatory.

Q-6: What are the effective dates for the rules in this section?

A-6: (a) General effective date. Except as otherwise provided in this section, the provisions of this section are effective January 30, 1986.

(b) New plans—(1) In general. Unless otherwise provided in paragraph (b)(2) of this Q&A-6, plans that are either adopted or made effective on or after January 30, 1986, are "new plans". With respect to such new plans, this section is effective January 30, 1986. This effective date is applicable to such plans whether or not they are collectively bargained.

(2) Exception with respect to certain new plans. Plans that are new plans as defined in paragraph (b)(1) of this Q&A-6, under which the availability of an optional form of benefit is discriminatory or may reasonably be expected to be discriminatory, and that receive a favorable determination letter that covered such plan provisions with respect to an application submitted prior to July 11, 1988, will be treated as existing plans with respect to such optional form of benefit for purposes of the transitional rules of this section. Thus, such plans are eligible for the compliance and amendment alternatives set forth in the transitional rule in Q&A-5 of this section.

(c) Existing plans—(1) In general. Plans that are both adopted and in effect prior to January 30, 1986, are "existing plans". In addition, new plans described in paragraph (b)(2) of this Q&A-6 are treated as existing plans with respect to certain

forms of benefit. Subject to the limitations in paragraph (d) of this Q&A-6, the effective dates set forth in paragraphs (c)(2) and (c)(3) of this Q&A-6 apply to these existing plans for purposes of this section.

(2) Existing noncollectively bargained plans. With respect to existing noncollectively bargained plans, this section is effective for the first day of the first plan year commencing on or after January 1, 1989.

(3) Existing collectively bargained plans. With respect to existing collectively bargained plans, this section is effective for the later of the first day of the first plan year commencing on or after January 1, 1989, or the first day of the first plan year that the requirements of section 410(b) as amended by TRA '86 apply to such plan.

(d) Delayed effective dates not applicable to new optional forms of benefit or conditions—(1) In general. The delayed effective dates in paragraph (c) (2) and (3) of this Q&A-6 for existing plans are applicable with respect to an optional form of benefit only if both the optional form of benefit and any applicable condition either causing the availability of such optional form of benefit to be discriminatory or making it reasonable to expect that the availability of such optional form will be discriminatory were both adopted and in effect prior to January 30, 1986. If the preceding sentence is not satisfied with respect to an optional form of benefit, this section is effective with respect to such optional form of benefit as if the plan were a new plan.

(2) Exception for certain amendments covered by a favorable determination letter. If a condition causing the availability of an optional form of benefit to be discriminatory, or to be reasonably expected to discriminate, was adopted or made effective on or after January 30, 1986, and a favorable determination letter that covered such plan provision is or was received with respect to an application submitted before July 11, 1988, the effective date of this section with respect to such provision is the applicable effective date determined under the rules with respect to existing plans, as though such provision had been adopted and in effect prior to January 30, 1986.

(e) Transitional rule effective date. The transitional rule provided in Q&A-5 of this section is effective January 30, 1986.

[T.D. 8212, 53 FR 26054, July 11, 1988]

§ 1.401(a)-11 Qualified joint and survivor annuities.

(a) General rule—(1) Required provisions. A trust, to which section 411 (relating to minimum vesting standards) applies without regard to section 411(e)(2), which is a part of a plan providing for the payment of benefits in any form of a life annuity (as defined in paragraph (b)(1) of this section), shall not constitute a qualified trust under section 401(a)(11) and this section unless such plan provides that:

(i) Unless the election provided in paragraph (c)(1) of this section has been made, life annuity benefits will be paid in a form having the effect of a qualified joint and survivor annuity (as defined in paragraph (b)(2) of this section) with respect to any participant who—

(A) Begins to receive payments under such plan on or after the date the normal retirement age is attained, or

(B) Dies (on or after the date the normal retirement age is attained) while in active service of the employer maintaining the plan, or

(C) In the case of a plan which provides for the payment of benefits before the normal retirement age, begins to receive payments under such plan on or after the date the qualified early retirement age (as defined in paragraph (b)(4) of this section) is attained, or

(D) Separates from service on or after the date the normal retirement age (or the qualified early retirement age) is attained and after satisfaction of eligibility requirements for the payment of benefits under the plan (except for any plan requirement that there be filed a claim for benefits) and thereafter dies before beginning to receive such benefits;

(ii) Any participant may elect, as provided in paragraph (c)(1) of this section, not to receive life annuity benefits in the form of a qualified joint and survivor annuity; and

(iii) If the plan provides for the payment of benefits before the normal retirement age, any participant may elect, as provided in paragraph (c)(2) of this section, that life annuity benefits be payable as an early survivor annuity (as defined in paragraph (b)(3) of this section) upon his death in the event that he—

(A) Attains the qualified early retirement age (as defined in paragraph (b)(4) of this section), and

(B) Dies on or before the day normal retirement age is attained while employed by an employer maintaining the plan.

(2) **Certain cash-outs.** A plan will not fail to satisfy the requirements of section 401(a)(11) and this section merely because it provides that if the present value of the entire nonforfeitable benefit derived from employer contributions of a participant at the time of his separation from service does not exceed $1,750 (or such smaller amount as the plan may specify), such benefit will be paid to him in a lump sum.

(3) **Illustrations.** The provisions of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). The X Corporation Defined Contribution Plan was established in 1960. As in effect on January 1, 1974, the plan provided that, upon the participant's retirement, the participant may elect to receive the balance of his account in the form of (1) a single-sum cash payment, (2) a single-sum distribution consisting of X Corporation stock, (3) five equal annual cash payments, (4) a life annuity, or (5) a combination of options (1) through (4). The plan also provided that, if a participant did not elect another form of distribution, the balance of his account would be distributed to him in the form of a single-sum cash payment upon his retirement. Assume that section 401(a)(11) and this section became applicable to the plan as of its plan year beginning January 1, 1976, with respect to persons who were active participants in the plan as of such date (see paragraph (f) of this section). If X Corporation Defined Contribution Plan continues to allow the life annuity payment option after December 31, 1975, it must be amended to provide that if a participant elects a life annuity option the life annuity benefit will be paid in a form having the effect of a qualified joint and survivor annuity, except to the extent that the participant elects another form of benefit payment. However, the plan can continue to provide that, if no election is made, the balance will be paid as a single-sum cash payment. If the trust is not so amended, it will fail to qualify under section 401(a).

Example (2). The Corporation Retirement Plan provides that plan benefits are payable only in the form of a life annuity and also provides that a participant may retire before the normal retirement age of 65 and receive a benefit if he has completed 30 years of service. Under this plan, an employee who begins employment at the age of 18 will be eligible to receive retirement benefits at the age of 48 if he then has 30 years of service. This plan must allow a participant to elect in the time and manner prescribed in paragraph (c)(2) of this section an early survivor annuity (defined in paragraph (b)(3) of this section) to be payable on the death of the participant if death occurs while the participant is in active service for the employer maintaining the plan and on or after the date the participant reaches the qualified early retirement age of 55 (the later of the date the participant reaches the earliest retirement age (age 48) or 10 years before normal retirement age (age 55)) but before the day after the day the participant reaches normal retirement age (age 65).

Example (3). Assume the same facts as in Example (2). A, B, and C began employment with Y Corporation when they each attained age 18. A retires and begins to receive benefit payments at age 48 after completing 30 years of service. The plan is not required to pay a qualified joint and survivor annuity to A and his spouse at any time. B does not elect an early survivor annuity at age 55, but retires at age 57 after completing 39 years of service. Unless B makes an election under subparagraph (1)(ii) of this paragraph, the plan is required to pay a qualified joint and survivor annuity to B and his spouse. C makes no elections described in subparagraph (1) of this paragraph, and dies while in active service at age 66 after completing 48 years of service. The plan is required to pay a qualified survivor annuity to C's spouse.

(b) **Definitions.** As used in this section—(1) **Life annuity.** (i) The term "life annuity" means an annuity that provides retirement payments and requires the survival of the participant or his spouse as one of the conditions for any payment or possible payment under the annuity. For example, annuities that make payments for 10 years or until death, whichever occurs first or whichever occurs last, are life annuities.

(ii) However, the term "life annuity" does not include an annuity, or that portion of an annuity, that provides those benefits which, under section 411(a)(9), would not be taken into account in the determination of the normal retirement benefit or early retirement benefit. For example, "social security supplements" described in the fourth sentence of section 411(a)(9) are not considered to be life annuities for the purposes of this section, whether or not an early retirement benefit is provided under the plan.

(2) **Qualified joint and survivor annuity.** The term "qualified joint and survivor annuity" means an annuity for the life of the participant with a survivor annuity for the life of his spouse which is neither (i) less than one-half of, nor (ii) greater than, the amount of the annuity payable during the joint lives of the participant and his spouse. For purposes of the preceding sentence, amounts described in § 1.401(a)-11(b)(1)(ii) may be disregarded. A qualified joint and survivor annuity must be at least the actuarial equivalent of the normal form of life annuity or, if greater, of any optional form of life annuity offered under the plan. Equivalence may be determined, on the basis of consistently applied reasonable actuarial factors, for each participant or for all participants or reasonable groupings of participants, if such determination does not result in discrimination in favor of employees who are officers, shareholders, or highly compensated. An annuity is not a qualified joint and survivor annuity if payments to the spouse of a deceased participant are terminated, or reduced, because of such spouse's remarriage.

(3) **Early survivor annuity.** The term "early survivor annuity" means an annuity for the life of the participant's spouse the payments under which must not be less than the payments which would have been made to the spouse under the joint and survivor annuity if the participant had made the election described in paragraph (c)(2) of this sec-

tion immediately prior to his retirement and if his retirement had occurred on the day before his death and within the period during which an election can be made under such paragraph (c)(2). For example, if a participant would be entitled to a single life annuity of $100 per month or a reduced amount under a qualified joint and survivor annuity of $80 per month, his spouse is entitled to a payment of at least $40 per month. However, the payments may be reduced to reflect the number of months of coverage under the survivor annuity pursuant to paragraph (e) of this section.

(4) **Qualified early retirement age.** The term "qualified early retirement age" means the latest of—

(i) The earliest date, under the plan, on which the participant could elect (without regard to any requirement that approval of early retirement be obtained) to receive retirement benefits (other than disability benefits).

(ii) The first day of the 120th month beginning before the participant reaches normal retirement age, or

(iii) The date on which the participant begins participation.

(5) **Normal retirement age.** The term "normal retirement age" has the meaning set forth in section 411(a)(8).

(6) **Annuity starting date.** The term "annuity starting date" means the first day of the first period with respect to which an amount is received as a life annuity, whether by reason of retirement or by reason of disability.

(7) **Day.** The term "day" means a calendar day.

(c) **Elections—(1) Election not to take joint and survivor annuity form—(i) In general.** (A) A plan shall not be treated as satisfying the requirements of this section unless it provides that each participant may elect, during the election period described in subdivision (ii) of this subparagraph, not to receive a qualified joint and survivor annuity. However, if a plan provides that a qualified joint and survivor annuity is the only form of benefit payable under the plan with respect to a married participant, no election need be provided.

(B) The election shall be in writing and clearly indicate that the participant is electing to receive all or, if permitted by the plan, part of his benefits under the plan in a form other than that of a qualified joint and survivor annuity. A plan will not fail to meet the requirements of this section merely because the plan requires the participant to obtain the written approval of his spouse in order for the participant to make this election or if the plan provides that such approval is not required.

(ii) **Election period.** (A) For purposes of the election described in paragraph (c)(1)(i) of this section, the plan shall provide an election period which shall include a period of at least 90 days following the furnishing of all of the applicable information required by subparagraph (3)(i) of this paragraph and ending prior to commencement of benefits. In no event may the election period end earlier than the 90th day before the commencement of benefits. Thus, for example, the commencement of benefits may be delayed until the end of such election period because the amount of payments to be made to a participant cannot be ascertained before the end of such period; see § 1.401(a)–14(d).

If a participant makes a request for additional information as provided in subparagraph (3)(iii) of this paragraph on or before the last day of the election period, the election period shall be extended to the extent necessary to include at least the 90 calendar days immediately following the day the requested additional information is personally delivered or mailed to the participant. Notwithstanding the immediately preceding sentence, a plan may provide in cases in which the participant has been furnished by mail or personal delivery all of the applicable information required by subparagraph (3)(i) of this paragraph, that a request for such additional information must be made on or before a date which is not less than 60 days from the date of such mailing or delivery; and if the plan does so provide, the election period shall be extended to the extent necessary to include at least the 60 calendar days following the day the requested additional information is personally delivered or mailed to the participant.

(B) In the case of a participant in a plan to which this subparagraph applies who separated from service after section 401(a)(11) and this section became applicable to such plan with respect to such participant, and to whom an election required by this subparagraph has not been previously made available (and will not become available in normal course), the plan must provide an election to receive the balance of his benefits (properly adjusted, if applicable, for payments received, prior to the exercise of such election, in the form of a qualified joint and survivor annuity) in a form other than that of a qualified joint and survivor annuity. The provisions of paragraph (c)(1)(ii)(A) shall apply except that in no event

shall the election period end before the 90th day after the date on which notice of the availability of such election and the applicable information required by subparagraph (3)(i) of this paragraph is given directly to the participant. If such notice and information is given by mail, it shall be treated as given on the date of mailing. If such participant has died, such election shall be made available to such participant's personal representative.

(2) **Election of early survivor annuity—(i) In general.** (A) A plan described in subparagraph (a)(1)(iii) of this section shall not be treated as satisfying the requirements of this section unless it provides that each participant may elect, during the period described in subdivision (ii) of this subparagraph, an early survivor annuity as described in paragraph (a)(1)(iii) of this section. Breaks in service after the participant has attained the qualified early retirement age neither invalidate a previous election or revocation nor prevent an election from being made or revoked during the election period.

(B) The election shall be in writing and clearly indicate that the participant is electing the early survivor annuity form.

(C) A plan is not required to provide an election under this subparagraph if—

(1) The plan provides that an early survivor annuity is the only form of benefit payable under the plan with respect to a married participant who dies while employed by an employer maintaining the plan,

(2) In the case of a defined contribution plan, the plan provides a survivor benefit at least equal in value to the vested portion of the participant's account balance, if the participant dies while in active service with an employer maintaining the plan, or

(3) In the case of a defined benefit plan, the plan provides a survivor benefit at least equal in value to the present value of the vested portion of the participant's normal form of the accrued benefit payable at normal retirement age (determined immediately prior to death), if the participant dies while in active service with an employer maintaining the plan. Any present values must be determined in accordance with either the actuarial assumptions or factors specified in the plan, or a variable standard independent of employer discretion for converting optional benefits specified in the plan.

(ii) **Election period.** (A) For purposes of the election described in paragraph (c)(2)(i) of this section the plan shall provide an election period which, except as provided in the following sentence, shall begin not later than the later of either the 90th day before a participant attains the qualified early retirement age or the date on which his participation begins, and shall end on the date the participant terminates his employment. If such a plan contains a provision that any election made under this subparagraph does not become effective or ceases to be effective if the participant dies within a certain period beginning on the date of such election, the election period prescribed in this subdivision (ii) shall begin not later than the later of (1) a date which is 90 days plus such certain period before the participant attains the qualified early retirement age or (2) the date on which his participation begins. For example, if a plan provides that an election made under this subparagraph does not become effective if the participant dies less than 2 years after the date of such election, the period for making an election under this subparagraph must begin not later than the later of (1) 2 years and 90 days before the participant attains the qualified early retirement age, or (2) the date on which his participation begins. However, the election period for an individual who was an active participant on the date this section became effective with regard to the plan need not begin earlier than such effective date.

(B) In the case of a participant in a plan to which this subparagraph applies who dies after section 401(a)(11) and this section became applicable to such plan with respect to such participant and to whom an election required by this subparagraph has not been previously made available, the plan must give the participant's surviving spouse or, if dead, such spouse's personal representative the option of electing an early survivor annuity. The plan may reduce the surviving spouse's annuity to take into account any benefits already received. The period for making such election shall not end before the 90th day after the date on which written notice of the availability of such election and applicable information required by subparagraph (3)(i) of this paragraph is given directly to such surviving spouse or personal representative. If such notice and information is given by mail, it shall be treated as given on the date of mailing.

(3) **Information to be provided by plan administrator.** (i) A plan which is required to provide either or both of the elections described in paragraph (c)(1) or (2) of this section must provide to the participants, at the time and in the manner

specified in subdivision (ii) of this subparagraph, the following information, as applicable to the plan, in written nontechnical language:

(A) In the case of the election described in paragraph (c)(1) of this section, a general description or explanation of the qualified joint and survivor annuity, the circumstances in which it will be provided unless the participant has elected not to have benefits provided in that form, and the availability of such election;

(B) In the case of the election described in paragraph (c)(2) of this section, a general description of the early survivor annuity, the circumstances under which it will be paid if elected, and the availability of such election; and

(C) A general explanation of the relative financial effect on a participant's annuity of either or both elections, as the case may be.

Various methods may be used to explain such relative financial effect. With regard to a qualified joint and survivor annuity, they include: information as to the benefits the participant would receive under the qualified joint and survivor annuity stated as an arithmetic or percentage reduction from a single life annuity; a table showing the difference between a straight life annuity and a qualified joint and survivor annuity in terms of a reduction in dollar amounts; a table showing a percentage reduction from the straight life annuity or, in the case of a profit-sharing plan, an approximate dollar amount reduction. The notice and explanation required by this subdivision (i) must also inform the participants of the availability of the additional information specified in subdivision (iii) of this subparagraph and how they may obtain such information.

(ii) The method or methods used to provide the information described in subdivision (i) of this subparagraph may vary. Posting which meets the requirements of § 1.7476-2(c)(1) may be used; see § 1.7476-2(c)(1) for examples of other methods which may be used. One or more methods may be used to provide the required information provided that all of the required information is provided by one method or a combination of methods by or within the time period specified in this subdivision (ii). If mail or personal delivery is used, then, whether or not the information has been previously provided, there must be a mailing or personal delivery of the information by such time as to reasonably assure that it will be received on or about: (1) in the case of a plan which does not provide for the payment of benefits before the normal retirement age, the date which is 9 months before the participant attains normal retirement age; (2) in the case of a plan which provides for the payment of benefits before the normal retirement age and which is required to provide the election described in paragraph (c)(2) of this section (whether or not it is also required to provide the election described in paragraph (c)(1) of this section), the date which is 90 days before the latest date prescribed by paragraph (c)(2)(ii)(A) for the beginning of the election period for the early survivor annuity; or (3) in the case of a plan which provides for the payment of benefits before the normal retirement age and which is required to provide only the election described in paragraph (c)(1) of this section, the date which is nine months before the participant attains the qualified early retirement age; except that in the case of a plan described in (2) or (3), if the qualified early retirement age is the date the participant begins participation in the plan, the information may be provided on or about such date. If a method other than mail or personal delivery is used to provide participants with some or all of such information, it must be a method which is reasonably calculated to reach the attention of a participant on or about the date prescribed in the immediately preceding sentence and to continue to reach the attention of such participant during the election period applicable to him for which the information is being provided (as, for example, by permanent posting, repeated publication, etc.).

(iii) The plan administrator must furnish to a particular participant, upon a timely written request, a written explanation in nontechnical language of the terms and conditions of the qualified joint and survivor annuity and the financial effect upon the particular participant's annuity of making any election under this paragraph. Such financial effect shall be given in terms of dollars per annuity payment; and in the case of a defined contribution plan, the projected annuity for a particular participant may be based on his account balance as of the most recent valuation date. The plan administrator need not comply with more than one such request made by a particular participant. This explanation must be personally delivered or mailed (first class mail, postage prepaid) to the participant within 30 days from the date of the participant's written request.

(4) **Election is revocable.** A plan to which this section applies must provide that any election made under this paragraph may be revoked in writing during the specified election period, and that after such election has been revoked, another

election under this paragraph may be made during the specified election period.

(5) Election by surviving spouse. A plan will not fail to meet the requirements of section 401(a)(11) and this section merely because it provides that the spouse of a deceased participant may elect to have benefits paid in a form other than a survivor annuity. If the plan provides that such a spouse may make such an election, the plan administrator must furnish to this spouse, within a reasonable amount of time after a written request has been made by this spouse, a written explanation in non-technical language of the survivor annuity and any other form of payment which may be selected. This explanation must state the financial effect (in terms of dollars) of each form of payment. A plan need not respond to more than one such request.

(d) Permissible additional plan provisions—(1) In general. A plan will not fail to meet the requirements of section 401(a)(11) and this section merely because it contains one or more of the provisions described in paragraphs (d)(2) through (5) of this section.

(2) Claim for benefits. A plan may provide that as a condition precedent to the payment of benefits, a participant must express in writing to the plan administrator the form in which he prefers benefits to be paid and provide all the information reasonably necessary for the payment of such benefits. However, if a participant files a claim for benefits with the plan administrator and provides the plan administrator with all the information necessary for the payment of benefits but does not indicate a preference as to the form for the payment of benefits, benefits must be paid in the form of a qualified joint and survivor annuity if the participant has attained the qualified early retirement age unless such participant has made an effective election not to receive benefits in such form. For rules relating to provisions in a plan to the effect that a claim for benefits must be filed before the payment of benefits will commence, see § 1.401(a)–14.

(3) Marriage requirements. A plan may provide that a joint and survivor annuity will be paid only if—

(i) The participant and his spouse have been married to each other throughout a period (not exceeding one year) ending on the annuity starting date.

(ii) The spouse of the participant is not entitled to receive a survivor annuity (whether or not the election described in paragraph (c)(2) of this section has been made) unless the participant and his spouse have been married to each other throughout a period (not exceeding one year) ending on the date of such participant's death.

(iii) The same spouse must satisfy the requirements of subdivisions (i) and (ii) of this subparagraph.

(iv) The participant must notify the plan administrator (as defined by section 414(g)) of his marital status within any reasonable time period specified in the plan.

(4) Effect of participant's death on an election or revocation of an election under paragraph (c). A plan may provide that any election described in paragraph (c) of this section or any revocation of any such election does not become effective or ceases to be effective if the participant dies within a period, not in excess of 2 years, beginning on the date of such election or revocation. However, a plan containing a provision described in the preceding sentence shall not satisfy the requirements of this section unless it also provides that any such election or any revocation of any such election will be given effect in any case in which—

(i) The participant dies from accidental causes,

(ii) A failure to give effect to the election or revocation would deprive the participant's survivor of a survivor annuity, and

(iii) Such election or revocation is made before such accident occurred.

(5) Benefit option approval by third party. (i) A plan may provide that an optional form of benefit elected by a participant is subject to the approval of an administrative committee or similar third party. However, the administrative committee cannot deny a participant any of the benefits required by section 401(a)(11). For example, if a plan offers a life annuity option, the committee may deny the participant a qualified joint and survivor annuity only by denying the participant access to all life annuity options without knowledge of whether the participant wishes to receive a qualified joint and survivor annuity. Alternatively, if the committee knows which form of life annuity the participant has chosen before the committee makes its decision, the committee cannot withhold its consent for payment of a qualified joint and survivor annuity event though it denies all other life annuity options. This subparagraph (5) only applies before the effective date of the amendment made to section 411(d)(6) by section 301 of the Retirement Equity Act of 1984. See

section 411(d)(6) and the regulations thereunder for rules limiting employer discretion.

(ii) The provisions of this subparagraph may be illustrated by the following example:

Example. In 1980 plan M provides that the automatic form of benefit is a single sum distribution. The plan also permits, subject to approval by the administrative committee, the election of several optional forms of life annuity. On the election form that is reviewed by the administrative committee the participant indicates whether any life annuity option is preferred, without indicating the particular life annuity chosen. Thus, the committee approves or disapproves the election without knowledge of whether a qualified joint and survivor annuity will be elected. The administrative committee approval provision in Plan M does not cause the plan to fail to satisfy this section. On the other hand, if the form indicates which form of life annuity is preferred, committee disapproval of any election of the qualified joint and survivor annuity would cause the plan to fail to satisfy this section.

(e) **Costs of providing qualified joint and survivor annuity form or early survivor annuity form.** A plan may take into account in any equitable manner consistent with generally accepted actuarial principles applied on a consistent basis any increased costs resulting from providing qualified joint and survivor annuity and early survivor annuity benefits. A plan may give a participant the option of paying premiums only if it provides another option under which an out-of-pocket expense by the participant is not required.

(f) **Application and effective date.** Section 401(a)(11) and this section shall apply to a plan only with respect to plan years beginning after December 31, 1975, and shall apply only if—

(1) The participant's annuity starting date did not fall within a plan year beginning before January 1, 1976, and

(2) The participant was an active participant in the plan on or after the first day of the first plan year beginning after December 31, 1975.

For purposes of this paragraph, the term "active participant" means a participant for whom benefits are being accrued under the plan on his behalf (in the case of a defined benefit plan), the employer is obligated to contribute to or under the plan on his behalf (in the case of a defined contribution plan other than a profit-sharing plan), or the employer either is obligated to contribute to or under the plan on his behalf or would have been obligated to contribute to or under the plan on his behalf if any contribution were made to or under the plan (in the case of a profit-sharing plan).

If benefits under a plan are provided by the distribution to the participants of individual annuity contracts, the annuity starting date will be considered for purposes of this paragraph to fall within a plan year beginning before January 1, 1976, with respect to any such individual contract that was distributed to the participant during a plan year beginning before January 1, 1976, if no premiums are paid with respect to such contract during a plan year beginning after December 31, 1975. In the case of individual annuity contracts that are distributed to participants before January 1, 1978, and which contain an option to provide a qualified joint and survivor annuity, the requirements of this section will be considered to have been satisfied if, not later than January 1, 1978, holders of individual annuity contracts who are participants described in the first sentence of this paragraph are given an opportunity to have such contracts amended, so as to provide for a qualified joint and survivor annuity in the absence of a contrary election, within a period of not less than one year from the date such opportunity was offered. In no event, however, shall the preceding sentence apply with respect to benefits attributable to premiums paid after December 31, 1977.

(g) **Effect of REA 1984—(1) In general.** The Retirement Equity Act of 1984 (REA 1984) significantly changed the qualified joint and survivor annuity rules generally effective for plan years beginning after December 31, 1984. The new survivor annuity rules are primarily in sections 401(a)(11) and 417 as revised by REA 1984 and §§ 1.401(a)-20 and 417(e)-1.

(2) **Regulations after REA 1984.** (i) REA and the regulations thereunder to the extent inconsistent with pre-REA 1984 section 401(a)(11) and this section are controlling for years to which REA 1984 applies. See e.g., paragraphs (a)(1) and (2) of this section, relating to required provisions and certain cash-outs, respectively and (e), relating to costs of providing annuities, for rules that are inconsistent with REA 1984 and, therefore, are not applicable to REA 1984 years.

(ii) To the extent that the pre-REA 1984 law either is the same as or consistent with REA 1984 and the new regulations hereunder, the rules in this section shall continue to apply for years to which REA 1984 applies. (See, e.g., paragraph (c) (relating to how information is furnished participants and spouses) and paragraph (b) (defining a life annuity) for some of the rules that apply to REA 1984 years.) The rules in this section shall not apply for such year to the extent that they are inconsistent with REA 1984 and the regulations thereunder.

(iii) The Commissioner may provide additional guidance as to the continuing effect of the various

rules in this section for years to which REA applies.

[T.D. 7458, 42 FR 1466, Jan. 7, 1977; 42 FR 6367, Feb. 2, 1977, as amended by T.D. 7510, 42 FR 53956, Oct. 4, 1977; T.D. 8219, 53 FR 31841, Aug. 22, 1988]

§ 1.401(a)–12 Mergers and consolidations of plans and transfers of plan assets.

A trust will not be qualified under section 401 unless the plan of which the trust is a part provides that in the case of any merger or consolidation with, or transfer of assets or liabilities to, another plan after September 2, 1974, each participant in the plan would receive a minimum benefit if the plan terminated immediately after the merger, consolidation, or transfer. This benefit must be equal to or greater than the benefit the participant would have been entitled to receive immediately before the merger, consolidation, or transfer if the plan in which he was a participant had then terminated. This section applies to a multiemployer plan only to the extent determined by the Pension Benefit Guaranty Corporation. For additional rules concerning mergers or consolidations of plans and transfers of plan assets, see section 414(*l*) and § 1.414(*l*)–1.

[T.D. 7638, 44 FR 48195, Aug. 17, 1979]

§ 1.401(a)–13 Assignment or alienation of benefits.

(a) Scope of the regulations. This section applies only to plans to which section 411 applies without regard to section 411(e)(2). Thus, for example, it does not apply to a governmental plan, within the meaning of section 414(d); a church plan, within the meaning of section 414(e), for which there has not been made the election under section 410(a) to have the participation, vesting, funding, etc. requirements apply; or a plan which at no time after September 2, 1974, provided for employer contributions.

(b) No assignment or alienation—(1) General rule. Under section 401(a)(13), a trust will not be qualified unless the plan of which the trust is a part provides that benefits provided under the plan may not be anticipated, assigned (either at law or in equity), alienated or subject to attachment, garnishment, levy, execution or other legal or equitable process.

(2) Federal tax levies and judgments. A plan provision satisfying the requirements of subparagraph (1) of this paragraph shall not preclude the following:

(i) The enforcement of a Federal tax levy made pursuant to section 6331.

(ii) The collection by the United States on a judgment resulting from an unpaid tax assessment.

(c) Definition of assignment and alienation—(1) In general. For purposes of this section, the terms "assignment" and "alienation" include—

(i) Any arrangement providing for the payment to the employer of plan benefits which otherwise would be due the participant under the plan, and

(ii) Any direct or indirect arrangement (whether revocable or irrevocable) whereby a party acquires from a participant or beneficiary a right or interest enforceable against the plan in, or to, all or any part of a plan benefit payment which is, or may become, payable to the participant or beneficiary.

(2) Specific arrangements not considered an assignment or alienation. The terms "assignment" and "alienation" do not include, and paragraph (e) of this section does not apply to, the following arrangements:

(i) Any arrangement for the recovery of amounts described in section 4045(b) of the Employee Retirement Income Security Act of 1974, 88 Stat. 1027 (relating to the recapture of certain payments),

(ii) Any arrangement for the withholding of Federal, State or local tax from plan benefit payments,

(iii) Any arrangement for the recovery by the plan of overpayments of benefits previously made to a participant,

(iv) Any arrangement for the transfer of benefit rights from the plan to another plan, or

(v) Any arrangement for the direct deposit of benefit payments to an account in a bank, savings and loan association or credit union, provided such arrangement is not part of an arrangement constituting an assignment or alienation. Thus, for example, such an arrangement could provide for the direct deposit of a participant's benefit payments to a bank account held by the participant and the participant's spouse as joint tenants.

(d) Exceptions to general rule prohibiting assignments or alienations—(1) Certain voluntary and revocable assignments or alienations. Notwithstanding paragraph (b)(1) of this section, a plan may provide that once a participant or beneficiary begins receiving benefits under the plan, the participant or beneficiary may assign or alienate

the right to future benefit payments provided that the provision is limited to assignments or alienations which—

(i) Are voluntary and revocable;

(ii) Do not in the aggregate exceed 10 percent of any benefit payment; and

(iii) Are neither for the purpose, nor have the effect, of defraying plan administration costs.

For purposes of this subparagraph, an attachment, garnishment, levy, execution, or other legal or equitable process is not considered a voluntary assignment or alienation.

(2) **Benefits assigned or alienated as security for loans.** (i) Notwithstanding paragraph (b)(1) of this section, a plan may provide for loans from the plan to a participant or a beneficiary to be secured (by whatever means) by the participant's accrued nonforfeitable benefit provided that the following conditions are met.

(ii) The plan provision providing for the loans must be limited to loans from the plan. A plan may not provide for the use of benefits accrued or to be accrued under the plan as security for a loan from a party other than the plan, regardless of whether these benefits are nonforfeitable within the meaning of section 411 and the regulations thereunder.

(iii) The loan, if made to a participant or beneficiary who is a disqualified person (within the meaning of section 4975(e)(2)), must be exempt from the tax imposed by section 4975 (relating to the tax imposed on prohibited transactions) by reason of section 4975(d)(1). If the loan is made to a participant or beneficiary who is not a disqualified person, the loan must be one which would be exempt from the tax imposed by section 4975 by reason of section 4975(d)(1) if the loan were made to a disqualified person.

(e) **Special rule for certain arrangements**—(1) **In general.** For purposes of this section and notwithstanding paragraph (c)(1) of this section, an arrangement whereby a participant or beneficiary directs the plan to pay all, or any portion, of a plan benefit payment to a third party (which includes the participant's employer) will not constitute an "assignment or alienation" if—

(i) It is revocable at any time by the participant or beneficiary; and

(ii) The third party files a written acknowledgement with the plan administrator pursuant to subparagraph (2) of this paragraph.

(2) **Acknowledgement requirement for third party arrangements.** In accordance with paragraph (e)(1)(ii) of this section, the third party is required to file a written acknowledgement with the plan administrator. This acknowledgement must state that the third party has no enforceable right in, or to, any plan benefit payment or portion thereof (except to the extent of payments actually received pursuant to the terms of the arrangement). A blanket written acknowledgement for all participants and beneficiaries who are covered under the arrangement with the third party is sufficient. The written acknowledgement must be filed with the plan administrator no later than the later of—

(i) August 18, 1978; or

(ii) 90 days after the arrangement is entered into.

(f) **Effective date.** Section 401(a)(13) is applicable as of January 1, 1976, and the plan provision required by this section must be effective as of that date. However, regardless of when the provision is adopted, it will not affect—

(1) Attachments, garnishments, levies, or other legal or equitable process permitted under the plan that are made before January 1, 1976;

(2) Assignments permitted under the plan that are irrevocable on December 31, 1975, including assignments made before January 1, 1976, as security for loans to a participant or beneficiary from a party other than the plan; and

(3) Renewals or extensions of loans described in subparagraph (2) of this paragraph, if—

(i) The principal amount of the obligation outstanding on December 31, 1975 (or, if less, the principal amount outstanding on the date of renewal or extension), is not increased;

(ii) The loan, as renewed or extended, does not bear a rate of interest in excess of the rate prevailing for similar loans at the time of the renewal or extensions; and

(iii) With respect to loans that are renewed or extended to bear a variable interest rate, the formula for determining the applicable rate is consistent with the formula for formulae prevailing for similar loans at the time of the renewal or extension.

For purposes of subparagraphs (2) and (3) of this paragraph, a loan from a party other than the plan made after December 31, 1975, will be treated as a new loan. This is so even if the lender's security interest for the loan arises from an assignment of

the participant's accrued nonforfeitable benefit made before that date.

(g) Special rules for qualified domestic relations orders—(1) Definition. The term "qualified domestic relations order" (QDRO) has the meaning set forth in section 414(p). For purposes of the Internal Revenue Code, a QDRO also includes any domestic relations order described in section 303(d) of the Retirement Equity Act of 1984.

(2) Plan amendments. A plan will not fail to satisfy the qualification requirements of section 401(a) or 403(a) merely because it does not include provisions with regard to a QDRO.

(3) Waiver of distribution requirements. A plan shall not be treated as failing to satisfy the requirements of sections 401 (a) and (k) and 409(d) solely because of a payment to an alternate payee pursuant to a QDRO. This is the case even if the plan provides for payments pursuant to a QDRO to an alternate payee prior to the time it may make payments to a participant. Thus, for example, a pension plan may pay an alternate payee even though the participant may not receive a distribution because he continues to be employed by the employer.

(4) Coordination with section 417—(i) Former spouse. (A) In general. Under section 414(p)(5), a QDRO may provide that a former spouse shall be treated as the current spouse of a participant for all or some purposes under sections 401(a)(11) and 417.

(B) Consent. (1) To the extent a former spouse is treated as the current spouse of the participant by reason of a QDRO, any current spouse shall not be treated as the current spouse. For example, assume H is divorced from W, but a QDRO provides that H shall be treated as W's current spouse with respect to all of W's benefits under a plan. H will be treated as the surviving spouse under the QPSA and QJSA unless W obtains H's consent to waive the QPSA or QJSA or both. The fact that W married S after W's divorce from H is disregarded. If, however, the QDRO had provided that H shall be treated as W's current spouse only with respect to benefits that accrued prior to the divorce, then H's consent would be needed by W to waive the QPSA or QJSA with respect to benefits accrued before the divorce. S's consent would be required with respect to the remainder of the benefits.

(2) In the preceding examples, if the QDRO ordered that a portion of W's benefit (either through separate accounts or a percentage of the benefit) must be distributed to H rather than ordering that H be treated as W's spouse, the survivor annuity requirements of sections 401(a)(11) and 417 would not apply to the part of W's benefit awarded H. Instead, the terms of the QDRO would determine how H's portion of W's accrued benefit is paid. W is required to obtain S's consent if W elects to waive either the QJSA or QPSA with respect to the remaining portion of W's benefit.

(C) Amount of the QPSA or QJSA. (1) Where, because of a QDRO, more than one individual is to be treated as the surviving spouse, a plan may provide that the total amount to be paid in the form of a QPSA or survivor portion of a QJSA may not exceed the amount that would be paid if there were only one surviving spouse. The QPSA or survivor portion of the QJSA, as the case may be, payable to each surviving spouse must be paid as an annuity based on the life of each such spouse.

(2) Where the QDRO splits the participant's accrued benefit between the participant and a former spouse (either through separate accounts or percentage of the benefit), the surviving spouse of the participant is entitled to a QPSA or QJSA based on the participant's accrued benefit as of the date of death or the annuity starting date, less the separate account or percentage that is payable to the former spouse. The calculation is made as if the separate account or percentage had been distributed to the participant prior to the relevant date.

(ii) Current spouse. Under section 414(p)(5), even if the applicable election periods (i.e., the first day of the year in which the participant attains age 35 and 90 days before the annuity starting date) have not begun, a QDRO may provide that a current spouse shall not be treated as the current spouse of the participant for all or some purposes under sections 401(a)(11) and 417. A QDRO may provide that the current spouse waives all future rights to a QPSA or QJSA.

(iii) Effects on benefits. (A) A plan is not required to provide additional vesting or benefits because of a QDRO.

(B) If an alternative payee is treated pursuant to a QDRO as having an interest in the plan benefit, including a separate account or percentage of the participant's account, then the QDRO cannot provide the alternate payee with a greater right to designate a beneficiary for the alternate payee's benefit amount than the participant's right. The

QJSA or QPSA provisions of section 417 do not apply to the spouse of an alternate payee.

(C) If the former spouse who is treated as a current spouse dies prior to the participant's annuity starting date, then any actual current spouse of the participant is treated as the current spouse, except as otherwise provided in a QDRO.

(iv) Section 415 requirements. Even though a participant's benefits are awarded to an alternate payee pursuant to a QDRO, the benefits are benefits of the participant for purposes of applying the limitations of section 415 to the participant's benefits.

[T.D. 7534, 43 FR 6943, Feb. 17, 1978; T.D. 8219, 53 FR 31850, Aug. 22, 1988]

§ 1.401(a)–14 Commencement of benefits under qualified trusts.

(a) In general. Under section 401(a)(14), a trust to which section 411 applies (without regard to section 411(e)(2) is not qualified under section 401 unless the plan of which such trust is a part provides that the payment of benefits under the plan to the participant will begin not later than the 60th day after the close of the plan year in which the latest of the following events occurs—

(1) The attainment by the participant of age 65, or, if earlier, the normal retirement age specified under the plan,

(2) The 10th anniversary of the date on which the participant commenced participation in the plan,

(3) The termination of the participant's service with the employer, or

(4) The date specified in an election made pursuant to paragraph (b) of this section.

Notwithstanding the preceding sentence, a plan may require that a participant file a claim for benefits before payment of benefits will commence.

(b) Election of later date—(1) General rule. A plan may permit a participant to elect that the payment to him of any benefit under a plan will commence at a date later than the dates specified under paragraphs (a)(1), (2), and (3) of this section.

(2) Manner of election. A plan permitting an election under this paragraph shall require that such election must be made by submitting to the plan administrator a written statement, signed by the participant, which describes the benefit and the date on which the payment of such benefit shall commence.

(3) Restriction. An election may not be made pursuant to a plan provision permitted by this paragraph if the exercise of such election will cause benefits payable under the plan with respect to the participant in the event of his death to be more than "incidental" within the meaning of paragraph (b)(1)(i) of § 1.401–1.

(c) Special early retirement rule—(1) Separation prior to early retirement age. A trust forming part of a plan which provides for the payment of an early retirement benefit is not qualified under section 401 unless, upon satisfaction of the age requirement for such early retirement benefit, a participant who—

(i) Satisfied the service requirements for such early retirement benefit, but

(ii) Separated from service (with any nonforfeitable right to an accrued benefit) before satisfying such age requirement,

is entitled to receive not less than the reduced normal retirement benefit described in paragraph (c)(2) of this section. A plan may establish reasonable conditions for payments of early retirement benefits (including for example, a requirement that a claim for benefits be made) if the conditions are equally applicable to participants who separate from service when eligible for an early retirement benefit and participants who separate from service earlier.

(2) Reduced normal retirement benefit. For purposes of this section, the reduced normal retirement benefit is the benefit to which the participant would have been entitled under the plan at normal retirement age, reduced in accordance with reasonable actuarial assumptions.

(3) Separation prior to effective date of this section. The provisions of this paragraph shall not apply in the case of a plan participant who separates from service before attainment of early retirement age and prior to the effective date of this section set forth in paragraph (e) of this section.

(4) Illustration. The provisions of this paragraph may be illustrated by the following example:

Example. The X Corporation Defined Benefit Plan provides that a normal retirement benefit will be payable to a participant upon attainment of age 65. The plan also provides that an actuarially reduced retirement benefit will be payable, upon application, to any participant who has completed 10 years of service with the X Corporation and attained age 60. When he is 55 years of age and has completed 10 years of service with X Corporation, A, a participant in the plan, leaves the service of X Corporation and does not return. The plan will not be

qualified under section 401 unless, upon attainment of age 60 and application for benefits, A is entitled to receive a reduced normal retirement benefit described in subparagraph (2) of this paragraph.

(d) Retroactive payment rule. If the amount of the payment required to commence on the date determined under this section cannot be ascertained by such date, or if it is not possible to make such payment on such date because the plan administrator has been unable to locate the participant after making reasonable efforts to do so, a payment retroactive to such date may be made no later than 60 days after the earliest date on which the amount of such payment can be ascertained under the plan or the date on which the participant is located (whichever is applicable).

(e) Effective date. This section shall apply to a plan for those plan years to which section 411 of the Code applies without regard to section 411(e)(2).

[T.D. 7436, 41 FR 42651, Sept. 28, 1976; 41 FR 44690, Oct. 12, 1976]

§ 1.401(a)–15 Requirement that plan benefits are not decreased on account of certain Social Security increases.

(a) In general. Under section 401(a)(15), a trust which is part of a plan to which section 411 applies (without regard to section 411(e)(2)) is not qualified under section 401 unless, under the plan of which such trust is a part:

(1) Benefit being received by participant or beneficiary. A benefit (including a death or disability benefit) being received under the plan by a participant or beneficiary (other than a participant to whom subparagraph (2)(ii) of this paragraph applies, or a beneficiary of such a participant) is not decreased by reason of any post-separation social security benefit increase effective after the later of—

(i) September 2, 1974, or

(ii) The date of first receipt of any retirement benefit, death benefit, or disability benefit under the plan by the participant or by a beneficiary of the participant (whichever receipt occurs first).

(2) Benefit to which participant separated from service has nonforfeitable right. In the case of a benefit to which a participant has a nonforfeitable right under such plan—

(i) If such participant is separated from service and does not subsequently return to service and resume participation in the plan, such benefit is not decreased by reason of any post-separation social security benefit increase effective after the later of September 2, 1974, or separation from service, or

(ii) If such participant is separated from service and subsequently returns to service and resumes participation in the plan, such benefit is not decreased by reason of any post-separation social security benefit increase effective after September 2, 1974, which occurs during separation from service and which would decrease such benefit to a level below the level of benefits to which he would have been entitled had he not returned to service after his separation.

(b) Post-separation social security benefit increase. For purposes of this section, the term "post-separation social security benefit increase" means, with respect to a participant or a beneficiary of the participant, an increase in a benefit level or wage base under title II of the Social Security Act (whether such increase is a result of an amendment of such title II or is a result of the application of the provisions of such title II) occurring after the earlier of such participant's separation from service or commencement of benefits under the plan.

(c) Illustrations. The provisions of paragraphs (a) and (b) of this section may be illustrated by the following examples:

Example (1). A plan to which section 401(a)(15) applies provides an annual benefit at the normal retirement age, 65, in the form of a stated benefit formula amount less a specified percentage of the primary insurance amount payable under title II of the Social Security Act. The plan provides no early retirement benefits. In the case of a participant who separates from service before age 65 with a nonforfeitable right to a benefit under the plan, the plan defines the primary insurance amount as the amount which the participant is entitled to receive under title II of the Social Security Act at age 65, multiplied by the ratio of the number of years of service with the employer to the number of years of service the participant would have had if he had worked for the employer until age 65. The plan does not satisfy the requirements of section 401(a)(15), because social security increases that occur after a participant's separation from service will reduce the benefit the participant will receive under the plan.

Example (2). A plan to which section 401(a)(15) applies provides an annual benefit at the normal retirement age, 65, in the form of a stated benefit formula amount less a specified percentage of the primary insurance amount payable under title II of the Social Security Act. The plan provides no early retirement benefits. In the case of a participant who separates from service before age 65 with a nonforfeitable right to a benefit under the plan, the plan defines the primary insurance amount as the amount which the participant is entitled to receive under title II of the Social Security Act at age 65 based upon the assumption that he will continue to receive until reaching age 65 compensation which would be treated as wages for purposes of the Social Security Act at the same rate as he received such compensation at the time he separated from service, but determined without regard to any post-separation

social security benefit increase, multiplied by the ratio of the number of years of service with the employer to the number of years of service the participant would have had if he had worked for the employer until age 65. The plan satisfies the requirements of section 401(a)(15), because social security increases that occur after a participant's separation from service will not reduce the benefit the participant will receive under the plan.

(d) Other Federal or State laws. To the extent applicable, the rules discussed in this section will govern classifications under a plan supplementing the benefits provided by other Federal or State laws, such as the Railroad Retirement Act of 1937. See section 206(b) of the Employee Retirement Income Security Act of 1974 (Public Law 93–406, 88 Stat. 864).

(e) Effect on prior law. Nothing in this section shall be construed as amending or modifying the rules applicable to post-separation social security increases prior to September 2, 1974. See paragraph (e) of § 1.401–3.

(f) Effective date. Section 401(a)(15) and this section shall apply to a plan only with respect to plan years to which section 411 (relating to minimum vesting standards) is applicable to the plan without regard to section 411(e)(2).

[T.D. 7434, 41 FR 42650, Sept. 28, 1976]

§ 1.401(a)–16 Limitations on benefits and contributions under qualified plans.

A trust will not be a qualified trust and a plan will not be a qualified plan if the plan provides for benefits or contributions which exceed the limitations of section 415. Section 415 and the regulations thereunder provide rules concerning these limitations on benefits and contributions.

[T.D. 7748, 46 FR 1696, Jan. 7, 1981]

§ 1.401(a)–19 Nonforfeitability in case of certain withdrawals.

(a) Application of section. Section 401(a)(19) and this section apply to a plan to which section 411(a) applies. (See section 411(e) and § 1.411(a)–2 for applicability of section 411).

(b) Prohibited forfeitures—(1) General rule. A plan to which this section applies is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if, under such plan, any part of a participant's accrued benefit derived from employer contributions is forfeitable solely because a benefit derived from the participant's contributions under the plan is voluntarily withdrawn by him after he has become a 50 percent vested participant.

(2) 50 percent vested participant. For purposes of subparagraph (1) of this paragraph, a participant is a 50 percent vested participant when he has a nonforfeitable right (within the meaning of section 411 and the regulations thereunder) to at least 50 percent of his accrued benefit derived from employer contributions. Whether or not a participant is 50 percent vested shall be determined by the ratio of the participant's total nonforfeitable employer-derived accrued benefit under the plan to his total employer-derived accrued benefit under the plan.

(3) Certain forfeitures. Paragraph (b)(1) of this section does not apply in the case of a forfeiture permitted by section 411(a)(3)(D)(iii) and § 1.411(a)–7(d)(3) (relating to forfeitures of certain benefits accrued before September 2, 1974).

(c) Supersession. Section 11.401(a)–(19) of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 is superseded by this section.

[T.D. 7501, 42 FR 42320, Aug. 23, 1977]

§ 1.401(a)–20 Requirements of qualified joint and survivor annuity and qualified preretirement survivor annuity.

Q-1: What are the survivor annuity requirements added to the Code by the Retirement Equity Act of 1984 (REA 1984)?

A-1: REA 1984 replaced section 401(a)(11) with a new section 401(a)(11) and added section 417. Plans to which new section 401(a)(11) applies must comply with the requirements of sections 401(a)(11) and 417 in order to remain qualified under sections 401(a) or 403(a). In general, these plans must provide both a qualified joint and survivor annuity (QJSA) and a qualified preretirement survivor annuity (QPSA) to remain qualified. These survivor annuity requirements are applicable to any benefit payable under a plan, including a benefit payable to a participant under a contract purchased by the plan and paid by a third party.

Q-2: Must annuity contracts purchased and distributed to a participant or spouse by a plan subject to the survivor annuity requirements of sections 401(a)(11) and 417 satisfy the requirements of those sections?

A-2: Yes. Rights and benefits under section 401(a)(11) or 417 may not be eliminated or reduced because the plan uses annuity contracts to provide benefits merely because (a) such a contract is held by a participant or spouse instead of a plan trustee, or (b) such contracts are distributed upon plan termination. Thus, the requirements of sec-

tions 401(a)(11) and 417 apply to payments under the annuity contracts, not to the distributions of the contracts.

Q-3: What plans are subject to the survivor annuity requirements of section 401(a)(11)?

A-3: (a) Section 401(a)(11) applies to any defined benefit plan and to any defined contribution plan that is subject to the minimum funding standards of section 412. This section also applies to any participant under any other defined contribution plan unless all of the following conditions are satisfied—

(1) The plan provides that the participant's nonforfeitable accrued benefit is payable in full, upon the participant's death, to the participant's surviving spouse (unless the participant elects, with spousal consent that satisfies the requirements of section 417(a)(2), that such benefit be provided instead to a designated beneficiary);

(2) The participant does not elect the payment of benefits in the form of a life annuity; and

(3) With respect to the participant, the plan is not a transferee or an offset plan. (See Q&A 5 of this section.)

(b) A defined contribution plan not subject to the minimum funding standards of section 412 will not be treated as satisfying the requirement of paragraph (a)(1) unless both of the following conditions are satisfied—

(1) The benefit is available to the surviving spouse within a reasonable time after the participant's death. For this purpose, availability within the 90-day period following the date of death is deemed to be reasonable and the reasonableness of longer periods shall be determined based on the particular facts and circumstances. A time period longer than 90 days, however, is deemed unreasonable if it is less favorable to the surviving spouse than any time period under the plan that is applicable to other distributions. Thus, for example, the availability of a benefit to the surviving spouse would be unreasonable if the distribution was required to be made by the close of the plan year including the participant's death while distributions to employees who separate from service were required to be made within 90 days of separation.

(2) The benefit payable to the surviving spouse is adjusted for gains or losses occurring after the participant's death in accordance with plan rules governing the adjustment of account balances for other plan distributions. Thus, for example, the plan may not provide for distributions of an account balance to a surviving spouse determined as of the last day of the quarter in which the participant's death occurred with no adjustments of an account balance for gains or losses after death if the plan provides for such adjustments for a participant who separates from service within a quarter.

(c) For purposes of determining the extent to which section 401(a)(11) applies to benefits under an employee stock ownership plan (as defined in section 4975(e)(7)), the portion of a participant's accrued benefit that is subject to section 409(h) is to be treated as though such benefit were provided under a defined contribution plan not subject to section 412.

(d) The requirements set forth in section 401(a)(11) apply to other employee benefit plans that are covered by applicable provisions under Title I of the Employee Retirement Income Security Act of 1974. For purposes of applying the regulations under sections 401(a)(11) and 417, plans subject to ERISA section 205 are treated as if they were described in section 401(a). For example, to the extent that section 205 covers section 403(b) contracts and custodial accounts they are treated as section 401(a) plans. Individual retirement plans (IRAs), including IRAs to which contributions are made under simplified employee pensions described in section 408(k) and IRAs that are treated as plans subject to Title I, are not subject to these requirements.

Q-4: What rules apply to a participant who elects a life annuity option under a defined contribution plan not subject to section 412?

A-4: If a participant elects at any time (irrespective of the applicable election period defined in section 417(a)(6)) a life annuity option under a defined contribution plan not subject to section 412, the survivor annuity requirements of sections 401(a)(11) and 417 will always thereafter apply to all of the participant's benefits under such plan unless there is a separate accounting of the account balance subject to the election. A plan may allow a participant to elect an annuity option prior to the applicable election period described in section 417(a)(6). If a participant elects an annuity option, the plan must satisfy the applicable written explanation, consent, election, and withdrawal rules of section 417, including waiver of the QJSA within 90 days of the annuity starting date. If a participant selecting such an option dies, the surviving spouse must be able to receive the QPSA benefit described in section 417(c)(2) which is a life annuity, the actuarial equivalent of which is not less than 50 percent of the nonforfeitable account balance (adjusted for loans as described in

Q&A 24(d) of this section). The remaining account balance may be paid to a designated nonspouse beneficiary.

Q-5: How do sections 401(a)(11) and 417 apply to transferee plans which are defined contribution plans not subject to section 412?

A-5: (a) Transferee plans. Although the survivor annuity requirements of sections 401(a)(11) and 417 generally do not apply to defined contribution plans not subject to section 412, such plans are subject to the survivor annuity requirements to the extent that they are transferee plans with respect to any participant. A defined contribution plan is a transferee plan with respect to any participant if the plan is a direct or indirect transferee of such participant's benefits held on or after January 1, 1985, by:

(1) A defined benefit plan,

(2) A defined contribution plan subject to section 412

or

(3) A defined contribution plan that is subject to the survivor annuity requirements of sections 401(a)(11) and 417 with respect to that participant.

If through a merger, spinoff, or other transaction having the effect of a transfer, benefits subject to the survivor annuity requirements of sections 401(a)(11) and 417 are held under a plan that is not otherwise subject to such requirements, such benefits will be subject to the survivor annuity requirements even though they are held under such plan. Even if a plan satisfies the survivor annuity requirements, other rules apply to these transactions. See, e.g., section 411(d)(6) and the regulations thereunder. A transfer made before January 1, 1985, and any rollover contribution made at any time, are not transactions that subject to the transferee plan to the survivor annuity requirements with respect to a participant. If a plan is a transferee plan with respect to a participant, the survivor annuity requirements do not apply with respect to other plan participants solely because of the transfer. Any plan that would not otherwise be subject to the survivor annuity requirements of sections 401(a)(11) and 417 whose benefits are used to offset benefits in a plan subject to such requirements is subject to the survivor annuity requirements with respect to those participants whose benefits are offset. Thus, if a stock bonus or profit-sharing plan offsets benefits under a defined benefit plan, such a plan is subject to the survivor annuity requirements.

(b) Benefits covered. The survivor annuity requirements apply to all accrued benefits held for a participant with respect to whom the plan is a transferee plan unless there is an acceptable separate accounting between the transferred benefits and all other benefits under the plan. A separate accounting is not acceptable unless gains, losses, withdrawals, contributions, forfeitures, and other credits or charges are allocated on a reasonable and consistent basis between the accrued benefits subject to the survivor annuity requirements and other benefits. If there is an acceptable separate accounting between transferred benefits and any other benefits under the plan, only the transferred benefits are subject to the survivor annuity requirements.

Q-6: Is a frozen or terminated plan required to satisfy the survivor annuity requirements of sections 401(a)(11) and 417?

A-6: In general, benefits provided under a plan that is subject to the survivor annuity requirements of sections 401(a)(11) and 417 must be provided in accordance with those requirements even if the plan is frozen or terminated. However, any plan that has a termination date prior to September 17, 1985, and that distributed all remaining assets as soon as administratively feasible after the termination date, is not subject to the survivor annuity requirements. The date of termination is determined under section 411(d)(3) and § 1.411(d)-2(c).

Q-7: If the Pension Benefit Guaranty Corporation (PBGC) is administering a plan are benefits payable in the form of a OPSA or QJSA?

A-7: Yes, the PBGC will pay benefits in such forms.

Q-8: How do the survivor annuity requirements of sections 401(a)(11) and 417 apply to participants?

A-8: (a) If a participant dies before the annuity starting date with vested benefits attributable to employer or employee contributions (or both), benefits must be paid to the surviving spouse in the form of a QPSA. If a participant survives until the annuity starting date with vested benefits attributable to employer or employee contributions (or both), benefits must be provided to the participant in the form of a QJSA.

(b) A participant may waive the QPSA or the QJSA (or both) if the applicable notice, election, and spousal consent requirements of section 417 are satisfied.

(c) Benefits are not required to be paid in the form of a QPSA or QJSA if at the time of death or distribution the participant was vested only in

employee contributions and such death occurred, or distribution commenced, before October 22, 1986.

(d) Certain mandatory distributions. A distribution may occur without satisfying the spousal consent requirements of section 417 (a) and (e) if the present value of the nonforfeitable benefit does not exceed $3,500. See § 1.417(e)-1.

Q-9: May separate portions of a participant's accrued benefit be subject to QPSA and QJSA requirements at any particular point in time?

A-9: (a) Dual QPSA and QJSA rights. One portion of a participant's benefit may be subject to the QPSA and another portion to the QJSA requirements at the same time. For example, in order for a money purchase pension plan to distribute any portion of a married participant's benefit to the participant, the plan must distribute such portion in the form of a QJSA (unless the plan satisfies the applicable consent requirements of section 417 (a) and (e) with respect to such portion of the participant's benefit). This rule applies even if the distribution is merely an in-service distribution attributable to voluntary employee contributions and regardless of whether the participant has attained the normal retirement age under the plan. The QJSA requirements apply to such a distribution because the annuity starting date has occurred with respect to this portion of the participant's benefit. In the event of a participant's death following the commencement of a distribution in the form of a QJSA, the remaining payments must be made to the surviving spouse under the QJSA. In addition, the plan must satisfy the QPSA requirements with respect to any portion of the participant's benefits for which the annuity starting date had not yet occurred.

(b) Example. Assume that participant A has a $100,000 account balance in a money purchase pension plan. A makes an in-service withdrawal of $20,000 attributable to voluntary employee contributions. The QJSA requirements apply to A's withdrawal of the $20,000. Accordingly, unless the QJSA form is properly waived such amount must be distributed in the form of a QJSA. A's remaining account balance ($80,000) remains subject to the QPSA requirements because the annuity starting date has not occurred with respect to the $80,000. (If A survives until the annuity starting date, the $80,000 would be subject to the QJSA requirements.) If A died on the day following the annuity starting date for the withdrawal, A's spouse would be entitled to a QPSA with a value equal to at least $40,000 with respect to the $80,000 account balance, in addition to any survivor benefit without respect to the $20,000. If the $20,000 payment to A had been the first payment of an annuity purchased with the entire $100,000 account balance rather than an in-service distribution, then the QJSA requirements would apply to the entire account balance at the time of the annuity starting date. In such event, the plan would have no obligation to provide A's spouse with a QPSA benefit upon A's death. Of course, A's spouse would receive the QJSA benefit (if the QJSA had not been waived) based on the full $100,000.

Q-10: What is the relevance of the annuity starting date with respect to the survivor benefit requirements?

A-10: (a) Relevance. The annuity starting date is relevant to whether benefits are payable as either a QJSA or QPSA, or other selected optional form of benefit. If a participant is alive on the annuity starting date, the benefits must be payable as a QJSA. If the participant is not alive on the annuity starting date, the surviving spouse must receive a QPSA. The annuity starting date is also used to determine when a spouse may consent to and a participant may waive a QJSA. A waiver is only effective if it is made 90 days before the annuity starting date. Thus, a deferred annuity cannot be selected and a QJSA waived until 90 days before payments commence under the deferred annuity. In some cases, the annuity starting date will have occurred with respect to a portion of the participant's accrued benefit and will not have occurred with respect to the remaining portion. (See Q&A-9.)

(b) Annuity starting date—(1) General rule. For purposes of sections 401(a)(11), 411(a)(11) and 417, the annuity starting date is the first day of the first period for which an amount is paid as an annuity or any other form.

(2) Annuity payments. The annuity starting date is the first date for which an amount is paid, not the actual date of payment. Thus, if participant A is to receive annuity payments as of the first day of the first month after retirement but does not receive any payments until three months later, the annuity starting date is the first day of the first month. For example, if an annuity is to commence on January 1, January 1 is the annuity starting date even though the payment for January is not actually made until a later date. In the case of a deferred annuity, the annuity starting date is the date for which the annuity payments are to commence, not the date that the deferred annuity is elected or the date the deferred annuity contract is distributed.

(3) Administrative delay. A payment shall not be considered to occur after the annuity starting date merely because actual payment is reasonably delayed for calculation of the benefit amount if all payments are actually made.

(4) Forfeitures on death. Prior to the annuity starting date, section 411(a)(3)(A) allows a plan to provide for a forfeiture of a participant's benefit, except in the case of a QPSA or a spousal benefit described in section 401(a)(11)(B)(iii)(I). Once

the annuity starting date has occurred, even if actual payment has not yet been made, a plan must pay the benefit in the distribution form elected.

(5) Surviving spouses, alternate payees, etc. The definition of "annuity starting date" for surviving spouses, other beneficiaries and alternate payees under section 414(p) is the same as it is for participants.

(c) Disability auxiliary benefit—(1) General rule. The annuity starting date for a disability benefit is the first day of the first period for which the benefit becomes payable unless the disability benefit is an auxiliary benefit. The payment of any auxiliary disability benefits is disregarded in determining the annuity starting date. A disability benefit is an auxiliary benefit if upon attainment of early or normal retirement age, a participant receives a benefit that satisfies the accrual and vesting rules of section 411 without taking into account the disability benefit payments up to that date.

(2) **Example.** (i) Assume that participant A at age 45 is entitled to a vested accrued benefit of $100 per month commencing at age 65 in the form of a joint and survivor annuity under Plan X. If prior to age 65 A receives a disability benefit under Plan X and the payment of such benefit does not reduce the amount of A's retirement benefit of $100 per month commencing at age 65, any disability benefit payments made to A between ages 45 and 65 are auxiliary benefits. Thus, A's annuity starting date does not occur until A attains age 65. A's surviving spouse B would be entitled to receive a QPSA if A died before age 65. B would be entitled to receive the survivor portion of a QJSA (unless waived) if A died after age 65. The QPSA payable to B upon A's death prior to age 65 would be computed by reference to the QJSA that would have been payable to A and B had A survived to age 65.

(ii) If in the above example A's benefit payable at age 65 is reduced to $99 per month because a disability benefit is provided to A prior to age 65, the disability benefit would not be an auxiliary benefit. The benefit of $99 per month payable to A at age 65 would not, without taking into account the disability benefit payments to A prior to age 65, satisfy the minimum vesting and accrual rules of section 411. Accordingly, the first day of the first period for which the disability payments are to be made to A would constitute A's annuity starting date, and any benefit paid to A would be required to be paid in the form of a QJSA (unless waived by A with the consent of B).

(d) Other rules—(1) Suspension of benefits. If benefit payments are suspended after the annuity starting date pursuant to a suspension of benefits described in section 411(a)(3)(B) after an employee separates from service, the recommencement of benefit payments after the suspension is not treated as a new annuity starting date unless the plan provides otherwise. In such case, the plan administrator is not required to provide new notices nor to obtain new waivers for the recommenced distributions if the form of distribution is the same as the form that was appropriately selected prior to the suspension. If benefits are suspended for an employee who continues in service without a separation and who never receives payments, the commencement of payments after the period of suspension is treated as the annuity starting date unless the plan provides otherwise.

(2) Additional accruals. In the case of an annuity starting date that occurs on or after normal retirement age, such date applies to any additional accruals after the annuity starting date, unless the plan provides otherwise. For example, if a participant who continues to accrue benefits elects to have benefits paid in an optional form at normal retirement age, the additional accruals must be paid in the optional form selected unless the plan provides otherwise. In the case of an annuity starting date that occurs prior to normal retirement age, such date does not apply to any additional accruals after such date.

Q-11: Do the survivor annuity requirements apply to benefits derived from both employer and employee contributions?

A-11: Yes. The survivor annuity benefit requirements apply to benefits derived from both employer and employee contributions. Benefits are not required to be paid in the form of a QPSA or QJSA if the participant was vested only in employee contributions at the time of death or distribution and such death or distribution occurred before October 22, 1986. All benefits provided under a plan, including benefits attributable to rollover contributions, are subject to the survivor annuity requirements.

Q-12: To what benefits do the survivor annuity requirements of sections 401(a)(11) and 417 apply?

A-12: (a) Defined benefit plans. Under a defined benefit plan, sections 401(a)(11) and 417 apply only to benefits in which a participant was vested immediately prior to death. They do not apply to benefits to which a participant's beneficiary becomes entitled by reason of death or to the proceeds of a life insurance contract to the extent such proceeds exceed the present value of the participant's nonforfeitable benefits that existed immediately prior to death.

(b) Defined contribution plans. Sections 401(a)(11) and 417 apply to all nonforfeitable benefits which are payable under a defined contribution plan, whether nonforfeitable before or upon death, including the proceeds of insurance contracts.

Q-13: Does the rule of section 411(a)(3)(A) which permits forfeitures on account of death

apply to a QPSA or the spousal benefit described in section 401(a)(11)(B)(iii)?

A-13: No. Section 411(a)(3)(A) permits forfeiture on account of death prior to the time all the events fixing payment occur. However, this provision does not operate to deprive a surviving spouse of a QPSA or the spousal benefit described in section 401(a)(11)(B)(iii). Therefore, sections 401(a)(11) and 417 apply to benefits that were nonforfeitable immediately prior to death (determined without regard to section 411(a)(3)(A)). Thus, in the case of the death of a married participant in a defined contribution plan not subject to section 412 which provides that, upon a participant's death, the entire nonforfeitable accrued benefit is payable to the participant's spouse, the nonforfeitable benefit is determined without regard to the provisions of section 411(a)(3)(A).

Q-14: Do sections 411(a)(11), 401(a)(11) and 417 apply to accumulated deductible employee contributions, as defined in section 72(*o*)(5)(B) (Accumulated DECs)?

A-14: (a) Employee consent, section 411. The requirements of section 411(a)(11) apply to Accumulated DECs. Thus, Accumulated DECs may not be distributed without participant consent unless the applicable exemptions apply.

(b) Survior requirements. Accumulated DECs are treated as though held under a separate defined contribution plan that is not subject to section 412. Thus, section 401(a)(11) applies to Accumulated DECs only as provided in section 401(a)(11)(B)(iii). All Accumulated DECs are treated in this manner, including Accumulated DECs that are the only benefit held under a plan and Accumulated DECs that are part of a defined benefit or a defined contribution plan.

(c) Effective date. Sections 401(a)(11) and 411(a)(11) shall not apply to distributions of accumulated DECs until the first plan year beginning after December 31, 1988.

Q-15: How do the survivor annuity requirements of sections 401(a)(11) and 417 apply to a defined benefit plan that includes an accrued benefit based upon a contribution to a separate account or mandatory employee contributions?

A-15: (a) 414(k) plans. In the case of a section 414(k) plan that includes both a defined benefit plan and a separate account, the rules of sections 401(a)(11) and 417 apply separately to the defined benefit portion and the separate account portion of the plan. The separate account portion is subject to the survivor annuity requirements of sections 401(a)(11) and 417 and the special QPSA rules in section 417(c)(2).

(b) Employee contributions—(1) Voluntary. In the case of voluntary employee contributions to a defined benefit plan, the plan must maintain a separate account with respect to the voluntary employee contributions. This separate account is subject to the survivor annuity requirements of sections 401(a)(11) and 417 and the special QPSA rules in section 417(c)(2).

(2) Mandatory. In the case of a defined benefit plan providing for mandatory employee contributions, the entire accrued benefit is subject to the survivor annuity requirements of sections 401(a)(11) and 417 as a defined benefit plan.

(c) Accumulated DECs. See Q&A 14 of this section for the rule applicable to accumulated deductible employee contributions.

Q-16: Can a plan provide a benefit form more valuable than the QJSA and if a plan offers more than one annuity option satisfying the requirements of a QJSA, is spousal consent required when the participant chooses among the various forms?

A-16: In the case of an unmarried participant, the QJSA may be less valuable than other optional forms of benefit payable under the plan. In the case of married participant, the QJSA must be at least as valuable as any other optional form of benefit payable under the plan at the same time. Thus, if a plan has two joint and survivor annuities that would satisfy the requirements for a QJSA, but one has a greater actuarial value than the other, the more valuable joint and survivor annuity is the QJSA. If there are two or more actuarially equivalent joint and survivor annuities that satisfy the requirements for a QJSA, the plan must designate which one is the QJSA and, therefore, the automatic form of benefit payment. A plan, however, may allow a participant to elect out of such a QJSA, without spousal consent, in favor of another actuarially equivalent joint and survivor annuity that satisfies the QJSA conditions. Such an election is not subject to the requirement that it be made within the 90-day period before the annuity starting date. For example, if a plan designates a joint and 100% survivor annuity as the QJSA and also offers an actuarially equivalent joint and 50% survivor annuity that would satisfy the requirements of a QJSA, the participant may elect the joint and 50% survivor annuity without spousal consent. The participant, however, does need spousal consent to elect a joint and survivor annuity that was not actuarially equivalent to the automatic QJSA.

Q-17: When must distributions to a participant under a QJSA commence?

A-17: (a) QJSA benefits upon earliest retirement. A plan must permit a participant to receive a distribution in the form of a QJSA when the participant attains the earliest retirement age under the plan. Written consent of the participant is required. However, the consent of the participant's spouse is not required. Any payment not in the form of a QJSA is subject to spousal consent. For example, if the participant separates from service under a plan that allows for distributions on separation from service or if a plan allows for in-service distributions, the participant may receive a QJSA without spousal consent in such events. Payments in any other form, including a single sum, would require waiver of the QJSA by the participant's spouse.

(b) Earliest retirement age. (1) This paragraph (b) defines the term "earliest retirement age" for purposes of sections 401(a)(11), 411(a)(11) and 417.

(2) In the case of a plan that provides for voluntary distributions that commence upon the participant's separation from service, earliest retirement age is the earliest age at which a participant could separate from service and receive a distribution. Death of a participant is treated as a separation from service.

(3) In the case of a plan that provides for in-service distributions, earliest retirement age is the earliest age at which such distributions may be made.

(4) In the case of a plan not described in subparagraph (2) or (3) of this paragraph, the rule below applies. Earliest retirement age is the early retirement age determined under the plan, or if no early retirement age, the normal retirement age determined under the plan. If the participant dies or separates from service before such age, then only the participant's actual years of service at the time of the participant's separation from service or death are taken into account. Thus, in the case of a plan under which benefits are not payable until the attainment of age 65, or upon attainment of age 55 and completion of 10 years of service, the earliest retirement age of a participant who died or separated from service with 8 years of service is when the participant whould have attained age 65 (if the participant had survived). On the other hand, if a participant died or separated from service after 10 years of service, the earliest retirement age is when the participant would have attained age 55 (if the participant had survived).

Q-18: What is a qualified preretirement survivor annuity (QPSA) in a defined benefit plan?

A-18: A QPSA is an immediate annuity for the life of the surviving spouse of a participant. Each payment under a QPSA under a defined benefit plan is not to be less than the payment that would have been made to the survivor under the QJSA payable under the plan if (a) in the case of a participant who dies after attaining the earliest retirement age under the plan, the participant had retired with a QJSA on the day before the participant's death, and (b) in the case of a participant who dies on or before the participant's earliest retirement age under the plan, the participant had separated from service at the earlier of the actual time of separation or death, survived until the earliest retirement age, retired at that time with a QJSA, and died on the day thereafter. If the participant elects before the annuity starting date a form of joint and survivor annuity that satisfies the requirements for a QJSA and dies before the annuity starting date, the elected form is treated as the QJAS and the QPSA must be based on such form.

Q-19: What rules apply in determining the amount and forfeitability of a QPSA?

A-19: The QPSA is calculated as of the earliest retirement age if the participant dies before such time, or at death if the participant dies after the earliest retirement age. The plan must make reasonable actuarial adjustments to reflect a payment earlier or later than the earliest retirement age. A defined benefit plan may provide that the QPSA is forfeited if the spouse does not survive until the date prescribed under the plan for commencement of the QPSA (i.e., the earliest retirement age). Similarly, if the spouse survives past the participant's earliest retirement age (or other earlier QPSA distribution date under the plan) and elects after the death of the participant to defer the commencement of the QPSA to a later date, a defined benefit plan may provide for a forfeiture of the QPSA benefit if the spouse does not survive until the deferred commencement date. The account balance in a defined contribution plan may not be forfeited even though the spouse does not survive until the time the account balance is used to purchase the QPSA. See Q&A-17 of this section for the meaning of earliest retirement age.

Q-20: What preretirement survivor annuity benefits must a defined contibution plan subject to the survivor annuity requirements of sections 401(a)(11) and 417 provide?

A-20: A defined contribution plan that is subject to the survivor annuity requirements of sections 401(a)(11) and 417 must provide a preretirement

survivor annuity with a value which is not less than 50 percent of the nonforfeitable account balance of the participant as of the date of the participant's death. If a contributory defined contribution plan has a forfeiture provision permitted by section 411(a)(3)(A), not more than a proportional percent of the account balance attributable to contributions that may not be forfeited at death (for example, employee and section 401(k) contributions) may be used to satisfy the QPSA benefit. Thus, for example, if the QPSA benefit is to be provided from 50 percent of the account balance, not more than 50 percent of the nonforfeitable contributions may be used for the QPSA.

Q-21: May a defined benefit plan charge the participant for the cost of the QPSA benefit?

A-21: Prior to the later of the time the plan allows the participant to waive the QPSA or provides notice of the ability to waive the QPSA, a defined benefit plan may not charge the participant for the cost of the QPSA by reducing the participant's plan benefits or by any other method. The preceding sentence does not apply to any charges prior to the first plan year beginning after December 31, 1988. Once the participant is given the opportunity to waive the QPSA or the notice of the QPSA is later, the plan may charge the participant for the cost of the QPSA. A charge for the QPSA that reasonably reflects the cost of providing the QPSA will not fail to satisfy section 411 even if it reduces the accrued benefit.

Q-22: When must distributions to a surviving spouse under a QPSA commence?

A-22: (a) In the case of a defined benefit plan, the plan must permit the surviving spouse to direct the commencement of payments under QPSA no later than the month in which the participant would have attained the earliest retirement age. However, a plan may permit the commencement of payments at an earlier date.

(b) In the case of a defined contribution plan, the plan must permit the surviving spouse to direct the commencement of payments under the QPSA within a reasonable time after the participant's death.

Q-23: Must a defined benefit plan obtain the consent of a participant and the participant's spouse to commence payments in the form of a QJSA in order to avoid violating section 415 or 411(b)?

A-23: No. A defined benefit plan may commence distributions in the form of a QJSA without the consent of the participant and spouse, even if consent would otherwise be required (see § 1.417(e)-1(b)), to the extent necessary to avoid a violation of section 415 or 411(b). For example, assume a plan has a normal retirement age of 55. A is a married participant, age 55, and has accrued a $75,000 joint and 100 percent survivor annuity that satisfies section 415. If an actuarial increase would be required under section 411 because of deferred commencement and the increase would cause the benefit to exceed the applicable limit under section 415, the plan may commence payment of a QJSA at age 55 without the participant's election or consent and without the spouse's consent.

Q-24: What are the rules under sections 401(a)(11) and 417 applicable to plan loans?

A-24: (a) Consent rules. (1) A plan does not satisfy the survivor annuity requirements of sections 401(a)(11) and 417 unless the plan provides that, at the time the participant's accrued benefit is used as security for a loan, spousal consent to such use is obtained. Consent is required even if the accrued benefit is not the primary security for the loan. No spousal consent is necessary if, at the time the loan is secured, no consent would be required for a distribution under section 417(a)(2)(B). Spousal consent is not required if the plan or the participant is not subject to section 401(a)(11) at the time the accrued benefit is used as security, or if the total accrued benefit subject to the security is not in excess of $3,500. The spousal consent must be obtained no earlier than the beginning of the 90-day period that ends on the date on which the loan is to be so secured. The consent is subject to the requirements of section 417(a)(2). Therefore, the consent must be in writing, must acknowledge the effect of the loan and must be witnessed by a plan representative or a notary public.

(2) Participant consent is deemed obtained at the time the participant agrees to use his accrued benefit as security for a loan for purposes of satisfying the requirements for participant consent under sections 401(a)(11), 411(a)(11) and 417.

(b) Change in status. If spousal consent is obtained or is not required under paragraph (a) of this Q&A 24 at the time the benefits are used as security, spousal consent is not required at the time of any setoff of the loan against the accrued benefit resulting from a default, even if the participant is married to a different spouse at the time of the setoff. Similarly, in the case of a participant who secured a loan while unmarried, no consent is required at the time of a setoff of the loan against the accrued benefit even if the participant is married at the time of the setoff.

(c) Renegotiation. For the purposes of obtaining any required spousal consent, any renegotiation, extension, renewal, or other revision of a loan shall be treated as a new loan made on the date of the renegotiation, extension, renewal, or other revision.

(d) Effect on benefits. For purposes of determining the amount of a QPSA or QJSA, the accrued benefit of a participant shall be reduced by any security interest held by the plan by reason of a loan outstanding to the participant at the time of death or payment, if the security interest is treated as payment in satisfaction of the loan under the plan. A plan may offset any loan outstanding at the participant's death which is secured by the participant's account balance against the spousal benefit required to be paid under section 401(a)(11)(B)(iii).

(e) Effective date. Loans made prior to August 19, 1985, are deemed to satisfy the consent requirements of paragraph (a) of this Q&A 24.

Q-25: How do the survivor annuity requirements of sections 401(a)(11) and 417 apply with respect to participants who are not married or to surviving spouses and participants who have a change in marital status?

A-25: (a) Unmarried participant rule. Plans subject to the survivor annuity requirements of sections 401(a)(11) and 417 must satisfy those requirements applicable to QJSAs with respect to participants who are not married. A QJSA for a participant who is not married is an annuity for the life of the participant. Thus, an unmarried participant must be provided the written explanation described in section 417(a)(3)(A) and a single life annuity unless another form of benefit is elected by the participant. An unmarried participant is deemed to have waived the QPSA requirements. This deemed waiver is null and void if the participant later marries.

(b) Marital status change.—(1) Remarriage. If a participant is married on the date of death, payments to a surviving spouse under a QPSA or QJSA must continue even if the surviving spouse remarries.

(2) One-year rule. (i) A plan is not required to treat a participant as married unless the participant and the participant's spouse have been married throughout the one-year period ending on the earlier of (A) the participant's annuity starting date or (B) the date of the participant's death. Nevertheless, for purposes of the preceding sentence, a participant and the participant's spouse must be treated as married throughout the one-year period ending on the participant's annuity starting date even though they are married to each other for less than one year before the annuity starting date if they remain married to each other for at least one year. See section 417(d)(2). If a plan adopts the one-year rule provided in section 417(d), the plan must treat the participant and spouse who are married on the annuity starting date as married and must provide benefits which are to commence on the annuity starting date in the form of a QJSA unless the participant (with spousal consent) elects another form of benefit. The plan is not required to provide the participant with a new or retroactive election or the spouse with a new consent when the one-year period is satisfied. If the participant and the spouse do not remain married for at least one year, the plan may treat the participant as having not been married on the annuity starting date. In such event, the plan may provide that the spouse loses any survivor benefit right; further, no retroactive correction of the amount paid the participant is required.

(ii) Example. Plan X provides that participants who are married on the annuity starting date for less than one year are treated as unmarried participants. Plan X provides benefits in the form of a QJSA or an optional single sum distribution. Participant A was married 6 months prior to the annuity starting date. Plan X must treat A as married and must commence payments to A in the form of a QJSA unless another form of benefit is elected by A with spousal consent. If a QJSA is paid and A is divorced from his spouse S, within the first year of the marriage, S will no longer have any survivor rights under the annuity (unless a QDRO provides otherwise). If A continues to be married to S, and A dies within the one-year period, Plan X may treat A as unmarried and forfeit the OJSA benefit payable to S.

(3) Divorce. If a participant divorces his spouse prior to the annuity starting date, any elections made while the participant was married to his former spouse remain valid, unless otherwise provided in a QDRO, or unless the participant changes them or is remarried. If a participant dies after the annuity starting date, the spouse to whom the participant was married on the annuity starting date is entitled to the QJSA protection under the plan. The spouse is entitled to this protection (unless waived and consented to by such spouse) even if the participant and spouse are not married on the date of the participant's death, except as provided in a QDRO.

Q-26: In the case of a defined contribution plan not subject to section 412, does the requirement that a participant's nonforfeitable accrued benefit be payable in full to a surviving spouse apply to a spouse who has been married to the participant for less than one year?

A-26: A plan may provide that a spouse who has not been married to a participant throughout

the one-year period ending on the earlier of (a) the participant's annuity starting date or (b) the date of the participant's death is not treated as a surviving spouse and is not required to receive the participant's account balance. The special exception described in section 417(d)(2) and Q&A 25 of this section does not apply.

Q-27: Are there circumstances when spousal consent to a participant's election to waive the QJSA or the QPSA is not required?

A-27: Yes. If it is established to the satisfaction of a plan representative that there is no spouse or that the spouse cannot be located, spousal consent to waive the QJSA or the QPSA is not required. If the spouse is legally incompetnent to give consent, the spouse's legal guardian, even if the guardian is the participant, may give consent. Also, if the participant is legally separated or the participant has been abandoned (within the meaning of local law) and the participant has a court order to such effect, spousal consent is not required unless a QDRO provides otherwise. Similar rules apply to a plan subject to the requirements of section 401(a)(11)(B)(iii)(I).

Q-28: Does consent contained in an antenuptial agreement or similar contract entered into prior to marriage satisfy the consent requirements of sections 401(a)(11) and 417?

A-28: No. An agreement entered into prior to marriage does not satisfy the applicable consent requirements, even if the agreement is executed within the applicable election period.

Q-29: If a participant's spouse consents under section 417(a)(2)(A) to the participant's waiver of a survivor annuity form of benefit, is a subsequent spouse of the same participant bound by the consent?

A-29: No. A consent under section 417(a)(2)(A) by one spouse is binding only with respect to the consenting spouse. See Q&A-24 of this section for an exception in the case of plan benefits securing plan loans.

Q-30: Does the spousal consent requirement of section 417(a)(2)(A) require that a spouse's consent be revocable?

A-30: No. A plan may preclude a spouse from revoking consent once it has been given. Alternatively, a plan may also permit a spouse to revoke a consent after it has been given, and thereby to render ineffective the participant's prior election not to receive a QPSA or QJSA. A participant must always be allowed to change his election during the applicable election period. Spousal consent is required in such cases to the extent provided in Q&A 31, except that spousal consent is never required for a QJSA or QPSA.

Q-31: What rules govern a participant's waiver of a QPSA or QJSA under section 417(a)(2)?

A-31: (a) Specific beneficiary. Both the participant's waivers of a QPSA and QJSA and the spouse's consents thereto must state the specific nonspouse beneficiary (including any class of beneficiaries or any contingent beneficiaries) who will receive the benefit. Thus, for example, if spouse B consents to participant A's election to waive a QPSA, and to have any benefits payable upon A's death before the annuity starting date paid to A's children, A may not subsequently change beneficiaries without the consent of B (except if the change is back to a QPSA). If the designated beneficiary is a trust, A's spouse need only consent to the designation of the trust and need not consent to the designation of trust beneficiaries or any changes of trust beneficiaries.

(b) Optional form of benefit—(1) QJSA. Both the participant's waiver of a QJSA (and any required spouse's consent thereto) must specify the particular optional form of benefit. The participant who has waived a QJSA with the spouse's consent in favor of another form of benefit may not subsequently change the optional form of benefit without obtaining the spouse's consent (except back to a QJSA). Of course, the participant may change the form of benefit if the plan so provides after the spouse's death or a divorce (other than as provided in a QDRO). A participant's waiver of a QJSA (and any required spouse's consent thereto) made prior to the first plan year beginning after December 31, 1986, is not required to specify the optional form of benefit.

(2) QPSA. A participant's waiver of a QPSA and the spouse's consent thereto are not required to specify the optional form of any preretirement benefit. Thus, a participant who waives the QPSA with spousal consent may subsequently change the form of the preretirement benefit, but not the nonspouse beneficiary, without obtaining the spouse's consent.

(3) Change in form. After the participant's death, a beneficiary may change the optional form of survivor benefit as permitted by the plan.

(c) General consent. In lieu of satisfying paragraphs (a) and (b) of this Q&A 31, a plan may permit a spouse to execute a general consent that satisfies the requirements of this paragraph (c). A general consent permits the participant to waive QPSA or QJSA, and change the designated beneficary or the optional form of benefit payment

without any requirement of further consent by such spouse. No general consent is valid unless the general consent acknowledges that the spouse has the right to limit consent to a specific beneficiary and a specific optional form of benefit, where applicable, and that the spouse voluntarily elects to relinquish both of such rights. Notwithstanding the previous sentence, a spouse may execute a general consent that is limited to certain beneficiaries or forms of benefit payment. In such case, paragraphs (a) and (b) of this Q&A 31 shall apply to the extent that the limited general consent is not applicable and this paragraph (c) shall apply to the extent that the limited general consent is applicable. A general consent, including a limited general consent, is not effective unless it is made during the applicable election period. A general consent executed prior to October 22, 1986 does not have to satisfy the specificity requirements of this Q&A 31.

Q-32: What rules govern a participant's waiver of the spousal benefit under section 401(a)(11)(B)?

A-32: (a) Application. In the case of a defined contribution plan that is not subject to the survivor annuity requirements of sections 401(a)(11) and 417, a participant may waive the spousal benefit of section 401(a)(11)(B)(iii) if the conditions of paragraph (b) are satisfied. In general, a spousal benefit is the nonforfeitable account balance on the participant's date of death.

(b) Conditions. In general, the same conditions, other than the age 35 requirement, that apply to the participant's waiver of a QPSA and the spouse's consent thereto apply to the participant's waiver of the spousal benefit and the spouse's consent thereto. See Q&A-31. Thus, the participant's waiver of the spousal benefit must state the specific nonspouse beneficiary who will receive such benefit. The waiver is not required to specify the optional form of benefit. The participant may change the optional form of benefit, but not the nonspouse beneficiary, without obtaining the spouse's consent.

Q-33: When and in what manner, may a participant waive a spousal benefit or a QPSA?

A-33: (a) Plans not subject to section 401(a)(11). A participant in a plan that is not subject to the survivor annuity requirements of section 401(a)(11) (because of subparagraph (B)(iii) thereof) may waive the spousal benefit at any time, provided that no such waiver shall be effective unless the spouse has consented to the waiver. The spouse may consent to a waiver of the spousal benefit at any time, even prior to the participant attaining age 35. No spousal consent is required for a payment to the participant or the use of the accrued benefit as security for a plan loan to the participant.

(b) Plans subject to section 401(a)(11). A participant in a plan subject to the survivor annuity requirements of section 401(a)(11) generally may waive the QPSA benefit (with spousal consent) only on or after the first day of the plan year in which the participant attains age 35. However, a plan may provide for an earlier waiver (with spousal consent), provided that a written explanation of the QPSA is given to the participant and such waiver becomes invalid upon the beginning of the plan year in which the participant's 35th birthday occurs. If there is no new waiver after such date, the participant's spouse must receive the QPSA benefit upon the participant's death.

Q-34: Must the written explanations required by section 417(a)(3) be provided to nonvested participants?

A-34: Such written explantions must be provided to nonvested participants who are employed by an employer maintaining the plan. Thus, they are not required to be provided to those nonvested participants who are no longer employed by such an employer.

Q-35: When must a plan provide the written explanation, required by section 417(a)(3)(B), of the QPSA to a participant?

A-35: (a) General rule. A plan must provide the written explanation of the QPSA to a participant within the applicable period. Except as provided in paragraph (b), the applicable period means, with respect to a participant, whichever of the following periods ends last:

(1) The period beginning with the first day of the plan year in which the participant attains age 32 and ending with the close of the plan year preceding the plan year in which the participant attains age 35.

(2) A reasonable period ending after the individual becomes a participant.

(3) A reasonable period ending after the QPSA is no longer fully subsidized.

(4) A reasonable period ending after section 401(a)(11) first applies to the participant. Section 401(a)(11) would first apply when a benefit is transferred from a plan not subject to the survivor annuity requirements of section 401(a)(11) to a plan subject to such section or at the time of a election of an annuity under a defined contribution plan described in section 401(a)(11)(B)(iii).

(b) Pre-35 separations. In the case of a participant who separates from service before attaining age 35, the applicable period means the period beginning one year before the separation from service and ending one year after such separation. If such a participant returns to service, the plan must also comply with paragraph (a).

(c) Reasonable period. For purposes of applying paragraph (a), a reasonable period ending after the enumerated events described in paragraphs (a) (2), (3) and (4) is the end of the one-year period beginning with the date the applicable event occurs. The applicable period for such events begins one year prior to the occurrence of the enumerated events.

(d) Transition rule. In the case of an individual who was a participant in the plan on August 23, 1984, and, as of that date had attained age 34, the plan will satisfy the requirement of section 417(a)(3)(B) if it provided the explanation not later than December 31, 1985.

Q-36: How do plans satisfy the requirements of providing participants explanations of QPSAs and QJSAs?

A-36: Section 417(a)(3) sets forth the requirements for providing plan participants written explanations of QPSAs and QJSAs. The requirement that the terms and conditions of the QJSA or QPSA, as the case may be, be furnished to participants is not satisfied unless the written explanation complies with the requirements set forth in § 1.401(a)-11(c)(3). Also, for plan years beginning after December 31, 1988, participants must be furnished a general description of the eligibility conditions and other material features of the optional forms of benefit and sufficient additional information to explain the relative values of the optional forms of benefit available under the plan (e.g., the extent to which optional forms are subsidized relative to the normal form of benefit or the interest rates used to calculate the optional forms).

Q-37: What are the consequences of fully subsidizing the cost of either a QJSA or a QPSA in accordance with section 417(a)(5)?

A-37: If a plan fully subsidizes a QJSA or QPSA in accordance with section 417(a)(5) and does not allow a participant to waive such QJSA or QPSA or to select a nonspouse beneficiary, the plan is not required to provide the written explanation required by section 417(a)(3). However, if the plan offers an election to waive the benefit or designate a beneficiary, it must satisfy the election, consent, and notice requirements of section 417(a) (1), (2), and (3), with respect to such subsidized QJSA or QPSA, in accordance with section 417(a)(5).

Q-38: What is a fully subsidized benefit?

A-38: (a) QJSA—(1) General rule. A fully subsidized QJSA is one under which no increase in cost to, or decrease in actual amounts received by, the participant may result from the participant's failure to elect another form of benefit.

(2) Examples.

Example (1). If a plan provides a joint and survivor annuity and a single sum option, the plan does not fully subsidize the joint and survivor annuity, regardless of the actuarial value of the joint and survivor annuity because, in the event of the participant's early death, the participant would have received less under the annuity than he would have received under the single sum option.

Example (2). If a plan provides for a life annuity of $100 per month and a joint and 100% survivor benefit of $99 per month, the plan does not fully subsidize the joint and survivor benefit.

(b) QPSA. A QPSA is fully subsidized if the amount of the participant's benefit is not reduced because of the QPSA coverage and if no charge to the participant under the plan is made for the coverage. Thus, a QPSA is fully subsidized in a defined contribution plan.

Q-39: When do the survivor annuity requirements of sections 401(a)(11) and 417 apply to plans?

A-39: Sections 401(a)(11) and 417 generally apply to plan years beginning after December 31, 1984. Sections 302 and 303 of REA 1984 provide specific effective dates and transitional rules under which the QJSA or QPSA (or pre-REA 1984 section 401(a)(11)) requirements may be applicable to particular plans or with respect to benefits provided to (as amended by REA 1984) particular participants. In general, the section 401(a)(11) (as amended by REA 1984) survivor annuity requirements do not apply with respect to a participant who does not have at least one hour of service or one hour of paid leave under the plan after August 22, 1984.

Q-40: Are there special effective dates for plans maintained pursuant to collective bargaining agreements?

A-40: Yes. Section 302(b) of REA 1984 as amended by section 1898(g) of the Tax Reform Act of 1986 provides a special deferred effective date for such plans. Whether a plan is described in section 302(b) of REA 1984 is determined under the principles applied under section 1017(c) of the Employee Retirement Income Security Act of 1974. See H.R. Rep. No. 1280, 93d Cong., 2d Sess. 266 (1974). In addition, a plan will not be treated as maintained under a collective bargaining

agreement unless the employee representatives satisfy section 7701(a)(46) of the Internal Revenue Code after March 31, 1984. See § 301.7701-17T for other requirements for a plan to be considered to be collectively bargained. Nothing in section 302(b) of REA 1984 denies a participant or spouse the rights set forth in sections 303(c)(2), 303(c)(3), 303(e)(1), and 303(e)(2) of REA 1984.

Q-41: What is one hour of service or paid leave under the plan for purposes of the transition rules in section 303 of REA 1984?

A-41: One hour of service or paid leave under the plan is one hour of service or paid leave recognized or required to be recognized under the plan for any purpose, e.g., participation, vesting percentage, or benefit accrual purposes. For plans that do not compute hours of service, one hour of service or paid leave means any service or paid leave recognized or required to be recognized under the plan for any purpose.

Q-42: Must a plan be amended to provide for the QPSA required by section 303(c)(2) of REA 1984, or for the survivor annuities required by section 303(e) of REA 1984?

A-42: A plan will not fail to satisfy the qualification requirements of section 401(a) or 403(a) merely because it is not amended to provide the QPSA required by section 303(c)(2) or the survivor annuities required by section 303(e). The plan must, however, satisfy those requirements in operation.

Q-43: Is a participant's election, or a spouse's consent to an election, with respect to a QPSA, made before August 23, 1984, valid?

A-43: No.

Q-44: Is spousal consent required for certain survivor annuity elections made by the participant after December 31, 1984, and before the first plan year to which new sections 401(a)(11) and 417 apply?

A-44: Yes. Section 303(c)(3) of REA 1984 provides that any election not to take a QJSA made after December 31, 1984, and before the date sections 401(a)(11) and 417 apply to the plan by a participant who has 1 hour of service or leave under the plan after August 23, 1984, is not effective unless the spousal consent requirements of section 417 are met with respect to such election. Unless the participant's annuity starting date occurred before January 1, 1985, the spousal consent required by section 417 (a)(2) and (e) must be obtained even though the participant elected the benefit prior to January 1, 1985. The plan is not required to be amended to comply with section 303(c)(3) of REA 1984, but the plan must satisfy this requirement in operation.

Q-45: Are there special rules for certain participants who separated from service prior to August 23, 1984?

A-45: Yes. Section 303(e) of REA 1984 provides special rules for certain participants who separated from service before August 23, 1984. Section 303(e)(1), which applies only to plans subject to section 401(a)(11) of the Code (as in effect on August 22, 1984), provides that participants whose annuity starting date did not occur before August 24, 1984, and who had one hour of service on or after September 2, 1974, but not in a plan year beginning after December 31, 1975, may elect to receive the benefits required to be provided under section 401(a)(11) of the Code (as in effect on August 22, 1984). Section 303(e)(2) provides that certain participants who had one hour of service in a plan year beginning on or after January 1, 1976, but not after August 22, 1984, may elect QPSA coverage under new sections 401(a)(11) and 417 in plans subject to these provisions. Section 303(e)(4)(A) requires plans or plan administrators to notify those participants of the provisions of section 303(e).

Q-46: When must a plan provide the notice required by section 303(e)(4)(A) of REA 1984?

A-46: The notice required by section 303(e)(4)(A) must be provided no later than the earlier of:

(a) The date the first summary annual report provided after September 17, 1985, is distributed to participants; or

(b) September 30, 1985.

A plan will not fail to satisfy the preceding sentence if the plan provides a fully subsidized QPSA with respect to any participant described in section 303(e) who dies on or after July 19, 1985, and before the notice is received. If the plan ceases to fully subsidize the QPSA, the cessation must not be effective until the notice is given. For this purpose, an annuity payable to a nonspouse beneficiary elected by the participant, in lieu of a spouse, shall satisfy the QPSA requirement, so long as the survivor benefit is fully subsidized. The notice required by this paragraph must be in writing and sent to the participant's last known address.

Q-47: Is there another time when plans must provide notice of the right, described in section 303(e)(1) of REA '84, to elect a pre-REA 1984 qualified joint and survivor annuity?

A-47: Yes. Notice of this right must also be provided to a participant at the time the participant applies for benefit payments.

[T.D. 8219, 53 FR 31842, Aug. 22, 1988]

§ 1.401(a)–50 Puerto Rican trusts; election to be treated as a domestic trust.

(a) In general. Section 401(a) requires, among other things, that a trust forming part of a pension, profit-sharing, or stock bonus plan must be created or organized in the United States to be a qualified trust. Section 1022(i)(2) of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 942) provides that trusts under certain pension, etc., plans created or organized in Puerto Rico whose administrators have made the election referred to in section 1022(i)(2) are to be treated as trusts created or organized in the United States for purposes of section 401(a). Thus, if a plan otherwise satisfies the qualification requirements of section 401(a), any trust forming part of the plan for which an election is made will be treated as a qualified trust under that section.

(b) Manner and effect of election. A plan administrator may make an election under ERISA section 1022(i)(2) by filing a statement making the election, along with a copy of the plan, with the Director's Representative of the Internal Revenue Service in Puerto Rico. The statement making the election must indicate that it is being made under ERISA section 1022(i)(2). The statement may also be filed in conjunction with a written request for a determination letter. If the election is made with a written request for a determination letter, the election may be conditioned upon issuance of a favorable determination letter and will be irrevocable upon issuance of such letter. Otherwise, once made, an election is irrevocable. It is generally effective for plan years beginning after the date it has been made. However, an election made before March 3, 1983 may, at the option of the plan administrator at the time he or she makes the election, be considered to have been made on any date between September 2, 1974, and the actual date of the election. The election will then be effective for plan years beginning on or after the date chosen by the plan administrator.

(c) Annuities, custodial accounts, etc. See section 401(f) for rules relating to the treatment of certain annuities, custodial accounts or other contracts, as trusts for purposes of section 401(a).

(d) Source of plan distributions to participants and beneficiaries residing outside the United States. Except as provided under section 871(f) (relating to amounts received as an annuity by nonresident aliens), the amount of a distribution from an electing plan that is to be treated as income from sources within the United States is determined as described below. The portion of the distribution considered to be a return of employer contributions is to be treated as income from sources within the United States in an amount equal to the portion of the distribution considered to be a return of employer contributions multiplied by the following fraction:

$$\frac{\text{Days of performance of labor or services within the United States for the employer.}}{\text{Total days of performance of labor or services for the employer.}}$$

The days of performance of labor or services within the United States shall not include the time period for which the employee's compensation is deemed not to be income from sources within the United States under subtitle A of the Code. Thus, for example, if an employee's compensation was not deemed to be income from sources within the United States under section 861(a)(3), then the time the employee was present in the United States while such compensation was earned would not be included in determining the days of performance of labor or services within the United States in the numerator of the above fraction. In addition, days of performance of labor or services for the employer in both the numerator and denominator of the above fraction are limited to days of plan participation by the employee and any service used for determining an employee's accrued benefit under the plan. The remaining portion of the distribution, that is, any amount other than the portion of the distribution considered to be a return of employer contributions, is not to be treated as income from sources within the United States. For example, if a distribution consists of amounts representing employer contributions, employee contributions, and earnings on employer and employee contributions, no part of the portion of the distribution attributable to employee contributions, or earnings on employer and employee contributions, will be treated as income from sources within the United States.

[T.D. 7859, 47 FR 54297, Dec. 2, 1982]

§ 1.401(b)–1 Certain retroactive changes in plan.

(a) General rule. Under section 401(b) a stock bonus, pension, profit-sharing, annuity, or bond purchase plan which does not satisfy the requirements of section 401(a) on any day solely as a result of a disqualifying provision (as defined in paragraph (b) of this section) shall be considered

to have satisfied such requirements on such date if, on or before the last day of the remedial amendment period (as determined under paragraphs (c), (d) and (e) of this section) with respect to such disqualifying provision, all provisions of the plan which are necessary to satisfy all requirements of sections 401(a), 403(a), or 405(a) are in effect and have been made effective for all purposes for the whole of such period. Under some facts and circumstances, it may not be possible to amend a plan retroactively so that all provisions of the plan which are necessary to satisfy the requirements of section 401(a) are in fact made effective for the whole remedial amendment period. If it is not possible, the requirements of this section will not be satisfied even if the employer adopts a retroactive plan amendment which, in form, appears to satisfy such requirements. Section 401(b) does not permit a plan to be made retroactively effective, for qualification purposes, for a taxable year prior to the taxable year of the employer in which the plan was adopted by such employer.

(b) Disqualifying provisions. For purposes of this section, with respect to a plan described in paragraph (a) of this section, the term "disqualifying provision" means:

(1) A provision of a new plan, the absence of a provision from a new plan, or an amendment to an existing plan, which causes such plan to fail to satisfy the requirements of the Code applicable to qualification of such plan as of the date such plan or amendment is first made effective or

(2) A plan provision which results in the failure of the plan to satisfy the qualification requirements of the Code by reason of a change in such requirements—

(i) Effected by the Employee Retirement Income Security Act of 1974 (Pub. L. 93-406, 88 Stat. 829), hereafter referred to as "ERISA," or the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97-248, 96 Stat. 324), hereafter referred to as "TEFRA," or

(ii) Effective before the first day of the first plan year beginning after December 31, 1989 and that is effected by the Tax Reform Act of 1986 (Pub. L. 99-514, 100 Stat. 2085, 2489), hereafter referred to as "TRA '86," the Omnibus Budget Reconciliation Act of 1986, (Pub. L. 99-509, 100 Stat. 1874), hereafter referred to as "OBRA '86," or the Omnibus Budget Reconciliation Act of 1987 (Pub. L. 100-203, 101 Stat. 1330), hereafter referred to as "OBRA '87." For purposes of this paragraph (b)(2)(ii), a disqualifying provision includes any plan provision that is integral to a qualification requirement changed by TRA '86, OBRA '86, or OBRA '87 or any requirement treated by the Commissioner, directly or indirectly, as if section 1140 of TRA '86 applied to it, but only to the extent such provision is effective before the first day of the first plan year beginning after December 31, 1989. With respect to disqualifying provisions described in this paragraph (b)(2)(ii) effective before the first day of the first plan year which begins after December 31, 1988, there must be compliance with the conditions of section 1140 of TRA '86 (other than the requirement that the plan amendment be made on or before the last day of the first plan year beginning after December 31, 1988), including operation in accordance with the plan provision as of its effective date with respect to the plan.

(iii) Effected by amendments to the Code that are designated by the Commissioner, at his discretion, as disqualifying provisions described in this paragraph (b)(2). For purposes of this paragraph (b)(2), a disqualifying provision includes the absence from a plan of a provision required by such change if the plan was in effect on the date such change became effective with respect to such plan.

(c) Remedial amendment period. **(1)** The remedial amendment period with respect to a disqualifying provision begins:

(i) In the case of a provision of, or absence of a provision from, a new plan, described in paragraph (b)(1) of this section, the date the plan is put into effect,

(ii) In the case of an amendment to an existing plan, described in paragraph (b)(1) of this section, the date the plan amendment is adopted or put into effect (whichever is earlier), or

(iii) In the case of a disqualifying provision described in paragraph (b)(2) of this section, the date on which the change effected by ERISA, TEFRA, TRA '86, OBRA '86, OBRA '87, or a qualification requirement that is treated, directly or indirectly, as subject to the conditions of section 1140 of TRA '86 described in paragraph (b)(2) of this section, became effective with respect to such plan or, in the case of a provision, described in paragraph (b)(2)(ii) of this section, that is integral to such qualification requirement, the first day on which the plan was operated in accordance with such provision.

(2) Unless further extended as provided by paragraph (d) of this section, the remedial amendment period ends with the latest of:

(i) In the case of a plan maintained by one employer, the time prescribed by law, including extensions, for filing the income tax return (or partnership return of income) of the employer for the employer's taxable year in which falls the latest of:

(A) The date on which the remedial amendment period begins.

(B) The date on which a plan amendment described in paragraph (b)(1) of this section is adopted, or

(C) The date on which a plan amendment described in paragraph (b)(1) of this section is made effective,

(ii) In the case of a plan maintained by one employer, the last day of the plan year within which falls the latest of:

(A) The date on which the remedial amendment period begins,

(B) The date on which a plan amendment described in paragraph (b)(1) of this section is adopted, or

(C) The date on which a plan amendment described in paragraph (b)(1) of this section is made effective,

(iii) In the case of a plan maintained by more than one employer, the last day of the tenth month following the last day of the plan year in which falls the latest of:

(A) The date on which the remedial amendment period begins,

(B) The date on which a plan amendment described in paragraph (b)(1) of this section is adopted, or

(C) The date of which a plan amendment described in paragraph (b)(1) of this section is made effective, or

(iv) December 31, 1976, but only in the case of a plan to which section 411 (relating to minimum vesting standards) applies without regard to section 411(e)(2), and only in the case of a remedial amendment period which began on or after September 2, 1974.

For purposes of paragraphs (c)(2)(i), (c)(2)(ii), and (c)(2)(iii) of this section, for any disqualifying provision described in paragraph (b)(2)(ii) of this section, the remedial amendment period shall be deemed to have begun with the first day of the first plan year which begins after December 31, 1988. For purposes of this paragraph (c)(2) of this section, a master or prototype plan shall not be considered to be a plan maintained by more than one employer, and whether or not a plan is maintained by more than one employer, shall be determined without regard to section 414 (b) and (c) except that if a plan is maintained solely by an affiliated group of corporations (within the meaning of section 1504) which files a consolidated income tax return pursuant to section 1501 for a taxable year within which falls the latest of the dates described in paragraph (c)(2)(i) of this section, such plan shall be deemed to be maintained by one employer.

(d) Extensions of remedial amendment period—(1) Opinion letter request by sponsoring organization of master or prototype plan. In the case of an employer who has adopted a master or prototype plan, a remedial amendment period that began on or after September 2, 1974, shall not end prior to the later of:

(i) June 30, 1977, or

(ii) The last day of the month that is six months after the month in which:

(A) The opinion letter with respect to the request of the sponsoring organization is issued by the Internal Revenue Service,

(B) Such request is withdrawn, or

(C) Such request is otherwise disposed of by the Internal Revenue Service. The rules contained in this subparagraph apply only if the sponsoring organization of such master or prototype plan has, after September 2, 1974, and on or before December 31, 1976, filed a request for an opinion letter with respect to the initial or continuing qualification of the plan (or a trust which is part of the plan). The provisions of this paragraph (d)(1) apply to a master or prototype plan adopted to replace another plan even though the remedial amendment period applicable to the replaced plan has expired at the time of adoption of the replacement plan.

(2) Notification letter request by law firm sponsor of district-approved plan. In the case of an employer who has adopted a pattern plan, a remedial amendment period that began on or after September 2, 1974, shall not end prior to the later of:

(i) June 30, 1977, or

(ii) The last day of the month that is six months after the month in which:

(A) The notification letter with respect to the request of the sponsoring law firm is issued by the Internal Revenue Service,

(B) Such request is withdrawn, or

(C) Such request is otherwise disposed of by the Internal Revenue Service. The rules contained in this subparagraph shall apply only if the sponsoring law firm of such pattern plan has, on or before December 31, 1976, filed a request for a notification letter with the Internal Revenue Service with respect to the initial or continuing qualification of the plan (or a trust which is part of the plan). The provisions of this paragraph (d)(2) apply to a pattern plan adopted to replace another plan even though the remedial amendment period applicable to the replaced plan has expired at the time of the adoption of the replacement plan.

(3) Determination letter request by employer or plan administrator. If on or before the end of a remedial amendment period determined without regard to this paragraph (d), or in a case to which paragraph (d)(1) or (2) of this section applies, on or before the 90th day following the later of the dates described in paragraph (d)(1) or (2) of this section, the employer or plan administrator files a request pursuant to § 601.201(s) of this chapter (Statement of Procedural Rules) for a determination letter with respect to the initial or continuing qualification of the plan, or a trust which is part of such plan, such remedial amendment period shall be extended until the expiration of 91 days after:

(i) The date on which notice of the final determination with respect to such request for a determination letter is issued by the Internal Revenue Service, such request is withdrawn, or such request is otherwise finally disposed of by the Internal Revenue Service, or

(ii) If a petition is timely filed with the United States Tax Court for a declaratory judgment under section 7476 with respect to the final determination (or the failure of the Internal Revenue Service to make a final determination) in response to such request, the date on which the decision of the United States Tax Court in such proceeding becomes final.

(4) Transitional rule. In the case of a request for a determination letter described in and filed within the time prescribed in paragraph (d)(3) of this section with respect to which a final determination is issued by the Internal Revenue Service on or before September 28, 1976 the remedial amendment period described in paragraph (c) of this section shall not end prior to the expiration of 150 days beginning on the date of such final determination by the Internal Revenue Service.

(5) Disqualifying provision prior to September 2, 1974. If the remedial amendment period with respect to a disqualifying provision described in paragraph (b)(1) of this section began prior to September 2, 1974, and the provisions of subdivisions (i), (ii) and (iii) of this subparagraph are satisfied, the remedial amendment period described in paragraph (c) shall not end prior to December 31, 1976. This subparagraph shall apply only if—

(i) A request pursuant to § 601.201 of this chapter for a determination letter with respect to the initial or continuing qualification of the plan (or a trust which is part of the plan) was filed not later than the later of:

(A) The time prescribed by law, including extensions, for filing the income tax return (or partnership return of income) of the employer for the employer's taxable year in which falls the date on which the remedial amendment period began, or

(B) The date 6 months after the close of such taxable year,

(ii) The employer, either:

(A) While such request for a determination letter is or was under consideration by the Internal Revenue Service or,

(B) Promptly after the date on which notice of the final determination with respect to such request for a determination letter is issued by the Internal Revenue Service, such request is withdrawn, or such request is otherwise finally disposed of by the Internal Revenue Service, adopts or adopted either a plan amendment retroactive to the date on which the remedial amendment period began, or a prospective plan amendment, and

(iii) The amendment described in paragraph (d)(5)(ii) of this section would have resulted in the plan's satisfying the requirements of section 401(a) of the Code from the beginning of the remedial amendment period to the date such amendment was made if this section had been in effect during such period, and in the case of a prospective amendment, if such amendment had been made retroactive to such beginning date.

(e) **Discretionary extensions.** At his discretion, the Commissioner may extend the remedial amendment period or may allow a particular plan to be amended after the expiration of its remedial amendment period and any applicable extension of such period. In determining whether such an

extension will be granted, the Commissioner shall consider, among other factors, whether substantial hardship to the employer would result if such an extension were not granted, whether such an extension is in the best interest of plan participants, and whether the granting of the extension is adverse to the interests of the Government. The mere absence of final regulations with respect to issues covered under the Special Reliance Procedure announced by the Internal Revenue Service in Technical Information Release 1416 on November 5, 1975, and as extended by Internal Revenue Service News Release IR–1616 on May 14, 1976, shall not be deemed to satisfy the criteria of this paragraph. With regard to a particular plan, a request for extension of time pursuant to this paragraph shall be submitted prior to the expiration of the remedial amendment period determined without regard to this paragraph, or within such time thereafter as the Internal Revenue Service may consider reasonable under the circumstances. The request should be submitted to the appropriate District Director, determined under § 601.201(s)(3)(xii) of this chapter (Statement of Procedural Rules). This subparagraph applies to disqualifying provisions that were adopted or became effective prior to September 2, 1974, as well as disqualifying provisions adopted or made effective on or after September 2, 1974.

[T.D. 7437, 41 FR 42653, Sept. 28, 1976, as amended by T.D. 7896, 48 FR 23817, May 27, 1983; T.D. 7997, 49 FR 50645, Dec. 31, 1984; T.D. 8217, 53 FR 29662, Aug. 8, 1988]

§ 1.401(e)–1 Definitions relating to plans covering self-employed individuals.

(a) "Keogh" or "H.R. 10" plans, in general—(1) Introduction and organization of regulations. Certain self-employed individuals may be covered by a qualified pension, annuity, or profit-sharing plan. This section contains definitions contained in section 401(c) relating to plans covering self-employed individuals and is applicable to employer taxable years beginning after December 31, 1975, unless otherwise specified.

The provisions of section 401(a) relating to qualification requirements which are generally applicable to all qualified plans, and other provisions relating to the special rules under section 401(b), (f), (g), (h), and (i), are also generally applicable to any plan covering a self-employed individual. However, in addition to such requirements and special rules, any plan covering a self-employed individual is subject to the rules contained in §§ 1.401(e)–2, (e)–5, and (j)–1 through (j)–5. Section 1.401(e)–2 contains general rules, § 1.401(e)–5 contains a special rule limiting the contribution and benefit base to the first $100,000 of annual compensation, and § 1.401 (j)–1 through (j)–5 contains special rules for defined benefit plans. Section 1.401(e)–3 contains special rules which are applicable to plans covering self-employed individuals when one or more of such individuals is an owner-employee within the meaning of section 401(c)(3). Section 1.401(e)–4 contains rules relating to contributions on behalf of owner-employees for premiums on annuity, etc., contracts and a transitional rule for certain excess contributions made on behalf of owner-employees for employer taxable years beginning before January 1, 1976. The provisions of this section and of §§ 1.401(e)–2 through 1.401(e)–5 are applicable to employer taxable years beginning after December 31, 1975, unless otherwise specified.

(2) [Reserved]

[T.D. 7636, 44 FR 47053, Aug. 10, 1979]

§ 1.401(e)–2 General rules relating to plans covering self-employed individuals.

(a) "Keogh" or "H.R. 10" plans; introduction and organization of regulations. This section provides certain rules which supplement, and modify, the qualification requirements of section 401(a) and the special rules provided by § 1.401(b)–1 and other special rules under subsections (f), (g), (h), and (i) of section 401 in the case of a qualified pension, annuity, or profit-sharing plan which covers a self-employed individual who is an employee within the meaning of section 401(c)(1). Section 1.401(e)–1(a)(1) sets forth other provisions which also supplement, and modify, these requirements and special rules in the case of a plan described in this section. The provisions of this section apply to employer taxable years beginning after December 31, 1975, unless otherwise specified.

(b) [Reserved]

[T.D. 7636, 44 FR 47053, Aug. 10, 1979]

§ 1.401(e)–3 Requirements for qualification of trusts and plans benefiting owner-employees.

(a) "Keogh" or "H.R. 10" plans covering owner-employees; introduction and organization of regulations. This section prescribes the additional requirements which must be met for qualification of a trust forming part of a pension or profit-sharing plan, or of an annuity plan, which covers any self-employed individual who is an owner-employee as defined in section 401(c)(3). These additional requirements are prescribed in section 401(d)

and are made applicable to such a trust by section 401(a)(10)(B) and to an annuity plan by section 404(a)(2). However, to the extent that the provisions of §§ 1.401(e)–1 and 1.401(e)–2 are not modified by the provisions of this section such provisions are also applicable to a plan which covers an owner-employee. The provisions of this section apply to taxable years beginning after December 31, 1975, unless otherwise specified.

(b) [Reserved]

[T.D. 7636, 44 FR 47053, Aug. 10, 1979]

§ 1.401(e)–4 Contributions for premiums on annuity, etc., contracts and transitional rule for certain excess contributions.

(a) In general. The provisions of this section prescribe the rules specified in section 401(e) relating to certain contributions made under a qualified pension, annuity, or profit-sharing plan on behalf of a self-employed individual who is an owner-employee (as defined in section 401(c)(3) and the regulations thereunder) in taxable years of the employer beginning after December 31, 1975. In addition, such plans are also subject to the limitations on contributions and benefits under section 415 for years beginning after December 31, 1975. However, the defined contribution compensation limitation described in section 415(c)(1)(B) will not apply to any contribution described in this section provided that the requirements specified in section 415(c)(7) and § 1.415–6(h) are satisfied. Solely for the purpose of applying section 4972(b) (relating to excise tax on excess contributions for self-employed individuals) to other contributions made by an owner-employee as an employee, the amount of any employer contribution which is not deductible under section 404 for the employer's taxable year but which is described in section 401(e) and this section shall be taken into account as a contribution made by such owner-employee as an employee during the taxable year of his employer in which such contribution is made.

(b) Contributions described in section 401(e)—(1) An employer contribution on behalf of an owner-employee is described in section 401(e), if—

(i) Under the provisions of the plan, the contribution is expressly required to be applied (either directly or through a trustee) to pay the premiums or other consideration for one or more annuity, endowment, or life insurance contracts on the life of the owner-employee.

(ii) The employer contributions so applied meet the requirements of subparagraphs (2) through (5) of this paragraph.

(iii) The amount of the contribution exceeds the amount deductible under section 404 with respect to contributions made by the employer on behalf of the owner-employee under the plan, and

(iv) The total employer contributions required to be applied annually to pay premiums on behalf of any owner-employee for contracts described in this paragraph do not exceed $7,500. For purposes of computing such $7,500 limit, the total employer contributions include amounts which are allocable to the purchase of life, accident, health, or other insurance.

(2)(i) The employer contributions must be paid under a plan which satisfies all the requirements for qualification. Accordingly, for example, contributions can be paid under the plan for life insurance protection only to the extent otherwise permitted under sections 401 through 404 and the regulations thereunder. However, certain of the requirements for qualification are modified with respect to a plan described in this paragraph (see section 401(a)(10)(A)(ii) and (d)(5)).

(ii) A plan described in this paragraph is not disqualified merely because a contribution is made on behalf of an owner-employee by his employer during a taxable year of the employer for which the owner-employee has no earned income. On the other hand, a plan will fail to qualify if a contribution is made on behalf of an owner-employee which results in the discrimination prohibited by section 401(a)(4) as modified by section 401(a)(10)(A)(ii).

(3) The employer contributions must be applied to pay premiums or other consideration for a contract issued on the life of the owner-employee. For purposes of this subparagraph, a contract is not issued on the life of an owner-employee unless all the proceeds which are, or may become, payable under the contract are payable directly, or through a trustee of a trust described in section 401(a) and exempt from tax under section 501(a), to the owner-employee or to the beneficiary named in the contract or under the plan. For example, a nontransferable face-amount certificate described in section 401(g) and the regulations thereunder is considered an annuity on the life of the owner-employee if the proceeds of such contract are payable only to the owner-employee or his beneficiary.

(4)(i) For any taxable year of the employer, the amount of contributions by the employer on behalf of the owner-employee which is applied to pay premiums under the contracts described in this paragraph must not exceed the average of the

amounts deductible under section 404 by such employer on behalf of such owner-employee for the most recent three taxable years of the employer which are described in the succeeding sentence. The three employer taxable years described in the preceding sentence must be years, ending prior to the date the latest contract was entered into or modified to provide additional, benefits, in which the owner-employee derived earned income from the trade or business with respect to which the plan is established. However, if such owner-employee has not derived earned income for at least three taxable years preceding such date, then, in determining the "average of the amounts deductible", only so many of such taxable years as such owner-employee was engaged in such trade or business and derived earned income therefrom are taken into account.

(ii) For the purpose of making the computation described in subdivision (i) of this subparagraph, the taxable years taken into account include those years in which the individual derived earned income from the trade or business but was not an owner-employee with respect to such trade or business. Furthermore, taxable years of the employer preceding the taxable year in which a qualified plan is established are taken into account.

(iii) For purposes of making the computations described in subdivisions (i) and (ii) of this subparagraph for any taxable year of the employer the average of the amounts deductible under section 404 by the employer on behalf of an owner-employee for the most recent three relevant taxable years of the employer shall be determined as if section 404, as in effect for the taxable year for which the computation is to be made, had been in effect for all three such years.

(5) For any taxable year of an employer in which contributions are made on behalf of an individual as an owner-employee under more than one plan, the amount of contributions described in this section by the employer on behalf of such an owner-employee under all such plans must not exceed $7,500.

(c) Transitional rule for excess contributions—(1)(i) The rules of this paragraph are inapplicable to a plan which was not in existence for any taxable year of an employer which begins before January 1, 1976. For taxable years of an employer which begin before January 1, 1976, the rules with respect to excess contributions on behalf of owner-employees set forth in section 401(d)(5) and (8) and in section 401(e), as these sections were in effect on September 1, 1974, prior to their amendment by section 2001(e) of the Employee Retirement Income Security Act of 1974 (hereinafter in this paragraph referred to as the "Act") (88 Stat. 954), shall apply except as provided by subparagraph (2) of this paragraph. Section 1.401–13 generally provides the rules for excess contributions on behalf of owner-employees set forth in these sections.

(ii) Notwithstanding the provisions of subdivision (i) of this subparagraph, the rules set forth in such subsections (d)(5) and (8) and (e) of section 401 with respect to excess contributions for such taxable years beginning before January 1, 1976, apply even though the application of those rules affects a subsequent taxable year. Thus, for example, if, in 1975, a nonwillful excess contribution described in section 401(e)(1) (prior to such amendment) is made on behalf of an owner-employee, the plan will not be qualified unless the provisions required by subparagraphs (A) and (B) of such 401(d)(8) are contained in the plan and made applicable to excess contributions made for such taxable years beginning before January 1, 1976. In such case, the effect of such contribution on the plan, the employer, and the owner-employee would be determined under paragraph (2) of section 401(e), as in effect on September 1, 1974. By reason of section 401(e)(2)(F), as in effect on September 1, 1974, the period for assessing any deficiency by reason of the excess contribution will not expire until the expiration of the 6-month period described in section 401(e)(2)(C), as in effect on September 1, 1974, even if the first day of such 6-month period falls in a taxable year beginning after December 31, 1975. For the rules applicable to a willful excess contribution, which generally divide an owner-employee's interest in a plan into two parts on the basis of employer taxable years beginning before and after December 31, 1975, see § 1.72–17A(e)(2)(v). In the case of a willful excess contribution, the rule specified in section 401(e)(2)(E)(iii), as in effect on September 1, 1974, shall not apply to any taxable year of an employer beginning on or after January 1, 1976. Thus, for example, if a willful excess contribution was made to a plan on behalf of an owner-employee with respect to his employer's taxable year beginning January 1, 1975, the plan would not meet, for purposes of section 404, the requirements of section 401(d) with respect to that owner-employee for such year, but the 5 taxable years following such year would be unaffected because those years begin on or after January 1, 1976.

(2)(i) For purposes of applying the excess contribution rules with respect to the employer taxable years specified in subparagraph (1) of this

paragraph for such an employer taxable year which begins after December 31, 1973, see section 404(e) and § 1.404(e)-1A for rules increasing the limitation on the amount of allowable employer deductions on behalf of owner-employees under section 404. For purposes of applying subparagraphs (A) and (B)(i) of section 401(e)(1) prior to the amendment made by section 2001(e)(3) of the Act (88 Stat. 954), the employer deduction allowable by section 404(e)(4) with respect to an owner-employee in a defined contribution plan shall be deemed not to be an excess contribution (see § 1.404(e)-1A(c)(4)).

(ii) For purposes of applying the excess contribution rules with respect to the employer taxable years specified in subparagraph (1) of this paragraph to an employer's plan which was not in existence on January 1, 1974, or to a plan in existence on January 1, 1974, which elects under section 1017(d) of the Act (88 Stat. 934), in accordance with regulations, to have the funding provisions of section 412 apply to such an existing plan, see section 404(a)(1), (a)(6), and (a)(7), as amended by section 1013(c)(1), (2), and (3) of the Act (88 Stat. 922 and 923) for rules modifying the amount of employer deductions on behalf of owner-employees.

[T.D. 7636, 44 FR 47053, Aug. 10, 1979]

§ 1.401(e)-5 Limitation of contribution and benefit bases to first $100,000 of annual compensation in case of plans covering self-employed individuals.

(a) General rules—(1) General rule. Under section 401(a)(17), a plan maintained by an employer which provided contributions or benefits for employees some or all of whom are employees within the meaning of section 401(c)(1) is a qualified plan only if the annual compensation of each employee taken into account under the plan does not exceed the first $100,000 of such compensation. For purposes of applying section 401(a)(17) and the preceding sentence, all plans maintained by such an employer with respect to the same trade or business shall be treated as a single plan. See also sections 401(d)(9) and (10) (relating to controlled trades or businesses where a plan covers an owner-employee who controls more than one trade or business); section 404(e) (relating to special limitations for self-employed individuals); section 413(b)(7) (relating to determination of limitations provided by section 404(a) in the case of certain plans maintained pursuant to a collective bargaining agreement); and section 413(c)(6) (relating to determination of limitations provided by section 404(a) in the case of certain plans maintained by more than one employer).

(2) Special section 414(b), (c) rule. This subparagraph (2) applies to plans maintained by employers that are trades or businesses (whether or not incorporated) that are under common control within the meaning of section 414(c). All such plans that are described in paragraph (a)(1) and § 1.401(e)-6(a) (so called "Subchapter S plans") shall be treated as a single plan in applying the limitation of paragraph (a)(1).

(b) Integrated plans. (1) In the case of a qualified plan, other than a plan described in section 414(j), which is integrated with the Social Security Act (chapter 21 of the Code), or with contributions or benefits under chapter 2 of the Code (relating to tax on self-employment income) or under any other Federal or State law, the $100,000 limitation described in subparagraph (a) shall be determined without regard to any adjustments to contributions or benefits under the plan on account of such integration. See also subsections (a)(5), (a)(15), and (d)(6) of section 401 and the regulations thereunder for other rules with respect to plans which are integrated.

(2) In the case of a qualified defined benefit plan described in section 414(j), see section 401(j)(4) for a special prohibition against integration.

(c) Application of nondiscrimination requirement. (1) This paragraph shall apply—

(i) In the case of a plan which provides contributions or benefits for employees some or all of whom are employees within the meaning of section 401(c)(1) and

(ii) For a year in which the compensation of any employee covered by the plan exceeds $100,000. In the case of an employee who is an employee within the meaning of section 401(c)(1), compensation includes earned income within the meaning of section 401(c)(2).

(2) In applying section 401(a)(4) under the circumstances described in subparagraph (1) of this paragraph, the determination whether the rate of contributions or benefits under the plan discriminates in favor of highly compensated employees shall be made as if the compensation for the year of each employee described in the first sentence of subparagraph (1)(ii) of this paragraph were $100,000, rather than the compensation actually received by him for such year.

(d) Examples. The provisions of this section may be illustrated by the following examples:

Example (1). A, a self-employed individual, has established the P Profit-Sharing Plan, which covers A and his two commonlaw employees, B and C. A's taxable year and the plan's plan year are both the calendar year. For 1976, A has earned income of $150,000, and B and C each receive compensation of less than $100,000 from A. If he wishes to contribute $7,500 to the plan on his behalf for 1976, A must also contribute to the accounts of B and C under the plan amounts at least equal to 7½ percent of their respective compensation for 1976.

Example (2). D, an owner-employee within the meaning of section 401(c)(3), is a participant in the Q Qualified Defined Contribution Plan, which, in 1975, satisfies the requirements of section 401(d)(6) and all other integration requirements applicable to qualified defined contribution plans. The taxable years of D, the employer of D within the meaning of section 401(c)(4), and the plan are all calendar years. The plan provides for an integration level of $13,200 and a contribution rate of 5 percent of compensation in excess of $13,200. For 1975, D has earned income of $115,000. The maximum amount of earned income upon which D's contribution can be determined is $86,800, and the contribution based upon this maximum amount of earned income is $4,340, computed as follows:

Maximum annual compensation which may be taken into account	$100,000
Less: Social Security Act integration level	13,200
Plan contribution base	$86,800
Multiplied by: Contribution rate (percent)	5
Total	$4,340

(e) Years to which section applies. This section applies to taxable years of an employer beginning after December 31, 1975. However, if employer contributions made under a plan for any employee for taxable years of an employer beginning after December 31, 1973, exceed the amounts permitted to be deducted for that employee under section 404(e), as in effect on September 1, 1974, this section applies to such taxable years of an employer.

Thus, for example, a plan of a calendar year employer which was adopted on January 1, 1974, would be subject to this section in 1974, if the employer made a contribution on behalf of any employee within the meaning of section 401(c)(1) for such year in excess of the $2,500 or 10 percent earned income limit, whichever is applicable to that employee, specified in section 404(e)(1) as in effect prior to the amendment to such Code section made by section 2001(a)(1)(A) of the Employee Retirement Income Security Act of 1974 (88 Stat. 952). The plan described in the proceeding sentence would also be subject to this section in 1974, if the employer made a contribution on behalf of any employee within the meaning of section 401(c)(1) which is allowable as a deduction only because of the addition of paragraph (4) to Code section 404(e) made by section 2001(a)(3) of such Act (88 Stat. 952).

[T.D. 7636, 44 FR 47055, Aug. 10, 1979]

§ 1.401(e)–6 Special rules for shareholder-employees.

(a) Limitation of contributions and benefit bases to first $100,000 of annual compensation in case of plans covering shareholder-employees. (1) Under section 401(a)(17), a plan which provides contributions or benefits for employees, some or all of whom are shareholder-employees within the meaning of section 1379(d), is subject to the same limitation on annual compensation as a plan which provides such contributions or benefits for employees some or all of whom are self-employed individuals within the meaning of section 401(c)(1). Thus, a plan which provides contributions or benefits for such shareholder-employees is subject to the rules provided by § 1.401(e)–5, unless otherwise specified. See also section 1379. In the case of plans maintained by employers that are corporations described in section 414(b) and that are described in this subparagraph (1), the same rule described in § 1.401(e)–5(a)(2) shall apply.

(2) Subparagraph (1) applies to taxable years of an electing small business corporation beginning after December 31, 1975. However, if corporate contributions made under a plan on behalf of any shareholder-employee for corporate taxable years beginning after December 31, 1973, exceed the lesser of the amount of contributions specified in section 1379(b)(1)(A) or (B), as in effect on September 1, 1974, for that shareholder-employee, subparagraph (1) applies to such corporate taxable years. Thus, for example if an electing small business corporation whose taxable year is the calendar year adopted a plan on January 1, 1974, the plan would be subject to the provisions of subparagraph (1) of this section in 1974, if the corporation made a contribution in excess of $2,500 on behalf of any shareholder-employee for such year.

(b) [Reserved]

[T.D. 7636, 44 FR 47056, Aug. 10, 1979]

§ 1.401(f)–1 Certain custodial accounts and annuity contracts.

(a) Treatment of a custodial account or an annuity contract as a qualified trust. Beginning on January 1, 1974, a custodial account or an annuity contract may be used, in lieu of a trust, under any qualified pension, profit-sharing, or stock bonus plan if the requirements of paragraph (b) of this

section are met. A custodial account or an annuity contract may be used under such a plan, whether the plan covers common-law employees, self-employed individuals who are treated as employees by reason of section 401(c), or both. The use of a custodial account or annuity contract as part of a plan does not preclude the use of a trust or another custodial account or another annuity contract as part of the same plan. A plan under which a custodial account or an annuity contract is used may be considered in connection with other plans of the employer in determining whether the requirements of section 401 are satisfied. For regulations relating to the period before January 1, 1974, see § 1.401–8.

(b) Rules applicable to custodial accounts and annuity contracts. (1) Beginning on January 1, 1974, a custodial account or an annuity contract is treated as a qualified trust under section 401 if the following requirements are met:

(i) The custodial account or annuity contract would, except for that fact that it is not a trust, constitute a qualified trust under section 401; and

(ii) In the case of a custodial account, the custodian either is a bank or is another person who demonstrates, to the satisfaction of the Commissioner, that the manner in which he will hold the assets will be consistent with the requirements of section 401. This demonstration must be made in the same manner as the demonstration required by section 401(d)(1) and the regulations thereunder.

(2) If a custodial account would, except for the fact that it is not a trust, constitute a qualified trust under section 401, it must, for example, be created pursuant to a written agreement which constitutes a valid contract under local law. In addition, the terms of the contract must make it impossible, prior to the satisfaction of all liabilities with respect to the employees and their beneficiaries covered by the plan. For any part of the funds of the custodial account to be used for, or diverted to, purposes other than for the exclusive benefit of the employees or their beneficiaries as provided for in the plan (see paragraph (a) of § 1.401–2).

(3) An annuity contract would, except for the fact that it is not a trust, constitute a qualified trust under section 401 if it is purchased by an employer for an employee under a plan which meets the requirements of section 404(a)(2) and the regulations thereunder, except that the plan may be either a pension or a profit-sharing plan.

(c) Effect of this section. (1)(i) Any custodial account or annuity contract which satisfies the requirements of paragraph (b) of this section is treated as a qualified trust for all purposes of the Internal Revenue Code of 1954. Such a custodial account or annuity contract is treated as a separate legal person which is exempt from the income tax under section 501(a). In addition, the person holding the assets of such account or holding such contract is treated as the trustee thereof. Accordingly, such person is required to file the returns described in sections 6033 and 6047 and to supply any other information which the trustee of a qualified trust is required to furnish.

(ii) Any procedure which has the effect of merely substituting one custodian for another shall not be considered as terminating or interrupting the legal existence of a custodial account which otherwise satisfies the requirements of paragraph (b) of this section.

(2)(i) The beneficiary of a custodial account which satisfies the requirements of paragraph (b) of this section is taxed in accordance with section 402. In determining whether the funds of a custodial account are distributed or made available to an employee or his beneficiary, the rules which under section 402(a) are applicable to trusts will also apply to the custodial account as though it were a separate legal person and not an agent of the employee.

(ii) If a custodial account which has qualified under section 401 fails to qualify under such section for any taxable year, such custodial account will not thereafter be treated as a separate legal person, and the funds in such account shall be treated as made available within the meaning of section 402(a)(1) to the employees for whom they are held.

(3) The beneficiary of an annuity contract which satisfies the requirements of paragraph (b) of this section is taxed as if he were the beneficiary of an annuity contract described in section 403(a).

(d) Definitions. For purposes of this section—

(1) The term "bank" means a bank as defined in section 401(d)(1).

(2) The term "annuity" means an annuity as defined in section 401(g). Thus, any contract or certificate issued after December 31, 1962, which is transferable is not treated as a qualified trust under this section.

(e) Other contracts. For purposes of this section, other than the non-transferability restriction

of paragraph (d)(2), a contract issued by an insurance company qualified to do business in a state shall be treated as an annuity contract. For purposes of the preceding sentence, the contract does not include a life, health or accident, property, casualty or liability insurance contract. For purposes of this paragraph, a contract which is issued by an insurance company will not be considered a life insurance contract merely because the contract provides incidental life insurance protection. The provisions of this paragraph are effective for taxable years beginning after December 31, 1975.

(f) Cross reference. For the requirement that the assets of an employee benefit plan be placed in trust, and exceptions thereto, see section 403 of the Employee Retirement Income Security Act of 1974, 29 U.S.C. 1103, and the regulations prescribed thereunder by the Secretary of Labor.

[43 FR 41204, Sept. 15, 1978. Redesignated and amended by T.D. 7748, 46 FR 1687–1696, Jan. 7, 1981]

§ 1.401 (k)–0 Certain cash or deferred arrangements, table of contents.

This section contains the captions that appear in § 1.401(k)-1.

[T.D. 8217, 53 FR 29663, Aug. 8, 1988]

§ 1.401(k)-1 Certain cash or deferred arrangements.

(a) In general—(1) General rule. A plan, other than a profit-sharing, stock bonus, pre-ERISA money purchase pension, or rural electric cooperative plan, will fail to satisfy the requirements of section 401(a) if the plan includes a cash or deferred arrangement. A profit-sharing, stock bonus, pre-ERISA money purchase pension, or rural electric cooperative plan will not fail to satisfy the requirements of section 401(a) merely because the plan includes a cash or deferred arrangement.

(2) Cash or deferred arrangement—(i) In general. Except as provided in paragraph (a)(2)(ii), a cash or deferred arrangement is an arrangement under which an eligible employee may make a cash or deferred election to have the employer either contribute an amount to a trust under a plan that meets (or is intended to meet) the requirements of section 401(a) or provide an amount to the employee in cash or in the form of some other taxable benefit. An arrangement under which the employee may make a cash or deferred election to have the employer contribute an amount to a trust under a plan that meets (or is intended to meet) the requirements of section 401(a) includes an arrangement under which the employee may elect either to receive cash or a taxable amount or to accrue a benefit under a defined benefit plan that is intended to meet the requirements of section 401(a), and an arrangement under which the employee may elect either to receive cash or a taxable amount or to have the employer contribute an amount to a contract that meets the requirements or section 401(a) or 403(a).

(ii) After-tax employee contributions. A cash or deferred arrangement does not include an arrangement pursuant to which amounts contributed under a plan at an employee's election are designated or treated at the time of deferral or contribution as after-tax employee contributions (e.g., by reporting

the contributions as taxable income subject to applicable withholding requirements). See also section 414(h)(1). This is the case even if the employee's election to make after-tax employee contributions is made before the amounts subject to the election are currently available to the employee.

(3) Cash or deferred election—(i) General rule. A cash or deferred election is an election (or modification of an earlier election) that is made at any time permitted by the plan with respect to cash or other taxable amounts that are not currently available to the electing employee as of the date of the election and are not designated or treated as after-tax employee contributions at the time of deferral or contribution. A cash or deferred election includes a salary reduction agreement between an eligible employee and the employer under which a contribution is made under the plan only if the employee elects to reduce his cash compensation or to forgo an increase in his cash compensation.

(ii) Amounts currently available. Cash or another taxable amount is currently available to the employee if it has been paid to the employee or if the employee is able currently to receive the cash or other taxable amount at his discretion. An amount is not currently available to an employee if there is a significant limitation or restriction on the employee's right to receive the amount currently. Similarly, an amount is not currently available as of a date if the employee may under no circumstances receive the amount before a particular time in the future.

(iii) Certain one-time elections. A cash or deferred election does not include a one-time irrevocable election, upon an employee's commencement of employment or upon an employee's first becoming eligible under any plan of the employer, to have a specified amount or percentage of compensation (including no amount of compensation) contributed by the employer, on behalf of the employee to the plan and any other plan of the employer (including plans not yet established) for the duration of the employee's employment with the employer. Thus, employer contributions pursuant to such a one-time election are not treated as having been made pursuant to a cash or deferred arrangement.

(iv) Tax treatment. An amount generally is includible in an employee's gross income for the taxable year in which the employee actually receives, or is treated as having received, such amount. But for section 402(a)(8) and section 401(k), an employee is treated as having received an amount that is contributed under a plan pursuant to the employee's cash or deferred election. This is the case even if the election to defer is made before the year in which such amount has been earned or becomes currently available. See § 1.402(a)-1(d).

(v) Examples. The provisions of this subparagraph (a)(3) are illustrated by the following examples:

Example (1). An employer maintains a profit-sharing plan under which each eligible employee has an election with respect to an annual bonus of ten percent of his compensation payable on January 30 each year with respect to the prior calendar year's profits. Deferred amounts are not treated as after-tax employee contributions. An election made prior to January 30 to defer all or part of the bonus is a cash or deferred election and the bonus deferral arrangement is a cash or deferred arrangement.

Example (2). An employer maintains a profit-sharing plan under which each eligible employee may elect to defer up to 10 percent of compensation for each payroll period during the plan year. An election to defer compensation for a payroll period is a cash or deferred election if such election is made prior to the date on which such compensation is to be paid to the employee and if such deferred amount is not treated as an after-tax employee contribution at the time of deferral.

(4) Qualified cash or deferred arrangement—(i) In general. A qualified cash or deferred arrangement is a cash or deferred arrangement that satisfies the requirements of paragraphs (b), (c), (d), and (e) of this section and that is part of a plan that otherwise meets the requirements of section 401(a).

(ii) Treatment of elective contributions as employer contributions. Except as provided in paragraph (f) of this section, elective contributions under a qualified cash or deferred arrangement are treated as employer contributions under the Internal Revenue Code of 1986. Thus, for example, such elective contributions are treated as employer contributions for purposes of sections 401(a), 401(k), 404, 409, 411, 412, 415, 416, and 417.

(iii) Tax treatment of employees. Except as provided in section 402(g) and paragraph (f) of this section, elective contributions under a qualified cash or deferred arrangement are not includible in an employee's gross income at the time such contributions would have been received in cash (but for the cash or deferred election) or at the time contributed under the plan. See § 1.402(a)-1(d).

(iv) Nondiscrimination requirement. The amount of elective contributions under a qualified cash or deferred arrangement must satisfy section 401(a)(4). For plan years beginning after December 31, 1984, the amount of elective contributions

will satisfy section 401(a)(4) only if such elective contributions satisfy the special nondiscrimination test in paragraph (b)(2) of this section.

(v) Plan assets. The extent to which elective contributions under a cash or deferred arrangement constitute plan assets for purposes of the prohibited transaction provisions of section 4975 of the Internal Revenue Code and Title I of the Employee Retirement Income Security Act of 1974 shall be determined in accordance with regulations and rulings issued by the Department of Labor.

(5) Nonqualified cash or deferred arrangement —(i) In general. A nonqualified cash or deferred arrangement is a cash or deferred arrangement that is not a qualified cash or deferred arrangement. Thus, if a cash or deferred arrangement fails to satisfy one or more of the requirements in paragraph (b), (c), (d) or (e) of this section, such arrangement is a nonqualified cash or deferred arrangement.

(ii) Treatment of elective contributions as employer contributions. Except as specifically provided otherwise, elective contributions under a nonqualified cash or deferred arrangement are treated as employer contributions under the Internal Revenue Code of 1986. Thus, for example, such elective contributions are treated as employer contributions for purposes of sections 401(a) (including section 401(a)(4)), 401(k), 404, 409, 411, 412, 415, 416, and 417.

(iii) Tax treatment of employees. Elective contributions under a nonqualified cash or deferred arrangement are includible in an employee's gross income at the time such contributions would have been received (but for the cash or deferred election). See § 1.402(a)-1(d).

(iv) Qualification of plan that includes a nonqualified cash or deferred arrangement. A profit-sharing, stock bonus, pre-ERISA money purchase pension, or rural electric cooperative plan will not fail to satisfy section 401(a) merely because such plan includes a nonqualified cash or deferred arrangement. In determining whether such a plan satisfies the requirements of section 401(a)(4), elective contributions under the nonqualified cash or deferred arrangement are to be treated as employer contributions to the extent that such contributions would be treated as employer contributions if the arrangement were a qualified cash or deferred arrangement, but the special nondiscrimination test of paragraph (b)(2) may not be used.

(b) Coverage and discrimination requirements— (1) Coverage. (i) For plan years which begin before January 1, 1989, or such later date provided under paragraph (h) of this section, a cash or deferred arrangement satisfies this paragraph (b) for a plan year only if the eligible employees under the arrangement satisfy the 70 percent test of section 410(b)(1)(A) or the nondiscriminatory classification test of section 410(b)(1)(B). For purposes of this subdivision, all eligible employees under the arrangement are treated as benefiting under the arrangement. For purposes of this subdivision, section 410(b) means section 410(b) prior to its amendment by section 1112 of the Tax Reform Act of 1986 (TRA '86).

(ii) For plan years which begin after December 31, 1988, or on or after the later date provided under paragraph (h) of this section, a cash or deferred arrangement satisfies this paragraph (b) for a plan year only if the eligible employees under the arrangement satisfy either the percentage test of section 410(b)(1)(A), the ratio test of section 410(b)(1)(B), or the reasonable classification test of section 410(b)(2)(A)(i) (and, in such case, the average benefit percentage test of section 410(b)(2)(A)(ii) is satisfied). For purposes of applying section 410(b), all eligible employees under the arrangement are treated as benefiting under the arrangement.

(iii) A plan described in section 410(c)(1) will be treated as satisfying the requirements of section 410 if such plan meets the requirements of section 401(a)(3) as in effect on September 1, 1974.

(2) Nondiscriminatory elective contributions. A cash or deferred arrangement satisfies this paragraph (b) for a plan year only if—

(i) The elective contributions under the arrangement, or

(ii) The elective contributions, in combination with qualified nonelective contributions and qualified matching contributions that are treated as elective contributions under the arrangement,

satisfy the actual deferral percentage test in paragraph (b)(4) of this section. If a cash or deferred arrangement satisfies this paragraph (b)(2), such arrangement will be treated as satisfying section 401(a)(4) with respect to the amount of elective contributions. See paragraph (e)(1) of this section with respect to the application of section 401(a)(4) to other benefits, rights and features under a cash or deferred arrangement. Employee contributions may not be treated as elective contributions under a cash or deferred arrangement for purposes of this paragraph (b)(2).

(3) Qualified nonelective contributions and qualified matching contributions that may be treated as elective contributions. Except as specifically provided otherwise, for purposes of paragraph (b)(2)(ii) of this section, all or part of the qualified nonelective contributions and qualified matching contributions made with respect to those employees who are eligible employees under the cash or deferred arrangement being tested may be treated as elective contributions provided that each of the following (to the extent applicable) is satisfied:

(i) The nonelective contributions, including those qualified nonelective contributions treated as elective contributions for purposes of the actual deferral percentage test, satisfy the requirements of section 401(a)(4).

(ii) The nonelective contributions, excluding those qualified nonelective contributions treated as elective contributions for purposes of the actual deferral percentage test, satisfy the requirements of section 401(a)(4).

(iii) The matching contributions, including those qualified matching contributions treated as elective contributions for purposes of the actual deferral percentage test, satisfy the requirements of section 401(a)(4).

(iv) The matching contributions, excluding those qualified matching contributions treated as elective contributions for purposes of the actual deferral percentage test, satisfy the requirements of section 401(a)(4).

(v) Except as provided in subdivisions (i) and (iii) of this paragraph (b)(3), the qualified nonelective contributions and qualified matching contributions treated as elective contributions for purposes of the actual deferral percentage test are not taken into account in determining whether any other contributions or benefits satisfy section 401(a)(4).

(vi) The qualified nonelective contributions and qualified matching contributions satisfy paragraph (b)(6)(i) for the plan year as if such contributions were elective contributions.

Qualified matching contributions taken into account for plan years which begin after December 31, 1986, or on or after the later date provided under paragraph (h) of this section, are also to be treated in accordance with the requirements of section 401(m) and the regulations thereunder.

(4) Actual deferral percentage tests. (i) For plan years which begin after December 31, 1979, and before January 1, 1987, or such later date provided under paragraph (h) of this section, the actual deferral percentage test is satisfied if either of the following tests is met:

(A) The actual deferral percentage for the group of eligible highly compensated employees (top one-third) is not more than the actual deferral percentage for the group of all other eligible employees (lower two-thirds) multiplied by 1.5, or

(B) The excess of the actual deferral percentage for the top one-third over the actual deferral percentage for the lower two-thirds is not more than three percentage points, and the actual deferral percentage for the top one-third is not more than the actual deferral percentage for the lower two-thirds multiplied by 2.5.

(ii) For plan years which begin after December 31, 1986, or such later date provided under paragraph (h) of this section, the actual deferral percentage test is satisfied if either of the following tests is met:

(A) The actual deferral percentage for the group of eligible highly compensated employees is not more than the actual deferral percentage for the group of all other eligible employees multiplied by 1.25, or

(B) The excess of the actual deferral percentage for the group of eligible highly compensated employees over the actual deferral percentage for the group of all other eligible employees is not more than two percentage points, and the actual deferral percentage for the group of eligible highly compensated employees is not more than the actual deferral percentage for the group of all other eligible employees multiplied by two.

For plan years which begin after December 31, 1986, or such later date provided in paragraph (h) of this section, the plan must provide that the actual deferral percentage test will be met. For purposes of this paragraph (b)(4)(ii), the plan may incorporate by reference the provisions of section 401(k)(3) and this section.

(5) Aggregation rules—(i) Permissive aggregation of arrangements and plans. Two or more cash or deferred arrangements may be considered as a single arrangement for purposes of determining whether or not such arrangements satisfy sections 401(a)(4), 410(b), and 401(k). In such a case, the case or deferred arrangements included in such plans and the plans including such arrangements shall be treated as one arrangement and as one plan for purposes of this paragraph (b) and sections 401(a)(4), 401(k) and 410(b). If an employer maintains two or more plans that are treated as a single plan for purposes of section 401(a)(4) or

410(b) (other than section 410(b)(2)(A)(ii) as in effect for plan years which begin after December 31, 1988), all cash or deferred arrangements that are included in such plans are treated as a single arrangement for purposes of this paragraph (b) and sections 401(a)(4), 401(k), and 410(b).

(ii) Impermissible aggregation of arrangements and plans. For plan years which begin after December 31, 1988, notwithstanding paragraphs (b)(2), (b)(3) and (b)(5)(i) of this section, contributions and allocations under a plan described in section 4975(e)(7) (an ESOP) may not be combined with contributions or allocations under any plan not described in section 4975(e)(7) (a non-ESOP) for purposes of determining whether either the ESOP or the non-ESOP satisfies this paragraph (b) and sections 401(a)(4), 401(k), and 410(b). See § 54.4975-11(e), which includes an exception to this rule for certain plans in existence on November 1, 1977. See also § 54.4975-11(a)(5), which provides that an ESOP may form a portion of a plan the balance of which includes a qualified pension, profit-sharing, or stock bonus plan which is not an ESOP. For example, in determining whether elective contributions under a cash or deferred arrangement that is included in the portion of a plan that is not an ESOP satisfy paragraph (b) and section 401(a)(4) and whether nonelective contributions under the portion of the plan that is an ESOP satisfy section 401(a)(4), such elective contributions and nonelective contributions may not be considered together. Thus, with respect to such elective contributions, the nonelective contributions may not be treated as qualified nonelective contributions. Similarly, for plan years which begin after December 31, 1988, contributions for which a tax credit is provided may not be treated as elective contributions under paragraphs (b)(2) and (b)(3) of this section.

(6) Elective contributions taken into account for a plan year. An elective contribution may be taken into account under paragraph (b)(2) of this section for a plan year only if it satisfies paragraphs (b)(6)(i) and (b)(6)(ii) of this section.

(i) The elective contribution is allocated to the employee under the plan as of a date within that plan year. For purposes of this rule, an elective contribution is considered allocated as of a date within a plan year only if—

(A) The allocation is not contingent upon the employee's participation in the plan or performance of services on any date subsequent to that date, and

(B) The elective contribution is actually paid to the trust no later than the end of the twelve-month period immediately following the plan year to which the contribution relates.

(ii) The elective contribution relates to compensation that either—

(A) Would have been received by the employee in the plan year but for the employee's election to defer under the arrangement, or

(B) Is attributable to services performed by the employee in the plan year and, but for the employee's election to defer, would have been received by the employee within two and one-half months after the close of the plan year.

Elective contributions that do not satisfy the requirements of paragraphs (b)(6) (i) and (ii) of this section may not be taken into account under paragraph (b)(2) for the plan year with respect to which the contributions were made or for any other plan year. Instead, such elective contributions must satisfy section 401(a)(4) (without regard to the special nondiscrimination test in paragraph (b)(2) of this section) for the plan year for which allocated under the plan as if such elective contributions were the only employer contributions for such year.

(7) Examples. The provisions of this paragraph (b) are illustrated by the following examples. The examples apply the rules in paragraph (b)(4) of this section for plan years beginning after December 31, 1979, and before January 1, 1987, or such later date provided in paragraph (h) of this section.

Example (1). (i) Employees A, B, and C are eligible employees and earn $30,000, $15,000 and $10,000 per year respectively. In addition, their employer, X, contributes a bonus of up to 10 percent of their regular compensation to a trust under a profit-sharing plan that includes a cash or deferred arrangement. Under the arrangement, each eligible employee may elect to receive none, all, or any part of the 10 percent in cash. The employer will contribute the remainder to the trust. For the 1985 plan year, A, B, and C make the following elections:

Employee	Compensation	Elective contribution	Cash election
A	$30,000	$2,000	$1,000
B	15,000	750	750
C	10,000	400	600

(ii) The ratios of employer contributions to the trust on behalf of each eligible employee to the employee's compensation for the plan year (calculated separately for each employee) are:

Employee	Ratio of elective contribution to compensation	Individual's actual deferral percentage (percent)
A	$2,000/$30,000	6.67
B	750/15,000	5.00
C	400/10,000	4.00

(iii) The actual deferral percentage for the top one-third is 6.67 percent (2,000/30,000). The actual deferral percentage for the lower two-thirds is 4.5 percent ((5% + 4%)/2)). Because 6.67 percent is less than 6.75 percent (4.50% multiplied by 1.5), the first percentage test is satisfied.

Example (2). (i) The facts are the same as in Example (1) except that elective contributions are made pursuant to a salary reduction agreement. Compensation includes amounts that are contributed by salary reduction. In addition, A wishes to defer $2.250. Thus, the compensation and elective contributions for A, B, and C are as shown below:

Employee	Compensation (A)	Elective contribution (B)	Actual deferral percentage (B/A) (percent)
A	$30,000	$2,250	7.50
B	15,000	750	5.00
C	10,000	400	4.00

(ii) The actual deferral percentage (ADP) for the top one-third is 7.5 percent. The ADP for the lower two-thirds is 4.5 percent ((5.00% + 4.00%/2). Because 7.5 percent exceeds 6.75 percent (4.50 × 1.5), the first percentage test is not satisfied. Because 7.5 percent is not more than 11.25 percent (4.50% × 2.5) and not more than 7.5 percent (4.50% + 3), the second percentage test is satisfied.

Example (3). (i) Employees 1 through 9 are eligible employees who participate in a profit-sharing plan maintained by employer A. Each eligible employee may elect to defer up to six percent of compensation under the plan. The compensation and elective contributions of these employees for the 1983 plan year are shown below:

Employee	Compensation	Elective contributions
1	$100,000	$6,000
2	80,000	4,800
3	60,000	3,600
4	40,000	1,200
5	30,000	900
6	20,000	600
7	20,000	600
8	10,000	300
9	5,000	150

(ii) For the 1983 plan year, the ratios of the elective contributions on behalf of each employee to the employee's compensation are:

Employee	Ratio of elective contributions to compensation	Individual's deferral percentage (percent)
1	$6,000/ $100,000	6
2	4,800/ 80,000	6
3	3,600/ 60,000	6
4	1,200/ 40,000	3
5	900/ 30,000	3
6	600/ 20,000	3
7	600/ 20,000	3
8	300/ 10,000	3
9	150/ 5,000	3

(iii) The actual deferral percentage for the top one-third, consisting of employees 1, 2, and 3, is six percent. The actual deferral percentage for the lower two-thirds, consisting of employees 4 through 9, is three percent. Because six percent is greater than 4.5 percent (3% multiplied by 1.5), the first percentage test is not satisfied. However, because six percent is not more than three percentage points greater than three percent and six percent is less than 7.5 percent (3% × 2.5), the second percentage test is satisfied.

Example (4). (i) Employees 1 through 9 are the only employees of Employer D. Employer D maintains and contributes to a profit-sharing plan the following amounts:

(A) Six percent of each employee's compensation. These contributions do not satisfy the requirements for qualified nonelective contributions.

(B) Two percent of each employee's compensation. These contributions satisfy the requirements for qualified nonelective contributions.

(C) Up to three percent of each employee's compensation which the employee may elect to receive as a direct cash payment or to defer under the plan.

(ii) For the 1984 plan year, employees 1 through 9 received compensation and plan contributions as indicated in the table below:

Employee	Compensation	Six percent nonqualified nonelective contribution	Two percent qualified nonelective contribution	Elective contributions
1	$100,000	$6,000	$2,000	$3,000
2	80,000	4,800	1,600	2,400
3	60,000	3,600	1,200	1,800
4	40,000	2,400	800	0
5	30,000	1,800	600	0
6	20,000	1,200	400	0
7	20,000	1,200	400	0
8	10,000	600	200	0
9	5,000	300	100	0

(iii) Both types of nonelective contributions are made for all employees. Thus both the six percent and the two percent nonelective employer contributions satisfy the requirements of section 401(a)(4) and paragraph (b)(3)(i) of this section.

(iv) However, the elective contributions under the plan do not by themselves satisfy the special rules in paragraph (b)(4) of this section because, based solely on such elective deferrals, the actual deferral percentage for the top one-third, consisting of employees 1, 2, and 3, is three percent and the actual deferral percentage for the lower two-thirds is zero. Nevertheless, the

two percent nonelective contribution may also be taken into account in applying the special rules because those contributions are qualified nonelective contributions that satisfy paragraph (b)(3) of this section. The six percent nonelective contribution may not be taken into account because it is not a qualified nonelective contribution.

(v) If the two percent qualified nonelective contributions are taken into account, the actual deferral percentage for the top one-third is five percent, and the actual deferral percentage for the lower two-thirds is two percent. Because five percent is not more than three percentage points greater than two percent, and not more than two percent multiplied by 2.5, the actual deferral percentage test in paragraph (b)(4)(i)(B) of this section is satisfied. Thus, the plan satisfies this paragraph (b).

(c) Nonforfeitability—(1) General rule. A cash or deferred arrangement satisfies this paragraph (c) only if each employee's right to the amount attributable to elective contributions—

(i) Is immediately nonforfeitable within the meaning of section 411, without regard to section 411(a)(3), and would be nonforfeitable under the plan regardless of the age and service of the employee or whether the employee is employed on a specific date;

(ii) Is disregarded for purposes of applying section 411(a) to other contributions or benefits; and

(iii) Remains nonforfeitable even if the employee makes no additional elective contributions under a cash or deferred arrangement.

(2) Example. This paragraph may be illustrated by the following example:

Example. Employees B and C are covered by Employer Y's stock bonus plan, which includes a qualified cash or deferred arrangement. Under the plan, Employer Y makes a nonelective contribution on behalf of each employee equal to four percent of their compensation. All employees participating in the plan have a nonforfeitable right to a percentage of their accrued benefit derived from this contribution according to the following table:

Years of service	Nonforfeitable percentage (percent)
Less than 1	0
1	20
2	40
3	60
4	80
5 or more	100

B and C have three and six years of service, respectively. Employer Y also permits employees to elect to defer up to six percent of their compensation through salary reduction agreements. Amounts deferred under these agreements are nonforfeitable at all times. In accordance with paragraph (c)(1)(i), the nonforfeitable percentage of Employer Y's nonelective contribution on behalf of B and C may not be treated as a qualified nonelective contribution under paragraph (b)(3) of this section, because these amounts are nonforfeitable by reason of the completion by B and C of a stated number of years of service, and not regardless of the age and service of B and C.

(d) Distribution limitation—(1) General rule. For plan years which begin before January 1, 1985, a cash or deferred arrangement satisfies this paragraph (d) only if amounts attributable to elective contributions are not distributable earlier than upon one of the following events:

(i) The employee's retirement, death, disability, or separation from service; or

(ii) In the case of a profit-sharing or stock bonus plan, the employee's hardship or attainment of age $59\frac{1}{2}$.

A plan will not fail to satisfy this paragraph by reason of a dividend distribution described in section 404(k)(2).

(2) Hardship—(i) General rule. For purposes of this section, a distribution is on account of hardship only if the distribution both is made on account of an immediate and heavy financial need of the employee and is necessary to satisfy such financial need. The determinations of the existence of an immediate and heavy financial need and of the amount necessary to meet the need must be made in accordance with nondiscriminatory and objective standards set forth in the plan. See section 411(d)(6) and the regulations thereunder.

(ii) Immediate and heavy financial need—(A) In general. The determination of whether an employee has an immediate and heavy financial need is to be made on the basis of all relevant facts and circumstances. Generally, for example, the need to pay the funeral expenses of a family member would constitute an immediate and heavy financial need. A distribution made to an employee for the purchase of a boat or television would generally not constitute a distribution made on account of an immediate and heavy financial need. A financial need shall not fail to qualify as immediate and heavy merely because such need was reasonably foreseeable or voluntarily incurred by the employee.

(B) Deemed immediate and heavy financial need. A distribution will be deemed to be made on account of an immediate and heavy financial need of the employee if the distribution is on account of:

(1) Medical expenses described in section 213(d) incurred by the employee, the employee's spouse, or any dependents of the employee (as defined in section 152);

(2) Purchase (excluding mortgage payments) of a principal residence for the employee; or

(3) Payment of tuition for the next semester or quarter of post-secondary education for the employee, his or her spouse, children, or dependents.

(4) The need to prevent the eviction of the employee from his principal residence or foreclosure on the mortgage of the employee's principal residence.

The Commissioner may expand this list of deemed immediate and heavy financial needs only through the publication of revenue rulings, notices, and other documents of general applicability, rather than on an individual basis.

(iii) Distribution necessary to satisfy financial need—

(A) In general. A distribution will not be treated as necessary to satisfy an immediate and heavy financial need of an employee to the extent the amount of the distribution is in excess of the amount required to relieve the financial need or to the extent such need may be satisfied from other resources that are reasonably available to the employee. This determination generally is to be made on the basis of all relevant facts and circumstances. A distribution generally may be treated as necessary to satisfy a financial need if the employer reasonably relies upon the employee's representation that the need cannot be relieved—

(1) Through reimbursement or compensation by insurance or otherwise,

(2) By reasonable liquidation of the employee's assets, to the extent such liquidation would not itself cause an immediate and heavy financial need,

(3) By cessation of elective contributions or employee contributions under the plan, or

(4) By other distributions or nontaxable (at the time of the loan) loans from plans maintained by the employer or by any other employer, or by borrowing from commercial sources on reasonable commercial terms.

For purposes of this subdivision, the employee's resources shall be deemed to include those assets of his spouse and minor children that are reasonably available to the employee. Thus, for example, a vacation home owned by the employee and the employee's spouse, whether as community property, joint tenants, tenants by the entirety, or tenants in common, will be deemed a resource of the employee. However, property held for the employee's child under an irrevocable trust or under the Uniform Gifts to Minors Act will not be treated as a resource of the employee.

(B) Distribution deemed necessary to satisfy financial need. A distribution will be deemed to be necessary to satisfy an immediate and heavy financial need of an employee if all of the following requirements are satisfied:

(1) The distribution is not in excess of the amount of the immediate and heavy financial need of the employee,

(2) The employee has obtained all distributions, other than hardship distributions, and all nontaxable loans currently available under all plans maintained by the employer,

(3) The plan, and all other plans maintained by the employer, provide that the employee's elective contributions and employee contributions will be suspended for at least 12 months after receipt of the hardship distribution, and

(4) The plan, and all other plans maintained by the employer, provide that the employee may not make elective contributions for the employee's taxable year immediately following the taxable year of the hardship distribution in excess of the applicable limit under section 402(g) for such next taxable year less the amount of such employee's elective contributions for the taxable year of the hardship distribution.

An employee shall not fail to be treated as an eligible employee for purposes of paragraph (b) of this section merely because he is suspended in accordance with this provision. The Commissioner may prescribe additional methods under which distributions will be deemed to be necessary to satisfy an immediate and heavy financial need only through the publication of revenue rulings, notices, and other documents of general applicability.

(iv) Adoption of deemed hardship standards— (A) Exception to section 411(d)(6). Subject to the requirements of paragraph (d)(2)(iv)(B), a plan that permits hardship distributions of amounts subject to the requirements of paragraph (d) of this section will not be treated as violating section 411(d)(6) merely because such plan is amended to permit hardship distributions only in accordance with the deemed hardship standards set forth in paragraphs (d)(2)(ii)(B) and (d)(2)(iii)(B).

(B) Required effective and amendment dates. The exception to section 411(d)(6) set forth in paragraph (d)(2)(iv)(A) is available only with respect to an amendment that is effective on or before the first day of the first plan year commencing on or after January 1, 1989. In the case of a plan maintained pursuant to a collective bargaining agreement, such exception is available only

with respect to an amendment that is effective on or before the later of the first day of the first plan year commencing on or after January 1, 1989, or the first day of the first plan year that the requirements of section 410(b), as modified by the Tax Reform Act of 1986, first apply to such plan. A plan amendment conforming a plan to the deemed hardship standard selected by an employer in accordance with paragraph (d)(2)(iv)(A) and effective by the applicable required effective date must be adopted within the time period permitted for required amendments to the plan under section 1140 of the Tax Reform Act of 1986 (as extended in the regulations under section 401(b)). Such conforming amendment must be consistent with the plan's operation during the period from the applicable required effective date to the date the amendment is required.

(3) Impermissible distributions. Amounts attributable to elective contributions may not be distributed on account of any event not described in this paragraph (d), such as completion of a stated period of plan participation or the lapse of a fixed number of years.

(4) Deemed distributions. The cost of life insurance (P.S. 58 costs) will not be treated as a distribution for purposes of section 401(k)(2) and this paragraph. The making of a loan is not treated as a distribution, even if the loan is secured by the employee's accrued benefit attributable to elective contributions or is includible in the employee's income under section 72(p). However, the reduction, by reason of default on a loan, of an employee's accrued benefit derived from elective contributions is treated as a distribution.

(5) Example. The provisions of this paragraph (d) are illustrated by the following example:

Example. Employer C maintains a profit-sharing plan that includes a cash or deferred arrangement. Elective contributions under the arrangement may be withdrawn for any reason after two years following the end of the plan year in which the contributions were made. Because the plan permits distributions of elective contributions before the occurrence of one of the events specified in section 401(k)(2)(B) and this paragraph (d), the plan includes a nonqualified cash or deferred arrangement and the elective contributions are currently includible in income.

(e) Additional requirements—(1) Qualified profit-sharing, stock bonus, pre-ERISA money purchase, and rural electric cooperative plan requirement—(i) General rule. A cash or deferred arrangement satisfies this paragraph (e) only if the elective contributions under such arrangement are treated as contributions under a profit-sharing, stock bonus, pre-ERISA money purchase pension or rural electric cooperative plan that satisfies the requirements of section 401(a). The plan of which a cash or deferred arrangement is a part may provide for other contributions, including employer contributions (other than elective contributions), employee contributions, or both. The plan will be treated as satisfying the requirements of section 401(a) only if such plan, taking into account any cash or deferred arrangement that is part of such plan and any elective contributions under such arrangement, satisfies the requirements of section 401(a). See paragraph (b) of this section for certain limitations on the extent to which elective contributions under a cash or deferred arrangement may be taken into account in determining the extent to which other contributions satisfy the requirements of section 401(a).

(ii) Nondiscrimination requirements. A cash or deferred arrangement satisfies this paragraph (e)(1) only if, in addition to satisfying paragraph (b)(2) of this section with respect to the amount of elective contributions, the plan of which the arrangement is a part satisfies section 401(a)(4) with respect to other benefits, rights, and features under the plan, including, for example, the availability of elective contributions to eligible employees. Thus, for example, the percentage of compensation available under a cash or deferred arrangement for deferral as elective contributions by eligible employees may not discriminate in favor of the group of employees described in section 401(a)(4). Furthermore, for example, if all employees are eligible to make elective contributions under an arrangement, but such contributions may be made only from compensation in excess of a stated amount, such as the Social Security taxable wage base, such arrangement would favor highly compensated employees with respect to the availability of elective contributions and thus would not satisfy section 401(a)(4). In such a case, the plan of which the arrangement is a part fails to satisfy section 401(a). See also §1.401(a)-4 with respect to optional forms of benefit.

(2) Cash availability. A cash or deferred arrangement satisfies this paragraph (e) only if such arrangement provides that the amount that each eligible employee may defer as an elective contribution is available to the employee in cash. Thus, for example, if an eligible employee is provided the option to receive a taxable benefit (other than cash) or to have the employer contribute on the employee's behalf to a profit-sharing plan an amount equal to the value of the taxable benefit, such arrangement is not a qualified cash or deferred arrangement. Similarly, if an employee has the option to receive a specified amount in cash or

to have the employer contribute on his behalf to a profit-sharing plan an amount in excess of the specified cash amount, any contribution made by the employer on the employee's behalf in excess of the specified cash amount is not treated as made pursuant to a qualified cash or deferred arrangement. This cash availability requirement applies even if the cash or deferred arrangement is part of a cafeteria plan within the meaning of section 125.

(3) Separate accounting—(i) General rule. A cash or deferred arrangement satisfies this paragraph (e) only if all amounts held under a plan that includes a cash or deferred arrangement or under another plan whose contributions are taken into account under the arrangement for purposes of paragraph (b) (including amounts contributed for plan years which begin prior to January 1, 1980, contributions made other than on account of a cash or deferred election, and contributions made for years when the cash or deferred arrangement is not qualified) are treated as attributable to elective contributions subject to the requirements of paragraphs (c) and (d) of this section.

(ii) Exception. The requirements of subdivision (i) of this paragraph (e)(3) will be treated as satisfied if the portion of an employee's benefit that is actually attributable to elective contributions subject to the requirements of paragraphs (c) and (d) of this section, and to qualified nonelective contributions and qualified matching contributions treated as elective contributions, is determined by an acceptable separate accounting between such portion and any other benefits. Separate accounting is not acceptable unless gains, losses, withdrawals, and other credits or charges are separately allocated on a reasonable and consistent basis to the accounts in which accrued benefits are subject to paragraphs (c) and (d) of this section and to the accounts for other benefits. Subject to section 401(a)(4), forfeitures are not required to be allocated to the accounts in which benefits are subject to paragraphs (c) and (d) of this section.

(f) Correction of excess contributions—(1) General rule. A cash or deferred arrangement will not be treated as failing to satisfy section 401(k)(3) or paragraph (b)(2) of this section with respect to the amount of elective contributions under the arrangement if the employer, in accordance with the terms of the plan and paragraph (b)(3) of this section, makes qualified nonelective contributions or qualified matching contributions that are treated as elective contributions under the arrangement and that, in combination with the elective contributions, satisfy the requirements of paragraph (b)(2) of this section. In addition, a cash or deferred arrangement will not be treated as failing to satisfy section 401(k)(3) or paragraph (b)(2) of this section with respect to the amount of the elective contributions if, in accordance with the terms of the plan that includes the arrangement, excess contributions on behalf of highly compensated employees are recharacterized in accordance with paragraph (f)(3) of this section. Excess contributions for a plan year may not remain unallocated or be allocated to a suspense account for allocation to one or more employees in any future year.

(2) Amount of excess contributions. The amount of excess contributions for a highly compensated employee for a plan year is to be determined by the following leveling method, under which the actual deferral ratio of the highly compensated employee with the highest actual deferral ratio is reduced to the extent required to—

(i) Enable the arrangement to satisfy the actual deferral percentage test, or

(ii) Cause such highly compensated employee's actual deferral ratio to equal the ratio of the highly compensated employee with the next highest actual deferral ratio.

This process must be repeated until the cash or deferred arrangement satisfies the actual deferral percentage test. For each highly compensated employee, the amount of excess contributions is equal to the total elective contributions, plus qualified nonelective contributions and qualified matching contributions treated as elective contributions, on behalf of the employee (determined prior to the application of this paragraph (f)(2)) minus the amount determined by multiplying the employee's actual deferral ratio (determined after application of this subparagraph) by his compensation used in determining such ratio. In no case shall the amount of excess contributions to be recharacterized for a plan year with respect to any highly compensated employee exceed the amount of elective contributions made on behalf of such highly compensated employee for such plan year.

(3) Recharacterization of excess contributions—(i) General rule. Excess contributions are recharacterized in accordance with this paragraph (f)(3) only if the excess contributions are treated as described in paragraph (f)(3)(ii) of this section and all of the conditions set forth in paragraph (f)(3)(iii) of this section are satisfied.

(ii) Treatment of recharacterized excess contributions. Excess contributions recharacterized under this paragraph (f)(3) are includible in the

employee's gross income on the earliest dates any elective contribution made on behalf of the employee during the plan year would have been received by the employee had he originally elected to receive the amounts in cash or on such later date permitted in paragraph (f)(3)(iv) of this section. Such recharacterized excess contributions must be treated as employee contributions for the following purposes:

(A) The payor or plan administrator must report such recharacterized excess contributions as employee contributions to the Internal Revenue Service and the employee by—

(1) Timely providing such forms as the Commissioner shall designate to the employer and to employees whose excess contributions are recharacterized under this paragraph (f)(3); and

(2) Timely taking such other action as the Commissioner shall require; and

(B) The plan administrator must account for such amounts as contributions by the employee for purposes of sections 72 and 6047.

For purposes of section 401(a)(4) and paragraph (b) of this section, recharacterized excess contributions are to be treated as employee contributions. For all other purposes under the Code, however, including sections 404, 409, 411, 412, 415, 416, and 417, and, with respect to recharacterized excess contributions for plan years which begin after December 31, 1988, section 401(k)(2), recharacterized excess contributions continue to be treated as employer contributions that are elective contributions. Thus, for example, recharacterized excess contributions remain subject to the requirements of paragraphs (c) and (d) of this section; must be deducted under section 404; and are treated as employer contributions described in section 415(c)(2)(A) and § 1.415-6(b). In addition, these amounts are not treated as compensation for purposes of sections 404 and 415, and may be treated as compensation for purposes of sections 401(a)(4), 401(a)(5), 401(k), 401(*l*) and 414(s) only to the extent that elective contributions may be treated, and are treated under the plan, as compensation. Recharacterized excess contributions which relate to plan years ending on or before October 24, 1988 may be treated as either employer contributions or employee contributions for purposes of paragraph (d) of this section.

(iii) Additional requirements—(A) Time of recharacterization. Excess contributions may not be recharacterized under this subparagraph after the later of (1) two and one-half months after the close of the plan year to which the recharacterization relates, or (2) October 24, 1988. Recharacterization will be deemed to have occurred on the date on which the last of those highly compensated employees with excess contributions to be recharacterized is notified in accordance with paragraph (f)(3)(ii). Such notification may be provided by such means as the Commissioner may designate.

(B) [Reserved.]

(C) [Reserved.]

(iv) Transition rules. If amounts recharacterized for any plan year were not previously included in income, they are to be treated as received by employees for income tax purposes on the first day of the first plan year ending in 1988.

If notice of recharacterization is provided to the affected highly compensated employees by October 24, 1988, recharacterization is deemed to have occurred 2½ months after the close of the plan year and the penalty tax of section 4979 will not be imposed. The rules in this subdivision (iv) are effective only for plan years which end on or before August 8, 1988.

(v) Example. The principles of this paragraph (f)(3) are illustrated by the following example:

Example. (i) Employer X maintains Plan Y, a calendar year profit-sharing plan that includes a qualified cash or deferred arrangement. Under Plan Y, each eligible employee may elect to defer up to 10 percent of his compensation under a salary reduction agreement. These are the only contributions to the plan. X pays the amounts deferred under the arrangement to the trust under Plan Y each month on the last day of the month. Salaries are paid on the same date.

(ii) In January 1989, X determines that, during 1988, the compensation and actual deferral percentages (ADPs) of X's six employees were as follows:

Employee	Compensation (A)	Elective contribution (B)	ADP (B/A) (percent)
A	$70,000	$7,000	10.00
B	60,000	4,500	7.50
C	20,000	1,000	5.00
D	15,000	0	0
E	10,000	350	3.50
F	10,000	350	3.50

The ADP for X's highly compensated employees, A and B, is 8.75 percent ((10.00% + 7.50%)/2). The ADP for X's other employees is three percent (5.00 percent) + 0% + 3.50% + 3.50%)/4). Because 8.75 percent is more than 2.0 times three percent and more than three percent plus two percent, the plan fails to satisfy paragraph (b)(4) of this section.

(iii) Plan Y provides that each highly compensated participant will have his excess contributions, as defined in paragraph (g)(13) of this section, recharacterized. The amount to be so treated will be determined according to the method described in paragraph (f)(2)(ii) of this section.

(iv) In order to satisfy paragraph (b)(4) of this section, Plan Y must reduce the ADP for X's highly compensated employees to not more than five percent. This will satisfy the test described in paragraph (b)(5)(iii) of this section, because five percent is not more than 2.0 times three percent and is not more than two percentage points greater than three percent. Plan Y does this by reducing A's ADP to 7.5 percent (the ADP of the highly compensated employee having the next highest ADP). Since this is not sufficient to satisfy the ADP test in paragraph (b)(4)(iii) of this section, the ADP of both A and B must be reduced to five percent.

(v) The maximum dollar amount that may be deferred by each employee is determined by using the formula D = (ADP × S) where D is the maximum allowable deferral, ADP is the reduced ADP, and S is the compensation. Thus, A's maximum allowable deferral is $3,500 (.05 × $70,000), and B's maximum allowable deferral is $3,000 (.05 × $60,000). The balance of the original deferrals by A and B ($3,500 and $1,500 respectively) must be included in their taxable wages for 1988, the year in which X would have paid cash to A and B.

(vi) A deferred $583.33 per month, except for January, February, March, and April, when he deferred $583.34. Pursuant to the first-in, first-out rule in paragraph (f)(3)(ii) of this paragraph, the deferrals made in January, February, March, April, May, and June as well as $.02 of the deferral made in July, are treated as employee contributions. A similar procedure is undertaken with respect to B. X and the plan administrator provide A and B with such forms and notices as the Commissioner may require. If A and B had already filed income tax returns for 1988, they must file amended returns. In addition, the plan administrator must satisfy paragraph (f)(3)(ii)(B) of this section.

(g) Definitions. For purposes of this section, the following definitions shall apply:

(1) Employee. The term "employee" means an individual who performs services for the employer and who is either a common law employee of the employer or a self-employed individual treated as an employee pursuant to section 401(c)(1). The term "employee" also includes a leased employee who is treated as an employee of the employer-recipient pursuant to the provisions of section 414(n)(2) or 414(*o*)(2) other than individuals covered by a plan described in section 414(n)(5). Individuals that an employer treats as leased employees under section 414(n), pursuant to the requirements of section 414(*o*), are considered to be leased employees for purposes of this rule.

(2) Employer. The term "employer" means the employer maintaining the plan and those employers required to be aggregated with such employer under sections 414(b), (c), (m), or (*o*).

(3) Eligible employee—(i) In general. The term "eligible employee" means an employee who is directly or indirectly eligible to make a cash or deferred election under the plan for all or a portion of the plan year. For example, if an employee must perform certain acts in order to be eligible to make a cash or deferred election for a plan year, such employee is an eligible employee for such plan year without regard to whether the employee performs such acts. An employee is an eligible employee if he is unable to make a cash or deferred election merely because his compensation is less than a stated dollar amount.

(ii) Certain one-time elections. An employee is not an eligible employee merely because such employee, upon commencing employment with the employer or upon the employee's first becoming eligible to make a cash or deferred election under any arrangement of the employer, is given the one-time opportunity to elect, and such employee did in fact elect, not to be eligible to make a cash or deferred election under such plan or any other plan maintained by the employer (including plans not yet established) for the duration of the employee's employment with the employer.

(4) Elective contributions. The term "elective contributions" means employer contributions made to a plan that were subject to a cash or deferred election under a cash or deferred arrangement (whether or not such arrangement is a qualified cash or deferred arrangement under paragraph (a)(4)). No amount that has become currently available to an employee or that is designated or treated, at the time of deferral or contribution, as an after-tax contribution may be treated as an elective contribution. See paragraphs (a)(2) and (a)(3).

(5) Nonelective contributions. The term "nonelective contributions" means employer contributions (other than matching contributions) with respect to which the employee may not elect to have the contributions paid to the employee in cash or other benefits instead of being contributed to the plan.

(6) Matching contributions. The term "matching contributions" means employer contributions made to a plan on behalf of an employee on account of employee contributions or elective contributions of such employee.

(7) Qualified matching contributions and qualified nonelective contributions—(i) Qualified matching contributions. The term "qualified matching contributions" means matching contributions that satisfy the additional requirements of paragraph (g)(7)(iii) of this section.

(ii) Qualified nonelective contributions. The term "qualified nonelective contributions" means employer contributions, other than elective contributions and matching contributions, that satisfy the additional requirements of paragraph (g)(7)(iii) of this section.

(iii) Additional requirements. Except to the extent that paragraphs (c) and (d) of this section specifically provide otherwise, the matching contributions and the nonelective contributions must satisfy the requirements of paragraphs (c) and (d) as though such contributions were elective contributions without regard to whether such contributions are actually taken into account as elective contributions under paragraphs (b)(2) and (b)(3).

(8) Actual deferral percentage—(i) General rule. The actual deferral percentage for the group of eligible highly compensated employees, as well as the actual deferral percentage for the group of other eligible employees, for a plan year is the average of the actual deferral ratios, calculated separately for each employee in the group, of the amount of elective contributions (including qualified nonelective contributions and qualified matching contributions treated as elective contributions under paragraph (b)(3)) made on behalf of each employee for the plan year to the employee's compensation for the plan year. For plan years which begin after December 31, 1988, or such later date provided in paragraph (h) of this section, such actual deferral ratios and the actual deferral percentage for each group shall be calculated to the nearest one-hundredth of one percent of the employee's compensation. The actual deferral ratio of an eligible employee who makes no elective contribution is zero.

(ii) Employee eligible under more than one arrangement. In the case of an employee who is eligible to participate in more than one cash or deferred arrangement of the same employer, the actual deferral ratio shall be calculated by treating all the cash or deferred arrangements in which the employee is eligible to participate as one arrangement. For example, if an employee with compensation of $80,000 may make elective contributions under two separate cash or deferred arrangements, the actual deferral ratio for such employee under each arrangement is to be calculated by dividing the total elective contributions by the employee under both arrangements by $80,000. This paragraph (g)(8)(ii) is effective for plan years beginning after December 31, 1984. For plan years which begin after December 31, 1986, or such later date provided under paragraph (h) of this section, this paragraph (g)(8)(ii) shall apply only to employees who are highly compensated employees. See paragraph (b)(5) of this section for the treatment of certain multiple plans and cash or deferred arrangements.

(9) Compensation—(i) Years before January 1, 1987—(A) In general. An employee's compensation for a plan year beginning before January 1, 1987, or such later date provided under paragraph (h) of this section, is the amount taken into account under the plan (or plans) in calculating the elective contribution that may be made on behalf of the employee. In a plan that is top-heavy (as defined in section 416), such compensation may not exceed $200,000. Compensation may not exclude amounts less than a stated amount, such as the integration level under the plan. Compensation may include all compensation for the plan year, including compensation for the period when an employee was ineligible to make a cash or deferred election.

(B) Nondiscrimination. (1) If the plan's definition of compensation has the effect of discriminating in favor of employees who are highly compensated, a nondiscriminatory definition shall be determined by the Commissioner.

(2) A plan's definition of compensation will be treated as nondiscriminatory if the plan defines compensation for a plan year either as (i) an employee's total nondeferred compensation includible in gross income plus elective contributions under the plan and/or elective contributions under a plan described in section 125 or (ii) an employee's W-2 or total nondeferred compensation includible in gross income.

(ii) Years after December 31, 1986. For plan years which begin after December 31, 1986, or such later date provided in paragraph (h) of this section, "compensation" has the meaning given such term by section 414(s). For plan years beginning after December 31, 1988, or on or after the later date provided under paragraph (h) of this section, the applicable period under section 414(s) for purposes of applying section 401(k) and this section is the plan year for which a determination under paragraph (b) is being made.

(10) Highly compensated employees. (i) For plan years which begin after December 31, 1979, and before January 1, 1987, or such later date provided under paragraph (h) of this section, for purposes of the actual deferral percentage test, highly compensated employees are the one-third of all eligible employees (rounded to the nearest integer) who receive the most compensation. When one or more employees of a group would be highly compensated employees except that each member of the group receives the same amount of compensation, the employer shall designate which employees of the group are highly compensated, so that one-third of all eligible employees are considered highly compensated.

(ii) For plan years beginning after December 31, 1986, or such later date provided under paragraph (h) of this section, the term "highly compensated employee" has the meaning given such term by section 414(q).

(11) Pre-ERISA money purchase pension plan. (i) A pre-ERISA money purchase pension plan is a pension plan—

(A) That is a defined contribution plan (as defined in section 414(i));

(B) That was in existence on June 27, 1974, and as in effect on that date, included a salary reduction agreement described in paragraph (a)(3) of this section; and

(C) Under which neither the employee contributions nor the employer contributions, including elective contributions, may exceed the levels (as a percentage of compensation) provided for by the contribution formula in effect on June 27, 1974.

(ii) A plan was in existence on June 27, 1974, if it was a written plan adopted on or before that date, even if no funds had yet been paid to the trust associated with the plan.

(12) Rural electric cooperative plan. For purposes of this section, a rural electric cooperative plan is a plan described in section 401(k)(7).

(13) Excess contributions. The term "excess contributions" means, with respect to a plan year, the excess of the elective contributions, including qualified nonelective contributions and qualified matching contributions that are treated as elective contributions under paragraphs (b)(2) and (b)(3), on behalf of eligible highly compensated employees for the plan year over the maximum amount of such contributions permitted under paragraphs (b)(2) and (b)(4). The amount of excess contributions for each highly compensated employee is determined by using the method described in paragraph (f)(2) of this section.

(h) Effective dates—(1) In general. Except as otherwise provided, in this paragraph (h), or as specifically provided elsewhere in this section, this section shall apply to plan years beginning after December 31, 1979.

(2) Collectively bargained plans. In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before March 1, 1986,

(i) The provisions of this section first effective for plan years which begin after December 31, 1986, shall not apply to years which begin before the earlier of—

(A) The date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof after February 28, 1986), or

(B) January 1, 1989; and

(ii) The provisions of this section first effective for plan years which begin after December 31, 1988, shall not apply to years which begin before the earlier of—

(A) The later of—

(*1*) January 1, 1989, or,

(*2*) The date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof after February 28, 1986) or

(B) January 1, 1991.

(3) Transitional rules. (i) See § 1.402(a)-1(d)(3) for a transitional rule applicable to cash or deferred arrangements in existence on June 27, 1974.

(ii) For plan years beginning after December 31, 1979 (or, in the case of a pre-ERISA money purchase pension plan, plan years beginning after July 18, 1984) and before January 1, 1988, a reasonable interpretation of the rules set forth in section 401(k) of the Code (as in effect during those years) may be relied upon to determine whether a cash or deferred arrangement was qualified during those years. Operation in accordance with the proposed regulations published in the Federal Register on November 10, 1981, 46 FR 55544, will be deemed a reasonable interpretation of section 401(k).

(4) Transitional rules for plans of state and local governments. (i) A plan adopted by a state or local government prior to May 6, 1986, that is not a collectively bargained plan is subject to the transitional rules of paragraphs (h)(4) (ii), (iii), and (iv) of this section.

(ii) For plan years beginning before January 1, 1989, the plan is subject to the ADP test in section 401(k)(3) prior to its amendment by section 1116(a) of TRA '86. For plan years beginning after December 31, 1988, the plan is subject to the ADP test in paragraph (b)(4)(i) of this section.

(iii) (A) For plan years beginning before January 1, 1989, in the case of an employee who is eligible to participate in more than one cash or deferred arrangement of the same employer, the actual

deferral percentage shall be calculated by treating all cash or deferred arrangements in which the employee is eligible to participate as one cash or deferred arrangement.

(B) For plan years beginning after December 31, 1988, in the case of a highly compensated employee who is eligible to participate in more than one cash or deferred arrangement of the same employer, the actual deferral percentage shall be calculated by treating all cash or deferred arrangements in which the highly-compensated employee is eligible to participate as one cash or deferred arrangement.

(iv) For plan years beginning before January 1, 1989, the plan must use the definition of "highly compensated employee" contained in paragraph (g)(10)(i) of this section, and the definition of compensation contained in paragraph (g)(9)(i) of this section. For plan years which begin after December 31, 1988, the plan must use the definitions of "highly compensated employee" and "compensation" contained in sections 414(q) and (s), respectively, for purposes of the participation and discrimination standards of paragraph (b) of this section and must follow the rules pertaining to compensation in paragraph (g)(9)(ii) of this section.

(v) In the case of a plan that is maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers adopted by a state or local government prior to May 6, 1986, the provisions in paragraphs (h)(4) (ii), (iii) and (iv) of this section and other provisions of this section that would be subject to paragraph (h)(2) if they were not a state or local plan described above, effective for plan years beginning after December 31, 1988, shall not apply to years beginning before the earlier of—

(A) The later of—

(1) January 1, 1989, or

(2) The date on which the last such collective bargaining agreements terminates (determined without regard to any extension thereof after February 28, 1986), or

(B) January 1, 1991.

[T.D. 8217, 53 FR 29664, Aug. 8, 1988; 53 FR 34194, Sept. 2, 1988; 53 FR 34285, Sept. 6, 1988; 53 FR 36391, Sept. 19, 1988; 53 FR 43688, Oct. 28, 1988]

§ 1.402(a)–1 Taxability of beneficiary under a trust which meets the requirements of section 401(a).

(a) In general. (1)(i) Section 402 relates to the taxation of the beneficiary of an employees' trust. If an employer makes a contribution for the benefit of an employee to a trust described in section 401(a) for the taxable year of the employer which ends within or with a taxable year of the trust for which the trust is exempt under section 501(a), the employee is not required to include such contribution in his income except for the year or years in which such contribution is distributed or made available to him. It is immaterial in the case of contributions to an exempt trust whether the employee's rights in the contributions to the trust are forfeitable or nonforfeitable either at the time the contribution is made to the trust or thereafter.

(ii) The provisions of section 402(a) relate only to a distribution by a trust described in section 401(a) which is exempt under section 501(a) for the taxable year of the trust in which the distribution is made. With two exceptions, the distribution from such an exempt trust when received or made available is taxable to the distributee to the extent provided in section 72 (relating to annuities). First, for taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to such distributions. For taxable years beginning after December 31, 1963, such distributions may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). Secondly, certain total distributions described in section 402(a)(2) are taxable as long-term capital gains. For the treatment of such total distributions, see subparagraph (6) of this paragraph. Under certain circumstances, an amount representing the unrealized appreciation in the value of the securities of the employer is excludable from gross income for the year of distribution. For the rules relating to such exclusion, see paragraph (b) of this section. Furthermore, the exclusion provided by section 105(d) is applicable to a distribution from a trust described in section 401(a) and exempt under section 501(a) if such distribution constitutes wages or payments in lieu of wages for a period during which an employee is absent from work on account of a personal injury or sickness. See § 1.72–15 for the rules relating to the tax treatment of accident or health benefits received under a plan to which section 72 applies.

(iii) Except as provided in paragraph (b) of this section, a distribution of property by a trust described in section 401(a) and exempt under section 501(a) shall be taken into account by the distributee at its fair market value.

(iv) If a trust is exempt for the taxable year in which the distribution occurs, but was not so exempt for one or more prior taxable years under section 501(a) (or under section 165(a) of the Internal Revenue Code of 1939 for years to which such section was applicable), the contributions of the employer which were includible in the gross income of the employee for the taxable year when made shall, in accordance with section 72(f), also be treated as part of the consideration paid by the employee.

(v) If the trust is not exempt at the time the distribution is received by or made available to the employee, see section 402(b) and paragraph (b) of § 1.402(b)-1.

(vi) For the treatment of amounts paid to provide medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401-14, see paragraph (h) of § 1.72-15.

(2) If a trust described in section 401(a) and exempt under section 501(a) purchases an annuity contract for an employee and distributes it to the employee in a year for which the trust is exempt, the contract containing a cash surrender value which may be available to an employee by surrendering the contract, such cash surrender value will not be considered income to the employee unless and until the contract is surrendered. For the rule as to nontransferability of annuity contracts issued after 1962, see paragraph (b)(2) of § 1.401-9. If, however, the contract distributed by such exempt trust is a retirement income, endowment, or other life insurance contract and is distributed after October 26, 1956, the entire cash value of such contract at the time of distribution must be included in the distributee's income in accordance with the provisions of section 402(a), except to the extent that, within 60 days after the distribution of such contract, all or any portion of such value is irrevocably converted into a contract under which no part of any proceeds payable on death at any time would be excludable under section 101(a) (relating to life insurance proceeds). If the contract distributed by such trust is a transferable annuity contract issued after 1962, or a retirement income, endowment, or other life insurance contract which is distributed after 1962 (whether or not transferable), then notwithstanding the preceding sentence the entire cash value of the contract is includible in the distributee's gross income, unless within such 60 days such contract is also made nontransferable.

(3) For the rules applicable to premiums paid by a trust described in section 401(a) and exempt under section 501(a) for the purchase of retirement income, endowment, or other contracts providing life insurance protection payable upon the death of the employee-participant, see paragraph (b) of § 1.72-16.

(4) For the rules applicable to the amounts payable by reason of the death of an employee under a contract providing life insurance protection, or an annuity contract, purchased by a trust described in section 401(a) and exempt under section 501(a), see paragraph (c) of § 1.72-16.

(5) If pension or annuity payments or other benefits are paid or made available to the beneficiary of a deceased employee or a deceased retired employee by a trust described in section 401(a) which is exempt under section 501(a), such amounts are taxable in accordance with the rules of section 402(a) and this section. In case such amounts are taxable under section 72, the "investment in the contract" shall be determined by reference to the amount contributed by the employee and by applying the applicable rules of sections 72 and 101(b)(2)(D). In case the amounts paid to, or includible in the gross income of, the beneficiaries of the deceased employee or deceased retired employee constitute a distribution to which subparagraph (6) of this paragraph is applicable, the extent to which the distribution is taxable is determined by reference to the contributions of the employee, by reference to any prior distributions which were excludable from gross income as a return of employee contributions, and by applying the applicable rules of sections 72 and 101(b).

(6)(i) If the total distributions payable with respect to any employee under a trust described in section 401(a) which in the year of distribution is exempt under section 501(a) are paid to, or includible in the gross income of, the distributee within one taxable year of the distributee on account of the employee's death or other separation from the service, or death after such separation from service, the amount of such distribution, to the extent it exceeds the net amount contributed by the employee, shall be considered a gain from the sale or exchange of a capital asset held for more than six months. The total distributions payable are includible in the gross income of the distributee within one taxable year if they are made available to such distributee and the distributee fails to make a timely election under section 72(h) to receive an annuity in lieu of such total distributions. The "net amount contributed by the employee" is the amount actually contributed by the employee plus any amounts considered to be con-

tributed by the employee under the rules of sections 72(f), 101(b), and subparagraph (3) of this paragraph, reduced by any amounts theretofore distributed to him which were excludable from gross income as a return of employee contributions. See, however, paragraph (b) of this section for rules relating to the exclusion of amounts representing net unrealized appreciation in the value of securities of the employer corporation. In addition, all or part of the amount otherwise includible in gross income under this paragraph by a non-resident alien individual in respect of a distribution by the United States under a qualified pension plan may be excludable from gross income under section 402(a)(4). For rules relating to such exclusion, see paragraph (c) of this section. For additional rules relating to the treatment of total distributions described in this subdivision in the case of a nonresident alien individual, see sections 871 and 1441 and the regulations thereunder.

(ii) The term "total distributions payable" means the balance to the credit of an employee which becomes payable to a distributee on account of the employee's death or other separation from the service or on account of his death after separation from the service. Thus, distributions made before a total distribution (for example, annuity payments received by the employee after retirement), will not defeat application of the capital gains treatment with respect to the total distributions received by a beneficiary upon the death of the employee after retirement. However, a distribution on separation from service will not receive capital gains treatment unless it constitutes the total amount in the employee's account at the time of his separation from service. If the total amount in the employee's account at the time of his death or other separation from the service or death after separation from the service is paid or includible in the gross income of the distributee within one taxable year of the distributee, such amount is entitled to the capital gains treatment notwithstanding that in a later taxable year an additional amount, attributable to the last year of service, is credited to the account of the employee and distributed.

(iii) If an employee retires and commences to receive an annuity but subsequently, in some succeeding taxable year, is paid a lump sum in settlement of all future annuity payments, the capital gains treatment does not apply to such lump sum settlement paid during the lifetime of the employee since it is not a payment on account of separation from the service, or death after separation, but is on account of the settlement of future annuity payments.

(iv) If the "total distributions payable" are paid or includible in the gross income of several distributees within one taxable year on account of the employee's death or other separation from the service or on account of his death after separation from the service, the capital gains treatment is applicable. The total distributions payable are paid within one taxable year of the distributees when, for example, a portion of such total is distributed in cash to one distributee and the balance is used to purchase an annuity contract which is distributed to the other distributee. However, if the share of any distributee is not paid or includible in his gross income within the same taxable year in which the shares of the other distributees are paid or includible in their gross income, none of the distributees is entitled to the capital gains treatment, since the total distributions payable are not paid or includible in the distributees' gross income within one taxable year. For example, if the total distributions payable are made available to each of two distributees and one elects to receive his share in cash while the other makes a timely election under section 72(h) to receive his share in installment payments from the trust, the capital gains treatment does not apply to either distributee.

(v) For regulations as to certain plan terminations, see § 1.402(e)–1.

(vi) The term "total distributions payable" does not include United States Retirement Plan Bonds held by a trust to the credit of an employee. Thus, a distribution by a qualified trust may constitute a total distributions payable with respect to an employee even though the trust retains retirement plan bonds registered in the name of such employee. Similarly, the proceeds of a retirement plan bond received as a part of the total amount to the credit of an employee will not be entitled to capital gains treatment. See section 405(e) and paragraph (a)(4) of § 1.405–3.

(vii) For purposes of determining whether the total distributions payable to an employee have been distributed within one taxable year, the term "total distributions payable" includes amounts held by a trust to the credit of an employee which are attributable to contributions on behalf of the employee while he was a self-employed individual in the business with respect to which the plan was established. Thus, a distribution by a qualified trust is not a total distributions payable with respect to an employee if the trust retains amounts which are so attributable.

(viii) The term "total distributions payable" does not include any amount which has been placed in a separate account for the funding of medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401–14. Thus, a distribution by a qualified trust may constitute a total distributions payable with respect to an employee even though the trust retains amounts attributable to the funding of medical benefits described in section 401(h).

(7) The capital gains treatment provided by section 402(a)(2) and subparagraph (6) of this paragraph is not applicable to distributions paid to a distributee to the extent such distributions are attributable to contributions made on behalf of an employee while he was a self-employed individual in the business with respect to which the plan was established. For the taxation of such amounts, see § 1.72–18. For the rules for determining the amount attributable to contributions on behalf of an employee while he was self-employed, see paragraphs (b)(4) and (c)(2) of such section.

(8) For purposes of this section, the term "employee" includes a self-employed individual who is treated as an employee under section 401(c)(1), and paragraph (b) of § 1.401–10, and the term "employer" means the person treated as the employer of such individual under section 401(c)(4).

(b) Distributions including securities of the employer corporation—(1) In general. (i) If a trust described in section 401(a) which is exempt under section 501(a) makes a distribution to a distributee, and such distribution includes securities of the employer corporation, the amount of any net unrealized appreciation in such securities shall be excluded from the distributee's income in the year of such distribution to the following extent:

(a) If the distribution constitutes a total distribution to which the regulations of paragraph (a)(6) of this section are applicable, the amount to be excluded is the entire net unrealized appreciation attributable to that part of the total distribution which consists of securities of the employer corporation; and

(b) If the distribution is other than a total distribution to which paragraph (a)(6) of this section is applicable, the amount to be excluded is that portion of the net unrealized appreciation in the securities of the employer corporation which is attributable to the amount considered to be contributed by the employee to the purchase of such securities.

The amount of net unrealized appreciation which is excludable under the regulations of (a) and (b) of this subdivision shall not be included in the basis of the securities in the hands of the distributee at the time of distribution for purposes of determining gain or loss on their subsequent disposition. In the case of a total distribution the amount of net unrealized appreciation which is not included in the basis of the securities in the hands of the distributee at the time of distribution shall be considered as a gain from the sale or exchange of a capital asset held for more than six months to the extent that such appreciation is realized in a subsequent taxable transaction. However, if the net gain realized by the distributee in a subsequent taxable transaction exceeds the amount of the net unrealized appreciation at the time of distribution, such excess shall constitute a long-term or short-term capital gain depending upon the holding period of the securities in the hands of the distributee.

(ii) For purposes of section 402(a) and of this section, the term "securities" means only shares of stock and bonds or debentures issued by a corporation with interest coupons or in registered form, and the term "securities of the employer corporation" includes securities of a parent or subsidiary corporation (as defined in subsections (e) and (f) of section 425) of the employer corporation.

(2) Determination of net unrealized appreciation. (i) The amount of net unrealized appreciation in securities of the employer corporation which are distributed by the trust is the excess of the market value of such securities at the time of distribution over the cost or other basis of such securities to the trust. Thus, if a distribution consists in part of securities which have appreciated in value and in part of securities which have depreciated in value, the net unrealized appreciation shall be considered to consist of the net increase in value of all of the securities included in the distribution. For this purpose, two or more distributions made by a trust to a distributee in a single taxable year of the distributee shall be treated as a single distribution.

(ii) For the purpose of determining the net unrealized appreciation on a distributed security of the employer corporation, the cost or other basis of such security to the trust shall be computed in accordance with whichever of the following rules is applicable:

(a) If a security was earmarked for the account of a particular employee at the time it was purchased by or contributed to the trust so that the cost or other basis of such security to the trust is

reflected in the account of such employee, such cost or other basis shall be used.

(b) If as of the close of each taxable year of the trust (or other specified period of time not in excess of 12 consecutive calendar months) the trust allocates among the accounts of participating employees all securities acquired by the trust during the period (exclusive of securities unallocated under a plan providing for allocation in whole shares only), the cost or other basis to the trust of any securities allocated as of the close of a particular allocation period shall be the average cost or other basis to the trust of all securities of the same type which were purchased or otherwise acquired by the trust during such allocation period. For purposes of determining the average cost to the trust of securities included in a subsequent allocation, the actual cost to the trust of the securities unallocated as of the close of a prior allocation period shall be deemed to be the average cost or other basis to the trust of securities of the same type allocated as of the close of such prior allocation period.

(c) In a case where neither (a) nor (b) of this subdivision is applicable, if the trust fund, or a specified portion thereof, is invested exclusively in one particular type of security of the employer corporation, and if during the period the distributee participated in the plan none of such securities has been sold except for the purpose of paying benefits under the trust or for the purpose of enabling the trustee to obtain funds with which to exercise rights which have accrued to the trust, the cost or other basis to the trust of all securities distributed to such distributee shall be the total amount credited to the account of such distributee (or such portion thereof as was available for investment in such securities) reduced by the amount available for investment but uninvested on the date of distribution. If at the time of distribution to a particular distributee a portion of the amount credited to his account is forfeited, appropriate adjustment shall be made with respect thereto in determining the cost or other basis to the trust of the securities distributed.

(d)(1) In all other cases, there shall be used the average cost (or other basis) to the trust of all securities of the employer corporation of the type distributed to the distributee which the trust has on hand at the time of the distribution, or which the trust had on hand on a specified inventory date which date does not precede the date of distribution by more than twelve calendar months. If a distribution includes securities of the employer corporation of more than one type, the average cost (or other basis) to the trust of each type of security distributed shall be determined. The average cost to the trust of securities of the employer corporation on hand on a specified inventory date (or on hand at the time of distribution) shall be computed on the basis of their actual cost, considering the securities most recently purchased to be those on hand, or by means of a moving average calculated by subtracting from the total cost of securities on hand immediately preceding a particular sale or distribution an amount computed by multiplying the number of securities sold or distributed by the average cost of all securities on hand preceding such sale or distribution.

(2) These methods of computing average cost may be illustrated by the following examples:

Example (1). A, a distributee who makes his income tax returns on the basis of a calendar year, receives on August 1, 1954, in a total distribution, to which paragraph (a)(6) of this section is applicable, ten shares of class D stock of the employer corporation. On July 1, 1954 (the specified inventory date of the trust), the trust had on hand 80 shares of class D stock. The average cost of the 10 shares distributed, on the basis of the actual cost method, is $100 computed as follows:

Shares	Purchase date	Cost per share	Total cost
20	June 24, 1954	$101	$2,020
40	Jan. 10, 1953	102	4,080
20	Oct. 20, 1952	95	1,900
80			$8,000

Example (2). B, a distributee who makes his income tax returns on the basis of a calendar year, receives on October 31, 1954, in a total distribution, to which paragraph (a)(6) of this section is applicable, 20 shares of class E stock of the employer corporation. The specified inventory date of the trust is the last day of each calendar year. The trust had on hand on December 31, 1952, 1,000 shares of class E stock of the employer corporation. During the calendar year 1953 the trust distributed to four distributees a total of 100 shares of such stock and acquired, through a number of purchases, a total of 120 shares. The average cost of the 20 shares distributed to B, on the basis of the moving average method, is $52 computed as follows:

	Shares	Total cost	Average cost
On hand Dec. 31, 1952	1,000	$50,000	$50
Distributed during 1953 at average cost of $50	100	5,000	(0)
	900	45,000	(0)
Purchased during 1953	120	8,040	(0)
On hand Dec. 31, 1953	1,020	53,040	52

(3) Unrealized appreciation attributable to employee contributions. In any case in which it is necessary to determine the amount of net unrealized appreciation in securities of the employer

corporation which is attributable to contributions made by an employee:

(i) The cost or other basis of the securities to the trust and the amount of net unrealized appreciation shall first be determined in accordance with the regulations in subparagraph (2) of this paragraph;

(ii) The amount contributed by the employee to the purchase of the securities shall be solely the portion of his actual contributions to the trust properly allocable to such securities, and shall not include any part of the increment in the trust fund expended in the purchase of the securities;

(iii) The amount of net unrealized appreciation in the securities distributed which is attributable to the contributions of the employee shall be that proportion of the net unrealized appreciation determined under the regulations of subparagraph (2) of this paragraph which the contributions of the employee properly allocable to such securities bear to the cost or other basis to the trust of the securities;

(iv) If a distribution consists solely of securities of the employer corporation, the contributions of the employee expended in the purchase of such securities shall be allocated to the securities distributed in a manner consistent with the principles set forth in subparagraph (2)(ii)(a), (b), (c), or (d) of this paragraph, whichever is applicable. Thus, the amount of the employee's contribution which can be identified as having been expended in the purchase of a particular security shall be allocated to such security, and the amount of such contribution which cannot be so identified shall be allocated ratably among the securities distributed. If a distribution consists in part of securities of the employer corporation and in part of cash or other property, appropriate allocation of a portion of the employee's contribution to such cash or other property shall be made unless such a location is inconsistent with the terms of the plan or trust.

(v) The application of this subparagraph may be illustrated by the following example:

Example. A trust distributes ten shares of stock issued by the employer corporation each of which has an average cost to the trust of $100, consisting of employee contributions in the amount of $60 and employer contributions in the amount of $40, and on the date of distribution has a fair market value of $180. The portion of the net unrealized appreciation attributable to the contributions of the employee with respect to each of the shares of stock is $48 computed as follows:

(1) Value of one share of stock on distribution date	$180
(2) Employee contributions	60
(3) Employer contributions	40
(4) Total contributions	100
(5) Net unrealized appreciation	80
(6) Portion of net unrealized appreciation attributable to employee contributions, 60/100 (amount of employee contributions (item 2) over total contributions (item 4) of $80 (item 5))	48

(vi) For the purpose of determining gain or loss to the distributee in the year or years in which any share of stock referred to in the example in subdivision (v) of this subparagraph is sold or otherwise disposed of in a taxable transaction, the basis of each such share in the hands of the distributee at the time of the distribution by the trust will be $132 computed as follows:

(a) Employee contributions	$60
(b) Employer contributions (taxable as ordinary income in the year the securities were distributed)	40
(c) Portion of net unrealized appreciation attributable to employer contributions (item (5) minus item (6)) (taxable as ordinary income in the year the securities were distributed)	32
(d) Basis of stock	132

(4) **Change in exempt status of trust.** For principles applicable in making appropriate adjustments if the trust was not exempt for one or more years before the year of distribution, see paragraph (a) of this section.

(c) **Certain distributions by United States to nonresident alien individuals.** (1) This paragraph applies to a distribution—

(i) Which is made by the United States under a pension plan described in section 401(a);

(ii) Which is made in respect of services performed by an employee of the United States; and

(iii) Which is received by, or made available to, a nonresident alien individual (including a nonresident alien individual who is a beneficiary of a deceased employee) during a taxable year beginning after December 31, 1959.

The amount of such a distribution that is includible in the gross income of the nonresident alien individual under section 402(a)(1) or (2) shall not exceed an amount which bears the same ratio to the amount which would be includible in gross income if it were not for this paragraph, as—

(a) The aggregate basic salary paid by the United States to the employee for his services in respect of which the distribution is being made, reduced by the amount of such basic salary which was not includible in the employee's gross income by rea-

son of being from sources without the United States, bears to

(b) The aggregate basic salary paid by the United States to the employee for his services in respect of which the distribution is being made.

See section 402(a)(4). See, also, paragraph (a) of this section for rules relating to the amount that is includible in gross income under section 402(a)(1) or (2) in the case of a distribution under a pension plan described in section 401(a).

(2) For purposes of applying section 402(a)(4) and this paragraph to distributions under the Civil Service Retirement Act (5 U.S.C. 2251), the term "basic salary" shall have the meaning provided in section 1(d) of such Act. In applying section 402(a)(4) and this paragraph to distributions under any other qualified pension plan of the United States, such term shall have a similar meaning. Thus, for example, "basic salary" does not, in any case, include bonuses, allowances, or overtime pay.

(3) The rules in this paragraph may be illustrated by the following examples:

Example (1). A, a retired employee of the United States who performed all of his services for the United States in a foreign country, receives, in respect of such services, a monthly pension of $200 under the Civil Service Retirement Act (a pension plan described in section 410(a)). A received an aggregate basic salary for his services for the United States of $100,000. A was a nonresident alien individual during the whole of his employment with the United States and, therefore, his basic salary from the United States was not includible in his gross income by reason of being from sources without the United States. A would be required, under section 72 but without regard to section 402(a)(4) and this paragraph, to include $60 of each monthly pension payment in his gross income. The amount that is includible in A's gross income under section 402(a)(1) with respect to the monthly payments received during taxable years beginning after December 31, 1959, and while A is a nonresident alien individual, is computed as follows:

(i) Amount of distribution includible in gross income under section 72 without regard to section 402(a)(4)	$60
(ii) Aggregate basic salary for services for United States	100,000
(iii) Aggregate basic salary for services for United States reduced by amount of such salary not includible in A's gross income by reason of being from sources without the United States	0
(iv) Amount includible in A's gross income under section 402(a)(1) ((iii) ÷ (ii) × (i), or $0/$100,000 × $60)	0

Example (2). B, a retired employee of the United States who performed services for the United States both in a foreign country and in the United States, receives, in respect of such services, a monthly pension of $240 under the Civil Service Retirement Act. B received an aggregate basic salary for his services for the United States of $120,000; $80,000 of which was for his services performed in the United States, and $40,000 of which was for his services performed in the foreign country. B was a nonresident alien individual during the whole of his employment with the United States and, consequently, the $40,000 basic salary for his services performed in the foreign country was not includible in his gross income by reason of being from sources without the United States. B would be required, under section 72 but without regard to section 402(a)(4) and this paragraph, to include $165 of each monthly pension in his gross income. The amount that is includible in B's gross income under section 402(a)(1) with respect to the monthly payments received during taxable years beginning after December 31, 1959, and while B is a nonresident alien individual, is computed as follows:

(i) Amount of distribution includible in gross income under section 72 without regard to section 402(a)(4)	$165
(ii) Aggregate basic salary for services for United States	120,000
(iii) Aggregate basic salary for services for United States reduced by amount of such salary not includible in B's gross income by reason of being from sources without the United States ($120,000–$40,000)	80,000
(iv) Amount includible in B's gross income under section 402(a)(1) ((iii) ÷ (ii) × (i), or $80,000/$120,000 × $165)	110

(d) Salary reduction, cash or deferred arrangements—

(1) Inclusion in income. Whether a contribution to an exempt trust or plan described in section 401(a) or 403(a) is made by the employer or the employee must be determined on the basis of the particular facts and circumstances of each case. Nevertheless, an amount contributed to a plan or trust will, except as otherwise provided under paragraph (d)(2) of this section, be treated as contributed by the employee if such amount was contributed at the employee's election, even though the election was made before the year in which the amount was earned by the employee or before the year in which the amount has become currently available to the employee. Any amount treated as contributed by the employee is includible in the gross income of the employee for the year in which the amount would have been received by the employee but for the election. Thus, for example, if amounts are contributed to an exempt trust or plan by reason of a salary reduction agreement under a cash or deferred arrangement, such amounts are treated as received by the employee at such time as such amounts would have been received by the employee but for the election to defer, and thus are includible in the gross income of the employee for the year that includes such time (except as provided under paragraph (d)(2) of this section). A matching contribution described in section 401(m)(4) is not treated as an employee contribution merely because it is made by the employer as a result of the employee's

election. See § 1.401(k)-1(g) for definitions applicable to this paragraph (d)(1).

(2) Qualified cash or deferred arrangement. Elective contributions for a plan year made by an employer on behalf of an employee to a trust pursuant to a cash or deferred election under a qualified cash or deferred arrangement, as defined in section 401(k)(2), shall not be treated as received by or distributed to the employee or as employee contributions. See § 1.401(k)-1(g) for definitions and restrictions applicable to this paragraph (d)(2).

(3) Effective date and transitional rule. (i) In the case of a plan or trust that does not include a salary reduction or cash or deferred arrangement in existence on June 27, 1974, this paragraph applies to taxable years ending after such date.

(ii) In the case of a plan or trust that includes a salary reduction or a cash or deferred arrangement in existence on June 27, 1974, this paragraph applies to plan years beginning after December 31, 1979 (or, in the case of a pre-ERISA money purchase plan, as defined in § 1.401(k)-1(g), plan years beginning after July 18, 1984). For plan years of such plans or trusts beginning prior to January 1, 1980 (or, in the case of a pre-ERISA money purchase plan, plan years beginning before July 19, 1984), the taxable year of inclusion in gross income of the employee of any amount so contributed by the employer to the trust shall be determined in a manner consistent with Rev. Rul. 56-497, 1956-2 CB 284, Rev. Rul. 63-180, 1963-1 CB 189, and Rev. Rul. 68-89, 1968-1 CB 402.

(iii) A cash or deferred arrangement shall be considered as in existence on June 27, 1974, if, on or before such date, it was reduced to writing and adopted by the employer (including, in the case of a corporate employer, formal approval by the employer's board of directors and, if required, shareholders), even though no amounts had been contributed pursuant to the terms of the arrangement as of such date.

(iv) For plan years beginning after December 31, 1979 (or in the case of a pre-ERISA money purchase plan, plan years beginning after July 18, 1984) and before January 1, 1988, a reasonable interpretation of the rules set forth in section 401(k) of the Code (as in effect during those years) may be relied upon to determine whether contributions were made under a qualified cash or deferred arrangement. Operation in accordance with the proposed regulations published in the Federal Register on November 10, 1981, 46 FR 55544, will be deemed a reasonable interpretation of section 401(k).

[T.D. 6500, 25 FR 11675, Nov. 26, 1960, as amended by T.D. 6497, 25 FR 10021, Oct. 20, 1960; T.D. 6676, 28 FR 10142, Sept. 17, 1963; T.D. 6717, 29 FR 4092, March 28, 1964; T.D. 6722, 29 FR 5073, April 14, 1964; T.D. 6823, 30 FR 6340, May 6, 1965; T.D. 6885, 31 FR 7800, June 2, 1966; T.D. 6887, 31 FR 8786, June 24, 1966; T.D. 8217, 53 FR 29673, Aug. 8, 1988; 53 FR 34194, Sept. 2, 1988]

§ 1.402(a)(5)–1T Rollovers of partial distributions from qualified trusts and annuities (temporary).

Q–1: Can an employee or the surviving spouse of a deceased employee roll over to an individual retirement account or annuity, described in section 408(a) or (b), the taxable portion of a partial distribution from a qualified trust described in section 401(a), a qualified plan described in section 403(a), or a tax-sheltered annuity contract under section 403(b)?

A–1: Yes. For distributions made after July 18, 1984, the taxable portion of a partial distribution may be rolled over within 60 days of the distribution to an individual retirement account or annuity.

Q–2: Are there special requirements applicable to rollovers of partial distributions?

A–2: Yes. Section 402(a)(5)(D)(i) specifies that no part of a partial distribution may be rolled over unless the distribution is equal to at least 50 percent of the balance to the credit of the employee in the contract or plan immediately before the distribution, and the distribution is not one of a series of periodic payments. For purposes of this section, the balance to the credit of an employee does not include any accumulated deductible employee contributions (within the meaning of section 72(*o*)). In addition, in calculating the balance to the credit for purposes of the 50 percent test, qualified plans are not to be aggregated with other qualified plans and tax-sheltered annuity contracts are not to be aggregated with other tax-sheltered annuity contracts. Also, in applying the 50 percent test to a surviving spouse, the balance to the credit is the maximum amount the spouse is entitled to receive under the plan or contract, rather than the total balance to the credit of the employee. The rollover of a partial distribution may result in adverse tax consequences; see section 402(a)(5)(D) (iii) and (iv).

Q–3: Are there any other requirements applicable to rollovers of partial distribution?

A–3: Yes. Section 402(a)(5)(D)(i)(III) requires the employee to elect, in conformance with Treasury regulations, to treat a contribution of a partial distribution to an IRA as a rollover contribution. An election is made by designating, in writing, to the trustee or issuer of the IRA at the time of the contribution that the contribution is to be treated as a rollover contribution. This requirement of a written designation to the trustee or issuer of the IRA is effective for contributions paid to the trustee or issuer of the IRA after March 20, 1986. For contributions paid to the trustee or issuer before March 21, 1986, an election is made by computing the individual's income tax liability on the income tax return for the taxable year in which the distribution occurs in a manner consistent with not including the distribution (or portion thereof) in gross income. Both such elections are irrevocable, except that an election made on an income tax return filed before March 21, 1986 is revocable.

Q–4: Does the election requirement apply to rollovers of qualified total distributions or rollover contributions described in section 402(a)(5) or (7), 403(a)(4), 403(b)(8), 405(d)(3), or 408(d)(3) to individual retirement accounts and annuities (IRAs)?

A–4: Yes. No amounts may be treated as a rollover contribution to an IRA under section 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8), 405(d)(3) (as amended by section 491(c) of the TRA of 1984), or 408(d)(3) unless the requirements described in Q & A-3 of this section are satisfied. Thus, once any portion of a total distribution is irrevocably designated as a rollover contribution, such distribution is not taxable under section 402 or 403 and, therefore, is not eligible for the special capital gains and separate tax treatment under section 402(a) and (e). Election requirements for rollover contributions to IRAs described in this Q &A-4 are subject to the same effective date rules set forth in Q &A-3.

[T.D. 8073, 51 FR 4320, Feb. 4, 1986]

§ 1.402(b)–1 Treatment of beneficiary of trust not exempt under section 501(a).

(a) Taxation by reason of employer contributions made after August 1, 1969—(1) Taxation of contributions. Section 402(b) provides rules for taxing an employee on contributions made on his behalf by an employer to an employees' trust that is not exempt under section 501(a). In general, any such contributions made after August 1, 1969, during a taxable year of the employer which ends within or with a taxable year of the trust for which it is not so exempt shall be included as compensation in the gross income of the employee for his taxable year during which the contribution is made, but only to the extent that the employee's interest in such contribution is substantially vested at the time the contribution is made. The preceding sentence does not apply to contracts referred to in the transitional rule of paragraph (d)(1)(ii) or (iii) of this section. For the definition of the terms "substantially vested" and "substantially nonvested" see § 1.83–3(b).

(2) Determination of amount of employer contributions. If, for an employee, the actual amount of employer contributions referred to in paragraph (a)(1) of this section for any taxable year of the employee is not known, such amount shall be either an amount equal to the excess of—

(i) The amount determined in accordance with the formula described in § 1.403(b)–1(d)(4) as the end of such taxable year, over

(ii) The amount determined in accordance with the formula described in § 1.403(b)–1(d)(4) as of the end of the prior taxable year,

or the amount determined under any other method utilizing recognized actuarial principles that are consistent with the provisions of the plan under which such contributions are made and the method adopted by the employer for funding the benefits under the plan.

(b) Taxability of employee when rights under nonexempt trust change from nonvested to vested—(1) In general. If rights of an employee under a trust become substantially vested during a taxable year of the employee (ending after August 1, 1969), and a taxable year of the trust for which it is not exempt under section 501(a) ends with or within such year, the value of the employee's interest in the trust on the date of such change shall be included in his gross income for such taxable year, to the extent provided in paragraph (b)(3) of this section. When an employees' trust that was exempt under section 501(a) ceases to be so exempt, an employee shall include in his gross income only amounts contributed to the trust during a taxable year of the employer that ends within or with a taxable year of the trust in which it is not so exempt (to the same extent as if the trust had not been so exempt in all prior taxable years).

(2) Value of an employee's interest in a trust. (i) For purposes of this section, the term "the value of an employee's interest in a trust" means the amount of the employee's beneficial interest in the net fair market value of all the assets in the

trust as of any date on which some or all of the employee's interest in the trust becomes substantially vested. The net fair market value of all the assets in the trust is the total amount of the fair market values (determined without regard to any lapse restriction, as defined in § 1.83-3(h)) of all the assets in the trust, less the amount of all the liabilities (including taxes) to which such assets are subject or which the trust has assumed (other than the rights of any employee in such assets), as of the date on which some or all of the employee's interest in the trust becomes substantially vested.

(ii) If a separate account in a trust for the benefit of two or more employees is not maintained for each employee, the value of an employee's interest in such trust shall be determined in accordance with the formula described in § 403(b)-1(d)(4) or any other method utilizing recognized actuarial principles that are consistent with the provisions of the plan under which the contributions are made and the method adopted by the employer for funding the benefits under the plan.

(iii) If there is no valuation of a nonexempt trust's assets on the date of the change referred to in paragraph (b)(1) of this section, the value of an employee's interest in such trust is determined by taking the weighted average of the values on the nearest valuation dates occurring before and after the date of such change. The average is to be determined in the manner described in § 20.2031-2(b)(1).

(3) **Extent to which value of an employee's interest is includible in gross income.** For purposes of paragraph (b)(1) of this section, there shall be included in the gross income of the employee for his taxable year in which his rights under the trust become substantially vested only that portion of the value of his interest in the trust that is attributable to contributions made by the employer after August 1, 1969. However, the preceding sentence shall not apply—

(i) To the extent such value is attributable to a contribution made on the date of such change, and

(ii) To the extent such value is attributable to contributions described in paragraph (d)(1)(ii) or (iii) of this section (relating to contributions made pursuant to a binding contract entered into before April 22, 1969).

For purposes of this (3), if the value of an employee's interest in a trust which is attributable to contributions made by the employer after August 1, 1969, is not known, it shall be deemed to be an amount which bears the same ratio to the value of the employee's interest as the contributions made by the employer after such date bear to the total contributions made by the employer.

(4) **Partial vesting.** For purposes of paragraph (b)(1) of this section, if only part of an employee's interest in the trust becomes substantially vested during any taxable year, then only the corresponding part of the value of the employee's interest in such trust is includible in his gross income for such year. In such a case, it is first necessary to compute, under the rules in paragraphs (b)(1) and (2) of this section, the amount that would be includible if his entire interest had changed to a substantially vested interest during such a year. The amount that is includible under this paragraph (4) is the amount determined under the preceding sentence multiplied by the percent of the employee's interest which became substantially vested during the taxable year.

(5) **Basis.** The basis of any employee's interest in a trust to which this section applies shall be increased by the amount included in his gross income under this section.

(6) **Treatment as owner of trust.** In general, a beneficiary of a trust to which this section applies may not be considered to be the owner under subpart E, part I, subchapter J, chapter I of the Code of any portion of such trust which is attributable to contributions to such trust made by the employer after August 1, 1969, or to incidental contributions made by the employee after such date. However, where contributions made by the employee are not incidental when compared to contributions made by the employer, such beneficiary shall be considered to be the owner of the portion of the trust attributable to contributions made by the employee, if the applicable requirements of such subpart E are satisfied. For purposes of this paragraph (6), contributions made by an employee are not incidental when compared to contributions made by the employer if the employee's total contributions as of any date exceed the employer's total contributions on behalf of the employee as of such date.

(7) **Example.** The provisions in this paragraph may be illustrated by the following example:

Example. On January 1, 1968 M corporation establishes an employees' trust, which is not exempt under section 501(a), for some of its employees, including A, reserving the right to discontinue contributions at any time. M corporation contributes $5,000 on A's behalf to the trust on February 1, 1968. At the time of contribution 50 percent of A's interest was substantially vested. On January 1, 1971, and January 1, 1974, M corporation makes additional $5,000 contributions to the trust on A's behalf. A's interest in the trust changed from a 50

percent substantially vested to a 100 percent substantially vested interest in the trust on December 31, 1974. Assume that the value of A's interest in the trust on December 31, 1974, which is attributable to employer contributions made after August 1, 1969, is calculated to be $11,000 under paragraph (b)(3) of this section. The amount includible in A's gross income for 1971 and 1974 is computed as follows:

(i) Amount of M corporation's contribution made on January 1, 1971, to the trust which is includible in A's gross income under paragraph (b)(1) of this section (50 percent substantially vested interest in the trust times $5,000 contribution)—$2,500.

1974

(i) Amount of M corporation's contribution made on January 1, 1974, to the trust which is includible in A's gross income under paragraph (b)(1) of this section (50 percent substantially vested interest in the trust times $5,000 contribution)—$2,500.

(ii) Amount which would have been includible if A's entire interest had changed to a substantially vested interest (value of employee's interest in the trust attributable to employer contributions made after August 1, 1969—) $11,000.

(iii) Percent of A's interest that became substantially vested on December 31, 1974—50 percent.

(iv) Amount includible in A's gross income for 1974 in respect of his percentage change from a substantially nonvested to a substantially vested interest in the trust (50 percent of $11,000)—$5,500.

(v) Total amount includible in A's gross income for 1974 ((i) plus (iv))—$8,000.

(c) Taxation of distributions from trust not exempt under section 501(a)—(1) In general. Any amount actually distributed or made available to any distributee by an employees' trust in a taxable year in which it is not exempt under section 501(a) shall be taxable under section 72 (relating to annuities) to the distributee in the taxable year in which it is so distributed or made available. For taxable years beginning after December 31, 1963, such amounts may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). If, for example, the distribution from such a trust consists of an annuity contract, the amount of the distribution shall be considered to be the entire value of the contract at the time of distribution. Such value is includible in the gross income of the distributee to the extent that such value exceeds the investment in the contract, determined by applying sections 72 and 101(b). The distributions by such a trust shall be taxed as provided in section 72 whether or not the employee's rights to the contributions become substantially vested beforehand. For rules relating to the treatment of employer contributions to a nonexempt trust as part of the consideration paid by the employee, see section 72(f). For rules relating to the treatment of the limited exclusion allowable under section 101(b)(2)(D) as additional consideration paid by the employee, see the regulations under that section.

(2) Distributions before annuity starting date. Any amount distributed or made available to any distributee before the annuity starting date (as defined in section 72(c)(4)) by an employees' trust in a taxable year in which it is not exempt under section 501(a) shall be treated as distributed in the following order—

(i) First, from that portion of the employee's interest in the trust attributable to contributions made by the employer after August 1, 1969 (other than those referred to in paragraph (d)(1)(ii) or (iii) of this section) that has not been previously includible in the employee's gross income, to the extent that such a distribution is permitted under the trust (or the plan of which the trust is a part);

(ii) Second, from that portion of the employee's interest in the trust attributable to contributions made by the employer on or before August 1, 1969 (or contributions referred to in paragraph (d)(1)(ii) or (iii) of this section);

(iii) Third, from the remaining portion of the employee's interest in the trust attributable to contributions made by the employer.

If the employee has made contributions to the trust, amounts attributable thereto shall be treated as distributed prior to any amounts attributable to the employer's contributions, to the extent provided by the trust (or the plan of which the trust is a part). However, the portion of such amounts attributable to income earned on the employee's contributions made after August 1, 1969, shall be treated as distributed prior to any return of such contributions.

(d) Taxation by reason of employer contributions made on or before August 1, 1969. (1) Except as provided in section 402(d) (relating to taxable years beginning before January 1, 1977), any contribution to a trust made by an employer on behalf of an employee—

(i) On or before August 1, 1969, or

(ii) After such date, pursuant to a binding contract (as defined in § 1.83–3(b)(2)) entered into before April 22, 1969, or

(iii) After August 1, 1969, pursuant to a written plan in which the employee participated on April 22, 1969, and under which the obligation of the employer on such date was essentially the same as under a binding written contract, during a taxable year of the employer which ends within or with a taxable year of the trust for which the trust is not exempt under section 501(a) shall be included in income of the employee for his taxable year during which the contribution is made, if the employee's

beneficial interest in the contribution is nonforfeitable at the time the contribution is made. If the employee's beneficial interest in the contribution is forfeitable at the time the contribution is made, even though his interest becomes nonforfeitable later the amount of such contribution is not required to be included in the income of the employee at the time his interest becomes nonforfeitable.

(2)(i) An employee's beneficial interest in the contribution is nonforfeitable, within the meaning of sections 402(b), 403(c), and 404(a)(5) prior to the amendments made thereto by the Tax Reform Act of 1969 and section 403(b), at the time the contribution is made if there is no contingency under the plan that may cause the employee to lose his rights in the contribution. Similarly, an employee's rights under an annuity contract purchased for him by his employer change from forfeitable to nonforfeitable rights within the meaning of section 403(d) prior to the repeal thereof by the Tax Reform Act of 1969 at that time when, for the first time, there is no contingency which may cause the employee to lose his rights under the contract. For example, if under the terms of a pension plan, an employee upon termination of his services before the retirement date, whether voluntarily or involuntarily, is entitled to a deferred annuity contract to be purchased with the employer's contributions made on his behalf, or is entitled to annuity payments which the trustee is obligated to make under the terms of the trust instrument based on the contributions made by the employer on his behalf, the employee's beneficial interest in such contributions is nonforfeitable.

(ii) On the other hand, if, under the terms of a pension plan, an employee will lose the right to any annuity purchased from or to be provided by, contributions made by the employer if his services should be terminated before retirement, his beneficial interest in such contributions is nonforfeitable.

(iii) The mere fact that an employee may not live to the retirement date, or may live only a short period after the retirement date, and may not be able to enjoy the receipt of annuity or pension payments, does not make his beneficial interest in the contributions made by the employer on his behalf forfeitable. If the employer's contributions have been irrevocably applied to purchase an annuity contract for the employee, or if the trustee is obligated to use the employer's contributions to provide an annuity for the employee provide only that the employee is alive on the dates the annuity payments are due, the employee's rights in the employer's contributions are nonforfeitable.

[T.D. 6500, 25 FR 11679, Nov. 26, 1960, as amended by T.D. 6783, 29 FR 18359, Dec. 24, 1964; T.D. 6885, 31 FR 7801, June 2, 1966; T.D. 7554, 43 FR 31922, July 24, 1978]

§ 1.402(c)–1 Taxability of beneficiary of certain foreign situs trusts.

Section 402(c) has the effect of treating, for purposes of section 402, the distributions from a trust which at the time of the distribution is located outside the United States in the same manner as distributions from a trust which is located in the United States. If the trust would qualify for exemption from tax under section 501(a) except for the fact that it fails to comply with the provisions of paragraph (a)(3)(i) of § 1.401–1, which restricts qualification to trusts created or organized in the United States and maintained here, section 402(a) and § 1.402(a)–1 are applicable to the distributions from such a trust. Thus, for example, a total distribution from such a trust is entitled to the long-term capital gains treatment of section 402(a)(2), except in the case of a nonresident alien individual (see section 871 and 1441 and the regulations thereunder). However, if the plan fails to meet any requirement of section 401 and the regulations thereunder in addition to paragraph (a)(3)(i) of § 1.401–1, section 402(b) and § 1.402(b)–1 are applicable to the distributions from such a trust.

[T.D. 6500, 25 FR 11679, Nov. 26, 1960]

§ 1.402(d)–1 Effect of section 402(d).

(a) If the requirements of section 402(d) are met, a contribution made by an employer on behalf of an employee to a trust which is not exempt under section 501(a) shall not be included in the income of the employee in the year in which the contribution is made. Such contribution will be taxable to the employee, when received in later years, as provided in section 72 (relating to annuities). For taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to such contributions. For taxable years beginning after December 31, 1963, such contributions, when received, may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). See paragraph (b) of § 1.403(c)–1. The intent and purpose of section 402(d) is to give those employees, covered under certain non-exempt trusts to which such section applies, essentially the same tax treatment as those covered by trusts described

in section 401(a) and exempt under section 501(a), except that the capital gains treatment referred to in section 402(a)(2) does not apply.

(b) Every person claiming the benefit of section 402(d) must be able to demonstrate to the satisfaction of the Commissioner that all of the provisions of such section are met. The taxpayer must produce sufficient evidence to prove:

(1) That, before October 21, 1942, he was employed by the particular employer making the contribution in question and was at such time definitely covered by a written agreement, entered into before October 21, 1942, between himself and the employer, or between the employer and the trustee of a trust established by the employer before October 21, 1942, and that the contribution by the employer was made pursuant to such agreement. The fact that an employee may have been potentially covered is not sufficient. Evidence that the employment was entered into, or the agreement executed, "as of" a date before October 21, 1942, or that the agreement or trust instrument which did not theretofore meet the requirements of section 402(d) was modified or amended after October 20, 1942, so as to come within the provisions of such section, will not satisfy the requirements of section 402(d).

(2) That such contribution, pursuant to the terms of such agreement, was to be applied for the purchase of an annuity contract for the taxpayer. In the case of a contribution by the employer of an annuity contract purchased by such employer and transferred by him to the trustee of the trust, evidence should be presented to prove that such contract was purchased for the taxpayer by the employer pursuant to the terms of a written agreement between the employer and the employee or between the employer and the trustee, entered into before October 21, 1942.

(3) That under the written terms of the trust agreement the taxpayer is not entitled during his lifetime, except with the consent of the trustee, to any payments other than annuity payments under the annuity contract or contracts purchased by the trustee or by the employer and transferred to the trustee, and that the trustee may grant or withhold such consent free from control by the taxpayer, the employer, or any other person. However, such control will not be presumed from the fact that the trustee is himself an officer or employee of the employer. As used in section 402(d) the phrase "if * * * under the terms of the trust agreement the employee is not entitled" means that the trust instrument must make it impossible for the prohibited distribution to occur whether by operation or natural termination of the trust, whether by power of revocation or amendment, other than with the consent of the trustee, whether by the happening of a contingency, by collateral arrangement, or any other means. It is not essential that the employer relinquish all power to modify or terminate the trust but it must be impossible, except with the consent of the trustee, to be received by the taxpayer contracts purchased by the trustee, or by the employer and transferred to the trustee, to be received by the taxpayer directly or indirectly, other than as annuity payments.

(4) The nature and amount of such contribution and the extent to which income taxes have been paid thereon before January 1, 1949, and not credited or refunded.

(5) If it is claimed that section 402(d) applies to amounts contributed to a trust after June 1, 1949, the taxpayer must prove to the satisfaction of the Commissioner that the trust did not, on June 1, 1949, qualify for exemption under section 165(a) of the Internal Revenue Code of 1939. Where an employer buys an annuity contract which is transferred to the trustee, the date of the purchase of the annuity contract and not the date of the transfer to the trustee is the controlling date in determining whether or not the contribution was made to the trust after June 1, 1949.

[T.D. 6500, 25 FR 11679, Nov. 26, 1960, as amended by T.D. 6885, 31 FR 7801, June 2, 1966]

§ 1.402(e)–1 Certain plan terminations.

Distributions made after December 31, 1953, and before January 1, 1955, as a result of the complete termination of an employees' trust described in section 401(a) which is exempt under section 501(a) shall be considered distributions on account of separation from service for purposes of section 402(a)(2) if the employer who established the trust is a corporation, and the termination of the plan is incident to the complete liquidation of the corporation before August 16, 1954, regardless of whether such liquidation is incident to a reorganization as defined in section 368.

[T.D. 6500, 25 FR 11680, Nov. 26, 1960]

§ 1.402(f)–1 Required explanation of rollovers, capital gains, and the separate tax on lump sum distributions.

(a) General rules. Section 402(f) requires plan administrators to give recipients of certain distributions a written explanation of the rules relating

to the taxation of certain amounts as capital gains under section 402(a)(2), the separate tax on the ordinary income portion of lump sum distributions under section 402(e), and the exclusion from gross income under section 402(a)(5) for amounts rolled over into eligible retirement plans. This notice must be provided to the recipient of any qualified total distribution or any partial distribution satisfying section 402(a)(5)(D)(i) that is made after December 31, 1984, not later than two weeks after the distribution is made.

(b) **Future safe-harbor notices.** The Commissioner may publish safe-harbor notices to aid plan administrators in complying with the section 402(f) requirements.

[T.D. 8219, 53 FR 31851, Aug. 22, 1988]

§ 1.403(a)–1 Taxability of beneficiary under a qualified annuity plan.

(a) An employee or retired or former employee for whom an annuity contract is purchased by his employer is not required to include in his gross income the amount paid for the contract at the time such amount is paid, whether or not his rights to the contract are forfeitable, if the annuity contract is purchased under a plan which meets the requirements of section 404(a)(2). For purposes of the preceding sentence, it is immaterial whether the employer deducts the amounts paid for the contract under such section 404(a)(2). See § 1.403(b)–1 for rules relating to annuity contracts which are not purchased under qualified plans but which are purchased by organizations described in section 501(c)(3) and exempt under section 501(a) or which are purchased for employees who perform services for certain public schools.

(b) The amounts received by or made available to any employee referred to in paragraph (a) of this section under such annuity contract shall be included in gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities), except that certain total distributions described in section 403(a)(2) are taxable as long-term capital gains. For the treatment of such total distributions, see § 1.403(a)–2. However, for taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to such amounts. For taxable years beginning after December 31, 1963, such amounts may be taken into account in computations under sections 1301 through 1305 (relating to income averaging).

(c) If upon the death of an employee or of a retired employee, the widow or other beneficiary of such employee is paid, in accordance with the terms of the annuity contract relating to the deceased employee, an annuity or other death benefit, the extent to which the amounts received by or made available to the beneficiary must be included in the beneficiary's income under section 403(a) shall be determined in accordance with the rules presented in paragraph (a)(5) of § 1.402(a)–1.

(d) An individual contract issued after December 31, 1962, or a group contract, which provides incidental life insurance protection may be purchased under a qualified annuity plan. For the rules as to nontransferability of such contracts issued after December 31, 1962, see § 1.401–9. For the rules relating to the taxation of the cost of the life insurance protection and the proceeds thereunder, see § 1.72–16. Section 403(a) is not applicable to premiums paid after October 26, 1956, for individual contracts which were issued prior to January 1, 1963, and which provide life insurance protection.

(e) As to inclusion of full-time life insurance salesmen within the class of persons considered to be employees, see section 7701(a)(20).

(f) For purposes of this section and § 1.403(a)–2, the term "employee" includes a self-employed individual who is treated as an employee under section 401(c)(1) and paragraph (b) of § 1.401–10, and the term "employer" means the person treated as the employer of such individual under section 401(c)(4). For the rules relating to annuity plans covering self-employed individuals, see section 404(a)(2) and §§ 1.404(a)–8 and 1.401–10 through 1.401–13.

(g) For the treatment of amounts paid to provide medical benefits described in section 401(h) as defined in § 1.401–14, see paragraph (h) of § 1.72–15.

[T.D. 6500, 25 FR 11680, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10143, Sept. 17, 1963; T.D. 6722, 29 FR 5073, April 14, 1964; T.D. 6783, 29 FR 18359, Dec. 24, 1964; T.D. 6885, 31 FR 7801, June 2, 1966]

§ 1.403(a)–2 Capital gains treatment for certain distributions.

(a) If the total amounts payable with respect to any employee for whom an annuity contract has been purchased by an employer under a plan which—

(1) Is a plan described in section 403(a)(1) and § 1.403(a)–1, and

(2) Requires that refunds of contributions with respect to annuity contracts purchased under such plan be used to reduce subsequent premiums on the contracts under the plan,

are paid to, or includible in gross income of, the payee within one taxable year of the payee by reason of the employee's death or other separation from the service, or death after such separation from the service, such total payments, to the extent they exceed the net amount contributed by the employee, shall be considered a gain from the sale or exchange of a capital asset held for more than six months. The "net amount contributed by the employee" is the amount actually contributed by the employee plus any amounts considered to be contributed by the employee under the rules of sections 72(f), 101(b), and paragraph (d) of § 1.403(a)–1, reduced by any amounts theretofore distributed to him which were excludable from his gross income as a return of employee contributions. For example, if under an annuity contract purchased under a plan described in this section, the total distributions payable to the employee's widow are paid to her in the year in which the employee dies, in the amount of $8,000, and if $5,000 thereof is excludable under section 101(b), and if the employee made contributions of $600 and had received no payments, the remaining amount of $2,400 will be considered a gain from the sale or exchange of a capital asset held for more than six months.

(b)(1) The term "total amounts" means the balance to the credit of an employee with respect to all annuities under the annuity plan which becomes payable to the payee by reason of the employee's death or other separation from the service, or by reason of his death after separation from the service. If an employee commences to receive annuity payments on retirement and then a lump sum payment is made to his widow upon his death, the capital gains treatment applies to the lump sum payment, but it does not apply to amounts received before the time the "total amounts" become payable. However, if the total amount to the credit of the employee at the time of his death or other separation from the service or death after separation from the service is paid or includible in the gross income of the payee within one taxable year of the payee, such amount is entitled to the capital gains treatment notwithstanding that in a later taxable year an additional amount is credited to the employee and paid to the payee.

(2) If more than one annuity contract is received under the plan, the capital gains treatment does not apply to any amount received on the surrender thereof unless all contracts under the plan with respect to a particular employee are surrendered either at the time of the employee's death or other separation from the service or death after separation from the service. Thus, if an employee receives two contracts on separation from the service and surrenders one of them in the year of separation and receives payments under the other until his death, the capital gains treatment is applicable to the balance paid to his beneficiary on his death if paid within one taxable year of the beneficiary. The amount received by the employee on surrender of the contract in the year of his separation from the service, however, would not receive capital gains treatment since the balance to the credit of the employee with respect to all amounts under the plan did not become payable at that time.

(3) If an employee retires and commences to receive an annuity but subsequently in some succeeding taxable year, he is paid a lump sum in settlement of all future annuity payments, the capital gains treatment does not apply to such lump sum settlement paid during the lifetime of the employee since it is not a payment on account of separation from the service, or death after separation, but is on account of the settlement of future annuity payments.

(4) If the "total amounts" payable under all annuity contracts under the plan with respect to a particular employee are paid or includible in the gross income of several payees within one taxable year on account of the employee's death or other separation from the service or on account of his death after separation from the service, the capital gains treatment is applicable. Thus, if the balance to the credit of a deceased employee under all annuity contracts provided under an annuity plan becomes payable to two payees, the capital gains treatment is applicable provided the "total amounts" payable are received by or includible in the gross income of both payees within the same taxable year. However, if the "total amounts" payable are made available to each payee and one elects to receive his share in cash while the other makes a timely election under section 72(h) to receive his share as an annuity, the capital gains treatment does not apply to either payee.

(5) For purposes of determining whether the total amounts payable to an employee have been paid within one taxable year, the term "total amounts" includes amounts under a plan which are attributable to contributions on behalf of an individual while he was self-employed in the busi-

ness with respect to which the plan was established. Thus, the "total amounts" payable are not paid within one taxable year if amounts remain payable which are so attributable.

(6) The term "total amounts" does not include any amount which has been placed in a separate account for the funding of benefits described in section 401(h). Thus, a distribution under a qualified annuity plan may constitute a distribution of the total amounts payable with respect to an employee even though amounts attributable to the funding of section 401(h) medical benefits as defined in paragraph (a) of § 1.401–14 are not so distributed.

(c) The provisions of this section are not applicable to any amounts paid to a payee to the extent such amounts are attributable to contributions made on behalf of an employee while he was a self-employed individual in the business with respect to which the plan was established. For the taxation of such amounts, see § 1.72–18. For the rules for determining the amount attributable to contributions on behalf of an employee while he was self-employed, see paragraphs (b)(4) and (c)(2) of such section.

[T.D. 6500, 25 FR 11681, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10143, Sept. 17, 1963; T.D. 6722, 29 FR 5073, April 14, 1964]

§ 1.403(b)–1 Taxability of beneficiary under annuity purchased by a section 501(c)(3) organization or public school.

(a) Amounts paid by employer during taxable years beginning before January 1, 1958—(1) In general. If an amount is paid during a taxable year of an employee (or a retired or former employee) beginning before January 1, 1958, toward the purchase for such employee of an annuity contract and such purchase is not part of an annuity plan which meets the requirements of section 404(a)(2), then such amount is not required to be included in the gross income of such employee for such taxable year—

(i) If such amount is paid by an employer which, at the time of the payment, is an organization described in section 501(c)(3) and exempt from tax under section 501(a), and

(ii) If the purchase of the annuity contract is merely a supplement to the past or current compensation of such employee (within the meaning of subparagraph (2) of this paragraph).

For purposes of this paragraph, it is immaterial whether or not the employee's rights to the annuity contract are forfeitable.

(2) Supplement to past or current compensation. For purposes of this paragraph, whether the purchase of an annuity contract is merely a "supplement to past or current compensation" is to be determined by all the surrounding facts and circumstances. One of the pertinent facts to be taken into consideration is the ratio of the consideration paid by the employer for an employee's contract to the amount of his past or current compensation. For example, if the annual premium paid for an employee's contract is $1,000 and his annual salary is $10,000, the ratio indicates that the premium paid for the contract is merely a supplement to the employee's current compensation. If, however, an employee receives no current compensation, or the annual premiums paid for his annuity contract approximate his annual salary, the amount paid for his contract will be considered to be current compensation and taxable to the employee in the year in which it is paid by the employer. Other pertinent considerations are whether the annuity contract is purchased as a result of an agreement for a reduction of the employee's annual salary, or whether it is purchased at his request in lieu of an increase in current compensation to which he otherwise might be entitled. In such cases, the amount paid for the contract shall also be considered to be current compensation.

(b) Amounts paid by employer during taxable years beginning after December 31, 1957—(1) In general. If amounts are contributed by an employer during a taxable year of an employee (or a retired or former employee) beginning after December 31, 1957, toward the purchase for such employee of an annuity contract and such purchase is not part of an annuity plan which meets the requirements of section 404(a)(2), then, to the extent such amounts do not exceed the exclusion allowance for such taxable year, they are not required to be included in the gross income of such employee for such taxable year, if at the time of the contribution—

(i) The employer is an organization described in section 501(c)(3) and exempt from tax under section 501(a), or

(ii) The employer is a State, a political subdivision of a State, or an agency or instrumentality of any one or more of the foregoing, and the employee is performing (or has performed) services for an educational institution (as defined in section 151(e)(4)), and

(iii) The employee's rights under the annuity contract are nonforfeitable except for failure to pay future premiums.

See paragraph (d) of this section for rules relating to the computation of an employee's exclusion allowance for a taxable year.

(2) Forfeitable rights which change to nonforfeitable rights. If an employee's rights under an annuity contract change from forfeitable to nonforfeitable rights, the amount which, under section 403(d), is includible in the gross income of such employee by reason of such change (computed without regard to subparagraph (1) of this paragraph) shall, for purposes of subparagraph (1) of this paragraph, be considered an amount contributed by the employer for such annuity contract as of the time the employee's rights under the contract change to nonforfeitable rights. Such amount will, therefore, be excludable from the employee's gross income for the taxable year in which the change occurs to the extent that it is so excludable under the rules contained in this section. In determining the extent to which such amount is excludable, this section shall be applied in the same manner as in the case of current employer contributions. Thus, no part of such amount is excludable if the employer is not an employer described in subparagraph (1) of this paragraph at the time the employee's rights under the annuity contract change from forfeitable to nonforfeitable rights. In addition, such amount will be excludable only to the extent it does not exceed the employee's exclusion allowance for the taxable year in which the change occurs. Since such an amount is considered as an amount contributed by the employer at the time the change occurs, it is immaterial whether the employer was an employer described in subparagraph (1) of this paragraph at the time the actual contributions were made.

(3) Agreement to take a reduction in salary or to forego an increase in salary. (i) There is no requirement that the purchase of an annuity contract for an employee must be merely a "supplement to past or current compensation" in order for the exclusion provided by this paragraph to apply to employer contributions for such annuity contract. Thus, the exclusion provided by this paragraph is applicable to amounts contributed by an employer for an annuity contract as a result of an agreement with an employee to take a reduction in salary, or to forego an increase in salary, but only to the extent such amounts are earned by the employee after the agreement becomes effective. Such an agreement must be legally binding and irrevocable with respect to amounts earned while the agreement is in effect. Except as provided in subdivision (ii) of this subparagraph, the employee must not be permitted to make more than one agreement with the same employer during any taxable year of such employee beginning after December 31, 1963; the exclusion provided by this paragraph shall not apply to any amounts which are contributed under any further agreement made by such employee during the same taxable year beginning after such date. However, the employee may be permitted to terminate the entire agreement with respect to amounts not yet earned.

(ii) An individual who is employed by an organization described in section 415(c)(4) may make a salary reduction agreement for his taxable year beginning in 1976 or 1977 at any time before the end of the 1976 or 1977 taxable year, respectively, without the agreement's being considered a new agreement within the meaning of this subparagraph. The agreement for 1976 may be made on or before June 15, 1977, and the agreement for 1977 may be made on or before April 17, 1978. This special rule only applies if the individual makes a statement of intention in accordance with § 11.415(c)(4)–1(b) electing, or determines his income tax liability for the taxable year in a way which is consistent with, one of the alternative limitations under section 415(c)(4) for 1976 or 1977 (as the case may be). The salary reduction agreement for 1976 may be made effective with respect to any amount earned during the taxpayer's most recent one-year period of service (as defined in paragraph (f) of this section) ending not later than the end of the 1976 taxable year, notwithstanding subdivision (i) of this subparagraph. Similarly, the salary reduction agreement for 1977 may be made effective with respect to such period of service ending not later than the end of the 1977 taxable year. If the salary reduction agreement for 1976 is entered into at any time after December 31, 1976, or if the salary reduction agreement for 1977 is entered into at any time after December 31, 1977, an amended Form W–2 must be filed on behalf of the individual.

(iii) The rules of subdivision (i) of this subparagraph may be illustrated by the following example:

Example. A is an employee of X Organization (an employer described in section 501(c)(3) and exempt from tax under section 501(a)) for the entire calendar year 1964. A uses the calendar year as a taxable year. A's annual salary as of January 1, 1964, is $12,000. On February 1, 1964, A and his employer enter a binding and irrevocable agreement whereby A is to take a 10-percent reduction in salary (from $1,000 per month to $900 per month) and X Organization is to contribute $100 per month for an annuity contract described in section

403(b). The agreement also provides that A may terminate the entire agreement with respect to amounts not yet earned. Since the agreement to reduce A's salary and invest the amount of such reduction in an annuity contract was made after A earned his salary for January, A's current compensation for January is $1,000 even though the agreement may provide that X Organization shall contribute $100 with respect to January for the benefit of A for an annuity contract described in section 403(b). For February and subsequent months ending before July 1, 1964, X Organization contributes $100 per month for A's annuity. Thus, A's current compensation for each of these months is $900, and the $100 which is contributed during such months by X Organization for an annuity contract for A is an employer contribution to which the exclusion provided in this paragraph applies. On July 1, 1964, A becomes entitled to a salary increase of $200 per month and, pursuant to the agreement of February 1, 1964, X Organization contributes 10 percent of such increase or an additional $20 per month for a section 403(b) annuity. For July and subsequent months ending before October 1, 1964, X Organization contributes $120 per month for A's annuity. Thus, A's current compensation for each of these months is $1,080, and the $120 which is contributed during such months by X Organization for an annuity contract for A is an employer contribution to which the exclusion provided in this paragraph applies. On November 1, 1964, A terminates the entire agreement with respect to amounts not yet earned. Since the termination occurred after A earned his salary for the month of October, the contribution for October is an employer contribution to which the exclusion provided in this paragraph applies. For the months November and December, A's full salary of $1,200 per month is includible in his gross income whether or not his employer makes contributions for a section 403(b) annuity.

(4) Two or more annuity contracts. If, during a taxable year of an employee, this paragraph applies to amounts contributed (including amounts which are considered to be contributed under subparagraph (2) of this paragraph) by his employer for two or more annuity contracts for such employee, such two or more annuity contracts shall, for such taxable year, be considered a single contract for purposes of applying the rules contained in this paragraph.

(5) Employees performing services for public schools. For purposes of this section, a person shall be considered an employee who performs services for an educational institution (as defined in section 151(e)(4)) if he is performing services as an employee directly or indirectly for such an institution. Thus, for example, the principal, clerical employees, custodial employees, and teachers at a public elementary school are employees performing services directly for such an educational institution. An employee who performs services involving the operation or direction of a State's, or political subdivision's, education program as carried on through educational institutions (as defined in section 151(e)(4)) is an employee performing services indirectly for such institutions. An employee participating in an "in-home" teaching program is included since such program is merely an extension of the activities carried on by such educational institutions. On the other hand, a person occupying an elective or appointive public office is not an employee performing services for an educational institution unless such office is one to which an individual is elected or appointed only if he has received training, or is experienced, in the field of education. The term "public office" includes any elective or appointive office of a State, a political subdivision of a State, or an agency or instrumentality of any one or more of the foregoing. Thus, for example, a regent or trustee of a State university or a member of a board of education is not an employee performing services for an educational institution. On the other hand, a commissioner or superintendent of education will generally be considered an employee performing services for an educational institution.

(c) Taxation of amounts received under annuity contracts—(1) In general. The amounts received by or made available to any employee under an annuity contract to which paragraph (a) or (b) of this section applies shall be included in the gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities). For taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to any amount received by or made available to any such employee under such an annuity contract. For taxable years beginning after December 31, 1963, amounts received or made available to any such employee under such annuity contract may be taken into account in computations under sections 1301 through 1305 (relating to income averaging).

(2) Taxation of beneficiaries. If, upon the death of an employee or of a retired employee, the widow or other beneficiary of such employee is paid, in accordance with the terms of the annuity contract relating to the deceased employee, an annuity or other death benefit, the extent to which the amounts received by or made available to the beneficiary must be included in the beneficiary's income under subparagraph (1) of this paragraph shall be determined in accordance with the rules presented in paragraph (a)(5) of § 1.402(a)-1.

(3) Life insurance protection. An individual contract issued after December 31, 1962, or a group contract, which provides incidental life insurance protection may be purchased as an annuity contract to which paragraph (a) or (b) of this section applies. For the rules as to nontransferability of such contracts issued after December 31,

1962, see § 1.401-9. For the rules relating to the taxation of the cost of the life insurance protection and the proceeds thereunder, see § 1.72-16. Section 403(b) is not applicable to premiums paid after October 26, 1956, for individual contracts which were issued prior to January 1, 1963, and which provide life insurance protection.

(d) Exclusion allowance—(1) In general. For purposes of paragraph (b) of this section, an employee's exclusion allowance for a taxable year is an amount equal to the excess, if any, of—

(i) The amount determined by multiplying (a) 20 percent of such employee's includible compensation in respect of such taxable year, by (b) such employee's total number of years of service as of the close of such taxable year, over

(ii) The aggregate of (*a*) the amounts which have been contributed by the employer for annuity contracts for such employee and which were excludable from the gross income of the employee for any taxable year prior to the taxable year for which the exclusion allowance is being determined, and (*b*) the amounts of compensation excludable from the gross income of the employee under section 457(a) (relating to eligible State deferred compensation plans) for any prior taxable year that is taken into account as a year of service under paragraph (f) of this section.

Compensation deferred under an eligible State deferred compensation plan shall be taken into account as described in subdivision (ii) of this subparagraph even if the entity sponsoring the eligible plan is not the employer purchasing the annuity contract with respect to which the employee's exclusion allowance is to be determined. See paragraph (e) of this section for the definition of an employee's includible compensation in respect of a taxable year and paragraph (f) of this section for rules for computing an employee's total number of years of service for an employer.

(2) More than one employer. If, during a taxable year of an employee, amounts are contributed for annuity contracts for such employee by two or more employers described in paragraph (b)(1)(i) or (ii) of this section, a separate exclusion allowance shall be computed with respect to each employer. In such a case, therefore, there shall not be taken into account, in computing the exclusion allowance with respect to one employer, the "includible compensation" received by the employee from any other employer, the employee's years of service with any other employer, or amounts which have been contributed by any other employer for annuity contracts for such employee.

(3) Amounts previously contributed by the employer which were excludable from the employee's gross income. In computing, for purposes of subparagraph (1)(ii) of this paragraph, the aggregate of the amounts which have been contributed by an employer for annuity contracts for an employee and which were excludable from the gross income of the employee for any taxable year prior to the taxable year for which the exclusion allowance is being determined, there shall be included all contributions made by the employer for the benefit of the employee—

(i) Which, under section 402(a) or section 403(a), were excludable from the employee's gross income for any such prior taxable year by reason of being contributions to a trust described in section 401(a) and exempt from tax under section 501(a) or contributions toward the purchase of an annuity contract under a plan which meets the requirements of section 404(a)(2) (whether forfeitable or nonforfeitable); or

(ii) Which, under section 405(d), were excludable from the employee's gross income for any such prior taxable year by reason of being contributions toward the purchase of United States bonds under a plan which meets the requirements of section 405(a)(1); or

(iii) Which were excludable from the employee's gross income for any such prior taxable year by reason of being contributions described in paragraph (a) or (b) of this section; or

(iv)(a) Which were excludable from the employee's gross income for the taxable year when made solely by reason of the fact that the employee's rights to such contributions were forfeitable at the time they were made (and not for any of the reasons described in subdivisions (i), (ii), and (iii) of this subparagraph);

(b) With respect to which the employee's rights changed to nonforfeitable rights prior to the taxable year for which the exclusion allowance is being determined; and

(c) Which were not, under section 403(d) and without regard to paragraph (b) of this section, includible in the employee's gross income for the taxable year in which his rights to such contributions changed from forfeitable to nonforfeitable rights.

For purposes of subdivisions (i) and (iii) of this subparagraph, all references to provisions of the Internal Revenue Code of 1954 and to provisions of the regulations under such Code shall also be

considered references to the corresponding provisions of prior law and regulations. See subparagraph (4) of this paragraph for rules relating to the allocation of employer contributions to an employee where the actual contributions are not allocated among individual employees; or

(v) Which were contributions to a section 403(b) annuity contract for a prior taxable year and which exceeded the limitations of section 415(c)(1) applicable to the employee. See § 1.415–6(e)(1)(ii) for a more detailed discussion of this rule. See also § 1.415–9(c) for rules relating to the treatment of certain contributions to a section 403(b) annuity contract which are excess contributions because of the aggregation of the annuity contract with a qualified plan.

(4) Determination of excludable amounts by allocation of contributions. If, for any employee, the actual amounts of employer contributions to a defined benefit plan described in subparagraph (3) of this paragraph are not known, such amounts shall be determined under the formula described in this subparagraph or under any other method utilizing recognized actuarial principles which are consistent with the provisions of the plan under which such contributions are made and the method adopted by the employer for funding the benefits under the plan. If the formula described in this subparagraph is to be used, the contributions made by the employer for the benefit of the employee as of the end of any taxable year shall be deemed to be the product of the quantities described in subdivisions (i), (ii), (iii), and (iv) of this subparagraph. Such quantities are—

(i) The projected annual amount of the employee's pension (as of the end of the taxable year) to be provided at normal retirement age from employer contributions, based upon the provisions of the plan in effect at such time and upon the assumption of the employee's continued employment with his present employer at his then current salary rate.

(ii) The value, from Table I below, at normal retirement age of an annuity of $1.00 per annum payable in equal monthly installments during the life of the employee, based upon normal retirement age as defined in the plan.

(iii) The amount from Table II below (representing the level annual contribution which will accumulate to $1.00 at normal retirement age) for the sum of (a) the number of years remaining from the end of the taxable year to normal retirement age and (b) the lesser of the number of years of service credited through the end of the taxable year or the number of years that the plan has been in existence at such time.

(iv) The lesser of the number of years of service credited through the end of the taxable year or the number of years that the plan has been in existence at such time.

TABLE I—VALUE AT NORMAL RETIREMENT AGES OF ANNUITY OF $1.00 PER ANNUM PAYABLE IN EQUAL MONTHLY INSTALLMENTS DURING THE LIFE OF THE EMPLOYEE

[For taxable years beginning after July 1, 1986]

Ages	Values

NOTE—If the normal form of retirement benefit under the plan is other than a straight life annuity, the value from Table I above should be divided by the figure set forth below opposite the normal form of retirement benefit provided by the plan:

Annuity for 5 years certain and life thereafter	0.97
Annuity for 10 years certain and life thereafter	0.90
Annuity for 15 years certain and life thereafter	0.80
Annuity for 20 years certain and life thereafter	0.70
Life annuity with installment refund	0.80
Life annuity with cash refund [1]	0.75

[1] The term "cash refund" refers to refund of accumulated employer contributions, and does not refer to refund of employee contributions only, often referred to as "modified cash refund."

(5) Election to have allowance determined under section 415 rules. Under section 415(c)(4)(D), an employee may elect to have the provisions of section 415(c)(4)(C) (relating to special limitations for annuity contracts purchased by educational organizations, hospitals and home health service agencies) apply for a taxable year. If the employee so elects, his exclusion allowance is the maximum amount under section 415 that could be contributed by the employer for the benefit of the employee if the annuity contract for the benefit of the employee were treated as a defined contribution plan maintained by the employer. Thus, the exclusion allowance for the taxable year of an employee who makes the election may not exceed the limitation on contributions and other additions (as described in § 1.415-6) applicable to the employee for that taxable year. See § 1.415-7 for provisions applicable in the event an employer maintains a defined benefit plan and a defined contribution plan for the same employee. See § 1.415-8 for provisions applicable in the event an employer maintains more than one defined contribution plan covering the same employee.

(e) **Includible compensation—(1) In general.** For purposes of computing, under paragraph (d) of this section, an employee's exclusion allowance for a taxable year, such employee's includible compensation in respect of such taxable year means the amount of compensation from the employer—

(i) Which was earned during the most recent period (ending not later than the close of the employee's taxable year for which the exclusion allowance is being determined) that, under paragraph (f) of this section, may be counted as one-year of service,

(ii) Which is includible in the employee's gross income, and

(iii) In the case of an employee of an employer described in paragraph (b)(1)(ii) of this section, which is attributable to services performed for an educational institution (as defined in section 151(e)(4)).

See subparagraph (2) of this paragraph for special rules for determining the amount of compensation which is includible in the employee's gross income.

(2) Special rules for determining the amount of compensation includible in the employee's gross

income. For purposes of subparagraph (1) of this paragraph, the amount of compensation which is includible in the employee's gross income shall be computed without regard to the exclusions allowed by section 105(d) (relating to wage continuation plans) and section 911 (relating to earned income from sources without the United States). Therefore, although amounts received by the employee from the employer while he is absent from work on account of personal injuries or sickness may be excludable from his gross income under section 105(d), such amounts are, nevertheless, considered as includible in his gross income for purposes of computing his includible compensation. On the other hand, in computing the amount which is includible in the gross income of the employee for purposes of subparagraph (1) of this paragraph, there shall not be included any amount which is contributed by the employer for an annuity contract to which paragraph (b) of this section applies. Thus, although the amount of any employer contributions for an annuity contract to which paragraph (b) of this section applies is, to the extent it exceeds in any taxable year the employee's exclusion allowance for such year, includible in the employee's gross income for that year, such amount is not considered as includible in the employee's gross income for purposes of computing his includible compensation for that year.

(3) **Period during which compensation must be earned.** For purposes of computing an employee's exclusion allowance for a taxable year, there may not be taken into account, as includible compensation, any compensation which was earned by the employee during a taxable year ending after the taxable year for which the exclusion allowance is being determined. On the other hand, an employee's includible compensation may include all or part of his compensation earned during a taxable year prior to the taxable year for which the exclusion allowance is being determined. Such a situation can occur, for example, when an employer purchases an annuity contract for a retired employee, or when an employer purchases an annuity contract for a part-time employee whose most recent one-year period of service (within the meaning of paragraph (f) of this section) extends over more than one taxable year of such employee. For purposes of this subparagraph, it is immaterial when the compensation is actually received by the employee or for what taxable year it is includible in his gross income.

(4) **Status of employer.** In computing an employee's exclusion allowance for a taxable year, there is not taken into account, as includible compensation, any compensation which was earned during a period when the employer was not an employer described in paragraph (b)(1)(i) or (ii) of this section since under paragraph (f)(2) of this section an employee is not considered to be in the service of the employer for any such period. On the other hand, it is immaterial whether the employer is an employer described in paragraph (b)(1)(i) or (ii) of this section at the time the compensation is actually received by the employee. Thus, if an employee receives compensation during his 1961 taxable year for services performed during his 1960 taxable year, such compensation can qualify as includible compensation if his employer was an employer described in paragraph (b)(1)(i) or (ii) of this section during 1960, even though such employer was not such an employer during 1961. See, also, paragraph (b) of this section which provides that the exclusion allowance is only applicable with respect to contributions which are made by an employer at a time when such employer is an employer described in paragraph (b)(1)(i) or (ii) of this section.

(f) **Years of service—(1) In general.** In computing an employee's exclusion allowance for a taxable year, it is necessary to determine such employee's number of years of service for the employer as of the close of such taxable year. For this purpose, the number of years of service of an employee for an employer shall be determined in accordance with the rules set forth in this paragraph. In addition, such rules are applicable in determining, for purposes of paragraph (e) of this section, an employee's most recent one-year period of service.

(2) **Exempt status requirement.** For purposes of determining an employee's number of years of service for an employer and his most recent one-year period of service for such employer, an employee shall not be considered to be employed by the employer, or to be in the service of the employer, during any period that the employer is not an employer described in paragraph (b)(1)(i) or (ii) of this section, or, in the case of an employee of an employer described in paragraph (b)(1)(ii) of this section, during any period when the employee is not performing services for an educational institution (as defined in section 151(e)(4)). The rule in this subparagraph may be illustrated by the following example: A was employed on a full-time basis by the X scientific organization during the whole of 1959 and 1960 and during half of 1961. Both A and the X Organization use the calendar year as their taxable year. The X Organization was an organization described in section 501(c)(3) and exempt from tax under section 501(a) during the

years 1959 and 1961, but not during the year 1960. For purposes of determining A's exclusion allowance for 1961, he is considered to have 1 ½ years of service (his service during 1959 and 1961) and his most recent one-year period of service ending not later than the close of 1961 consists of his service during 1961 (which is equal to ½ year of service) and his service during the last half of 1959 (which is equal to another ½ year of service).

(3) Service included. For purposes of computing an employee's exclusion allowance for a taxable year, there may be taken into account, in determining his number of years of service, all service performed by him as of the close of such taxable year. Therefore, whenever possible, service performed during each of the employee's taxable years should be considered separately in arriving at his total number of years of service. For example, if an employee who reports his income on a calendar year basis is employed on a full-time basis on July 1, 1959, and continues on a full-time basis through December 31, 1960, his number of years of service as of the close of his 1960 taxable year should, if possible, be computed as follows:

(a) Number of years of service performed during 1959 taxable year	½
(b) Number of years of service performed during 1960 taxable year	1
(c) Total number of years of service as of close of 1960 taxable year ((*a*) + (*b*))	1½

However, in determining what constitutes a full year of service, the employer's annual work period, and not the employee's taxable year, is the standard of measurement. For example, in determining whether a professor is employed full time, the number of months in the school's academic year shall be the standard of measurement.

(4) Full-time employee for full year. (i) Each full year during which an individual was employed full time shall be considered as one year of service. In determining whether an individual is employed full-time, the amount of work which he is required to perform shall be compared with the amount of work which is normally required of individuals holding the same position with the same employer and who generally derive the major portion of their personal service income from such position.

(ii)(a) In measuring the amount of work required of individuals holding a particular position, any method that reasonably and accurately reflects such amount may be used. For example, the number of hours of classroom instruction is only an indication of the amount of work required, but it may be used as a measure.

(b) In determining whether positions with the same employer are the same, all of the facts and circumstances concerning the positions shall be considered, including the work performed, the methods by which compensation is computed, and the descriptions (or titles) of the positions. For example, an assistant professor employed in the English department of a university will be considered a full-time employee if the amount of work that he is required to perform is the same as the amount of work normally required of assistant professors of English at that university who derive the main portion of their personal service income from such position.

(c) In case an individual's position is not the same as another with his employer, the rules of this paragraph shall be applied by considering the same position with similar employers or similar positions with the same employer.

(iii) A full year of service for a particular position means the usual annual work period of individuals employed full-time in that general type of employment at the place of employment. For example, if a doctor employed by a hospital works throughout the 12 months of a year except for a one-month vacation, such doctor will be considered as being employed for a full year, if the other doctors at that hospital work 11 months of the year with a one-month vacation. Similarly, if the usual annual work period at a university consists of the fall and spring semesters, an instructor at that university who teaches those semesters will be considered as working a full year.

(5) Other employees. (i) An individual shall be treated as having a fraction of a year of service for each year during which he was a full-time employee for part of the year or for each year during which he was a part-time employee for the entire year or for a part of the year.

(ii) In determining the fraction which represents the fractional year of service for an individual employed full time for part of a year, the numerator shall be the number of weeks (or months) during which the individual was a full-time employee in a position during that year, and the denominator shall be the number of weeks (or months) which is considered under subparagraph (4)(iii) of this paragraph as the usual annual work period for that position. For example, if an instructor is employed full time by a university for the 1959 spring semester (which lasts from February 1959 through May 1959), and the academic year of the university is 8 months long, beginning in October 1958, and ending in May 1959, then he

is considered as having completed 4/8 of a year of service.

(iii) In determining the fraction which represents the fractional year of service of an individual who is employed part time for a full year, the numerator shall be the amount of work required to be performed by the individual, and the denominator shall be the amount of work normally required of individuals who hold the same position. The amount of work required to be performed by the individual and the amount of work normally required of individuals holding the same position shall be determined in accordance with the principles of subparagraph (4) of this paragraph. Thus, if a practicing physician teaches one course at a local medical school 3 hours per week for two semesters and other faculty members at that medical school teach 9 hours per week for two semesters, then the practicing physician is considered as having completed 3/9 of a year of service.

(iv) In determining the fraction representing the fractional year of service of an individual who is employed part time for part of a year, it is necessary to compute the fractional year of service if the individual were a part-time employee for a full year, and the fractional year of service if the individual were a full-time employee for the part of a year. The two fractions shall be multiplied and the product is the fractional year of service of such individual who is employed part time for part of a year. For example, if an attorney who is a specialist in a subject teaches a course in that subject for 3 hours per week for one semester at a nearby law school, and the full-time instructors at that law school teach 12 hours per week for two semesters, then the fractional part of a year of service for such part-time instructor is computed as follows: The fractional year of service if the instructor were a part-time employee for a full year is 3/12 (number of hours employed divided by the usual number of hours of work required for that position); the fractional year of service if the instructor were a full-time employee for part of a year is 1/2 (period worked or one semester, divided by usual work period, or 2 semesters). These fractions are multiplied to obtain the fractional year of service: 3/12 times 1/2, or 3/24 (1/8).

(6) **Less than one year of service considered as one year.** If, at the close of a taxable year, an employee has, under the rules in this paragraph, a period of service of less than one year, such employee shall, nevertheless, be considered to have one year of service for purposes of computing his exclusion allowance for that taxable year. Such period of service of less than one year shall also be considered to be such employee's most recent one-year period of service for purposes of determining his includible compensation.

(7) **Most recent one-year period of service.** (i) In determining, for purposes of paragraph (e) of this section (relating to includible compensation), an employee's most recent one-year period of service, there is first taken into account all service performed by the employee during the taxable year for which the exclusion allowance is being determined. For this purpose, therefore, an employee's most recent one-year period of service may not be the same as his employer's most recent annual work period. The rule in this subdivision may be illustrated by the following example: A, a professor who reports his income on a calendar year basis, is employed by a university on a full-time basis during the university's 1959–1960 and 1960–1961 academic years (October through May). For purposes of computing A's exclusion allowance for his 1960 taxable year, his most recent one-year period of service consists of his service performed during January through May, 1960 (which is part of the 1959–1960 academic year) and his service performed during October through December 1960 (which is part of the 1960–1961 academic year).

(ii) In the case of a part-time employee or a full-time employee who is employed for only part of a year, it will be necessary to aggregate his most recent periods of service to determine his most recent one-year period of service. In such a case, there is first taken into account his service during the taxable year for which the exclusion allowance is being determined; then there is taken into account his service during his next preceding taxable year and so forth until his service equals, in the aggregate, one year of service. For example, if an employee, who reports his income on the calendar year basis, is employed on a full-time basis during the months July through December 1959 (1/2 year of service), July through December 1960 (1/2 year of service), and October through December 1961 (1/4 year of service), his most recent one-year period of service for purposes of computing his exclusion allowance for 1961 consists of his service during 1961 (1/4 year of service), his service during 1960 (1/2 year of service), and his service during the months October through December 1959 (1/4 year of service).

(g) **Illustration of computation of exclusion allowance.** The exclusion provided under paragraph (b) of this section may be illustrated by the following example: A, a professor who reports his income on the calendar year basis, became a full-

time employee of X University on October 1, 1958 (beginning of X University's 1958–1959 academic year) and continued as a full-time employee for the academic years 1958–1959, 1959–1960, and 1960–1961. X University was, during all such academic years, an organization described in section 501(c)(3) and exempt from tax under section 501(a). X University's academic year runs for a period of 8 months: October through May. A received an annual salary, all of which was includible in his gross income, of $8,000 for the 1958–1959 academic year, $8,800 for the 1959–1960 academic year, and $9,600 for the 1960–1961 academic year. Starting in 1958, X University contributed amounts toward the purchase of annuity contracts for A and such purchase was not part of a qualified annuity plan. X University paid, as premiums for such contracts, $1,000 in 1958, $2,000 in 1959, $2,400 in 1960, and $1,400 in 1961. The amount of such premiums which is excludable from A's gross income for the year in which paid is computed as follows:

1958

(1) Amount contributed by employer for annuity contracts in 1958	$1,000.00
(2) Includible compensation for most recent one-year period of service (since A was employed for only 3/8 of a year at the close of 1958, this period is counted as most recent one-year period of service) 3/8 × $8,000	$3,000.00
(3) 20% × includible compensation	$600.00
(4) Number of years of service (although A was employed for less than a year, he is considered to have one-year of service)	1
(5) Item (4) × item (3)	$600.00
(6) Contributions excludable in prior taxable years of A	None
(7) Amount excludable from A's gross income for 1958 ((5)–(6))	$600.00
(8) Amount includible in A's gross income for 1958 ((1)–(7))	$400.00

1959

(9) Amount contributed by employer for annuity contracts in 1959	$2,000.00
(10) Includible compensation for most recent one-year period of service. (3/8 × $8,800 + 5/8 × $8,000)	$8,800.00
(11) 20% × includible compensation	$1,660.00
(12) Number of years of service	1 3/8
(13) Item (12) × item (11)	$2,282.50
(14) Contributions excludable in prior taxable years of A (item (7))	$600.00
(15) Amount excludable from A's gross income for 1959 ((13)–(14))	$1,682.50
(16) Amount includible in A's gross income for 1959 ((9)–(15))	$317.50

1960

(17) Amount contributed by employer for annuity contracts in 1960	$2,400.00
(18) Includible compensation for most recent one-year period of service (3/8 × $9,600 + 5/8 × $8,800)	$9,100.00
(19) 20% × includible compensation	$1,820.00
(20) Number of years of service	2 3/8
(21) Item (20) × item (19)	$4,322.50
(22) Contributions excludable in prior taxable years ((7) + (15))	$2,282.50
(23) Amount excludable from A's gross income for 1960 ((21)–(22))	$2,040.00
(24) Amount includible in A's gross income for 1960 ((17)–(23))	$360.00

1961

(25) Amount contributed by employer for annuity contracts in 1961	$1,400.00
(26) Includible compensation for most recent one-year period of service (5/8 × $9,600 + 3/8 × $9,600)	$9,600.00
(27) 20% × includible compensation	$1,920.00
(28) Number of years of service	3
(29) Item (28) × item (27)	$5,760.00
(30) Contributions excludable in prior taxable years ((7) + (15) + (23))	$4,322.50
(31) Amount excludable from A's gross income for 1961 (item (25) since it is less than (29)–(30))	$1,400.00
(32) Amount includible in A's gross income for 1961 ((25)–(31))	None

[T.D. 6783, 29 FR 18360, Dec. 24, 1964, as amended by T.D. 6885, 31 FR 7802, June 2, 1966; T.D. 7748, 46 FR 1696, Jan. 7, 1981; T.D. 7836, 47 FR 42337, Sept. 27, 1982; T.D. 8115, 51 FR 45736, Dec. 19, 1986]

§ 1.403(c)–1 Taxability of beneficiary under a nonqualified annuity.

(a) Taxability of vested interest in premiums. If after August 1, 1969, an employer (whether or not exempt under section 501(a)) pays premiums for an annuity contract for the benefit of an employee, the amount of such premiums shall be included as compensation in the gross income of the employee for the taxable year during which such premiums are paid, but only to the extent that the employee's rights in such premiums are substantially vested (as defined in § 1.83–3(b)) at the time such premiums are paid. The preceding sentence shall not apply to contracts referred to in the transitional rule of paragraph (d)(1), (ii), or (iii) of this section, or to premiums subject to § 1.403(a)–1(a) or excludible under § 1.403(b)–1(b). If any employer has purchased annuity contracts and transferred them to a trust (other than one described in section 401(a)) that is to provide annuity contracts or benefits for his employees, the amounts so paid shall be treated as contributions to a trust described in section 402(b). For the rules relating to the taxation of the cost of life insurance protection when rights in a life insurance contract are substantially nonvested, see § 1.83–1(a)(2).

(b) Taxability of employee when rights under annuity contract change from nonvested to vested—(1) In general. If, during a taxable year of an employee ending after August 1, 1969, the rights of such employee under an annuity contract purchased for him by an employer (whether or not exempt under section 501(a) or 521(a)) become substantially vested, the value of the annuity contract on the date of such change shall be included in the employee's gross income for such year, to the extent provided in paragraph (b)(2) of this section. The preceding sentence shall not apply, however, to an annuity contract purchased and held as part of a plan which met at the time of such purchase, and continues to meet, the requirements of section 404(a)(2) or an annuity contract referred to in paragraph (d)(ii) or (iii) of this section. For purposes of this section, the value of an annuity contract on the date the employee's rights become substantially vested means the cash surrender value of such contract on such date.

(2) Extent to which value of annuity contract is includible in employee's gross income. For purposes of paragraph (b)(1) of this section, the only amount includible in the gross income of the employee is that the portion of the value of the contract on the date of the change that is attributable to premiums which were paid by the employer after August 1, 1969, and which were not excludible from the employer's gross income under § 1.403(b)–1(b). However, the includible portion does not include—

(i) The value attributable to a premium paid on the date of such change, and

(ii) The value attributable to premiums described in the transitional rule of paragraph (d)(1)(ii) or (iii) of this section.

See § 1.403(b)–1(b)(2) for the treatment of an amount otherwise includible in gross income under section 403(c) as an employer contribution for purposes of the exclusion under section 403(b).

(3) Partial vesting. If, during any taxable year of an employee, only part of his beneficial interest in an annuity contract becomes substantially vested, then only the corresponding part of the value of the annuity contract on the date of such change is includible in the employee's gross income for such taxable year. In such a case, it is first necessary to compute, under the rules in paragraphs (b)(1) and (2) of this section but without regard to any exclusion allowable under § 1.403(b)–1(b), the amount which would be includible in the employee's gross income for the taxable year if his entire beneficial interest in the annuity contract had changed to a substantially vested interest during such year. The amount that is includible under this (3)(without regard to the section 403(b) exclusion) is equal to the amount determined under the preceding sentence multiplied by the percent of the employee's beneficial interest which became substantially vested during the taxable year.

(c) Amounts paid or made available under an annuity contract. The amounts paid or made available to the employee under an annuity contract subject to this section shall be included in the gross income of the employee for the taxable year in which paid or made available, as provided in section 72 (relating to annuities). Such amounts may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). For rules relating to the treatment of employer contributions as part of the consideration paid by the employee, see section 72(f). See also section 101(b)(2)(D) for rules relating to the treatment of the limited exclusion provided thereunder as part of the consideration paid by the employee.

(d) Taxability of beneficiary under a nonqualified annuity on or before August 1, 1969. (1) Except as provided in section 402(d) (relating to taxable years beginning before January 1, 1977), if an employer purchases an annuity contract and if the amounts paid for the contract.

(i) On or before August 1, 1969, or

(ii) After such date, if pursuant to a binding written contract (as defined in § 1.83–8(b)(2)) entered into before April 22, 1969, or

(iii) After August 1, 1969, pursuant to a written plan in which the employee participated on April 22, 1969 and under which the obligation of the employer is essentially the same as under a binding written contract, are not subject to paragraph (a) of § 1.403(a)–1 or paragraph (a) of § 1.403–1, the amount of such contribution shall, to the extent it is not excludible under paragraph (b) of § 1.403(b)–1, be included in the income of the employee for the taxable year during which such contribution is made if, at the time the contribution is made, the employee's rights under the annuity contract are nonforfeitable, except for failure to pay future premiums. If the annuity contract was purchased by an employer which is not exempt from tax under section 501(a) or section 521(a), and if the employee's rights under the annuity contract in such a case were forfeitable at the time the employer's contribution was made for the annuity contract, even though they become nonforfeitable later the amount of such contribu-

tion is not required to be included in the income of the employee at the time his rights under the contract become nonforfeitable. On the other hand, if the annuity contract is purchased by an employer which is exempt from tax under section 501(a) or section 521(a), all or part of the value of the contract may be includible in the employee's gross income at the time his rights under the contract become nonforfeitable (see section 403(d) prior to the repeal thereof by the Tax Reform Act of 1969 and the regulations thereunder). As to what constitutes nonforfeitable rights of an employee, see § 1.402(b)–1(d)(2). The amounts received by or made available to the employee under the annuity contract shall be included in the gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities). For taxable years beginning before January 1, 1964, sections 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to such amounts. For taxable years beginning after December 31, 1963, such amounts may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). For rules relating to the treatment of employer contributions as part of the consideration paid by the employee, see section 72(f). See also section 101(b)(2)(D) for rules relating to the treatment of the limited exclusion provided thereunder as part of the consideration paid by the employee.

(2) If an employer has purchased annuity contracts and transferred them to a trust, or if an employer has made contributions to a trust for the purpose of providing annuity contracts for his employees as provided in section 402(d) (see paragraph (a) of § 1.402(D)–1), the amount so paid or contributed is not required to be included in the income of the employee. but any amount received by or made available to the employee under the annuity contract shall be includible in the gross income of the employee for the taxable year in which received or made available, as provided in section 72 (relating to annuities). For taxable years beginning before January 1, 1964, section 72(e)(3) (relating to the treatment of certain lump sums), as in effect before such date, shall not apply to any amount received by or made available to the employee under the annuity contract. For taxable years beginning after December 31, 1963, amounts received by or made available to the employee under the annuity contract may be taken into account in computations under sections 1301 through 1305 (relating to income averaging). In such case the amount paid or contributed by the employer shall not constitute consideration paid by the employee for such annuity contract in determining the amount of annuity payments required to be included in his gross income under section 72 unless the employee has paid income tax for any taxable year beginning before January 1, 1949, with respect to such payment or contribution by the employer for such year and such tax is not credited or refunded to the employee. In the event such tax has been paid and not credited or refunded the amount paid or contributed by the employer for such year shall constitute consideration paid by the employee for the annuity contract in determining the amount of the annuity required to be included in the income of the employee under section 72.

(3) For taxable years beginning before January 1, 1958, the provisions contained in section 403(c) prior to the amendment made thereto by the Tax Reform Act of 1969 were included in section 403(b) of the Internal Revenue Code of 1954. Therefore, the regulations contained in this paragraph shall, for such taxable years, be considered as the regulations under section 403(b) as in effect for such taxable years. For the rules with respect to contributions paid after August 1, 1969, see paragraphs (a), (b), and (c) of this section.

[T.D. 6783, 29 FR 18365, Dec. 24, 1964, as amended by T.D. 6885, 31 FR 7802, June 2, 1966; T.D. 7554, 43 FR 31924, July 24, 1978]

§ 1.403(d)–1 Taxability of employee when rights under contracts purchased by exempt organizations change from forfeitable to nonforfeitable.

(a) **In general.** The provisions of section 403(d), repealed by section 321(b) of the Tax Reform Act of 1969 (83 Stat. 571), applied for taxable years beginning after December 31, 1957, only with respect to amounts paid for an annuity contract—

(1) On or before August 1, 1969, or

(2) After such date, if pursuant to a binding written contract (as defined in § 1.83–8(b)(2)) entered into before April 22, 1969, or

(3) After August 1, 1969, pursuant to a written plan in which the employee participated on April 22, 1969, and under which the obligation of the employer is essentially the same as under a binding written contract.

If, during a taxable year of an employee beginning after December 31, 1957, the rights of such employee under an annuity contract purchased for him by an employer which is exempt from tax

under section 501(a) or 521(a) change from forfeitable to nonforfeitable rights, then (except in the case of contracts to which § 1.403(c)–1(b) applies for taxable years ending after August 1, 1969) the value of such annuity contract on the date of such change shall be included in the employee's gross income for such taxable year, to the extent provided in paragraph (b) of this section. However, the preceding sentence does not apply to an annuity contract purchased and held as part of a plan that at the time of such purchase and at all times thereafter meets the requirements of section 404(a)(2). For purposes of this section, the value of an annuity contract on the date the employee's rights change from forfeitable to nonforfeitable rights means the cash surrender value of such contract on such date. As to what constitutes nonforfeitable rights of an employee, see § 1.402(b)–1(d)(2). For the rules with respect to amounts paid after August 1, 1969, under an annuity contract purchased for an employee by an employer which is exempt from tax under section 501(a) or 521(a), see generally section 403(c) and the regulations thereunder.

(b) **Extent to which value of annuity contract is includible in employee's gross income.** For purposes of paragraph (a) of this section, there shall be included in the gross income of an employee for his taxable year in which his rights under an annuity contract change from forfeitable to nonforfeitable rights only an amount equal to the portion of the value of such contract on the date of such change (1) that is attributable to contributions:

(i) Which were made by the employer while it was exempt from tax under section 501(a) or 521(a);

(ii) Which were made after December 31, 1957; and

(iii) Which were not, at the time they were made, excludable from the employee's gross income under paragraph (a) of § 1.403(b)–1;

and (2) that is not excludable from the employee's gross income under paragraph (b) of § 1.403(b)–1. Thus, although amounts are contributed by an employer after December 31, 1957, toward the purchase for an employee of an annuity contract and, at the time of the contribution, such employer is an organization described in section 501(c)(3) and exempt from tax under section 501(a), the value of such annuity contract attributable to such contributions would not be includible in the employee's gross income for the taxable year in which his rights under the contract change to nonforfeitable rights if such amounts were contributed during a taxable year of the employee beginning before January 1, 1958, and were, therefore, excludable from the employee's gross income under paragraph (a) of § 1.403(b)–1. Similarly, the value of such an annuity contract is not includible in the gross income of the employee for the year in which the change occurs to the extent that it is excludable under paragraph (b) of § 1.403(b)–1. See paragraph (b)(2) of § 1.403(b)–1 which provides that the amount otherwise includible in gross income under section 403(d) is considered to be a contribution by the employer for purposes of the exclusion provided in paragraph (b) of § 1.403(b)–1. In addition, the portion of the value of an annuity contract attributable to contributions made by the employer while it was not exempt from tax under either section 501(a) or 521(a) is not includible in the gross income of the employee at the time his rights under the contract change to nonforfeitable rights even though the employer is exempt from tax under section 501(a) or 521(a) at the time of such change. On the other hand, the value of the annuity contract purchased by an organization exempt from tax under section 501(a) or 521(a) may be includible in the gross income of an employee for the year during which his rights under the contract change to nonforfeitable rights even though such organization is not exempt on the date of such change.

(c) **Partial vesting—(1) General rule.** If, during any taxable year of an employee, only part of his beneficial interest in an annuity contract changes from a forfeitable to a nonforfeitable interest, then only the corresponding part of the value of the annuity contract on the date of such change is includible in the employee's gross income for such taxable year. In such a case, it is first necessary to compute, under the rules in paragraphs (a) and (b) of this section but without regard to any exclusion allowable under paragraph (b) of § 1.403(b)–1, the amount which would be includible in the employee's gross income for the taxable year if his entire beneficial interest in the annuity contract had changed to a nonforfeitable interest during such year. The amount that is includible (without regard to any exclusion allowed by paragraph (b) of § 1.403(b)–1) in the gross income of the employee for the taxable year in which the change occurs is an amount equal to the amount determined under the preceding sentence multiplied by the percent of the employee's beneficial interest which changed to a nonforfeitable interest during the taxable year. If at the time the employee's interest changes to a nonforfeitable interest, the employer is an organization described in section

501(a)(3) and exempt from tax under section 501(a), then the amount that is includible in the employee's gross income under this subparagraph is considered as an employer contribution to which the exclusion provided in paragraph (b) of § 1.403(b)–1 applies (see paragraph (b)(2) of § 1.403(b)–1).

(2) Example. The provisions in paragraph (c)(1) of this section may be illustrated by the following example:

Example. X organization purchased an annuity contract for A, one of its employees who reports his income on a calendar year basis. X contributed ⅓ of the amount necessary to purchase the contract before January 1, 1958, and the remaining ⅔ after December 31, 1957. At the time of the contributions, X was an organization exempt from tax under section 501(a) and A's rights under the contract were forfeitable. The annuity contract was not purchased as part of a qualified plan and A made no contributions toward the purchase of the contract. On December 31, 1965, 50 percent of A's interest in the contract changed from a forfeitable to a nonforfeitable interest, and on December 31, 1968, the remaining 50 percent of A's interest in the contract changed to a nonforfeitable interest. The cash surrender value of the contract was $9,900 on December 31, 1965, and $12,000 on December 31, 1968. The amount includible in A's gross income for 1965 and 1968 is computed as follows—

1965

(i) Amount which would have been includible if A's entire interest had changed to a nonforfeitable interest (cash surrender value of contract on December 31, 1965, attributable to contributions made after December 31, 1957), ⅔ × $9,900, $6,600.

(ii) Percent of A's interest that changed to a nonforfeitable interest on December 31, 1965, 50 percent.

(iii) Amount includible in A's gross income for 1965 ((ii) × (i)), $3,300.

1968

(iv) Amount which would have been includible if A's entire interest had changed to a nonforfeitable interest (cash surrender value of contract on December 31, 1968, attributable to contributions made after December 31, 1957), ⅔ × $12,000, $8,000.

(v) Percent of A's interest that changed to a nonforfeitable interest on December 31, 1968, 50 percent.

(vi) Amount includible in A's gross income for 1968 ((v) × (iv)), $4,500.

If, on December 31, 1965, X is an organization described in section 501(c)(3) and exempt from tax under section 501(a), then only so much of the $3,300 as is not excludable under paragraph (b) of § 1.403(b)–1 is includible in A's gross income for 1965. Similarly, if, on December 31, 1968, X is an organization described in section 501(c)(3) and exempt from tax under section 501(a), then only so much of the $4,000 as is not excludable under paragraph (b) of § 1.403(b)–1 is includible in A's gross income for 1968.

[T.D. 6783, 29 FR 18365, Dec. 24, 1964, as amended by T.D. 7554, 43 FR 31925, July 24, 1978]

§ 1.404(a)–1 Contributions of an employer to an employees' trust or annuity plan and compensation under a deferred payment plan; general rule.

(a)(1) Section 404(a) prescribes limitations upon deductions for amounts contributed by an employer under a pension, annuity, stock bonus, or profit-sharing plan, or under any plan of deferred compensation. It is immaterial whether the plan covers present employees only, or present and former employees, or only former employees. Section 404(a) also governs the deductibility of unfunded pensions and death benefits paid directly to former employees or their beneficiaries (see § 1.404(a)–12). For taxable years beginning after 1962, certain self-employed individuals may be covered by pension, annuity, or profit-sharing plans. For the rules relating to the deduction of contributions on behalf of such individuals, see paragraph (a)(2) of § 1.404(a)–8 and § 1.404(e)–1.

(2) Section 404(a) does not apply to a plan which does not defer the receipt of compensation. Furthermore, section 404(a) does not apply to deductions for contributions under a plan which is solely a dismissal wage or unemployment benefit plan, or a sickness, accident, hospitalization, medical expense, recreation, welfare, or similar benefit plan, or a combination thereof. For example, if under a plan an employer contributes 5 percent of each employee's compensation per month to a fund out of which employees who are laid off will be paid benefits for temporary periods, but employees who are not laid off have no rights to the funds, such a plan is an unemployment benefit plan, and the deductibility of the contributions to it is determined under section 162. As to the deductibility of such contributions, see § 1.162–9.

(3) If, however, the contributions to a pension, profit-sharing, stock bonus, or other plan of deferred compensation can be used to provide any of the benefits referred to in subparagraph (2) of this paragraph, then, except as provided in section 404(c), section 404(a) applies to the entire contribution to the plan. Thus, if in the example described in subparagraph (2) of this paragraph, the employer's contribution on behalf of each employee is set up as a separate account, and if any amount which remains in an employee's account at the time of retirement is paid to him at such time, the deductibility of the contributions to the plan is determined under section 404(a). For the regulations for determining whether the benefits referred to in subparagraph (2) of this paragraph can be included in a qualified pension or profit-sharing plan, see § 1.401–1(b).

(4) As to inclusion of full-time life insurance salesmen within the class of persons considered to be employees, see section 7701(a)(20).

(b) In order to be deductible under section 404(a), contributions must be expenses which would be deductible under section 162 (relating to trade or business expenses) or 212 (relating to expenses for production of income) if it were not for the provision in section 404(a) that they are deductible, if at all, only under section 404(a). Contributions may therefore be deducted under section 404(a) only to the extent that they are ordinary and necessary expenses during the taxable year in carrying on the trade or business or for the production of income and are compensation for personal services actually rendered. In no case is a deduction allowable under section 404(a) for the amount of any contribution for the benefit of an employee in excess of the amount which, together with other deductions allowed for compensation for such employee's services, constitutes a reasonable allowance for compensation for the services actually rendered. What constitutes a reasonable allowance depends upon the facts in the particular case. Among the elements to be considered in determining this are the personal services actually rendered in prior years as well as the current year and all compensation and contributions paid to or for such employee in prior years as well as in the current year. Thus, a contribution which is in the nature of additional compensation for services performed in prior years may be deductible, even if the total of such contributions and other compensation for the current year would be in excess of reasonable compensation for services performed in the current year, provided that such total plus all compensation and contributions paid to or for such employee in prior years represents a reasonable allowance for all services rendered by the employee by the end of the current year. A contribution under a plan which is primarily for the benefit of shareholders of the employer is not deductible. Such a contribution may constitute a dividend within the meaning of section 316. See also §§ 1.162–6 and 1.162–8. In addition to the limitations referred to above, deductions under section 404(a) are also subject to further conditions and limitations particularly provided therein.

(c) Deductions under section 404(a) are generally allowable only for the year in which the contribution or compensation is paid, regardless of the fact that the taxpayer may make his returns on the accrual method of accounting. Exceptions are made in the case of overpayments as provided in paragraphs (1), (3), and (7) of section 404(a), and, as provided by section 404(a)(6), in the case of payments made by a taxpayer on the accrual method of accounting not later than the time prescribed by law for filing the return for the taxable year of accrual (including extensions thereof). This latter provision is intended to permit a taxpayer on the accrual method to deduct such accrued contribution or compensation in the year of accrual, provided payment is actually made not later than the time prescribed by law for filing the return for the taxable year of accrual (including extensions thereof), but this provision is not applicable unless, during the taxable year on account of which the contribution is made, the taxpayer incurs a liability to make the contribution, the amount of which is accruable under section 461 for such taxable year. See section 461 and the regulations thereunder. There is another exception in the case of certain taxpayers who are required to make additional contributions as a result of the Act of June 15, 1955 (Public Law 74, 84th Cong., 69 Stat. 134), and the regulations thereunder.

[T.D. 6500, 25 FR 11682, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10144, Sept. 17, 1963]

§ 1.404(a)–1T Questions and answers relating to deductibility of deferred compensation and deferred benefits for employees (temporary).

Q–1: How does the amendment of section 404(b) by the Tax Reform Act of 1984 affect the deduction of contributions or compensation under section 404(a)?

A–1: As amended by the Tax Reform Act of 1984, section 404(b) clarifies that section 404(a) shall govern the deduction of contributions paid and compensation paid or incurred by the employer under a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits to employees, their spouses, or their dependents. See section 404(b) and § 1.404(b)-1T. Section 404(a) and (d) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a "welfare benefit fund" (as defined in section 419(e)) after July 18, 1984, in taxable years of employers (and payors) ending after that date. Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected the application of such section. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, § 1.419-1T and § 1.419A-2T. For rules relating to the deduction of vacation pay for which

an election is made under section 463, see § 10.2 of this chapter and § 1.463-1T.

[T.D. 8073, 51 FR 4320, Feb. 4, 1986]

§ 1.404(a)–2 Information to be furnished by employer claiming deductions; taxable years ending before December 31, 1971.

(a) For the first taxable year for which a deduction from gross income is claimed under section 404(a)(1), (2), (3), or (7), the employer must file the following information (unless such information has been previously filed in accordance with the regulations under section 23(p) of the Internal Revenue Code of 1939) for each plan involved to establish that it meets the requirements of section 401(a) or 404(a)(2), and that deductions claimed do not exceed the amount allowable under paragraphs (1), (2), (3), and (7) of section 404(a), as the case may be:

(1) Verified copies of all the instruments constituting or evidencing the plan, including trust indentures, group annuity contracts, specimen copy of each type of individual contract, and specimen copy of formal announcement and comprehensive detailed description to employees, with all amendments to any such instruments.

(2) A statement describing the plan which identifies it and which sets forth the name or names of the employers, the effective date of the plan and of any amendments thereto, the method of distribution or of disbursing benefits (whether by trustee, insurance company, or otherwise), the dates when the instruments or amendments were executed, the date of formal announcement and the dates when comprehensive detailed description of the plan and of each amendment thereto were made available to employees generally, the dates when the plan and when the trust or the contract evidencing the plan and of any amendments thereto were put into effect so that contributions thereunder were irrevocable and a summary of the provisions and rules relating to—

(i) Employee eligibility requirements for participation in the plan,

(ii) Employee contributions,

(iii) Employer contributions,

(iv) The basis or formula for determining the amount of each type of benefit and the requirements for obtaining such benefits and the vesting conditions,

(v) The medium of funding (*e.g.*, self-insured, unit purchase group annuity contract, individual level annual premium retirement endowment insurance contracts, etc.) and, if not wholly insured, the medium of contributions and the kind of investments, and

(vi) The discontinuance or modification of the plan and distributions or benefit payments upon liquidation or termination.

(3) A tabulation in columnar form showing the information specified below with respect to each of the 25 highest paid employees covered by the plan in the taxable year, listed in order of their nondeferred compensation (where there are several plans of deferred compensation, the information for each of the plans may be shown on a single tabulation without repetition of the information common to the several plans):

(i) Name.

(ii) Whether an officer.

(iii) Percentage of each class of stock owned directly or indirectly by the employee or members of his family.

(iv) Whether the principal duties consist in supervising the work of other employees.

(v) Year of birth.

(vi) Length of service for employer to the close of the year.

(vii) Total nondeferred compensation paid or accrued during the taxable year with a breakdown of such compensation into the following components:

(a) Basic compensation and overtime pay,

(b) Other direct payments, such as bonuses and commissions,

(c) Compensation paid other than in cash, such as goods, services, insurance not directly related to the benefits or provided from funds under the plan, etc.

(viii) Amount allocated during the year for the benefit of the employee or his beneficiary (including any insurance provided thereby or directly related thereto), less the employee's contributions during the year, under each other plan of deferred compensation.

(ix) Amount allocated during the year for the benefit of the employee or his beneficiary (including any insurance provided thereby or directly related thereto), less the employee's contributions

during the year, under the plan. If a profit-sharing or stock bonus plan, also a breakdown of such amounts into the following components:

(a) Amounts originally allocated in the year, and

(b) Amounts reallocated in the year.

(x) Amounts of employee contributions during the year under the plan,

(xi) If a pension or annuity plan,

(a) The retirement age and date and the form of the retirement benefit,

(b) The annual rate or amount of the retirement benefit, and

(c) The aggregate of all of the employee's contributions under the plan,

all based, in the case of an employee who is not on retirement benefit under the plan, upon the assumption of his continued employment at his current rate of compensation until his normal retirement age (or the end of the current year if later) and retirement on such date with the normal form of retirement benefit under the plan.

(4) The following totals:

(i) Total nondeferred compensation paid or accrued during the taxable year for all employees covered under the plan and also for all employees of the employer.

(ii) Total amount allocated during the year for the benefit of employees, former or retired employees, or their beneficiaries (including any insurance provided thereby or directly related thereto), less employee contributions during the year under the plan and, if a profit-sharing or stock bonus plan, also a breakdown of such total into the following components:

(a) Amount originally allocated in the year, and

(b) Amount reallocated in the year.

(5) A schedule showing the total number of employees as of the close of the year for each of the following groups, based on reasonable estimates:

(i) All employees ineligible for coverage under the plan because of requirements as to employment classification, specifying the reasons applicable to the group (as, for example, temporary, seasonal, part time, hourly pay basis, etc.).

(ii) All employees ineligible for coverage under the plan because of requirements as to length of service and not included in subdivision (i) of this subparagraph.

(iii) All employees ineligible for coverage under the plan because of requirements as to minimum age and not included in subdivision (i) or (ii) of this subparagraph.

(iv) All employees ineligible for coverage under the plan solely because of requirements as to minimum rate of compensation.

(v) All employees ineligible for coverage under the plan other than those employees included in subdivision (i), (ii), (iii), or (iv) of this subparagraph, specifying the reason applicable to the group.

(vi) All employees ineligible for coverage under the plan for any reasons, which should be the sum of subdivisions (i) to (v), inclusive, of this subparagraph.

(vii) All employees eligible for coverage but not covered under the plan.

(viii) All employees covered under the plan.

(ix) All employees of the employer, which should be the sum of subdivisions (vi), (vii), and (viii) of this subparagraph.

If it is claimed that the requirements of section 401(a)(3)(A) are satisfied, also the data and computations necessary to show that such requirements are satisfied.

(6) In the case of a trust, a detailed balance sheet and a detailed statement of receipts and disbursements during the year; in the case of a nontrusteed annuity plan, a detailed statement of the names of the insurers, the contributions paid by the employer and by the employees, and a statement as to the amounts and kinds of premium refunds or similar credits made available and the disposition of such credits in the year.

(7) If a pension or annuity plan, a detailed description of all the methods, factors, and assumptions used in determining costs and in adjusting the costs for actual experience under the plan (including any loadings, contingency reserves, or special factors and the basis of any insured costs or liabilities involved therein) explaining their source and application in sufficient detail to permit ready analysis and verification thereof, and, in the case of a trust, a detailed description of the basis used in valuing the investments held.

(8) A statement of the applicable limitations under section 404(a)(1), (2), (3), or (7) and an explanation of the method of determining such

limitations, a summary of the data, and a statement of computations necessary to determine the allowable deductions for the taxable year. Also, in the case of a pension or annuity plan, a summary of the costs or liabilities and adjustments for the year under the plan based on the application of the methods, factors, and assumptions used under the plan, in sufficient detail to permit ready verification of the reasonableness thereof.

(9) A statement of the contributions paid under the plan for the taxable year showing the date and amount of each payment. Also, a summary of the deductions claimed for the taxable year for the plan with a breakdown of the deductions claimed into the following components:

(i) For contributions paid in the taxable year before giving effect to the provisions of paragraph (7) of section 404(a).

(ii) For contributions paid in prior taxable years beginning after December 31, 1941, in accordance with the carryover provisions of paragraphs (1) and (3) of section 404(a), before giving effect to the provisions of paragraph (7) thereof, and in accordance with the carryover provisions of section 404(d).

(iii) Any reductions or increases in the deductions in accordance with the provisions of paragraph (7) of section 404(a). However, if the information in this subdivision is filed prior to the filing of the information required by subparagraph (8) of this paragraph, then, in determining the limit of deduction under paragraph (7) of section 404(a), the applicable percentage of the compensation otherwise paid or accrued during the year may be used.

(b) For taxable years subsequent to the year for which all of the applicable information under paragraph (a) of this section (or corresponding provisions of prior regulations) has been filed, information is to be filed only to the following extent:

(1) If there is any change in the plan, instruments, methods, factors, or assumptions upon which the data and information specified in paragraph (a)(1), (2), or (7) of this section are based, a detailed statement explaining the change and its effect is to be filed only for the taxable year in which the change is put into effect. However, if there is no such change, unless otherwise requested by the district director, merely a statement that there is no such change is to be filed.

(2) The information specified in paragraph (a)(3) of this section which has been filed for a taxable year, unless otherwise requested by the district director and so long as the plan and the method and basis of allocations are not changed, is to be filed for subsequent years only to the extent of showing in the tabulation such information with respect to employees who, at any time in the taxable year, own, directly or indirectly, more than 5 percent of the voting stock, considering stock so owned by an individual's spouse or minor lineal descendant as owned by the individual for this purpose.

(3) The information specified in paragraph (a)(4), (5), (6), (8), and (9) of this section.

In the case of corporate employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1961. In the case of other employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1962.

(c) If a deduction is claimed under section 404(a)(5) for the taxable year, the taxpayer shall furnish such information as is necessary to show that the deduction is not allowable under the other paragraphs of section 404(a), that the amount paid is an ordinary and necessary expense or an expense for the production of income, and that the employees' rights to, or derived from, such employer's contribution or such compensation were nonforfeitable at the time the contribution or compensation was paid. In the case of corporate employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1961. In the case of other employers, the information required to be submitted by this paragraph shall, except as otherwise provided by the Commissioner, be filed on Form 2950 for taxable years ending on or after December 31, 1962.

(d) For the purpose of the information required by this section, contributions paid in a taxable year shall include those deemed to be so paid in accordance with the provisions of section 404(a)(6) and shall exclude those deemed to be paid in the prior taxable year in accordance with such provisions. As used in this section, "taxable year" refers to the taxable year of the employer and, unless otherwise requested by the district director, a "year" which is not specified as a "taxable year" may be taken as the taxable year of the employer or as the plan, trust, valuation, or group contract year with re-

spect to which deductions are being claimed provided the same rule is followed consistently so that there is no gap or overlap in the information furnished for each item. In any case the date or period to which each item of information furnished relates should be clearly shown. All the information required by this section should be filed with the tax return for the taxable year in which the deduction is claimed, except that, unless sooner requested by the district director, such information, other than that specified in paragraph (a)(4)(i) and (9) of this section, may be filed within 12 months after the close of the taxable year provided there is filed with the tax return a statement that the information cannot reasonably be filed therewith, setting forth the reasons therefor.

(e) In any case all the information and data required by this section must be filed in the office of the district director in which the employer files his tax returns and must be filed independently of any information and data otherwise submitted in connection with a determination of the qualification of the trust or plan under section 401(a). The district director may, in addition, require any further information that he considers necessary to determine allowable deductions under section 404 or qualification under section 401. For taxable years ending on or before December 31, 1961, the district director may waive the filing of such information required by this section which he finds unnecessary in a particular case. For taxable years ending after December 31, 1961, the Commissioner may waive the filing of such information.

(f) Records substantiating all data and information required by this section to be filed must be kept at all times available for inspection by internal revenue officers at the main office or place of business of the employer.

(g) In the case of a plan which covers employees, some or all of whom are self-employed individuals and with respect to which a deduction is claimed under section 404(a)(1), (2), (3), or (7), paragraphs (a) and (b) of this section, and the provision of paragraph (d) of this section relating to the time for filing the information required by this section, shall not apply, but in lieu of the information required to be submitted by paragraphs (a) and (b) of this section, the employer shall, with the return for the taxable year in which the deduction is claimed, submit the information required by the form provided by the Internal Revenue Service for such purpose.

(h) When a custodial account forms a part of a plan for which a deduction is claimed under section 404(a)(1), (2), (3), or (7), the information which under this section is to be submitted with respect to a qualified trust must be submitted with respect to such custodial account. Thus, for purposes of this section—

(1) The term "trust" includes custodial account,

(2) The term "trustee" includes custodian, and

(3) The term "trust indenture" includes custodial agreement.

(i) Except as provided under § 1.503(d)–1(a) and § 601.201 of this chapter (Statement of Procedural Rules) in the case of a request for the determination of qualification of a trust under section 401 and exemption under section 501, paragraphs (a) through (h) of this section shall not apply for taxable years ending on or after December 31, 1971. For information to be furnished for taxable years ending on or after December 31, 1971, see § 1.404(a)–2A.

[T.D. 6500, 25 FR 11683, Nov. 26, 1960, as amended by T.D. 6599, 27 FR 4475, May 10, 1962; T.D. 6676, 28 FR 10144, Sept. 17, 1963; T.D. 7165, 37 FR 5025, 5491, March 9, 1972; T.D. 7168, 37 FR 5491, March 16, 1972]

§ 1.404(a)–2A Information to be furnished by employer; taxable years ending on or after December 31, 1971, and before December 31, 1975.

(a) In general. For any taxable year ending on or after December 31, 1971, any employer who maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation shall file the forms prescribed by this section. An employer (including a self-employed individual) maintaining such a plan shall furnish such information as is required by the forms and the instructions relating thereto. The forms shall be filed in the manner and at the time prescribed under paragraph (c) of this section. See § 1.404(a)–2 with respect to information to be furnished for taxable years ending before December 31, 1971. For purposes of this section, in the case of a plan of several employers described in § 1.401–1(d), each employer shall be deemed to be maintaining a separate plan corresponding to the plan of which the trust is a part. For information required to be furnished with respect to a funded deferred compensation plan maintained by an employer who is exempt from tax under section 501(a), see § 1.6033–2(a)(2)(ii)(i).

(b) Forms. The forms prescribed by this section are:

(1) Form 4848, generally relating to information concerning the qualification of the plan, and deductions for contributions made on behalf of employees or self-employed individuals,

(2) Form 4849, generally relating to the financial position of the trust, fund, or custodial or fiduciary account which is a part of the plan, and

(3) For any taxable year ending on or after December 31, 1971, and before December 31, 1972, Forms 2950 and 2950SE, relating to the identification of plans to which an employer has made a contribution and information with respect to a deduction for a contribution made on behalf of a self-employed individual, respectively.

(c) Filing requirements. (1) Form 4848 shall be filed by the employer for each taxable year during which he maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation. Such form shall be filed on or before the 15th day of the 5th month following the close of the employer's taxable year. For rules relating to the extension of time for filing, see section 6081 and the regulations thereunder and the instructions for Form 4848.

(2) Form 4849 shall be filed by the employer as an attachment to Form 4848 for each taxable year during which he maintains a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation unless the employer (i) has been notified in writing that Form 4849 will be filed by the fiduciary for such plan as an attachment to Form 990-P or (ii) is not required to file Form 4849 under the instructions relating thereto.

(3) For any taxable year ending on or after December 31, 1971, and before December 31, 1972, Form 2950 shall be filed with the employer's tax return for any such taxable year during which a pension, annuity, stock bonus, profit-sharing, or other funded plan of deferred compensation is maintained.

(4) For any taxable year ending on or after December 31, 1971, and before December 31, 1972, Form 2950SE shall be filed by each self-employed individual with his income tax return for any such taxable year in which he claims a deduction for contributions made on his behalf.

(d) Additional information. In addition to the information otherwise required to be furnished by this section, the district director may require any further information that he considers necessary to determine allowable deductions under section 404 or qualification under section 401.

(e) Records. Records substantiating all data and information required by this section to be filed must be kept at all times available for inspection by internal revenue officers at the main office or place of business of the employer.

[T.D. 7165, 37 FR 5025, March 9, 1972, as amended by T.D. 7223, 37 FR 24748, Nov. 21, 1972; T.D. 7551, 43 FR 29292, July 7, 1978]

§ 1.404(a)–3 Contributions of an employer to or under an employees' pension trust or annuity plan that meets the requirements of section 401(a); application of section 404(a)(1).

(a) If contributions are paid by an employer to or under a pension trust or annuity plan for employees and the general conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)–1), the contributions are deductible under section 404(a)(1) or (2) if the further conditions provided therein are also satisfied. As used in this section, a "pension trust" means a trust forming part of a pension plan and an "annuity plan" means a pension plan under which retirement benefits are provided under annuity or insurance contracts without a trust. This section is also applicable to contributions to a foreign situs pension trust which could qualify for exemption under section 501(a) except that it is not created or organized and maintained in the United States. For the meaning of "pension plan" as used in this section, see paragraph (b)(1)(i) of § 1.401–1. Where disability pensions, insurance, or survivorship benefits incidental and directly related to the retirement benefits under a pension or annuity plan are provided for the employees or their beneficiaries by contributions under the plan, deductions on account of such incidental benefits are also covered under section 404(a)(1) or (2). See paragraph (b)(2) of § 1.72–16 as to taxability to employees of cost of incidental life insurance protection. Similarly, where medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401–14 are provided for retired employees, their spouses, or their dependents under the plan, deductions on account of such subordinate benefits are also covered under section 404(a)(1) or (2). In order to be deductible under section 404(a)(1), contributions to a pension trust must be paid in a taxable year of the employer which ends with or within a year of the trust for which it is exempt under section 501(a). Contributions paid in such a taxable year of the employer may be

carried over and deducted in a succeeding taxable year of the employer in accordance with section 404(a)(1)(D), whether or not such succeeding taxable year ends with or within a taxable year of the trust for which it is exempt under section 501(a). See § 1.404(a)–7 for rules relating to the limitation on the amount deductible in such a succeeding taxable year of the employer. See § 1.404(a)–8 as to conditions for deductions under section 404(a)(2) in the case of an annuity plan. In either case, the deductions are also subject to further limitations provided in section 404(a)(1). The limitations provided in section 404(a)(1) are, with an exception provided for certain years under subparagraph (A) thereof (see § 1.404(a)–4), based on the actuarial costs of the plan.

(b) In determining costs for the purpose of limitations under section 404(a)(1), the effects of expected mortality and interest must be discounted and the effects of expected withdrawals, changes in compensation, retirements at various ages, and other pertinent factors may be discounted or otherwise reasonably recognized. A properly weighted retirement age based on adequate analyses of representative experience may be used as an assumed retirement age. Different basic assumptions or rates may be used for different classes of risks or different groups where justified by conditions or required by contract. In no event shall costs for the purpose of section 404(a)(1) exceed costs based on assumptions and methods which are reasonable in view of the provisions and coverage of the plan, the funding medium, reasonable expectations as to the effects of mortality and interest, reasonable and adequate regard for other factors such as withdrawal and deferred retirement (whether or not discounted) which can be expected to reduce costs materially, reasonable expenses of operation, and all other relevant conditions and circumstances. In any case, in determining the costs and limitations, an adjustment shall be made on account of any experience more favorable than that assumed in the basis of limitations for prior years. Unless such adjustments are consistently made every year by reducing the limitations otherwise determined by any decrease in liability or cost arising from experience in the next preceding taxable year which was more favorable than the assumptions on which the costs and limitations were based, the adjustment shall be made by some other method approved by the Commissioner.

(c) The amount of a contribution to a pension or annuity plan that is deductible under section 404(a)(1) or (2) depends upon the methods, factors, and assumptions which are used to compute the costs of the plan and the limitation of section 404(a)(1) which is applied. Since the amount that is deductible for one taxable year may affect the amount that is deductible for other taxable years, the methods, factors, and assumptions used in determining costs and the method of determining the limitation which have been used for determining the deduction for a taxable year for which the return has been filed shall not be changed for such taxable year, except when the Commissioner determines that the methods, factors, assumptions, or limitations were not proper, or except when a change is necessitated by reason of the use of different methods, factors, assumptions, or limitations for another taxable year. However, different methods, factors, and assumptions, or a different method of determining the limitation, if they are proper, may be used in determining the deduction for a subsequent taxable year.

(d) Any expenses incurred by the employer in connection with the plan, such as trustee's and actuary's fees, which are not provided for by contributions under the plan are deductible by the employer under section 162 (relating to trade or business expenses), or 212 (relating to expenses for production of income) to the extent that they are ordinary and necessary.

(e) In case deductions are allowable under section 404(a)(3), as well as under section 404(a)(1) or (2), the limitations under section 404(a)(1) and (3) are determined and applied without giving effect to the provisions of section 404(a)(7) but the amounts allowable as deductions are subject to the further limitations provided in section 404(a)(7). See § 1.404(a)–13.

(f)(1) Amounts contributed by an employer under the plan for the funding of medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401–14 must satisfy the general requirements which are applicable to deductions allowable under section 404 and which are set forth in § 1.404(a)–1 including, for example, the requirements described in paragraph (b) of such section. Accordingly, such amounts must constitute an ordinary and necessary expense relating to either the trade or business or the production of income and must not, when added to all other compensation paid by the employer to the employee on whose behalf such a contribution is made, constitute more than reasonable compensation. However, in determining the amount which is deductible with respect to contributions to provide retirement benefits under the plan, amounts contributed for the funding of medical benefits described in

section 401(h) shall not be taken into consideration.

(2) The amounts deductible with respect to employer contributions to fund medical benefits described in section 401(h) shall not exceed the total cost of providing such benefits. The total cost of providing such benefits shall be determined in accordance with any generally accepted actuarial method which is reasonable in view of the provisions and coverage of the plan, the funding medium, and other applicable considerations. The amount deductible for any taxable year with respect to such cost shall not exceed the greater of—

(i) An amount determined by distributing the remaining unfunded costs of past and current service credits as a level amount, or as a level percentage of compensation, over the remaining future service of each employee, or

(ii) 10 percent of the cost which would be required to completely fund or purchase such medical benefits.

In determining the amount deductible, an employer must apply either subdivision (i) of this subparagraph for all employees or subdivision (ii) of this subparagraph for all employees. If contributions paid by an employer in a taxable year to fund such medical benefits under a pension or annuity plan exceed the limitations of this subparagraph but otherwise satisfy the conditions for deduction under section 404, then the excess contributions are carried over and are deductible in succeeding taxable years of the employer which end with or within taxable years of the trust for which it is exempt under section 501(a) in order of time to the extent of the difference between the amount paid and deductible in each succeeding year and the limitation applicable to such year under this subparagraph. For purposes of subdivision (i) of this subparagraph, if the remaining future service of an employee is one year or less, it shall be treated as one year.

[T.D. 6500, 25 FR 11685, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 514, Jan. 20, 1961; 6722, 29 FR 5073, April 14, 1964; T.D. 7165, 37 FR 5025, March 9, 1972]

§ 1.404(a)–4 Pension and annuity plans; limitations under section 404(a)(1)(A).

(a) Subject to the applicable general conditions and limitations (see § 1.404(a)–3), the initial limitation under section 404(a)(1)(A) is 5 percent of the compensation otherwise paid or accrued during the taxable year to all employees under the pension or annuity plan. This initial 5-percent limitation applies to the first taxable year for which a deduction is allowed for contributions to or under such a plan and also applies to any subsequent year (other than one described in paragraph (d) of this section) for which the 5-percent figure is not reduced as provided in this section. For years to which the initial 5-percent limitation applies, no adjustment on account of prior experience is required. If the contributions do not exceed the initial 5-percent limitation in the first taxable year to which this limitation applies, the taxpayer need not submit actuarial data for such year.

(b) For the first taxable year following the first year to which the initial 5-percent limitation applies, and for every fifth year thereafter, or more frequently where preferable to the taxpayer, the taxpayer shall submit with his return an actuarial certification of the amount reasonably necessary to provide the remaining unfunded cost of past and current service credits of all employees under the plan with a statement explaining all the methods, factors, and assumptions used in determining such amount. This amount may be determined as the sum of (1) the unfunded past service cost as of the beginning of the year, and (2) the normal cost for the year. Such costs shall be determined by methods, factors, and assumptions appropriate as a basis of limitations under section 404(a)(1)(C). Whenever requested by the district director, a similar certification and statement shall be submitted for the year or years specified in such request. The district director will make periodical examinations of such data at not less than 5-year intervals. Based upon such examinations the Commissioner will reduce the limitation under section 404(a)(1)(A) below the 5-percent limitation for the years with respect to which he finds that the 5-percent limitation exceeds the amount reasonably necessary to provide the remaining unfunded cost of past and current service credits of all employees under the plan. Where the limitation is so reduced, the reduced limitation shall apply until the Commissioner finds that a subsequent actuarial valuation shows a change to be necessary. Such subsequent valuation may be made by the taxpayer at any time and submitted to the district director with a request for a change in the limitation. See, however, paragraph (d) of this section with respect to taxable years to which the limitation under section 404(a)(1)(A) does not apply.

(c) For the purpose of limitations under section 404(a)(1)(A), "compensation otherwise paid or accrued" means all of the compensation paid or

accrued except that for which a deduction is allowable under a plan that qualifies under section 401(a), including a plan that qualifies under section 404(a)(2). Where two or more pension or annuity plans cover the same employee, under section 404(a)(1)(A) the deductions with respect to each such plan are subject to the limitations applicable to the particular plan and the total deductions for all such plans are also subject to the limitations which would be applicable thereto if they constituted a single plan. Where, because of the particular provisions applicable to a large class of employees under a plan, the costs with respect to such employees are nominal in comparison with their compensation, after the first year to which the initial 5-percent limitation applies, deductions under section 404(a)(1)(A) are subject to limitations determined by considering the plan applicable to such class as if it were a separate plan. Deductions are allowable to the extent of the applicable limitations under section 404(a)(1)(A) even where these are greater than the applicable limitations under section 404(a)(1)(B) or section 404(a)(1)(C).

(d) The limitation under section 404(a)(1)(A) shall not be used for purposes of determining the amount deductible for a taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which ends after the trust or plan has terminated. See § 1.404(a)–7 for rules relating to the limitation which is applicable for purposes of determining the amount deductible for such a taxable year of the employer.

[T.D. 6500, 25 FR 11685, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 515, Jan. 20, 1961]

§ 1.404(a)–5 Pension and annuity plans; limitations under section 404(a)(1)(B).

(a) Subject to the applicable general conditions and limitations (see § 1.404(a)–3), under section 404(a)(1)(B), deductions may be allowed to the extent of limitations based on costs determined by distributing the remaining unfunded cost of the past and current service credits with respect to all employees covered under the trust or plan as a level amount or level percentage of compensation over the remaining service of each such employee except that, as to any three individuals with respect to whom more than 50 percent of such remaining unfunded cost attributable to such individuals shall be distributed evenly over a period of at least five taxable years. See, however, paragraph (e) of this section with respect to taxable years to which the limitation under section 404(a)(1)(B) does not apply.

(b) The statutory limitation for any taxable year under section 404(a)(1)(B) is any excess of the amount of the costs described in paragraph (a) of this section for the year over the amount allowable as a deduction under section 404(a)(1)(A).

(c) For this purpose, such excess, adjusted for prior experience, may be computed for each year as follows, all determinations being made as of the beginning of the year:

(1) Determine the value of all benefits expected to be paid, after the beginning of the year for all employees, any former employees, and any other beneficiaries, then covered under the plan.

(2) If employees contribute under the plan, determine the value of all contributions expected to be made after the beginning of the year by employees then covered under the plan.

(3) Determine the value of all funds of the plan as of the beginning of the year.

(4) Determine the amount remaining to be distributed as a level amount or as a level percentage of compensation over the remaining future service of each employee by subtracting from subparagraph (1) of this paragraph the sum of subparagraphs (2) and (3) of this paragraph.

(5) Determine the value of all compensation expected to be paid after the beginning of the year to all employees then covered under the plan.

(6) Determine an accrual rate for each employee by dividing subparagraph (5) of this paragraph into subparagraph (4) of this paragraph.

(7) Compute the excess under section 404(a)(1)(B) for the year by multiplying the compensation paid to all employees covered under the plan during the year by any excess of subparagraph (6) of this paragraph over 5 percent. In general, where this method is used, the limitation under section 404(a)(1)(B) will be equal to the excess so computed without further adjustment on account of prior favorable experience, provided all the factors and assumptions used are reasonable in view of all applicable considerations (see § 1.404(a)–3) and provided subparagraph (5) of this paragraph is not less than five times the annual rate of compensation in effect at the beginning of the year.

(d) Instead of determining the excess deductible under section 404(a)(1)(B) by the method shown

in paragraph (c), such excess may be based upon cost determined by some other method which is reasonable and appropriate under the circumstances. Thus, such excess may be based on the amounts necessary with respect to each individual covered employee to provide the remaining unfunded cost of all his benefits under the plan distributed as a level amount over the period remaining until the normal commencement of his retirement benefits, in accordance with other generally accepted actuarial methods which are reasonable and appropriate in view of the provisions of the plan, the funding medium, and other applicable considerations.

(e) The limitation under section 404(a)(1)(B) shall not be used for purposes of determining the amount deductible for a taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which ends after the trust or plan has terminated. See § 1.404(a)–7 for rules relating to the limitation which is applicable for purposes of determining the amount deductible for such a taxable year of the employer.

[T.D. 6500, 25 FR 11686, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 515, Jan. 20, 1961]

§ 1.404(a)–6 Pension and annuity plans; limitations under section 404(a)(1)(C).

(a) Application to a taxable year of the employer which ends with or within a taxable year of the pension trust or annuity plan for which it is exempt under section 501(a) or meets the requirements of section 404(a)(2). (1) The rules in this paragraph are applicable with respect to the limitation under section 404(a)(1)(C) for taxable years of the employer which end with or within a taxable year of the pension trust for which it is exempt under section 501(a), or, in the case of an annuity plan, during which it meets the requirements of section 404(a)(2). See paragraph (b) of this section for rules relating to the limitation under section 404(a)(1)(C) for other taxable years of the employer.

(2) Subject to the applicable general conditions and limitations (see § 1.404(a)–3), in lieu of amounts deductible under the limitations of section 404(a)(1)(A) and section 404(a)(1)(B), deductions may be allowed under section 404(a)(1)(C) to the extent of limitations based on normal and past service or supplementary costs of providing benefits under the plan. "Normal cost" for any year is the amount actuarially determined which would be required as a contribution by the employer in such year to maintain the plan if the plan had been in effect from the beginning of service of each then included employee and if such costs for prior years had been paid and all assumptions as to interest, mortality, time of payment, etc., had been fulfilled. Past service or supplementary cost at any time is the amount actuarially determined which would be required at such time to meet all the future benefits provided under the plan which would not be met by future normal costs and employee contributions with respect to the employees covered under the plan at such time.

(3) The limitation under section 404(a)(1)(C) for any taxable year to which this paragraph applies is the sum of normal cost for the year plus an amount not in excess of one-tenth of the past service or supplementary cost as of the date the past service or supplementary credits are provided under the plan. For this purpose, the normal cost may be determined by any generally accepted actuarial method and may be expressed either as (i) the aggregate of level amounts with respect to each employee covered under the plan, (ii) a level percentage of payroll with respect to each employee covered under the plan, or (iii) the aggregate of the single premium or unit costs for the unit credits accruing during the year with respect to each employee covered under the plan, provided, in any case, that the method is reasonable in view of the provisions and coverage of the plan, the funding medium, and other applicable considerations. The limitation may include one-tenth of the past service or supplementary cost as of the date the provisions resulting in such cost were put into effect, but it is subject to adjustments for prior favorable experience. See § 1.404(a)–3. In any case, past service or supplementary costs shall not be included in the limitation for any year in which the amount required to fund fully or to purchase such past service or supplementary credits has been deducted, since no deduction is allowable for any amount (other than the normal cost) which is paid in after such credits are fully funded or purchased.

(b) Application to a taxable year of the employer which does not end with or within a taxable year of the pension trust or annuity plan for which it is exempt under section 501(a) or meets the requirements of section 404(a)(2). (1) The rules in this paragraph are applicable with respect to the limitation under section 404(a)(1)(C) for taxable years of the employer which end with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of

an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which end after the trust or plan has terminated. Since contributions paid in such taxable years of the employer are not deductible under section 404(a)(1) or (2) (except as provided in section 404(a)(6)), the limitation under section 404(a)(1)(C) for such taxable years relates only to the amount of any excess contributions that may be carried over to such taxable years under section 404(a)(1)(D).

(2) Subject to the applicable general conditions and limitations (see § 1.404(a)–3), deductions may be allowed under section 404(a)(1)(C) for taxable years of the employer to which this paragraph applies to the extent of limitations based on past service or supplementary costs of providing benefits under the plan. For definition of the "past service or supplementary cost at any time", see paragraph (a)(2) of this section.

(3) The limitation under section 404(a)(1)(C) for any taxable year to which this paragraph applies is an amount not in excess of one-tenth of the past service or supplementary cost as of the date the past service or supplementary credits are provided under the plan. The limitation under section 404(a)(1)(C) is subject, however, to adjustments for prior favorable experience. In any case, no amounts are deductible under section 404(a)(1)(C) for any year to which this paragraph applies if the amount required to fund fully or to purchase the past service or supplementary credits has been deducted in prior taxable years of the employer.

[T.D. 6534, 26 FR 515, Jan. 20, 1961]

§ 1.404(a)–7 Pension and annuity plans; contributions in excess of limitations under section 404(a)(1); application of section 404(a)(1)(D).

When contributions paid by an employer in a taxable year to or under a pension or annuity plan exceed the limitations applicable under section 404(a)(1) but otherwise satisfy the conditions for deduction under section 404(a)(1) or (2), then in accordance with section 404(a)(1)(D), the excess contributions are carried over and are deductible in succeeding taxable years of the employer in order of time pursuant to the following rules:

(a) In the case of a succeeding taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it meets the requirements of section 404(a)(2), such excess contributions are deductible to the extent of the difference between the amount paid and deductible in such succeeding taxable year and the limitation applicable to such year under section 404(a)(1)(A), (B), or (C).

(b) In the case of a succeeding taxable year of the employer which ends with or within a taxable year of the pension trust during which it is not exempt under section 501(a), or, in the case of an annuity plan, during which it does not meet the requirements of section 404(a)(2), or which ends after the trust or plan has terminated, such excess contributions are deductible to the extent of the limitation applicable to such year under section 404(a)(1)(C) (see paragraph (b) of § 1.404(a)–6).

The provisions of section 404(a)(1)(D) are to be applied before giving effect to the provisions of section 404(a)(7) for any year. The carryover provisions of section 404(a)(1)(D), before effect has been given to section 404(a)(7), may be illustrated by the following example for a plan put into effect in a taxable year ending December 31, 1954:

Taxable Year Ending Dec. 31, 1954	
Amount of contributions paid in year	$100,000
Limitation applicable to year	60,000
Amount deductible for year	60,000
Excess carried over to succeeding years	40,000
Taxable Year Ending Dec. 31, 1955	
Amount of contributions paid in year	$25,000
Carried over from previous years	40,000
Total deductible subject to limitation	65,000
Limitation applicable to year	50,000
Amount deductible for year	50,000
Excess carried over to succeeding years	15,000
Taxable Year Ending Dec. 31, 1956	
Amount of contributions paid in year	$10,000
Carried over from previous years	15,000
Total deductible subject to limitation	25,000
Limitation applicable to year	45,000
Amount deductible for year	25,000
Excess carried over to succeeding years	None

[T.D. 6534, 26 FR 516, Jan. 20, 1961]

§ 1.404(a)–8 Contributions of an employer under an employees' annuity plan which meets the requirements of section 401(a); application of section 404(a)(2).

(a) If contributions are paid by an employer under an annuity plan for employees and the general conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)–1), the contributions are deductible under section 404(a)(2) if the further conditions provided therein are satisfied. For the meaning of

"annuity plan" as used here, see § 1.404(a)–3. In order that contributions by the employer may be deducted under section 404(a)(2), all of the following conditions must be satisfied:

(1) The contributions must be paid toward the purchase of retirement annuities (or for disability, severance, insurance, survivorship benefits incidental and directly related to such annuities, or medical benefits described in section 401(h) as defined in paragraph (a) of § 1.404(h)–1) under an annuity plan for the exclusive benefit of the employer's employees or their beneficiaries.

(2) The contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it meets the applicable requirements set forth in section 401(a)(3), (4), (5), (6), (7), (8), (11), (12), (13), (14), (15), (16), and (19). In the case of a plan which covers a self-employed individual, the contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it also meets the requirements of section 401(a), (9), (10), (17), and (18) and of section 401(d) (other than paragraph (1)). In the case of a plan which covers a shareholder-employee within the meaning of section 1379(d), the contributions must be paid in a taxable year of the employer which ends with or within a year of the plan for which it also meets the requirements of section 401(a)(17) and (18). See section 401(a) and the regulations thereunder for the requirements and the applicable effective dates of the respective paragraphs set forth in section 401(a). Any contributions of an employer which are paid in a taxable year of the employer ending with or within a year of the plan for which it meets the applicable requirements of section 401 may be carried over and deducted in a succeeding taxable year of the employer in accordance with section 404(a)(1)(D), whether or not such succeeding taxable year ends with or within a taxable year of the plan for which it meets the requirements set out in section 401(a) and (d). See section 401(b) and the regulations thereunder for special rules allowing certain plan amendments to be given retroactive effect. See section 404(a)(6) for a special rule for determining the time when a contribution is deemed to have been made.

(3) There must be a definite written arrangement between the employer and the insurer that refunds of premiums, if any, shall be applied within the taxable year of the employer in which received or within the next succeeding taxable year toward the purchase of retirement annuities (or for disability, severance, insurance, survivorship benefits incidental and directly related to such annuities, or medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401(h)–1 under the plan. For the purpose of this condition, "refunds of premiums" means payments by the insurer on account of credits such as dividends, experience rating credits, or surrender or cancellation credits. The arrangement may be in the form of contract provisions or written directions of the employer or partly in one form and partly in another. This condition will be considered satisfied where—

(i) All credits are applied regularly, as they are determined, toward the premiums next due under the contracts before any further employer contributions are so applied, and

(ii) Under the arrangement,

(A) No refund of premiums may be made during continuance of the plan unless applied as aforesaid, and

(B) If refunds of premiums may be made after discontinuance or termination, whichever is applicable, of the plan on account of surrenders or cancellations before all retirement annuities provided under the plan with respect to service before its discontinuance or termination have been purchased, such refunds will be applied in the taxable year of the employer in which received, or in the next succeeding taxable year, to purchase retirement annuities for employees by a procedure which does not contravene the conditions of section 401(a)(4). If the plan also includes medical benefits described in section 401(h) as defined in paragraph (a) of § 1.401(h)–1, any refund of premiums attributable to such benefits must, in accordance with these rules, be applied toward the purchase of medical benefits described in section 401(h).

(4) Any amounts described in subparagraph (3) of this paragraph which are attributable to contributions on behalf of a self-employed individual must be applied toward the purchase of retirement benefits. Amounts which are so applied are not contributions and thus are not taken into consideration in determining—

(i) The amount deductible with respect to contributions on his behalf, nor

(ii) In the case of an owner-employee, the maximum amount of contributions that may be made on his behalf.

(b) Where the above conditions are satisfied, the amounts deductible under section 404(a)(2) are governed by the limitations provided in section

404(a)(1). See §§ 1.404(a)–3 to 1.404(a)–7, inclusive.

[T.D. 6500, 25 FR 11687, Nov. 26, 1960, as amended by T.D. 6676, 28 FR 10144, Sept. 17, 1963, T.D. 6722, 29 FR 5074, Apr. 14, 1964; T.D. 7501, 42 FR 42321, Aug. 23, 1977]

§ 1.404(a)(8)–1T Deductions for plan contributions on behalf of self-employed individuals (temporary).

Q: How does the amendment to section 404(a)(8)(D), made by section 713(d)(6) of the Tax Reform Act of 1984 (TRA of 1984), affect section 404(a)(8)(C)?

A: In applying the rules of section 404(a)(8)(C), the Service will treat the amendment to section 404(a)(8)(D) as also having been made to section 404(a)(8)(C), pending enactment of technical corrections to TRA of 1984. The effect of treating the amendment as having also been made to section 404(a)(8)(C) is to increase the amount of contributions on behalf of a self-employed individual that will be treated as satisfying section 162 or 212. Generally, therefore, a contribution on behalf of a self-employed individual is treated as satisfying section 162 or 212 if it is not in excess of the individual's earned income for the year, determined without regard to the deduction allowed by section 404 for the self-employed individual's contribution.

[T.D. 8073, 51 FR 4321, Feb. 4, 1986]

§ 1.404(a)–9 Contributions of an employer in an employees' profit-sharing or stock bonus trust that meets the requirements of section 401(a); application of section 404(a)(3)(A).

(a) If contributions are paid by an employer to a profit-sharing or stock bonus trust for employees and the general conditions and limitations applicable to deductions for such contributions are satisfied (see § 1.404(a)–1), the contributions are deductible under section 404(a)(3)(A) if the further conditions provided therein are also satisfied. In order to be deductible under the first, second, or third sentence of section 404(a)(3)(A), the contributions must be paid (or deemed to have been paid under section 404(a)(6)) in a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a) and the trust must not be designed to provide retirement benefits for which the contributions can be determined actuarially. Excess contributions paid in such a taxable year of the employer may be carried over and deducted in a succeeding taxable year of the employer in accordance with the third sentence of section 404(a)(3)(A), whether or not such succeeding taxable year ends with or within a taxable year of the trust for which it is exempt under section 501(a). This section is also applicable to contributions to a foreign situs profit-sharing or stock bonus trust which could qualify for exemption under section 501(a) except that it is not created or organized and maintained in the United States.

(b) The amount of deductions under section 404(a)(3)(A) for any taxable year is subject to limitations based on the compensation otherwise paid or accrued by the employer during such taxable year to employees who are beneficiaries under the plan. For purposes of computing this limitation, the following rules are applicable:

(1) In the case of a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a), the limitation shall be based on the compensation otherwise paid or accrued by the employer during such taxable year of the employer to the employees who, in such taxable year of the employer, are beneficiaries of the trust funds accumulated under the plan.

(2) In the case of a taxable year of the employer which ends with or within a taxable year of the trust during which it is not exempt under section 501(a), or which ends after the trust has terminated, the limitation shall be based on the compensation otherwise paid or accrued by the employer during such taxable year of the employer to the employees who, at any time during the one-year period ending on the last day of the last calendar month during which the trust was exempt under section 501(a), were beneficiaries of the trust funds accumulated under the plan.

For purposes of this paragraph, "compensation otherwise paid or accrued" means all of the compensation paid or accrued except that for which a deduction is allowable under a plan that qualifies under section 401(a), including a plan that qualifies under section 404(a)(2). The limitations under section 404(a)(3)(A) apply to the total amount deductible for contributions to the trust regardless of the manner in which the funds of the trust are invested, applied, or distributed, and no other deduction is allowable on account of any benefits provided by contributions to the trust or by the funds thereof. Where contributions are paid to two or more profit-sharing or stock bonus trusts satisfying the conditions for deduction under sec-

tion 404(a)(3)(A), such trusts are considered as a single trust in applying these limitations.

(c) The primary limitation on deductions for a taxable year is 15 percent of the compensation otherwise paid or accrued by the employer during such taxable year to the employees who are beneficiaries under the plan. See paragraph (b) of this section for rules for determining who are the beneficiaries under the plan.

(d) In order that the deductions may average 15 percent of compensation otherwise paid or accrued over a period of years, where contributions in some taxable year are less than the primary limitation but contributions in some succeeding taxable year exceed the primary limitation, deductions in each succeeding year are subject to a secondary limitation instead of to the primary limitation. The secondary limitation for any year is equal to the lesser of (1) twice the primary limitation for the year, or (2) any excess of (i) the aggregate of the primary limitations for the year and for all prior years over (ii) the aggregate of the deductions allowed or allowable under the limitations provided in section 404(a)(3)(A) for all prior years. Since contributions paid into a profit-sharing or stock bonus trust are deductible under section 404(a)(3)(A) only if they are paid (or deemed to have been paid under section 404(a)(6)) in a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a), the secondary limitation described in this paragraph is not applicable with respect to determining amounts deductible for a taxable year of the employer which ends with or within a taxable year of the trust during which it is not exempt under section 501(a), or which ends after the trust has terminated. See paragraph (e) of this section for rules relating to amounts which are deductible in such a taxable year.

(e) In any case when the contributions in a taxable year exceed the amount allowable as a deduction for the year under section 404(a)(3)(A), the excess is deductible in succeeding taxable years, in order of time, in accordance with the following limitations:

(1) If the succeeding taxable year ends with or within a taxable year of the trust for which it is exempt under section 501(a), such excess is deductible in any such succeeding taxable year in which the contributions are less than the primary limitation for that year; but the total deduction for such succeeding taxable year cannot exceed the lesser of (i) the primary limitation for such year, or (ii) the sum of the contributions in such year and the excess contributions not deducted under the limitations of section 404(a)(3)(A) for prior years.

(2) If the succeeding taxable year ends with or within a taxable year of the trust during which it is not exempt under section 501(a), or if such succeeding taxable year ends after the trust has terminated, the total deduction for such succeeding taxable year cannot exceed the lesser of (i) the primary limitation for such succeeding taxable year, or (ii) the excess contributions not deducted under the limitations of section 404(a)(3)(A) for prior years.

In no case, however, are excess contributions deductible in a succeeding taxable year if such contributions were not paid (or deemed to have been paid under section 404(a)(6)) in a taxable year of the employer which ends with or within a taxable year of the trust for which it is exempt under section 501(a).

(f) In case deductions are allowable under section 404(a)(1) or (2), as well as under section 404(a)(3)(A), the limitations under section 404(a)(1) and (3)(A) are determined and applied without giving effect to the provisions of section 404(a)(7), but the amounts allowable as deductions are subject to the further limitations provided in section 404(a)(7). See § 1.404(a)–13.

(g) The provisions of section 404(a)(3)(A) before giving effect to section 404(a)(7), may be illustrated as follows:

ILLUSTRATION OF PROVISIONS OF SECTION 404(a)(3)(A) FOR A PLAN PUT INTO EFFECT IN THE TAXABLE (CALENDAR) YEAR 1954, BEFORE GIVING EFFECT TO SECTION 404(a)(7) (ALL FIGURES REPRESENT THOUSANDS OF DOLLARS AND ALL TAXABLE (CALENDAR) YEARS ARE YEARS WHICH END WITH OR WITHIN A TAXABLE YEAR OF THE TRUST FOR WHICH IT IS EXEMPT UNDER SECTION 501(a))

[1] Compensation otherwise paid or accrued during the year to the employees who are beneficiaries of trust funds accumulated under the plan in the year.

[T.D. 6500, 25 FR 11687, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 516, Jan. 20, 1961]

§ 1.404(a)–10 Profit-sharing plan of an affiliated group; application of section 404(a)(3)(B).

(a) Section 404(a)(3)(B) allows a corporation a deduction to the extent provided in paragraphs (b) and (c) of this section for a contribution which it makes for another corporation to a profit-sharing plan or a stock bonus plan under which contributions are determined by reference to profits, provided the following tests are met:

(1) The corporation for which the contribution is made and the contributing corporation are members of an affiliated group of corporations as defined in section 1504, relating to the filing of consolidated returns, and both such corporations participate in the plan. However, it is immaterial whether all the members of such group participate in the plan.

(2) The corporation for which the contribution is made is required under the plan to make the contribution, but such corporation is prevented from making such contribution because it has neither current nor accumulated earnings or profits, or because its current and accumulated earnings or profits are insufficient to make the required contribution. To the extent that such a corporation has any current or accumulated earnings or profits, it is not considered to be prevented from making its required contribution to the plan.

(3) The contribution is made out of the current or accumulated earnings or profits of the contributing corporation.

(b) The amount that is deductible under section 404(a)(3)(B) is determined by applying the rules of section 404(a)(3)(A) and § 1.404(a)–9 as if the contribution were made by the corporation for which it is made. For example, the primary limitation described in paragraph (e) of § 1.404(a)–9 is determined by reference to the compensation otherwise paid or accrued to the employees of the corporation for which the contribution is made, and the secondary limitation described in paragraph (d) of § 1.404(a)–9 and the contribution carryover described in paragraph (c) of § 1.404(a)–9 are determined by reference to the prior contributions and deductions of such corporation. The contributing corporation may deduct the amount so determined subject to the limitations contained in paragraph (c) of this section. The contributing corporation shall not treat such amount as a contribution made by it in applying the rules of section 404(a)(3)(A) and § 1.404(a)–9 either for the taxable year for which the contribution is made or for succeeding taxable years. The corporation for which the contribution is made shall treat the contribution as having been made by it in applying the rules of section 404(a)(3)(A) and § 1.404(a)–9 for succeeding taxable years.

(c) The allowance of the deduction under section 404(a)(3)(B) does not depend upon whether the affiliated group does or does not file a consolidated return. If a consolidated return is filed, it is immaterial which of the participating corporations makes the contribution and takes the deduction or how the contribution or the deduction is allocated among them. However, if a consolidated return is not filed, the contribution which is deductible under section 404(a)(3)(B) by each contributing corporation shall be limited to that portion of its total current and accumulated earnings or profits (adjusted for its contribution deductible without regard to section 404(a)(3)(B)) which the prevented contribution bears to the total current and accumulated earnings or profits of all the participating members of the group having such earnings or profits (adjusted for all contributions deductible without regard to section 404(a)(3)(B)).

For the purpose of this section, current earnings or profits shall be computed as of the close of the taxable year without diminution by reason of any dividends during the taxable year, and accumulated earnings or profits shall be computed as of the beginning of the taxable year.

(d) The application of section 404(a)(3)(B) may be illustrated by the following example in which the affiliated group does not file a consolidated return:

(1)	(2)	(3)	(4)	(5)	(6)	(7)	(8)	(9)	(10)	(11)
A	($10,000)	($140,000)	($150,000)	$200,000	1/5	$6,000	....	....	....	....
B...........	(5,000)	105,000	100,000	300,000	3/10	9,000	$9,000	$91,000	6/326 × 91,000	$1,674.85
C...........	75,000	175,000	250,000	500,000	1/2	15,000	15,000	235,000	6/326 × 235,000	4,325.15
Total.......	60,000	140,000	200,000	1,000,000	....	30,000	24,000	326,000	....	6,000.00

Column:
(1) Member.
(2) Earnings and profits of the taxable year.
(3) Accumulated earnings and profits at beginning of taxable year.
(4) Total current and accumulated earnings and profits (column 2 plus column 3).
(5) Compensation of participating employees.
(6) Contribution formula: 50 percent of consolidated earnings and profits, allocated among participating member in proportion of covered payroll of each to covered payroll of consolidated group.
(7) Individual contribution had it not been prevented.
(8) Individual contribution made by each employer for its own employees.
(9) Balance of accumulated earnings and profits (column 4 minus column 8).
(10) Proportion of make-up contribution.
(11) Make-up contribution.

[T.D. 6500, 25 FR 11688, Nov. 26, 1960]

§ 1.404(a)–11 Trusts created or organized outside the United States; application of section 404(a)(4).

In order that a trust may constitute a qualified trust under section 401(a) and be exempt under section 501(a), it must be created or organized in the United States and maintained at all times as a domestic trust. See paragraph (a) of § 1.401–1. Paragraph (4) of section 404(a) provides, however, that an employer which is a resident, a corporation, or other entity of the United States, making contributions to a foreign stock bonus, pension, or profit-sharing trust, shall be allowed deductions for such contributions, under the applicable conditions and within the prescribed limits of section 404(a), if such foreign trust would qualify for exemption under section 501(a) except for the fact that it is a trust created, organized, or maintained outside the United States. Moreover, if a nonresident alien individual, foreign corporation, or other entity is engaged in trade or business within the United States and makes contributions to a foreign stock bonus, pension, or profit-sharing trust, which would qualify under section 401(a) and be exempt under section 501(a) except that it is created, organized, or maintained outside the United States, such contributions are deductible subject to the conditions and limitations of section 404(a) and to the extent allowed by section 873 or 882(c).

[T.D. 6500, 25 FR 11689, Nov. 26, 1960]

§ 1.404(a)–12 Contributions of an employer under a plan that does not meet the requirements of section 401(a); application of section 404(a)(5).

(a) **In general.** Section 404(a)(5) covers all cases for which deductions are allowable under section 404(a) (for contributions paid by an employer under a stock bonus, pension, profit sharing, or annuity plan or for any compensation paid on account of any employee under a plan deferring the receipt of such compensation) but not allowable under paragraph (1), (2), (3), (4), or (7) of such section. For the rules with respect to the taxability of an employee when rights under a nonexempt trust become substantially vested, see section 402(b) and the regulations thereunder.

(b) **Contributions made after August 1, 1969—(1) In general.** A deduction is allowable for a contribution paid after August 1, 1969, under section 404(a)(5) only in the taxable year of the employer in which or with which ends the taxable year of an employee in which an amount attributable to such contribution is includible in his gross income as compensation, and then only to the extent allowable under section 404(a). See § 1.404(a)–1. For example, if an employer A contributes $1,000 to the account of its employee E for its taxable (calendar) year 1977, but the amount in the account attributable to that contribution is not includible in E's gross income until his taxable (calendar) year 1980 (at which time the includible amount is $1,150), A's deduction for that contribution is $1,000 in 1980 (if allowable

under section 404(a)). For purposes of this (1), a contribution is considered to be so includible where the employee or his beneficiary excludes it from his gross income under section 101(b) or subchapter N. To the extent that property of the employer is transferred in connection with such a contribution, such transfer will constitute a disposition of such property by the employer upon which gain or loss is recognized, except as provided in section 1032 and the regulations thereunder. The amount of gain or loss recognized from such disposition shall be the difference between the value of such property used to measure the deduction allowable under this section and the employer's adjusted basis in such property.

(2) Special rule for unfunded pensions and certain death benefits. If unfunded pensions are paid directly to former employees, such payments are includible in their gross income when paid, and accordingly, such amounts are deductible under section 404(a)(5) when paid. Similarly, if amounts are paid as a death benefit to the beneficiaries of an employee (for example, by continuing his salary for a reasonable period), and if such amounts meet the requirements of section 162 or 212, such amounts are deductible under section 404(a)(5) in any case when they are not includible under the other paragraphs of section 404(a).

(3) Separate accounts for funded plans with more than one employee. In the case of a funded plan under which more than one employee participates, no deduction is allowable under section 404(a)(5) for any contribution unless separate accounts are maintained for each employee. The requirement of separate accounts does not require that a separate trust be maintained for each employee. However, a separate account must be maintained for each employee to which employer contributions under the plan are allocated, along with any income earned thereon. In addition, such accounts must be sufficiently separate and independent to qualify as separate shares under section 663(c). Nothing shall preclude a trust which loses its exemption under section 501(a) from setting up such accounts and meeting the separate account requirement of section 404(a)(5) with respect to the taxable years in which such accounts are set up and maintained.

(c) Contributions paid on or before August 1, 1969. No deduction is allowable under section 404(a)(5) for any contribution paid on or before August 1, 1969, by an employer under a stock bonus, pension, profit-sharing, or annuity plan, or for any compensation paid on account of any employee under plan deferring the receipt of such compensation, except in the year when paid, and then only to the extent allowable under section 404(a). See § 1.404(a)–1. If payments are made under such a plan and the amounts are not deductible under the other paragraphs of section 404(a), they are deductible under section 404(a)(5) to the extent that the rights of individual employees to, or derived from, such employer's contribution or such compensation are nonforfeitable at the time the contribution or compensation is paid. If unfunded pensions are paid directly to former employees, their rights to such payments are nonforfeitable, and accordingly, such amounts are deductible under section 404(a)(5) when paid. Similarly, if amounts are paid as a death benefit to the beneficiaries of an employee (for example, by continuing his salary for a reasonable period), and if such amounts meet the requirements of section 162 or 212, such amounts are deductible under section 404(a)(5) in any case where they are not deductible under the other paragraphs of section 404(a). As to what constitutes nonforfeitable rights of an employee in other cases, see § 1.402(b)–1(d)(2). If an amount is accrued but not paid during the taxable year, no deduction is allowable for such amount for such year. If an amount is paid during the taxable year to a trust or under a plan and the employee's rights to such amount are forfeitable at the time the amount is paid, no deduction is allowable for such amount for any taxable year.

[T.D. 6500, 25 FR 11689, Nov. 26, 1960; T.D. 7554, 43 FR 31926, July 24, 1978]

§ 1.404(a)–13 Contributions of an employer where deductions are allowable under section 404(a)(1) or (2) and also under section 404(a)(3); application of section 404(a)(7).

(a) Where deductions are allowable under section 404(a)(1) or (2) on account of contributions under a pension or annuity plan and deductions are also allowable under section 404(a)(3) for the same taxable year on account of contributions to a profit-sharing or stock bonus trust, the total deductions under these sections are subject to the provisions of section 404(a)(7) unless no employee who is a beneficiary under the trusts or plans for which deductions are allowable under section 404(a)(1) or (2) is also a beneficiary under the trusts for which deductions are allowable under section 404(a)(3). The provisions of section 404(a)(7) apply only to deductions for overlapping trusts or plans, *i.e.*, for all trusts or plans for which deductions are allowable under section

404(a)(1), (2), or (3) except (1) any trust or plan for which deductions are allowable under section 404(a)(1) or (2) and which does not cover any employee who is also covered under a trust for which deductions are allowable under section 404(a)(3), and (2) any trust for which deductions are allowable under section 404(a)(3) and which does not cover any employee who is also covered under a trust or plan for which deductions are allowable under section 404(a)(1) or (2). The limitations under section 404(a)(7) for any taxable year of the employer are based on the compensation otherwise paid or accrued during the year by the employer to all employees who, in such year, are beneficiaries of the funds accumulated under one or more of the overlapping trusts or plans. For purposes of the preceding sentence, if the taxable year of the employer with respect to which the limitation is being computed ends with or within a taxable year of any of the overlapping trusts or plans during which any such trust is not exempt under section 501(a) or, in the case of a plan, during which it does not meet the requirements of section 404(a)(2), or if such taxable year of the employer ends after any such trust or plan has terminated, then, with respect to such trust or plan, those employees, and only those employees, who, at any time during the one-year period ending on the last day of the last calendar month during which the trust was exempt under section 501(a), or the plan met the requirements of section 404(a)(2), were beneficiaries of the funds accumulated under such trust or plan shall be considered the beneficiaries of such trust or plan in the taxable year of the employer with respect to which the limitation is being computed. For purposes of this paragraph, "compensation otherwise paid or accrued" means all of the compensation paid or accrued except that for which a deduction is allowable under a plan that qualifies under section 401(a), including a plan that qualifies under section 404(a)(2).

(b) Under section 404(a)(7), any excess of the total amount otherwise deductible for the taxable year under section 404(a)(1), (2), or (3) as contributions to overlapping trusts or plans over 25 percent of the compensation otherwise paid or accrued during the year to all the employees who are beneficiaries under such trusts or plans, is not deductible for such year but is deductible for succeeding taxable years, in order of time, so that the total deduction for contributions to such trusts or plans for a succeeding taxable year is equal to the lesser of—

(1) 30 percent of the compensation otherwise paid or accrued during the taxable year to all the employees who are beneficiaries under such trusts or plans in the year, or

(2) The sum of (i) the smaller of (a) 25 percent of the compensation otherwise paid or accrued during the taxable year to all employees who are beneficiaries under such trusts or plans in the year, or (b) the total of the amounts otherwise deductible under section 404(a)(1), (2), or (3) for the year for such trusts or plans and (ii) any carryover to the year from prior years under section 404(a)(7), *i.e.*, any excess otherwise deductible under section 404(a)(1), (2), or (3), but not deducted for a prior taxable year because of the limitations under section 404(a)(7).

(c) The limitations under section 404(a)(7) are determined and applied after all the limitations, deductions otherwise allowable, and carryovers under section 404(a)(1), (2), and (3) have been determined and applied, and, in particular, after effect has been given to the carryover provision in section 404(a)(1)(D) and in the second and third sentences of section 404(a)(3)(A). Where the limitations under section 404(a)(7) reduce the total amount deductible, the excess deductible in succeeding years is treated as a carryover which is distinct from, and additional to, any excess contributions carried over and deductible in succeeding years under the provisions in section 404(a)(1)(D) or in the third sentence of section 404(a)(3)(A). The application of the provisions of section 404(a)(7) and the treatment of carryovers for a case where the taxable years are calendar years and the overlapping trusts or plans consist of a pension trust and a profit-sharing trust put into effect in 1954 and covering the same employees may be illustrated as follows:

ILLUSTRATION OF APPLICATION OF PROVISIONS OF SECTION 404(a)(7) AND OF TREATMENT OF CARRYOVERS FOR OVERLAPPING PENSION AND PROFIT-SHARING TRUSTS PUT INTO EFFECT IN 1954 AND COVERING THE SAME EMPLOYEES (ALL FIGURES REPRESENT THOUSANDS OF DOLLARS AND ALL TAXABLE (CALENDAR) YEARS OF THE EMPLOYER ARE YEARS WHICH END WITH OR WITHIN A TAXABLE YEAR OF THE TRUST FOR WHICH IT IS EXEMPT UNDER SECTION 501(a))

(c) Smaller of (a) or (b)	275	240	225	145
(ii) Carryover from prior years under section 404(a)(7)	0	100	40	10
(iii) Sum of (i)(c) and (ii)	275	340	265	155
(3) Amount deductible: Lesser of (1) or (2)(iii)	275	300	265	155
14. Carryover to succeeding years under section 404(a)(7): item 13(2)(ii) plus item 3(2)(i)(b) minus item 13(3)	100	40	10	0

[1] Includes carryover of 20 from 1956.
[2] Compensation otherwise paid or accrued during the year to the employees who are beneficiaries under the trusts in the year.
[3] 30 percent limitation not applicable to first year of plan.

[T.D. 6500, 25 FR 11689, Nov. 26, 1960, as amended by T.D. 6534, 26 FR 517, Jan. 20, 1961]

§ 1.404(a)–14 Special rules in connection with the Employee Retirement Income Security Act of 1974.

(a) Purpose of this section. This section provides rules for determining the deductible limit under section 404(a)(1)(A) of the Internal Revenue Code of 1954 for defined benefit plans.

(b) Definitions. For purposes of this section—

(1) Section 404(a). The term "old section 404(a)" means section 404(a) as in effect on September 1, 1974. Any reference to section 404 without the designation "old" is a reference to section 404 as amended by the Employee Retirement Income Security Act of 1974.

(2) Ten-year amortization base. The term "10-year amortization base" means either the past service and other supplementary pension and annuity credits described in section 404(a)(1)(A)(iii) or any base established in accordance with paragraph (g) of this section. A plan may have several 10-year amortization bases to reflect different plan amendments, changes in actuarial assumptions, changes in funding method, and experience gains and losses of previous years.

(3) Limit adjustment. The term "limit adjustment" with respect to any 10-year amortization base is the lesser of—

(i) The level annual amount necessary to amortize the base over 10 years using the valuation rate, or

(ii) The unamortized balance of the base,

in each case using absolute values (solely for the purpose of determining which is the lesser). To compute the level amortization amount, the base may be divided by the present value of an annuity of one dollar, obtained from standard annuity tables on the basis of a given interest rate (the valuation rate) and a known period (the amortization period).

(4) Absolute value. The term "absolute value" for any number is the value of that number, treating negative numbers as if they were positive numbers. For example, the absolute value of 5 is 5 and the absolute value of minus 3 is 3. On the other hand, the true value of minus 3 is minus 3. This term is relevant to the computation of the limit adjustment described in paragraph (b)(3) and the remaining amortization period of combined bases described in paragraph (i)(3) of this section.

(5) Valuation rate. The term "valuation rate" means the assumed interest rate used to value plan liabilities.

(c) Use of plan in determining deductible limit for employer's taxable year. Although the deductible limit applies for an employer's taxable year, the deductible limit is determined on the basis of a plan year. If the employer's taxable year coincides with the plan year, the deductible limit for the taxable year is the deductible limit for the plan year that coincides with that year. If the employer's taxable year does not coincide with the plan year, the deductible limit under section 404(a)(1)(A)(i), (ii), or (iii) for a given taxable year of the employer is one of the following alternatives:

(1) The deductible limit determined for the plan year commencing within the taxable year.

(2) The deductible limit determined for the plan year ending within the taxable year, or

(3) A weighted average of alternatives (1) and (2). Such an average may be based, for example, upon the number of months of each plan year falling within the taxable year.

The employer must use the same alternative for each taxable year unless consent to change is obtained from the Commissioner under section 446(e).

(d) Computation of deductible limit for a plan year—(1) General rules. The computation of the deductible limit for a plan year is based on the funding methods, actuarial assumptions, and benefit structure used for purposes of section 412, determined without regard to section 412(g) (relating to the alternative minimum funding standard), for the plan year. The method of valuing assets for purposes of section 404 must be the same method of valuing assets used for purposes of section 412.

(2) Special adjustments of computations under section 412. To apply the rules of this section (*i.e.*, rules regarding the computation of normal cost with aggregate type funding methods, unfunded liabilities, and the full funding limitation described in paragraph (k) of the section, where applicable) with respect to a given plan year in computing deductible limits under section 404(a)(1)(A), the following adjustments must be made:

(i) There must be excluded from the total assets of the plan the amount of any plan contribution for a plan year for which the plan was qualified under section 401(a), 403(a) or 405(a) that has not been previously deducted, even though that amount may have been credited to the funding standard account under section 412(b)(3). In the case of a plan using a spread gain funding method which maintains an unfunded liability (*e.g.*, the frozen initial liability method, but not the aggregate method), the amount described in the preceding sentence must be included in the unfunded liability of the plan.

(ii) There must be included in the total assets of the plan for a plan year the amount of any plan contribution that has been deducted with respect to a prior plan year, even though that amount is considered under section 412 to be contributed in a plan year subsequent to that prior plan year. In the case of a plan using a spread gain funding method which does not maintain an unfunded liability, the amount described in the preceding sentence must be excluded from the unfunded liability of the plan.

The special adjustments described in paragraph (d)(2)(i) and (ii) of this section apply on a year-by-year basis for purposes of section 404(a)(1)(A) only. Thus, the adjustments have no effect on the computation of the minimum funding requirement under section 412.

(e) Special computation rules under section 404(a)(1)(A)(i)—(1) In general. For purposes of determining the deductible limit under section 404(a)(1)(A)(i), the deductible limit with respect to a plan year is the sum of—

(i) The amount required to satisfy the minimum funding standard of section 412(a) (determined without regard to section 412(g)) for the plan year and

(ii) An amount equal to the includible employer contributions. The term "includible employer contributions" means employer contributions which were required by section 412 for the plan year immediately preceding such plan year, and which were not deductible under section 404(a) for the prior taxable year of the employer solely because they were not contributed during the prior

taxable year (determine with regard to section 404(a)(6)).

(2) **Rule for an employer using alternative minimum funding standard account and computing its deduction under section 404(a)(1)(A)(i).** This paragraph (e)(2) applies if the minimum funding requirements for the plan are determined under the alternative minimum funding standard described in section 412(g) for both the current plan year and the immediately preceding plan year. In that case, the deductible limit under section 404(a)(1)(A)(i) (regarding the minimum funding requirement of section 412) for the current year is the sum of the amount determined under the rules of paragraph (e)(1) of this section.

(i) Plus the charge under section 412(b)(2)(D), and

(ii) Less the credit under section 412(b)(3)(D),

that would be required if in the current plan year the use of the alternative method were discontinued.

(f) **Special computation rules under section 404(a)(1)(A)(ii) and (iii)—(1) In general.** Subject to the full funding limitation described in paragraph (k) of this section, the deductible limit under section 404(a)(1)(A)(ii) and (iii) is the normal cost of the plan (determined in accordance with paragraph (d) of this section).

(2) **Adjustments in calculating limit under section 404(a)(1)(A)(iii).** In calculating the deductible limit under section 404(a)(1)(A)(iii), the normal cost of the plan is—

(i) Decreased by the limit adjustments to any unamortized bases required by paragraph (g) of this section, for example, bases that are due to a net experience gain, a change in actuarial assumptions, a change in funding method, or a plan provision or amendment which decreases the accrued liability of the plan, and

(ii) Increased by the limit adjustments of any unamortized 10-year amortization bases required by paragraph (g) or (j) of this section, for example, bases that are due to a net experience loss, a change in actuarial assumptions, a change in funding method, or a plan provision or amendment which increases the accrued liability.

(3) **Timing for computations and interest adjustments under section 404(a)(1)(A)(ii) and (iii).** Regardless of the actual time when contributions are made to a plan, in computing the deductible limit under section 404(a)(1)(A)(ii) and (iii) the normal cost and limit adjustments shall be computed as of the date when contributions are assumed to be made ("the computation date") and adjusted for interest at the valuation rate from the computation date to the earlier of—

(i) The last day of the plan year used to compute the deductible limit for the taxable year, or

(ii) The last day of that taxable year. For additional provisions relating to the timing of computations and interest adjustments, see paragraph (h)(6) of this section (relating to the timing of computations and interest adjustments in the maintenance of 10-year amortization bases). For taxable years beginning before April 22, 1981, computations under the preceding sentence may, as an alternative, be based on prior published positions of the Internal Revenue Service under section 404(a).

(4) **Special limit under section 404(a)(1)(A)(ii).** If the deduction for the plan year is determined solely on the basis of section 404(a)(1)(A)(ii) (that is, without regard to clauses (i) or (iii)), the special limitation contained in section 404(a)(1)(A)(ii), regarding the unfunded cost with respect to any three individuals, applies, notwithstanding the rules contained in paragraphs (d)(2) and (f)(1) of this section.

(g) **Establishment of a 10-year amortization base—(1) Experience gains and losses.** In the case of a plan valued by the use of a funding method which is an immediate gain type of funding method (and therefore separately amortizes rather than includes experience gains and losses as a part of the normal cost of the plan), a 10-year amortization base must be established in any plan year equal to the net experience gain or loss required under section 412 to be determined with respect to that plan year. The base is to be maintained in accordance with paragraph (h) of this section. Such a base must not be established if the deductible limit is determined by use of a funding method which is a spread gain type of funding method (under which experience gains and losses are spread over future periods as a part of the plan's normal cost). Examples of the immediate gain type of funding method are the unit credit method, entry age normal cost method, and the individual level premium cost method. Examples of the spread gain type of funding method are the aggregate cost method, frozen initial liability cost method, and the attained age normal cost method.

(2) **Change in actuarial assumptions.** (i) If the creation of an amortization base is required under the rules of section 412(b)(2)(B)(v) or (3)(B)(iii)

(as applied to the funding method used by the plan), a 10-year amortization base must be established at the time of a change in actuarial assumptions used to value plan liabilities. The amount of the base is the difference between the accrued liability calculated on the basis of the new assumptions and the accrued liability calculated on the basis of the old assumptions. Both computations of accrued liability are made as of the date of the change in assumptions.

(ii) A plan using a funding method of the spread gain type does not directly determine an accrued liability. If a plan using such a method is required under section 412(b)(2)(B)(v) or (3)(B)(iii) to create an amortization base, it must establish a base as described in paragraph (g)(2)(i) of this section for a change in actuarial assumptions by determining an accrued liability on the basis of another funding method (of the immediate gain type) that does determine an accrued liability. (The aggregate method is an example of a funding method that is not required under section 412(b)(2)(B)(v) or (3)(B)(iii) to create an amortization base.) The funding method chosen to determine the accrued liability of the plan in these cases must be the same method used to establish all other 10-year amortization bases maintained by the plan, if any. These bases must be maintained in accordance with paragraph (h) of this section.

(3) Past service or supplemental credits. A 10-year base must be established when a plan is established or amended, if the creation of an amortizable base is required under the rules of section 412(b)(2)(B)(ii) or (iii), or (b)(3)(B)(i) (as applied to the funding method used by the plan). The amount of the base is the accrued liability arising from, or the decrease in accrued liability resulting from, the establishment or amendment of the plan. The base must be maintained in accordance with paragraph (h) of this section.

(4) Change in funding method. If a change in funding method results in an increase or decrease in an unfunded liability required to be amortized under section 412, a 10-year base must be established equal to the increase or decrease in unfunded liability resulting from the change in funding method. The base must be maintained in accordance with paragraph (h) of this section.

(h) Maintenance of 10-year amortization base—(1) In general. Each time a 10-year amortization base is established, whether by a change in funding method, by plan amendment, by change in actuarial assumptions, or by experience gains and losses, the base must, except as provided in paragraph (i) of this section, be separately maintained in order to determine when the unamortized amount of the base is zero. The sum of the unamortized balances of all of the 10-year bases must equal the plan's unfunded liability with the adjustments described in paragraph (d) of this section, if applicable. When the unamortized amount of a base is zero, the deductible limit is no longer adjusted to reflect the amortization of the base.

(2) First year's base. See either paragraph (g) or paragraph (i) of this section for rules applicable with respect to the first year of a base.

(3) Succeeding year's base. For any plan year after the first year of a base, the unamortized amount of the base is equal to—

(i) The unamortized amount of the base as of the valuation date in the prior plan year, plus

(ii) Interest at the valuation rate from the valuation date in the prior plan year to the valuation date in the current plan year on the amount described in subdivision (i), minus

(iii) The contribution described in paragraph (h)(4) of this section with respect to the base for the prior plan year.

The valuation date is the date as of which plan liabilities are valued under section 412(c)(9). If such a valuation is performed less often than annually for purposes of section 412, bases must be adjusted for purposes of section 404 each year as of the date on which a section 412 valuation would be performed were it required on an annual basis. See paragraph (b)(3) of this section for the definition of valuation rate.

(4) Contribution allocation with respect to each base. A portion of the total contribution for the prior plan year is allocated to each base. Generally, this portion equals the product of—

(i) The total contribution described in paragraph (h)(6) of this section with respect to all bases, and

(ii) The ratio of the amount described in paragraph (b)(3)(i) of this section with respect to the base to the sum (using true rather than absolute values) of such amounts with respect to all remaining bases.

However, if the result of this computation with respect to a particular base exceeds the amount necessary to amortize such base fully, the smaller amount shall be deemed the contribution made with respect to such base. The unallocated excess with respect to a now fully amortized base shall be

allocated among the other bases as indicated above.

(5) Other allocation methods. The Commissioner may authorize the use of methods other than the method described in paragraph (h)(4) of this section for allocating contributions to bases.

(6) Total contribution for all bases. The contribution with respect to all bases for the prior plan year (see paragraph (h)(3)(iii) of this section) is the difference between—

(i) The sum of (A) the total deduction (including a carryover deduction) for the prior year, (B) interest on the actual contributions for the prior year (whether or not deductible) at the valuation rate for the period between the dates as of which the contributions are credited under section 412 and the valuation date in the current plan year, and (C) interest on the carryover described in section 404(a)(1)(D) that is available at the beginning of the prior taxable year at the valuation rate for the period between the current and prior valuation dates, and

(ii) The normal cost for the prior plan year and interest on it at the valuation rate from the date as of which the normal cost is calculated to the current valuation date.

(7) Effect of failure to contribute normal cost plus interest on unamortized amounts. The failure to make a contribution at least equal to the sum of the normal cost plus interest on the unamortized amounts has the following effects under the preceding rules of this section—

(i) It does not create a new base.

(ii) It results in an increase in the unamortized amount of each base and consequently extends the time before the base is fully amortized.

(iii) The limit adjustment for any base is not increased (in absolute terms) even if the unamortized amount computed under paragraph (h) of this section exceeds the initial 10-year amortization base. Thus, if the total unamortized amount of the plan's bases at the beginning of the plan year is $100,000 (which is also the unfunded liability of the plan), and a required $50,000 normal cost contribution is not made for the plan year, the following effects occur. The total unamortized balance of the plan's bases increases by the $50,000 normal cost for the year (adjusted for interest), plus interest on the $100,000 balance of the bases; and, because of that increase, it will take a longer period to amortize the remaining balance of the bases. (The annual amortization amount does not change.)

(8) Required adjustment to a 10-year base limit adjustment if valuation rate changed. If there is a change in the valuation rate, the limit adjustment for all unamortized 10-year amortization bases must be changed, in addition to establishing a new base as provided in paragraph (g)(2) of this section. The new limit adjustment for any base is the level amount necessary to amortize the unamortized amount of the base over the remaining amortization period using the new valuation rate. The remaining amortization period of the base is the number of years at the end of which the unamortized amount of the base would be zero if the contribution made with respect to that base equaled the limit adjustment each year. This calculation of the remaining period is made on the basis of the valuation rate used before the change. Both the remaining amortization period and the revised limit adjustment may be determined through the use of standard annuity tables. The remaining period may be computed in terms of fractional years, or it may be rounded off to a full year. The unamortized amount of the base as of the valuation date and the remaining amortization period of that base shall not be changed by any change in the valuation rate.

(i) **Combining bases—(1) General method.** For purposes of section 404 only, and not for purposes of section 412, different 10-year amortization bases may be combined into a single 10-year amortization base if such single base satisfies all of the requirements of paragraph (i)(2), (3), and (4) of this section at the time of the combining of the different bases.

(2) Unamortized amount. The unamortized amount of the single base equals the sum, as of the date the combination is made, of the unamortized amount of the bases being combined (treating negative bases as having negative unamortized amounts).

(3) Remaining amortization period. The remaining amortization period of the single base is equal to (i) the sum of the separate products of (A) the unamortized amount of each of these bases (using absolute values) and (B) its remaining amortization period, divided by (ii) the sum of the unamortized amounts of each of the bases (using absolute values). For purposes of this paragraph (i)(3), the remaining amortization period of each base being combined is that number of years at the end of which the unamortized amount of the base would be zero if the contribution made with re-

spect to that base equaled the limit adjustment of that base in each year. This number may be determined through the use of standard annuity tables. The remaining amortization period described in this paragraph may be computed in terms of fractional years, or it may be rounded off to a whole year.

(4) Limit adjustment. The limit adjustment for the single base is the level amount necessary to amortize the unamortized amount of the combined base over the remaining amortization period described in paragraph (i)(3) of this section, using the valuation rate. This amount may be determined through the use of standard annuity tables.

(5) Fresh start alternative. In lieu of combining different 10-year amortization bases, a plan may replace all existing bases with one new 10-year amortization base equal to the unfunded liability of the plan as of the time the new base is being established. This unfunded liability must be determined in accordance with the general rules of paragraphs (d) and (f) of this section. The unamortized amount of the base and the limit adjustment for the base will be determined as though the base were newly established.

(j) Initial 10-year amortization base for existing plan—(1) In general. In the case of a plan in existence before the effective date of section 404(a), the 10-year amortization base on the effective date of section 404(a) is the sum of all 10 percent bases existing immediately before section 404(a) became effective for the plan, determined under the rules of old section 404(a).

(2) Limit adjustment. The limit adjustment for the initial base is the lesser of the unamortized amount of such base or the sum of the amounts determined under paragraph (b)(3) of this section using the original balances of the remaining bases (under old section 404(a) rules) as the amount to be amortized.

(3) Unamortized amount. The employer may choose either to establish a single initial base reflecting both all prior 10-percent bases and the experience gain or loss for the immediately preceding actuarial period, or to establish a separate base for the prior 10-percent bases and another for the experience gain or loss for the immediately preceding period. If the initial 10-year amortization base reflects the net experience gain or loss from the immediately preceding actuarial period, the unamortized amount of the initial base shall equal the total unfunded liability on the effective date of section 404(a) determined in accordance with the general rules of paragraphs (d) and (f) of this section. If, however, a separate base will be used to reflect that gain or loss, the unamortized amount of the initial base shall equal such unfunded liability on the effective date of section 404(a), reduced by the net experience loss or increase by the net experience gain for the immediately preceding actuarial period. In this case, a separate 10-year amortization base must be established on the effective date equal to the net experience gain or loss. Thus, if the effective date unfunded liability is $100,000 and an experience loss of $15,000 is recognized on that date, and if the loss is to be treated as a separate base, the unamortized balances of the two bases would be $85,000 and $15,000. If the unfunded liability were the same $100,000, but a gain of $15,000 instead of a loss were recognized on that date, the unamortized balances of the two bases would be $115,000 and a credit base of $15,000. In both cases, if only one 10-year base is to be established on the effective date, its unamortized balance would be $100,000 (the unfunded liability of the plan). See paragraphs (d) and (f) for rules for determining the unfunded liability of the plan.

(k) Effect of full funding limit on 10-year amortization bases. The amount deductible under section 404(a)(1)(A)(i), (ii), or (iii) for a plan year may not exceed the full funding limitation for that year. See section 412 and paragraphs (d), (e), and (f) of this section for rules to be used in the computation of the full funding limitation. If the total deductible contribution (including carryover) for a plan year equals or exceeds the full funding limitation for the year, all 10-year amortization bases maintained by the plan will be considered fully amortized, and the deductible limit for subsequent plan years will not be adjusted to reflect the amortization of these bases.

(*l*) Transitional rules—(1) Plan years beginning before April 22, 1981. In determining the deductible limit for plan years beginning before April 22, 1981, a contribution will be deductible under section 404(a)(1)(A) if the computation of the deductible limit is based on an interpretation of section 404(a)(1)(A) that is reasonable when considered with prior published positions of the Internal Revenue Service. A computation of the deductible limit may satisfy the preceding sentence even if it does not satisfy the rules contained in paragraphs (c) through (i) of this section.

(2) Transitional approaches. The deductible limit determined for the first plan year with respect to which a plan applies the rules contained in

paragraphs (c) through (i) of this section must be computed using one of the following approaches—

(i) The plan (whether or not in existence before the effective date of section 404(a)) may apply the rules of paragraph (j) for establishing the initial base for an existing plan, treating 10-year bases (if any) as 10 percent bases in adding bases.

(ii) The plan may apply the fresh start alternative for combining bases under paragraph (i)(5).

(iii) The plan may retroactively establish 10-year amortization bases for years with respect to which section 404(a)(1)(A) and the rules of this section would have applied but for the transition rule contained in paragraph (*l*)(1) of this section. Contributions actually deducted are used in retroactively establishing and maintaining these bases under paragraph (h). However, a deduction already taken shall not be recomputed because of the retroactive establishment of a base.

(m) Effective date of section 404(a). In the case of a plan which was in existence on January 1, 1974, section 404(a) generally applies for contributions on account of taxable years of an employer ending with or within plan years beginning after December 31, 1974. In the case of a plan not in existence on January 1, 1974, section 404(a) generally applies for contributions on account of taxable years of an employer ending with or within plan years beginning after September 4, 1974. See § 1.410(a)–2(c) for rules concerning the time of plan existence. See also § 1.410(a)–2(d), which provides that a plan in existence on January 1, 1974, may elect to have certain provisions, including the amendments to section 404(a) contained in section 1013 of the Employee Retirement Income Security Act of 1974, apply to a plan year beginning after September 2, 1974, and before the otherwise applicable effective date contained in that section.

[T.D. 7760, 46 FR 6914, Jan. 22, 1981; 45 FR 15685, March 9, 1981]

§ 1.404(b)–1 Method of contribution, etc., having the effect of a plan; effect of section 404(b).

Section 404(a) is not confined to formal stock bonus, pension, profit-sharing, and annuity plans, or deferred compensation plans, but it includes any method of contributions or compensation having the effect of a stock bonus, pension, profit-sharing, or annuity plan, or similar plan deferring the receipt of compensation. Thus, where a corporation pays pensions to a retired employee or employees or to their beneficiaries in such amounts as may be determined from time to time by the board of directors or responsible officers of the company, or where a corporation is under an obligation, whether funded or unfunded, to pay a pension or other deferred compensation to an employee or his beneficiaries, there is a method having the effect of a plan deferring the receipt of compensation for which deductions are governed by section 404(a). If an employer on the accrual basis defers paying any compensation to an employee until a later year or years under an arrangement having the effect of a stock bonus, pension, profit-sharing, or annuity plan, or similar plan deferring the receipt of compensation, he shall not be allowed a deduction until the year in which the compensation is paid. This provision is not intended to cover the case where an employer on the accrual basis defers payment of compensation after the year of accrual merely because of inability to pay such compensation in the year of accrual, as, for example, where the funds of the company are not sufficient to enable payment of the compensation without jeopardizing the solvency of the company, or where the liability accrues in the earlier year, but the amount payable cannot be exactly determined until the later year.

[T.D. 6500, 25 FR 11690, Nov. 26, 1960]

§ 1.404(b)–1T Method or arrangement of contributions, etc., deferring the receipt of compensation or providing for deferred benefits (temporary).

Q–1: As amended by the Tax Reform Act of 1984, what does section 404(b) of the Internal Revenue Code provide?

A–1: As amended, section 404(b) clarifies that any plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits (other than compensation) is to be treated as a plan deferring the receipt of compensation for purposes of section 404(a) and (d). Accordingly, section 404(a) and (d) (in the case of employees and nonemployees; respectively) shall govern the deduction of contributions paid or compensation paid or incurred with respect to such a plan, or method or arrangement. Section 404(a) and (d) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. Thus, for example, under section 404(a)(5) and (b), if otherwise deductible under section 162 or 212, a contribution paid or incurred with respect to a nonqualified plan, or method or arrangement, providing for deferred benefits is deductible in the taxable year

of the employer in which or with which ends the taxable year of the employee in which the amount attributable to the contribution is includible in the gross income of the employee (without regard to any applicable exclusion under Chapter 1, Subtitle A, of the Internal Revenue Code). Section 404(a) and (d) applies to all compensation and benefit plans, or methods or arrangements, however denominated, which defer the receipt of any amount of compensation or benefit, including fees or other payments. Thus, a limited partnership (using the accrual method of accounting) may not accrue deductions for a fee owed to an unrelated person (using the cash method of accounting) who performs services for the partnership until the partnership taxable year in which or with which ends the taxable year of the service provider in which the fee is included in income. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a "welfare benefit fund" (as defined in section 419(e)) after July 18, 1984, in taxable years of employers (and payors) ending after that date. Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected the application of such section. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, § 1.419-1T and § 1.419A-2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see § 10.2 of this chapter and § 1.463-1T.

Q–2: When does a plan, or method or arrangement, defer the receipt of compensation or benefits for purposes of section 404(a), (b), and (d)?

A–2: (a) For purposes of section 404(a), (b), and (d), a plan, or method or arrangement, defers the receipt of compensation or benefits to the extent it is one under which an employee receives compensation or benefits more than a brief period of time after the end of the employer's taxable year in which the services creating the right to such compensation or benefits are performed. The determination of whether a plan, or method or arrangement, defers the receipts of compensation or benefits is made separately with respect to each employee and each amount of compensation or benefit. Compensation or benefits received by an employee's spouse or dependent or any other person, but taxable to the employee, are treated as received by the employee for purposes of section 404. An employee is determined to receive compensation or benefits within or beyond a brief period of time after the end of the employer's taxable year under the rules provided in this Q&A. For the treatment of expenses with respect to transactions between related taxpayers, see section 267.

(b)(1) A plan, or method or arrangement, shall be presumed to be one deferring the receipt of compensation for more than a brief period of time after the end of an employer's taxable year to the extent that compensation is received after the 15th day of the 3rd calendar month after the end of the employer's taxable year in which the related services are rendered ("the 2½ month period"). Thus, for example, salary under an employment contract or a bonus under a year-end bonus declaration is presumed to be paid under a plan, or method or arrangement, deferring the receipt of compensation, to the extent that the salary or bonus is received beyond the applicable 2½ month period. Further, salary or a year-end bonus received beyond the applicable 2½ month period by one employee shall be presumed to constitute payment under a plan, or method or arrangement, deferring the receipt of compensation for such employee even though salary or bonus payments to all other employees are not similarly treated because they are received within the 2½ month period. Benefits are "deferred benefits" if, assuming the benefits were cash compensation, such benefits would be considered deferred compensation. Thus, a plan, or method or arrangement, shall be presumed to be one providing for deferred benefits to the extent benefits for services are received by an employee after the 2½ month period following the end of the employer's taxable year in which the related services are rendered.

(2) The taxpayer may rebut the presumption established under the previous subparagraph with respect to an amount of compensation or benefits only by setting forth facts and circumstances the preponderance of which demonstrates that it was impracticable, either administratively or economically, to avoid the deferral of the receipt by an employee of the amount of compensation or benefits beyond the applicable 2½ month period and that, as of the end of the employer's taxable year such impracticability was unforeseeable. For example, the presumption may be rebutted with respect to an amount of compensation to the extent that receipt of such amount is deferred beyond the applicable 2½ month period (i) either because the funds of the employer were not sufficient to make the payment within the 2½ month period without jeopardizing the solvency of the employer or because it was not reasonably possible to determine within the 2½ month period whether payment of such amount was to be made, and (ii) the circumstance causing the deferral described in

(i) was unforeseeable as of the close of the employer's taxable year. Thus, the presumption with respect to the receipt of an amount of compensation or benefit is not rebutted to the extent it was foreseeable, as of the end of the employer's taxable year, that the amount would be received after the applicable 2½ month period. For example, if, as of the end of the employer's taxable year, it is foreseeable that calculation of a year-end bonus to be paid to an employee under a given formula will not be completed and thus the bonus will not be received (and is in fact not received) by the end of the applicable 2½ month period, the presumption that the bonus is deferred compensation is not rebutted.

(c) A plan, or method or arrangement, shall not be considered as deferring the receipt of compensation or benefits for more than a brief period of time after the end of the employer's taxable year to the extent that compensation or benefits are received by the employee on or before the end of the applicable 2½ month period. Thus, for example, salary under an employment contract or a bonus under a year-end bonus declaration is not considered paid under a plan, or method or arrangement, deferring the receipt of compensation to the extent that such salary or bonus is received by the employee on or before the end of the applicable 2½ month period.

(d) Solely for purposes of applying the rules of paragraphs (b) and (c) of this Q&A, in the case of an employer's taxable year ending on or after July 18, 1984, and on or before March 21, 1986, compensation or benefits that relate to services rendered in such taxable year shall be deemed to have been received within the applicable 2½ month period if such receipt actually occurs after such 2½ month period but on or before March 21, 1986.

Q–3: When does section 404(b), as amended by the Tax Reform Act of 1984, become effective?

A–3: With the exceptions discussed below, section 404(b), as amended, and the rules under Q&A-2 are effective with respect to amounts paid or incurred after July 18, 1984, in taxable years of employers (and payors) ending after that date. In the case of an extended vacation pay plan maintained pursuant to a collective bargaining agreement (a) between employee representatives and one or more employers, and (b) in effect on June 22, 1984, section 404(b) is not effective before the date on which such collective bargaining agreement terminates (determined without regard to any extension thereof agreed to after June 22, 1984). For purposes of the preceding sentence, any plan amendment made pursuant to a collective bargaining agreement relating to the plan which amends the plan solely to conform to any requirement added under section 512 of the Tax Reform Act of 1984 shall not be treated as a termination of such collective bargaining agreement. For purposes of this section, an "extended vacation pay plan" is one under which covered employees gradually over a specified period of years earn the right to additional vacation benefits, no part of which, under the terms of the plan, can be taken until the end of the specified period.

[T.D. 8073, 51 FR 4321, Feb. 4, 1986; 51 FR 7262, March 3, 1986; T.D. 8073, 51 FR 11303, April 2, 1986]

§ 1.404(c)–1 Certain negotiated plans; effect of section 404(c).

(a) Section 404(a) does not apply to deductions for contributions paid by an employer under a negotiated plan which meets the following conditions:

(1) The contributions under the plan are held in trust for the purpose of paying, either from principal or income or both, for the benefit of employees and their families, at least medical or hospital care, and pensions on retirement or death of employees; and

(2) Such plan was established before January 1, 1954, as a result of an agreement between employee representatives and the Government of the United States during a period of Government operation, under seizure powers, of a major part of the productive facilities of the industry in which such employer is engaged.

If these conditions are met, such contributions shall be deductible under section 162, to the extent that they constitute ordinary and necessary business expenses.

(b) The term "as a result of an agreement" is intended primarily to cover a trust established under the terms of an agreement referred to in paragraph (a)(2) of this section. It will also include a trust established under a plan of an employer, or group of employers, who are in competition with the employers whose facilities were seized by reason of producing the same commodity, and who would therefore be expected to establish such a trust as a reasonable measure to maintain a sound position in the labor market producing the commodity. Thus, for example, if a trust was established under such an agreement in the bituminous coal industry, a similar trust established about the same time in the anthracite coal industry would be covered by this provision.

(c) If any such trust becomes qualified for exemption under section 501(a), the deductibility of

contributions by an employer to such trust on or after the date of such qualification would no longer be governed by section 404(c), even though the trust may later lose its exemption under section 501(a).

[T.D. 6500, 25 FR 11690, Nov. 26, 1960]

§ 1.404(d)–1T Questions and answers relating to deductibility of deferred compensation and deferred benefits for independent contractors (temporary).

Q–1: How does the amendment of section 404(b) by the Tax Reform Act of 1984 affect the deduction of contributions or compensation under section 404(d)?

A–1: As amended by the Tax Reform Act of 1984, section 404(b) clarifies that section 404(d) shall govern the deduction of contributions paid and compensation paid or incurred by a payor under a plan, or method or arrangement, deferring the receipt of compensation or providing for deferred benefits for service providers with respect to which there is no employer-employee relationship. In such a case, section 404(a) and (b) and the regulations thereunder apply as if the person providing the services were the employee and the person to whom the services are provided were the employer. Section 404(a) requires that such a contribution or compensation be paid or incurred for purposes of section 162 or 212 and satisfy the requirements for deductibility under either of those sections. However, notwithstanding the above, section 404 does not apply to contributions paid or accrued with respect to a "welfare benefit fund" (as defined in section 419(e)) after June 18, 1984, in taxable years of employers (and payors) ending after that date. Also, section 463 shall govern the deduction of vacation pay by a taxpayer that has elected under such section. For rules relating to the deduction of contributions paid or accrued with respect to a welfare benefit fund, see section 419, § 1.419-1T and § 1.419A-2T. For rules relating to the deduction of vacation pay for which an election is made under section 463, see § 10.2 of this chapter and § 1.463-1T.

[T.D. 8073, 51 FR 4322, Feb. 4, 1986]

§ 1.404(e)–1 Contributions on behalf of a self-employed individual to or under a pension, annuity, or profit-sharing plan meeting the requirements of section 401; application of section 404(a)(8), (9), and (10) and section 404(e) and (f).

(a) In general. **(1)** The Self-Employed Individuals Tax Retirement Act of 1962 (76 Stat. 809) permits certain self-employed individuals to be treated as employees for purposes of pension, annuity, and profit-sharing plans included in paragraph (1), (2), or (3) of section 404(a). Therefore, for taxable years of an employer beginning after December 31, 1962, employer contributions to qualified plans on behalf of self-employed individuals are deductible under section 404 subject to the limitations of paragraphs (b) and (c) of this section.

(2) In the case of contributions to qualified plans on behalf of self-employed individuals, the amount deductible differs from the amount allowed as a deduction. In general, the amount deductible is 10 percent of the earned income derived by the self-employed individual from the trade or business with respect to which the plan is established, or $2,500, whichever is the lesser. This is the amount referred to in section 401 when reference is made to the amounts which may be deducted under section 404 or the amount of contributions deductible under section 404. Thus, this is the amount taken into consideration in determining whether contributions under the plan are discriminatory. The amount allowed as a deduction with respect to contributions on behalf of a self-employed individual is one-half of the amount deductible. The amount allowed as a deduction is relevant only for purposes of determining the amount an employer may deduct from gross income.

(b) Determination of the amount deductible. **(1)** If a plan covers employees, some of whom are self-employed individuals, the determination of the amount deductible is made on the basis of independent consideration of the common-law employees and of the self-employed individuals. See subparagraphs (2) and (3) of this paragraph. For purposes of determining the amount deductible with respect to contributions on behalf of a self-employed individual, such contributions shall be considered to satisfy the conditions of section 162 (relating to trade or business expenses) or 212 (relating to expenses for the production of income), but only to the extent that such contributions do not exceed the earned income of such individual derived from the trade or business with respect to which the plan is established. However, the portion of such contribution, if any, attributable to the purchase of life, accident, health, or other insurance protection shall be considered payment of a personal expense which does not satisfy the requirements of section 162 or 212. See para-

graph (f) of this section. For the additional rules applicable where contributions are made by more than one employer on behalf of a self-employed individual, see paragraph (d) of this section.

(2) If contributions are made to a plan included in section 404(a)(1), (2), or (3) on behalf of employees, some of whom are self-employed individuals, the amount deductible with respect to contributions on behalf of the common-law employees covered under the plan shall be determined as if such employees were the only employees for whom contributions and benefits are provided under the plan. Accordingly, for purposes of such determination, the percentage of compensation limitations of section 404(a)(1), (3), and (7) are applicable only with respect to the compensation otherwise paid or accrued during the taxable year by the employer to the common-law employees. Similarly, the costs referred to in section 404(a)(1)(B) and (C) shall be the costs of funding the benefits of the common-law employees. Also, the provisions of section 404(a)(1)(D), (3), and (7), relating to certain carryover deductions, shall be applicable only to amounts contributed, or to the amounts deductible, on behalf of such employees.

(3) If contributions are made to a plan included in section 404(a)(1), (2), or (3) on behalf of individuals some or all of whom are self-employed individuals, the amount deductible in any taxable year with respect to contributions on behalf of such individuals shall be determined as follows:

(i) The provisions of section 404(a)(1), (2), (3), and (7) shall be applied as if such individuals were the only participants for whom contributions and benefits are provided under the plan. Thus, the costs referred to in such provisions shall be the costs of funding the benefits of the self-employed individuals. If such costs are less than an amount equal to the amount determined under subdivision (iii) of this subparagraph, the maximum amount deductible with respect to such individuals shall be the costs of their benefits.

(ii) The provisions of section 404(a)(1)(D), the second and third sentences of section 404(a)(3)(A), and the second sentence of section 404(a)(7), relating to certain carryover deductions, are not applicable to contributions on behalf of self-employed individuals. Contributions on behalf of self-employed individuals are deductible, if at all, only in the taxable year in which the contribution is paid or deemed paid under section 404(a)(6).

(iii) The amount deductible for the taxable year of the employer with respect to contributions on behalf of a self-employed individual shall not exceed the lesser of $2,500 or 10 percent of the earned income derived by such individual for such taxable year from the trade or business with respect to which the plan is established.

(iv) If a self-employed individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers, the aggregate amounts deductible shall not exceed the lesser of $2,500 or 10 percent of such earned income. See paragraph (d) of this section.

(c) Special limitation on the amount allowed as a deduction for self-employed individuals. The amount allowed as a deduction under section 404(a)(1), (2), (3), and (7) in any taxable year with respect to contributions made on behalf of a self-employed individual shall be an amount equal to one-half of the amount deductible with respect to such contributions under paragraph (b)(3) of this section. However, for purposes of section 401, the amount which may be deducted, or the amount deductible, under section 404 with respect to contributions made on behalf of self-employed individuals shall be determined without regard to the special limitation of this paragraph.

(d) Rules applicable where contributions are made by more than one employer on behalf of a self-employed individual. (1) Under paragraph (b)(3)(iv) of this section, if a self-employed individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers, the aggregate amounts deductible shall not exceed the lesser of $2,500 or 10 percent of such earned income. This limitation does not apply to contributions made under a plan on behalf of an employee who is not self-employed in the trade or business with respect to which the plan is established, even though such employee may be covered as a self-employed individual under a plan or plans established by other trades or businesses.

(2) In any case in which the application of subparagraph (1) of this paragraph reduces the amount otherwise deductible, the amount deductible by each employer shall be that amount which bears the same ratio to the aggregate amount deductible with respect to all trades or businesses (as determined in subparagraph (1) of this paragraph) as the earned income derived from that employer bears to the aggregate of the earned income derived from all of the trades or businesses with respect to which plans are established. The amount allowed as a deduction to each employer is one-half of the amount determined (in accordance

with the preceding sentence) to be deductible by such employer.

(e) **Partner's distributive share of contributions and deductions.** For purposes of sections 702(a)(8) and 704, a partner's distributive share of contributions on behalf of self-employed individuals under a qualified pension, annuity, or profit-sharing plan is the contribution made on his behalf, and his distributive share of deductions allowed the partnership under section 404 for contributions on behalf of self-employed individuals is that portion of the deduction which is attributable to contributions made on his behalf under the plan. The contribution on behalf of a partner and the deduction with respect thereto must be accounted for separately by such partner, for his taxable year with or within which the partnership's taxable year ends, as an item described in section 702(a)(8).

(f) **Contributions allocable to insurance protection.** For purposes of determining the amount deductible with respect to contributions on behalf of a self-employed individual, amounts allocable to the purchase of life, accident, health, or other insurance protection shall not be taken into account. Such amounts are neither deductible nor considered as contributions for purposes of determining the maximum amount of contributions that may be made on behalf of an owner-employee. The amount of a contribution allocable to insurance shall be an amount equal to a reasonable net premium cost, as determined by the Commissioner, for such amount of insurance for the appropriate period. See paragraph (b)(5) of § 1.72–16.

(g) **Rules applicable to loans.** For purposes of section 404, any amount paid, directly or indirectly, by an owner-employee in repayment of any loan which under section 72(m)(4)(B) was treated as an amount received from a qualified trust or plan shall be treated as a contribution to such trust or under such plan on behalf of such owner-employee.

(h) **Definitions.** For purposes of section 404 and the regulations thereunder—

(1) The term "employee" includes an employee as defined in section 401(c)(1) and paragraph (b) of § 1.401–10, and the term "employer" means the person treated as the employer of such individual under section 401(c)(4);

(2) The term "owner-employee" means an owner-employee as defined in section 401(c)(3) and paragraph (d) of § 1.401–10;

(3) The term "earned income" means earned income as defined in section 401(c)(2) and paragraph (c) of § 1.401–10; and

(4) The term "compensation" when used with respect to an individual who is an employee described in subparagraph (1) of this paragraph shall be considered to be a reference to the earned income of such individual derived from the trade or business with respect to which the plan is established.

(i) **Years to which this section applies.** This section applies to taxable years of employers beginning before January 1, 1974. For taxable years beginning after December 31, 1973, see § 1.404(e)–1A.

[T.D. 6673, 28 FR 10145, Sept. 17, 1963; as amended by T.D. 7636, 44 FR 47056, Aug. 10, 1979]

§ 1.404(e)–1A Contributions on behalf of a self-employed individual to or under a qualified pension, annuity, or profit-sharing plan.

(a) **In general.** This section provides rules relating to employer contributions to qualified plans on behalf of self-employed individuals described in subsections (a)(8) and (9), (e), and (f) of section 404. Unless otherwise specifically provided, this section applies to taxable years of an employer beginning after December 31, 1973. See section 1.404(e)–1 for rules relating to plans for self-employed individuals for taxable years beginning before January 1, 1974. Paragraph (b) of this section provides general rules of deductibility, paragraph (c) provides rules relating to defined contribution plans, paragraph (d) provides rules relating to defined benefit plans, paragraph (e) provides rules relating to combinations of plans, paragraph (f) provides rules for partnerships, paragraph (g) provides rules for insurance, paragraph (h) provides rules for loans, and paragraph (i) provides definitions.

(b) **Determination of the amount deductible.** (1) If a defined contribution plan covers employees, some of whom are self-employed individuals, the determination of the amount deductible is made on the basis of independent consideration of the common-law employees and of the self-employed individuals. See subparagraphs (2) and (3) of this paragraph. For purposes of determining the amount deductible with respect to contributions on behalf of a self-employed individual, such contributions shall be considered to satisfy the conditions of section 162 (relating to trade or business expenses) or 212 (relating to expenses for

the production of income), but only to the extent that such contributions do not exceed the earned income of such individual derived from the trade or business with respect to which the plan is established. However, the portion of such contribution, if any, attributable to the purchase of life, accident, health, or other insurance protection shall be considered payment of a personal expense which does not satisfy the requirements of section 162 or 212. See paragraph (g) of this section.

(2)(i) If contributions are made on behalf of employees, some of whom are self-employed individuals, to a defined contribution plan described in section 414(i) and included in section 404(a)(1), (2), or (3), the amount deductible with respect to contributions on behalf of the common-law employees covered under the plan shall be determined as if such employees were the only employees for whom contributions and benefits are provided under the plan. Accordingly, for purposes of such determination, the percentage of compensation limitations of section 404(a)(3) and (7) are applicable only with respect to the compensation otherwise paid or accrued during the taxable year by the employer with respect to the common-law employees. Similarly, the costs referred to in section 404(a)(1)(A) and (B) shall be the costs of funding the benefits of the common-law employees. Also, the provisions of section 404(a)(1)(D), (3), and (7), relating to certain carryover deductions, shall be applicable only to amounts contributed or to the amounts deductible on behalf of such employees.

(ii) The amount deductible, by reason of contributions on behalf of employees to a defined benefit plan, shall be determined without regard to the self-employed or common law status of each employee.

(3)(i) If contributions are made on behalf of individuals, some or all of whom are self-employed individuals, to a defined contribution plan described in section 414(i) and included in section 404(a)(1), (2), or (3), the amount deductible in any taxable year with respect to contributions on behalf of such individuals shall be determined as follows:

(A) The provisions of section 404(a)(1), (2), (3), and (7) shall be applied as if such individuals were the only participants for whom contributions and benefits are provided under the plan. Thus, the costs referred to in such provisions shall be the costs of funding the benefits of the self-employed individuals. If such costs are less than an amount equal to the amount determined under paragraph (c) of this section, the maximum amount deductible with respect to such individuals shall be the cost of their benefits.

(B) The provisions of section 404(a)(1), (D), the third sentence of section 404(a)(3), (A), and the second sentence of section 404(a)(7), relating to certain carryover deductions are applicable to contributions on behalf of self-employed individuals made in taxable years of an employer beginning after December 31, 1975.

(C) For any employer taxable year in applying the 15 percent limit on deductible contributions set forth in section 404(a)(3) and the 25 percent limit in section 404(a)(7) for any taxable year of the employer, the amount deductible under section 404(e)(4) and paragraph (c)(4) of this section (relating to the minimum deduction of $750 or 100 percent of earned income) shall be substituted for such limits with respect to the self-employed individuals on whose behalf contributions are deductible under section 404(e)(4) for the taxable year of the employer. In addition, although the limitations of section 415 are applicable to the plan for plan years beginning after December 31, 1975, the defined contribution compensation limitation described in section 415(c)(1)(B) shall not be less than the amount deductible under section 404(e)(4) and paragraph (c)(4) of this section with respect to any self-employed individual for the taxable year of the employer ending with or within the limitation year. The special rule in the second sentence of paragraph (3)(A) of section 404(a) is not applicable in determining the amounts deductible on behalf of self-employed individuals.

(ii) The limitations of this subparagraph are not applicable to a defined benefit plan for self-employed individuals.

(c) Defined contribution plans. **(1)** Under section 404(e)(1) in the case of a defined contribution plan, as defined in section 414(i), the amount deductible for the taxable year of the employer with respect to contributions on behalf of a self-employed individual shall not exceed the lesser of $7,500 or 15 percent of the earned income derived by such individual for such taxable year from the trade or business with respect to which the plan is established.

(2) Under section 404(e)(2)(A) if a self-employed individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers under two or more defined contribution plans the aggregate amounts deductible shall not exceed the lesser of $7,500 or 15 percent of such earned income. This

limitation does not apply to contributions made under a plan on behalf of an employee who is not self-employed in the trade or business with respect to which the plan is established.

(3) Under section 404(e)(2)(B) in any case in which the applicable limitation of subparagraph (2) of this paragraph reduces the amount otherwise deductible with respect to contributions on behalf of any employee within the meaning of section 401(c)(1), the amount deductible by each employer for such employee shall be that amount which bears the same ratio to the aggregate amount deductible for such employee with respect to all trades or businesses (as determined in subparagraph (1) of this paragraph) as his earned income derived from the employer bears to the aggregate of his earned income derived from all of the trades or businesses with respect to which plans are established.

Under section 404(e)(4), notwithstanding the provisions of subparagraphs (1) and (2) of this paragraph, the limitations on the amount deductible for the taxable year of the employer with respect to contributions on behalf of a self-employed individual shall not be less than the lesser of $750 or 100 percent of the earned income derived by such individual for such taxable year from the trade or business with respect to which the plan is established. If such individual receives in any taxable year earned income with respect to which deductions are allowable to two or more employers, 100 percent of such earned income shall be taken into account for purposes of the limitations determined under this subparagraph. This subparagraph does not apply to any taxable year beginning after December 31, 1975, to any employee whose adjusted gross income for that taxable year is greater than $15,000. In applying the preceding sentence, the adjusted gross income of an employee for a taxable year is determined separately for each individual, without regard to any community property laws, and without regard to the deduction allowable under section 404(a).

(d) Defined benefit plans. In the case of a defined benefit plan, as defined in section 401(j), the special limitations provided by section 404(e) and paragraph (c) of this section do not apply. See section 401(j) for requirements applicable to defined benefit plans.

(e) Combination of plans. For special rules applied if a self-employed individual in any taxable year is a participant in both a defined benefit plan and a defined contribution plan, see section 401(j) and the regulations thereunder.

(f) Partner's distributive share of contributions and deductions. (1) For purposes of sections 702(a)(8) and 704 in the case of a defined contribution plan, a partner's distributive share of contributions on behalf of self-employed individuals under such a plan is the contribution made on his behalf, and his distributive share of deductions allowed the partnership under section 404 for contributions on behalf of a self-employed individual is that portion of the deduction which is attributable to contributions made on his behalf under the plan. The contribution on behalf of a partner and the deduction with respect thereto must be accounted for separately by such partner, for his taxable year with or within which the partnership's taxable year ends, as an item described in section 702(a)(8).

(2) In the case of a defined benefit plan, a partner's distributive share of contributions on behalf of self-employed individuals and his distributive share of deductions allowed the partnership under section 404 for such contributions is determined in the same manner as his distributive share of partnership taxable income. See section 704, relating to the determination of the distributive share and the regulations thereunder.

(g) Contributions allocable to insurance protection. Under section 404(e)(3), for purposes of determining the amount deductible with respect to contributions on behalf of a self-employed individual, amounts allocable to the purchase of life, accident, health, or other insurance protection shall not be taken into account. Such amounts are neither deductible nor considered as contributions for purposes of determining the maximum amount of contributions that may be made on behalf of an owner-employee. The amount of a contribution allocable to insurance shall be an amount equal to a reasonable net premium cost, as determined by the Commissioner, for such amount of insurance for the appropriate period. See paragraph (b)(5) of § 1.72–16.

(h) Rules applicable to loans. Under section 404(f), for purposes of section 404, any amount paid, directly or indirectly, by an owner-employee in repayment of any loan which under section 72(m)(4)(B) was treated as an amount received from a qualified trust or plan shall be treated as a contribution to such trust or under such plan on behalf of such owner-employee.

(i) Definitions. Under section 404(a)(8), for purposes of section 404 and the regulations thereunder—

(1) The term "employee" includes an employee as defined in section 401(c)(1) and the term "employer" means the person treated as the employer of such individual under section 401(c)(4);

(2) The term "owner-employee" means an owner-employee as defined in section 401(c)(3);

(3) The term "earned income" means earned income as defined in section 401(c)(2); and

(4) The term "compensation" when used with respect to an individual who is an employee described in subparagraph (1) of this paragraph shall be considered to be a reference to the earned income of such individual derived from the trade or business with respect to which the plan is established.

[T.D. 7636, 44 FR 47056, Aug. 10, 1979]

§ 1.404(g)–1 Deduction of employer liability payments.

(a) General rule. Employer liability payments shall be treated as contributions to a stock bonus, pension, profit-sharing, or annuity plan to which section 404 applies. Such payments that satisfy the limitations of this section shall be deductible under section 404 when paid without regard to any other limitations in section 404.

(b) Employer liability payments. For purposes of this section, employer liability payments mean:

(1) Any payment to the Pension Benefit Guaranty Corporation (PBGC) for termination or withdrawal liability imposed under section 4062 (without regard to section 4062(b)(2)), 4063, or 4064 of the Employee Retirement Insurance Security Act of 1974 (ERISA). Any bond or escrow payment furnished under section 4063 of ERISA shall not be considered as a payment of liability until applied against the liability of the employer.

(2) Any payment to a non-multiemployer plan pursuant to a commitment to the PBGC made in accordance with PBGC Determination of Plan Sufficiency and Termination of Sufficient Plans. See PBGC regulations, 29 CFR 2617.13(b) for rules concerning these commitments. Such payments shall not exceed an amount necessary to provide for, and used to fund, the benefits guaranteed under section 4022 of ERISA.

(3) Any payment to a multiemployer plan for withdrawal liability imposed under part 1 of subtitle E of title IV of ERISA. Any bond or escrow payment furnished under such part shall not be considered as a payment of liability until applied against the liability of the employer.

(c) Limitations, etc.—(1) Permissible expenses. A payment shall be deductible under section 404(g) and this section only if the payment satisfies the conditions of section 162 or section 212. Payments made by an entity which is liable for such payments because it is a member of a commonly controlled group of corporations, or trades or businesses, within the meaning of section 414 (b) or (c), shall not fail to satisfy such conditions merely because the entity did not directly employ participants in the plan with respect to which the liability payments were made.

(2) Qualified plan. A payment shall be deductible under section 404(g) and this section only if the payment is made in a taxable year of the employer ending within or with a taxable year of the trust for which the trust is exempt under section 501(a). For purposes of this paragraph, the payment timing rules of section 404(a)(6) shall apply.

(3) Full funding limitation. (i) If the employer liability payment is to a plan, the total amount deductible for such payment and for other plan contributions may not exceed an amount equal to the full funding limitation as defined in section 412(c)(7) for the taxable year with respect to which the contributions are deemed made under section 404.

(ii) If the total contributions to the plan for the taxable year including the employer liability payment exceed the amount equal to this full funding limitation, the employer liability payment shall be deductible first.

(iii) Any amount paid in a taxable year in excess of the amount deductible in such year under the full funding limitation shall be treated as a liability payment and be deductible in the succeeding taxable years in order of time to the extent of the difference between the employer liability payments made in each succeeding year and the maximum amount deductible for such year under the full funding limitation.

(4) Maximum deduction allowable under section 404. The amount deductible under section 404 is limited to the higher of the maximum amount deductible by the employer under section 404(a) or the amount otherwise deductible under section 404(g). If the contributions are to a plan to which more than one employer contributes, this limit shall apply to each employer separately rather than all employers in the aggregate. Thus, each employer may deduct the greater of its allocable share of the deduction determined under sections

404(a) and 413(b)(7) or 413(c)(6) or its allocable share of the amount deductible under section 404(g).

However, pursuant to the rule in subdivision (ii) of subparagraph (3), in determining each employer's allocable share under section 404(a), the total amount deductible under section 404(a) by all employers shall not exceed the difference between the full funding limitation and the total amount deductible by all employers under section 404(g).

(5) Example. The provisions of this paragraph may be illustrated by the following example:

Example. In the 1983 taxable year, Employer A makes a withdrawal liability payment of $700,000 to multiemployer Plan X to which Employer A and Employer B are required to contribute. Employer A's allocable share of the deduction allowable under sections 404(a) and 413(b)(7) in the 1983 taxable year is $600,000. Employer B's allocable share of the deduction allowable under section 404(a) and 413(b)(7) in the 1983 taxable year is $400,000.

The full funding limitation for the 1983 taxable year is $1,000,000. Based on paragraph (c)(4) of this section, Employer A may deduct $700,000, the amount of the withdrawal liability payment. However, the deduction of Employer B is limited to $300,000, the difference between the full funding limitation and the amount deductible under section 404(g).

(d) Effective date etc.—(1) General rule. This section is effective for employer payments made after September 25, 1980.

(2) Transitional rule. For employer payments made before September 26, 1980, for purposes of section 404, any amount paid by an employer under section 4062, 4063, or 4064 of the Employee Retirement Income Security Act of 1974 shall be treated as a contribution to which section 404 applies by such employer to or under a stock bonus, pension, profit-sharing, or annuity plan.

[T.D. 8085, 51 FR 16297, May 2, 1986]

§ 1.404(k)–1T Questions and answers relating to the deductibility of certain dividend distributions (temporary).

Q–1: What does section 404(k) provide?

A–1: Section 404(k) allows a corporation a deduction for dividends actually paid in accordance with section 404(k)(2) with respect to stock of such corporation held by an employee stock ownership plan (as defined in section 4975(e)(7)) maintained by the corporation (or by any other corporation that is a member of a "controlled group of corporations" within the meaning of section 409(*l*)(4) that includes the corporation), but only if such dividends may be immediately distributed under the terms of the plan and all of the applicable qualification and distribution rules. The deduction is allowed under section 404(k) for the taxable year of the corporation during which the dividends are received by the participants.

Q–2: Is the deductibility of dividends paid to plan participants under section 404(k) affected by a plan provision which permits participants to elect to receive or not receive payment of dividends?

A–2: No. Dividends actually paid in cash to plan participants in accordance with section 404(k) are deductible under section 404(k) despite such an election provision.

Q–3: Are dividends paid in cash directly to plan participants by the corporation and dividends paid to the plan and then distributed in cash to plan participants under section 404(k) treated as distributions under the plan holding stock to which the dividends relate for purposes of sections 72, 401 and 402?

A–3: Generally, yes. However, a deductible dividend under section 404(k) is treated for purposes of section 72 as paid under a contract separate from any other contract that is part of the plan. Thus, a deductible dividend is treated as a plan distribution and as paid under a separate contract providing only for payment of deductible dividends. Therefore, a deductible dividend under section 404(k) is a taxable plan distribution even though an employee has unrecovered employee contributions or basis in the plan.

[T.D. 8073, 51 FR 4322, Feb. 4, 1986]

§ 1.405–1 Qualified bond purchase plans.

(a) Introduction. Section 405 relates to the requirements for qualification of, and the tax treatment of funds contributed to, retirement plans of an employer for the benefit of his employees which are funded through the purchase of United States retirement plan bonds. Such bonds may be purchased under a qualified bond purchase plan described in section 405(a) and paragraph (b) of this section. The qualified bond purchase plan is an alternative method of providing some of the deferred compensation benefits provided by plans described in section 401. In addition, retirement bonds may be purchased under a qualified pension or profit-sharing plan described in section 401. A qualified bond purchase plan or a qualified pension or profit-sharing plan under which retirement bonds are purchased may cover only common-law employees, self-employed individuals, or both. A qualified bond purchase plan may be established after December 31, 1962, and retirement bonds may be purchased by a qualified pension or profit-sharing plan after December 31, 1962. For the

terms and conditions of the retirement bonds, see section 405(b) and Treasury Department Circular, Public Debt Series—No. 1–63.

(b) Qualified bond purchase plans. (1) A qualified bond purchase plan is a definite written program and arrangement which is communicated to the employees and established and maintained by an employer solely to purchase for and distribute to his employees or their beneficiaries retirement bonds. These bonds must be purchased in the name of the employee on whose behalf the contributions are made. The plan must be a permanent plan which meets the requirements of section 401(a)(3), (4), (5), (6), (7), (8), (16), and (19), and, if applicable, the requirements of section 401(a)(9) and (10) and of section 401(d) (other than paragraphs (1), (5)(B), (8), (16), and (19)). The rules set forth in the regulations relating to those provisions shall be applicable to qualified bond purchase plans.

(2) A qualified bond purchase plan must provide that an employee's right to the proceeds of a bond purchased in his name are nonforfeitable and will in no event inure to the benefit of the employer or be reallocated in any manner.

(c) Benefits under a qualified bond purchase plan. (1) Except as provided in subparagraph (2) of this paragraph, a qualified bond purchase plan must conform to the definition of a pension plan in paragraph (b)(1)(i) of § 1.401–1, or the definition of a profit-sharing plan in paragraph (b)(1)(ii) of § 1.401–1. For example, if the qualified bond purchase plan is a profit-sharing plan, the plan must include the definite allocation formula described in paragraph (b)(1)(ii) of § 1.401–1. In addition, if such a profit-sharing plan covers any owner-employee, the plan must also include the definite contribution formula described in section 401(d)(2)(B).

(2)(i) Under a qualified bond purchase plan, the bonds may be distributed to the employees at any time, and the plan need not prohibit the distribution or redemption of the bonds until the retirement of the employee. Accordingly, even though a qualified bond purchase plan is designed as a pension plan, it need not provide systematically for the payment of definitely determinable benefits. However, provisions for distribution must apply in a nondiscriminatory manner.

(ii) A qualified bond purchase plan which is designed as a pension plan may not contain a formula for contributions or benefits which might require the reallocation of amounts to an employee's credit or which might provide for the reversion of any amounts to the employer.

(d) Contributions under a qualified bond purchase plan. (1) The retirement bonds will be issued in the denominations of $50, $100, $500, and $1,000. Therefore, the contribution otherwise called for under the plan may not coincide with an amount that can be invested in retirement bonds. Accordingly, the plan must provide that the contributions on behalf of an individual employee for any year shall be rounded to the nearest multiple of $50.

(2) Since the employee's rights to any bonds purchased for him under a qualified bond purchase plan must be nonforfeitable, a qualified bond purchase plan must, in order to conform to the requirements of section 401(a)(4) with respect to the early termination of the plan, restrict the contributions on behalf of any employee to the amount which could be allocated to him under paragraph (c) of § 1.401–4.

(e) Definitions. For purposes of this section and §§ 1.405–2 and 1.405–3—

(1) The term "employee" includes an employee as defined in section 401(c)(1) and paragraph (b) of § 1.401–10, and the term "employer" means the person treated as the employer of such individual under section 401(c)(4);

(2) The term "owner-employee" means an owner-employee as defined in section 401(c)(3) and paragraph (d) of § 1.401–10;

(3) The term "earned income" means earned income as defined in section 401(c)(2) and paragraph (c) of § 1.401–10; and

(4) The term "retirement bond" means a United States Retirement Plan Bond, as described in section 405(b) and Treasury Department Circular, Public Debt Series—No. 1–63.

[T.D. 6675, 28 FR 10131, Sept. 17, 1963, as amended by T.D. 7748, 46 FR 1697, Jan. 7, 1981]

§ 1.405–2 Deduction of contributions to qualified bond purchase plans.

(a) In general. An employer shall be allowed a deduction for contributions paid to or under a qualified bond purchase plan in the same manner and to the same extent as if such contributions were made to a trust described in section 401(a) which is exempt from tax under section 501(a). A deduction will be allowed only for the taxable year in which the contributions are paid, or treated as paid, except as provided by section 404(a)(1), (3),

and (7). For purposes of the deduction, a contribution is paid at the time the application for the bond is made and the full purchase price paid.

(b) Rules for applying section 404. If a qualified bond purchase plan is designed as a pension plan as defined in paragraph (b)(1)(i) of § 1.401–1, the limitations of section 404 applicable to qualified pension trusts shall apply. See §§ 1.404(a)–3 through 1.404(a)–7. Similarly, if a qualified bond purchase plan is designed as a profit-sharing plan as defined in paragraph (b)(1)(ii) of § 1.401–1, the limitations of section 404 applicable to qualified profit-sharing trusts shall apply. See §§ 1.404(a)–9 and 1.404(a)–10. In addition, if a qualified bond purchase plan designed as a pension plan covers some or all of the employees who are covered by a qualified profit-sharing plan established and maintained by the same employer, or if a qualified bond purchase plan which is designed as a profit-sharing plan covers some or all the employees who are also covered by a qualified pension or annuity plan established and maintained by the same employer, section 404(a)(7) is applicable. See § 1.404(a)–(13). Furthermore, if a qualified bond purchase plan covers employees some or all of whom are employees within the meaning of section 401(c)(1), the provisions of section 404(a)(8), (9), and (10) and 404(e) shall also apply.

(c) Accrual method taxpayers. In the case of a taxpayer using the accrual method of accounting, a contribution to a qualified bond purchase plan will be deemed paid on the last day of the year of accrual if—

(1) During the taxable year of accrual the taxpayer incurs a liability to make the contribution, the amount of which is accruable under section 461 for such taxable year, and

(2) Payment is in fact made no later than the time prescribed by the law for filing the return for the taxable year of accrual (including extensions thereof).

[T.D. 6675, 28 FR 10131, Sept. 17, 1963]

§ 1.405–3 Taxation of retirement bonds.

(a) In general. (1) As in the case of employer contributions under a qualified pension, annuity, profit-sharing, or stock bonus plan, employer contributions on behalf of his common-law employees under a qualified bond purchase plan are not includible in the gross income of the employees when made, and employer contributions on behalf of self-employed individuals are deductible as provided in section 405(c) and § 1.405–2. Further, an employee or his beneficiary does not realize gross income upon the receipt of a retirement bond pursuant to a qualified bond purchase plan or from a trust described in section 401(a) which is exempt from tax under section 501(a). Upon redemption of such a bond, ordinary income will be realized to the extent the proceeds thereof exceed the basis (determined in accordance with paragraph (b) of this section) of the bond. The proceeds of a retirement bond are not entitled to the special tax treatment of section 72(n) and § 1.72–18.

(2) In the event a retirement bond is surrendered for partial redemption and reissuance of the remainder, the person surrendering the bond shall be taxable on the proceeds received to the extent such proceeds exceed the basis in the portion redeemed. In such case, the basis shall be determined (in accordance with paragraph (b) of this section) as if the portion redeemed and the portion reissued had been issued as separate bonds.

(3) In the event a retirement bond is redeemed after the death of the registered owner, the amount taxable (as determined in accordance with subparagraph (1) of this paragraph) is income in respect of a decedent under section 691.

(4) The provisions of section 402(a)(2) are not applicable to a retirement bond. In general, section 402(a)(2) provides for capital gains treatment of certain distributions from a qualified trust which constitute the total distributions payable with respect to any employee. The proceeds of a retirement bond received upon redemption will not be entitled to such capital gain treatment even though the bond is received as a part of, or as the whole of, such a total distribution. Nor will such a bond be taken into consideration in determining whether the distribution represents the total amount payable by the trust with respect to an employee. Thus, a distribution by a qualified trust may constitute a total distribution payable with respect to an employee for purposes of section 402(a)(2) even though the trust retains retirement bonds registered in the name of such employee.

(b) Basis. (1) This paragraph is applicable in determining the basis of any retirement bond distributed pursuant to a qualified bond purchase plan or distributed by a trust qualifying under section 401. In the case of such a bond purchased for an individual at the time he is a common-law employee, the basis is that portion of the purchase price attributable to employee contributions. In the case of such a bond purchased for an individu-

al at the time he is a self-employed individual, the basis shall be determined under subparagraph (3) of this paragraph.

(2) At the time a retirement bond is purchased, there shall be indicated on the application for the retirement bond whether the individual for whom the retirement bond is purchased is a common-law employee or a self-employed individual, and in the case of common-law employees the amount of the purchase price, if any, attributable to the employee's contribution. The answers to these questions will appear on the retirement bond, and when the retirement bond is purchased for a common-law employee, the basis for the retirement bond is presumed to be the amount of the purchase price which the retirement bond indicates was contributed by the employee.

(3)(i) Except as provided in subdivision (ii) of this subparagraph, for purposes of determining the basis of retirement bonds purchased for an individual while he was a self-employed individual, all such bonds redeemed during a taxable year shall be considered in the aggregate as a single retirement bond. The basis of such retirement bonds shall be the difference between the aggregate of their face amounts and the lesser of:

(a) One-half the aggregate of their face amounts, or

(b) The aggregate of the unused amounts allowed as a deduction at the end of the taxable year (as determined in subparagraph (4) of this paragraph).

(ii) The basis of a retirement bond purchased for a self-employed individual which is redeemed after his death is the amount determined by multiplying the face amount of such retirement bond by a fraction—

(a) The numerator of which is the aggregate of the face amounts of all the bonds registered in the individual's name at his death which were purchased while he was a self-employed individual reduced by the aggregate of the unused amounts allowed as a deduction at his death (as determined in subparagraph (4) of this paragraph), and

(b) The denominator of which is the aggregate of the face amounts of all such bonds.

(4)(i) In the case of retirement bonds purchased under a qualified bond purchase plan, the aggregate of the unused amounts allowed as a deduction at the end of any taxable year shall be an amount equal to the total of the amounts allowable for such taxable year, and the amounts allowed in all prior taxable years, as a deduction under section 405(c) for contributions used to purchase retirement bonds for the registered owner while he was a self-employed individual, reduced by an amount equal to the portion of the face amounts of such retirement bonds redeemed in prior taxable years which were included in the registered owner's gross income.

(ii) In the case of retirement bonds purchased by a trust described in section 401(a) and exempt under section 501(a), there shall be allocated to the retirement bond the deduction under section 404 attributable to the contributions used to purchase the retirement bond. The amount so allocated shall be treated in the same manner as the deduction allowed under section 405(c) for purposes of computing the unused amounts allowed as a deduction under subdivision (i) of this subparagraph. Further, the amount so allocated shall not be included in the investment in the contract for purposes of section 72 in determining the portion of the other assets distributed by the trust included in gross income.

(5) The application of the rule of subparagraphs (3) and (4) of this paragraph may be illustrated by the following examples:

Example (1). B, a self-employed individual, adopts a qualified bond purchase plan in 1963. During 1963 the plan purchased $2,000 worth of retirement bonds in his name. As a result of overestimating his income for 1963, only $400 was allowed B as a deduction pursuant to section 405(c). In 1964, prior to B's retirement in June of that year, the plan purchased a $500 retirement bond in B's name for which a deduction was allowable pursuant to section 405(c) in the amount of $250. B redeemed a retirement bond with a face amount of $500 in September of 1964 and another with a face amount of $500 in October of 1964. Of the proceeds received in 1964 from the redemption of the bonds, $1,000 plus interest, B shall exclude from his gross income $500 (face amount of the retirement bonds, $1,000, less $500, one-half of the face amount, the latter being less than the aggregate of the unused amounts allowed as a deduction, $250 allowable for the taxable year in which the bonds were redeemed plus $400, the unused amounts allowed in prior taxable years, or $650). The aggregate of the unused amounts allowed as a deduction shall be reduced by the amount so excluded ($650–$500=$150). During the following year, B redeems another retirement bond with a face amount of $500. Of the proceeds received from the redemption of such retirement bond, $500 plus interest, B shall exclude from his gross income $350 (face amount of the retirement bonds, $500, less $150, the aggregate of the unused amounts allowed as a deduction, the latter being less than one-half of the face amount of the bond, $250). The aggregate of the unused amounts allowed as a deduction is reduced to zero ($150–$150=0). Upon redemption of the remaining retirement bonds registered in B's name, B shall exclude from his gross income with respect to such proceeds an amount equal to the face amounts of the bonds redeemed.

Example (2). C, a self-employed individual, participated in a qualified bond purchase plan during the years 1963 through 1966. The plan purchased in his name retirement bonds in the

aggregate of $10,000. C deducted $4,000 from his gross income for the four years ($1,000 for each year) with respect to the purchase of such retirement bonds. C retired in December of 1966 and during the following year redeemed one retirement bond with a face amount of $1,000. C excluded from his gross income $500 of the proceeds of the bond. C died without redeeming any of the remaining retirement bonds registered in his name. The basis of each remaining retirement bond shall be determined by multiplying the face amount of each retirement bond by $5,500 ÷ $9,000. The numerator is the aggregate of the face amounts registered in C's name (as a self-employed individual) at his death, $9,000, reduced by the aggregate of the unused amounts allowed as a deduction at his death, $3,500 (amounts allowed as a deduction under section 405(c), $4,000, reduced by the portion of the face amount of the retirement bond redeemed by C which was included in C's gross income, $500), or $5,500. The denominator is the face amount of the retirement bonds registered in his name as a self-employed individual at his death, $9,000.

[T.D. 6675, 28 FR 10131, Sept. 17, 1963]

§ 1.406–1 Treatment of certain employees of foreign subsidiaries as employees of the domestic corporation.

(a) Scope—(1) General rule. For purposes of applying the rules in part 1 of subchapter D of chapter 1 of subtitle A of the Code and the regulations thereunder with respect to a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), of a domestic corporation, an individual who is a citizen of the United States and who is an employee of a foreign subsidiary (as defined in section 3121(*l*)(8) and the regulations thereunder) of such domestic corporation shall be treated as an employee of such domestic corporation if the requirements of paragraph (b) of this section are satisfied.

(2) Cross-references. For rules relating to nondiscrimination requirements and the determination of compensation, see paragraph (c) of this section. For rules under which termination of the status of an individual as an employee of the domestic corporation in certain instances will not be considered as separation from service for certain purposes, see paragraph (d) of this section. For rules regarding deductibility of contribution, see paragraph (e) of this section. For rules regarding treatment of such individual as an employee of the domestic corporation under related provisions, see paragraph (f) of this section.

(b) Application of this section—(1) Requirements. This section shall apply and the employee of the foreign subsidiary shall be treated as an employee of domestic corporation for the purposes set forth in paragraph (a)(1) of this section only if each of the following requirements is satisfied:

(i) The domestic corporation must have entered into an agreement under section 3121(*l*) to provide social security coverage which applies to the foreign subsidiary of which such individual is an employee and which has not been terminated under section 3121(*l*)(3) or (4).

(ii) The plan, referred to in paragraph (a)(1) of this section, must expressly provide for contributions or benefits for individuals who are citizens of the United States and who are employees of one or more of its foreign subsidiaries to which an agreement entered into by such domestic corporation under section 3121(*l*) applies. The plan must apply to all of the foreign subsidiaries to which such agreement applies.

(iii) Contributions under a funded plan of deferred compensation (whether or not a plan described in section 401(a), 403(a), or 405(a)) must not be provided by any other person with respect to the remuneration paid to such individual by the foreign subsidiary.

(2) Supplementary rules. Subparagraph (1)(ii) of this paragraph does not modify the requirements for qualification of a plan described in section 401(a), 403(a), or 405(a) and the regulations thereunder. It is not necessary that the plan provide benefits or contributions for all United States citizens who are employees of such foreign subsidiaries. If the plan is amended to cover individuals who are employees by reason of paragraph (a)(1) of this section, the plan will not qualify unless it meets the coverage requirements of section 410(b)(1) (section 401(a)(3), as in effect on September 1, 1974, for plan years to which section 410 does not apply; see § 1.410(a)–2 for the effective dates of section 401) and the nondiscrimination requirements of section 401(a)(4). In addition, the administrative rules contained in § 1.401(a)–3(e) (relating to the determination of the contributions or benefits provided by the employer under the Social Security Act) will also apply for purposes of determining whether the plan meets the requirements of section 401. For purposes of subparagraph (1)(iii) of this paragraph, contributions will not be considered as provided under a funded plan merely because the foreign subsidiary is required under the laws of the foreign jurisdiction to pay social insurance taxes or to make similar payments with respect to the wages paid to the employee.

(c) Special rules—(1) Nondiscrimination requirements. For purposes of applying sections 401(a)(4) and 410(b)(1)(B) (section 401(a)(3)(B), as in effect on September 1, 1974, for plan years to

which section 410 does not apply) and the regulations thereunder (relating to nondiscrimination concerning benefits and contributions and coverage of employees) with respect to an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) If the employee is an officer, shareholder, or (with respect to plan years to which section 410 does not apply) person whose principal duties consist in supervising the work of other employees of the foreign subsidiary of the domestic corporation, he shall be treated as having such capacity with respect to the domestic corporation; and

(ii) The determination as to whether the employee is a highly compensated employee shall be made by comparing his total compensation (determined under subparagraph (2) of this paragraph) with the compensation of all the employees of the domestic corporation (including individuals treated as employees of the domestic corporation pursuant to section 406 and this section).

(2) Determination of compensation. For purposes of applying section 401(a)(5) and the regulations thereunder, relating to classifications that will not be considered discriminatory, with respect to an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) The total compensation of the employee shall be the remuneration of the employee from the foreign subsidiary (including any allowances that are paid to the employee because of his employment in a foreign country) which would constitute his total compensation if his services had been performed for the domestic corporation;

(ii) The basic or regular rate of compensation of the employee shall be determined for the employee in the same manner as it is determined under section 401 for other employees of the domestic corporation; and

(iii) The amount paid by the domestic corporation which is equivalent to the tax imposed with respect to the employee by section 3101 (relating to the tax on employees under the Federal Insurance Contributions Act) shall be treated as having been paid by the employee and shall be included in his compensation.

(d) Termination of status as deemed employee not to be treated as separation from service for purposes of capital gain provisions and limitation of tax. For purposes of applying the rules, relating to the treatment of certain distributions which are made after an employee's separation from service, set forth in section 72(n) as in effect on September 1, 1974 (with respect to taxable years ending after December 31, 1969, and to which section 402(e) does not apply), and in sections 402(a)(2) and (e) and 403(a)(2) (with respect to distributions or payments made after December 31, 1973, and in taxable years beginning after December 31, 1973) with respect to an employee of a foreign subsidiary who is treated as an employee of a domestic corporation under paragraph (a)(1) of this section, the employee shall not be considered as separated from the service of the domestic corporation solely by reason of the occurrence of any one or more of the following events:

(1) The termination, under the provisions of section 3121(*l*), of the agreement entered into by the domestic corporation under that section which covers the employment of the employee;

(2) The employee's becoming an employee of another foreign subsidiary of the domestic corporation with respect to which such agreement does not apply;

(3) The employee's ceasing to be an employee of the foreign subsidiary by reason of which employment he was treated as an employee of such domestic corporation, if he becomes an employee of another corporation controlled by such domestic corporation; or

(4) The termination of the provision of the plan described in paragraph (b)(1)(ii) of this section, for coverage of United States citizens who are employees of foreign subsidiaries covered by an agreement under section 3121(*l*).

For purposes of subparagraph (3) of this paragraph, a corporation is considered to be controlled by a domestic corporation if such domestic corporation owns directly or indirectly more than 50 percent of the voting stock of the corporation.

(e) **Deductibility of contributions—(1) In general.** For purposes of applying sections 404 and 405(c) with respect to the deduction for contributions made to or under a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), by a domestic corporation, or by another corporation which is entitled to deduct its contributions under section 404(a)(3)(B), on behalf of an employee of a foreign subsidiary treated as an employee of the domestic corporation under paragraph (a)(1) of this section—

(i) Except as provided in subdivision (ii) of this subparagraph, no deduction shall be allowed to such domestic corporation or to any other corporation which would otherwise be entitled to deduct its contributions on behalf of such employee under one of such sections;

(ii) There shall be allowed as a deduction from the gross income of the foreign subsidiary which is effectively connected with the conduct of a trade or business within the United States (within the meaning of section 882 and the regulations thereunder) an amount which is allocable and apportionable to such gross income under the rules of § 1.861–8 and which in no event may exceed the amount which (but for subdivision (i) of this subparagraph) would be deductible under section 404 or section 405(c) by the domestic corporation if the individual were an employee of the domestic corporation and if his compensation were paid by the domestic corporation; and

(iii) Any reference to compensation shall be considered to be a reference to the total compensation of such individual (determined by applying paragraph (c)(2) of this section).

(2) Year of deduction. Any amount deductible by the foreign subsidiary under section 406(d) and this paragraph shall be deductible for its taxable year with or within which ends the taxable year of the domestic corporation for which the contribution was made.

(3) Special rules. Whether contributions to a plan on behalf of an employee of the foreign subsidiary who is treated as an employee of the domestic corporation under paragraph (a)(1) of this section, or whether forfeitures with regard to such employee, will require an inclusion in the income of the domestic corporation or an adjustment in the basis of its stock in the foreign subsidiary, shall be determined in accordance with the rules of general application of subtitle A of chapter 1 of the Code (relating to income taxes). For example, an unreimbursed contribution by the domestic corporation to a plan which meets the requirements of section 401(a) will be treated, to the extent each employee's rights to the contribution are nonforfeitable, as a contribution of capital to the foreign subsidiary to the extent that such contributions are made on behalf of the employees of such subsidiary.

(f) Treatment as an employee of the domestic corporation under related provisions. An individual who is treated as an employee of a domestic corporation under paragraph (a)(1) of this section shall also be treated as an employee of such domestic corporation, with respect to the plan having the provision described in paragraph (b)(1)(ii) of this section, for purposes of applying section 72(d) (relating to employees' annuities), section 72(f) (relating to special rules for computing employees' contributions), section 101(b) (relating to employees' death benefits), section 2039 (relating to annuities), and section 2517 (relating to certain annuities under qualified plans) and the regulations thereunder.

(g) Nonexempt trust. If the plan of the domestic corporation is a qualified plan described under section 401(a), the fact that a trust which forms a part of such plan is not exempt from tax under section 501(a) shall not affect the treatment of an employee of a foreign subsidiary as an employee of a domestic corporation under section 406(a) and paragraph (a)(1) of this section.

[T.D. 7501, 42 FR 42321, Aug. 23, 1978]

§ 1.407–1 Treatment of certain employees of domestic subsidiaries engaged in business outside the United States as employees of the domestic parent corporation.

(a) Scope—(1) General rule. For purposes of applying the rules in part 1 of subchapter D of chapter 1 of subtitle A of the Code and the regulations thereunder with respect to a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a),. or a bond purchase plan described in section 405(a), of a domestic parent corporation (as defined in paragraph (b)(3)(ii) of this section), an individual who is a citizen of the United States and who is an employee of a domestic subsidiary (as defined in paragraph (b)(3)(i) of this section) of such domestic parent corporation shall be treated as an employee of such domestic parent corporation if the requirements of paragraph (b) of this section are satisfied.

(2) Cross-references. For rules relating to nondiscrimination requirements and the determination of compensation, see paragraph (c) of this section. For rules under which termination of the status of an individual as an employee of the domestic parent corporation in certain instances will not be considered as separation from service for certain purposes, see paragraph (d) of this section. For rules regarding deductibility of contributions, see paragraph (e) of this section. For rules regarding treatment of such individual as an employee of the domestic parent corporation under related provisions, see paragraph (f) of this section.

(b) Application of this section—(1) Requirements. This section shall apply and the employee of the domestic subsidiary shall be treated as an employee of the domestic parent corporation for the purposes set forth in paragraph (a)(1) of this section only if each of the following requirements is satisfied:

(i) The plan, referred to in paragraph (a)(1) of this section, must expressly provide for contributions of benefits for individuals who are citizens of the United States and who are employees of one or more of the domestic subsidiaries of the domestic parent corporation. The plan must apply to every domestic subsidiary.

(ii) Contributions under a funded plan of deferred compensation (whether or not a plan described in section 401(a), 403(a), or 405(a)) must not be provided by any other person with respect to the remuneration paid to such individual by the domestic subsidiary.

(2) Supplementary rules. Subparagraph (1)(i) of this paragraph does not modify the requirements for qualification of a plan described in section 401(a), 403(a), or 405(a) and the regulations thereunder. It is not necessary that the plan provide benefits or contributions for all United States citizens who are employees of such domestic subsidiaries. If the plan is amended to cover individuals who are employees by reason of paragraph (a)(1) of this section, the plan will not qualify unless it meets the coverage requirements of section 410(b)(1) (section 401(a)(3), as in effect on September 1, 1974, for plan years to which section 410 does not apply; see § 1.410(a)-2 for the effective dates of section 401) and the nondiscrimination requirements of section 410(a)(4). The administrative rules contained in § 1.401(a)-3(e) (relating to the determination of the contributions or benefits provided by the employer under the Social Security Act) will also apply for purposes of determining whether the plan meets the requirements of section 401. For purposes of subparagraph (1)(ii) of this paragraph, contributions will not be considered as provided under a funded plan merely because the domestic subsidiary employer pays the tax imposed by section 3111 (relating to tax on employers under the Federal Insurance Contributions Act) with respect to such employee or is required under the laws of a foreign jurisdiction to pay social insurance taxes or to make similar payments with respect to the wages paid to the employee.

(3) Definitions—(i) Domestic subsidiary. For purposes of this section, a corporation shall be treated as a domestic subsidiary for any taxable year only if each of the following requirements is satisfied:

(A) It is a domestic corporation 80 percent or more of the outstanding voting stock of which is owned by another domestic corporation;

(B) 95 percent or more of its gross income for the three-year period immediately preceding the close of its taxable year which ends on or before the close of the taxable year of such other domestic corporation (or for such part of such period during which it was in existence) was derived from sources without the United States, determined pursuant to sections 861 through 864 and the regulations thereunder; and

(C) 90 percent or more of its gross income for such period (or such part) was derived from the active conduct of a trade or business.

If for the period (or part thereof) referred to in (B) and (C) of this subdivision such corporation has no gross income, the provisions of (B) and (C) shall be treated as satisfied if it is reasonable to anticipate that, with respect to the first taxable year thereafter for which such corporation has gross income, such provisions will be satisfied.

(ii) Domestic parent corporation. The domestic parent corporation of any domestic subsidiary is the domestic corporation which owns 80 percent or more of the outstanding voting stock of such domestic subsidiary.

(c) Special rules—(1) Nondiscrimination requirements. For purposes of applying sections 401(a)(4) and 410(b)(1)(B) (section 401(a)(3)(B), as in effect on September 1, 1974, for plan years to which section 410 does not apply) and the regulation thereunder (relating to nondiscrimination concerning benefits and contributions and coverage of employees) with respect to an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) If the employee is an officer, shareholder, or (with respect to plan years to which section 410 does not apply) a person whose principal duties consist in supervising the work of other employees of the domestic subsidiary of the domestic parent corporation, he shall be treated as having such capacity with respect to the domestic parent corporation; and

(ii) The determination as to whether the employee is a highly compensated employee shall be made by comparing his total compensation (determined under subparagraph (2) of this paragraph)

with the compensation of all the employees of the domestic parent corporation (including individuals treated as employees of the domestic parent corporation pursuant to section 407 and this section).

(2) Determination of compensation. For purposes of applying section 401(a)(5) and the regulations thereunder, relating to classifications that will not be considered discriminatory, with respect to an employee of the domestic subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) The total compensation of the employee shall be the remuneration of the employee from the domestic subsidiary (including any allowances that are paid to the employee because of his employment in a foreign country) which would constitute his total compensation if his services had been performed for such domestic parent corporation; and

(ii) The basic or regular rate of compensation of the employee shall be determined for the employee in the same manner as it is determined under section 401 for other employees of the domestic parent corporation.

(d) Termination of status as deemed employee not to be treated as separation from service for purposes of capital gain provisions and limitation of tax. For purposes of applying the rules, relating to treatment of certain distributions which are made after an employee's separation from service, set forth in section 72(n) as in effect on September 1, 1974 (with respect to taxable years ending after December 31, 1969, and to which section 402(e) does not apply), and in sections 402(a)(2) and (e) and 403(a)(2) (with respect to distributions or payments made after December 31, 1973, and in taxable years beginning after December 31, 1973) with respect to an employee of a domestic subsidiary who is treated as an employee of a domestic parent corporation under paragraph (a)(1) of this section, the employee shall not be considered as separated from the service of the domestic parent corporation solely by reason of the occurrence of any one or more of the following events:

(1) The fact that the corporation of which such individual is an employee ceases, for any taxable year, to be a domestic subsidiary within the meaning of paragraph (b)(3)(i) of this section;

(2) The employee ceasing to be an employee of the domestic subsidiary of such domestic parent corporation, if he becomes an employee of another corporation controlled by such domestic parent corporation; or

(3) The termination of the provision of the plan described in paragraph (b)(1)(i) of this section, requiring coverage of the United States citizens who are employees of domestic subsidiaries of the domestic parent corporation.

For purposes of subparagraph (2) of this paragraph, a corporation is considered to be controlled by a domestic parent corporation if the domestic parent corporation owns directly or indirectly more than 50 percent of the voting stock of the corporation.

(e) Deductibility of contributions—(1) In general. For purposes of applying sections 404 and 405(c) with respect to the deduction for contributions made to or under a pension, profit-sharing, or stock bonus plan described in section 401(a), an annuity plan described in section 403(a), or a bond purchase plan described in section 405(a), by a domestic parent corporation, or by another corporation which is entitled to deduct its contributions under section 404(a)(3)(B), on behalf of an employee of a domestic subsidiary treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section—

(i) Except as provided in subdivision (ii) of this subparagraph, no deduction shall be allowed to the domestic parent corporation which would otherwise be entitled to deduct its contributions on behalf of such employee under one of such sections;

(ii) There shall be allowed as a deduction to the domestic subsidiary of which such individual is an employee an amount equal to the amount which (but for subdivision (i) of this subparagraph) would be deductible under section 404 or section 405(c) by the domestic parent corporation if the individual were an employee of the domestic parent corporation and if his compensation were paid by the domestic corporation; and

(iii) Any reference to compensation shall be considered to be a reference to the total compensation (of such individual determined by applying paragraph (c)(2) of this section).

(2) Year of deduction. Any amount deductible by the domestic subsidiary under section 407(d) and this paragraph shall be deductible for its taxable year with or within which ends the taxable year of the domestic parent corporation for which the contribution was made.

(3) Special rules. Whether contributions to a plan on behalf of an employee of the domestic

subsidiary who is treated as an employee of the domestic parent corporation under paragraph (a)(1) of this section, or whether forfeitures with regard to such employee, will require an inclusion in the income of the domestic parent corporation or an adjustment in the basis of its stock in the domestic subsidiary, shall be determined in accordance with the rules of general application of subtitle A of chapter 1 of the Code (relating to income taxes). For an example, an unreimbursed contribution by the domestic parent corporation to a plan which meets the requirements of section 401(a) will be treated, to the extent each employee's rights to the contribution are nonforfeitable, as a contribution of capital to the domestic subsidiary to the extent that such contributions are made on behalf of the employees of such subsidiary.

(f) Treatment as an employee of the domestic parent corporation under related provisions. An individual who is treated as an employee of a domestic parent corporation under paragraph (a)(1) of this section shall also be treated as an employee of such domestic corporation, with respect to the plan having the provision described in paragraph (b)(1)(i) of this section, for purposes of applying section 72(d) (relating to special rules for computing employees' contributions), section 72(f) (relating to special rules for computing employees' contributions), section 101(b) (relating to employees' death benefits), section 2039 (relating to annuities), and section 2517 (relating to certain annuities under qualified plans) and the regulations thereunder.

(g) Nonexempt trust. If the plan of the domestic parent corporation is a qualified plan described under section 401(a), the fact that a trust which forms a part of such plan is not exempt from tax under section 501(a) shall not affect the treatment of an employee of a domestic subsidiary as an employee of a domestic parent corporation under section 407(a) and paragraph (a)(1) of this section. [T.D. 7501, 42 FR 42323, Aug. 23, 1977]

§ 1.408–1 General rules.

(a) In general. Section 408 prescribes rules relating to individual retirement accounts and individual retirement annuities. In addition to the rules set forth in §§ 1.408–2 and 1.408–3, relating respectively to individual retirement accounts and individual retirement annuities, the rules set forth in this section shall also apply.

(b) Exemption from tax. The individual retirement account or individual retirement annuity is exempt from all taxes under subtitle A of the Code other than the taxes imposed under section 511, relating to tax on unrelated business income of charitable, etc., organizations.

(c) Sanctions—(1) Excess contributions. If an individual retirement account or individual retirement annuity accepts and retains excess contributions, the individual on whose behalf the account is established or who is the owner of the annuity will be subject to the excise tax imposed by section 4973.

(2) Prohibited transactions by owner or beneficiary of individual retirement account. (i) Under section 408(e)(2), if, during any taxable year of the individual for whose benefit any individual retirement account is established, that individual or the individual's beneficiary engages in any transaction prohibited by section 4975 with respect to such account, such account ceases to be an individual retirement account as of the first day of such taxable year. In any case in which any individual retirement account ceases to be an individual retirement account by reason of the preceding sentence as of the first day of any taxable year, section 408(d)(1) applies as if there were a distribution on such first day in an amount equal to the fair market value (on such first day) of all assets in the account (on such first day). The preceding sentence applies even though part of the fair market value of the individual retirement account as of the first day of the taxable year is attributable to excess contributions which may be returned tax-free under section 408(d)(4) or 408(d)(5).

(ii) If the trust with which the individual engages in any transaction described in subdivision (i) of this subparagraph is established by an employer or employee association under section 408(c), only the employee who engages in the prohibited transaction is subject to disqualification of his separate account.

(3) Prohibited transaction by person other than owner or beneficiary of account. If any person other than the individual on whose behalf an individual retirement account is established or the individual's beneficiary engages in any transaction prohibited by section 4975 with respect to such account, such person shall be subject to the taxes imposed by section 4975.

(4) Pledging account as security. Under section 408(e)(4), if, during any taxable year of the individual for whose benefit an individual retirement account is established, that individual uses the account or any portion thereof as security for a loan, the portion so used is treated as distributed to that individual.

(5) Borrowing on annuity contract. Under section 408(e)(3), if during any taxable year the owner of an individual retirement annuity borrows any money under or by use of such contract, the contract ceases to be an individual retirement annuity as of the first day of such taxable year. See § 1.408–3(c).

(6) Premature distributions. If a distribution (whether a deemed distribution or an actual distribution) is made from an individual retirement account, or individual retirement annuity, to the individual for whose benefit the account was established, or who is the owner of the annuity, before the individual attains age 59½ (unless the individual has become disabled within the meaning of section 72(m)(7)), the tax under Chapter 1 of the Code for the taxable year in which such distribution is received is increased under section 408(f)(1) or (f)(2). The increase equals 10 percent of the amount of the distribution which is includible in gross income for the taxable year. Except in the case of the credits allowable under section 31, 39, or 42, no credit can be used to offset the increased tax described in this subparagraph. See, however, § 1.408–4(c)(3).

(d) Limitation on contributions and benefits. An individual retirement account or individual retirement annuity is subject to the limitation on contributions and benefits imposed by section 415 for years beginning after December 31, 1975.

(e) Community property laws. Section 408 shall be applied without regard to any community property laws.

[T.D. 7714, 45 FR 52790, Aug. 8, 1980]

§ 1.408–2 Individual retirement accounts.

(a) In general. An individual retirement account must be a trust or a custodial account (see paragraph (d) of this section). It must satisfy the requirements of paragraph (b) of this section in order to qualify as an individual retirement account. It may be established and maintained by an individual, by an employer for the benefit of his employees (see paragraph (c) of this section), or by an employee association for the benefit of its members (see paragraph (c) of this section).

(b) Requirements. An individual retirement account must be a trust created or organized in the United States (as defined in section 7701(a)(9)) for the exclusive benefit of an individual or his beneficiaries. Such trust must be maintained at all times as a domestic trust in the United States. The instrument creating the trust must be in writing and the following requirements must be satisfied.

(1) Amount of acceptable contributions. Except in the case of a contribution to a simplified employee pension described in section 408(k) and a rollover contribution described in section 408(d)(3), 402(a)(5), 402(a)(7), 403(a)(4), 403(b)(8) or 409(b)(3)(C), the trust instrument must provide that contributions may not be accepted by the trustee for the taxable year in excess of $1,500 on behalf of any individual for whom the trust is maintained. An individual retirement account maintained as a simplified employee pension may provide for the receipt of up to $7,500 for a calendar year.

(2) Trustee. (i) The trustee must be a bank (as defined in section 401(d)(1) and the regulations thereunder) or another person who demonstrates, in the manner described in paragraph (b)(2)(ii) of this section, to the satisfaction of the Commissioner, that the manner in which the trust will be administered will be consistent with the requirements of section 408 and this section.

(ii) A person may demonstrate to the satisfaction of the Commissioner that the manner in which he will administer the trust will be consistent with the requirements of section 408 only upon the filing of a written application to the Commissioner of Internal Revenue, Attention: E:EP, Internal Revenue Service, Washington, D.C. 20224. Such application must meet the applicable requirements of the regulations under section 401(d)(1), relating to nonbank trustees of pension and profit-sharing trusts benefiting owner-employees.

(iii) Section 11.408(a)(2)–1 of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 is superseded by this subparagraph (2).

(3) Life insurance contracts. No part of the trust funds may be invested in life insurance contracts. An individual retirement account may invest in annuity contracts which provide, in the case of death prior to the time distributions commence, for a payment equal to the sum of the premiums paid or, if greater, the cash value of the contract.

(4) Nonforfeitability. The interest of any individual on whose behalf the trust is maintained in the balance of his account must be nonforfeitable.

(5) Prohibition against commingling. (i) The assets of the trust must not be commingled with other property except in a common trust fund or common investment fund.

(ii) For purposes of this subparagraph, the term "common investment fund" means a group trust created for the purpose of providing a satisfactory diversification of investments or a reduction of administrative expenses for the individual participating trusts, and which group trust satisfies the requirements of section 408(c) (except that it need not be established by an employer or an association of employees) and the requirements of section 401(a) in the case of a group trust in which one of the individual participating trusts is an employees' trust described in section 401(a) which is exempt from tax under section 501(a).

(iii) For purposes of this subparagraph, the term "individual participating trust" means an employees' trust described in section 401(a) which is exempt from tax under section 501(a) or a trust which satisfies the requirements of section 408(a) provided that in the case of such an employees' trust, such trust would be permitted to participate in such a group trust if all the other individual participating trusts were employees' trusts described in section 401(a) which are exempt from tax under section 501(a).

(6) **Distribution of interest.** (i) The trust instrument must provide that the entire interest of the individual for whose benefit the trust is maintained must be distributed to him in accordance with paragraph (b)(6)(ii) or (iii) of this section.

(ii) Unless the provisions of paragraph (b)(6)(iii) of this section apply, the entire interest of the individual must be actually distributed to him not later than the close of his taxable year in which he attains age 70½.

(iii) In lieu of distributing the individual's entire interest as provided in paragraph (b)(6)(ii) of this section, the interest may be distributed commencing not later than the taxable year described in such paragraph (b)(6)(ii). In such case, the trust must expressly provide that the entire interest of the individual will be distributed to the individual and the individual's beneficiaries, in a manner which satisfies the requirements of paragraph (b)(6)(v) of this section, over any of the following periods (or any combination thereof)—

(A) The life of the individual,

(B) The lives of the individual and spouse,

(C) A period certain not extending beyond the life expectancy of the individual, or

(D) A period certain not extending beyond the joint life and last survivor expectancy of the individual and spouse.

(iv) The life expectancy of the individual or the joint life and last survivor expectancy of the individual and spouse cannot exceed the period computed by use of the expected return multiples in § 1.72–9, or, in the case of payments under a contract issued by an insurance company, the period computed by use of the mortality tables of such company.

(v) If an individual's entire interest is to be distributed over a period described in paragraph (b)(6)(iii) of this section, beginning in the year the individual attains 70 ½ the amount to be distributed each year must be not less than the lesser of the balance of the individual's entire interest or an amount equal to the quotient obtained by dividing the entire interest of the individual in the trust at the beginning of such year (including amounts not in the individual retirement account at the beginning of the year because they have been withdrawn for the purpose of making a rollover contribution to another individual retirement plan) by the life expectancy of the individual (or the joint life and last survivor expectancy of the individual and spouse (whichever is applicable)), determined in either case as of the date the individual attains age 70 in accordance with paragraph (b)(6)(iv) of this section, reduced by one for each taxable year commencing after the individual's attainment of age 70 ½. An annuity or endowment contract issued by an insurance company which provides for non-increasing payments over one of the periods described in paragraph (b)(6)(iii) of this section beginning not later than the close of the taxable year in which the individual attains age 70 ½ satisfies this provision. However, no distribution need be made in any year, or a lesser amount may be distributed, if beginning with the year the individual attains age 70 ½ the aggregate amounts distributed by the end of any year are at least equal to the aggregate of the minimum amounts required by this subdivision to have been distributed by the end of such year.

(vi) If an individual's entire interest is distributed in the form of an annuity contract, then the requirements of section 408(a)(6) are satisfied if the distribution of such contract takes place before the close of the taxable year described in subdivision (ii) of this subparagraph, and if the individual's interest will be paid over a period described in subdivision (iii) of this subparagraph and at a rate which satisfies the requirements of subdivision (v) of this subparagraph.

(vii) In determining whether paragraph (b)(6)(v) of this section is satisfied, all individual retirement

plans maintained for an individual's benefit (except those under which he is a beneficiary described in section 408(a)(7)) at the close of the taxable year in which he reaches age 70 ½ must be aggregated. Thus, the total payments which such individual receives in any taxable year must be at least equal to the amount he would have been required to receive had all the plans been one plan at the close of the taxable year in which he attained age 70 ½.

(7) Distribution upon death. (i) The trust instrument must provide that if the individual for whose benefit the trust is maintained dies before the entire interest in the trust has been distributed to him, or if distribution has been commenced as provided in paragraph (b)(6) of this section to the surviving spouse and such spouse dies before the entire interest has been distributed to such spouse, the entire interest (or the remaining part of such interest if distribution thereof has commenced) must, within 5 years after the individual's death (or the death of the surviving spouse) be distributed or applied to the purchase of an immediate annuity for this beneficiary or beneficiaries (or the beneficiary or beneficiaries of the surviving spouse) which will be payable for the life of such beneficiary or beneficiaries (or for a term certain not extending beyond the life expectancy of such beneficiary or beneficiaries) and which annuity contract will be immediately distributed to such beneficiary or beneficiaries. A contract described in the preceding sentence is not includible in gross income upon distribution. Section 1.408–4(e) provides rules applicable to the taxation of such contracts. The first sentence of this paragraph (b)(7) shall have no application if distributions over a term certain commenced before the death of the individual for whose benefit the trust was maintained and the term certain is for a period permitted under paragraph (b)(6)(iii)(C) or (D) of this section.

(ii) Each such beneficiary (or beneficiary of a surviving spouse) may elect to treat the entire interest in the trust (or the remaining part of such interest if distribution thereof has commenced) as an account subject to the distribution requirements of section 408(a)(6) and paragraph (b)(6) of this section instead of those of section 408(a)(7) and paragraph (b)(7) of this section. Such an election will be deemed to have been made if such beneficiary treats the account in accordance with the requirements of section 408(a)(6) and paragraph (b)(6) of this section. An election will be considered to have been made by such beneficiary if either of the following occurs: (A) any amounts in the account (including any amounts that have been rolled over, in accordance with the requirements of section 408(d)(3)(A)(i), into an individual retirement account, individual retirement annuity, or retirement bond for the benefit of such individual) have not been distributed within the appropriate time period required by section 408(a)(7) and paragraph (b)(7) of this section; or (B) any additional amounts are contributed to the account (or to the account, annuity, or bond to which the beneficiary has rolled such amounts over, as described in (1) above) which are subject, or deemed to be subject, to the distribution requirements of section 408(a)(6) and paragraph (b)(6) of this section.

(8) Definition of beneficiaries. The term "beneficiaries" on whose behalf an individual retirement account is established includes (except where the context indicates otherwise) the estate of the individual, dependents of the individual, and any person designated by the individual to share in the benefits of the account after the death of the individual.

(c) Accounts established by employers and certain association of employees—(1) In general. A trust created or organized in the United States (as defined in section 7701(a)(9)) by an employer for the exclusive benefit of his employees or their beneficiaries, or by an association of employees for the exclusive benefit of its members or their beneficiaries, is treated as an individual retirement account if the requirements of paragraphs (c)(2) and (c)(3) of this section are satisfied under the written governing instrument creating the trust. A trust described in the preceding sentence is for the exclusive benefit of employees or members even though it may maintain an account for former employees or members and employees who are temporarily on leave.

(2) General requirements. The trust must satisfy the requirements of paragraphs (b)(1) through (7) of this section.

(3) Special requirement. There must be a separate accounting for the interest of each employee or member.

(4) Definitions—(i) Separate accounting. For purposes of paragraph (c)(3) of this section, the term "separate accounting" means that separate records must be maintained with respect to the interest of each individual for whose benefit the trust is maintained. The assets of the trust may be held in a common trust fund, common investment fund, or common fund for the account of all individuals who have an interest in the trust.

(ii) **Employee association.** For purposes of this paragraph and section 408(c), the term "employee association" means any organization composed of two or more employees, including but not limited to, an employee association described in section 501(c)(4). Such association may include employees within the meaning of section 401(c)(1). There must be, however, some nexus between the employees (*e.g.*, employees of same employer, employees in the same industry, etc.) in order to qualify as an employee association described in this subdivision (ii).

(d) **Custodial accounts.** For purposes of this section and section 408(a), a custodial account is treated as a trust described in section 408(a) if such account satisfies the requirements of section 408(a) except that it is not a trust and if the assets of such account are held by a bank (as defined in section 401(d)(1) and the regulations thereunder) or such other person who satisfies the requirements of paragraph (b)(2)(ii) of this section. For purposes of this chapter, in the case of a custodial account treated as a trust by reason of the preceding sentence, the custodian of such account will be treated as the trustee thereof.

[T.D. 7714, 45 FR 52791, Aug. 8, 1980]

§ 1.408–3 Individual retirement annuities.

(a) **In general.** An individual retirement annuity is an annuity contract or endowment contract (described in paragraph (e)(1) of this section) issued by an insurance company which is qualified to do business under the law of the jurisdiction in which the contract is sold and which satisfies the requirements of paragraph (b) of this section. A participation certificate in a group contract issued by an insurance company described in this paragraph will be treated as an individual retirement annuity if the contract satisfies the requirements of paragraph (b) of this section; the certificate of participation sets forth the requirements of paragraphs (1) through (5) of section 408(b); the contract provides for a separate accounting of the benefit allocable to each participant-owner; and the group contract is for the exclusive benefit of the participant owners and their beneficiaries. For purposes of this title, a participant-owner of a group contract described in this paragraph shall be treated as the owner of an individual retirement annuity. A contract will not be treated as other than an individual retirement annuity merely because it provides for waiver of premium on disability. An individual retirement annuity contract which satisfies the requirements of section 408(b) need not be purchased under a trust if the requirements of paragraph (b) of this section are satisfied. An individual retirement endowment contract may not be held under a trust which satisfies the requirements of section 408(a). Distribution of the contract is not a taxable event. Distributions under the contract are includible in gross income in accordance with the provisions of § 1.408–4(e).

(b) **Requirements—(1) Transferability.** The annuity or the endowment contract must not be transferable by the owner. An annuity or endowment contract is transferable if the owner can transfer any portion of his interest in the contract to any person other than the issuer thereof. Accordingly, such a contract is transferable if the owner can sell, assign, discount, or pledge as collateral for a loan or as security for the performance of an obligation or for any other purpose his interest in the contract to any person other than the issuer thereof. On the other hand, a contract is not to be considered transferable merely because the contract contains: a provision permitting the individual to designate a beneficiary to receive the proceeds in the event of his death, a provision permitting the individual to elect a joint and survivor annuity, or other similar provisions.

(2) **Annual premium.** Except in the case of a contribution to a simplified employee pension described in section 408(k), the annual premium on behalf of any individual for the annuity or the endowment contract cannot exceed $1,500. Any refund of premiums must be applied before the close of the calendar year following the year of the refund toward the payment of future premiums or the purchase of additional benefits.

(3) **Distribution.** The entire interest of the owner must be distributed to him in the same manner and over the same period as described in § 1.408–2(b)(6).

(4) **Distribution upon death.** If the owner dies before the entire interest has been distributed to him, or if distribution has commenced to the surviving spouse, the remaining interest must be distributed in the same manner, over the same period, and to the same beneficiaries as described in § 1.408–2(b)(7).

(5) **Nonforfeitability.** The entire interest of the owner in the annuity or endowment contract must be nonforfeitable.

(6) **Flexible premium.** [Reserved]

(c) **Disqualification.** If during any taxable year the owner of an annuity borrows any money under the annuity or endowment contract or by use of

such contract (including, but not limited to, pledging the contract as security for any loan), such contract will cease to be an individual retirement annuity as of the first day of such taxable year, and will not be an individual retirement annuity at any time thereafter. If an annuity or endowment contract which constitutes an individual retirement annuity is disqualified as a result of the preceding sentence, an amount equal to the fair market value of the contract as of the first day of the taxable year of the owner in which such contract is disqualified is deemed to be distributed to the owner. Such owner shall include in gross income for such year an amount equal to the fair market value of such contract as of such first day. The preceding sentence applies even though part of the fair market value of the individual retirement annuity as of the first day of the taxable year is attributable to excess contributions which may be returned tax-free under section 408(d)(4) or 408(d)(5).

(d) Premature distribution tax on deemed distribution. If the individual has not attained age 59½ before the beginning of the year in which the disqualification described in paragraph (c) of this section occurs, see section 408(f)(2) for additional tax on premature distributions.

(e) Endowment contracts—(1) Additional requirement for endowment contracts. No contract providing life insurance protection issued by a company described in paragraph (a) of this section shall be treated as an endowment contract for purposes of this section if—

(i) Such contract matures later than the taxable year in which the individual in whose name the contract is purchased attains the age of 70½;

(ii) Such contract is not for the exclusive benefit of such individual or his beneficiaries;

(iii) Premiums under the contract may increase over the term of the contract;

(iv) When all premiums are paid when due, the cash value of such contract at maturity is less than the death benefit payable under the contract at any time before maturity;

(v) The death benefit does not, at some time before maturity, exceed the greater of the cash value or the sum of premiums paid under the contract;

(vi) Such contract does not provide for a cash value;

(vii) Such contract provides that the life insurance element of such contract may increase over the term of such contract, unless such increase is merely because such contract provides for the purchase of additional benefits;

(viii) Such contract provides insurance other than life insurance and waiver of premiums upon disability; or

(ix) Such contract is issued after November 6, 1978.

(2) Treatment of proceeds under endowment contract upon death of individual. In the case of the payment of a death benefit under an endowment contract upon the death of the individual in whose name the contract is purchased, the portion of such payment which is equal to the cash value immediately before the death of such individual is not excludable from gross income under section 101(a) and is treated as a distribution from an individual retirement annuity. The remaining portion, if any, of such payment constitutes current life insurance protection and is excludable under section 101(a). If a death benefit is paid under an endowment contract at a date or dates later than the death of the individual, section 101(d) is applicable only to the portion of the benefit which is attributable to the amount excludable under section 101(a).

[T.D. 7714, 45 FR 52792, Aug. 8, 1980]

§ 1.408–4 Treatment of distributions from individual retirement arrangements.

(a) General rule—(1) Inclusion in income. Except as otherwise provided in this section, any amount actually paid or distributed or deemed paid or distributed from an individual retirement account or individual retirement annuity shall be included in the gross income of the payee or distributee for the taxable year in which the payment or distribution is received.

(2) Zero basis. Notwithstanding section 1015(d) or any other provision of the Code, the basis (or investment in the contract) of any person in such an account or annuity is zero. For purposes of this section, an assignment of an individual's rights under an individual retirement account or an individual retirement annuity shall, except as provided in § 1.408–4(g) (relating to transfer incident to divorce), be deemed a distribution to such individual from such account or annuity of the amount assigned.

(b) Rollover contribution—(1) To individual retirement arrangement. Paragraph (a)(1) of this section shall not apply to any amount paid or distributed from an individual retirement account or individual retirement annuity to the individual

for whose benefit the account was established or who is the owner of the annuity if the entire amount received (including the same amount of money and any other property) is paid into an individual retirement account, annuity (other than an endowment contract), or bond created for the benefit of such individual not later than the 60th day after the day on which he receives the payment or distribution.

(2) To qualified plan. Paragraph (a)(1) of this section does not apply to any amount paid or distributed from an individual retirement account or individual retirement annuity to the individual for whose benefit the account was established or who is the owner of the annuity if—

(i) No amount in the account or no part of the value of the annuity is attributable to any source other than a rollover contribution from an employees' trust described in section 401(a) which is exempt from tax under section 501(a) or a rollover contribution from an annuity plan described in section 403(a) and the earnings on such sums, and

(ii) The entire amount received (including the same amount of money and any other property) represents the entire amount in the account and is paid into another such trust or plan (for the benefit of such individual) not later than the 60th day after the day on which the payment or distribution is received.

This subparagraph does not apply if any portion of the rollover contribution described in paragraph (b)(2)(i) of this section is attributable to an employees' trust forming part of a plan or an annuity under which the individual was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan.

(3) To section 403(b) contract. [Reserved]

(4) Frequency limitation. (i) For taxable years beginning on or before December 31, 1977, paragraph (b)(1) of this section does not apply to any amount received by an individual from an individual retirement account, annuity or bond if at any time during the 3–year period ending on the day of receipt, the individual received any other amount from an individual retirement account, annuity or bond which was not includible in his gross income because of the application of paragraph (b)(1) of this section.

(ii) [Reserved]

(c) Excess contributions returned before due date of return—(1) Excess contribution. For purposes of this paragraph, excess contributions are the excess of the amounts contributed to an individual retirement account or paid for an individual retirement annuity during the taxable year over the amount allowable as a deduction under section 219 or 220 for the taxable year.

(2) General rule. (i) Paragraph (a)(1) of this section does not apply to the distribution of any excess contribution paid during a taxable year to an account or annuity if: the distribution is received on or before the date prescribed by law (including extensions) for filing the individual's return for such taxable year; no deduction is allowed under section 219 or section 220 with respect to the excess contribution; and the distribution is accompanied by the amount of net income attributable to the excess contribution as of the date of the distribution as determined under subdivision (ii).

(ii) The amount of net income attributable to the excess contributions is an amount which bears the same ratio to the net income earned by the account during the computation period as the excess contribution bears to the sum of the balance of the account as of the first day of the taxable year in which the excess contribution is made and the total contribution made for such taxable year. For purposes of this paragraph, the term "computation period" means the period beginning on the first day of the taxable year in which the excess contribution is made and ending on the date of the distribution from the account.

(iii) For purposes of paragraph (c)(2)(ii), the net income earned by the account during the computation period is the fair market value of the balance of the account immediately after the distribution increased by the amount of distributions from the account during the computation period, and reduced (but not below zero) by the sum of: (A) the fair market value of the balance of the account as of the first day of the taxable year in which the excess contribution is made and (B) the contributions to the account made during the computation period.

(3) Time of inclusion. (i) For taxable years beginning before January 1, 1977, the amount of net income determined under subparagraph (2) is includible in the gross income of the individual for the taxable year in which it is received. The amount of net income thus distributed is subject to the tax imposed by section 408(f)(1) for the year includible in gross income.

(ii) [Reserved]

(4) Example. The provisions of this paragraph may be illustrated by the following example:

Example. On January 1, 1975, A, age 55, who is a calendar-year taxpayer, contributes $1,500 to an individual retirement account established for his benefit. For 1975, A is entitled to a deduction of $1,400 under section 219. For 1975, A does not claim as deductions any other items listed in section 62. A's gross income for 1975 is $9,334. On April 1, 1976, $107 is distributed to A from his individual retirement account. As of such date, the balance of the account is $1,498 [$1,605 − $107]. There were no other distributions from the account as of such date. The net amount of income earned by the account is $105 [$1,498 + $107 − (0 + $1,500)]. The net income attributable to the excess contribution is $7. [$105 × ($100/$1,500)]. A's adjusted gross income for 1975 is his gross income for 1975 ($9,334) reduced by the amount allowable to A as a deduction under section 219 ($1,400), or $7,934. A will include the $7 of the $107 distributed on April 1, 1976, in his gross income for 1976. Further, A will pay an additional income tax of $.70 for 1976 under section 408(f)(1).

(d) Deemed distribution—(1) General rule. In any case in which an individual retirement account ceases to be an individual retirement account by reason of the application of section 408(e)(2), paragraph (a)(1) of this section shall apply as if there were a distribution on the first day of the taxable year in which such account ceases to be an individual retirement account of an amount equal to the fair market value on such day of all of the assets in the account on such day. In the case of a deemed distribution from an individual retirement annuity, see § 1.408–3(d).

(2) Using account as security. In any case in which an individual for whose benefit an individual retirement account is established uses, directly or indirectly, all or any portion of the account as security for a loan, paragraph (a)(1) of this section shall apply as if there were distributed on the first day of the taxable year in which the loan was made an amount equal to that portion of the account used as security for such loan.

(e) Distribution of annuity contracts. Paragraph (a)(1) of this section does not apply to any annuity contract which is distributed from an individual retirement account and which satisfies the requirements of paragraphs (b)(1), (3), (4) and (5) of section 408. Amounts distributed under such contracts will be taxable to the distributee under section 72. For purposes of applying section 72 to a distribution from such a contract, the investment in such contract is zero.

(f) Treatment of assets distributed from an individual retirement account for the purchase of an endowment contract. Under section 408(e)(5), if all, or any portion, of the assets of an individual retirement account are used to purchase an endowment contract described in § 1.408–3(e) for the benefit of the individual for whose benefit the account is established—

(1) The excess, if any, of the total amount of assets used to purchase such contract over the portion of the assets attributable to life insurance protection shall be treated as a rollover contribution described in section 408(d)(3), and

(2) The portion of the assets attributable to life insurance protection shall be treated as a distribution described in paragraph (a)(91) of this section, except that the provisions of section 408(f) shall not apply to such amount.

(g) Transfer incident to divorce—(1) General rule. The transfer of an individual's interest, in whole or in part, in an individual retirement account, individual retirement annuity, or a retirement bond, to his former spouse under a valid divorce decree or a written instrument incident to such divorce shall not be considered to be a distribution from such an account or annuity to such individual or his former spouse; nor shall it be considered a taxable transfer by such individual to his former spouse notwithstanding any other provision of Subtitle A of the Code.

(2) Spousal account. The interest described in this paragraph (g) which is transferred to the former spouse shall be treated as an individual retirement account of such spouse if the interest is an individual retirement account; an individual retirement annuity of such spouse if such interest is an individual retirement annuity; and a retirement bond of such spouse if such interest is a retirement bond.

[T.D. 7714, 45 FR 52793, Aug. 8, 1980]

§ 1.408–5 Annual reports by trustees or issuers.

(a) In general. The trustee of an individual retirement account or the issuer of an individual retirement annuity shall make annual calendar year reports concerning the status of the account or annuity. The report shall contain the information required in paragraph (b) and be furnished or filed in the manner and time specified in paragraph (c).

(b) Information required to be included in the annual reports. The annual calendar year report shall contain the following information for transactions occurring during the calendar year—

(1) The amount of contributions;

(2) The amount of distributions;

(3) In the case of an endowment contract, the amount of the premium paid allocable to the cost of life insurance;

(4) The name and address of the trustee or issuer; and

(5) Such other information as the Commissioner may require.

(c) Manner and time for filing. (1) The annual report shall be furnished to the individual on whose behalf the account is established or in whose name the annuity is purchased (or the beneficiary of the individual or owner). The report shall be furnished on or before the 30th day of June following the calendar year for which the report is required.

(2) The Commissioner may require the annual report to be filed with the Service at the time the Commissioner specifies.

(d) Penalties. Section 6693 prescribes penalties for failure to file the annual report.

(e) Effective date. This section shall apply to reports for calendar years after 1978.

(f) Reports for years prior to 1979. For years prior to 1979, a trustee or issuer shall make reports in the time and manner as the Commissioner requires.

[T.D. 7714, 45 FR 52795, Aug. 8, 1980]

§ 1.408–6 Disclosure statements for individual retirement arrangements.

(a) In general—(1) General rule. Trustees and issuers of individual retirement accounts and annuities are, under the authority of section 408(i), required to provide disclosure statements. This section sets forth these requirements.

(2) [Reserved]

(b)–(c) [Reserved]

(d) Requirements. (1)–(3) [Reserved]

(4) Disclosure statements. (i) Under the authority contained in section 408(i), a disclosure statement shall be furnished in accordance with the provisions of this subparagraph by the trustee of an individual retirement account described in section 408(a) or the issuer of an individual retirement annuity described in section 408(b) or of an endowment contract described in section 408(b) to the individual (hereinafter referred to as the "benefited individual") for whom such an account, annuity, or contract is, or is to be, established.

(ii)(A)(*1*) The trustee or issuer shall furnish, or cause to be furnished, to the benefited individual, a disclosure statement satisfying the requirements of subdivisions (iii) through (viii) of this subparagraph, as applicable, and a copy of the governing instrument to be used in establishing the account, annuity, or endowment contract. The copy of such governing instrument need not be filled in with financial and other data pertaining to the benefited individual; however, such copy must be complete in all other respects. The disclosure statement and copy of the governing instrument must be received by the benefited individual at least seven days preceding the earlier of the date of establishment or purchase of the account, annuity, or endowment contract. A disclosure statement or copy of the governing instrument required by this subparagraph may be received by the benefited individual less than seven days preceding, but no later than, the earlier of the date of establishment or purchase, if the benefited individual is permitted to revoke the account, annuity, or endowment contract pursuant to a procedure which satisfies the requirements of subdivision (ii)(A)(*2*) of this subparagraph.

(*2*) A procedure for revocation satisfies the requirements of this subdivision (ii)(A)(*2*) of this subparagraph if the benefited individual is permitted to revoke the account, or endowment contract by mailing or delivering, at his option, a notice of revocation on or before a day not less than seven days after the earlier of the date of establishment or purchase and, upon revocation, is entitled to a return of the entire amount of the consideration paid by him for the account, annuity, or endowment contract without adjustment for such items as sales commissions, administrative expenses or fluctuation in market value. The procedure may require that the notice be in writing or that it be oral, or it may require both a written and an oral notice. If an oral notice is required or permitted, the procedure must permit it to be delivered by telephone call during normal business hours. If a written notice is required or permitted, the procedure must provide that, if mailed, it shall be deemed mailed on the date of the postmark (or if sent by certified or registered mail, the date of certification or registration) if it is deposited in the mail in the United States in an envelope, or other appropriate wrapper, first class postage prepaid, properly addressed.

(B) If after a disclosure statement has been furnished, or caused to be furnished, to the benefited individual pursuant to paragraph (d)(4)(ii)(A) of this section and—

(1) On or before the earlier of the date of establishment or purchase, or

(2) On or before the last day on which the benefited individual is permitted to revoke the account, annuity, or endowment contract (if the benefited individual has a right to revoke the account, annuity, or endowment contract pursuant to the rules of subdivision (ii)(A) of this subparagraph),

there becomes effective a material adverse change in the information set forth in such disclosure statement or a material change in the governing instrument to be used in establishing the account, annuity, or contract, the trustee or issuer shall furnish, or cause to be furnished, to the benefited individual such amendments to any previously furnished disclosure statement or governing instrument as may be necessary to adequately inform the benefited individual of such change. The trustee or issuer shall be treated as satisfying this subdivision (ii)(B) of this subparagraph only if material required to be furnished by this subdivision is received by the benefited individual at least seven days preceding the earlier of the date of establishment or purchase of the account, annuity, or endowment contract or if the benefited individual is permitted to revoke the account, annuity, or endowment contract on or before a date not less than seven days after the date on which such material is received, pursuant to a procedure for revocation otherwise satisfying the provisions of subdivision (ii)(A)(2) of this subparagraph.

(C) If the governing instrument is amended after the account, annuity, or endowment contract is no longer subject to revocation pursuant to subdivision (ii)(A) or (B) of this subparagraph, the trustee or issuer shall not later than the 30th day after the later of the date on which the amendment is adopted or becomes effective, deliver or mail to the last known address of the benefited individual a copy of such amendment and, if such amendment affects a matter described in subdivisions (iii) through (viii) of this subparagraph, a disclosure statement with respect to such matter meeting the requirements of subdivision (iv) of this subparagraph.

(D) For purposes of subdivision (ii)(A) and (B) of this subparagraph, if a disclosure statement, governing instrument, or an amendment to either, is mailed to the benefited individual, it shall be deemed (in the absence of evidence to the contrary) to be received by the benefited individual seven days after the date of mailing.

(E) In the case of a trust described in section 408(c) (relating to certain retirement savings arrangements for employees or members of associations of employees), the following special rules shall be applied:

(1) For purposes of this subparagraph, references to the benefited individual's account, annuity, or endowment contract shall refer to the benefited individual's interest in such trust, and

(2) The provisions of subdivision (ii) of this subparagraph shall be applied by substituting "the date on which the benefited individual's interest in such trust commences" for "the earlier of the date of establishment or purchase" wherever it appears therein.

Thus, for example, if an employer establishes a trust described in section 408(c) for the benefit of employees, and the trustee furnishes an employee with a disclosure statement and a copy of the governing instrument (as required by this subparagraph) on the date such employee's interest in the trust commences, such employee must be given a right to revoke such interest within a period of at least seven days. If any contribution has been made within such period (whether by the employee or by the employer), the full amount of such contribution must be paid to such employee pursuant to subdivision (ii)(A)(2) of this subparagraph.

(iii) The disclosure statement required by this subparagraph shall set forth in nontechnical language the following matters as such matters relate to the account, annuity, or endowment contract (as the case may be);

(A) Concise explanations of—

(1) The statutory requirements prescribed in section 408(a) (relating to an individual retirement account) or section 408(b) (relating to an individual retirement annuity and an endowment contract), and any additional requirements (whether or not required by law) that pertain to the particular retirement savings arrangement.

(2) The income tax consequences of establishing an account, annuity, or endowment contract (as the case may be) which meets the requirements of section 408(a) (relating to an individual retirement account) or section 408(b) (relating to an individual retirement annuity and an endowment contract), including the deductibility of contributions to, the tax treatment of distributions (other than premature distributions) from, the availability of income tax free rollovers to and from, and the tax status of such account, annuity, or endowment contract.

(3) The limitations and restrictions on the deduction for retirement savings under section 219, including the ineligibility of certain individuals who are active participants in a plan described in section 219(b)(2)(A) or for whom amounts are contributed under a contract described in section 219(b)(2)(B) to make deductible contributions to an account or for an annuity or endowment contract.

(4) The circumstances under which the benefited individual may revoke the account, annuity, or endowment contract, and the procedure therefor (including the name, address, and telephone number of the person designated to receive notice of such revocation). Such explanation shall be prominently displayed at the beginning of the disclosure statement.

(B) Statements to the effect that—

(1) If the benefited individual or his beneficiary engages in a prohibited transaction, described in section 4975(c) with respect to an individual retirement account, the account will lose its exemption from tax by reason of section 408(e)(2)(A), and the benefited individual must include in gross income, for the taxable year during which the benefited individual or his beneficiary engages in the prohibited transaction the fair market value of the account.

(2) If the owner of an individual retirement annuity or endowment contract described in section 408(b) borrows any money under, or by use of, such annuity or endowment contract, then, under section 408(e)(3), such annuity or endowment contract loses its section 408(b) classification, and the owner must include in gross income, for the taxable year during which the owner borrows any money under, or by use of, such annuity or endowment contract, the fair market value of the annuity or endowment contract.

(3) If a benefited individual uses all or any portion of an individual retirement account as security for a loan, then, under section 408(e)(4), the portion so used is treated as distributed to such individual and the benefited individual must include such distribution in gross income for the taxable year during which he so uses such account.

(4) An additional tax of 10 percent is imposed by section 408(f) on distributions (including amounts deemed distributed as the result of a prohibited loan or use as security for a loan) made before the benefited individual has attained age 59 ½, unless such distribution is made on account of death or disability, or unless a rollover contribution is made with such distribution.

(5) Sections 2039(e) (relating to exemption from estate tax of annuities under certain trusts and plans) and 2517 (relating to exemption from gift tax of specified transfers of certain annuities under qualified plans) apply (including the manner in which such sections apply) to the account, annuity, or endowment contract.

(6) Section 402(a)(2) and (e) (relating to tax on lump sum distributions) is not applicable to distributions from an account, annuity, or endowment contract.

(7) A minimum distribution is required under section 408(a)(6) or (7) and 408(b)(3) or (4) (including a brief explanation of the amount of minimum distribution) and that if the amount distributed from an account, annuity, or endowment contract during the taxable year of the payee is less than the minimum required during such year, an excise tax, which shall be paid by the payee, is imposed under section 4974, in an amount equal to 50 percent of the excess of the minimum required to be distributed over the amount actually distributed during the year.

(8) An excise tax is imposed under section 4973 on excess contributions (including a brief explanation of an excess contribution).

(9) The benefited individual must file Form 5329 (Return for Individual Retirement Savings Arrangement) with the Internal Revenue for each taxable year during which the account, annuity, or endowment contract is maintained.

(10) The account or contract has or has not (as the case may be) been approved as to form for use as an account, annuity, or endowment contract by the Internal Revenue Service. For purposes of this subdivision, if a favorable opinion or determination letter with respect to the form of a prototype trust, custodial account, annuity, or endowment contract has been issued by the Internal Revenue Service, or the instrument which establishes an individual retirement trust account or an individual retirement custodial account utilizes the precise language of a form currently provided by the Internal Revenue Service (including any additional language permitted by such form), such account or contract may be treated as approved as to form.

(11) The Internal Revenue Service approval is a determination only as to the form of the account, annuity, or endowment contract, and does not

represent a determination of the merits of such account, annuity, or endowment contract.

(12) The proceeds from the account, annuity or endowment contract may be used by the benefited individual as a rollover contribution to another account or annuity or retirement bond in accordance with the provisions of section 408(d)(3).

(13) In the case of an endowment contract described in section 408(b), no deduction is allowed under section 219 for that portion of the amounts paid under the contract for the taxable year properly allocable to the cost of life insurance.

(14) If applicable, in the event that the benefited individual revokes the account, annuity, or endowment contract, pursuant to the procedure described in the disclosure statement (see subdivision (A)(4) of this subdivision (iii)), the benefited individual is entitled to a return of the entire amount of the consideration paid by him for the account, annuity, or endowment contract without adjustment for such items as sales commissions, administrative expenses or fluctuation in market value.

(15) Further information can be obtained from any district office of the Internal Revenue Service.

To the extent that information on the matters described in subdivisions (iii)(A) and (B) of this subparagraph is provided in a publication of the Internal Revenue Service relating to individual retirement savings arrangements, such publication may be furnished by the trustee or issuer in lieu of providing information relating to such matters in a disclosure statement.

(C) The financial disclosure required by paragraph (d)(4)(v), (vi), and (vii) of this section.

(iv) In the case of an amendment to the terms of an account, annuity, or endowment contract described in paragraph (d)(4)(i) of this section, the disclosure statement required by this subparagraph need not repeat material contained in the statement furnished pursuant to paragraph (d)(4)(iii) of this section, but it must set forth in nontechnical language those matters described in paragraph (d)(4)(iii) of this section which are affected by such amendment.

(v) With respect to an account, annuity, or endowment contract described in paragraph (d)(4)(i) of this section (other than an account or annuity which is to receive only a rollover contribution described in paragraph (d)(4)(vi) of this section and to which no deductible contributions will be made), the disclosure statement must set forth in cases where either an amount is guaranteed over period of time (such as in the case of a nonparticipating endowment or annuity contract), or a projection of growth of the value of the account, annuity, or endowment contract can reasonably be made (such as in the case of a participating endowment or annuity contract (other than a variable annuity) or passbook savings account), the following:

(A) To the extent that an amount is guaranteed,

(1) The amount, determined without regard to any portion of a contribution which is not deductible, that would be guaranteed to be available to the benefited individual if (i) level annual contributions in the amount of $1,000 were to be made on the first day of each year, and (ii) the benefited individual were to withdraw in a single sum the entire amount of such account, annuity, or endowment contract at the end of each of the first five years during which contributions are to be made, at the end of the year in which the benefited individual attains the ages of 60, 65, and 70, and at the end of any other year during which the increase of the guaranteed available amount is less than the increase of the guaranteed available amount during any preceding year for any reason other than decrease or cessation of contributions, and

(2) A statement that the amount described in subdivision (v)(A)(1) of this subparagraph is guaranteed, and the period for which guaranteed;

(B) To the extent a projection of growth of the value of the account, annuity, or endowment contract can reasonably be made but the amounts are not guaranteed.

(1) The amount, determined without regard to any portion of a contribution which is not deductible, and upon the basis of an earnings rate no greater than, and terms no different from, those currently in effect, that would be available to the benefited individual if (i) level annual contributions in the amount of $1,000 were to be made on the first day of each year, and (ii) the benefited individual were to withdraw in a single sum the entire amount of such account, annuity, or endowment contract at the end of each of the first five years during which contributions are to be made, at the end of each of the years in which the benefited individual attains the ages of 60, 65, and 70, and at the end of any other year during which the increase of the available amount is less than the increase of the available amount during any preceding year for any reason other than decrease or cessation of contributions, and

(2) A statement that the amount described in paragraph (d)(4)(v)(B)(1) of this section is a projection and is not guaranteed and a statement of the earnings rate and terms on the basis of which the projection is made;

(C) The portion of each $1,000 contribution attributable to the cost of life insurance, which would not be deductible, for each year during which contributions are to be made; and

(D) The sales commission (including any commission attributable to the sale of life insurance), if any, to be charged in each year, expressed as a percentage of gross annual contributions (including any portion attributable to the cost of life insurance) to be made for each year.

(vi) With respect to an account or annuity described in paragraph (d)(4)(i) of this section to which a rollover contribution described in section 402(a)(5)(A), 403(a)(4)(A), 408(d)(3)(A) or 409(b)(3)(C) will be made, the disclosure statement must set forth, in cases where an amount is guaranteed over a period of time (such as in the case of a non-participating annuity contract, or a projection of growth of the value of the account or annuity can reasonably be made (such as in the case of a participating annuity contract (other than a variable annuity) or a passbook savings account), the following:

(A) To the extent guaranteed,

(1) The amount that would be guaranteed to be available to the benefited individual if (i) Such a rollover contribution in the amount of $1,000 were to be made on the first day of the year, (ii) No other contribution were to be made, and (iii) The benefited individual were to withdraw in a single sum the entire amount of such account or annuity at the end of each of the first five years after the contribution is made, at the end of the year in which the benefited individual attains the ages of 60, 65, and 70, and at the end of any other year during which the increase of the guaranteed available amount is less than the increase of the guaranteed available amount during any preceding year, and

(2) A statement that the amount described in paragraph (d)(vi)(A)(1) of this section is guaranteed;

(B) To the extent that a projection of growth of the value of the account or annuity can reasonably be made but the amounts are not guaranteed,

(1) The amount, determined upon the basis of an earnings rate no greater than, and terms no different from, those currently in effect, that would be available to the benefited individual if (i) such a rollover contribution in the amount of $1,000 were to be made on the first day of the year, (ii) no other contribution were to be made, and (iii) the benefited individual were to withdraw in a single sum the entire amount of such account or annuity at the end of each of the first five years after the contribution is made, at the end of each of the years in which the benefited individual attains the ages of 60, 65, 70, and at the end of any other year during which the increase of the available amount is less than the increase of the available amount during any preceding year, and

(2) A statement that the amount described in paragraph (d)(4)(vi)(B)(1) of this section is a projection and is not guaranteed and a statement of the earnings rate and terms on the basis of which the projection is made; and

(C) The sales commission, if any, to be charged in each year, expressed as a percentage of the assumed $1,000 contribution.

(vii) With respect to an account, annuity, or endowment contract described in paragraph (d)(4)(i) of this section, in all cases not subject to paragraph (d)(4)(v) or (vi) of this section (such as in the case of a mutual fund or variable annuity), the disclosure statement must set forth information described in subdivisions (A) through (C) of this subdivision (vii) based (as applicable with respect to the type or types of contributions to be received by the account, annuity, or endowment contract) upon the assumption of (1) level annual contributions of $1,000 on the first day of each year, (2) a rollover contribution of $1,000 on the first day of the year and no other contributions, or (3) a rollover contribution of $1,000 on the first day of the year plus level annual contributions of $1,000 on the first day of each year.

(A) A description (in nontechnical language) with respect to the benefited individual's interest in the account, annuity, or endowment contract, of:

(1) Each type of charge, and the amount thereof, which may be made against a contribution,

(2) The method for computing and allocating annual earnings, and

(3) Each charge (other than those described in complying with paragraph (d)(4)(vii)(A)(1) of this section) which may be applied to such interest in determining the net amount of money available to the benefited individual and the method of computing each such charge;

(B) A statement that growth in value of the account, annuity, or endowment contract is neither guaranteed nor projected; and

(C) The portion of each $1,000 contribution attributable to the cost of life insurance, which would not be deductible, for every year during which contributions are to be made.

(viii) A disclosure statement, or an amendment thereto, furnished pursuant to the provisions of this subparagraph may contain information in addition to that required by paragraph (d)(4)(iii) through (vii) of this section. However, such disclosure statement will not be considered to comply with the provisions of this subparagraph if the substance of such additional material or the form in which it is presented causes such disclosure statement to be false or misleading with respect to the information required to be disclosed by this paragraph.

(ix) The provisions of section 6693, relating to failure to provide reports on individual retirement accounts or annuities, shall apply to any trustee or issuer who fails to furnish, or cause to be furnished, a disclosure statement, a copy of the governing instrument, or an amendment to either, as required by this paragraph.

(x) This section shall be effective for disclosure statements and copies of governing instruments mailed, or delivered without mailing, after February 14, 1977.

(xi) This section does not reflect the amendments made by section 1501 of the Tax Reform Act of 1976 (90 Stat. 1734) relating to retirement savings for certain married individuals.

[T.D. 7714, 45 FR 52795, Aug. 8, 1980, 45 FR 56802, Aug. 26, 1980]

§ 1.408–7 Reports on distributions from individual retirement plans.

(a) Requirement of report. The trustee of an individual retirement account or the issuer of an individual retirement annuity who makes a distribution during any calendar year to an individual from such account or under such annuity shall make a report on Form W–2P (in the case of distributions that are not total distributions) or Form 1099R (in the case of total distributions), and their related transmittal forms, for such year. The return must show the name and address of the person to whom the distribution was made, the aggregate amount of such distribution, and such other information as is required by the forms.

(b) Amounts subject to this section. The amounts subject to reporting under paragraph (a) include all amounts distributed or made available to which section 408(d) applies.

(c) Time and place for filing. The report required under this section for any calendar year shall be filed after the close of that year and on or before February 28 of the following year with the appropriate Internal Revenue Service Center.

(d) Statement to recipients. (1) Each trustee or issuer required to file Form 1099R or Form W–2P under this section shall furnish to the person whose identifying number is (or should be) shown on the forms a copy of the form.

(2) Each statement required by this paragraph to be furnished to recipients shall be furnished to such person after November 30 of the year of the distribution and on or before January 31 of the following year.

(e) Effective date. This section is effective for calendar years beginning after December 31, 1977.

[T.D. 7714, 45 FR 52798, Aug. 8, 1980]

§ 1.409–1 Retirement bonds.

(a) In general. Section 409 authorizes the issuance of bonds under the Second Liberty Bond Act the purchase price of which would be deductible under section 219. Section 409 also prescribes the tax treatment of such bonds. See paragraph (b) of this section.

(b) Income tax treatment of bonds—(1) General rule. Except as provided in paragraph (b)(2) of this section, the entire proceeds upon redemption of a retirement bond described in section 409(a) shall be included in the gross income of the taxpayer entitled to such proceeds. If a bond has not been tendered for redemption by the registered owner before the close of the taxable year in which he attains age 70½, he must include in his gross income for such taxable year the amount of the proceeds he would have received if the bond had been redeemed at age 70½. The provisions of sections 72 and 1232 do not apply to a retirement bond.

(2) Exceptions. (i) If a retirement bond is redeemed within 12 months after the issue date, the proceeds are excluded from gross income if no deduction is allowed under section 219 on account of the purchase of such bond. For definition of issue date, see 31 CFR 346.1(c).

(ii) If a retirement bond is redeemed after the close of the taxable year in which the registered

owner attains age 70 ½ the proceeds from the redemption of the bond are excludable from the gross income of the registered owner or his beneficiary to the extent that such proceeds were includible in the gross income of the registered owner for such taxable year.

(iii) If a retirement bond is surrendered for reissuance in the same or lesser face amount, the difference between current redemption value of the bond surrendered for reissuance and the current surrender value of the bond reissued is includible in the gross income of the registered owner.

(3) **Basis.** The basis of a retirement bond is zero.

(c) **Rollover.** The first sentence of paragraph (b)(1) of this section shall not apply in any case in which a retirement bond is redeemed by the registered owner before the close of the taxable year in which he attains the age of 70½ if he transfers the entire amount of the proceeds of such redemption to—

(1) An individual retirement account described in section 408(a) or an individual retirement annuity described in section 408(b) (other than an endowment contract described in § 1.408–3(e)), or

(2) An employees' trust which is described in section 401(a) which is exempt from tax under section 501(a), or an annuity plan described in section 403(a), for the benefit of the registered owner, on or before the 60th day after the day on which he received the proceeds of such redemption. This subparagraph shall not apply in the case of a transfer to a trust or plan described in (c)(2) of this section unless no part of the purchase price of the retirement bond redeemed is attributable to any source other than a rollover contribution from such an employees' trust or annuity plan (other than an annuity plan or employees' trust forming part of a plan under which the individual was an employee within the meaning of section 401(c)(1) at the time contributions were made on his behalf under the plan).

(d) **Additional tax—(1) Early redemption.** Except as provided in paragraph (d)(2) of this section, under section 409(c) if a retirement bond is redeemed by the registered owner before he attains age 59½, his tax under chapter 1 of the Code is increased by an amount equal to 10 percent of the proceeds of the redemption includible in his gross income for the taxable year. Except in the case of the credits allowable under sections 31, 39, or 42, no credit can be used to offset the tax described in the preceding sentence.

(2) **Limitations.** Paragraph (d)(1) of this section shall not apply if—

(i) During the taxable year of the registered owner in which a retirement bond is redeemed, the registered owner becomes disabled within the meaning of section 72(m)(7), or

(ii) A retirement bond is tendered for redemption in accordance with paragraph (b)(2)(i) of this section.

[T.D. 7714, 45 FR 52799, Aug. 8, 1980]

§ 1.410(a)–1 Minimum participation standards; general rules.

(a) **In general.** A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan satisfies—

(1) The minimum age and service requirements of section 410(a)(1) and § 1.410(a)–3,

(2) The maximum age requirements of section 410(a)(2) and § 1.410(a)–4, and

(3) The minimum coverage requirements of section 410(b)(1) and § 1.410(b)–1.

(b) **Organization of regulations relating to minimum participation standards—(1) General rules.** This section prescribes general rules relating to the minimum participation standards provided by section 410.

(2) **Effective dates.** Section 1.410(a)–2 provides rules under section 1017 of the Employee Retirement Income Security Act of 1974 relating to effective dates under section 410.

(3) **Age and service conditions.** Section 1.410(a)–3 provides rules under section 410(a)(1) relating to minimum age and service conditions.

(4) **Maximum age and time of participation.** Section 1.410(a)–4 provides rules under section 410(a)(2) and (4) relating to maximum age and time of participation.

(5) **Year of service; breaks in service.** For rules relating to years of service and breaks in service, see 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans). See § 1.410(a)–5 for rules under section 410(a)(3)(B) relating to seasonal industries and for certain rules under section 410(a)(5) relating to breaks in service.

(6) **Breaks in service.** Section 1.410(a)–6 provides special rules under section 1017(f) of the

Employee Retirement Income Security Act of 1974 relating to amendment of break in service rules.

(7) Elapsed time. Section 1.410(a)–7 provides rules under sections 410 and 411 relating to the elapsed time method of crediting years of service.

(8) Coverage. Section 1.410(b)–1 provides rules relating to the minimum coverage requirements provided by section 410(b)(1).

(9) Church election. Section 1.410(d)–1 provides rules relating to the election by a church to have participation, vesting, funding, etc., provisions apply.

(c) Application of participation standards to certain plans—(1) General rule. Except as provided in subparagraph (2) of this paragraph, section 410 does not apply to—

(i) A governmental plan (within the meaning of section 414(d) and the regulations thereunder),

(ii) A church plan (within the meaning of section 414(e) and the regulations thereunder) which has not made the election provided by section 410(d) and the regulations thereunder,

(iii) A plan which has not provided for employer contributions at any time after September 2, 1974, and

(iv) A plan established and maintained by a society, order, or association described in section 501(c)(8) or (9), if no part of the contributions to or under such plan are made by employers of participants in such plan.

(2) Participation requirements. A plan described in subparagraph (1) of this paragraph shall, for purposes of section 401(a), be treated as meeting the requirements of section 410 if such plan meets the coverage requirements resulting from the application of section 401(a)(3) as in effect on September 1, 1974. Such coverage requirements include the rules in § 1.410(b)–1(d) (special rules relating to minimum coverage requirements), that interpret statutory provisions substantially identical to section 401(a)(3) as in effect on September 1, 1974. In applying the rules of that paragraph (d) to plans described in this paragraph (c) employees whose principal duties consist in supervising the work of other employees shall be treated as officers, shareholders, and highly compensated employees.

(d) Supersession. Sections 11.410(a)–1 through 11.410(d)–1 inclusive, of the Temporary Income Tax Regulation under the Employee Retirement Income Security Act of 1974 are superseded by this section and §§ 1.410(a)–2 through 1.410(d)–1.

[T.D. 7508, 42 FR 47193, Sept. 20, 1977, as amended by T.D. 7703, 45 FR 40980, June 17, 1980; T.D. 7735, 45 FR 74722, Nov. 12, 1980]

§ 1.410(a)–2 Effective dates.

(a) Plans not in existence on January 1, 1974. Under section 1017(a) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was not in existence on January 1, 1974, section 410 and the regulations thereunder apply for plan years beginning after September 2, 1974. See paragraph (c) of this section for time plan considered to be in existence.

(b) Plans in existence on January 1, 1974. Under section 1017(b) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was in existence on January 1, 1974, section 410 and the regulations thereunder apply for plan years beginning after December 31, 1975. See paragraph (c) of this section for time plan considered to be in existence.

(c) Time of plan existence—(1) General rule. For purposes of this section, a plan is considered to be in existence on a particular day if—

(i) The plan on or before that day was reduced to writing and adopted by the employer (including, in the case of a corporate employer, formal approval by the employer's board of directors and, if required, shareholder), even though no amounts had been contributed under the plan as of such day, and

(ii) The plan was not terminated on or before that day.

(2) Collectively bargained plan. Notwithstanding subparagraph (1) of this paragraph, a plan described in section 413(a), relating to a plan maintained pursuant to a collective bargaining agreement, is considered to be in existence on a particular day if—

(i) On or before that day there is a legally enforceable agreement to establish such a plan signed by the employer, and

(ii) The employer contributions to be made to the plan are set forth in the agreement.

(3) Special rule. If a plan is considered to be in existence on January 1, 1974, under subparagraph (1) of this paragraph, any other plan with which such existing plan is merged or consolidated shall also be considered to be in existence on such date.

(d) Certain existing plans may elect new provisions—(1) In general. The plan administrator (as defined in section 414(g)) of a plan that was in existence on January 1, 1974, may elect to have the provisions of the Code relating to participation, vesting, funding, and form of benefit (as in effect from time to time) apply to a plan year selected by the plan administrator which begins after September 2, 1974, but before the otherwise applicable effective dates determined under section 1017(b) or (c), 1021, or 1024 of the Employee Retirement Income Security Act of 1974, and to all subsequent plan years. The provisions referred to are the amendments to the Code made by sections 1011, 1012, 1013, 1015, 1016(a)(1) through (11) and (13) through (27), 1021, and 1022(b) of the Employee Retirement Income Security Act of 1974.

(2) Election is irrevocable. Any election made under this paragraph, once made shall be irrevocable.

(3) Procedure and time for making election. An election under this paragraph shall be made by attaching a statement to either the annual return required under section 6058(a) (or an amended return) with respect to the plan which is filed for the first plan year for which the election is effective or to a written request for a determination letter relating to the qualification of the plan under section 401(a), 403(a), or 405(a) of the Code and, if trusteed, the exempt status under section 501(a) of the Code of a trust constituting a part of the plan. If the election is made with a written request for a determination letter, the election may be conditioned upon issuance of a favorable determination letter and will become irrevocable upon issuance of such letter. The statement shall indicate that the election is made under section 1017(d) of the Employee Retirement Income Security Act of 1974 and the first plan year for which the election is effective.

(e) Examples. The rules of this section are illustrated by the following examples:

Example (1). A plan is adopted on January 2, 1974, effective as of January 1, 1974. The plan is not considered to have been in existence on January 1, 1974.

Example (2). A plan was in existence on January 1, 1974, and was amended on November 1, 1974, to increase benefits. The fact that the plan was amended is not relevant and the amended plan is considered to be in existence on January 1, 1974.

Example (3). (i) A subsidiary business corporation is a member of a controlled group of corporations within the meaning of IRC section 1563(a). On November 1, 1974, the plan of the parent corporation is amended to provide coverage for employees of the subsidiary corporation. This amendment of the parent corporation's plan does not affect the effective date of section 410 with respect to the parent corporation's plan. No distinction is made for this purpose between employees of the parent corporation and employees of the subsidiary corporation.

(ii) If the subsidiary adopted a separate plan on November 1, 1974, under paragraph (a) of this section, section 410 would apply to that plan for its first plan year beginning after September 2, 1974. However, the adoption of a different plan by the subsidiary would not affect the time section 410 applies to the plan of the parent corporation. If, instead of adopting its own separate plan, the subsidiary merely executed an adoption agreement under the terms of the parent plan providing that a subsidiary, upon the execution of an adoption agreement, will become part of the parent plan, the effective date of section 410 with respect to such plan will not be affected by the adoption of the plan by the subsidiary.

[T.D. 7508, 42 FR 47194, Sept. 20, 1977]

§ 1.410(a)–3 Minimum age and service conditions.

(a) General rule. Except as provided by paragraph (b) or (c) of this section, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the plan requires, as a condition of participation in the plan, that an employee complete a period of service with the employer or employers maintaining the plan extending beyond the later of—

(1) Age 25. The date on which the employee attains the age of 25; or

(2) One year of service. The date on which the employee completes 1 year of service.

(b) Special rule for plan with 3-year 100 percent vesting. A plan which provides that after not more than 3 years of service each participant's right to his accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues satisfies the requirements of paragraph (a) of this section if the period of service required by the plan as a condition of participation does not extend beyond the later of—

(1) Age 25. The date on which the employee attains the age of 25; or

(2) Three years of service. The date on which the employee completes 3 years of service.

(c) Special rule for employees of certain educational institutions. A plan maintained exclusively for employees of an educational institution (as defined in section 170(b)(1)(A)(ii)) by an employer exempt from tax under section 501(a) which provides that after 1 year of service each participant's right to his accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder)

at the time such benefit accrues satisfies the requirements of paragraph (a) of this section if the period of service required by the plan as a condition of participation does not extend beyond the later of—

(1) Age 30. The date on which the employee attains the age of 30; or

(2) One year of service. The date on which the employee completes 1 year of service.

(d) Other conditions. Section 410(a), § 1.410(a)–4, and this section relate solely to age and service conditions and do not preclude a plan from establishing conditions, other than conditions relating to age or service, which must be satisfied by plan participants. For example, such provisions would not preclude a qualified plan from requiring, as a condition of participation, that an employee be employed within a specified job classification. See section 410(b) and the regulations thereunder for rules with respect to coverage of employees under qualified plans.

(e) Age and service requirements—(1) General rule. For purposes of applying the rules of this section, plan provisions may be treated as imposing age or service requirements even though the provisions do not specifically refer to age or service. Plan provisions which have the effect of requiring an age or service requirement with the employer or employers maintaining the plan will be treated as if they imposed an age or service requirement. In general, a plan under which an employee cannot participate unless he retires will impose an age and service requirement. However, a plan may provide benefits which supplement benefits provided for employees covered under a pension plan, as defined in section 3(2) of the Employee Retirement Income Security Act of 1974, satisfying the requirements of section 410(a)(1) without violating the age and service rules.

(2) Examples. The rules of this paragraph are illustrated by the following examples:

Example (1). Corporation A is divided into two divisions. In order to work in division 2 an employee must first have been employed in division 1 for 5 years. A plan provision which required division 2 employment for participation will be treated as a service requirement because such a provision has the effect of requiring 5 years of service.

Example (2). Plan B requires as a condition of participation that each employee have had a driver's license for 15 years or more. This provision will be treated as an age requirement because such a provision has the effect of requiring an employee to attain a specified age.

Example (3). A plan which requires 1 year of service as a condition of participation also excludes a part-time or seasonal employee if his customary employment is for not more than 20 hours per week or 5 months in any plan year. The plan does not qualify because the provision could result in the exclusion by reason of a minimum service requirement of an employee who has completed a year of service. The plan would not qualify even though after excluding all such employees, the plan satisfied the coverage requirements of section 410(b).

Example (4). Employer A establishes a plan which covers employees after they retire and does not cover current employees unless they retire. Any employee who works past age 60 is treated as retired. The plan fails to satisfy the requirements of section 410(a) because the plan imposes a minimum age and service requirement in excess of that allowed by this section.

Example (5). Employer B establishes plan X, which provides that employees covered by qualified plan Y will receive benefits supplementing their benefits under plan Y to take into account cost of living increases after retirement. Plan X is not treated as imposing an age of service requirement.

Example (6). Employer C establishes a qualified plan satisfying the minimum age and service requirements. At a later time, entry into the plan is frozen so that employees not covered at that time cannot participate in the plan. The limitation on new participants is not treated as imposing a minimum age and service requirement.

[T.D. 7508, 42 FR 47194, Sept. 20, 1977]

§ 1.410(a)–3T Minimum age and service conditions (temporary).

(a) [Reserved]

(b) Special rule for plan with 2-year 100 percent vesting. A plan which provides that after not more than 2 years of service each participant's right to his or her accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues satisfies the requirements of paragraph (a) of this section if the period of service required by the plan as a condition of participation does not extend beyond the later of—

(1) [Reserved]

(2) Two years of service. The date on which the employee competes 2 years of service. For employees not described in § 1.411(a)-3T(e)(1), which describes employees with one hour of service in any plan year beginning after December 31, 1988, or later in the case of certain collectively bargained plans, the preceding sentence shall be applied by substituting "3 years of service" for "2 years of service".

[T.D. 8170, 53 FR 239, Jan. 6, 1988]

§ 1.410(a)–4 Maximum age conditions and time of participation.

(a) Maximum age conditions—(1) General rule. A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the plan excludes from participation (on the basis of

age) an employee who has attained an age specified by the plan unless—

(i) The plan is a defined benefit plan or a target benefit plan, and

(ii) The employee begins employment with the employer after the employee has attained an age specified by the plan, which age is not more than 5 years before normal retirement age (within the meaning of section 411(a)(8) and § 1.411(a)–7).

For purposes of this paragraph, a target benefit plan is a defined contribution plan under which the amount of employer contributions allocated to each participant is determined under a plan formula which does not allow employer discretion and on the basis of the amount necessary to provide a target benefit specified by the plan for such participant. Such target benefit must be the type of benefit which is provided by a defined benefit plan and the targeted benefit must not discriminate in favor of employees who are officers, shareholders, or highly compensated. For purposes of this paragraph, in the determination of the time an employee begins employment, any such time which is included in a period of service which may be disregarded under the break in service rules need not be taken into account.

(2) **Examples.** The rules provided by this paragraph are illustrated by the following examples:

Example (1). A defined benefit plan provides that an employee will become a participant upon completion of 3 years of service if at such time the employee is less than age 60. The normal retirement age under the plan is age 65. The plan also provides full and immediate vesting for each of the plan's participants. Under the plan, an employee hired at age 58 would be denied participation on account of service for the first 3 years and on account of maximum age for the remaining years even though the employee was hired more than 5 years prior to the normal retirement date. The plan therefore does not satisfy section 410(a)(2).

Example (2). A defined benefit plan provides a normal retirement age of the later of age 65 or completion of 10 years of service. Because no employee could ever be hired within 5 years of his normal retirement age, the plan could not exclude employees for being over a specified age.

Example (3). Prior to the effective date of section 410, a defined benefit plan with a normal retirement age of 65 contained a maximum age 55 requirement for participation. Because of the maximum age requirement, an employee hired at age 58 was excluded from the plan. This employee is age 61 at the time that section 410 first applies to the plan. The employee cannot be excluded from participation because of age. The exclusion under section 410(a)(2) is not applicable in this instance because the employee's age at the time of hire, 58, was not within 5 years of the normal retirement age specified in the plan.

Example (4). Employee A was hired at age 50 and participated in a defined benefit plan until separating from service at age 55 with 5 years of service and with no vested benefit. At age 61, employee A was rehired within 5 years of the normal retirement age of 65 after he incurred 6 consecutive breaks in service. Because A's consecutive number of 1-year breaks (6) exceeds his years of service prior to such breaks (5), his service before the breaks may be disregarded. Consequently, A's initial employment date falling within such period may be disregarded and the plan could exclude A on account of his age because his employment commenced within 5 years of normal retirement age.

(b) **Time of participation—(1) General rule.** A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless under the plan any employee who has satisfied the applicable minimum age and service requirements specified in § 1.410(a)–3, and who is otherwise entitled to participate in the plan, commences participation in the plan no later than the earlier of—

(i) The first day of the first plan year beginning after the date on which such employee first satisfied such requirements, or

(ii) The date 6 months after the date on which he first satisfied such requirements,

unless such employee was separated from service and has not returned before the date referred to in subdivision (i) or (ii), whichever is applicable. If such separated employee returns to service after either of such dates without incurring a 1–year break in service, the employee must commence participation immediately upon his return. In the case of a plan using the elapsed time method described in § 1.410(a)–7, such an employee who has a period of absence commencing before the date referred to in subdivision (i) or (ii) (whichever is applicable) must commence participation as of such applicable date no later than the date such absence ended. However, if an employee's prior service is disregarded on account of the plan's break–in–service rules then, for purposes of this subparagraph, such service is also disregarded for purposes of determining the date on which such employee first satisfied the minimum age and service requirements.

(2) **Examples.** The rules provided by this paragraph are illustrated by the following examples:

Example (1). A calendar year plan provides that an employee may enter the plan only on the first semi-annual entry date, January 1 or July 1, after he has satisfied the applicable minimum age and service requirements specified in section 410(a)(1). The plan satisfies the requirements of this paragraph because an employee is eligible to participate no later than the earlier of (1) the first day of the first plan year beginning after he satisfied the applicable minimum age and service requirements, or (2) the date 6 months after he satisfied such requirements.

Example (2). A plan provides that an employee is not eligible to participate until the first day of the first plan year beginning after he has satisfied the minimum age and service requirements of section 410(a)(1). In this case, an employee

who satisfies the "6 month" rule described in subparagraph (1) of this paragraph will not be eligible to participate in the plan. Therefore, the plan does not satisfy the requirements of this paragraph.

Example (3). A calendar year plan provides that an employee may enter the plan only on the first semi-annual entry date, January 1 or July 1, after he has satisfied the applicable minimum age and service requirements specified in section 410(a)(1). Employee A after 10 years of service separated from service in 1976 with a vested benefit. On February 1, 1990, A returns to employment covered by the plan. Assuming A completes a year of service after his return, A must participate immediately on his return, February 1. A's prior service cannot be disregarded, because he had a vested benefit when he separated from service. Therefore, the plan may not postpone his participation until July 1.

Example (4). Assume the same facts as in example (3). The plan has the break-in-service rule described in section 410(a)(5)(D) and § 1.410(a)–5(c)(4). Employee B, after he had 5 years of service but no vested benefit incurs 5 consecutive 1-year breaks. Because B's prior service can be disregarded, the plan may postpone B's participation in the plan under the rule described in section 410(a)(4) and this paragraph.

[T.D. 7508, 42 FR 47195, Sept. 20, 1977, as amended by T.D. 7703, 45 FR 40980, June 17, 1980]

§ 1.410(a)–5 Year of service; break in service.

(a) Year of service. For the rules relating to years of service under subparagraphs (A), (C), and (D) of section 410(a)(3), see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

Rules relating to a general rule for a year of service, hours of service, and maritime industries apply for purposes of section 410(a) and the regulations thereunder.

(b) Seasonal industries. For rules which relate to seasonal industries under section 410(a)(3)(B), see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefits plans.

(c) Breaks in service—(1) General rule. This paragraph provides rules with respect to breaks in service under section 410(a)(5). Except as provided in subparagraphs (2), (3), (4), and (5) of this paragraph, all of an employee's years of service with the employer or employers maintaining a plan are taken into account in computing his period of service under the plan for purposes of section 410(a)(1) and § 1.410(a)–3.

(2) Employees under 3-year 100 percent vesting schedule—(i) General rule. In the case of an employee who incurs a 1-year break in service under a plan which provides that after not more than 3 years of service, each participant's right to his accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues, the employee's service before the break in service is not required to be taken into account after the break in service in determining the employee's years of service under section 410(a)(1) and § 1.410(a)–3 if such employee has not satisfied such service requirement.

(ii) Example. The rules of this subparagraph are illustrated by the following example.

Example. A qualified plan computing service by the actual counting of hours provides full and immediate vesting. The plan can not require as a condition of participation that an employee complete 3 consecutive years of service with the employer because the requirement as to consecutive years is not permitted under section 410(a)(5). However, such a plan can require 3 years without a break in service, *i.e.*, 3 years with no intervening years in which the employee fails to complete more than 500 hours of service. Under a plan containing such a participation requirement, the following example illustrates when employees would become eligible to participate.

Year	Hours of service completed: Employee A	Employee B	Employee C
1	1,000	1,000	1,000
2	1,000	1,000	500
3	1,000	700	1,000
4	1,000	1,000	700
5	1,000	1,000	1,000
6	1,000	1,000	1,000

Note.—Employee A will have satisfied the plan's service requirement at the end of year 3. Employee B at the end of year 4, and Employee C at the end of year 6.

(3) One-year break in service—(i) In general. In computing the period of service of an employee who has incurred a 1-year break in service, for purposes of section 410(a)(1) and § 1.410(a)–3, a plan may disregard the employee's service before the break until the employee completes a year of service after such break in service.

(ii) Examples. The rules provided by this subparagraph are illustrated by the following examples.

Example (1). Employee A completes a year of service under a plan computing service by the actual counting of hours for the 12-month period ending December 31, 1980, and incurs a 1-year break in service for the 12-month period ending December 31, 1981. The plan does not contain the provisions permitted by section 410(a)(5)(B) (relating to 3-year 100 percent vesting) and section 410(a)(5)(D) (relating to nonvested participants). Thereafter, he does not complete a year of service. As of January 1, 1982, in computing his period of service under the plan his service prior to December 31, 1981, is not required to be taken into account for purposes of section 410(a)(1) and § 1.410(a)–3.

Example (2). The employee in example (1) completes a year of service for the 12-month period ending December 31, 1982. Prior to December 31, 1982, in computing the employee's period of service as of any date occurring in 1982, the employ-

ee's service before December 31, 1981, is not required to be taken into account for purposes of section 410(a)(1) and § 1.410(a)-3. Because the employee completed a year of service for the 12-month period ending December 31, 1982, however, his period of service is redetermined as of January 1, 1982. Upon completion of a year of service for 1982, the employee's period of service, determined as of any date occurring in 1982, includes service prior to December 31, 1981.

(4) Nonvested participants—(i) General rule. In the case of a participant in a plan who does not have any nonforfeitable right under the plan to his employer-derived accrued benefit and who incurs a 1-year break in service, for purposes of section 410(a)(1) and § 1.410(a)-3 the plan may disregard his years of service prior to such break if the number of his consecutive 1-year breaks in service equals or exceeds his aggregate number of years of service prior to such break. In the case of a plan using the elapsed time method described in Department of Labor regulations, the plan may disregard such years of service prior to such break if the period of severance is at least 1 year and the period of severance equals or exceeds the prior period of service, whether or not consecutive, completed before such period of severance. The plan may in computing such aggregate number of years of service prior to such break disregard any years of service which could have been disregarded under this subparagraph by reason of any prior break in service.

(ii) Examples. The rules of this subparagraph are illustrated by the following example:

Example. In 1980, A, who was hired at age 35, separates from the service of X Corporation after completing 4 years of service. At this time A had no vested benefits. In 1985, after incurring 5 consecutive one-year breaks in service, A was reemployed. Under section 410(a)(5)(D), A's 4 years of service may be disregarded because they are exceeded by the number of years of consecutive one-year breaks (5) after such service.

(d) Special continuity rule for certain plans. For special rules for computing years of service in the case of a plan maintained by more than one employer, see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

[T.D. 7508, 42 FR 47196, Sept. 20, 1977; T.D. 7508, 42 FR 57123, Nov. 1, 1977, as amended by T.D. 7703, 45 FR 40980, June 17, 1980]

§ 1.410(a)-6 Amendment of break in service rules; transition period.

(a) In general. Under section 1017(f)(1) of the Employee Retirement Income Security Act of 1974, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the rules of the plan relating to breaks in service are amended, and—

(1) Such amendment is effective after January 1, 1974, and before the date on which section 410 becomes applicable to the plan, and

(2) Under such amendment, any employee's participation in the plan commences at any date later than the later of—

(i) The date on which his participation would commence under the break in service rules of section 410(a)(5), or

(ii) The earliest date on which his participation would commence under the plan as in effect on or after January 1, 1974.

(b) Break in service rules. For purposes of paragraph (a), the term "break in service rules" means the rules provided by a plan relating to circumstances under which a period of an employee's service or plan participation is disregarded for purposes of determining his rights to participate in the plan, if under such rules such service is disregarded by reason of the employee's failure to complete a required period of service within a specified period of time.

[T.D. 7508, 42 FR 47197, Sept. 20, 1977; 43 FR 2721, Jan. 19, 1978]

§ 1.410(a)-7 Elapsed time.

(a) In general—(1) Introduction to elapsed time method of crediting service. (i) 29 CFR 2530.-200b-2 sets forth the general method of crediting service for an employee. The general method is based upon the actual counting of hours of service during the applicable 12-consecutive-month computation period. The equivalencies set forth in 29 CFR 2530.200b-3 are also methods for crediting hours of service during computation periods. Under the general method and the equivalencies an employee receives a year's credit (in units of years of service or years of participation) for a computation period during which the employee is credited with a specified number of hours of service. In general, an employee's statutory entitlement with respect to eligibility to participate, vesting and benefit accrual is determined by totalling the number of years' credit to which an employee is entitled.

(ii) Under the alternative method set forth in this section, by contrast, an employee's statutory entitlement with respect to eligibility to participate, vesting and benefit accrual is not based upon the actual completion of a specified number of hours of service during a 12-consecutive-month

period. Instead, such entitlement is determined generally with reference to the total period of time which elapses while the employee is employed (*i.e.*, while the employment relationship exists) with the employer or employers maintaining the plan. The alternative method set forth in this section is designed to enable a plan to lessen the administrative burdens associated with the maintenance of records of an employee's hours of service by permitting each employee to be credited with his or her total period of service with the employer or employers maintaining the plan, irrespective of the actual hours of service completed in any 12-consecutive-month period.

(2) **Overview of the operation of the elapsed time method.** (i) Under the elapsed time method of crediting service, a plan is generally required to take into account the period of time which elapses while the employee is employed (*i.e.*, while the employment relationship exists) with the employer or employers maintaining the plan, regardless of the actual number of hours he or she completes during such period. Under this alternative method of crediting service, an employee's service is required to be taken into account for purposes of eligibility to participate and vesting as of the date he or she first performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) for the employer or employers maintaining the plan. Service is required to be taken into account for the period of time from the date the employee first performs such an hour of service until the date he or she severs from service with the employer or employers maintaining the plan.

(ii) The date the employee severs from service is the earlier of the date the employee quits, is discharged, retires or dies, or the first anniversary of the date the employee is absent from service for any other reason (*e.g.*, disability, vacation, leave of absence, layoff, etc.). Thus, for example, if an employee quits, the severance from service date is the date the employee quits. On the other hand, if an employee is granted a leave of absence (and if no intervening event occurs), the severance from service date will occur one year after the date the employee was first absent on leave, and this one year of absence is required to be taken into account as service for the employer or employers maintaining the plan. Because the severance from service date occurs on the earlier of two possible dates (*i.e.*, quit, discharge, retirement or death *or* the first anniversary of an absence from service for any other reason), a quit, discharge, retirement or death within the year after the beginning of an absence for any other reason results in an immediate severance from service. Thus, for example, if an employee dies at the end of a four-week absence resulting from illness, the severance from service date is the date of death, rather than the first anniversary date of the first day of absence for illness.

(iii) In addition, for purposes of eligibility to participate and vesting under the elapsed time method of crediting service, an employee who has severed from service by reason of a quit, discharge or retirement may be entitled to have a period of time of 12 months or less taken into account by the employer or employers maintaining the plan if the employee returns to service within a certain period of time and performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1). In general, the period of time during which the employee must return to service begins on the date the employee severs from service as a result of a quit, discharge or retirement and ends on the first anniversary of such date. However, if the employee is absent for any other reason (*e.g.*, layoff) and then quits, is discharged or retires, the period of time during which the employee may return and receive credit begins on the severance from service date and ends one year after the first day of absence (*e.g.*, first day of layoff). As a result of the operation of these rules, a severance from service (*e.g.*, a quit), or an absence (*e.g.*, layoff) followed by a severance from service, never results in a period of time of more than one year being required to be taken into account after an employee severs from service or is absent from service.

(iv) For purposes of benefit accrual under the elapsed time method of crediting service, an employee is entitled to have his or her service taken into account from the date he or she begins to participate in the plan until the severance from service date. Periods of severance under any circumstances are not required to be taken into account. For example, a participant who is discharged on December 14, 1980 and rehired on October 14, 1981 is not required to be credited with the 10 month period of severance for benefit accrual purposes.

(3) **Overview of certain concepts relating to the elapsed time method—(i) In general.** The rules with respect to the elapsed time method of crediting service are based on certain concepts which are defined in paragraph (b) of this section. These concepts are applied in the substantive rules contained in paragraphs (c), (d), (e), (f) and (g) of this section. The purpose of this subparagraph is to summarize these concepts.

(ii) Employment commencement date. (A) A concept which is necessary in order to credit service accurately under any service crediting method is the establishment of a starting point for crediting service. The employment commencement date, which is the date on which an employee first performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) for the employer or employers maintaining the plan, is used to establish the date upon which an employee must begin to receive credit for certain purposes (*e.g.*, eligibility to participate and vesting).

(B) In order to credit accurately an employee's total service with an employer or employers maintaining the plan, a plan also may provide for an "adjusted" employment commencement date (*i.e.*, a recalculation of the employment commencement date to reflect noncreditable periods of severance) or a reemployment commencement date as defined in paragraph (b)(3) of this section. Fundamentally, all three concepts rely upon the performance of an hour of service to provide a starting point for crediting service. One purpose of these three concepts is to enable plans to satisfy the requirements of this section in a variety of ways.

(C) The fundamental rule with respect to these concepts is that any plan provision is permissible so long as it satisfies the minimum standards. Thus, for example, although the rules of this section provide that credit must begin on the employment commencement date, a plan is permitted to "adjust" the employment commencement date to reflect periods of time for which service is not required to be credited. Similarly, a plan may wish to credit service under the elapsed time method as discrete periods of service and provide for a reemployment commencement date. Certain plans may wish to provide for both concepts, although it is not a requirement of this section that plans so provide.

(iii) Severance from service date. Another fundamental concept of the elapsed time method of crediting service is the severance from service date, which is defined as the earlier of the date on which an employee quits, retires, is discharged or dies, or the first anniversary of the first date of absence for any other reason. One purpose of the severance from service date is to provide the endpoint for crediting service under the elapsed time method. As a general proposition, service is credited from the employment commencement date (*i.e.*, the starting point) until the severance from service date (*i.e.*, the endpoint). A complementary purpose of the severance from service date is to establish the starting point for measuring a period of severance from service in order to determine a "break in service" (see paragraph (a)(3)(v) of this section). A third purpose of such date is to establish the starting point for measuring the period of time which may be required to be taken into account under the service spanning rules (see paragraph (a)(3)(vi) of this section).

(iv) Period of service. A third elapsed time concept is the use of the "period of service" rather than the "year of service" in determining service to be taken into account for purposes of eligibility to participate, vesting and benefit accrual. For purposes of eligibility to participate and vesting, the period of service runs from the employment commencement date or reemployment commencement date until the severance from service date. For purposes of benefit accrual, a period of service runs from the date that a participant commences participation under the plan until the severance from service date. Because the endpoint of the period of service is marked by the severance from service date, an employee is credited with the period of time which runs during any absence from service (other than for reason of a quit, retirement, discharge or death) which is 12 months or less. Thus, for example, a three week absence for vacation is taken into account as part of a period of service and does not trigger a severance from service date.

(v) Period of severance. A period of severance begins on the severance from service date and ends when an employee returns to service with the employer or employers maintaining the plan. The purpose of the period of severance is to apply the statutory "break in service" rules to an elapsed time method of crediting service.

(vi) Service spanning. Under the elapsed time method of crediting service, a plan is required to credit periods of service and, under the service spanning rules, certain periods of severance of 12 months or less for purposes of eligibility to participate and vesting. Under the first service spanning rule, if an employee severs from service as a result of quit, discharge or retirement and then returns to service within 12 months, the period of severance is required to be taken into account. Also, a situation may arise in which an employee is absent from service for any reason other than quit, discharge, retirement or death and during the absence a quit, discharge or retirement occurs. The second service spanning rule provides in that set of circumstances that a plan is required to take into account the period of time between the severance from service date (*i.e.*, the date of quit, discharge or retirement) and the first anniversary

of the date on which the employee was first absent, if the employee returns to service on or before such first anniversary date.

(4) Organization and applicability. (i) The substantive rules for crediting service under the elapsed time method with respect to eligibility to participate are contained in paragraph (c), the rules with respect to vesting are contained in subparagraph (d), and the rules with respect to benefit accrual are contained in paragraph (e). The format of the rules is designed to enable a plan to use the elapsed time method of crediting service either for all purposes or for any one or combination of purposes under sections 410 and 411. Thus, for example, a plan may credit service for eligibility to participate purposes by the use of the general method of crediting service set forth in 29 CFR 2530.200b–2 or by the use of any of the equivalencies set forth in 29 CFR 2530.200b–3, while the plan may credit service for vesting and benefit accrual purposes by the use of the elapsed time method of crediting service.

(ii) A plan using the elapsed time method of crediting service for one or more classifications of employees covered under the plan may use the general method of crediting service set forth in 29 CFR 2530.200b–2 or any of the equivalencies set forth in 29 CFR 2530.200b–3 for other classifications of employees, provided that such classifications are reasonable and are consistently applied. Thus, for example, a plan may provide that part-time employees are credited under the general method of crediting service set forth in 29 CFR 2530.200b–2 and full-time employees are credited under the elapsed time method. A classification, however, will not be deemed to be reasonable or consistently applied if such classification is designed with an intent to preclude an employee or employees from attaining his or her statutory entitlement with respect to eligibility to participate, vesting or benefit accrual. For example, a classification applied so that any full-time employee credited with less than 1,000 hours of service during a given 12-consecutive-month period would be considered part-time and subject to the general method of crediting service rather than the elapsed time method would not be reasonable.

(iii) Notwithstanding paragraph (a)(4)(i) and (ii) of this section, the use of the elapsed time method for some purposes or the use of the elapsed time method for some employees may, under certain circumstances, result in discrimination prohibited under section 401(a)(4), even though the use of the elapsed time method for such purposes, and for such employees, is permitted under this section.

(5) More than one employer plans. For special rules for computing years of service in the case of a plan maintained by more than one employer, see 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(b) Definitions—(1) Employment commencement date. For purposes of this section, the term "employment commencement date" shall mean the date on which the employee first performs an hour of service within the meaning of 29 CFR 2530.-200b–2(a)(1) for the employer or employers maintaining the plan.

(2) Severance from service date. For purposes of this section, a "severance from service" shall occur on the earlier of—

(i) The date on which an employee quits, retires, is discharged or dies; or

(ii) The first anniversary of the first date of a period in which an employee remains absent from service (with or without pay) with the employer or employers maintaining the plan for any reason other than a quit, retirement, discharge or death, such as vacation, holiday, sickness, disability, leave of absence or layoff.

(3) Reemployment commencement date. For purposes of this section, the term "reemployment commencement date" shall mean the first date, following a period of severance from service which is not required to be taken into account under the service spanning rules in paragraphs (c)(2)(iii) and (d)(1)(iii) of this section, on which the employee performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) for the employer or employers maintaining the plan.

(4) Participation commencement date. For purposes of this section, the term "participation commencement date" shall mean the date a participant first commences participation under the plan.

(5) Period of severance. For purposes of this section, the term "period of severance" shall mean the period of time commencing on the severance from service date and ending on the date on which the employee again performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) for an employer or employers maintaining the plan.

(6) Period of service—(i) General rule. For purposes of this section, the term "period of ser-

vice" shall mean a period of service commencing on the employee's employment commencement date or reemployment commencement date, whichever is applicable, and ending on the severance from service date.

(ii) **Aggregation rule.** Unless a plan provides in some manner for an "adjusted" employment commencement date or similar method of consolidating periods of service, periods of service shall be aggregated unless such periods may be disregarded under section 410(a)(5) or 411(a)(4).

(iii) **Other federal law.** Nothing in this section shall be construed to alter, amend, modify, invalidate, impair or supersede any law of the United States or any rule or regulation issued under such law. Thus, for example, nothing in this section shall be construed as denying an employee credit for a "period of service" if credit is required by a separate federal law. Furthermore, the nature and extent of such credit shall be determined under such law.

(c) **Eligibility to participate—(1) General rule.** For purposes of section 410(a)(1)(A), a plan generally may not require as a condition of participation in the plan that an employee complete a period of service with the employer or employers maintaining the plan extending beyond the later of—

(i) The date on which the employee attains the age of 25; or

(ii) The date on which the employee completes a one–year period of service. See the regulations under section 410(a) (relating to eligibility to participate).

(2) **Determination of one-year period of service.** (i) For purposes of determining the date on which an employee satisfies the service requirement for initial eligibility to participate under the plan, a plan using the elapsed time method of crediting service shall provide that an employee who completes the 1-year period of service requirement on the first anniversary of his employment commencement date satisfies the minimum service requirement as of such date. In the case of an employee who fails to complete a one-year period of service on the first anniversary of his employment commencement date, a plan which does not contain a provision permitted by section 410(a)(5)(D) (rule of parity) shall provide for the aggregation of periods of service so that a one-year period of service shall be completed as of the date the employee completes 12 months of service (30 days are deemed to be a month in the case of the aggregation of fractional months) or 365 days of service.

(ii) For purposes of section 410(a)(1)(B)(i), a "3-year period of service" shall be deemed to be "3 years of service."

(iii) **Service spanning rules.** In determining a 1-year period of service for purposes of initial eligibility to participate and a period of service for purposes of retention of eligibility to participate, in addition to taking into account an employee's period of service, a plan shall take into account the following periods of severance—

(A) If an employee severs from service by reason of a quit, discharge or retirement and the employee then performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) within 12 months of the severance from service date, the plan is required to take into account the period of severance; and

(B) Notwithstanding paragraph (c)(2)(iii)(A) of this section, if an employee severs from service by reason of a quit, discharge or retirement during an absence from service of 12 months or less for any reason other than a quit, discharge, retirement or death, and then performs an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) within 12 months of the date on which the employee was first absent from service, the plan is required to take into account the period of severance.

(iv) For purposes of determining an employee's retention of eligibility to participate in the plan, a plan shall take into account an employee's entire period of service unless certain periods of service may be disregarded under section 410(a)(5) of the Code.

(v) **Example.** Employee W, age 31, completed 6 months of service and was laid off. After 2 months of layoff, W quit. Five months later, W returned to service. For purposes of eligibility to participate, W was required to be credited with 13 months of service (8 months of service and 5 months of severance). If, on the other hand, W had not returned to service within the first 10 months of severance (*i.e.*, within 12 months after the first day of layoff), W would be required to be credited with only 8 months of service.

(3) **Entry date requirements—(i) General rule.** For purposes of section 410(a)(4), it is necessary for a plan to provide that any employee who has satisfied the minimum age and service requirements, and who is otherwise entitled to participate in the plan, commences participation in the plan no later than the earlier of—

(A) The first day of the first plan year beginning after the date on which such employee satisfied such requirements, or

(B) The date six months after the date on which he satisfied such requirements, unless such employee was separated from service before the date referred to in subdivision (i)(A) or (B), whichever is applicable. See the regulations under section 410(a) (relating to eligibility to participate).

(ii) Separation from service—(A) Definition. For purposes of this section, the term "separated from service" includes a severance from service or an absence from service for any reason other than a quit, discharge, retirement or death, regardless of the duration of such absence. Accordingly, if an employee is laid off for a period of six weeks, the employee shall be deemed to be "separated from service" during such period for purposes of the entry date requirements.

(B) Application. A period of severance which is taken into account under the service spanning rules in paragraph (c)(2)(iii) of this section or an absence of 12 months or less may result in an employee satisfying the plan's minimum service requirement during such period of time. In addition, once an employee satisfies the plan's minimum service requirement, either before or during such period of time, such period of time may contain an entry date applicable to such employee. In the case of an employee whose period of severance is taken into account and such period contains an entry date applicable to the employee, he or she shall be made a participant in the plan (if otherwise eligible) no later than the date on which he or she ended the period of severance. In the case of an employee whose period of absence contains an entry date applicable to such employee, he or she, no later than the date such absence ended, shall be made a participant in the plan (if otherwise eligible) as of the first applicable entry date which occurred during such absence from service.

(iii) Examples. For purposes of the following examples, assume that the plan provides for a minimum age requirement of 25 and a minimum service requirement of one year, and provides for semi-annual entry dates.

(A) Employee A, age 35, worked for 10 months in a job classification covered under the plan, became disabled for nine consecutive months and then returned to service. During the period of absence, A completed a 1-year period of service and passed a semi-annual entry date after satisfying the minimum service requirement. Accordingly, the plan is required to make A a participant no later than his return to service effective as of the applicable entry date.

(B) Employee B, after satisfying the minimum age and service requirements, quit work before the next semi-annual entry date, and then returned to service before incurring a 1-year period of severance, but after such semi-annual entry date. Employee B is entitled to become a participant immediately upon his return to service effective as of the date of his return.

(4) Break in service. For purposes of applying the break in service rules under section 410(a)(5)(B) and (C), the term "1-year period of severance" shall be substituted for the term "1-year break in service". A 1-year period of severance shall be determined on the basis of a 12-consecutive-month period beginning on the severance from service date and ending on the first anniversary of such date, provided that the employee during such 12-consecutive-month period does not perform an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) for the employer or employers maintaining the plan.

(5) One-year hold-out—(i) General rule. (A) For purposes of section 410(a)(5)(C), in determining the period of service of an employee who has incurred a 1-year period of severance, a plan may disregard the employee's period of service before such period of severance until the employee completes a 1-year period of service after such period of severance.

(B) Example. Assume that a plan provides for a minimum service requirement of 1-year and provides for semi-annual entry dates, but does not contain the provisions permitted by section 410(a)(5)(D) (relating to the rule of parity). Employee G, age 40, completed a seven-month period of service, quit and then returned to service 15 months later, thereby incurring a 1-year period of severance. After working four months, G was laid off for nine months and then returned to work again. Although the plan may hold employee G out from participation in the plan until the completion of a 1-year period of service after the 1-year (or greater) period of severance, once the 1-year hold-out is completed, the plan is required to provide the employee with such statutory entitlement as arose during the 1-year hold-out. Accordingly, employee G satisfied the 1-year hold-out requirement as of the eighth month of layoff, and G is entitled to become a participant in the plan immediately upon his return to service after the nine-month layoff effective as of the first appli-

cable entry date occurring after the date on which he satisfied the 1-year of service requirement (*i.e.*, the first applicable entry date after the first month of layoff). See the regulations under section 410(a) (relating to eligibility to participate).

(6) Rule of parity—(i) General rule. For purposes of section 410(a)(5)(D), in the case of a participant who does not have any nonforfeitable right under the plan to his accrued benefit derived from employer contributions and who incurs a 1-year period of severance, a plan, in determining an employee's period of service for purposes of section 410(a)(1), may disregard his period of service if his latest period of severance equals or exceeds his prior periods of service, whether or not consecutive, completed before such period of severance. See the regulations under section 410(a) (relating to eligibility to participate).

(ii) In determining whether a completely nonvested employee's service may be disregarded under the rule of parity, a plan is not permitted to apply the rule until the employee incurs a 1-year period of severance. Accordingly, a plan may not disregard a period of service of less than one year until an employee has incurred a period of severance of at least one year.

(iii) **Example.** Assume that a plan provides for a minimum service requirement of one year and provides for the rule of parity. An employee works for three months, quits and then is rehired 10 months later. Such employee is entitled to receive 13 months of credit for purposes of eligibility to participate and vesting (see the service spanning rules). Although the period of severance exceeded the period of service, the three months of service may not be disregarded because no 1-year period of severance occurred.

(d) Vesting—(1) General rule. (i) For purposes of section 411(a)(2), relating to vesting in accrued benefits derived from employer contributions, a plan which determines service to be taken in account on the basis of elapsed time shall provide that an employee is credited with a number of years of service equal to at least the number of whole years of the employee's period of service, whether or not such periods of service were completed consecutively.

(ii) In order to determine the number of whole years of an employee's period of service, a plan shall provide that non-successive periods of service must be aggregated and that less than whole year periods of service (whether or not consecutive) must be aggregated on the basis that 12 months of service (30 days are deemed to be a month in the case of the aggregation of fractional months) or 365 days of service equal a whole year of service.

(iii) **Service spanning rules.** In determining a participant's period of service for vesting purposes, a plan shall take into account the following periods of severance—

(A) If an employee severs from service by reason of a quit, discharge or retirement and the employee then performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) within 12 months of the severance from service date, the plan is required to take into account the period of severance; and

(B) Notwithstanding paragraph (d)(1)(iii)(A) of this section, if an employee severs from service by reason of a quit, discharge or retirement during an absence from service of 12 months or less for any reason other than a quit, discharge, retirement or death, and then performs an hour of service within the meaning of 29 CFR 2530.200b-2(a)(1) within 12 months of the date on which the employee was first absent from service, the plan is required to take into account the period of severance.

(iv) For purposes of determining an employee's nonforfeitable percentage of accrued benefits derived from employer contributions, a plan, after calculating an employee's period of service in the manner prescribed in this paragraph, may disregard any remaining less than whole year, 12-month or 365-day period of service. Thus, for example, if a plan provides for the statutory five to fifteen year graded vesting, an employee with a period (or periods) of service which yield 5 whole year periods of service and an additional 321-day period of service is twenty-five percent vested in his or her employer-derived accrued benefits (based solely on the 5 whole year periods of service).

(2) Service which may be disregarded. (i) For purposes of section 411(a)(4), in determining the nonforfeitable percentage of an employee's right to his or her accrued benefits derived from employer contributions, all of an employee's period or periods of service with an employer or employers maintaining the plan shall be taken into account unless such service may be disregarded under paragraph (d)(2)(ii) of this section.

(ii) For purposes of paragraph (d)(2)(i) of this section, the following periods of service may be disregarded—

(A) The period of service completed by an employee before the date on which he attains age 22;

(B) In the case of a plan which requires mandatory employee contributions, the period of service which falls within the period of time to which a particular employee contribution relates, if the employee had the opportunity to make a contribution for such period of time and failed to do so;

(C) The period of service during any period for which the employer did not maintain the plan or a predecessor plan;

(D) The period of service which is not required to be taken into account by reason of a period of severance which constitutes a break in service within the meaning of paragraph (d)(4) of this section;

(E) The period of service completed by an employee prior to January 1, 1971, unless the employee completes a period of service of at least 3 years at any time after December 31, 1970; and

(F) The period of service completed before the first plan year for which this section applies to the plan, if such service would have been disregarded under the plan rules relating to breaks in service in effect at that time. See the regulations under section 411(a) (relating to vesting).

(3) Seasonal industry. [Reserved.]

(4) Break in service. For purposes of applying the break in service rules, the term "1-year period of severance" shall be substituted for the term "1-year break in service". A 1-year period of severance shall be a 12-consecutive-month period beginning on the severance from service date and ending on the first anniversary of such date, provided that the employee during such 12-consecutive-month period fails to perform an hour of service within the meaning of 29 CFR 2530.200b–2(a)(1) for an employer or employers maintaining the plan.

(5) One-year hold-out. For purposes of section 411(a)(6)(B), in determining the nonforfeitable percentage of the right to accrued benefits derived from employer contributions of an employee who has incurred a 1-year period of severance, the period of service completed before such period of severance is not required to be taken into account until the employee has completed a 1-year period of service after his return to service. See the regulations under section 411(a) (relating to vesting).

(6) Vesting in pre-break accruals. For purposes of section 411(a)(6)(C), a "1-year period of severance" shall be deemed to constitute a "1-year break in service." See the regulations under section 411(a) (relating to vesting).

(7) Rule of parity—(i) General rule. For purposes of section 411(a)(6)(D), in the case of an employee who is a nonvested participant in employer-derived benefits at the time he incurs a 1-year period of severance, the period of service completed by such participant before such period of severance is not required to be taken into account for purposes of determining the vested percentage of his or her right to employer-derived benefits if at such time the consecutive period of severance equals or exceeds his prior periods of service, whether or not consecutive, completed before such period of severance. See the regulations under section 411(a) (relating to vesting).

(e) Benefit accrual. (1) For purposes of section 411(b), a plan may provide that a participant's service with an employer or employers maintaining the plan shall be determined on the basis of the participant's total period of service beginning on the participation commencement date and ending on the severance from service date.

(2) Under section 411(b)(3)(A), a defined benefit pension plan may determine an employee's service for purposes of benefit accrual on any basis which is reasonable and consistent and which takes into account all service during the employee's participation in the plan which is included in a period of service required to be taken into account under section 410(a)(5) (relating to service which must be taken into account for purposes of determining an employee's eligibility to participate). A plan which provides for the determination of an employee's service with an employer or employers maintaining the plan on the basis permitted under paragraph (e)(1) of this section will be deemed to meet the requirements of section 411(b)(3)(A), provided that the plan meets the requirements of 29 CFR 2530.204–3, relating to plans which determine an employee's service for purposes of benefit accrual on a basis other than computation periods. Specifically, under 29 CFR 2530.204–3, it must be possible to prove that, despite the fact that benefit accrual under such a plan is not based on computation periods, the plan's provisions meet at least one of the three benefit accrual rules of section 411(b)(1) under all circumstances. Further, 29 CFR 2530.204–3 prohibits such a plan from disregarding service under section 411(b)(3)(C) (which would otherwise permit a plan to disregard service performed by an employee during a computation period in which the employee is credited with less than 1,000 hours). See the regulations under section 411(b) (relating to benefit accrual).

(f) Transfers between methods of crediting service—(1) Single plan. A plan may provide that an employee's service for purposes of eligibility to participate, vesting or benefit accrual shall be determined on the basis of computation periods under the general method set forth in 29 CFR 2530.200b–2 for certain classes of employees but under the alternative method permitted under this section for other classes of employees if the plan provides as follows—

(i) In the case of an employee who transfers from a class of employees whose service is determined on the basis of computation periods to a class of employees whose service is determined on the alternative basis permitted under this section, the employee shall receive credit for a period of service consisting of—

(A) A number of years equal to the number of years of service credited to the employee before the computation period during which the transfer occurs; and

(B) The greater of (1) the period of service that would be credited to the employee under the elapsed time method for his service during the entire computation period in which the transfer occurs or (2) the service taken into account under the computation periods method as of the date of the transfer.

In addition, the employee shall receive credit for service subsequent to the transfer commencing on the day after the last day of the computation period in which the transfer occurs.

(ii) In the case of an employee who transfers from a class of employees whose service is determined on the alternative basis permitted under this section to a class of employees whose service is determined on the basis of computation periods—

(A) The employee shall receive credit, as of the date of the transfer, for a number of years of service equal to the number of 1-year periods of service credited to the employee as of the date of the transfer, and

(B) The employee shall receive credit, in the computation period which includes the date of the transfer, for a number of hours of service determined by applying one of the equivalencies set forth in 29 CFR 2530.200b–3(e)(1) to any fractional part of a year credited to the employee under this section as of the date of the transfer. Such equivalency shall be set forth in the plan and shall apply to all similarly situated employees.

(2) More than one plan. In the case of an employee who transfers from a plan using either the general method of determining service on the basis of computation periods set forth in 29 CFR 2530.200b–2 or the method of determining service permitted under this section to a plan using the other method of determining service, all service required to be credited under the plan to which the employee transfers shall be determined by applying the rules of paragraph (f)(1) of this section.

(g) Amendments to change method of crediting service. A plan may be amended to change the method of crediting service for any purpose or for any class of employees between the general method set forth in 29 CFR 2530.200–2 and the method permitted under this section, if such amendment contains provisions under which each employee with respect to whom the method of crediting service is changed is treated in the same manner as an employee who transfers from one class of employees to another under paragraph (f)(1) of this section.

(h) Transitional rule. For plans in existence on [insert the date of the publication of this document], the provisions of paragraph (f) of this section are effective for plan years beginning after December 31, 1983.

[T.D. 7703, 45 FR 40980, June 17, 1980]

§ 1.410(a)–8 Five consecutive 1-year breaks in service, transitional rules under the Retirement Equity Act of 1984.

Sections 410(a)(5)(D) and 411(a)(6)(D), as amended by the Retirement Equity Act of 1984 (REA 1984), permit a plan to disregard years of service that were disregarded under the plan provisions satisfying those sections (as in effect on August 22, 1984) as of the day before the REA amendments apply to the plan. Under section 302(a) of REA 1984, the new break-in-service rules generally apply to plan years beginning after December 31, 1984. Thus, for example, assume a plan has a calendar plan year and disregarded years of service as permitted by sections 410(a)(5)(D) and 411(a)(6)(D) as in effect on August 22, 1984. An employee completed two years of service in 1981 and 1982, and then incurred two consecutive 1-year breaks in service in 1983 and 1984. The plans may disregard the prior years of service even though the employee did not incur five consecutive 1-year breaks in service. On the other hand, assume the employee completed three consecutive years of service beginning in 1980, and incurred two 1-year breaks in service in 1983 and 1984. Because, as of December 31, 1984, the

years of service credited before 1983 could not be disregarded, whether the plan may subsequently disregard those years of service would be governed by the rules enacted by REA 1984.

[T.D. 8219, 53 FR 31851, Aug. 22, 1988]

§ 1.410(a)–9 Maternity and paternity absence.

(a) Elapsed time—(1) Rule. For purposes of applying the rules of § 1.410(a)-7 (relating to the elapsed time method of crediting service) to absences described in sections 410(a)(5)(E) and 411(a)(6)(E) (relating to maternity or paternity absence), the severance from service date of an employee who is absent from service beyond the first anniversary of the first day of absence by reason of a maternity or paternity absence described in section 410(a)(5)(i)(E) or 411(a)(6)(i)(E) is the second anniversary of the first day of such absence. The period between the first and second anniversaries of the first day of absence from work is neither a period of service nor a period of severance. This rule applies to maternity and paternity absences beginning on or after the first day of the first plan year in which the plan is required to credit service under sections 410(a)(5)(E) and 411(a)(6)(E).

(2) Example. The rules of this section are illustrated by the following example:

Assume an individual works until June 30, 1986; is first absent from employment on July 1, 1986, on account of maternity or paternity absence; and on July 1, 1989, performs an hour of service. The period of service must include the period from employment commencement date until June 30, 1987 (one year after the date of separation for any reason other than a quit, discharge, retirement, or death). The period from July 1, 1987, to June 30, 1988, is neither a period of service nor a period of severance. The period of severance would be from July 1, 1988, to June 30, 1989.

(b) Other methods. This paragraph provides a safe harbor for plans that compute years of service under the hours of service methods or permitted equivalencies. Such a plan will be treated as satisfying the requirements of sections 410(a)(5)(E) and 411(a)(6)(E) if the plan increases the minimum period of consecutive 1-year breaks required to disregard any service (or deprive any employee of any right) by one. Thus, a plan will satisfy sections 410(a)(5)(E) and 411(a)(6)(E) without having to compute service for maternity or paternity and sections 410(a)(5)(D) and 411 (a)(4)(D) and (a)(6)(C), by increasing the period of consecutive breaks in service from 5 to 6.

[T.D. 8219, 53 FR 31852, Aug. 22, 1988]

§ 1.410(a)–8T Year of service; break in service (temporary).

(a) [Reserved]

(b) [Reserved]

(c) **Breaks in service—**

(1) [Reserved]

(2) Employees under 2-year 100 percent vesting schedule—(i) General rule. In the case of an employee who incurs a 1-year break in service under a plan which provides that after not more than 2 years of service each participant's right to his accrued benefit under the plan is completely nonforfeitable (within the meaning of section 411 and the regulations thereunder) at the time such benefit accrues, the employee's service before the break in service is not required to be taken into account after the break in service in determining the employee's years of service under section 410(a)(1) and § 1.410(a)-3 if such employee has not satisfied such service requirement.

(ii) Example. The rules of this subparagraph are illustrated by the following example:

Example. A qualified plan computing service by the actual counting of hours provides full and immediate vesting. The plan can not require as a condition of participation that an employee complete 2 consecutive years of service with the employer because the requirement as to consecutive years is not permitted under section 410(a)(5). However, such a plan can require 2 years without a break in service, i.e., 2 years with no intervening years in which the employee fails to complete more than 500 hours of service. Under a plan containing such a participation requirement, the following example illustrates when employees would become eligible to participate.

Year	Hours of service completed		
	Employee A	Employee B	Employee C
1	1,000	1,000	1,000
2	1,000	700	500
3	1,000	1,000	1,000
4	1,000	1,000	700
5	1,000	1,000	1,000

Note.—Employee A will have satisfied the plan's service requirement at the end of year 2, Employee B at the end of year 3, and Employee C at the end of year 5.

(3) One-year break in service—

(i) [Reserved]

(ii) Examples. The rules provided by this subparagraph are illustrated by the following examples:

Example (1). Employee A completes a year of service under a plan computing service by the actual counting of hours for the 12-month period ending December 31, 1989, and incurs a 1-year break in service for the 12-month period ending December 31, 1990. The plan does not contain the provisions

permitted by section 410(a)(5)(B) (relating to 2-year 100 percent vesting) and section 410(a)(5)(D) (relating to nonvested participants). Thereafter, he does not complete a year of service. As of January 1, 1991, in computing his period of service under the plan his service prior to December 31, 1990, is not required to be taken into account for purposes of section 410(a)(1) and § 1.410(a)-3.

Example (2). [Reserved]

[T.D. 8170, 53 FR 239, Jan. 6, 1988]

§ 1.410(a)–9T Elapsed time (temporary).

(a) [Reserved]

(b) [Reserved]

(c) **Eligibility to participate—**

(1) [Reserved]

(2) **Determination of one-year period of service.**

(i) [Reserved]

(ii) For purposes of section 410(a)(1)(B)(i), a "2-year period of service" shall be deemed to be "2 years of service."

(d) **Vesting—(1) General rule.**

(i) [Reserved]

(ii) [Reserved]

(iii) [Reserved]

(iv) For purposes of determining an employee's nonforfeitable percentage of accrued benefits derived from employer contributions, a plan, after calculating an employee's period of service in the manner prescribed in this paragraph, may disregard any remaining less than whole year, 12-month or 365-day period of service. Thus, for example, if a plan provides for the statutory three to seven year graded vesting, an employee with a period (or periods) of service which yields 3 whole year periods of service and an additional 321-day period of service is twenty percent vested in his or her employer-derived accrued benefits (based solely on the 3 whole year periods of service).

(2) [Reserved]

[T.D. 8170, 53 FR 239, Jan. 6, 1988]

§ 1.410(b)–1 Minimum coverage requirements.

(a) **In general.** A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan satisfies the requirements of section 410(b)(1). A plan satisfies the requirements of section 410(b)(1) if it satisfies the requirements of paragraph (9)(1) or (2) of this section. This section does not apply in the case of a plan which provides contributions or benefits for any individual who is an owner-employee (as defined in section 401(c)(3) and the regulations thereunder).

(b) **Coverage tests—(1) Percentage test.** A plan satisfies the requirements of this subparagraph if it benefits—

(i) Seventy percent or more of all employees, or

(ii) Eighty percent or more of all employees who are eligible to benefit under the plan if 70 percent or more of all the employees are eligible to benefit under the plan,

excluding in each case employees who have not satisfied the minimum age and service requirements (if any) prescribed by the plan, as of the date coverage is tested, as a condition of participation and employees permitted to be excluded under paragraph (c) of this section. The percentage requirements of this subparagraph refer to a percentage of active employees, including employees temporarily on leave, such as those in the Armed Forces of the United States, if such employees are eligible under the plan.

(2) **Classification test.** A plan satisfies the requirements of section 410(b)(1) and this subparagraph if it benefits such employees as qualify under a classification of employees set up by the employer, which classification is found by the Internal Revenue Service not to be discriminatory in favor of employees who are officers, shareholders, or highly compensated. For purposes of this subparagraph, except as provided by paragraph (c) of this section, all active employees (including employees who do not satisfy the minimum age or service requirements of the plan) are taken into account.

(c) **Exclusion of certain employees.** Under section 410(b)(2), for purposes of section 410(b)(1) and paragraph (b) of this section, there shall be excluded from consideration employees described in subparagraphs (1), (2), and (3) of this paragraph.

(1) **Bargaining unit.** Under section 410(b)(2)(A) and this paragraph, there may be excluded from consideration employees not included in the plan who are included in a unit of employees covered by an agreement which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers, if the Internal Revenue Service finds that retirement benefits were the subject of good faith bargaining between such employee representatives and such employer or

employers. For purposes of determining whether such bargaining occurred, it is not material that such employees are not covered by another plan or that the plan was not considered in such bargaining.

(2) Air pilots. Under section 410(b)(2)(B) and this paragraph there may be excluded from consideration, in the case of a plan established or maintained pursuant to an agreement which the Secretary of Labor finds to be a collective bargaining agreement between air pilots represented in accordance with title II of the Railway Labor Act and one or more employers all employees not covered by such agreement. Section 410(b)(2)(B) and this subparagraph do not apply to a plan if the plan provides contributions or benefits for employees whose principal duties are not customarily performed aboard aircraft in flight.

(3) Nonresident aliens. Under section 410(b)(2)(C) and this paragraph, there may be excluded from consideration employees who are nonresident aliens and who receive no earned income (within the meaning of section 911(b) and the regulations thereunder) from the employer which constitutes income from sources within the United States (within the meaning of section 861(a)(3) and the regulations thereunder).

(d) Special rules—(1) Highly compensated. The classification of an employee as highly compensated for purposes of section 410(b)(1)(B) and § 1.410(b)-1(b)(2) is made on the basis of the facts and circumstances of each case, taking into account the level of the employee's compensation and the level of compensation paid by the employer to other employees, whether or not covered by the plan. Average compensation levels determined on a local, regional, or national basis, are not relevant for this purpose. Further, the classification of an employee as highly compensated is not made solely on the basis of the number or percentage of employees whose compensation exceeds, or is exceeded by, the employee's.

(2) Discrimination. The determination as to whether a plan discriminates in favor of employees who are officers, shareholders, or highly compensated is made on the basis of the facts and circumstances of each case, allowing a reasonable difference between the ratio of such employees benefited by the plan to all such employees of the employer and the ratio of the employees (other than officers, shareholders, or highly compensated) of the employer benefited by the plan to all employees (other than officers, shareholders, or highly compensated). A showing that a specified percentage of employees covered by a plan are not officers, shareholders, or highly compensated, is not in itself sufficient to establish that the plan does not discriminate in favor of employees who are officers, shareholders, or highly compensated.

(3) Multiple plans. (i) An employer may designate two or more plans as constituting a single plan which is intended to qualify for purposes of section 410(b)(1) and this section, in which case all plans so designated shall be considered as a single plan in determining whether the requirements of such section are satisfied by each of the separate plans. A determination that the combination of plans so designated does not satisfy such requirements does not preclude a determination that one or more of such plans, considered separately, satisfies such requirements.

(ii) Notwithstanding subdivision (i) of this subparagraph, a plan which is subject to the limitations of section 401(a)(17) of the Code or section 301(d)(3) of the Tax Reduction Act of 1975 cannot be considered with any other plan which covers any employee covered by such plan.

(4) Profit-sharing plans. Employees under a profit-sharing plan who receive the amounts allocated to their accounts before the expiration of a period of time or the occurrence of a contingency specified in the plan shall not be considered covered by the plan. Thus, in case a plan permits employees to receive immediately the amounts allocated to their accounts, or to have such amounts paid to a profit-sharing plan for them, the employees who receive the shares immediately shall not be considered covered by the plan.

(5) Certain classifications. See section 401(a)(5) and the regulations thereunder for rules relating to classifications of employees which are not considered to be discriminatory per se for purposes of section 410(b)(1)(B) and § 1.410(b)-1(b)(2).

(6) Integration with Social Security Act. See section 401(a)(5) and the regulations thereunder for rules relating to integration of plans with the Social Security Act.

(7) Different age and service requirements—(i) Application. The rules of this subparagraph (7) apply to a plan which must satisfy the minimum age and service requirements of section 410(a)(1)(A) in order to be a qualified plan. Accordingly, the rules are inapplicable to plans described in section 410(c)(1) (see § 1.410(a)-1(c)(1)); plans satisfying the alternative minimum age and service requirements of

section 410(a)(1)(B) but not satisfying the requirements of section 410(a)(1)(A); and plans which provide contributions or benefits for employees, some or all of whom are owner-employees (see section 401(a)(10)).

(ii) **General rules.** A provision for different age and service requirements for present and future employees either upon establishment or subsequent amendment is not, of itself, discriminatory under section 410(b)(1)(B) even though present employees who are officers, shareholders, or highly compensated cannot meet the age and service requirements for future employees at the time the plan is established or amended and even though present participants who are officers, shareholders, or highly compensated would not have satisfied the age and service requirements for future employees at the time they became participants in the plan. Furthermore, prohibited discrimination will be deemed not to arise in operation, solely because of such different requirements, when future employees are added to the employer's work force.

(8) **Certain controlled groups.** In applying the percentage test and classification test described in paragraph (b)(1) and (2) of this section for a year, all the employees of corporations or trades and businesses whose employees are treated as employed by a single employer by reason of section 414(b) or (c) must be taken into account. The preceding sentence shall apply for a plan year if, on 1 day in each quarter of such plan year, such corporations are members of a controlled group of corporations (within the meaning of section 414(b)) of such trades or businesses are under common control (within the meaning of section 414(c)).

(9) **Transitional rule.** In the case of a cash and deferred profit-sharing plan, in existence on June 27, 1974, the requirements of paragraph (b)(2) of this section are satisfied if over one-half of the participants in the plan are among the lowest paid two-thirds of all eligible employees. This subparagraph shall not apply after December 31, 1977.

(e) **Example.** The rules provided by this section are illustrated by the following example:

Example. An employer established a non-contributory defined benefit plan covering all employees of its ABC Division who are hired prior to age 60 and who are at least 25 years old. The normal retirement age under the plan is age 65. The employer has 100 employees including 20 employees who are under age 25 and 10 employees who were hired over age 60. The plan does not cover 15 employees who are over age 25 and were hired before age 60 because they are not in the ABC Division. Of these 15 excluded employees, 3 have less than 1 year of service. In addition, 12 of the 55 employees covered have less than one year of service. The plan can be shown not to satisfy the requirements of IRC section 410(b)(1)(A) as follows:

(i) Number of employees	100
(ii) Number of employees excluded on account of minimum age and service	20
(iii) (i)–(ii)	80
(iv) Number of employees who must be covered if plan is to satisfy IRC section 410(b)(1)(A), 70% of (iii)	56
(v) Number of employees actually covered	55

Because the number of employees covered is less than the number of employees who must be covered, the plan does not satisfy the percentage coverage requirements of IRC section 410(b)(1)(A).

[T.D. 7508, 42 FR 47197, Sept. 20, 1977, as amended by T.D. 7735, 45 FR 74722, Nov. 12, 1980]

§ 1.410(d)–1 Election by church to have participation, vesting, funding, etc., provisions apply.

(a) **In general.** If a church or convention or association of churches which maintains any church plan, as defined in section 414(e), makes an election under this section, certain provisions of the Code and Title I of the Employee Retirement Income Security Act of 1974 (the "Act") shall apply to such church plan as if such plan were not a church plan. The provisions of the Code referred to are section 410 (relating to minimum participation standards), section 411 (relating to minimum vesting standards), section 412 (relating to minimum funding standards), section 4975 (relating to prohibited transactions), and paragraphs (11), (12), (13), (14), (15), and (19) of section 401(a) (relating to joint and survivor annuities, mergers and consolidations, assignment or alienation of benefits, time of benefit commencement, certain social security increases, and withdrawals of employee contributions, respectively).

(b) **Election is irrevocable.** An election under this section with respect to any church plan shall be binding with respect to such plan and, once made, shall be irrevocable.

(c) **Procedure for making election—(1) Time of election.** An election under this section may be made for plan years for which the provisions of section 410(d) of the Code apply to the church plan. By reason of section 1017(b) of the Act section 410(d) does not apply to a plan in existence on January 1, 1974, for plan years beginning before January 1, 1976. Section 1017(d) of the Act permits a plan administrator to elect to have certain provisions of the Code (including section 410(d)) apply to a plan before the otherwise applicable effective dates of such provisions. See § 1.410(a)–2(d). Therefore, for a plan in exist-

ence on January 1, 1974, an election under section 410(d) of the Code may be made for a plan year beginning before January 1, 1976, only if an election has been made under section 1017(d) of the Act with respect to that plan year.

(2) By whom election is to be made. The election provided by this section may be made only by the plan administrator of the church plan.

(3) Manner of making election. The plan administrator may elect to have the provisions of the Code described in paragraph (a) of this section apply to the church plan as it is were not a church plan by attaching the statement described in subparagraph (5) of this paragraph to either (i) the annual return required under section 6058(a) (or an amended return) with respect to the plan which is filed for the first plan year for which the election is effective or (ii) a written request for a determination letter relating to the qualification of the plan under section 401(a), 403(a), or 405(a) of the Code and if trusteed, the exempt status under section 501(a) of the Code of a trust constituting a part of the plan.

(4) Conditional election. If an election is made with a written request for a determination letter, the election may be conditioned upon issuance of a favorable determination letter and will become irrevocable upon issuance of such letter.

(5) Statement. The statement described in subparagraph (3) of this paragraph shall indicate (i) that the election is made under section 410(d) of the Code and (ii) the first plan year for which it is effective.

[T.D. 7508, 42 FR 47198, Sept. 20, 1977]

§ 1.411(a)–1 Minimum vesting standards; general rules.

(a) In general. A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless—

(1) The plan provides that an employee's right to his normal retirement benefit (see § 1.411(a)–7(c)) is nonforfeitable (see § 1.411(a)–4) upon and after the attainment of normal retirement age (see § 1.411(a)–7(b)),

(2) The plan provides that an employee's rights in his accrued benefit derived from his own contributions (see § 1.411(c)–1) are nonforfeitable at all times, and

(3) The plan satisfies the requirements of—

(A) Section 411(a)(2) and § 1.411(a)–3 (relating to vesting in accrued benefit derived from employer contributions), and

(B) In the case of a defined benefit plan, section 411(b)(1) and § 1.411(b)–1 (relating to accrued benefit).

(b) Organization of regulations relating to minimum vesting standards—(1) General rules. This section prescribes general rules relating to the minimum vesting standards provided by section 411.

(2) Effective dates. Section 1.411(a)–2 provides rules under section 1017 of the Employee Retirement Income Security Act of 1974 relating to effective dates under section 411.

(3) Employer contributions. Section 1.411(a)–3 provides rules under section 411(a)(2) relating to vesting in employer-derived accrued benefits.

(4) Certain forfeitures. Section 1.411(a)–4 provides rules under section 411(a)(3) relating to certain permitted forfeitures, suspensions, etc. under qualified plans.

(5) Nonforfeitable percentage. Section 1.411(a)–5 provides rules under section 411(a)(4) relating to service included in the determination of an employee's nonforfeitable percentage under section 411(a)(2) and § 1.411(a)–3.

(6) Years of service; break in service. Section 1.411(a)–6 provides rules under section 411(a)(5) and (6) of the Internal Revenue Code of 1954 relating to years of service and breaks in service. Rules prescribed by the Secretary of Labor, relating to years of service and breaks in service under part 2 of subtitle B of title I of the Employee Retirement Income Security Act of 1974 are provided under 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(7) Definitions and special rules. Section 1.411(a)–7 provides definitions and special rules under section 411(a)(7), (8), and (9), for purposes of section 411 and the regulations thereunder.

(8) Changes in vesting schedule. Section 1.411(a)–8 provides rules under section 411(a)(10) relating to changes in the vesting schedule of a plan.

(9) Breaks in service. Section 1.411(a)–9 provides special rules relating to breaks in service.

(10) Accrued benefits. See § 1.411(b)–1 for rules under section 411(b) relating to accrued benefit requirements under defined benefit plans.

(11) Allocation of accrued benefits. See § 1.411(c)–1 for rules under section 411(c) relating to allocation of accrued benefits between employer and employee contributions.

(12) Discrimination, etc. See § 1.411(d)–1 for rules relating to the coordination of section 411 with section 401(a)(4) (relating to discrimination) and other rules under section 411(d).

(c) Application of standards to certain plans—(1) General rule. Except as provided in subparagraph (2) of this paragraph, section 411 does not apply to—

(i) A governmental plan (within the meaning of section 414(d) and the regulations thereunder),

(ii) A church plan (within the meaning of section 414(e) and the regulations thereunder) which has not made the election provided by section 410(d) and the regulations thereunder,

(iii) A plan which has not provided for employer contributions at any time after September 2, 1974, and

(iv) A plan established and maintained by a society, order, or association described in section 501(c)(8) or (9), if no part of the contributions to or under such plan are made by employers of participants in such plan.

(2) Vesting requirements. A plan described in subparagraph (1) of this paragraph shall, for purposes of section 401(a), be treated as meeting the requirements of section 411 if such plan meets the vesting requirements resulting from the application of section 401(a)(4) and section 401(a)(7) as in effect on September 1, 1974.

(d) Supersession. Sections 11.411(a)–1 through 11.411(d)–3, inclusive, of the Temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 are superseded by this section and §§ 1.411(a)–2 through 1.411(d)–3.
[T.D. 7501, 42 FR 42324, Aug. 23, 1977]

§ 1.411(a)–2 Effective dates.

(a) Plan not in existence on January 1, 1974. Under section 1017(a) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was not in existence on January 1, 1974, section 411 and the regulations thereunder apply for plan years beginning after September 2, 1974. See paragraph (c) of this section for time plan is considered in existence.

(b) Plans in existence on January 1, 1974. Under section 1017(b) of the Employee Retirement Income Security Act of 1974, in the case of a plan which was in existence on January 1, 1974, section 411 and the regulations thereunder apply for plan years beginning after December 31, 1975. See paragraph (c) of this section for time plan is considered to be in existence.

(c) Time of plan existence—(1) General rule. For purposes of this section, a plan is considered to be in existence on a particular day if—

(i) The plan on or before that day was reduced to writing and adopted by the employer (including, in the case of a corporate employer, formal approval by the employer's board of directors and, if required, shareholders), even though no amounts had been contributed under the plan as of such day, and

(ii) The plan was not terminated on or before that day.

For example, if a plan was adopted on January 2, 1974, effective as of January 1, 1974, the plan is not considered to have been in existence on January 1, 1974, because it was not both adopted and in writing on January 1, 1974.

(2) Collectively-bargained plan. Notwithstanding paragraph (c)(1) of this section, a plan described in section 413(a), relating to a plan maintained pursuant to a collective-bargaining agreement, is considered to be in existence on a particular day if—

(i) On or before that day there is a legally enforceable agreement to establish such a plan signed by the employer, and

(ii) The employer contributions to be made to the plan are set forth in the agreement.

(3) Special rule. If a plan is considered to be in existence under subparagraph (1) of this paragraph, any other plan with which such existing plan is merged or consolidated shall also be considered to be in existence on such date.

(d) Existing plans under collective-bargaining agreements. For a special effective date rule for certain plans maintained pursuant to a collective bargaining agreement, see section 1017(c)(1) of the Employee Retirement Income Security Act of 1974 (88 Stat. 932).

(e) Certain existing plans may elect new provisions. The plan administrator may elect to have the provisions of the Code relating to participation, vesting, funding, and form of benefit apply to a selected plan year. See § 1.410(a)–2(d) for rules relating to such an election.

(f) Application of rules. The requirements of section 411 do not apply to employees who separate from service with the employer prior to the first plan year to which such requirements apply and who never return to service with the employer in a plan year to which section 411 applies.

[T.D. 7501, 42 FR 42325, Aug. 23, 1977]

§ 1.411(a)–3 Vesting in employer-derived benefits.

(a) In general—(1) Alternative requirements. A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan satisfies the requirements of section 411(a)(2) and this section. A plan satisfies the requirements of this section if is satisfies the requirements of paragraph (b), (c), or (d) of this section.

(2) Composite arrangements. A plan will not be considered to satisfy the requirements of paragraph (b), (c), or (d) of this section unless it satisfies all requirements of a particular one of such paragraphs with respect to all of an employee's years of service. A plan which, for example, satisfies the requirements of paragraph (b) (but not (c) or (d)) for an employee's first 9 years of service and satisfies the requirements of paragraph (c) (but not (b)) for all of his remaining years of service, does not satisfy the requirements of this section. A plan is not precluded from satisfying the requirement of one such paragraph with respect to one group of employees and another such paragraph with respect to another group provided that the groups are not so structured as to evade the requirements of this paragraph. For example, if plan A provides that employees who commence participation before age 30 are subject to the "rule of 45" vesting schedule and employees who commence participation after age 30 are subject to the full vesting after 10 years schedule, plan A would be so structured as to evade the requirements of this paragraph.

(3) Plan amendments. A plan which satisfies the requirements of a particular one of such paragraphs for each of an employee's years of service and which is amended so that, as amended, it satisfies the requirements of another such paragraph for all such years of service, satisfies the requirements of this section even though, as amended, it does not satisfy the requirements of the paragraph which were satisfied prior to the amendment. See § 1.411(a)–8 for rules relating to employee election where the vesting schedule is amended.

(b) 10-year vesting. A plan satisfies the requirements of section 411(a)(2)(A) and this paragraph if an employee who has completed 10 years of service has a nonforfeitable right to 100 percent of his accrued benefit derived from employer contributions.

(c) 5- to 15-year vesting. A plan satisfies the requirements of section 411(a)(2)(B) and this paragraph if an employee who has completed at least 5 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contribution which percentage is not less than the nonforfeitable percentage determined under the following table:

Completed years of service	Nonforfeitable percentage
5	25
6	30
7	35
8	40
9	45
10	50
11	60
12	70
13	80
14	90
15 or more	100

(d) Rule of 45. A plan satisfies the requirements of section 411(a)(2)(C) and this paragraph if an employee is entitled to the greater of the two percentages determined under paragraph (d)(1) or (2) of this section.

(1) Age and service test. An employee who is not separated from the service, who has completed at least 5 years of service, and with respect to whom the sum of his age and years of service equals or exceeds 45, has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions which is not less than the nonforfeitable percentage corresponding to his number of completed years of service to the sum of his age and completed years of service (whichever percentage is the lesser) determined under the following table:

Completed years of service	Sum of age and service	Nonforfeitable percentage
5	45 or 46	50
6	47 or 48	60
7	49 or 50	70
8	51 or 52	80
9	53 or 54	90
10 or more	55 or more	100

(2) Service test. An employee who has completed at least 10 years of service has a nonforfeitable right to a percentage of his accrued benefit

derived from employer contributions determined under the following table:

Completed years of service	Nonforfeitable percentage
10	50
11	60
12	70
13	80
14	90
15	100

(3) Computation of age. For purposes of subparagraph (1) of this paragraph, the age of an employee is his age on his last birthday.

(e) Examples. The rules provided by this section are illustrated by the following examples:

Example (1). Plan B provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable as follows:

Completed years of service	Nonforfeitable percentage
2 or less	0
3	30
4	35
5	40
6	45
7	50
8	55
9	60
10	65
11	70
12	75
13	80
14	85
15	100

Plan B does not satisfy the requirements of paragraph (c) of this section (relating to 5–15-year vesting) because the nonforfeitable percentage provided by the plan after completion of 14 years of service (85 percent) is less than the percentage required by paragraph (c) of this section at that time (90 percent). The fact that the nonforfeitable percentage provided by the plan for years prior to the 13th year of service is greater than the percentage required under paragraph (c) of this section is immaterial. The plan fails to satisfy the requirements of paragraph (c) of this section even if it is demonstrated that the value of the vesting provided by the plan to the employee is at least equal to the value of the vesting rate required by that paragraph.

Example (2). Plan C provides for plan participation after the completion of 1 year of service. The plan provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable after 10 years of plan participation rather than service. The plan does not satisfy the requirements of paragraph (b) of this section because, under the plan, an employee obtains a 100 percent nonforfeitable right to his employer-derived accrued benefit only after completion of more than 10 years of service.

Example (3). Plan D provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable in accordance with the following schedule:

Completed years of service	Nonforfeitable percentage
0–9	0
10	50
11	60
12	70
13	80
14	90
15	100

The plan does not satisfy the requirements of paragraph (b) of this section after the 9th year of service. It does not satisfy the requirements of paragraph (c) of this section for years prior to the 10th year of service. It does not satisfy the requirements of paragraph (d)(1) of this section for any year of service prior to the 10th year. The plan does not satisfy the requirements of this section because it does not satisfy the requirements of a particular one of the three paragraphs for each of an employee's years of service.

Example (4). Plan G provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable upon completion of 5 years of service. The plan satisfies the requirements of paragraphs (b), (c), and (d) of this section and, because it satisfies the requirements of at least one of such paragraphs for all of an employee's years of service, it satisfies the requirements of this section.

[T.D. 7501, 42 FR 42325, Aug. 23, 1977]

§ 1.411(a)-3T Vesting in employer-derived benefits (temporary).

(a) In general.

(1) [Reserved]

(2) Composite arrangements. A plan will not be considered to satisfy the requirements of paragraph (b), (c), or (d) of this section unless it satisfies all requirements of a particular one of such paragraphs with respect to all of an employee's years of service. A plan which, for example, satisfies the requirements of paragraph (b) (but not (c) or (d)) for an employee's first 4 years of service and satisfies the requirements of paragraph (c) (but not (b)) for all of his remaining years of service does not satisfy the requirements of this section. A plan is not precluded from satisfying the requirements of one such paragraph with respect to one group of employees and another such paragraph with respect to another group provided that the groups are not so structured as to evade the requirements of this paragraph.

(3) [Reserved]

(b) 5-year vesting. A plan satisfies the requirements of section 411(a)(2)(A) and this paragraph if an employee who has completed 5 years of service has a nonforfeitable right to 100 percent of his or her accrued benefits derived from employer contributions.

(c) 3- to 7-year vesting. A plan satisfies the requirements of section 411(a)(2)(B) and this paragraph if an employee who has completed at least 3 years of service has a nonforfeitable right to a percentage of his accrued benefit derived from employer contributions, which percentage is not less than the nonforfeitable percentage determined under the following table:

Completed years of service	Nonforfeitable percentage
3	20
4	40
5	60
6	80
7 or more	100

(d) Multiemployer plans. A plan satisfies the requirements of section 411(a)(2)(C) and this paragraph if—

(1) The plan is a multiemployer plan (within the meaning of section 414(f)), and

(2) Under the plan—

(i) An employee who is covered pursuant to a collective bargaining agreement described in section 414(f)(1)(B) has a nonforfeitable right to 100 percent of the employee's accrued benefit derived from employer contributions not later than upon completion of 10 years of service, and

(ii) The requirements of paragraph (b) or (c) of this section are met with respect to employees who are not covered pursuant to a collective bargaining agreement described in section 414(f)(1)(B).

(iii) For purposes of this provision, an employee is not covered pursuant to a collective bargaining agreement unless the employee is represented by a bona fide employee representative that is a party to the collective bargaining agreement pursuant to which the multiemployer plan is maintained. Thus, for example, an employee of either the multiemployer plan or the employee representative is not covered pursuant to the collective bargaining agreement under which the plan is maintained even if the employee is covered pursuant to an agreement entered into by the multiemployer plan or employee representative on behalf of the employee and even if all such employees covered under the plan constitute only a de minimis percentage of the total employees covered under the plan.

(e) Effective date. (1) The provisions of this section apply to all employees who have one hour of service in any plan year beginning after—

(i) December 31, 1988, or

(ii) In the case of a plan maintained pursuant to one or more collective bargaining agreements between employee representatives and one or more employers ratified before March 1, 1986, for employees covered by any such agreement, the earlier of—

(A) The later of—

(1) January 1, 1989, or

(2) The date on which the last of such collective bargaining agreements terminates (determined without regard to any extension thereof after February 28, 1986), or

(B) January 1, 1991.

(2) For employees not described in paragraph (e)(1), above, the regulations in effect prior to January 1, 1989, shall be applied to determine the requirements of this section.

(f) Examples. The rules provided by this section are illustrated by the following examples:

Example (1). Plan B provides that each employee's rights to his employer-derived accrued benefit are nonforfeitable as follows:

Completed years of service	Nonforfeitable percentage
1	0
2	10
3	25
4	45
5	65
6	75
7	100

Plan B does not satisfy the requirements of paragraph (c) of this section (relating to 3- to 7-year vesting) because the nonforfeitable percentage provided by the plan after completion of 6 years of service (75 percent) is less than the percentage required by paragraph (c) of this section at that time (80 percent). The fact that the nonforfeitable percentage provided by the plan for years prior to the 6th year of service is greater than the percentage required under paragraph (c) of this section is immaterial. The plan fails to satisfy the requirements of paragraph (c) of this section even if it is demonstrated that the value of the vesting provided by the plan to the employees is at least equal to the value of the vesting rate required by this paragraph.

Example (2). Plan C provides for plan participation after the completion of 1 year of service. The plan provides that each employee's rights to his employer-derived accrued benefits are 100 percent nonforfeitable after 5 years of plan participation rather than service. The plan does not satisfy the requirements of paragraph (b) of this section because, under the plan, an employee obtains a 100 percent nonforfeitable right to his or her employer-derived accrued benefit only after completion of more than 5 years of service.

Example (3). Plan D provides that each employee's rights to his employer-derived accrued benefits are nonforfeitable in accordance with the following schedule:

Completed years of service	Nonforfeitable percentage
0 to 4	0
5	60
6	80
7	100

The plan does not satisfy the requirements of paragraph (b) of this section after the 4th year of service. It does not satisfy the requirements of paragraph (c) of this section for years prior to the 5th year of service. The plan does not satisfy the requirements of this section because it does not satisfy the requirements of a particular one of the two paragraphs for each of an employee's years of service.

Example (4). Plan G provides that each employee's rights to his employer-derived accrued benefit are 100 percent nonforfeitable upon completion of 3 years of service. The plan satisfies the requirements of paragraphs (b) and (c) of this section and, because it satisfies the requirements of at least one of such paragraphs for all of an employee's years of service, it satisfies the requirements of this section.

[T.D. 8170, 53 FR 240, Jan. 6, 1988]

§ 1.411(a)-4 Forfeitures, suspensions, etc.

(a) Nonforfeitability. Certain rights in an accrued benefit must be nonforfeitable to satisfy the requirements of section 411(a). This section defines the term "nonforfeitable" for purposes of these requirements. For purposes of section 411 and the regulations thereunder, a right to an accrued benefit is considered to be nonforfeitable at a particular time if, at that time and thereafter, it is an unconditional right. Except as provided by paragraph (b) of this section, a right which, at a particular time, is conditioned under the plan upon a subsequent event, subsequent performance, or subsequent forbearance which will cause the loss of such right is a forfeitable right at that time. Certain adjustments to plan benefits such as adjustments in excess of reasonable actuarial reductions, can result in rights being forfeitable. Rights which are conditioned upon a sufficiency of plan assets in the event of a termination or partial termination are considered to be forfeitable because of such condition. However, a plan does not violate the nonforfeitability requirements merely because in the event of a termination an employee does not have any recourse toward satisfaction of his nonforfeitable benefits from other than the plan assets or the Pension Benefit Guaranty Corporation. Furthermore, nonforfeitable rights are not considered to be forfeitable by reason of the fact that they may be reduced to take into account benefits which are provided under the Social Security Act or under any other Federal or State law and which are taken into account in determining plan benefits. To the extent that rights are not required to be nonforfeitable to satisfy the minimum vesting standards, or the nondiscrimination requirements of section 401(a)(4), they may be forfeited without regard to the limitations on forfeitability required by this section. The right of an employee to repurchase his accrued benefit for example under section 411(a)(3)(D), is an example of a right which is required to satisfy such standards. Accordingly, such a right is subject to the limitations on forfeitability. Rights which are required to be prospectively nonforfeitable under the vesting standards are nonforfeitable and may not be forfeited until it is determined that such rights are, in fact, in excess of the vesting standards. Thus, employees have a right to vest in the accrued benefits if they continue in employment of employers maintaining the plan unless a forfeitable event recognized by section 411 occurs. For example, if a plan covered employees in Division A of Corporation X under a plan utilizing a 10-year 100 percent vesting schedule, the plan could not forfeit employees' rights on account of their moving to service in Division B of Corporation X prior to completion of 10 years of service even though employees are not vested at that time.

(b) Special rules. For purposes of paragraph (a) of this section a right is not treated as forfeitable—

(1) Death—(i) General rule. In the case of a participant's right to his employer-derived accrued benefit, merely because such accrued benefit is forfeitable by the participant to the extent it has not been paid or distributed to him prior to his death. This subparagraph shall not apply to a benefit which must be paid to a survivor in order to satisfy the requirements of section 401(a)(11).

(ii) Employee contributions. A participant's right in his accrued benefit derived from his own contributions must be nonforfeitable at all times. Such a right is not treated as forfeitable merely because, after commencement of annuity or pension payments in a benefit form provided under the plan, the participant dies without receiving payments equal in amount to his nonforfeitable accrued benefit derived from his contributions determined at the time of commencement.

(2) Suspension of benefits upon reemployment of retiree. In the case of certain suspensions of benefits under section 411(a)(3)(B), see regulations

prescribed by the Secretary of Labor under 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(3) Retroactive plan amendment. In the case of a participant's right to his employer-derived accrued benefit, merely because such benefit is subject to reduction to the extent provided by a plan amendment described in section 412(c)(8) and the regulations thereunder, which amendment is given retroactive effect in accordance with such section.

(4) Other forfeiture rules—(i) Withdrawal of mandatory contributions. For rules allowing forfeitures on account of the withdrawal of mandatory contributions, see § 1.411(a)–7(d)(2) and (3).

(ii) Class year plans. For forfeiture rules pertaining to class year plans, see § 1.411(d)–3(b).

(iii) Additional requirements. For additional requirements relating to nonforfeitability of benefits in the event of a withdrawal by the employee, see section 401(a)(19) and § 1.401(a)–19.

(5) Multiemployer plan. In the case of a multiemployer plan described in section 414(f), merely because an employee's accrued benefit which results from service with an employer before such employer was required to contribute to the plan is forfeitable on account of the cessation of contributions by the employer of the employee. This subparagraph shall not apply to an employee's accrued benefit with respect to an employer which accrued under a plan maintained by that employer prior to the adoption by that employer of the multiemployer plan.

(6) Lost beneficiary; escheat. In the case of a benefit which is payable, merely because the benefit is forfeitable on account of the inability to find the participant or beneficiary to whom payment is due, provided that the plan provides for reinstatement of the benefit if a claim is made by the participant or beneficiary for the forfeited benefit. In addition, a benefit which is lost by reason of escheat under applicable state law is not treated as a forfeiture.

(c) Examples. The rules of this section are illustrated by the following examples:

Example (1). Corporation A's plan provides that an employee is fully vested in his employer-derived accrued benefit after completion of 5 years of service. The plan also provides that, if an employee works for a competitor he forfeits his rights in the plan. Such provision could result in the forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and therefore the plan would not satisfy the requirements of section 411. If the plan limited the forfeiture to employees who completed less than 10 years of service, the plan would not fail to satisfy the requirements of section 411 because the forfeitures under this provision are limited to rights which are in excess of the minimum required to be nonforfeitable under section 411(a)(2)(A).

Example (2). Plan B provides that if an employee does not apply for benefits within 5 years after the attainment of normal retirement age, the employee loses his plan benefits. Such a plan provision could result in forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and, therefore, the plan would not satisfy the requirements of section 411.

[T.D. 7501, 42 FR 42326, Aug. 23, 1977]

§ 1.411(a)–4T Forfeitures, suspensions, etc. (temporary).

(a) Nonforfeitability. Certain rights in an accrued benefit must be nonforfeitable to satisfy the requirements of section 411(a). This section defines the term "nonforfeitable" for purposes of these requirements. For purposes of section 411 and the regulations thereunder, a right to an accrued benefit is considered to be nonforfeitable at a particular time if, at that time and thereafter, it is an unconditional right. Except as provided by paragraph (b) of this section, a right which, at a particular time, is conditioned under the plan upon a subsequent event, subsequent performance, or subsequent forbearance which will cause the loss of such right is a forfeitable right at that time. Certain adjustments to plan benefits, such as adjustments in excess of reasonable actuarial reductions, can result in rights being forfeitable. Rights which are conditioned upon a sufficiency of plan assets in the event of a termination or partial termination are considered to be forfeitable because of such condition. However, a plan does not violate the nonforfeitability requirements merely because in the event of a termination an employee does not have any recourse toward satisfaction of his nonforfeitable benefits from other than the plan assets, the Pension Benefit Guaranty Corporation, or a trust established and maintained pursuant to sections 4041(c)(3)(B) (ii) or (iii) and section 4049 of ERISA with respect to the plan. Furthermore, nonforfeitable rights are not considered to be forfeitable by reason of the fact that they may be reduced as allowed under sections 401(a)(5) and 401(*l*). To the extent that rights are not required to be nonforfeitable to satisfy the minimum vesting standards, or the nondiscrimination requirements of section 401(a)(4), they may be forfeited without regard to the limitations on forfeitability required by this section. The right of an employee to repurchase his accrued benefit for example under section 411(a)(3)(D), is an example of a right which is required to satisfy such standards. Accordingly, such a right is subject to the

limitations on forfeitability. Rights which are required to be prospectively nonforfeitable under the vesting standards are nonforfeitable and may not be forfeited until it is determined that such rights are, in fact, in excess of the vesting standards. Thus, employees have a right to vest in the accrued benefits if they continue in employment of employers maintaining the plan unless a forfeitable event recognized by section 411 occurs. For example, if a plan covered employees in Division A of Corporation X under a plan utilizing a 5-year 100 percent vesting schedule, the plan could not forfeit employees' rights on account of their moving to service in Division B of Corporation X prior to completion of 5 years of service even though employees are not vested at that time.

(b) [Reserved]

(c) **Examples.** The rules of this section are illustrated by the following examples:

Example (1). Corporation A's plan provides that an employee is fully vested in his employer-derived accrued benefit after completion of 3 years of service. The plan also provides that if the employee works for a competitor he forfeits his rights in the plan. Such provision could result in the forfeiture of an employee's rights which are required to be nonforfeitable under section 411 and therefore the plan would not satisfy the requirements of section 411. If the plan limited the forfeiture to employees who completed less than 5 years of service, the plan would not fail to satisfy the requirements of section 411 because the forfeitures under this provision are limited to rights which are in excess of the minimum required to be nonforfeitable under section 411(a)(2)(A).

Example (2). [Reserved]

[T.D. 8170, 53 FR 241, Jan. 6, 1988]

§ 1.411(a)-5 Service included in determination of nonforfeitable percentage.

(a) **In general.** Under section 411(a)(4), for purposes of determining the nonforfeitable percentage of an employee's right to his employer-derived accrued benefit under section 411(a)(2) and § 1.411(a)-3, all of an employee's years of service with an employer or employers maintaining the plan shall be taken into account except that years of service described in paragraph (b) of this section may be disregarded.

(b) **Certain service.** For purposes of paragraph (a) of this section, the following years of service may be disregarded:

(1) **Service before age 22.** (i) In the case of a plan which satisfies the requirements of section 411(a)(2)(A) or (B) (relating to 10-year vesting and 5-15-year vesting, respectively), a year of service completed by an employee before he attains age 22.

(ii) In the case of a plan which does not satisfy the requirements of section 411(a)(2)(A) or (B), a year of service completed by an employee before he attains age 22 if the employee is not a participant (for purposes of section 410) in the plan at any time during such year.

(iii) For purposes of this subparagraph in the case of a plan utilizing computation periods, service during a computation period described in section 411(a)(5)(A) within which the employee attains age 22 may not be disregarded. In the case of a plan utilizing the elapsed time method described in § 1.410(a)-7, service on or after the date on which the employee attains age 22 may not be disregarded.

(2) **Contributory plans.** In the case of a plan utilizing computation periods, a year of service completed by an employee under a plan which requires mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)-1(c)(4)) to be made by the employee for such year, if the employee does not participate for such year solely because of his failure to make all mandatory contributions to the plan for such year. If the employee contributes any part of the mandatory contributions for the year, such year may not be excluded by reason of this subparagraph. In the case of a plan utilizing the elapsed time method described in § 1.410(a)-7, the service which may be disregarded is the period with respect to which the mandatory contribution is not made.

(3) **Plan not maintained**—(i) **In general.** An employee's years of service with an employer during any period for which the employer did not maintain the plan or a predecessor plan may be disregarded for purposes of section 411(a)(2). Paragraph (b)(3)(ii) of this section provides rules regarding the period prior to the adoption of a plan. Paragraph (b)(3)(iii) of this section provides rules regarding the period after the termination of a plan. Paragraph (b)(3)(iv) of this section provides rules regarding employers who have certain relationships with other employers maintaining the plan.

(ii) **Period prior to adoption.** The period for which a plan is not maintained by an employer includes the period before the plan was established. For purposes of this subdivision, a plan is established on the first day of the plan year in which the plan is adopted even though the plan is adopted after such first day. Except as provided in paragraph (b)(3)(iv) of this section if an employer adopts a plan which has previously been established by another employer or group of employers,

the plan is not maintained by the adopting employer prior to the first day of the plan year in which the plan is adopted by the adopting employer. In the case of a transfer of assets or liabilities (including a merger or consolidation) involving two plans maintained by a single employer, the successor (or transferee) plan is treated as if it was established at the same time as the date of the establishment of the earliest component plan. In the case of a plan merger, consolidation, or transfer of plan assets or liabilities involving plans of two or more employers, the successor plan is treated as if it were established on each of the separate dates on which such component plan was established for the employees of each employer. Thus, for example, if employer A establishes a plan January 1, 1970, and employer B establishes a plan January 1, 1980, and the plans were subsequently merged, then the merged plan would be treated as if it were in existence on January 1, 1970, with respect to A's employees and as if it were in existence on January 1, 1980, with respect to B's employees.

(iii) Period after termination or withdrawal. The period for which a plan is not maintained by an employer includes the period after the plan is terminated. For purposes of this section, a plan is terminated at the date there is a termination of the plan within the meaning of section 411(d)(3)(A) and the regulations thereunder. Notwithstanding the preceding sentence, if contributions to or under a plan are made after termination, the plan is treated as being maintained until such contributions cease, whether or not accruals are made after such termination. If, after termination of a plan in circumstances under which the employer may be liable to the Pension Benefit Guaranty Corporation under section 4062 of the Act, employer contributions are made to or under the plan to fund benefits accrued at the time of termination, such contributions shall, for purposes of this paragraph, be deemed to be payments in satisfaction of employer liability to such Corporation rather than contributions to or under the plan. In the case of a plan maintained by more than one employer, the period for which the plan is not maintained by the withdrawing employer includes the period after the withdrawal from the plan.

(iv) Certain employers. For purposes of this subparagraph—

(A) Predecessor employers. Service with a predecessor employer who maintained the plan of the current employer is treated as service with such current employer (see section 414(a)(1) and the regulations thereunder), and certain service with a predecessor employer who did not maintain the plan of the current employer is treated as service with the current employer (see section 414(a)(2) and the regulations thereunder).

(B) Related employers. Service with an employer is treated as service for certain related employers for the period during which the employers are related. These related employers include members of a controlled group of corporations (within the meaning of section 1563(a), determined without regard to subsections (a)(4) and (e)(3)(C) thereof) and trades or businesses (whether or not incorporated) which are under common control (see section 414(b) and (c) and 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefits plans).

(C) Plan maintained by more than one employer. Service with an employer who maintains a plan is treated as service for each other employer who maintains that plan for the period during which the employers are maintaining the plan (see section 413(b)(4) and (c)(3) and 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans).

(v) Predecessor plan—(A) General rule. In the case of an employee who was covered by a predecessor plan, the time the successor of such plan is maintained for such employee includes the time the predecessor plan was maintained if, as of the later of the time the predecessor plan is terminated or the successor plan is established, the employee's years of service under the predecessor plan are not equalled or exceeded by the aggregate number of consecutive 1-year breaks in service occurring after such years of service. Years of service and breaks in service, without regard to whether the employee has nonforfeitable rights under the predecessor plan, are determined under section 411(a)(5) and (6) except that years between the termination date of the predecessor plan and the date of establishment of the successor plan do not count as years of service.

(B) Definition of predecessor plan. For purposes of this section, if—

(*1*) An employer establishes a retirement plan (within the meaning of section 7476(d)) qualified under subchapter D of chapter 1 of the Code within the 5-year period immediately preceding or following the date another such plan terminates, and

(2) The other plan is terminated during a plan year to which this section applies.

The terminated plan is a predecessor plan with respect to such other plan.

(C) *Example.* The rules provided by this subparagraph are illustrated by the following example:

Example. (1) Employer X's qualified plan A terminated on January 1, 1977, Employer X established qualified plan B on January 1, 1981. Under paragraph (b)(3)(v)(B) of this section, plan A is a predecessor plan with respect to plan B because plan B is established within the 5-year period immediately following the date plan A terminated.

(2) Employee C was not covered by the A plan. Under the general rule in subdivision (v)(A) of this subparagraph, plan B is not maintained until January 1, 1981, with respect to Employee C.

(3) Employee D was covered by the A plan. On December 31, 1976, D had 4 years of service. D had 4 consecutive 1-year breaks in service because, during the years between the termination of plan A and the establishment of plan B, he did not have more than 500 hours of service in any applicable computation period. Because D's consecutive 1-year breaks (4) equal his years of service prior to his breaks (4), plan B is not maintained until January 1, 1981, with respect to employee D.

(4) Employee E was covered by the A plan. On December 31, 1975, E had 6 years of service. E had a 1-year break in service in 1976. E also had 4 consecutive 1-year breaks in service for the period between plan A's termination and plan B's establishment. Because E's years of service (6) are not less than his consecutive 1-year breaks (5), plan B is maintained for E as of the establishment date of plan A.

(4) **Break in service.** A year of service which is not required to be taken into account by reason of a break in service (within the meaning of section 411(a)(6) and § 1.411(a)–6)).

(5) **Service before January 1, 1971.** A year of service completed by an employee prior to January 1, 1971, unless the employee completes at least 3 years of service at any time after December 31, 1970. For purposes of determining if an employee completes 3 years of service, whether or not consecutive, the exceptions of section 411(a)(4) are not applicable. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(6) **Service before effective date.** A year of service completed before the first plan year for which this section applies to the plan, if such service would have been disregarded under the plan rules relating to breaks in service (whether or not such rules are so designated in the plan) as such rules were in effect from time to time under the plan. For this purpose, plan rules which result in the loss of prior vesting or benefit accruals of an employee, or which deny an employee eligibility to participate, by reason of separation or failure to complete a required period of service within a specified period of time (*e.g.*, 300 hours in one year) will be considered break in service rules. See § 1.411(a)–9 for requirements relating to certain amendments to the break in service rules of a plan.

(ii) **Examples.** The rules of this subparagraph are illustrated by the following examples:

Example 1. The A plan in 1971 provides for immediate participation and vesting at normal retirement age. Employees accrue a unit benefit based on their compensation in each year. The plan provides that if an employee is not employed on the last day of the calendar year, he loses all accrued benefits. The requirement of employment on the last day of the year is a break in service rule because employees can lose benefits by reason of their separation. Accordingly, in the case of employees who separate and do not return by the close of the year, service which is completed prior to separation may be disregarded.

Example 2. The B plan in 1971 excludes from plan participation employees who work less than 1,200 hours per year. Because years of less than 1,200 hours are not taken into account under the B plan for eligibility to participate, such years are excluded under rules relating to breaks in service. Therefore, the years can be disregarded under this subparagraph.

Example 3. The C plan in 1971 provides for immediate participation and provides accruals and vesting credit for 1,200 hours or more in a given year. The plan provides that if a participant works less than 300 hours in a given year, he loses all prior vesting and benefit credits. The 300 hour rule is a break in service rule because the failure to complete 300 hours results in the loss of vesting and prior service credit. The 1,200 hour requirement is not a break in service rule because even though employees do not increase vesting or accrue benefits for service between 300 and 1,200 hours, they cannot lose prior vesting or benefits for such service. Accordingly, the C plan can disregard completed years only on account of less than 300 hours of service by an employee.

(c) **Special continuity rule for certain plans.** For special rules for computing years of service in the case of a plan maintained by more than one employer, see 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans).

[T.D. 7501, 42 FR 42327, Aug. 23, 1977, as amended by T.D. 7703, 45 FR 40985, June 17, 1980]

§ 1.411(a)–6 Year of service; hours of service; breaks in service.

(a) **Year of service.** Under section 411(a)(5)(A), for purposes of the regulations thereunder, the term "year of service" is defined in regulations prescribed by the Secretary of Labor under section 203(b)(2)(A) of the Employee Retirement Income Security Act of 1974. For special rules applicable to seasonal industries and maritime industries, see regulations prescribed by the Secretary of Labor under subparagraphs (C)

and (D) of section 203(b)(2) of the Employee Retirement Income Security Act of 1974.

(b) Hours of service. Under section 411(a)(5)(B), for purposes of the regulations thereunder, the term "hours of service" has the meaning provided by section 410(a)(3)(C). See regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(c) Breaks in service. Under section 411(a)(6), for purposes of § 1.411(a)–5(b)(4) and of this paragraph—

(1) In general—(i) Year of service after 1-year break in service. In the case of an employee who has incurred a 1-year break in service, years of service completed before such break are not required to be taken into account until the employee has completed one year of service after his return to service.

(ii) Defined contribution plan. In the case of a participant in a defined contribution plan or in an insured defined benefit plan (which plan satisfies the requirements of section 411(b)(1)(F) and § 1.411(b)–1) who has incurred a 1-year break in service, years of service completed after such break are not required to be taken into account for purposes of determining the nonforfeitable percentage of the participant's right to employer-derived benefits which accrued before such break. This subdivision does not permit years of service completed before a 1-year break in service to be disregarded in determining the nonforfeitable percentage of a participant's right to employer-derived benefits which accrue after such break.

(iii) Nonvested participants. In the case of an employee who is a nonvested participant in employer-derived benefits at the time he incurs a 1-year break in service, years of service completed by such participant before such break are not required to be taken into account for purposes of determining the nonforfeitable percentage of his right to employer-derived benefits if at such time the number of consecutive 1-year breaks in service included in his most recent break in service equals or exceeds the aggregate number of his years of service, whether or not consecutive, completed before such break. In the case of a plan utilizing the elapsed time method described in § 1.410(a)–7, the condition in the preceding sentence shall be satisfied if the period of severance is at least one year and the consecutive period of severance equals or exceeds his prior period of service, whether or not consecutive, completed before such period of severance. In computing the aggregate number of years of service prior to such break, years of service which could have been disregarded under this subdivision by reason of any prior break in service may be disregarded.

(2) One-year break in service defined. The term "1-year break in service" means a calendar year, plan year, or other 12-consecutive month period designated by a plan (and not prohibited under regulations prescribed by the Secretary of Labor) during which the participant has not completed more than 500 hours of service. In the case of a plan utilizing the elapsed time method, the term "1-year break in service" means a 12-consecutive month period beginning on the severance from service date or any anniversary thereof and ending on the next succeeding anniversary of such date; provided, however, that the employee during such 12-consecutive month period does not complete any hours of service within the meaning of 29 CFR Part 2530.200b–2(a) for the employer or employers maintaining the plan. See regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(d) Examples. The rules provided by this section are illustrated by the following examples:

Example (1). (i) X Corporation maintains a defined contribution plan to which section 411 applies. The plan uses the calendar year as the vesting computation period. In 1980, Employee A, who was hired at age 35, separates from the service of X Corporation after completing 4 years of service. At the time of his separation, Employee A had a nonforfeitable right to 25 percent of his employer-derived accrued benefit which was not distributed. In 1985, after incurring 5 consecutive one-year breaks in service, Employee A is re-employed by X Corporation and becomes an active participant in the plan. The plan provides that, for 1985 and all subsequent years, Employee A's previous years of service will not be taken into account for purposes of computing the nonforfeitable percentage of his employer-derived accrued benefit, solely because of his break in service.

(ii) The plan fails to satisfy section 411. Section 411(a)(6)(B) would permit the plan to disregard Employee A's prior service for purposes of computing his nonforfeitable percentage in 1985 only, but such service must be taken into account in subsequent years unless there is another break in service. Under section 411(a)(6)(C), the plan is not required to take Employee A's post-break service into account for purposes of computing his nonforfeitable right to his pre-break employer-derived accrued benefits. This provision, however, would not permit the plan to disregard pre-break service in determining his nonforfeitable right to his benefit accrued after the break. The exception provided by section 411(a)(6)(D) does not apply in the case of a participant who has any nonforfeitable right to his accrued benefit derived from employer contributions.

Example (2). (i) X Corporation maintains a qualified plan to which sections 410 and 411 (relating to minimum participation standards and minimum vesting standards, respectively) apply. The plan permits participation upon completion of a

year of service and provides that 100% of an employee's employer-derived accrued benefit vests after 10 years of service. The plan uses the calendar year as the vesting computation period. The plan provides that an employee who completes at least 1,000 hours of service in a 12-month period is credited with a year of service for participation and vesting purposes. The plan also provides that an employee who does not complete more than 500 hours of service in that 12-month period incurs a one-year break in service. The plan includes the rule described in section 411(a)(6)(D) for participation and vesting purposes. Under this rule, an employee's years of service prior to a break in service may be disregarded under certain circumstances if he has no vested right to any employer-derived benefit under the plan. The plan does not contain the rule described in section 411(a)(6)(B) (relating to the requirement of one year of service after a one-year break in service).

(ii) Employee A commences employment with the X Corporation on January 1, 1977. Employee A's employment history for 1977 through 1989 is as follows:

Year ending December 31	Hours of service completed
1977	1,000
1978	800
1979	1,000
1980	400
1981	1,000
1982	0
1983	400
1984	1,000
1985	0
1986	0
1987	500
1988	200
1989	1,000

Employee A's status as a participant during this period is determined as follows:

1978: Employee A was a plan participant on January 1, 1978, because he completed a year of service (1,000 hours) in 1977. He did not complete a year of service in 1978 because he completed fewer than 1,000 hours in that year. Because he completed more than 500 hours of service in 1978, however, Employee A did not incur a one-year break in service that year.

1979: Employee A completes a year of service in 1979. Because he did not incur a one-year break in service in 1978, the plan may not disregard his 1977 service for purposes of determining his years of service as of January 1, 1979.

1980: Employee A incurs a one-year break in service in 1980.

1981: Because Employee A had completed 2 years of service prior to 1981 and had incurred one 1-year break in service prior to 1981, under section 411(a)(6)(D), the plan may not disregard his pre-1980 service in 1981. Employee A completes a year of service in 1981.

1982: Employee A incurs a one-year break in service in 1982.

1983: Employee A incurs a one-year break in service in 1983. As of the end of 1983, he has completed 3 years of service and has incurred 2 consecutive one-year breaks in service.

1984: Employee A completes a year of service in 1984. Under section 411(a)(6)(D), his pre-1982 service may not be disregarded in 1984 because, as of the beginning of 1984, his pre-1984 years of service (3) exceed his consecutive one-year breaks in service (2).

1984–1988: Employee A incurs 4 consecutive one-year breaks in service during the years 1985 through 1988.

1989: Employee A's pre-1989 service is disregarded in 1989 and all subsequent plan years because his years of service as of January 1, 1989, equal the number of consecutive one-year breaks he has incurred as of that date. Therefore, as of the beginning of 1989, Employee A is not a plan participant. Employee A completes a year of service in 1989. (Although section 411(a)(6)(D) does not prohibit the plan provision under which Employee A's pre-1989 service is disregarded, that section does not require such a provision in a qualified plan.)

[T.D. 7501, 42 FR 42329, Aug. 23, 1977, as amended by T.D. 7703, 45 FR 40985, June 17, 1980]

§ 1.411(a)–7 Definitions and special rules.

(a) **Accrued benefit.** For purposes of section 411 and the regulations thereunder, the term "accrued benefit" means—

(1) **Defined benefit plan.** In the case of a defined benefit plan—

(i) If the plan provides an accrued benefit in the form of an annual benefit commencing at normal retirement age, such accrued benefit, or

(ii) If the plan does not provide an accrued benefit in the form described in subdivision (i) of this subparagraph, an annual benefit commencing at normal retirement age which is the actuarial equivalent (determined under section 411(c)(3) and § 1.411(c)–5 of the accrued benefit determined under the plan. In general, the term "accrued benefits" refers only to pension or retirement benefits. Consequently, accrued benefits do not include ancillary benefits not directly related to retirement benefits such as payment of medical expenses (or insurance premiums for such expenses), disability benefits not in excess of the qualified disability benefit (see section 411(a)(9) and paragraph (c)(3) of this section), life insurance benefits payable as a lump sum, incidental death benefits, current life insurance protection, or medical benefits described in section 401(h). For purposes of this paragraph a subsidized early retirement benefit which is provided by a plan is not taken into account, except to the extent of determining the normal retirement benefit under the plan (see section 411(a)(9) and paragraph (c) of this section). The accrued benefit includes any optional settlement at normal retirement age under actuarial assumptions no less favorable than those which would be applied if the employee were terminating his employment at normal retirement age. The accrued benefit does not include any subsidized value in a joint and survivor annuity to the extent

that the annual benefit of the joint and survivor annuity does not exceed the annual benefit of a single life annuity.

(2) Defined contribution plan. In the case of a defined contribution plan, the balance of the employee's account held under the plan.

(b) Normal retirement age—(1) General rule. For the purposes of section 411 and the regulations thereunder, the term "normal retirement age" means the earlier of—

(i) The time specified by a plan at which a plan participant attains normal retirement age, or

(ii) The later of—

(A) The time the plan participant attains age 65, or

(B) The 10th anniversary of the date the plan participant commences participation in the plan.

If a plan, or the employer sponsoring the plan, imposes a requirement that an employee retire upon reaching a certain age, the normal retirement age may not exceed that mandatory retirement age. The preceding sentence will apply if the employer consistently enforces a mandatory retirement age rule, whether or not set forth in the plan or any related document. For purposes of subdivision (i) of this subparagraph, if an age is not specified by a plan as the normal retirement age then the normal retirement age under the plan is the earliest age beyond which the participant's benefits under the plan are not greater solely on account of his age or service. For purposes of paragraph (b)(1)(ii)(B) of this section, participation commences on the first day of the first year in which the participant commenced his participation in the plan, except that years which may be disregarded under section 410(a)(5)(D) may be disregarded in determining when participation commenced.

(2) Examples. The provisions of this paragraph are illustrated by the following examples:

Example (1). Plan A defines normal retirement age as age 65. Under the plan, benefits payable to participants who retire at or after age 60 are not reduced on account of early retirement. For purposes of section 411 and the vesting regulations, normal retirement age under Plan A is age 65 (determined under subparagraph (1)(i) of this paragraph). This is true even if in operation all participants retire at age 60.

Example (2). Plan B does not specify any age as the normal retirement age. Under the plan, participants who have attained age 55 are entitled to benefits commencing upon retirement but the benefits of participants who retire before attaining age 70 are subject to reduction on account of early retirement. For purposes of section 411 and the vesting regulations the normal retirement age under Plan B is the later of (i) age 65, or (ii) the 10th anniversary of the date a plan participant commences participation in the plan (assuming such date is prior to age 70).

Example (3). The facts are the same as in example (2). Employee X first became a participant in Plan B on January 1, 1980 at age 53. His participation continued until December 31, 1980, when he separated from the service with no vested benefits. After incurring 5 consecutive 1-year breaks in service, Employee X again becomes an employee and a plan participant on January 1, 1986, at age 59. For purposes of section 411, Employee X's normal retirement age under Plan B is age 69, the 10th anniversary of the date on which his year of plan participation commenced. His participation in 1980 may be disregarded under the last sentence of paragraph (b)(1) of this section.

(c) Normal retirement benefit—(1) In general. For purposes of section 411 and the regulations thereunder, the term "normal retirement benefit" means the periodic benefit under the plan commencing upon early retirement (if any) or at normal retirement age, whichever benefit is greater.

(2) Periodic benefit. For purposes of subparagraph (1) of this paragraph—

(i) In the case of a plan under which a benefit is payable as an annuity in the same form upon early retirement and at normal retirement age, the greater benefit is determined by comparing the amount of such annuity payments.

(ii) In the case of a plan under which an annuity benefit payable upon early retirement is not in the same form as an annuity benefit payable at normal retirement age, the greater benefit is determined by converting the annuity benefit payable upon early retirement age into the same form of annuity benefit as is payable at normal retirement age and by comparing the amount of the converted early retirement benefit payment with the amount of the normal retirement benefit payment.

(iii) In the case of a plan which is integrated with the Social Security Act or any other Federal or State law, the periodic benefit payable upon and after early retirement age is adjusted for any increases in such benefits occurring on or after early retirement age which are taken into account under the plan. See however, section 401(a)(15) and the regulations thereunder.

(3) Benefits included. For purposes of this paragraph, the normal retirement benefit under a plan shall be determined without regard to ancillary benefits not directly related to retirement benefits such as medical benefits or disability benefits not in excess of the qualified disability benefit; see section 411(a)(7) and paragraph (a)(1) of this section. For this purpose, a qualified disability benefit is a disability benefit which is not in excess of the amount of the benefit which would be

payable to the participant if he separated from service at normal retirement age.

(4) **Early retirement benefit; social security supplement.** (i) For purposes of this paragraph, the early retirement benefit under a plan shall be determined without regard to any social security supplement.

(ii) For purposes of this subparagraph, a social security supplement is a benefit for plan participants which—

(A) Commences before the age and terminates before the age when participants are entitled to old-age insurance benefits, unreduced on account of age, under title II of the Social Security Act, as amended (see section 202(a) and (g) of such Act), and

(B) Does not exceed such old-age insurance benefit.

(5) **Special limitation.** If a defined benefit plan bases its normal retirement benefits on employee compensation, the compensation must reflect the compensation which would have been paid for a full year of participation within the meaning of section 411(b)(3). If an employee works less than a full year of participation, the compensation used to determine benefits under the plan for such year of participation must be multiplied by the ratio of the number of hours for a complete year of participation to the number of hours worked in such year. A plan whose benefit formula is computed on a computation base which cannot decrease is not required to adjust employee compensation in the manner described in the previous sentence. Thus, for example, if a plan provided a benefit based on an employee's compensation for his highest five consecutive years or a separate benefit for each year of participation based on the employee's compensation for such year the plan would not have to so adjust compensation. However, if a plan provided a benefit based on an employee's compensation for the employee's last five years or the five highest consecutive years out of the last 10 years, the compensation, would have to be so adjusted. For special rules for applying the limitations on proration of a year of participation for benefit accrual, see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(6) **Examples.** The provisions of this paragraph are illustrated by the following examples:

Example (1). Plan A provides for a benefit equal to 1% of high 5 years compensation for each year of service and a normal retirement age of 65. The plan also provides for a full unreduced accrued benefit without any actuarial reduction for any employee at age 55 with 30 years of service. Even though the actuarial value of the early retirement benefit could exceed the value of the benefit at the normal retirement age, the normal retirement benefit would not include the greater value of the early retirement benefit because actuarial subsidies are ignored.

Example (2). Plan B provides the following benefits: (1) at normal retirement age 65, $300/mo. for life and (2) at early retirement age 60, $400/mo. for life. The normal retirement benefit is $400/mo., the greater of the benefit payable at normal retirement age ($300) or early retirement ($400).

Example (3). Assume the same facts as example (2) except that the early retirement benefit of $400 is reduced to $300 upon attainment of age 65. If each employee's social security benefit at age 65 is not less than $100, the $100 would be considered to be a social security supplement and would therefore be ignored. Consequently, the normal retirement benefit would be $300.

Example (4). Plan C provides a benefit at normal retirement age equal to 1% per year of service, multiplied by the participant's compensation averaged over the 5 years immediately prior to retirement. An early retirement benefit is provided upon attainment of age 60 equal to the benefit accrued to date of early retirement reduced by 4 percent for each year by which the early retirement date precedes the normal retirement age of 65. Employee A was hired at age 30, participated immediately, and retired at age 65. Employee A's annual compensation was $50,000 between ages 55–60 and was reduced to $33,000 after age 60. The following table indicates the amount of annual benefit that would have been provided by the plan formula if the employee retired at or after age 60:

Age	Final average computed (1)—	Percent accrued benefit (2)—	Reduction (3)—	Annual benefit (4)—
60	$50,000	30	0.80	$12,000
61	46,600	31	.84	12,135
62	43,200	32	.88	12,165
63	39,800	33	.92	12,083
64	36,400	34	.96	11,881
65	33,000	35	1.00	11,550

Note.—Col. (1) times col. (2) times col. (3) equals col. (4).

The normal retirement benefit is the greater of the benefit payable at normal retirement age or the early retirement benefit. Employee A's normal retirement benefit is $12,165, the greatest annual benefit Employee A would be entitled to.

(d) Rules relating to certain distributions and cash-outs of accrued benefits—(1) In general. This paragraph sets forth vesting rules applicable to certain distributions from qualified plans and their related trusts (other than class year plans). Subparagraphs (2) and (3) set forth the exceptions to nonforfeitability on account of withdrawal of mandatory contributions provided by section 411(a)(3)(D). When a plan utilizes these exceptions with respect to a given participant's accrued benefit, such accrued benefit is not subject to the cash-out rules or vesting rules of subparagraphs (4) or (5), respectively. Section 411 prescribes certain requirements with respect to accrued benefits under a qualified plan. These requirements would generally not be satisfied if the plan disregarded service in computing accrued benefits even though amounts were distributed on account of such service. Subparagraph (4) of this paragraph sets forth rules under section 411(a)(7)(B) which allow a plan to make distributions and compute accrued benefits without regard to the accrued benefit attributable to the distribution. When a defined contribution plan utilizes this exception with respect to an accrued benefit, the plan is not required to satisfy the rules of subparagraph (5) of this paragraph. Subparagraph (5) of this paragraph sets forth a vesting requirement applicable to certain distributions from defined contribution plans. Subparagraph (6) sets forth other rules which pertain to the distribution rules of this paragraph.

(2) Withdrawal of mandatory contribution—(i) General rule. In the case of a participant's right to his employer-derived accrued benefit, a right is not treated as forfeitable merely because all or a portion of such benefit may be forfeited on account of the withdrawal by the participant of any amount attributable to his accrued benefit derived from his mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1) before he has become a 50 percent vested participant (within the meaning of § 1.401(a)–19(b)(2)). For purposes of determining the vested percentage, the plan may disregard service after the withdrawal. For example, assume that a plan utilizes 1000 hours for computing years of service and that for the computation period employee A had 1000 hours of service. If A was 40 percent vested at the beginning of the period but only had 800 hours at the time of the withdrawal, the plan could treat A as only 40 percent vested because service after the withdrawal can be disregarded. On the other hand, if A had 1000 hours at the time of the withdrawal, he must receive a year of service for the computation period, even though service is not taken into account until the end of such period.

(ii) Plan repayment provision. (A) Subdivision (i) of this subparagraph shall not apply unless, at the time the amount described in such subdivision is withdrawn by the participant, the plan provides the employee with a right to restoration of his employer-derived accrued benefit to the extent forfeited in accordance with such subdivision upon repayment to the plan of the full amount of the withdrawal.

(B) In the case of a defined benefit plan (as defined in section 414(j)) the restoration of the employee's employer-derived accrued benefit may be conditioned upon repayment of interest on the full amount of the distribution. Such interest shall be computed on the amount of the distribution from the date of such distribution to the date of repayment, compounded annually from the date of distribution, at the rate determined under section 411(c)(2)(C) in effect on the date of repayment. A plan may provide for repayment of interest which is less than the amount determined under the preceding sentence.

(C) In the case of both defined benefit plans and defined contribution plans, the plan repayment provision described in this subparagraph may provide that the employee must repay the full amount of the distribution in order to have the forfeited benefit restored. The plan provision may not require that such repayment be made sooner than the time described in paragraph (d)(2)(ii)(D) of this section.

(D)(*1*) If a distribution is on account of separation from service, the time for repayment may not end before the earlier of—

(i) 5 years after the first day the employee is subsequently employed, or

(ii) The close of the first period of consecutive 1-year breaks in service commencing after the distribution.

If the distribution occurs for any other reason, the time for repayment may not end earlier than 5 years after the date of distribution. Nevertheless, a plan provision may provide for a longer period in which the employee may repay. For example, a plan could allow repayments to be made at any time before normal retirement age.

(2) In the case of a plan utilizing the elapsed time method, described in § 1.410(a)-7, the minimum time for repayment shall be determined as in paragraph (d)(2)(ii)(D)(1) of this section except as provided in this subdivision. The 5 consecutive 1-year break periods shall be determined by substituting the term "1-year period of severance" for the term "1-year break in service". Also, the repayment period both commences and closes in a manner determined by the Commissioner that is consistent with the rules in § 1.410(a)-7 and the substitution in section 411(a)(6) (C) and (D) of a 5-year break in service rule for the former 1-year break in service rule.

(E) A defined benefit plan using the break in service rule described in section 410(a)(5)(D) or a defined contribution plan using the break in service rule described in section 411(a)(6)(C) for determining employees' accrued benefits is not required to provide for repayment by an employee whose accrued benefit is disregarded by reason of a plan provision using these rules.

(iii) Computation of benefit. In the case of a defined contribution plan, the employer-derived accrued benefit required to be restored by this subparagraph shall not be less than the amount in the account balance of the employee which was forfeited, unadjusted by any subsequent gains or losses.

(iv) Delayed forfeiture. A defined contribution plan may, in lieu of the forfeiture and restoration described in this subparagraph, provide that the forfeiture does not occur until the expiration of the time for repayment described in subdivision (ii) of this subparagraph provided that the conditions of this subparagraph are satisfied.

(3) Withdrawal of mandatory contributions; accruals before September 2, 1974—(i) General rule. In the case of a participant's right to the portion of the employer-derived benefit which accrued prior to September 2, 1974, a right is not treated as forfeitable merely because all or part of such portion may be forfeited on account of the withdrawal by the participant of an amount attributable to his benefit derived from mandatory contributions (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1(c)(4)) made by the participant before September 2, 1974, if the amount so subject to forfeiture is no more than proportional to such amounts withdrawn. This subparagraph shall not apply to any plan to which any mandatory contribution (within the meaning of section 411(c)(2)(C) and § 1.411(c)–1(c)(4)) is made after September 2, 1974.

(ii) Defined contribution plan. In the case of a defined contribution plan, the portion of a participant's employer-derived benefit which accrued prior to September 2, 1974, shall be determined on the basis of a separate accounting between benefits accruing before and after such date. Gains, losses, withdrawals, forfeitures, and other credits or charges must be separately allocated to such benefits. Any allocation made on a reasonable and consistent basis prior to September 1, 1977, shall satisfy the requirements of this subdivision.

(iii) Defined benefit plan. In the case of a defined benefit plan, the portion of a participant's employer-derived benefit which accrued prior to September 2, 1974, shall be determined in a manner consistent with the determination of an accrued benefit under section 411(b)(1)(D) (see § 1.411(b)–1(c)). Any method of determining such accrued benefit which the Commissioner finds to be reasonable shall satisfy the requirements of this subdivision.

(4) Certain cash-outs of accrued benefits—(i) Involuntary cash-outs. For purposes of determining an employee's right to an accrued benefit derived from employer contributions under a plan, the plan may disregard service performed by the employee with respect to which—

(A) The employee receives a distribution of the present value of his entire nonforfeitable benefit at the time of the distribution,

(B) The requirements of section 411(a)(11) are satisfied at the time of the distribution. See § 1.411(a)(11)-1.

(C) The distribution is made due to the termination of the employee's participation in the plan, and

(D) The plan has a repayment provision which satisfies the requirements of subdivision (iv) of this subparagraph in effect at the time of the distribution.

A distribution shall be deemed to be made due to the termination of an employee's participation in the plan if it is made no later than the close of the second plan year following the plan year in which such termination occurs. For purposes of determining the entire nonforfeitable benefit, the plan may disregard service after the distribution, as illustrated in subparagraph (2)(i) of this paragraph.

(ii) Voluntary cash-outs. For purposes of determining an employee's accrued benefit derived from employer contributions under a plan, the

plan may disregard service performed by the employee with respect to which—

(A) The employee receives a distribution of the present value of his nonforfeitable benefit attributable to such service at the time of such distribution,

(B) The employee voluntarily elects to receive such distribution,

(C) The distribution is made on termination of the employee's participation in the plan, and

(D) The plan has a repayment provision in effect at the time of the distribution which satisfies the requirements of subdivision (iv) of this subparagraph.

A distribution shall be deemed to be made on termination of participation in the plan if it is made not later than the close of the second plan year following the plan year in which such termination occurs. For purposes of determining the nonforfeitable benefit, the plan may disregard service after the distribution as illustrated in subparagraph (2)(i) of this subparagraph.

(iii) Disregard of service. Service of an employee permitted to be disregarded under subdivision (i) or (ii) of the subparagraph is not required to be taken into account in computing the employee's accrued benefit under the plan. In the case of a voluntary distribution described in subdivision (ii) of this subparagraph which is less than the present value of the employee's total nonforfeitable benefit immediately prior to the distribution, the accrued benefit not required to be taken into account is such total accrued benefit multiplied by a fraction, the numerator of which is the amount of the distribution and the denominator of which is the present value of his total nonforfeitable benefit immediately prior to such distribution. For example, A who is 50 percent vested in an account balance of $1,000 receives a voluntary distribution of $250. The accrued benefit which can be disregarded equals $1,000 times $250/$500, or $500. However, such service may not by reason of this paragraph be disregarded for purposes of determining an employee's years of service under sections 410(a)(3) and 411(a)(4).

(iv) Plan repayment provision. (A) A plan repayment provision satisfies the requirements of this subdivision if, under the provision, the accrued benefit of an employee that is disregarded by a plan under this subparagraph is restored upon repayment to the plan by the employee of the full amount of the distribution. An accrued benefit is not restored unless all of the optional forms of benefit and subsidies relating to such benefit are also restored. A plan is not required to provide for repayment of an accrued benefit unless the employee—

(1) Received a distribution that is in a plan year to which section 411 applies (see § 1.411(a)-2), which distribution is less than the amount of his accrued benefit determined under the same optional form of benefit as the distribution was made, and

(2) Resumes employment covered under the plan.

(B) Example.

Plan A provides a single sum distribution equal to the present value of the normal form of the accrued benefit payable at normal retirement age which is a single life annuity. Plan A also provides a subsidized joint and survivor annuity and a subsidized early retirement annuity benefit. A participant who is fully vested and receives a single sum distribution equal to the present value of the single life annuity normal retirement benefit is not required to be provided the right under the plan to repay the distribution upon subsequent reemployment even though the participant received a distribution that did not reflect the value of the subsidy in the joint and survivor annuity or the value of the early retirement annuity subsidy. This is true whether or not the participant had satisfied at the time of the distribution all of the conditions necessary to receive the subsidies. However, if a participant does not receive his total accrued benefit in the optional form of benefit under which his benefit was distributed, the plan must provide for repayment. If the employee repays the distribution in accordance with section 411(a)(7), the plan must restore the employee's accrued benefit which would include the right to receive the subsidized joint and survivor annuity and the subsidized early retirement annuity benefit.

(C) A plan may impose the same conditions on repayments for the restoration of employer-derived accrued benefits that are allowed as conditions for restoration of employer-derived accrued benefits upon repayment of mandatory contributions under paragraphs (d)(2)(ii) (B), (C), (D) and (E) of this section.

(v) In the case of a defined contribution plan, the employer-derived accrued benefit required to be restored by this subparagraph shall not be less than the amount in the account balance of the employee, both the amount distributed and the amount forfeited, unadjusted by any subsequent gains or losses. Thus, for example, if an employee received a distribution of $250 when he was 25 percent vested in an account balance of $1,000, upon repayment of $250 the account balance may not be less than $1,000 even if, because of plan losses, the account balance, if not distributed, would have been reduced to $500.

(5) Vesting requirement for defined contribution plans—(i) Application. The requirements of this

subparagraph apply to a defined contribution plan which makes distributions to employees from their accounts attributable to employer contributions at a time when—

(A) Employees are less than 100 percent vested in such accounts, and

(B) Under the plan, employees can increase their percentage of vesting in such accounts after the distributions.

(ii) Requirements. In order for a plan, to which this subparagraph applies, to satisfy the vesting requirements of section 411, account balances under the plan (with respect to which percentage vesting can increase) must be computed in a manner which satisfies either subdivision (iii)(A) or (B) of this subparagraph.

(iii) Permissible methods. A plan may provide for either of the following methods, but not both, for computing account balances with respect to which percentage vesting can increase and from which distributions are made:

(A)(*1*) A separate account is established for the employee's interest in the plan as of the time of the distribution, and

(*2*) At any relevant time the employee's vested portion of the separate account is not less than an amount ("X") determined by the formula: $X=P(AB+(R\times D))-(R\times D)$. For purposes of applying the formula: P is the vested percentage at the relevant time; AB is the account balance at the relevant time; D is the amount of the distribution; R is the ratio of the account balance at the relevant time to the account balance after distribution; and the relevant time is the time at which, under the plan, the vested percentage in the account cannot increase.

A plan is not required to provide for separate accounts provided that account balances are maintained under a method that has the same effect as under this subdivision.

(B) At any relevant time the employee's vested portion is not less than an amount ("X") determined by the formula: $X=P(AB+D)-D$. For purposes of applying the formula, the terms have the same meaning as under subdivision (iii)(A)(*2*) of this subparagraph.

(C) An application of the methods described in subdivisions (iii)(A) and (B) of this subparagraph is illustrated by the following examples:

Example (1). The X defined contribution plan uses the method described in subdivision (iii)(A) of this subparagraph for computing account balances and the break in service rule described in section 411(a)(6)(C) (service after a 1-year break does not increase the vesting percentage in account balances accrued prior to the break). The plan distributes $250 to A when A's account balance prior to the distribution equals $1,000 and he is 25 percent vested. At the time of the distribution, A has not incurred a 1-year break so that his vesting percentage can increase. Six years later, when A is 60 percent vested, he incurs a 1-year break so that his vesting percentage cannot increase. At this time his separate account balance equals $1,500. R=$1,500/$750 or 2. A's separate account must equal 60 percent ($1,500+(2×$250))–(2×$250) or 60 percent ($1,500+$500)–$500, or $1,200–$500 equals $700.

Example (2). The Y defined contribution plan uses the method described in subdivision (iii)(B) of this subparagraph for computing account balances and the break in service rule described in section 411(a)(6)(C). The plan distributes $250 to B when B's account balance prior to the distribution equals $1,000 and he is 25 percent vested. At the time of the distribution, B has not incurred a 1-year break so that his vesting percentage can increase. Six years later, when A is 60 percent vested, he incurs a 1-year break so that his vesting percentage cannot increase. At this time his account balance equals $1,500. B's separate account must equal 60 percent ($1,500+$250)–$250, 60% of $1,750–$250 equals $800.

(6) Other rules—(i) Distributions on separation or other event. None of the rules of this paragraph preclude distributions to employees upon separation from service or any other event recognized by the plan for commencing distributions. Such a distribution must, of course, satisfy the applicable qualification requirements pertaining to such distributions. For example, a profit-sharing plan could pay the vested portion of an account balance to an employee when he separated from service, but in order to satisfy section 411 the plan might not be able to forfeit the nonvested account balance until the employee has a 1-year break in service. Similarly, the fact that a plan cannot disregard an accrued benefit attributable to service for which an employee has received a distribution because the plan does not satisfy the cash-out requirements of subparagraph (4) of this paragraph does not mean that the employee's accrued benefit (computed by taking into account such service) cannot be offset by the accrued benefit attributable to the distribution.

(ii) Joint and survivor requirements. See § 1.401(a)–11(a)(2) (relating to joint and survivor annuities) for special rules applicable to certain distributions described in this paragraph.

(iii) Plan repayments. (A) Under subparagraphs (2) and (4) of this paragraph, a plan may be required to restore accrued benefits in the event of repayment by an employee.

(B) For purposes of applying the limitations of section 415(c) and (e), in the case of a defined contribution plan, the repayment by the employee

and the restoration by the employer shall not be treated as annual additions.

(C) In the case of a defined contribution plan, the permissible sources for restoration of the accrued benefit are: income or gain to the plan, forfeitures, or employer contributions. Notwithstanding the provisions of § 1.401–1(b)(1)(ii), contributions may be made for such an accrued benefit by a profit-sharing plan even though there are no profits. In order for such a plan to be qualified, account balances (accrued benefits) generally must correspond to assets in the plan. Accordingly, there cannot be an unfunded account balance. However, an account balance will not be deemed to be unfunded in the case of a restoration if assets for the restored benefit are provided by the end of the plan year following the plan year in which the repayment occurs.

[T.D. 7501, 42 FR 42329, Aug. 23, 1977; as amended by T.D. 8038, 50 FR 29374, July 19, 1985; T.D. 8219, 53 F.R. 31852, Aug. 22, 1988]

§ 1.411(a)–8 Changes in vesting schedule.

(a) Requirement of prior schedule. Under section 411(a)(10)(A), for plan years for which section 411 applies, a plan will be treated as not meeting the minimum vesting standards of section 411(a)(2) if the plan does not satisfy the requirements of this paragraph. If the vesting schedule of a plan is amended, then as of the date such amendment is adopted, the plan satisfies the requirements of this paragraph if, under the plan as amended, in the case of an employee who is a participant on—

(1) The date the amendment is adopted, or

(2) The date the amendment is effective, if later.

The nonforfeitable percentage (determined as of such date) of such employee's right to his employer-derived accrued benefit is not less than his percentage computed under the plan without regard to such amendment.

(b) Election of former schedule—(1) In general. Under section 411(a)(10)(B), for plan years for which section 411 applies, if the vesting schedule of a plan is amended, the plan will not be treated as meeting the minimum vesting standards of section 411(a)(2) unless the plan as amended, provides that each participant whose nonforfeitable percentage of his accrued benefit derived from employer contributions is determined under such schedule, and who has completed at least 5 years of service with the employer, may elect, during the election period, to have the nonforfeitable percentage of his accrued benefit derived from employer contributions determined without regard to such amendment. Notwithstanding the preceding sentence, no election need be provided for any participant whose nonforfeitable percentage under the plan, as amended, at any time cannot be less than such percentage determined without regard to such amendment.

(2) Election period. For purposes of subparagraph (1) of this paragraph, the election period under the plan must begin no later than the date the plan amendment is adopted and end no earlier than the latest of the following dates:

(i) The date which is 60 days after the day the plan amendment is adopted,

(ii) The date which is 60 days after the day the plan amendment becomes effective, or

(iii) The date which is 60 days after the day the participant is issued written notice of the plan amendment by the employer or plan administrator.

(3) Service requirement. For purposes of subparagraph (1) of this paragraph, a participant shall be considered to have completed 5 years of service if such participant has completed 5 years of service, whether or not consecutive, without regard to the exceptions of section 411(a)(4) prior to the expiration of the election period described in subparagraph (2) of this paragraph. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(4) Election only by participant. The election described in subparagraph (1) of this paragraph is available only to an individual who is a participant in the plan at the time such election is made.

(5) Election may be irrevocable. A plan, as amended, shall not fail to meet the minimum vesting standards of section 411(a)(2) by reason of section 411(a)(10)(B) merely because such plan provides that the election described in subparagraph (1) of this paragraph is irrevocable.

(6) Relationship with section 411(a)(2). The election described in subparagraph (1) of this paragraph is available for a vesting schedule which does not satisfy the requirements of section 411(a)(2) only if under such schedule all participants have a 50 percent nonforfeitable right after 10 years of service, and a 100 percent nonforfeitable right after 15 years of service, in their employer-derived accrued benefit. If the vesting

schedule provides less vesting than the percentages required by the preceding sentence, the plan can be amended to provide for such vesting.

(c) Special rules—(1) Amendment of vesting schedule. For purposes of this section, an amendment of a vesting schedule is each plan amendment which directly or indirectly affects the computation of the nonforfeitable percentage of employees' rights to employer-derived accrued benefits. Consequently, such an amendment, for example, includes each change in the plan which affects either the plan's computation of years of service or of vesting percentages for years of service.

(2) Aggregation of amendments. All plan amendments which are: (i) amendments of a vesting schedule within the meaning of subparagraph (1) of this paragraph and (ii) adopted and effective at the same time, shall be deemed to be a single amendment for purposes of applying the rules in paragraphs (a) and (b) of this section.

[T.D. 7501, 42 FR 42333, Aug. 23, 1977]

§ 1.411(a)-8T. Changes in vesting schedule (temporary).

(a) [Reserved]

(b) Election of former schedule—(1) In general. Under section 411(a)(10)(B), for plan years for which section 411 applies, if the vesting schedule of a plan is amended, the plan will not be treated as meeting the minimum vesting standards of section 411(a)(2) unless the plan as amended provides that each participant whose nonforfeitable percentage of his accrued benefit derived from employer contributions is determined under such schedule, and who has completed at least 3 years of service with the employer, may elect, during the election period, to have the nonforfeitable percentage of his accrued benefit derived from employer contributions determined without regard to such amendment. Notwithstanding the preceding sentence, no election need be provided for any participant whose nonforfeitable percentage under the plan, as amended, at any time cannot be less than such percentage determined without regard to such amendment. For employees not described in § 1.411(a)-3T(e)(1), this section shall be applied by substituting "5 years of service" for "3 years of service" where such language appears.

(2) Election period. For purposes of subparagraph (1) of this paragraph, the election period under the plan must begin no later than the date the plan amendment is adopted and end no earlier than the latest of the following dates:

(i) The date which is 60 days after the day the plan amendment is adopted,

(ii) The date which is 60 days after the day the plan amendment becomes effective, or

(iii) The date which is 60 days after the day the participant is issued written notice of the plan amendment by the employer or plan administrator.

(3) Service requirement. For purposes of subparagraph (1) of this paragraph, a participant shall be considered to have completed 3 years of service if such participant has completed 3 years of service, whether or not consecutive, without regard to the exceptions of section 411(a)(4) prior to the expiration of the election period described in subparagraph (2) of this paragraph. For the meaning of the term "year of service", see regulations prescribed by the Secretary of Labor under 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

[T.D. 8170, 53 FR 241, Jan. 6, 1988]

§ 1.411(a)-9 Amendment of break in service rules; transitional period.

(a) In general. Under section 1017(f)(2) of the Employee Retirement Income Security Act of 1974, a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if the rules of the plan relating to breaks in service are amended, and—

(1) Such amendment is effective after January 1, 1974, and before the effective date of section 411, and

(2) Under such amendment, the nonforfeitable percentage of any employee's right to his employer-derived accrued benefit is less than the lesser of the nonforfeitable percentage of such employee's right to such benefit—

(i) Under the break in service rules provided by section 411(a)(6) and § 1.411(a)-6(c), or

(ii) The greatest such percentage under the plan as in effect on or after January 1, 1974 (provided the break in service rules of the plan were not in violation of any law or rule of law on January 1, 1974).

(b) Break in service rules. For purposes of paragraph (a), the term "break in service rules" means the rules provided by a plan relating to circumstances under which a period of an employee's service or plan participation is disregarded, for

purposes of determining the extent to which his rights to his accrued benefit under the plan are unconditional, if under such rules such service is disregarded by reason of the employee's failure to complete a required period of service within a specified period of time. For this purpose, plan rules which result in the loss of prior vesting or benefit accruals of an employee, or which deny an employee eligibility to participate, by reason of separation or failure to complete a required period of service within a specified period of time (*e.g.*, 300 hours in one year) will be considered break in service rules. For purposes of section 411(b)(3), service described under the plan's break in service rules, as in effect before the effective date of section 411, need not be counted.

[T.D. 7501, 42 FR 42333, Aug. 23, 1977]

§ 1.411(a)–11 Restriction and valuation of distributions.

(a) Scope—(1) In general. Section 411(a)(11) restricts the ability of a plan to distribute any portion of a participant's accrued benefit without the participant's consent. Section 411(a)(11) also restricts the ability of defined benefit plans to distribute any portion of a participant's accrued benefit in optional forms of benefit without complying with specified valuation rules for determining the amount of the distribution. If the consent requirements or the valuation rules of this section are not satisfied, the plan fails to satisfy the requirements of section 411(a).

(2) Accrued benefit. For purposes of this section, an accrued benefit is valued taking into consideration the particular optional form in which the benefit is to be distributed. The value of an accrued benefit is the present value of the benefit in the distribution form determined under the plan. For example, a plan that provides a subsidized early retirement annuity benefit may specify that the optional single sum distribution form of benefit available at early retirement age is the present value of the subsidized early retirement annuity benefit. In this case, the subsidized early retirement annuity benefit must be used to apply the valuation requirements of this section and the resulting amount of the single sum distribution. However, if a plan that provides a subsidized early retirement annuity benefit specifies that the single sum distribution benefit available at early retirement age is the present value of the normal retirement annuity benefit, then the normal retirement annuity benefit is used to apply the valuation requirements of this section and the resulting amount of the single sum distribution available at early retirement age.

(b) General consent rules. A plan must satisfy the participant consent requirement with respect to the distribution of a participant's nonforfeitable accrued benefit with a present value in excess of $3,500. See paragraphs (c) (3) and (4) for situations where no consent is required.

(c) Consent, etc. requirements—(1) General rule. If an accrued benefit is immediately distributable, section 411(a)(11) permits plans to provide for the distribution of any portion of a participant's nonforfeitable accrued benefits only if the applicable consent requirements are satisfied.

(2) Consent. (i) No consent is valid unless the participant has received a general description of the material features, and an explanation of the relative values of, the optional forms of benefit available under the plan in a manner that would satisfy the notice requirements of section 417(a)(3). See § 1.401(a)-20 Q&A-36. In addition, so long as a benefit is immediately distributable, a participant must be informed of his right, if any, to defer receipt of the distribution. Furthermore, consent is not valid if a significant detriment is imposed under the plan on any participant who does not consent to a distribution. Whether or not a significant detriment is imposed shall be determined by the Commissioner by examining the particular facts and circumstances.

(ii) A plan must provide participants with notice of their rights specified in this subparagraph no less than 30 days and no more than 90 days before the annuity starting date. Written consent of the participant to the distribution must not be made before the participant receives the notice and must not be made more than 90 days before the annuity starting date. See § 1.401(a)-20 Q&A-10 for the definition of annuity starting date.

(iii) See § 1.401(a)-20 Q&A-24 for a special rule applicable to consents to plan loans.

(3) $3,500. Written consent of the participant is required before the commencement of the distribution of any portion of an accrued benefit if the present value of the nonforfeitable total accrued benefit is greater than $3,500. The consent requirements are deemed satisfied if such value does not exceed $3,500 and the plan may distribute such portion to the participant as a single sum. Present value for this purpose must be determined in the same manner as under section 417(e); see § 1.417(e)-1(d). If the present value determined at the time of a distribution to the participant

exceeds $3,500, then the present value at any subsequent time shall be deemed to exceed $3,500.

(4) **Immediately distributable.** Participant consent is required for any distribution while it is immediately distributable, i.e., prior to the later of the time a participant has attained normal retirement age (as defined in section 411(a)(8)) or age 62. Once a distribution is no longer immediately distributable, a plan may distribute the benefit in the form of a QJSA in the case of a benefit subject to section 417 or in the normal form in other cases without consent.

(5) **Death of participant.** The consent requirements of section 411(a)(11) do not apply after the death of the participant.

(6) **QDROs.** The consent requirements of section 411(a)(11) do not apply to payments to an alternate payee, defined in section 414(p)(8), except as provided in a qualified domestic relations order pursuant to section 414(p).

(7) **Section 401(a)(9), etc.** The consent requirements of section 411(a)(11) do not apply to the extent that a distribution is required to satisfy the requirements of section 401(a)(9) or 415. See section 401(a)(9) and the regulations thereunder and § 1.401(a)-20 Q&A 23 for guidance on these requirements. Notwithstanding any provision to the contrary in section 401(a)(14) or § 1.401(a)-14, a plan may not distribute a participant's nonforfeitable accrued benefit with a present value in excess of $3,500 while the benefit is immediately distributable unless the participant consents to such distribution. The failure of a participant to consent is deemed to be an election to defer commencement of payment of the benefit for purposes of section 401(a)(14) and § 1.401(a)-14.

(d) **Distribution valuation requirements.** In determining the present value of any distribution of any accrued benefit from a defined benefit plan, the plan must take into account specified valuation rules. For this purpose, the valuation rules are the same valuation rules for valuing distributions as set forth in section 417(e); see § 1.417(e)-1(d). This paragraph (d) applies both before and after the participant's death regardless of whether the accrued benefit is immediately distributable. This paragraph also applies whether or not the participant's consent is required under paragraphs (b) and (c) of this section.

(e) **Special rules—(1) Plan termination.** The requirements of this section apply before, on and after a plan termination. If a defined contribution plan terminates and the plan does not offer an annuity option (purchased from a commercial provider), then the plan may distribute a participant's accrued benefit without the participant's consent. The preceding sentence does not apply if the employer or any entity within the same controlled group as the employer maintains another defined contribution plan, other than an employee stock ownership plan (as defined in section 4975(e)(7)). In such a case, the participant's accrued benefit may be transferred without the participant's consent to the other plan if the participant does not consent to an immediate distribution from the terminating plan. See section 411(d)(6) and the regulations thereunder for other rules applicable to transferee plans and plan terminations.

(2) **ESOP dividends.** The requirements of this section do not apply to any distribution of dividends to which section 404(k) applies.

(3) **Other rules.** See § 1.401(a)-20 Q&As 14, 17 and 24 for other rules that apply to the section 411(a)(11) requirements.

[T.D. 8219, 53 FR 31853, Aug. 22, 1988]

§ 1.411(b)–1 Accrued benefit requirements.

(a) **Accrued benefit requirements—(1) In general.** Under section 411(b), for plan years beginning after the applicable effective date of section 411, rules are provided for the determination of the accrued benefit to which a participant is entitled under a plan. Under a defined contribution plan, a participant's accrued benefit is the balance to the credit of the participant's account. Under a defined benefit plan, a participant's accrued benefit is his accrued benefit determined under the plan. A defined benefit plan is not a qualified plan unless the method provided by the plan for determining accrued benefits satisfies at least one of the alternative methods (described in paragraph (b) of this section) for determining accrued benefits with respect to all active participants under the plan. A defined benefit plan may provide that accrued benefits for participants are determined under more than one plan formula. In such a case, the accrued benefits under all such formulas must be aggregated in order to determine whether or not the accrued benefits under the plan for participants satisfy one of the alternative methods. A plan may satisfy different methods with respect to different classifications of employees, or separately satisfy one method with respect to the accrued benefits for each such classification, provided that such classifications are not so structured as to evade the accrued benefit requirements of section

411(b) and this section. (For example, if a plan provides that employees who commence participation at or before age 40 accrue benefits in a manner which satisfies the 133⅓ percent method of determining accrued benefits and employees who commence participation after age 40 accrue benefits in a manner which satisfies the 3 percent method of determining accrued benefits, the plan would be so structured as to evade the requirements of section 411(b).) A defined benefit plan does not satisfy the requirements of section 411(b) and this section merely because the accrued benefit is defined as the "reserve under the plan". Special rules are provided for the first two years of service by a participant, certain insured defined benefit plans, and certain reductions in accrued benefits due to increasing age or service. In addition, a special rule is provided with respect to accruals for service before the effective date of section 411.

(2) Cross references—

(i) 3 percent method. For rules relating to the 3 percent method of determining accrued benefits, see paragraph (b)(1) of this section.

(ii) 133⅓ percent method. For rules relating to the 133⅓ percent method of determining accrued benefits, see paragraph (b)(2) of this section.

(iii) Fractional method. For rules relating to the fractional method of determining accrued benefits, see paragraph (b)(3) of this section.

(iv) Accruals before effective date. For rules relating to accruals for service before the effective date of section 411, see paragraph (c) of this section.

(v) First 2 years of service. For special rules relating to determination of accrued benefit for first 2 continuous years of service, see paragraph (d)(1) of this section.

(vi) Certain insured plans. For special rules relating to determination of accrued benefit under a defined benefit plan funded exclusively by insurance contracts, see paragraph (d)(2) of this section.

(vii) Accruals decreased by increasing age or service. For special rules relating to prohibition of decrease in accrued benefit on account of increasing age or service, see paragraph (d)(3) of this section.

(viii) Separate accounting. For rules relating to requirements for separate accounting, see paragraph (e) of this section.

(ix) Year of participation. For definition of "year of participation", see paragraph (f) of this section.

(b) Defined benefit plans. A defined benefit plan satisfies the requirements of section 411(b)(1) and this paragraph for a plan year to which section 411 and this section apply if it satisfies the requirements of subparagraph (1), (2), or (3) of this paragraph for such year.

(1) 3 percent method—(i) General rule. A defined benefit plan satisfies the requirements of this paragraph for a plan year if, as of the close of the plan year, the accrued benefit to which each participant is entitled, computed as if the participant separated from the service as of the close of such plan year, is not less than 3 percent of the 3 percent method benefit, multiplied by the number of years (not in excess of 33⅓) of his participation in the plan including years after his normal retirement age. For purposes of this subparagraph, the "3 percent method benefit" is the normal retirement benefit to which the participant would be entitled if he commenced participation at the earliest possible entry age for any individual who is or could be a participant under the plan and if he served continuously until the earlier of age 65 or the normal retirement age under the plan.

(ii) Special rules—(A) Compensation. In the case of a plan providing a retirement benefit based upon compensation during any period, the normal retirement benefit to which a participant would be entitled is determined as if he continued to earn annually the average rate of compensation which he earned during consecutive years of service, not in excess of 10, for which his compensation was the highest. For purposes of this subdivision (A), the number of consecutive years of service used in computing average compensation shall be the number of years of service specified under the plan (not in excess of 10) for computing normal retirement benefits.

(B) Social security, etc. For purposes of this subparagraph, for any plan year, social security benefits and all relevant factors used to compute benefits, *e.g.*, consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(C) Computation in certain cases. In the case of any plan to which the provisions of section 411(b)(1)(D) and paragraph (c) of this section are applicable, for any plan year the accrued benefit of any participant shall not be less than the accrued benefit otherwise determined under this subparagraph, reduced by the excess of the accrued benefit

determined under this subparagraph as of the first day of the first plan year to which section 411 applies over the accrued benefit determined under section 411(b)(1)(D) and paragraph (c) of this section and increased by the amount determined under paragraph (c)(2)(v) of this section.

(iii) Examples. The application of this subparagraph is illustrated by the following examples:

Example (1). The M Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 or $4 per month for each year of participation. As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. The plan provides for no limit on the number of years of credited service. A, age 40, is a participant in the M Corporation's plan.

A has completed 12 years of participation in the plan of the M Corporation as of the close of the plan year. Under subdivision (i) of this subparagraph, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of $1,920 [40×(12×$4)]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless A has accrued an annual benefit of at least $691 [0.03×($1,920×12)] as of the close of the plan year. Under the M Corporation plan, A is entitled to an accrued benefit of $576 [(12×12)×$4] as of the close of the plan year. Thus, with respect to A, the accrued benefit provided under the M Corporation plan does not satisfy the requirements of this subparagraph.

Example (2). Assume the same facts as in example (1) except that the M Corporation's plan provides that only the first 30 years of participation are taken into account. Under subdivision (i) of this subparagraph, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age under the plan (25) and served continuously until normal retirement age (65) is an annual benefit of $1.440 [30×$48]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless A has accrued an annual benefit of at least $518 [0.03×($1,-440×12)] as of the close of the plan year. Under the M Corporation plan, A is entitled to an accrued benefit of $576 [12×$48]. Thus, with respect to A, the accrued benefit provided under the M Corporation plan satisfies the requirements of this subparagraph.

Example (3). The N Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 50 percent of average compensation for the highest 3 consecutive years of compensation for an employee with 25 years of participation. A participant who separates from service before age 65 is entitled to 2 percent of average compensation for the highest 3 consecutive years of compensation for each year of participation not in excess of 25. The plan has no minimum age or service requirement for participation. The normal retirement age specified under the plan is age 65. On December 31, 1990, B, age 40, is a participant in the N Corporation's plan. B began employment with the N Corporation and became a participant in the N Corporation's plan on January 1, 1980. Under this subparagraph, the normal retirement benefit to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is 50 percent of average compensation for the highest 3 consecutive years of compensation per year commencing at age 65. Under this subparagraph, B must have accrued an annual benefit of at least 16.5 percent of his highest 3 consecutive years of compensation per year commencing at age 65 [0.03×50 percent of average compensation for the highest 3 consecutive years of compensation × 11] as of the close of the plan year. Under the N Corporation plan, B has accrued an annual benefit of 22 percent of average compensation for his highest 3 consecutive years of compensation per year commencing at age 65. Thus, with respect to B, the accrued benefit under the N Corporation plan satisfies the requirements of this subparagraph.

Example (4). The P Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 50 percent of average compensation for the 3 consecutive years of compensation from the P Corporation next preceding normal retirement age. The plan has no minimum age or service requirement for participation. The normal retirement age under the plan is age 65. On December 31, 1990, C, age 55, separates from service with the P Corporation. C began employment with the P Corporation and became a participant in the P Corporation's plan on January 1, 1980. As of December 31, 1990, C's average compensation for the 3 consecutive years preceding his separation from service is $15,000. Under this subparagraph, the normal retirement benefit to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of 50 percent of average compensation for the 3 consecutive years of compensation from the P Corporation next preceding normal retirement age commencing at age 65. C must have accrued an annual benefit of at least $2,475 commencing at age 65 [0.03×(0.050×$15,000)×11] as of his separation from the service with the P Corporation in order for the P Corporation's plan to satisfy the requirements of this subparagraph with respect to C.

Example (5). On December 31, 1985, the R Corporation's defined benefit plan provided an annual retirement benefit commencing at age 65 of $100 for each year of participation, not to exceed 30. As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. The appropriate computation period is the calendar year. On January 1, 1986, the plan is amended to provide an annual retirement benefit commencing at age 65 of $200 for each year of participation (before and after the amendment), not to exceed 30. B, age 40, is a participant in the R Corporation's plan. B has completed 15 years of participation in the plan of the R Corporation as of December 31, 1990. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of $6,000 [30×200]. Under subdivision (i) of this subparagraph, the plan does not satisfy the requirements of this subparagraph unless B has accrued an annual benefit of at least $2,700 [0.03×$6,000×15] as of December 31, 1990. Under the R Corporation plan, B is entitled to an accrued benefit of $3,000 [$200×15] as of December 31, 1990. Thus, with respect to B, the accrued benefit provided under the R Corporation plan satisfies the requirements of this subparagraph.

Example (6). On December 31, 1995, the J Corporation's defined benefit plan provided an annual retirement benefit commencing at age 65 of $4,800 after 30 years of participation. The normal retirement age specified under the plan is age 65. The appropriate computation period is the calendar year. On

January 1, 1996, the plan is amended to provide an annual retirement benefit commencing at age 65 of $6,000. A, age 40, is a participant in the J Corporation's plan since its adoption on January 1, 1986. Under paragraph (b)(1)(i) of this section, on December 31, 1995, the normal retirement benefit commencing at age 5 to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of $4,800. Under paragraph (b)(1)(i) of this section, on January 1, 1996, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (0) under the plan and served continuously until normal retirement age (65) is an annual benefit of $6,000. Under subdivision (i) of this subparagraph, the plan does not satisfy the requirements of this subparagraph unless A has an accrued benefit on December 31, 1995 of at least $1,440 [$4,800×0.02×10] and an accrued benefit on January 1, 1996 of at least $1,800 [$6,000×0.03×10].

Example (7). The X Company's defined benefit plan provides an annual retirement benefit commencing at age 65 of $4 per month for each year of participation (not to exceed 30). As a condition of participation, the plan requires that an employee have attained age 25. The normal retirement age specified under the plan is age 65. D, age 68, is a participant in the X Company's plan. D has completed 20 years of participation in the X Company plan as of the close of the plan year. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit, commencing at age 65, of $1,440 [30×$48]. Under paragraph (b)(1)(i) of this section, the plan does not satisfy the requirements of this subparagraph unless D has accrued an annual benefit, commencing at age 65, of $864 [0.03×$1,440×20] as of the close of the plan year. Under the X Company plan, D has accrued an annual benefit, commencing at age 65, of $960 [20×$48]. Thus, with respect to D the accrued benefit provided under the X Company plan satisfies the requirements of this subparagraph.

Example (8). Assume the same facts as in example (7) except that for purposes of determining accrued benefits under the plan the X Company's plan disregards all years of participation after normal retirement age. Under paragraph (b)(1)(i) of this section, the normal retirement benefit commencing at age 65 to which a participant would be entitled if he commenced participation at the earliest possible entry age (25) under the plan and served continuously until normal retirement age (65) is an annual benefit of $1,440 [30×$48]. Under paragraph (b)(1)(i) of this section the plan does not satisfy the requirements of this subparagraph unless D has accrued an annual benefit, commencing at age 65, of $864 [0.03×$1,440×20] as of the close of the plan year. Under the X Company's plan D has accrued an annual benefit commencing at age 65, of $816 [17×$48]. Thus, with respect to D, the accrued benefit provided under the X Company plan does not satisfy the requirements of this subparagraph.

(2) 133⅓ percent rule—(i) General rule. A defined benefit plan satisfies the requirements of this subparagraph for a particular plan year if—

(A) Under the plan the accrued benefit payable at the normal retirement age (determined under the plan) is equal to the normal retirement benefit (determined under the plan), and

(B) The annual rate at which any individual who is or could be a participant can accrue the retirement benefits payable at normal retirement age under the plan for any later plan year cannot be more than 133 ⅓ percent of the annual rate at which he can accrue benefits for any plan year beginning on or after such particular plan year and before such later plan year.

(ii) Special rules. For purposes of this subparagraph—

(A) Plan amendments. Any amendment to the plan which is in effect for the current plan year shall be treated as if it were in effect for all other plan years.

(B) Change in accrual rate. Any change in an accrual rate which change does not apply to any individual who is or could be a participant in the plan year is disregarded. Thus, for example, if for its plan year beginning January 1, 1980, a defined benefit plan provides an accrued benefit in plan year 1980 of 2 percent of a participant's average compensation for his highest 3 years of compensation for each year of service and provides that in plan year 1981 the accrued benefit will be 3 percent of such average compensation, the plan will not be treated as failing to satisfy the requirements of this subparagraph for plan year 1980 because in plan year 1980 the change in the accrual rate does not apply to any individual who is or could be a participant in plan year 1980. However, if, for example, a defined benefit plan provided for an accrued benefit of 1 percent of a participant's average compensation for his highest 3 years of compensation for each of the first 10 years of service and 1.5 percent of such average compensations for each year of service thereafter, the plan will be treated as failing to satisfy the requirements of this subparagraph for the plan year even though no participant is actually accruing at the 1.5 percent rate because an individual who could be a participant and who had over 10 years of service would accrue at the 1.5 percent rate, which rate exceeds 133 ⅓ percent of the 1 percent rate.

(C) Early retirement benefits. The fact that certain benefits under the plan may be payable to certain participants before normal retirement age is disregarded. Thus, the requirements of subdivision (i) of this subparagraph must be satisfied without regard to any benefit payable prior to the normal retirement benefit (such as an early retirement benefit which is not the normal retirement benefit (see § 1.411(a)–7(c)).

(D) Social security, etc. For purposes of this paragraph, for any plan year, social security bene-

fits and all relevant factors used to compute benefits, *e.g.*, consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(E) Postponed retirement. A plan shall not be treated as failing to satisfy the requirements of this subparagraph for a plan year merely because no benefits under the plan accrue to a participant who continues service with the employer after such participant has attained normal retirement age.

(F) Computation of benefit. A plan shall not satisfy the requirements of this subparagraph if the base for the computation of retirement benefits changes solely by reason of an increase in the number of years of participation. Thus, for example, a plan will not satisfy the requirements of this subparagraph if it provides a benefit, commencing at normal retirement age, of the sum of (1) 1 percent of average compensation for a participant's first 3 years of participation multiplied by his first 10 years of participation (or, if less than 10 his total years of participation) and (2) 1 percent of average compensation for a participant's 3 highest years of participation multiplied by each year of participation subsequent to the 10th year.

(iii) Examples. The application of this subparagraph is illustrated by the following examples:

Example (1). On January 1, 1980, the R Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of 5 consecutive years of participation for which his compensation is the highest. The percentage is 2 percent for each of the first 20 years of participation and 1 percent per year thereafter. The appropriate computation period is the calendar year. The R Corporation's plan satisfies the requirements of this subparagraph because the 133⅓ percent rule does not restrict subsequent accrual rate decreases.

Example (2). On January 1, 1980, the J Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of his final 5 consecutive years of participation. The percentage is 1 percent for each of the first 5 years of participation; 1 ⅓ percent for each of the next 5 years of participation; and 1 ⅞ percent for each year thereafter. The appropriate computation period is the calendar year. Even though no single accrual rate under the J Corporation's plan exceeds 133 ⅓ percent of the immediately preceding accrual rate, the J Corporation's plan does not satisfy the requirements of this subparagraph because the rate of accrual for all years of participation in excess of 10 (1 ⅞ percent) exceeds 133⅓ percent of the rate of accrual for any of the first 5 years of participation (1 percent).

Example (3). On January 1, 1980, the C Corporation's defined benefit plan provides for an annual benefit (commencing at age 65) of a percentage of a participant's average compensation for the period of 3 consecutive years of participation for which his compensation is the highest. The percentage is 2 percent for each of the first 5 years of participation; 1 percent for each of the next 5 years of participation; and 1 ½ percent for each year thereafter. The appropriate computation period is the calendar year. Even though the average rate of accrual under the C Corporation's plan is not less rapidly than ratably, the C Corporation's plan does not satisfy the requirements of this subparagraph because the rate of accrual for all years of participation in excess of 10 (1 ½ percent) for any employee who is actually accruing benefits or who could accrue benefits exceeds 133 ⅓ percent of the rate of accrual for the sixth through tenth years of participation, respectively (1 percent).

(3) Fractional rule—(i) In general. A defined benefit plan satisfies the requirements of this paragraph if the accrued benefit to which any participant is entitled is not less than the fractional rule benefit multiplied by a fraction (not exceeding 1)—

(A) The numerator of which is his total number of years of participation in the plan, and

(B) The denominator of which is the total number of years he would have participated in the plan if he separated from the service at the normal retirement age under the plan.

(ii) Special rules. For purposes of this subparagraph—

(A) Fractional rule benefit. The "fractional rule benefit" is the annual benefit commencing at the normal retirement age under the plan to which a participant would be entitled if he continued to earn annually until such normal retirement age the same rate of compensation upon which his normal retirement benefit would be computed. Such rate of compensation shall be computed on the basis of compensation taken into account under the plan (but taking into account average compensation for no more than the 10 years of service immediately preceding the determination). For purposes of this subdivision (A), the normal retirement benefit shall be determined as if the participant had attained normal retirement age on the date any such determination is made.

(B) Social security, etc. For purposes of this subparagraph, for any plan year, social security benefits and all relevant factors used to compute benefits, *e.g.*, consumer price index, are treated as remaining constant as of the beginning of the current plan year for all subsequent plan years.

(C) Postponed retirement. A plan shall not be treated as failing to satisfy the requirements of this subparagraph merely because no benefits under the plan accrue to a participant who continues service with the employer after such participant has attained normal retirement age under the plan.

(D) Computation in certain cases. In the case of any plan to which the provisions of section 411(b)(1)(D) and paragraph (c) of this section are

applicable, for any plan year the accrued benefit of any participant shall not be less than the accrued benefit otherwise determined under this subparagraph, reduced by the excess of the accrued benefit determined under this subparagraph as of the first day of the first plan year to which section 411 applies over the accrued benefit determined under section 411(b)(1)(D) and paragraph (c) of this section and increased by the amount determined under paragraph (c)(2)(v) of this section.

(iii) Examples. The application of this subparagraph is illustrated by the following examples:

Example (1). The R Corporation's defined benefit plan provides an annual retirement benefit commencing at age 65 of 30 percent of a participant's average compensation for his highest 3 consecutive years of participation. If a participant separates from service prior to normal retirement age, the R Corporation's plan provides a benefit equal to an amount which bears the same ratio to 30 percent of such average compensation as the participant's actual number of years of participation in the plan bears to the number of years the participant would have participated in the plan had he separated from service at age 65. The plan further provides that normal retirement age is age 65. A, age 55, is a participant in the R Corporation's plan for the current year, and A has 15 years of participation in the R Corporation's plan. As of the current year, A's average compensation for his highest 3 years of compensation is $20,000. The R Corporation's plan satisfies the requirements of this subparagraph because if A separates from the service in the current year he will be entitled to an annual benefit of $3,600 commencing at age 65 [$0.3 \times \$20,000 \times {}^{15}/_{25}$].

Example (2). The J Corporation's defined benefit plan provides a normal retirement benefit of 1 percent per year of a participant's average compensation from the employer. In the case of a participant who separates from service prior to normal retirement age (65), the plan provides that the annual benefit is an amount which is equal to 1 percent of such compensation multiplied by the number of years of plan participation actually completed by the participant. The plan year of the J Corporation's plan is the calendar year. B, age 55, is a participant in the J Corporation's plan for the current year. B became a participant in the J Corporation's plan on January 1, 1980. As of December 31, 1990, B's compensation history is as follows:

Year	Compensation
1980	$17,000
1981	18,000
1982	20,000
1983	20,000
1984	21,000
1985	22,000
1986	23,000
1987	25,000
1988	26,000
1989	29,000
1990	32,000

If B separates from service on December 31, 1990, he would be entitled to an annual benefit of $2,530 commencing at age 65. Because the J Corporation's plan does not limit the number of years of compensation to be taken into account in determining the normal retirement benefit, B's rate of compensation for purposes of determining his normal retirement benefit is $23,600 [$18,000 + $20,000 + $20,000 + $21,000 + $22,000 + $23,000 + $25,000 + $26,000 + $29,000 + $32,000]/10. Under this subparagraph, B's accrued benefit under the J Corporation's plan as of December 31, 1990 must be not less than $2,561 per year commencing at age 65 [0.01 × ($17,000 + $18,000 + $20,000 + $20,000 + $21,000 + $22,000 + $23,000 + $25,000 + $26,000 + $29,000 + $32,000 + ($23,600 × 10)) × $^{11}/_{21}$]. Thus, the J Corporation's plan would not satisfy the requirements of this subparagraph.

(c) Accruals for service before effective date—(1) General rule. For a plan year to which section 411 applies, a defined benefit plan does not satisfy the requirements of section 411(b)(1) and this section unless, under the plan, the accrued benefit of each participant for plan years beginning before section 411 applies is not less than the greater of—

(i) Such participant's accrued benefit (as of the day before section 411 applies) determined under the plan as in effect from time to time prior to September 2, 1974 (without regard to any amendment adopted after such date), or

(ii) One-half of the accrued benefit that would be determined with respect to the participant as of the day before section 411 applies if the participant's accrued benefit were computed for such prior plan years under a method which satisfies the requirements of section 411(b)(1)(A), (B), or (C) and paragraph (b)(1), (2), or (3) of this section. See 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans, for time participation deemed to begin.

(2) Special rules. (i) A plan shall not be deemed to fail to satisfy the requirements of section 411(b) and this section merely because the method for computing the accrued benefit of a participant for years of participation prior to the first plan year for which section 411 is effective with respect to the plan is not the same method for computing the accrued benefit of a participant for years of participation subsequent to such plan year.

(ii) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(A) and paragraph (b)(1) of this section shall be applied as if the participant separated from service with the employer on the day before the first day of the first plan year to which section 411 applies.

(iii) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(B) and paragraph (b)(2) of this section shall be applied in the following manner:

(A) Except as provided in (c)(2)(iii)(B) of this section, section 411(b)(1)(B) and paragraph (b)(2) of this section shall be applied as if the participant separated from service with the employer on the

day before the first day of the first plan year to which section 411 applies.

(B) In the case that the plan does not satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section at any time prior to the day specified in (c)(2)(iii)(A) of this section, the plan shall be deemed revised to the extent necessary to satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section for all plan years beginning before the applicable effective date of section 411 and this section. For purposes of the preceding sentence, a plan shall not be deemed revised to the extent necessary to satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section for a plan year if the benefit a participant would receive if he were employed until normal retirement age is reduced by such revision or if the revised rate of accrual with respect to such accrued benefit does not otherwise satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section.

(iv) For purposes of paragraph (c)(1)(ii) of this section, section 411(b)(1)(C) and paragraph (b)(3) of this section shall be applied as if the participant separated from service on the day before the first day of the first plan year to which section 411 applies.

(v) The excess of the accrued benefit payable at normal retirement age of any participant determined under section 411(b)(1)(A), (B), or (C) (without regard to section 411(b)(1)(D)), and paragraph (b)(1), (2), or (3) of this section (without regard to this paragraph) as of the day before the first day of the first plan year to which section 411 and this section applies over the accrued benefit determined under paragraph (c)(1) of this section shall be accrued in accordance with the provisions of the plan as in effect after the applicable effective date of section 411, as if the plan had been initially adopted on such effective date.

(d) Special rules—(1) First 2 years of service. Notwithstanding paragraphs (1), (2), and (3) of paragraph (b) of this section, under section 411(b)(1)(E) and this subparagraph, a plan shall not be treated as failing to satisfy the requirements of paragraph (b) of this section solely because the accrual of benefits under the plan does not become effective until the employee has completed 2 continuous years of service. For purposes of this subparagraph, continuous years of service are years of service (within the meaning of section 410(a)(3)(A)) which are not separated by a break in service (within the meaning of section 410(a)(5)). For years of service beginning after such 2 years of service, the accrued benefit of an employee shall not be less than that to which the employee would be entitled if section 411(b)(1)(E) and this subparagraph did not apply. Thus, for example, a plan which otherwise satisfies the requirements of paragraph (b)(2) of this section provides for a rate of accrual of 1 percent of average compensation for the highest 3 years of compensation beginning with the third year of service of a participant shall not be treated as satisfying paragraph (b)(2) of this section because as of the time the employee completes 3 continuous years of service there is no accrual during the first 2 years of service. In addition, a plan which otherwise satisfies the requirements of paragraph (b)(1) of this section and which requires that an employee must attain age 25 and complete 1 year of service prior to becoming a participant will not satisfy the requirements of paragraph (b)(1) of this section if an employee who completes 2 years of service prior to attaining age 25 does not begin accruals immediately upon commencement of participation in the plan. For rules relating to years of service, see 29 CFR Part 2530, Department of Labor regulations relating to minimum standards for employee pension benefit plans.

(2) Certain insured defined benefit plans. Notwithstanding paragraphs (b)(1), (2), and (3) of this section, a defined benefit plan satisfies the requirements of paragraph (b) of this section if such plan is funded exclusively by the purchase of contracts from a life insurance company and such contracts satisfy the requirements of sections 412(i)(2) and (3) and the regulations thereunder. The preceding sentence is applicable only if an employee's accrued benefit as of any applicable date is not less than the cash surrender value such employee's insurance contracts would have on such applicable date if the requirements of section 412(i)(4), (5), and (6) and the regulations thereunder were satisfied.

(3) Accrued benefit may not decrease on account of increasing age or service. Notwithstanding paragraphs (b)(1), (2), and (3) of this section and paragraphs (d)(1) and (2) of this section, a defined benefit plan shall be treated as not satisfying the requirements of paragraphs (b) and (d) of this section if the participant's accrued benefit is reduced on account of any increase in his age or years of service. The preceding sentence shall not apply to social security supplements described in § 1.411(a)–7(c)(4).

(e) Separate accounting. A plan satisfies the requirements of this paragraph if the requirements

of paragraph (e)(1) or (2) of this paragraph are met.

(1) Defined benefit plan. In the case of a defined benefit plan, the requirements of this paragraph are satisfied if the plan requires separate accounting for the portion of each employee's accrued benefit derived from any voluntary employee contributions permitted under the plan. For purposes of this subparagraph the term "voluntary employee contributions" means all employee contributions which are not mandatory contributions within the meaning of section 411(c)(2)(C) and the regulations thereunder. See § 1.411(c)–1(b)(1) for rules requiring the determination of such an accrued benefit by the use of a separate account.

(2) Defined contribution plan. In the case of a defined contribution plan, the requirements of this paragraph are not satisfied unless the plan requires separate accounting for each employee's accrued benefit. If a plan utilizes the break in service rule of section 411(a)(6)(C), an employee could have different percentages of vesting between pre-break and post-break accrued benefits. In such a case, the requirements of this paragraph are not satisfied unless the plan computes accrued benefits in a manner which takes into account different percentages. A plan which provides separate accounts for pre-break and post-break accrued benefits will be deemed to compute benefits in a reasonable manner.

(f) Year of participation—(1) In general. This paragraph is inapplicable to a defined contribution plan. For purposes of determining an employee's accrued benefit, a "year of participation" is a period of service determined under regulations prescribed by the Secretary of Labor in 29 CFR Part 2530, relating to minimum standards for employee pension benefit plans.

(2) Additional rule relating to year of participation. A trust shall not constitute a qualified trust if the plan of which such trust is a part provides for the crediting of a year of participation, or part thereof, and such credit results in the discrimination prohibited by section 401(a)(4).

(g) Additional illustrations. The application of this section may be illustrated by the following example:

Example. (i) The S Corporation established a defined benefit plan on January 1, 1980. The plan provides a minimum age for participation of age 25. The normal retirement age under the plan is age 65. The appropriate computation periods are the calendar year. The plan provides an annual benefit, commencing at age 65, equal to $96 per year of service for the first 25 years of service, and $48 per year of service for each additional year of service.

(ii) The plan of the S Corporation does not satisfy the requirements of section 411(b)(1)(A) and paragraph (b)(1) of this section because the accrued benefit under the plan at some point will be less than the accrued benefit required under section 411(b)(1)(A) and paragraph (b)(1) of this section (i.e., 3 percent × normal retirement benefit × years of participation).

(iii) The plan of the S Corporation does satisfy the requirements of section 411(b)(1)(B) and paragraph (b)(2) of this section because the rate of benefit accrual is equal in each of the first 25 years of service and the rate decreases thereafter.

(iv) The plan of the S Corporation does satisfy the requirements of section 411(b)(1)(C) and paragraph (b)(3) of this section because the accrued benefit under the plan will equal or exceed the normal retirement benefit multiplied by the fraction described in paragraph (b)(3)(i) of this section.

[T.D. 7501, 42 FR 42334, Aug. 23, 1977]

§ 1.411(c)–1 Allocation of accrued benefits between employer and employee contributions.

(a) Accrued benefit derived from employer contributions. For purposes of section 411 and the regulations thereunder, under section 411(c)(1), an employee's accrued benefit derived from employer contributions under a plan as of any applicable date is the excess, if any, of—

(1) The total accrued benefit under the plan provided for the employee as of such date, over

(2) The accrued benefit provided for the employee, derived from contributions made by the employee under the plan as of such date.

For computation of accrued benefit derived from employee contributions to a defined contribution plan or from voluntary employee contributions to a defined benefit plan, see paragraph (b) of this section. For computation of accrued benefit derived from mandatory employee contributions to a defined benefit plan, see paragraph (c) of this section.

(b) Accrued benefit derived from employee contribution to defined contribution plan, etc. For purposes of section 411 and the regulations thereunder, under section 411(c)(2)(A) the accrued benefit derived from employee contributions to a defined contribution plan is determined under paragraph (b)(1) or (2) of this section, whichever applies. Under section 411(d)(5), the accrued benefit derived from voluntary employee contributions to a defined benefit plan is determined under paragraph (b)(1) of this section.

(1) Separate accounts maintained. If a separate account is maintained with respect to an employee's contributions and all income, expenses, gains, and losses attributable thereto, the accrued benefit

determined under this subparagraph as of any applicable date is the balance of such account as of such date.

(2) **Separate accounts not maintained.** If a separate account is not maintained with respect to an employee's contributions and the income, expenses, gains, and losses attributable thereto, the accrued benefit determined under this subparagraph is the employee's total accrued benefit determined under the plan multiplied by a fraction—

(i) The numerator of which is the total amount of the employee's contributions under the plan less withdrawals, and

(ii) The denominator of which is the sum of (A) the amount described in paragraph (b)(2)(i) of this section, and (B) the total contributions made under the plan by the employer on behalf of the employee less withdrawals.

For purposes of this subparagraph, contributions include all amounts which are contributed to the plan even if such amounts are used to provide ancillary benefits, such as incidental life insurance, health insurance, or death benefits, and withdrawals include only amounts distributed to the employee and do not reflect the cost of any death benefits under the plan.

(c) **Accrued benefit derived from mandatory employee contributions to a defined benefit plan**—(1) **General rule.** In the case of a defined benefit plan (as defined in section 414(j)) the accrued benefit derived from contributions made by an employee under the plan as of any applicable date is an annual benefit, in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, equal to the amount of the employee's accumulated contributions (determined under paragraph (c)(3) of this section) multiplied by the appropriate conversion factor (determined under paragraph (c)(2) of this section). Paragraph (e) of this section provides rules for actuarial adjustments where the benefit is to be determined in a form other than the form described in this paragraph.

(2) **Appropriate conversion factor.** For purposes of this paragraph, the term "appropriate conversion factor" means the factor necessary to convert an amount equal to the accumulated contributions to a single life annuity (without ancillary benefits) commencing at normal retirement age and shall be 10 percent for a normal retirement age of 65 years. For other normal retirement ages the appropriate conversion factor shall be the factor as determined by the Commissioner.

(3) **Accumulated contributions.** For purposes of section 411(c) and this section, the term "accumulated contributions" means the total of—

(i) All mandatory contributions made by the employee (determined under paragraph (c)(4) of this section),

(ii) Interest (if any) on such contributions, computed at the rate provided by the plan to the end of the last plan year to which section 411(a)(2) does not apply (by reason of the applicable effective date), and

(iii) Interest on the sum of the amounts determined under paragraphs (c)(3)(i) and (ii) of this section compounded annually at the rate of 5 percent per annum from the beginning of the first plan year to which section 411(a)(2) applies (by reason of the applicable effective date) to the date on which the employee would attain normal retirement age.

For example, if under section 1017 of the Employee Retirement Income Security Act of 1974, section 411(a)(2) of the Code applies for plan years beginning after December 31, 1975, and for plan years beginning before 1975, the plan provided for 3 percent interest on employee contributions, an employee's accumulated contributions would be computed by crediting interest at the rate provided by the plan (3 percent) for plan years beginning before 1976 and by crediting interest at the rate of 5 percent (or another rate prescribed under section 411(c)(2)(D)) thereafter. Section 1017 of the Employee Retirement Income Security Act of 1974 and § 1.411(a)–2 provide the effective dates for the application of section 411(a)(2).

(4) **Mandatory contributions.** For purposes of section 411(c) and this section the term "mandatory contributions" means amounts contributed to the plan by the employee which are required as a condition of his employment, as a condition of his participation in the plan, or as a condition of obtaining benefits (or additional benefits) under the plan attributable to employer contributions. For example, if the benefit derived from employer contributions depends upon a specified level of employee contributions, employee contributions up to that level would be treated as mandatory contributions. Mandatory contributions, otherwise satisfying the requirements of this subparagraph, include amounts contributed to the plan which are used to provide ancillary benefits such as incidental life insurance, health insurance, or death benefits.

(d) Limitation on accrued benefit. The accrued benefit derived from mandatory employee contributions under a defined benefit plan (determined under paragraph (c) of this section) shall not exceed the greater of—

(1) The accrued benefit of the employee under the plan, or

(2) The accrued benefit derived from employee contributions determined without regard to any interest under section 411(c)(2)(C)(ii) and (iii) and under paragraphs (c)(3)(ii) and (iii) of this section.

(e) Actuarial adjustments for defined benefit plans—(1) Accrued benefit. In the case of a defined benefit plan (as defined in section 414(j)) if an employee's accrued benefit is to be determined as an amount other than an annual benefit commencing at normal retirement age, such benefit (determined under section 411(c)(1) and paragraph (a) of this section) shall be the actuarial equivalent of such benefit, as determined by the Commissioner.

(2) Accrued benefit derived from employee contributions. In the case of a defined benefit plan (as defined in section 414(j)) if the accrued benefit derived from mandatory contributions made by an employee is to be determined with respect to a benefit other than an annual benefit in the form of a single life annuity (without ancillary benefits) commencing at normal retirement age, such benefit shall be the actuarial equivalent of such benefit (determined under section 411(c)(2)(B) and paragraph (c) of this section) as determined by the Commissioner.

(f) Suspension of benefits, etc.—(1) Suspensions. No adjustment to an accrued benefit is required on account of any suspension of benefits if such suspension is permitted under section 203(a)(3)(B) of the Employee Retirement Income Security Act of 1974 (88 Stat. 855) (Code section 411(a)(3)(B)).

(2) Employment after retirement. No actuarial adjustment to an accrued benefit is required on account of employment after normal retirement age. For example, if a plan with a normal retirement age of 65 provides a benefit of $400 a month payable at age 65 the same $400 benefit (with no upward adjustment) could be paid to an employee who retires at age 68.

[T.D. 7501, 42 FR 42338, Aug. 23, 1977]

§ 1.411(d)–1 Coordination of vesting and discrimination requirements. [Reserved]

§ 1.411(d)–2 Termination or partial termination; discontinuance of contributions.

(a) General rule—(1) Required nonforfeitability. A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan provides that—

(i) Upon the termination or partial termination of the plan, or

(ii) In addition, in the case of a plan to which section 412 (relating to minimum funding standards) does not apply, upon the complete discontinuance of contributions under the plan,

the rights of each affected employee to benefits accrued to the date of such termination or partial termination (or, in the case of a plan to which section 412 does not apply, discontinuance), to the extent funded, or the rights of each employee to the amounts credited to his account at such time, are nonforfeitable (within the meaning of § 1.411(a)–4).

(2) Required allocation. (i) A plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) unless the plan provides for the allocation of any previously unallocated funds to the employes covered by the plan upon the termination or partial termination of the plan (or, in the case of a plan to which section 412 does not apply, upon the complete discontinuance of contributions under the plan). Such provision may be incorporated in the plan at its inception or by an amendment made prior to the termination or partial termination of the plan for the discontinuance of contributions thereunder. In the case of a defined contribution plan under which unallocated forfeitures are held in a suspense account in order to satisfy the requirements of section 415, this subdivision shall not require such plan to provide for allocations from the suspense account to the extent that such allocations would result in annual additions to participants' accounts in excess of amounts permitted under section 415 for the year for which such allocations would be made.

(ii) Any provision for the allocation of unallocated funds which is found by the Secretary of Labor or the Pension Benefit Guaranty Corporation (whichever is appropriate) to satisfy the requirements of section 4044 or section 403(d)(1) of the Employee Retirement Income Security Act of 1974 is acceptable if it specifies the method to be

used and does not conflict with the provisions of section 401(a)(4) of the Internal Revenue Code of 1954 and the regulations thereunder. Any allocation of funds required by paragraph (1), (2), (3), or (4)(A) of section 4044(a) of such Act shall be deemed not to result in discrimination prohibited by section 401(a)(4) of the Code (see, however, paragraph (e) of this section). Notwithstanding the preceding sentence, in the case of a plan which establishes subclasses or categories pursuant to section 4044(b)(6) of such Act, the allocation of funds by the use of such subclasses or categories shall not be deemed not to result in discrimination prohibited by the Code. The allocation of unallocated funds may be in cash or in the form of other benefits provided under the plan. However, the allocation of the funds contributed by the employer among the employees need not necessarily benefit all the employees covered by the plan.

(iii) Paragraphs (a)(2)(i) and (ii) of this section do not require the allocation of amounts to the account of any employee if such amounts are not required to be used to satisfy the liabilities with respect to employees and their beneficiaries under the plan (see section 401(a)(2)).

(b) Partial termination—(1) General rule. Whether or not a partial termination of a qualified plan occurs (and the time of such event) shall be determined by the Commissioner with regard to all the facts and circumstances in a particular case. Such facts and circumstances include: the exclusion, by reason of a plan amendment or severance by the employer, of a group of employees who have previously been covered by the plan; and plan amendments which adversely affect the rights of employees to vest in benefits under the plan.

(2) Special rule. If a defined benefit plan ceases or decreases future benefit accruals under the plan, a partial termination shall be deemed to occur if, as a result of such cessation or decrease, a potential reversion to the employer, or employers, maintaining the plan (determined as of the date such cessation or decrease is adopted) is created or increased. If no such reversion is created or increased, a partial termination shall be deemed not to occur by reason of such cessation or decrease. However, the Commissioner may determine that a partial termination of such a plan occurs pursuant to subparagraph (1) of this paragraph for reasons other than such cessation or decrease.

(3) Effect of partial termination. If a termination of a qualified plan occurs, the provisions of section 411(d)(3) apply only to the part of the plan that is terminated.

(c) Termination—(1) Application. This paragraph applies to a plan other than a plan described in section 411(e)(1) (relating to governmental, certain church plans, etc.).

(2) Plans subject to termination insurance. For purposes of this section, a plan to which title IV of the Employee Retirement Income Security Act of 1974 applies is considered terminated on a particular date if, as of that date—

(i) The plan is voluntarily terminated by the plan administrator under section 4041 of the Employee Retirement Income Security Act of 1974, or

(ii) The Pension Benefit Guaranty Corporation terminates the plan under section 4042 of the Employee Retirement Income Security Act of 1974.

For purposes of this subparagraph, the particular date of termination shall be the date of termination determined under section 4048 of such Act.

(3) Other plans. In the case of a plan not described in paragraph (c)(2) of this section, a plan is considered terminated on a particular date if, as of that date, the plan is voluntarily terminated by the employer, or employers, maintaining the plan.

(d) Complete discontinuance—(1) General rule. For purposes of this section, a complete discontinuance of contributions under the plan is contrasted with a suspension of contributions under the plan which is merely a temporary cessation of contributions by the employer. A complete discontinuance of contributions may occur although some amounts are contributed by the employer under the plan if such amounts are not substantial enough to reflect the intent on the part of the employer to continue to maintain the plan. The determination of whether a complete discontinuance of contributions under the plan has occurred will be made with regard to all the facts and circumstances in the particular case, and without regard to the amount of any contributions made under the plan by employees. Among the factors to be considered in determining whether a suspension constitutes a discontinuance are:

(i) Whether the employer may merely be calling an actual discontinuance of contributions a suspension of such contributions in order to avoid the requirement of full vesting as in the case of a discontinuance, or for any other reason;

(ii) Whether contributions are recurring and substantial; and

(iii) Whether there is any reasonable probability that the lack of contributions will continue indefinitely.

(2) Time of discontinuance. In any case in which a suspension of a profit-sharing plan maintained by a single employer is considered a discontinuance, the discontinuance becomes effective not later than the last day of the taxable year of the employer following the last taxable year of such employer for which a substantial contribution was made under the profit-sharing plan. In the case of a profit-sharing plan maintained by more than one employer, the discontinuance becomes effective not later than the last day of the plan year following the plan year within which any employer made a substantial contribution under the plan.

(e) Contributions or benefits which remain forfeitable. Under section 411(d)(2) and (3), section 411(a) and this section do not apply to plan benefits which may not be provided for designated employees in the event of early termination of the plan under provisions of the plan adopted pursuant to regulations prescribed by the Secretary or his delegate to preclude the discrimination prohibited by section 401(a)(4). Accordingly, in such a case, plan benefits may be required to be reallocated without regard to this section. See § 1.401–4(c).

[T.D. 7501, 42 FR 42339, Aug. 23, 1977]

§ 1.411(d)–3 Other special rules.

(a) Class year plans—(1) General rule. Under section 411(d)(4), the requirements of section 411(a)(2) for a class year plan shall be deemed to be satisfied if such plan provides that each employee's rights to or derived from employer contributions on his behalf for any plan year are nonforfeitable no later than the end of the 5th plan year following the plan year for which such contributions were made. For purposes of section 411 and the regulations thereunder, the term "class year plan" means a profit-sharing, stock bonus, or money purchase plan which provides that the nonforfeitable rights of employees to or derived from employer contributions are determined separately for each plan year. See § 1.411(d)–4A for rules that apply to class year plans for contributions made for plan years beginning after October 22, 1986.

(2) Other rules—(i) Prohibited forfeiture on withdrawals. In the case of a class year plan, section 401(a)(19) and the regulations thereunder shall be applied separately to each plan year.

(ii) Distribution rules. The rules of § 1.411(a)–7(d) apply to a class year plan. For example, under the rule in § 1.411(a)–7(d)(2)(ii)(D), a class year plan would be permitted to limit the time of repayment to a 5-year period beginning on the date of withdrawal, or under the rule in § 1.411(a)–7(d)(2)(iii), a class year plan would restore the amount of the forfeited account balance in the event of repayment. For purposes of applying subparagraphs (2) and (3) of § 1.411(a)–7(d), relating to withdrawal of mandatory contributions, a withdrawal of employee contributions shall be treated as a withdrawal of such contributions on a plan year by plan year basis in succeeding order of time. Any repayments shall be treated as being on account of plan years in succeeding order of time. For purposes of applying any rule of such paragraph (*e.g.*, paragraph (d)(2)(ii)(C)) the term "one-year break in service" means any plan year in which under subparagraph (1) of this paragraph a class year plan may forfeit an employee's rights.

(iii) Computation of years for withdrawals. In applying the requirement of paragraph (a)(1) of this section that rights must be nonforfeitable no later than the end of the fifth plan year following the plan year for which contributions are made, any plan year for which there has been a withdrawal of contributions and no repayment of such contributions (determined as of the last day of the plan year) is not required to count toward the five years. For example, assume that contributions are made for A in 1981 to a calendar year plan. Under the general rule of paragraph (a)(1) of this section, the contributions must be nonforfeitable on December 31, 1986. If in 1982, A withdraws the contributions for 1981, and repays these contributions in 1984, 1982 and 1983 are not required to be counted toward the five years because at the end of each year there is a withdrawal and no repayment of such withdrawal. Accordingly, the plan must provide that A's interest in the contribution for 1981 will be vested on December 31, 1988.

(b) Prohibition against accrued benefit decrease. Under section 411(d)(6) a plan is not a qualified plan (and a trust forming a part of such plan is not a qualified trust) if a plan amendment decreases the accrued benefit of any plan participant, unless the plan amendment satisfies the requirements of section 412(c)(8) (relating to certain retroactive amendments) and the regulations thereunder. For purposes of determining whether or

not any participant's accrued benefit is decreased, all the provisions of a plan affecting directly or indirectly the computation of accrued benefits which are amended with the same adoption and effective dates shall be treated as one plan amendment. Plan provisions indirectly affecting accrued benefits include, for example, provisions relating to years of service and breaks in service for determining benefit accrual, and to actuarial factors for determining optional or early retirement benefits.

(c) Rules applicable to section 414(k) plan. For special rules applicable to defined benefit plans which provide a benefit derived from employer contributions which is based partly on a participant's separate account, see section 414(k) and the regulations thereunder.

[T.D. 7501, 42 FR 42340, Aug. 23, 1977; as amended by T.D. 8038, 50 FR 29375, July 19, 1985; T.D. 8219, 53 FR 31854, Aug. 22, 1988]

§ 1.411(d)–4 Section 411(d)(6) protected benefits.

Q-1: What are "section 411(d)(6) protected benefits"?

A-1: (a) In general. The term "section 411(d)(6) protected benefit" includes any benefit that is described in one or more of the following categories:

(1) Benefits described in section 411(d)(6)(A),

(2) Early retirement benefits and retirement-type subsidies described in section 411(d)(6)(B)(i), and

(3) Optional forms of benefit described in section 411(d)(6)(B)(ii).

Such benefits, to the extent they have accrued, are subject to the protection of section 411(d)(6) and, where applicable, the definitely determinable requirement of section 401(a) (including section 401(a)(25)) and cannot, therefore, be reduced, eliminated or made subject to employer discretion except to the extent permitted by regulations.

(b) Optional forms of benefit—(1) In general. An "optional form of benefit" is a distribution form with respect to an employee's benefit (described in paragraph (a)(1) and/or (a)(2) of this Q&A-1) that is available under the plan and is identical with respect to all features relating to the distribution form, including the payment schedule, timing, commencement, medium of distribution (e.g., in cash or in-kind), the portion of the benefit to which such distribution features apply and the election rights with respect to such optional forms. To the extent there are any differences in such features, the plan provides separate optional forms of benefit. Differences in amounts of benefits, methods of calculation, or values of distribution forms do not result in optional forms of benefit for purposes of this rule. However, such amounts, methods of calculation, or values may be protected benefits within section 411(d)(6)(A) and/or section 411(d)(6)(B)(i). See § 1.401(a)-4 for further discussion and examples relating to optional forms of benefits.

(2) Examples. The following examples illustrate the meaning of the term "optional form of benefit." Other issues, such as the requirement that the optional forms satisfy section 401(a)(4), are not addressed in these examples and no inferences are intended with respect to such requirements. Assume that the distribution forms, including those not described in these examples, provided under the plan in each of the following examples are identical in all respects not described.

Example 1. A plan permits each participant to receive his benefit under the plan as a single sum distribution; a level monthly distribution schedule over 15 years; a single life annuity; a joint and 50 percent survivor annuity; a joint and 75 percent survivor annuity; a joint and 50 percent survivor annuity with a benefit increase for the participant if the beneficiary dies before a specified date; and joint and 50 percent survivor annuity with a 10 year certain feature. Each of these benefit distribution options is an optional form of benefit (without regard to whether the values of these options are actuarially equivalent).

Example 2. A plan permits each participant to receive his benefit under the plan as a single life annuity commencing at termination from employment; a joint and 50 percent survivor annuity commencing at termination from employment; a single sum distribution that is actuarially equivalent to the single life annuity determined by using a specified interest rate (X percent) for the employees of division A; and a single sum distributions that is actuarially equivalent to the single life annuity determined by using an interest rate that is 80 percent of X percent for employees of Division B. This plan provides three optional forms of benefit. While the interest rates used to determine the single sum distributions available to the employees of Divisions A and the employees of Division B respectively differ, this difference does not result in two single sum optional forms of benefit.

Example 3. A plan permits each participant who is employed by division A to receive his benefit in a single sum distribution payable upon termination from employment and each participant who is employed by division B in a single sum distribution payable upon termination from employment on or after the attainment of age 50. This plan provides two single sum optional forms of benefit.

Example 4. A plan permits each participant to receive his benefit in a single life annuity that commences in the month after the participant's termination from employment or in a single life annuity that commences upon the completion of five consecutive one year breaks in service. These are two optional forms of benefit.

Example 5. A profit-sharing plan permits each participant who is employed by division A to receive an in-service distribution upon the satisfaction of objective criteria set forth in the plan designed to determine whether the participant has a heavy and immediate financial need, and each participant who is employed by division B to receive an in-service distribution

upon the satisfaction of objective criteria set forth in the plan designed to determine whether the participant has a heavy and immediate financial need attributable to extraordinary medical expenses. These in-service distribution options are two optional forms of benefits.

Example 6. A profit-sharing plan permits each participant who is employed by division A to receive an in-service distribution up to $5,000 and each participant who is employed by division B to receive an in-service distribution of up to his total benefit. These in-service distribution options differ as to the portion of the accrued benefit that may be distributed in a particular form and are, therefore, two optional forms of benefit.

Example 7. A profit-sharing plan provides for a single sum distribution on termination of employment. The plan is amended in 1991 to eliminate the single sum optional form of benefit with respect to benefits accrued after the date of amendment. This single sum optional form of benefit continues to be a single optional form of benefit although, over time, the percentage of various employees' accrued benefits that are potentially payable under this single sum may vary because the form is only available with respect to benefits accrued up to and including the date of the amendment.

Example 8. A profit-sharing plan permits each participant to receive a single sum distribution of his benefit in cash or in the form of a specified class of employer stock. This plan provides two single sum distribution optional forms of benefit.

Example 9. A stock bonus plan permits each participant to receive a single sum distribution of his benefit in cash or in the form of the property in which such participant's benefit was invested prior to the distribution. This plan's single sum distribution option provides two optional forms of benefit.

Example 10. A defined benefit plan provides for an early retirement benefit payable upon termination of employment after attainment of age 55 and either after ten years of service or, if earlier, upon plan termination to employees of Division A and provides for an identical early retirement benefit payable on the same terms with the exception of payment on plan termination to employees of Division B. The plan provides for two optional forms of benefit.

Example 11. A profit-sharing plan provides for loans secured by an employee's account balance. In the event of default on such a loan, there is an execution on such account balances. Such execution is a distribution of the employee's accrued benefits under the plan. A distribution of an accrued benefit contingent on default under a plan loan secured by such accrued benefits is an optional form of benefit under the plan.

(c) Plan terms—(1) General rule. Generally, benefits described in section 411(d)(6)(A), early retirement benefits, retirement-type subsidies, and optional forms of benefit are section 411(d)(6) protected benefits only if they are provided under the terms of a plan. However, if an employer establishes a pattern of repeated plan amendments providing for similar benefits in similar situations for substantially consecutive, limited periods of time, such benefits will be treated as provided under the terms of the plan, without regard to the limited periods of time, to the extent necessary to carry out the purposes of section 411(d)(6) and, where applicable, the definitely determinable requirement of section 401(a), including section 401(a)(25). A pattern of repeated plan amendments providing that a particular optional form of benefit is available to certain named employees for a limited period of time is within the scope of this rule and may result in such optional form of benefit being treated as provided under the terms of the plan to all employees covered under the plan without regard to the limited period of time and the limited group of named employees.

(2) Effective date. The provisions of paragraph (c)(1)of this Q&A-1 are effective as of July 11, 1988. Thus, patterns or repeated plan amendments adopted and effective before July 11, 1988 will be disregarded in determining whether such amendments have created an ongoing optional form of benefit under the plan.

(d) Benefits that are not section 411(d)(6) protected benefits. the following benefits are examples of items that are not section 411(d)(6) protected benefits: (1) ancillary life insurance protection; (2) accident or health insurance benefits; (3) social security supplements described in section 411(a)(9); (4) the availability of loans (other than the distribution of an employee's accrued benefit upon default under a loan); (5) the right to make after-tax employee contributions or elective deferrals described in section 402(g)(3); (6) the right to direct investments; (7) the right to a particular form of investment (e.g., investment in employer stock or securities or investment in certain types of securities, commercial paper, or other investment media); (8) the allocation dates for contributions, forfeitures and earnings, the time for making contributions (but not the conditions for receiving an allocation of contributions or forfeitures for a plan year after such conditions have been satisfied), and the valuation dates for account balances; (9) administrative procedures for distributing benefits, such as provisions relating to the particular dates on which notices are given and by which election must be made; and (10 rights that derive from administrative and operational provisions, such as mechanical procedures for allocating investment experience among accounts in defined contribution plans.

Q-2: To what extent may section 411(d)(6) protected benefits under a plan be reduced or eliminated?

A-2: (a) Reduction or elimination of section 411(d)(6) protected benefits—(1) In general. A plan may not be amended to eliminate or reduce a section 411(d)(6) protected benefit that has already accrued, except as provided in sections 412(c)(8) and 4281, and in paragraph (b) of this Q&A-2. This is generally the case even if such elimination or reduction is contingent upon the employee's

consent. However, a plan may be amended to eliminate or reduce section 411(d)(6) protected benefits with respect to benefits not yet accrued as of the later of the amendment's adoption date or effective date without violating section 411(d)(6).

(2) Selection of optional forms of benefit—(i) General rule. A plan may treat a participant as receiving his entire nonforfeitable accrued benefit under the plan if the participant receives his benefit in an optional form of benefit in an amount determined under the plan that is at least the actuarial equivalent of the employee's nonforfeitable accrued benefit payable at normal retirement age under the plan. This is true even though the participant could have elected to receive an optional form of benefit with a greater actuarial value than the value of the optional form received, such as an optional form including retirement-type subsidies, and without regard to whether such other, more valuable optional form could have commenced immediately or could have become available only upon the employee's future satisfaction of specified eligibility conditions.

(ii) Election of an optional form. Except as provided in paragraph (a)(2)(iii) of this Q&A-2, a plan does not violate section 411(d)(6) merely because an employee's election to receive a portion of his nonforfeitable accrued benefit in one optional form of benefit precludes the employee from receiving that portion of his benefit in another optional form of benefit. Such employee retains all 411(d)(6) protected rights with respect to the entire portion of such employee's nonforfeitable accrued benefit for which no distribution election was made. For purposes of this rule, an elective transfer of an otherwise distributable benefit is treated as the selection of an optional form of benefit. See Q&A-3 of this section.

(iii) Buy-back rule. Notwithstanding paragraph (a)(2)(ii) of this Q&A-2, an employee who received a distribution of his nonforfeitable benefit from a plan that is required to provide a repayment opportunity to such employee if he returns to service within the applicable period pursuant to the requirements of section 411(a)(7) and who, upon subsequent reemployment, repays the full amount of such distribution in accordance with section 411(a)(7)(C) must be reinstated in the full array of section 411(d)(6) protected benefits that existed with respect to such benefit prior to distribution.

(iv) Examples. The rules in this paragraph (a)(2) can be illustrated by the following examples:

Example 1. Defined benefit plan X provides, among its optional forms of benefit, for a subsidized early retirement benefit payable in the form of an annuity and available to employees who terminate from employment on or after their 55th birthdays. In addition plan X provides for a single sum distribution available on termination from employment or termination of the plan. The single sum distribution is determined on the basis of the present value of the accrued normal retirement benefit and does not take the early retirement subsidy into account. Plan X is terminated December 31, 1991. Employees U, age 47, V, age 55, and W, age 47, all continue in the service of the employer. Employees X, age 47, Y, age 55 and Z, age 47, terminate from employment with the employer during 1991. Employees U and V elect to take the single sum optional form of distribution at the time of plan termination. Employees X and Y elect to take the single sum distribution on termination from employment with the employer. The elimination of the subsidized early retirement benefit with respect to employees U, V, X and Y does not result in a violation of section 411(d)(6). This is the result even though employees U and X had not yet satisfied the conditions for the subsidized early retirement benefit. Because employees W and Z have not selected an optional form of benefit, they continue to have a 411(d)(6) protected right to the full array of section 411(d)(6) protected benefits provided under the plan, including the single sum distribution form and the subsidized early retirement benefit.

Example 2. A partially vested employee receives a single sum distribution of the present value of his entire nonforfeitable benefit on account of separation from service under a defined benefit plan providing for a repayment provision. Upon reemployment with the employer such employee makes repayment in the required amount in accordance with section 411(a)(7). Such employee may, upon subsequent termination of employment, elect to take such repaid benefits in any optional form provided under the plan as of the time of the employee's initial separation from service. If the plan was amended prior to such repayment, to eliminate the single sum optional form of benefit with respect to benefits accrued after the date of the amendment, such participant has a 411(d)(6) protected right to take distribution of the repaid benefit in the form of a single sum distribution.

(3) Certain transactions—(i) Plan mergers and benefit transfers. The prohibition against the reduction or elimination of section 411(d)(6) protected benefits already accrued applies to plan mergers, spinoffs, transfers, and transactions amending or having the effect of amending a plan or plans to transfer plan benefits. Thus, for example, if plan A, a profit-sharing plan that provides for distribution of plan benefits in annual installments over ten or twenty years, is merged with plan B, a profit-sharing plan that provides for distribution of plan benefits in annual installments over life expectancy at time of retirement, the merged plan must retain the ten or twenty year installment option for participants with respect to benefits already accrued under plan A as of the merger and the installments over life expectancy for participants with benefits already accrued under plan B. Similarly, for example, if an employee's benefit under a defined contribution plan is transferred to another defined contribution plan (whether or not of the same employer), the optional forms of benefit available with respect to the employee's benefit accrued under the transferor plan may not

be eliminated or reduced except as otherwise permitted under this regulation. See Q&A-3 of this section with respect to the transfer of benefits between and among defined benefit and defined contribution plans.

(ii) Annuity contracts—(A) General rule. The protection provided by section 411(d)(6) may not be avoided by the use of annuity contracts. Thus, section 411(d)(6) protected benefits already accrued may not be eliminated or reduced merely because a plan uses annuity contracts to provide such benefits, without regard to whether the plan, a participant, or a beneficiary of a participant holds the contract or whether such annuity contracts are purchased as a result of the termination of the plan. However, to the extent that an annuity contract constitutes payment of benefits in a particular optional form elected by the participant, the plan does not violate section 411(d)(6) merely because it provides that other optional forms are no longer available with respect to such participant. See paragraph (a)(2) of this Q&A-2.

(B) Examples. The provisions of this paragraph (a)(3)(ii) can be illustrated by the following examples:

Example 1. A profit-sharing plan that is being terminated satisfies section 411(d)(6) only if the plan makes available to participants annuity contracts that provide for all section 411(d)(6) protected benefits under the plan that may not otherwise be reduced or eliminated pursuant to this Q&A-2. Thus, if such a plan provided for a single sum distribution upon attainment of early retirement age, and a provision for payment in the form of 10 equal annual installments, the plan would satisfy section 411(d)(6) only if the participants had the opportunity to elect to have their benefits provided under an annuity contract that provided for the same single sum distribution upon the attainment of the participant's early retirement age and the same 10 year installment optional form of benefit.

Example 2. A defined benefit plan permits each participant who separates from service on or after age 62 to receive a qualified joint and survivor annuity or a single life annuity commencing 45 days after termination from employment. For a participant who separates from service before age 62, payments under these optional forms of benefit commence 45 days after the participant's 62nd birthday. Under the plan, a participant is to elect among these optional forms of benefit during the 90-day period preceding the annuity starting date. However, during such period, a participant may defer both benefit commencement and the election of a particular benefit form to any later date, subject to section 401(a)(9). In January 1990, the employer decides to terminate the plan as of July 1, 1990. The plan will fail to satisfy section 411(d)(6) unless the optional forms of benefit provided under the plan are preserved under the annuity contract purchased on plan termination. Thus, such annuity contract must provide a participant the same optional benefit commencement rights that the plan provided. In addition, such contract must provide the same election rights with respect to such benefit options. This is the case even if, for example, in conjunction with the termination, the employer amended the plan to permit participants to elect a qualified joint and survivor annuity, single life annuity, or single sum distribution commencing on July 1, 1990.

(4) Benefits payable to a spouse or beneficiary. Section 411(d)(6) protected benefits may not be eliminated merely because they are payable with respect to a spouse or other beneficiary.

(b) Section 411(d)(6) protected benefits that may be eliminated or reduced only as permitted by the Commissioner—(1) In general. The Commissioner may, consistent with the provisions of this section, provide for the elimination or reduction of section 411(d)(6) protected benefits that have already accrued only to the extent that such elimination or reduction does not result in the loss to plan participants of either a valuable right or an employer-subsidized optional form of benefit where a similar optional form of benefit with a comparable subsidy is not provided or to the extent such elimination or reduction is necessary to permit compliance with other requirements of section 401(a) (e.g., sections 401(a)(4), 401(a)(9) and 415). The Commissioner may exercise this authority only through the publication of revenue rulings, notices, and other documents of general applicability.

(2) Section 411(d)(6) protected benefits that may be eliminated or reduced. The elimination or reduction of certain section 411(d)(6) protected benefits that have already accrued in the following situations does not violate section 411(d)(6). The rules with respect to permissible eliminations and reductions provided in this paragraph (b)(2) are effective January 30, 1986. These exceptions create no inference with respect to whether any other applicable requirements are satisfied (for example, requirements imposed by section 401(a)(9) and section 401(a)(14)).

(i) Change in statutory requirement. A plan may be amended to eliminate or reduce a section 411(d)(6) protected benefit if the following three requirements are met: the amendment constitutes timely compliance with a change in law affecting plan qualification; there is an exercise of section 7805(b) relief by the Commissioner; and the elimination or reduction is made only to the extent necessary to enable the plan to continue to satisfy the requirements for qualified plans. In general, the elimination or reduction of a section 411(d)(6) protected benefit will not be treated as necessary if it is possible through other modifications to the plan (e.g., by expanding the availability of an optional form of benefit to additional employees) to satisfy the applicable qualification requirement.

(ii) Joint and survivor annuity. A plan that provides a range of three or more actuarially equivalent joint and survivor annuity options may be amended to eliminate any of such options, other

than the options with the largest and smallest optional survivor payment percentages, even if the effect of such amendment is to change which of the options is the qualified joint and survivor annuity under section 417. Thus, for example, if a money purchase pension plan provides three joint and survivor annuity options with survivor payments of 50%, 75% and 100%, respectively, that are uniform with respect to age and are actuarially equivalent, then the employer may eliminate the option with the 75% survivor payment, even if this option had been the qualified joint and survivor annuity under the plan.

(iii) In-kind distributions after plan termination—(A) In general. If a plan includes an optional form of benefit under which benefits are distributed in specified property (other than cash), such optional form of benefit may be modified for distributions after plan termination by substituting cash for the specified property to the extent that, on plan termination, an employee has the opportunity to receive the optional form of benefit in the specified property. This exception is not available, however, if the employer that maintains the terminating plan also maintains another plan that provides an optional form of benefit in the specified property.

(B) Example. This paragraph (b)(2)(iii) can be illustrated by the following example:

Example. An employer maintains a stock bonus plan under which a participant, upon termination from employment, may elect to receive his benefits in a single sum distribution in employer stock. This is the only plan maintained by the employer under which distributions in employer stock are available. The employer decides to terminate the stock bonus plan. If such plan is amended to make available a single sum distribution in employer stock on plan termination, the plan will not fail section 411(d)(6) solely because the optional form of benefit providing a single sum distribution in employer stock on termination from employment is modified to provide that such distribution is available only in cash.

(iv) Coordination with diversification requirement. A tax credit employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) may be amended to provide that a distribution is not available in employer securities to the extent that an employee elects to diversify benefits pursuant to section 401(a)(28).

(v) Involuntary distributions. A plan may be amended to provide for the involuntary distribution of an employee's benefit to the extent such involuntary distribution is permitted under sections 411(a)(11) and 417(e). Thus, for example, an involuntary distribution provision may be amended to require that an employee who terminates from employment with the employer receive a single sum distribution in the event that the present value of the employee's benefit is not more than $1,750, by substituting $3,500 for $1,750, without violating section 411(d)(6). In addition, for example, the employer may amend the plan to reduce the involuntary distribution threshold from $3,500 to any lower amount and to eliminate the involuntary single sum option for employees with benefits between $3,500 and such lower amount without violating section 411(d)(6). This rule does not permit a plan provision permitting employer discretion with respect to optional forms of benefit for employees the present value of whose benefit is less than $3,500.

(vi) Distribution exception for certain profit-sharing plans—(A) In general. If a defined contribution plan that is not subject to section 412 and does not provide for an annuity option is terminated, the plan may be amended to provide for the distribution of a participant's accrued benefit upon termination in a single sum optional form without the participant's consent. The preceding sentence does not apply if the employer maintains any other defined contribution plan (other than an employee stock ownership plan as defined in section 4975(e)(7)).

(B) Examples. The provisions of this paragraph (b)(2)(vi) can be illustrated by the following examples:

Example 1. Employer X maintains a defined contribution plan that is not subject to section 412. The plan provides for distribution in the form of equal installments over five years or equal installments over twenty years. X maintains no other defined contribution plans. X terminates its defined contribution plan after amending the plan to provide for the distribution of all participants' accrued benefits in the form of single sum distributions, without obtaining participant consent. Pursuant to the rule in this paragraph (b)(2)(iv), this amendment does not violate the requirements of section 411(d)(6).

Example 2. Corporations X and Y are members of controlled group employer XY. Both X and Y maintain defined contribution plans. X's plan, which is not subject to section 412, covers only employees working for X. Y's plan, which is subject to section 412, covers only employees working for Y. X terminates its defined contribution plan. Because employer XY maintains another defined contribution plan, plan X may not provide for the distribution of participants' accrued benefits upon termination without a participants' consent.

(vii) Distribution of benefits on default of loans. Notwithstanding that the distribution of benefits arising from an execution on an account balance used to secure a loan on which there has been a default is an optional form of benefit, a plan may be amended to eliminate or change a provision for loans, even if such loans would be secured by an employee's account balance.

(viii) Provisions for transfer of benefits between and among defined contribution plans and defined

benefit plans of the employer. A plan may be amended to eliminate provisions permitting the transfer of benefits between and among defined contribution plans and defined benefit plans of the employer.

(ix) De minimis change in the timing of an optional form of benefit. A plan may be amended to modify an optional form of benefit by changing the timing of the availability of such optional form if, after the change, the optional form is available at a time that is within two months of the time such optional form was available before the amendment. To the extent the optional form of benefit is available prior to termination of employment, six months may be substituted for two months in the prior sentence. Thus, for example, a plan that makes in-service distributions available to employees once every month may be amended to make such in-service distributions available only once every six months. This exception to section 411(d)(6) relates only to the timing of the availability of the optional form of benefit. Other aspects of an optional form of benefit may not be modified and the value of such optional form may not be reduced merely because of an amendment permitted by this exception.

(c) Serial amendments. A plan amendment that modifies an optional form of benefit with respect to benefits already accrued will be evaluated in light of previous amendments. Thus, for example, amendments made at different times that, when taken together, constitute the elimination or reduction of a valuable right, will be treated as the impermissible elimination or reduction of an optional form of benefit even though each amendment, considered alone, may otherwise be permissible.

(d) ESOP and stock bonus plan exception—(1) In general. Subject to the limitations in paragraph (d)(2) of this Q&A-5, a tax credit employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) will not be treated as violating the requirements of section 411(d)(6) merely because of any of the circumstances described in paragraphs (d)(1)(i) through (d)(1)(iv) of this Q&A-2. In addition, a stock bonus plan that is not an employee stock ownership plan will not be treated as violating the requirements of section 411(d)(6) merely because of any of the circumstances described in paragraphs (d)(1)(ii) and (d)(1)(iv) of this Q&A-2.

(i) Single sum or installment optional forms of benefit. The employer eliminates, or retains the discretion to eliminate, with respect to all participants, a single sum optional form or installment optional form with respect to benefits that are subject to section 409(h)(1)(B), provided such elimination or retention of discretion is consistent with the distribution and payment requirements otherwise applicable to such plans (e.g., those required by section 409).

(ii) Employer becomes substantially employee-owned. The employer eliminates, or retains the discretion to eliminate, with respect to all participants, in cases in which the employer becomes substantially employee-owned, optional forms of benefit by substituting cash distributions for distributions in the form of employer stock with respect to benefits subject to section 409(h). This exception is available only if the employer otherwise meets the requirements of section 409(h)(2) with respect to restrictions on the ownership of outstanding employer stock.

(iii) Employer securities become readily tradable. The employer eliminates, or retains the discretion to eliminate, with respect to all participants, in cases in which the employer securities become readily tradable, optional forms of benefit by substituting distributions in the form of employer securities for distributions in cash with respect to benefits that are subject to section 409(h).

(iv) Employer securities cease to be readily tradable or certain sales. The employer eliminates, or retains the discretion to eliminate, with respect to all participants, optional forms of benefit by substituting cash distributions for distributions in the form of employer stock with respect to benefits that are subject to section 409(h) in the following circumstances:

(A) The employer stock ceases to be readily tradable;

(B) The employer stock continues to be readily tradable but there is a sale of substantially all of the stock of the employer or a sale of substantially all of the assets of a trade or business of the employer and, in either situation, the purchasing employer continues to maintain the plan.

In the situation described in paragraph (d)(1)(iv)(B) of this Q&A-2, the employer may also substitute distributions in the purchasing employer's stock for distributions in the form of employer stock of the predecessor employer.

(2) Limitations on ESOP and stock bonus plan exceptions—(i) Nondiscrimination requirement. Plan amendments and the retention and exercise of discretion permitted under the exceptions in paragraph (d)(1) must meet the nondiscrimination requirements of section 401(a)(4).

(ii) ESOP investment requirement. Except as provided in paragraph (d)(2)(iii) of this Q&A-2, benefits provided by employee stock ownership plans will not be eligible for the exceptions in paragraph (d)(1) of this Q&A-2 unless the benefits have been held in a tax credit employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) subject to section 409(h) for the five-year period prior to the exercise of employer discretion or any amendment affecting such benefits and permitted under paragraph (d)(1) of this Q&A-2. For purposes of the preceding sentence, if benefits held under an employee stock ownership plan are transferred to a plan that is an employee stock ownership plan at the time of the transfer, then the consecutive periods under the transferor and transferee employee stock ownership plans may be aggregated for purposes of meeting the five-year requirement. If the benefits are held in an employer stock ownership plan throughout the entire period of their existence, and such total period of existence is less than five years, then such lesser period may be substituted for the five year requirement.

(3) Effective date. The provisions of this paragraph (d) are effective beginning with the first day of the first plan year commencing on or after January 1, 1989. Prior to this effective date the reduction or elimination of a section 411(d)(6) protected benefit by a tax credit employee stock ownership plan (as defined in section 409(a)) or an employee stock ownership plan (as defined in section 4975(e)(7)) will not be treated as violating the requirements of section 411(d)(6) if such reduction or elimination reflects a reasonable interpretation of the statutory language of section 411(d)(6)(C).

(4) Additional exceptions and requirements. The Commissioner may, in revenue rulings, notices or other documents of general applicability, prescribe such additional rules and exceptions, consistent with the purposes of this section, as may be necessary or appropriate.

Q-3 Does the transfer of benefits between and among defined benefit plans and defined contribution plans (or similar transactions) violate the requirements of section 411(d)(6)?

A-3 (a) Transfers and similar transactions—(1) General rule. Section 411(d)(6) protected benefits may not be eliminated by reason of transfer or any transaction amending or having the effect of amending a plan or plans to transfer benefits. Thus, for example, except as otherwise provided in this section, an employer who maintains a money purchase pension plan that provides for a single sum optional form of benefit may not establish another plan that does not provide for this optional form of benefit and transfer participants' account balances to such new plan.

(2) Defined benefit feature and separate account feature. The defined benefit feature of an employee's benefit under a defined benefit plan and the separate account feature of an employee's benefit under a defined contribution plan are section 411(d)(6) protected benefits. Thus, for example, the elimination of the defined benefit feature of an employee's benefit under a defined benefit plan, through transfer of benefits from a defined benefit plan to a defined contribution plan or plans, will violate section 411(d)(6).

(3) Waiver prohibition. In general, an employee may not elect to waive section 411(d)(6) protected benefits. Thus, for example, the elimination of the defined benefit feature of an employee's benefit under a defined plan by reason of a transfer of such benefits to a defined contribution plan pursuant to an employee election, at a time when the benefit is not distributable to the employee, violates section 411(d)(6).

(b) Elective transfers of benefits between plans—(1) Elective transfer. A transfer of a participant's benefits between qualified plans that results in the elimination or reduction of section 411(d)(6) protected benefits does not violate section 411(d)(6) if the transfer meets the requirements of section 411(*l*) and the following requirements are met:

(i) Voluntary election—(A) Participant election. The plan from which the benefits are transferred must provide that the transfer is conditioned upon a voluntary, fully informed election by the participant to transfer such participant's benefit to another plan maintained by the employer.

(B) Benefit retention alternative. In making the voluntary election provided for in paragraph (b)(1)(i)(A) of this Q&A-3, the participant must have an alternative that retains such employee's section 411(d)(6) protected benefits (including all optional forms of benefit) under the plan. Thus, either of the following two requirements must be met:

(1) If the plan from which the benefits are transferred is terminating, the terminating plan must satisfy the requirements of section 401(a)(2) and section 411(d)(6), or

(2) If the plan from which the benefits are transferred is not terminating, the participant must be given the option of leaving his benefit in the ongoing plan to the extent required by section 411(a)(11) and section 417(e);

(C) Spousal election. If sections 401(a)(11) and 417 apply to the plan from which the benefits are transferred, the spousal consent requirements of such section must be met with respect to the transfer of benefits.

(D) Notice requirement. The notice requirements under section 417, requiring a written explanation with respect to an election not to receive benefits in the form of a qualified joint and survivor annuity, must be met with respect to the participant and spousal transfer election.

(ii) Distributability of benefits. The participant whose benefits are transferred must be eligible, under the terms of the plan from which the benefits are transferred, to receive an immediate distribution from such plan under provisions in the plan not inconsistent with section 401(a).

(iii) Amount of benefit transferred. The amount of the benefit transferred must equal the entire nonforfeitable accrued benefit under the plan of the participant whose benefit is being transferred, calculated to be at least the greater of the single sum distribution provided for under the plan for which the participant is eligible (if any) or the present value of the participant's accrued payable at normal retirement age and calculated by using an interest rate subject to the restrictions of section 417(e) and subject to the overall limitations imposed by section 415.

(iv) Benefit under the transferee plan. The participant must be fully vested in the transferred benefit in the transferee plan. In a transfer from a defined contribution plan to a defined benefit plan, the defined benefit plan must provide a minimum benefit, for each participant whose benefits are transferred, equal to the benefit, expressed as an annuity payable at normal retirement age, that is derived solely on the basis of the amount transferred with respect to such participant.

(2) Status of elective transfer as distribution. The transfer of benefits pursuant to the elective transfer rules of this paragraph (b) generally is to be treated as a distribution of a participant's accrued benefit under a plan for purposes of section 401(a). For example, a transfer option is an optional form of benefit under section 411(d)(6); the availability of such optional form of benefit is subject to the nondiscrimination requirements of section 401(a)(4); and the transfer is treated as a distribution subject to the cash-out rules in section 411(a)(7), the early termination requirements of section 411(d)(2) and the requirements of sections 401(a)(11) and 417. However, the transfer is not treated as a distribution for purposes of the minimum distribution requirements of section 401(a)(9).

(3) Effective date. The rules with respect to transfers are generally effective January 30, 1986. However, with respect to transfers from defined benefit plans to defined contribution plans and from defined contribution plans to defined benefit plans, the rules of this paragraph (b) are effective beginning August 10, 1988. On or after January 30, 1986, and prior to August 10, 1988 the transitional rules provided in paragraph (c) of this Q&A-3 are effective with respect to such transfers.

(c) Transitional rule. Prior to the effective date in paragraph (b)(3) of this Q&A-3, the transfer of benefits from a defined contribution plan to a defined benefit plan, or a defined benefit plan to a defined contribution plan, does not violate section 411(d)(6) solely by reason of the elimination of section 411(d)(6) protected benefits, if the benefits transferred were distributable under the plan or could have been distributable under section 401(a) and either of the following requirements are met:

(1) Transfer exception. The transfer satisfies the rules in paragraph (b) of this Q&A-3, or

(2) Direct transfer. The plan to which the benefits are to be transferred provides, or is amended to provide, for all section 411(d)(6) protected benefits provided under the transferor plan with respect to the benefits transferred (with the sole exception of the defined benefit feature of the benefit under a defined benefit plan and the defined contribution feature under a defined contribution plan); the transferred benefits are treated as held under a transferee plan for purposes of the requirements of sections 401(a)(11) and 417; the transferred amounts meet the requirements of section 414(*l*) with respect to the transfer of assets and liabilities, and the benefits transferred do not exceed the limitations imposed by section 415. Amendments required for purposes of satisfying this rule must be made by the date for making any amendments required for purposes of conforming the plan to the requirements of section 410(b) as amended by TRA '86. However, plans covered by this rule must comply with these requirements in operation and any required amendments must be retroactive to the date on which the benefits were transferred.

(d) Examples. If a transfer complying with the elective transfer rules of paragraph (b) of this Q&A-3 is made from a defined benefit plan to a profit-sharing plan that does not provide for a life annuity distribution form, the profit-sharing plan to which the benefits are transferred would not be required to provide for a qualified joint and surviv-

or annuity with respect to the transferred benefits. If the same transfer is made under the direct transfer transitional rule of paragraph (c)(2) of this Q&A-3, the defined contribution plan is treated as a transferee plan with respect to the transferred benefits for purposes of the requirements of section 401(a)(11) and section 417. Thus, for example, if such benefits are transferred without spousal consent to a profit-sharing plan that did not previously provide for a life annuity distribution form, such plan would be required to provide for a qualified joint and survivor annuity for the participants whose benefits were transferred with respect to the transferred benefits.

Q-4: May a plan provide that the employer may, through the exercise of discretion, deny a participant a section 411(d)(6) protected benefit for which the participant is otherwise eligible?

A-4: (a) In general. Except as provided in paragraph (d) of Q&A-2 of this section with respect to certain employee stock ownership plans, a plan that permits the employer, either directly or indirectly, through the exercise of discretion, to deny a participant a section 411(d)(6) protected benefit provided under the plan for which the participant is otherwise eligible (but for the employer's exercise of discretion) violates the requirements of section 411(d)(6). A plan provision that makes a section 411(d)(6) protected benefit available only to those employees as the employer may designate is within the scope of this prohibition. Thus, for example, a plan provision under which only employees who are designated by the employer are eligible to receive a subsidized early retirement benefit constitutes an impermissible provision under section 411(d)(6). In addition, a pension plan that permits employer discretion to deny the availability of a section 411(d)(6) protected benefit violates the definitely determinable requirement of section 401(a), including section 401(a)(25). See § 1.401-1(b)(1)(i). This is the result even if the plan specifically limits the employer's discretion to choosing among section 411(d)(6) protected benefits, including optional forms of benefit, that are actuarially equivalent. In addition, the provisions of sections 411(a)(11) and 417(e) that allow a plan to make involuntary distributions of certain amounts are not excepted from this limitation on employer discretion. Thus, for example, a plan may not permit employer discretion with respect to whether benefits will be distributed involuntarily in the event that the present value of the employee's benefit is not more than $3,500 within the meaning of sections 411(a)(11) and 417(e). (An exception is provided for such provisions with respect to the nondiscrimination requirements of section 401(a)(4). See § 1.401(a)-4 Q&A-4.)

(b) Exception for administrative discretion. A plan may permit limited discretion with respect to the ministerial or mechanical administration of the plan, including the application of objective plan criteria specifically set forth in the plan. Such plan provisions do not violate the requirements of section 411(d)(6) or the definitely determinable requirement of section 401(a), including section 401(a)(25). For example, these requirements are not violated by the following provisions that permit limited administrative discretion:

(1) Commencement of benefit payments as soon as administratively feasible after a stated date or event;

(2) Employer authority to determine whether objective criteria specified in the plan (e.g., objective criteria designed to identify those employees with a heavy and immediate financial need or objective criteria designed to determine whether an employee has a permanent and total disability) have been satisfied; and

(3) Employer authority to determine, pursuant to specific guidelines set forth in the plan, whether the participant or spouse is dead or cannot be located.

Q-5: When will the exercise of discretion by some person or persons, other than the employer, be treated as employer discretion?

A-5: For purposes of applying the rules of this section and § 1.401(a)-4, the term "employer" includes plan administrator, fiduciary, trustee, actuary, independent third party, and other persons. Thus, if a plan permits any person, other than the participant (and other than the participant's spouse), the discretion to deny or limit the availability of a section 411(d)(6) protected benefit for which the employee is otherwise eligible under the plan (but for the exercise of such discretion), such plan violates the requirements of sections 401(a), including section 411(d)(6) and, where applicable, the definitely determinable requirement of section 401(a), including section 401(a)(25).

Q-6: May a plan condition the availability of a section 411(d)(6) protected benefit on the satisfaction of objective conditions that are specifically set forth in the plan?

A-6: (a) Certain objective conditions permissible —(1) In general. The availability of a section 411(d)(6) protected benefit may be limited to employees who satisfy certain objective conditions provided the conditions are ascertainable, clearly

set forth in the plan and not subject to the employer's discretion except to the extent reasonably necessary to determine whether the objective conditions have been met. Also, the availability of the section 411(d)(6) protected benefit must meet the nondiscrimination requirements of section 401(a)(4). See § 1.401(a)-4.

(2) Examples of permissible conditions. The following examples illustrate of permissible objective conditions: a plan may deny a single sum distribution form to employees for whom life insurance is not available at standard rates as defined under the terms of the plan at the time the single sum distribution would otherwise be payable; a plan may provide that a single sum distribution is available only if the employee is in extreme financial need as defined under the terms of the plan at the time the single sum distribution would otherwise be payable; a plan my condition the availability of a single sum distribution on the execution of a covenant not to compete, provided that objective conditions with respect to the terms of such covenant and the employees and circumstances requiring execution of such covenant are set forth in the plan.

(b) Conditions based on factors within employer's discretion generally impermissible. A plan may not limit the availability of section 411(d)(6) protected benefits permitted under the plan on objective conditions that are within the employer's discretion. For example, the availability of section 411(d)(6) protected benefits in a plan may not be conditioned on a determination with respect to the level of the plan's funded status, because the amount of plan funding is within the employer's discretion. However, for example, although conditions based on the plan's funded status are impermissible, a plan may limit the availability of a section 411(d)(6) protected benefit (e.g., a single sum distribution) in an objective manner, such as the following:

(1) Single sum distributions of $25,000 and less are available without limit; and

(2) Single sum distributions in excess of $25,000 are available for a year only to the extent that the total amount of such single sum distributions for the year is not greater than $5,000,000; and

(3) An objective and nondiscriminatory method for determining which particular single sum distributions will not be available during a year in order for the $5,000,000 limit to be satisfied is set forth in the plan.

Q-7: May a plan be amended to add employer discretion or conditions restricting the availability of a section 411(d)(6) protected benefit?

A-7: No. The addition of employer discretion or objective conditions with respect to a section 411(d)(6) protected benefit that has already accrued violates section 411(d)(6). Also, the addition of conditions (whether or not objective) or any change to existing conditions with respect to section 411(d)(6) protected benefits that results in any further restriction violates section 411(d)(6). However, the addition of objective conditions to a section 411(d)(6) protected benefit may be made with respect to benefits accrued after the later of the adoption or effective date of the amendment. In addition, objective conditions may be imposed on section 411(d)(6) protected benefits accrued as of the date of an amendment where permitted under the transitional rules of § 1.401(a)-4 Q&A-5 and Q&A-8 of this section. Finally, objective conditions may be imposed on section 411(d)(6) protected benefits to the extent permitted by the permissible benefit cutback provisions of Q&A-2 of this section.

Q-8: If a plan contains an impermissible employer discretion provision with respect to a section 411(d)(6) protected benefit, what acceptable alternative exist for amending the plan without violating the requirements of section 411(d)(6)?

A-8: (a) In general. The following rules apply for purposes of making necessary amendments to existing plans (as defined in Q&A-9 of this section) that contain discretion provisions with respect to the availability of section 411(d)(6) protected benefits that violate the requirements of section 401(a), including sections 401(a)(25) and 411(d)(6), and this section. These transitional rules are provided under the authority of section 411(d)(6) and section 7805(b).

(b) Transitional alternatives. If the availability of an optional forms of benefit, early or late retirement benefit, or retirement-type subsidy under an existing plan is conditioned on the exercise of employer discretion, the plan must be amended either to eliminate the optional form of benefit, early or late retirement benefit, or retirement-type subsidy to make such benefit available to all participants without limitation, or to apply objective and nondiscriminatory conditions to the availability of the optional form of benefit, early or later retirement benefit, or retirement-type subsidy. See paragraph (d) of this Q&A-8 for rules limiting the period during which section 411(d)(6) protected benefits may be eliminated or reduced under this paragraph.

(c) Compliance and amendment date provisions—(1) Operational compliance requirement. On or before the applicable effective date for the plan (as determined under Q&A-9 of this section), the plan sponsor must select one of the alternatives permitted under paragraph (b) of the Q&A-8 with respect to each affected section 411(d)(6) protected benefit and the plan must be operated in accordance with this selection. This is an operational requirement and does not require a plan amendment prior to the period set forth in paragraph (c)(2) of this Q&A-8. There are no special reporting requirements under the Code or this section with respect to this selection.

(2) Deferred amendment date. If paragraph (c)(1) of this Q&A-8 is satisfied, a plan amendment conforming the plan to the particular alternative selected under paragraph (b) of this Q&A-8 must be adopted within the time period permitted for amending plans in order to meet the requirements of section 410(b) as amended by TRA '86. The plan amendment to conform the plan to these regulations may be made at an earlier date. Such conforming amendment must be consistent with the sponsor's selection as reflected by plan practice during the period from the effective date to the date the amendment is adopted. Thus, for example, if any existing calendar year noncollectively bargained defined benefit plan has a single sum distribution option that is subject to employer discretion as of August 1, 1986, and such employer makes one or more single sum distributions available on or after January 1, 1989 and before the effective date by which plan amendment is required pursuant to this section, then such employer may not adopt a plan amendment eliminating the single sum distribution, but rather must adopt an amendment eliminating the discretion provision. Any objective conditions that are adopted as part of such amendment must not be inconsistent with the plan practice for the applicable period prior to the amendment. A conforming amendment under this paragraph (c)(2) must be made with respect to each section 411(d)(6) protected benefit for which such amendment is required and must be retroactive to the applicable effective date.

(d) Limitation on transitional alternatives. The transitional alternatives permitting the elimination or reduction of section 411(d)(6) protected benefits are only permissible until the applicable effective date for the plan (see Q&A-9 of this section). After the applicable effective date, any amendment (other than one permitted under paragraph (c)(2) of this Q&A-8) that eliminates or reduces a section 411(d)(6) protected benefit or imposes new objective conditions on the availability of such benefit will fail to qualify for the exception to section 411(d)(6) provided in this Q&A-8. This is the case without regard to whether the section 411(d)(6) protected benefit is subject to employer discretion.

Q-9: What are the applicable effective date rules for purposes of this section?

A-9: (a) General effective date. Except as otherwise provided in this section, the provisions of this section are effective January 30, 1986.

(b) New plans—(1) In general. Unless otherwise provided in paragraph (b)(2) of this Q&A-9, plans that are either adopted or made effective on or after August 1, 1986, are "new plans". With respect to such new plans, this section is effective August 1, 1986. This effective date is applicable to such plans whether or not they are collectively bargained.

(2) Exception with respect to certain new plans. Plans that are new plans as defined in paragraph (b)(1) of this Q&A-9; under which the availability of a section 411(d)(6) protected benefit is subject to employer discretion; and that receive a favorable determination letter that covered such plan provisions with respect to an application submitted prior to July 11, 1988, will be treated as existing plans with respect to such section 411(d)(6) protected benefit for purposes of the transitional rules of this section. Thus, such plans are eligible for the compliance and amendment alternatives set forth in the transitional rule in Q&A-8 of this section.

(c) Existing plans—(1) In general. Plans, including plans that are adoptions of master or prototype plans, that are both adopted and in effect prior to August 1, 1986, are "existing plans" for purposes of this section. In addition, a plan that is established after July 31, 1986, but before January 1, 1989, as an initial adoption of a master or prototype plan for which a favorable opinion letter was issued by the Service after July 18, 1985 and before January 1, 1989, will be deemed to be an existing plan for purposes of this section. See sections 4.01 and 4.02 of Rev. Proc. 84-23, 1984-1 C.B. 457, 459, for the definitions of master prototype plans. However, if such plan ceases to be covered under an opinion letter of the type described above, as a result of amendment of the plan or adoption of a new plan, prior to the first day of the first plan year beginning on or after January 1, 1989, then the effective date for such plan will be determined as though the plan were a new plan initially adopted as of the date of such

amendment or adoption of a new plan. Finally, new plans described in paragraph (b)(2) of this Q&A-9 are treated as existing plans with respect to certain section 411(d)(6) protected benefits. Subject to the limitations in paragraph (c) of this Q&A-9, the effective dates set forth in paragraphs (c)(2), (c)(3), and (c)(4) of this Q&A-9 apply to these existing plans for purposes of this section:

(2) Existing noncollectively bargained plans. With respect to existing plans other than collectively bargained plans this section is effective for the first day of the first plan year commencing on or after January 1, 1989.

(3) Existing collectively bargained plans. With respect to existing collectively bargained plans this section is effective for the later of the first day of the first plan year commencing on or after January 1, 1989, or the first day of the first plan year that the requirements of section 410(b) as amended by TRA '86 apply to such plan.

(4) Existing master and prototype plans. With respect to existing plans that are adoptions of master or prototype plans the effective date will be the first day of the first plan year commencing on or after January 1, 1989.

(d) Delayed effective date not applicable to new alternatives or conditions—(1) In general. The delayed effective dates in paragraphs (c)(2) and (c)(3) of this Q&A-9 for existing plans are only applicable with respect to a section 411(d)(6) protected benefit if both the section 411(d)(6) protected benefit and the condition providing employer discretion as to the availability of such benefit are both adopted and in effect prior to August 1, 1986. If the preceding sentence is not satisfied with respect to a particular section 411(d)(6) protected benefit, this section is effective with respect to such section 411(d)(6) protected benefit as if the plan were a new plan.

(2) Addition of discretion on or after January 30, 1986. The delayed effective dates in paragraphs (c)(2) and (c)(3) of this Q&A-9 are not available with respect to any section 411(d)(6) protected benefit if the section 411(d)(6) protected benefit was provided for in the plan prior to January 30, 1986, and the availability of such benefit was made subject to the exercise of employer discretion on or after January 30, 1986. If the conditions set forth in this paragraph are not satisfied with respect to a particular section 411(d)(6) protected benefit, this section is effective with respect to such section 411(d)(6) protected benefit as if the plan were a new plan. A limited exception is provided with respect to existing plans that provided a particular section 411(d)(6) protected benefit prior to January 30, 1986, and then amended the plan after January 30, 1986, and before August 1, 1986, to add a provision for employer discretion with respect to the availability of such benefit. Such plans are required to have been amended retroactively by December 31, 1987, to remove such provision for employer discretion, and, if the benefit made subject to such discretion was subsequently eliminated, the plan is required to have been further amended, by the same date, to retroactively reinstate the benefit.

(3) Exception for certain amendments covered by a favorable determination letter. If an amendment adding a section 411(d)(6) protected benefit subject to employer discretion was adopted or made effective after August 1, 1986, and the plan receives a favorable determination letter covering such provision with respect to an application for such letter made prior to July 11, 1988, then the effective date for purposes of amending such provision under the transitional rules is the applicable effective date determined under the rules with respect to existing plans.

(e) Transitional rule effective date. The transitional rule provided in Q&A-8 of this section is effective January 30, 1986.

[T.D. 8212, 53 F.R. 26058, July 11, 1988]

§ 1.411(d)–5 Class year plans; plan years beginning after October 22, 1986.

(a) Plan years beginning prior to 1989. (1) The requirements of section 411(a)(2) shall be treated as satisfied in the case of a class-year plan if such plan provides that 100 percent of each employee's right to or derived from the contributions of the employer on the employee's behalf with respect to any plan year is nonforfeitable not later than when such participant was performing services for the employer as of the close of each of 5 plan years (whether or not consecutive) after the plan year for which the contributions were made.

(2) For purposes of paragraph (a)(1) of this section if—

(i) Any contributions are made on behalf of a participant with respect to any plan year, and

(ii) Before such participant meets the requirements of paragraph (a)(1) of this section, such participant was not performing services for the employer as of the close of each of any 5 consecutive plan years after such plan year, then the plan may provide that the participant forfeits any right

to or derived from the contributions made with respect to such plan year.

(3) This paragraph (a) applies to contributions made for plan years beginning after October 22, 1986.

(b) Plan years beginning after 1988. (1) The special class year vesting rule in section 411(d)(4) was repealed by section 1113(b) of the Tax Reform Act of 1986 (1986 Act). The repeal is generally effective for plan years beginning after December 31, 1988. See section 1111(e) of the 1986 Act for a special effective date rule applicable to certain plans maintained pursuant to collectively bargaining agreements.

(2)(i) This subparagraph (2) provides a special rule for class year plans that were in compliance with section 411(d)(4) immediately before the first plan year beginning after section 411(d)(4) is repealed. These plans are not required to retroactively compute years of service under the general section 411(a)(2) rules. Instead, a participant must receive a year of service for each such prior plan year if the employee was performing services on the last day of such year. Similarly, if the participant was not performing services on the last day of such years, the participant will be treated as if a one-year break in service occurred for such plan year. This subdivision (i) applies to plan years to which this section applies.

(ii) In the case of a plan year to which § 1.411(d)-3 applied, a class year plan must compute years of service and breaks in service in a manner consistent with the rules in this paragraph (b)(2)(i), giving appropriate regard to the statutory changes made to section 411(d)(4).

[T.D. 8219, 53 FR 31854, Aug. 22, 1988; T.D. 8219, 53 FR 48534, Dec. 1, 1988]

§ 1.412(b)–2 Amortization of experience gains in connection with certain group deferred annuity contracts.

(a) Experience gain treatment. Dividends, rate credits, and credits for forfeitures arising in a plan described in paragraph (b) of this section are experience gains described in section 412(b)(3)(B)(ii) (relating to the amortization of experience gains).

(b) Plan. A plan is described in this paragraph (b) if—

(1) The plan is funded solely through a group deferred annuity contract,

(2) The annual single premium required under the contract for the purchase of the benefits accruing during the plan year is treated as the normal cost of the plan for that year, and

(3) The amount necessary to pay in equal annual installments, over the appropriate amortization period, an amount equal to the single premium necessary to provide all past service benefits not initially funded, together with interest thereon, is treated as the annual amortization amount determined under section 412(b)(2)(B)(i), (ii) or (iii).

(c) Effective date. This section applies for the first plan year to which section 412 applies that begins after May 22, 1981.

[T.D. 7764, 46 FR 6923, Jan. 22, 1981]

§ 1.412(b)–5 Election of the alternative amortization method of funding.

(a) Alternative amortization method in general. Section 1013(d) of the Employee Retirement Income Security Act of 1974 provides an alternative method which may be used by certain multiemployer plans (as defined in section 414(f)) which were in existence on January 1, 1974, for funding certain unfunded past service liability. The multiemployer plans which may elect to use this alternative method are those plans (1) under which, on January 1, 1974, contributions were based on a percentage of pay, (2) which use actuarial assumptions with respect to pay that are reasonably related to past and projected experience, and (3) which use rates of interest that are determined on the basis of reasonable actuarial assumptions. The unfunded past service liability to which this method applies is that amount existing as of the date 12 months after the date on which section 412 first applies to the plan. The alternative method allows the plan to fund this liability over a period of 40 plan years by charging the funding standard account with an equal annual percentage of the aggregate pay of all participants in the plan instead of the level dollar charges required under section 412(b)(2)(B). Paragraphs (b), (c), (d) and (e) of this section contain procedural rules for electing this alternative method.

(b) Election procedure. To elect the alternative amortization method, a multiemployer plan must attach a statement to the annual report required under section 6058(a) for the plan year for which the election is made, stating that the alternative method for funding unfunded past service liability is being adopted. Advance approval from the Internal Revenue Service is not required. The alternative method must be adopted on or before

the last day prescribed for filing the annual report corresponding to the last plan year beginning before January 1, 1982.

(c) Charges to which the alternative amortization method is applicable. Once elected, the alternative amortization method is applicable to the unfunded past service liability existing as of the date 12 months after the date on which section 412 first applies to the plan. This results in charges to the funding standard account which are in lieu of—

(1) Charges required under clause (i) of section 412(b)(2)(B), and

(2) Charges required under clause (iii) of section 412(b)(2)(B) if the plan amendments referred to in such clause result in a net increase in the unfunded past service liability existing as of the date 12 months after the date on which section 412 first applies to the plan. Such charges generally will arise only with respect to plan amendments adopted in the first plan year to which section 412 applies.

If the election is made on an annual report corresponding to a plan year after the first plan year to which section 412 applies, recomputation of the contributions due in the prior years (to which section 412 applied) will be necessary.

(d) Limitation. The sum of the charges described in this paragraph may not be less than the interest on the unfunded past service liabilities described in section 412(b)(2)(B)(i) and (iii), determined as of the date 12 months after the date on which section 412 first applies to the plan.

(e) Reporting requirements. Each annual report required by section 6058(a) and periodic report of the actuary required by section 6059 must include all additional information relevant to the use of the alternative amortization method as may be required by the applicable forms and the instructions for such forms.

[T.D. 7702, 45 FR 40113, June 13, 1980]

§ 1.412(c)(1)–1 Determinations to be made under funding method—terms defined.

(a) Actuarial cost method and funding method. Section 3(31) of the Employee Retirement Income Security Act of 1974 ("ERISA") provides certain acceptable (and unacceptable) actuarial cost methods which may (or may not) be used by employee plans. The term "funding method" when used in section 412 has the same meaning as the term "actuarial cost method" in section 3(31) of ERISA. For shortfall method for certain collectively bargained plans, see § 1.412(c)(1)–2; for principles applicable to funding methods in general, see regulations under section 412(c)(3).

(b) Computations included in funding method. The funding method of a plan includes not only the overall funding method used by the plan but also each specific method of computation used in applying the overall method. However, the choice of which actuarial assumptions are appropriate to the overall method or to the specific method of computation is not a part of the funding method. For example, the decision to use or not to use a mortality factor in the funding method of a plan is not a part of such funding method. Similarly, the specific mortality rate determined to be applicable to a particular plan year is not part of the funding method. See section 412(c)(5) for the requirement of approval to change the funding method used by a plan.

[T.D. 7733, 45 FR 75202, Nov. 14, 1980]

§ 1.412(c)(1)–2 Shortfall method.

(a) **In general—(1) Shortfall method.** The shortfall method is a funding method that adapts a plan's underlying funding method for purposes of section 412. As such, the use of the shortfall method is subject to section 412(c)(3). A plan described in paragraph (a)(2) of this section may elect to determine the charges to the funding standard account required by section 412(b) under the shortfall method. These charges are computed on the basis of an estimated number of units of service or production (for which a certain amount per unit is to be charged). The difference between the net amount charged under this method and the net amount that otherwise would have been charged under section 412 for the same period is a shortfall loss (gain) and is to be amortized over certain subsequent plan years.

(2) Eligibility for use of shortfall. No plan may use the shortfall method unless—

(i) The plan is a collectively bargained plan described in section 413(a), and

(ii) Contributions to the plan are made at a rate specified under the terms of a legally binding agreement applicable to the plan.

For purposes of this section, a plan maintained by a labor organization which is exempt from tax under section 501(c)(5) is treated as a collectively bargained plan and the governing rules of the organization (such as its constitution, bylaws, or other document that can be altered only through

action of a convention of the organization) are treated as a collectively bargained agreement.

(b) **Computation and effect of net shortfall charge—(1) In general.** The "net shortfall charge" to the funding standard account under the shortfall method is the product of (i) the estimated unit charge described in paragraph (c) of this section that applies for a particular plan year, multiplied by (ii) the actual number of base units (for example, units of service or production) which occurred during that plan year. When the shortfall method is used, the net shortfall charge is a substitute for the specific charges and credits to the funding standard account described in section 412(b)(2) and (3)(B).

(2) **Example.** Paragraph (b)(1) of this section may be illustrated by the following example:

Example. A pension plan uses the calendar year as the plan year and the shortfall method. Its estimated unit charge applicable to 1980 is 80 cents per hour of covered employment. During 1980, there were 125,000 hours of covered employment. The net shortfall charge for the plan year is $100,000, (*i.e.*, 125,000 × $.80) regardless of the amount which would be charged and credited to the funding standard account under section 412(b)(2) and (3)(B) had the shortfall method not applied. The funding standard account for 1980 will be separately credited for the amount considered contributed for the plan year under section 412(b)(3)(A). The other items which may be credited, if applicable, are a waived funding deficiency and the alternative minimum funding standard credit adjustment under section 412(b)(3)(C) and (D) because these items are not credits under section 412(b)(3)(B).

(3) **Plans with more than one contract, contribution rate, employer, or benefit level—(i) General rule.** A single plan with more than one contract, contribution rate, employer, or benefit level may compute a separate net shortfall charge for each contract, contribution rate, each employer, or each benefit level. The sum of these charges is the plan's total net shortfall charge, under § 1.412(c)(1)-1(b), the use of separate computations would be a specific method of computation used in applying the overall funding method. See also paragraph (f)(5) of this section.

(ii) **Single valuation.** Only one actuarial valuation shall be made for the single plan on each actuarial valuation date.

(iii) **Reasonableness test.** The specific method of computation of the net shortfall charge must be reasonable, determined in the light of the facts and circumstances.

(c) **Estimated unit charge.** The estimated unit charge is the annual computation charge described in paragraph (d) of this section divided by the estimated base units of service or production described in paragraph (e) of this section.

(d) **Annual computation charge.** The annual computation charge for a plan year is the sum of the following amounts:

(1) The net charges and credits which, but for using the shortfall method, would be made under section 412(b)(2) and (b)(3)(B).

(2) The amount described in paragraph (g)(3) of this section, if applicable, for amortization of shortfall gain or loss.

(e) **Estimated base units—(1) In general.** The estimated base units are the expected units of service or production for a plan year (hours, days, tons, dollars of compensation, etc.), determined as of the base unit estimation date for that plan year under paragraph (f) of this section. This estimate must be based on the past experience of the plan and the reasonable expectations of the plan for the plan year. The specific type of unit used must be described in the statement of funding method for the plan year. (See paragraph (i)(3) of this section for reporting requirements.)

(2) **Reasonable expectations.** The reasonableness of expectations used under paragraph (e)(1) of this section is determined under the facts and circumstances of the plan for each plan year as of the relevant base unit estimation date. Expectations will be considered unreasonable if, for example, they do not reflect a consistent and substantial decline or growth in actual base units that has occurred over the course of recent years and that is likely to continue beyond the base unit estimation date. This determination of reasonableness is independent of determinations made under section 412(c)(3) of the reasonableness of actuarial assumptions.

(f) **Base unit estimation date—(1) In general.** The base unit estimation date for the current plan year is determined under this paragraph (f). This date shall be an actuarial valuation date no earlier than the last actuarial valuation date occurring at least one year before the earliest date any current collectively bargained agreement in existence during the plan year came into effect.

(2) **Four-month rule.** For purposes of this paragraph (f), a current collectively bargained agreement is one in effect during at least four months of the current plan year.

(3) **Effective date of agreement.** For purposes of this paragraph (f), a collectively bargained agreement shall be deemed to have come into effect on the effective date of the agreement containing the currently effective provision for contri-

butions to the plan or the benefits provided under the plan.

(4) **Long-term contract rule.** The effective date of a collectively bargained agreement shall be deemed not to occur prior to the first day of the third plan year preceding the current year.

(5) **Special rule for plans computing separate net shortfall charge.** A plan that computes a separate net shortfall charge for each contract, contribution rate, employer, or benefit level under paragraph (b)(3) of this section shall determine the base unit estimation date for each separate charge without regard to any collectively bargained agreement that does not relate to that contract, contribution rate, employer, or benefit level. If a collective bargaining agreement requiring contributions by a certain employer, or prescribing a certain benefit level, is in effect on December 31, 1980, the preceding sentence shall not apply to the computation of a separate net shortfall charge for that employer or benefit level until the earlier of—

(i) The first plan year beginning after the date on which expires the collective bargaining agreement requiring contributions by that employer (or the last collective bargaining agreement relating to that benefit level), or

(ii) The first plan year beginning after December 31, 1983.

(6) **Example.** The rules contained in paragraph (f) of this section are illustrated by the following table. In the table, "V" signifies actuarial valuation date (January 1 in each case shown); "B" signifies beginning of a contract; and "E" signifies end of a contract. The table shows the resulting earliest base unit estimation date with respect to the following assumed items:

COMPUTATION OF EARLIEST BASE UNIT ESTIMATION DATE

Example	Plan year (calendar year basis)											
	1973	1974	1975	1976	1977	1978	1979	1980	1981	1982	1983	1984
Plan A	V			V			V			V		
Contract 1	.....	.....	E/B	.....	.....	E/B	.....	E/B	.....	.....	.....	E/B
Base unit estimation date [1]				1973	1973	1973	1976	1976	1979	1979	1979	1979
Plan B	V			V			V			V		
Contract 2	[2]	[2]	[2]	B*	.....	E/B	.....	.....	.....	E/B*	.....	.....
Contract 3	E/B	.....	.....	E/B	.....	.....	E/B	.....	.....	E/B	.....	.....
Base unit estimation date [1]	.....	.....	.....	1973	1973	1973	1976	1976	1976	1976	1979	1979
Plan C	V	V	V	V	V	V	V	V	V	V	V	V
Contract 4	.....	.....	E/B	.....	.....	E/B*	.....	.....	.....	E/B*	.....	.....
Contract 5	.....	.....	E/B	.....	.....	E/B*	.....	.....	.....	.....	E/B*	.....
Base unit estimation date [1]				1974	1974	1977	1977	1977	1977	1978	1979	1981

[1] The base unit estimation date may be on or any time after the actuarial valuation date in the year indicated on this line.
[2] No contract.
* Denotes that a prior contract ends and a new contract begins prior to the fifth month of a plan year.

(g) **Amortization of shortfall gain or loss—(1) Definition.** The shortfall gain for a plan is the excess for the plan year of—

(i) The net shortfall charge computed under paragraph (b) of this section over.

(ii) The annual computation charge described in paragraph (d) of this section.

The shortfall loss for a plan is the excess for the plan year of the annual computation charge over the net shortfall charge.

(2) **Shortfall amortization period—(i) First year.** The plan year in which the amortization of a shortfall gain or loss must begin is the earlier of two years: the fifth plan year following the plan year in which the shortfall gain or loss arose, or the first plan year beginning after the latest scheduled expiration date of a collectively bargained agreement in effect with respect to the plan during the plan year in which the shortfall gain or loss arose. For purposes of this subparagraph, a contract expiring on the last day of a plan year shall be deemed to be renewed on such last day for the same period of years as the contract that succeeds the expiring contract.

(ii) **Last year.** The plan year in which the amortization of a shortfall gain or loss must end is the 15th plan year following the plan year in which the shortfall gain or loss arose. For a multiemployer plan described in section 414(f), the amortization must end with the 20th plan year instead of the 15th.

(3) Annual amortization amount. The shortfall gain or loss must be amortized in equal annual installments. The total amount to be amortized must be adjusted for interest at the rate used for determining the plan's normal cost.

(4) Shortfall gain or loss under spread gain type of funding method—(i) In general. A spread gain type of funding method spreads experience gains and losses over future periods as part of a plan's normal cost. (Examples of spread gain types of funding methods are the aggregate cost method, the frozen initial liability method, and the attained age normal method.) However, a shortfall gain or loss is not an experience gain or loss. Therefore, a plan using a spread gain type of funding method together with the shortfall method must amortize shortfall gains and losses and otherwise meet the requirements of paragraph (g) of this section.

(ii) Asset adjustment for aggregate method. A plan using the shortfall method with the aggregate cost method of funding must adjust its plan assets for a shortfall gain or loss in calculating normal cost. The unamortized portion of any shortfall gain is subtracted from plan assets. The unamortized portion of any shortfall loss is added to plan assets.

(5) Reconciliation of shortfall gain or loss with funding standard account. At the beginning of each year, the actual unfunded liability under the method used by the plan must equal the outstanding balance of all amortization bases, including bases for shortfall gains and losses, less the credit balance under the funding standard account at the end of the prior year.

(6) Example. This paragraph is illustrated by the following examples:

Example (1). A multiemployer plan described in section 414(f) is maintained with the calendar year as the plan year and uses the shortfall method. The plan uses the frozen initial liability funding method. A five percent interest assumption is used by the plan, with payments computed as of the first day of each plan year for all items. The expiration dates of contracts in effect during plan years 1976, 1977, and 1978 are such that the amortization of gains or losses for each year must begin in the fifth following plan year. The assumed plan costs and estimated base units for selected years, and the computations under this section which follow from such assumptions are shown in the following table. In the table, "*" denotes an assumed item. The remaining figures have been calculated on the basis of these assumptions.

(A) Computation of Net Shortfall Charge and Shortfall Gain or Loss

Plan year	1976	1977	1978
1. Normal cost* ..	$100,000	$100,000	$100,000
2. Amortization of unfunded liability*	50,000	50,000	50,000
3. Total annual computation charges	$150,000	$150,000	$150,000
4. Estimated base units*	100,000	100,000	100,000
5. Estimated unit charge (line 3 ÷ line 4)	$1.50	$1.50	$1.50
6. Actual units during year*	80,000	90,000	110,000
7. Net shortfall charge for year (line 5 × line 6)	120,000	135,000	165,000
8. Shortfall (gain) or loss (line 3 – line 7)	30,000	15,000	($15,000)

(B) Annual Amortization Amount

Plan Year	1976	1977	1978
9. Year of shortfall gain or loss	1976	1977	1978
10. First year of amortization	1981	1982	1983
11. Last year of amortization	1996	1997	1998
12. (Gain) or loss adjusted for interest to year amortization begins (1–1–76 to 1–1–81, etc.)	$38,288	$19,144	($19,144)
13. Annual amortization (16 years)	$3,364	$1,682	($1,682)

(C) Computation of Net Shortfall Charges for Selected Years (Including Shortfall Amortization)

Plan year	1981	1982	1983
14. Normal cost*	$120,000	$125,000	$130,000
15. Amortization of unfunded liability*	50,000	50,000	50,000
16. Shortfall amortization (see line 13) from:			
1976..........	3,364	3,364	3,364
1977..........	....	1,682	1,682
1978..........	....	....	(1,682)
17. Total annual computation charges	173,364	180,046	183,364
18. Estimated base units*	110,000	110,000	110,000
19. Estimated unit charge (line 17 ÷ line 18)	1.576	1.637	1.667
20. Actual units during year*	105,000	110,000	105,000
21. Net shortfall charge for year (line 19 × line 20)	165,480	180,070	175,035
22. Shortfall (gain) loss (line 17 – line 21)	7,884	(24)	8,329

The amounts in line 22 will be amortized beginning 1986, 1987, and 1988, respectively. The $24 gain in 1982 results from rounding the estimated unit charge.

Example (2). Assume the facts in Example (1). Also assume that the plan uses the frozen initial liability funding method, that the unfunded liability as of January 1, 1976 (corresponding to a 40-year charge of $50,000 due at the beginning of the year) is $900,850, and that actual contributions at the rate of $1.75 per unit are paid at mid-year in 1976.

(A) COMPUTATION OF THE UNFUNDED LIABILITY AS OF DECEMBER 31, 1976

1. Unfunded liability as of 1/1/76	$900,850
2. Normal cost (that used in the calculation of the total annual computation charges) ...	100,000
3. Interest at 5% due on items 1 and 2	50,043
4. Contribution with interest: $1.75 × 80,000 × 1.025 (actual contribution rate times actual base units times interest adjustment from mid-year)	143,500
5. Unfunded liability as of 12/31/76: item 1 + item 2 + item 3 – item 4	907,393

(B) COMPUTATION OF THE OUTSTANDING BALANCE OF THE BASES AS OF DECEMBER 31, 1976

1. Original base: ($900,850 – $50,000) × 1.05	$893,393
2. Shortfall loss $30,000 × 1.05............	31,500
3. Total................................	924,893

(C) COMPUTATION OF THE CREDIT BALANCE AS OF DECEMBER 31, 1976

1. Net shortfall charge (§ 1.412(c)(1)–2(b)) adjusted for interest: $120,000 × 1.05	$126,000
2. Actual contributions with interest	143,500
3. Credit balance as of 12/31/76: item 2 – item 1....................................	17,500

(D) RECONCILIATION OF COMPUTATIONS.

As of January 1, 1977, the unfunded liability ($907,393) equals the outstanding balance of the bases minus the credit balance ($924,893 – $17,500 = $907,393).

(h) Amortization of experience gain or loss—(1) General rule. In the case of a plan using an immediate gain type of funding method, an experience gain or loss shall be amortized pursuant to section 412(b)(2)(B)(iv) or (b)(3)(B)(ii). (Examples of the immediate gain type of funding method are the unit credit method, the entry age normal cost method, and the individual level premium cost method.) For purposes of this section, a shortfall gain or loss is not an experience gain or loss. The amount of the experience gain or loss must be adjusted for interest at the rate used for determining the plan's normal cost.

(2) Experience amortization period under shortfall method—(i) First year. The plan year in which the amortization of an experience gain or loss must begin in the case of a plan using the shortfall method is the earlier of two years: the fifth plan year following the plan year in which the experience gain or loss arose, or the first plan year beginning after the last scheduled expiration date of a contract in effect during the plan year in which the experience gain or loss arose. For purposes of this subparagraph a contract expiring on the last day of the plan year shall be deemed to be renewed on such last day for the same period of years as the contract that succeeds the expiring contract.

(ii) Last year. The plan year in which the amortization of an experience gain or loss must end in the case of a plan using the shortfall method is the 15th plan year following the plan year in which the experience gain or loss arose. For a multi-employer plan described in section 414(f), the amortization must end with the 20th plan year instead of the 15th.

(3) Use of annual computation charge in determining experience gain or loss. In the case of a plan using an immediate gain type of funding method, an experience gain or loss is the difference between the expected unfunded liability and the actual unfunded liability under the plan. The expected unfunded liability as of the end of a plan year equals the actual unfunded liability as of the beginning of the year plus normal cost, minus contributions, all adjusted for interest. If the plan adopts the shortfall method, the expected unfunded liability is computed by using the normal cost applicable for the plan year in determining the annual computation charge under paragraph (d) of this section. The same normal cost is used in computing the unfunded liability under the frozen initial liability funding method.

(4) Example. This paragraph is illustrated by the following example:

Example. Assume the facts in Example (2) from paragraph (g)(6) of this section, except that the entry age normal funding method is used. Also assume that as of December 31, 1976, the actual unfunded liability is $900,000.

(A) COMPUTATION OF EXPECTED UNFUNDED LIABILITY

1. Actual unfunded liability as of 1–1–76....	$900,850
2. Normal cost portion of annual computation charge as of 1–1–76	100,000
3. Interest at 5% due on items 1 and 2	50,043
4. Contribution received with interest: $1.75 × 80,000 × 1.025 (actual contribution rate times actual base units times interest adjustment at mid-year).......................	143,500
5. Expected unfunded liability as of 12–31–76 (item 1 + item 2 + item 3 – item 4)	907,393

(B) COMPUTATION OF GAIN OR LOSS

1. Expected unfunded liability as of 12–31–76	$907,393
2. Actual unfunded liability as of 12–31–76..	900,000
3. Gain (or loss) (item 1 – item 2)..........	7,393

(i) **Election procedure—(1) In general.** To elect the shortfall method, a collectively bargained plan must attach a statement to the annual report required under section 6058(a) for the first plan year to which it is applied. The statement shall state that the shortfall method is adopted, beginning with the plan year covered by such report. Advance approval from the Internal Revenue Service is not required if the shortfall method is first adopted on or before the later of—

(i) The first plan year to which section 412 applies or

(ii) The last plan year commencing before December 31, 1981.

However, approval must be received pursuant to section 412(c)(5) prior to the adoption of the shortfall method at a later time, or the discontinuance of such method, once adopted.

(2) **Use of specific computation method.** A specific method of computation under the shortfall method is described in paragraph (b)(3) of this section, regarding the treatment of more than one contract, employer, or benefit level under the plan. This specific method may be adopted with respect to any plan year to which the shortfall method applies. Approval from the Commissioner must be received under section 412(c)(5) prior to the adoption of this specific computation method for a plan year subsequent to the first plan year to which the shortfall method applies, or prior to the discontinuance of a specific computation method, once adopted.

(3) **Reporting requirements.** Each annual report required by section 6058(a) and periodic report of the actuary required by section 6059 must include all additional information relevant to the use of the shortfall method as may be required by the applicable forms and the instructions for such forms.

(j) **Transitional rule.** In lieu of paragraphs (g)(2) and (h)(2) of this section relating to the amortization period for shortfall and experience gains and losses, for gains and losses arising in plan years beginning before January 1, 1981, a plan may rely on the prior published position of the Internal Revenue Service with respect to the amortization period for shortfall and experience gains and losses.

(k) **Supersession.** This section and § 1.412(c)(1)–1 supersede §§ 11.412(c)(1)–1 and (c)(1)–2 of the Temporary Income Tax Regulations Under the Employee Retirement Income Security Act of 1974.

[T.D. 7733, 45 FR 75202, Nov. 14, 1980]

§ 1.412(c)(2)–1 Valuation of plan assets; reasonable actuarial valuation methods.

(a) **Introduction—(1) In general.** This section prescribes rules for valuing plan assets under an actuarial valuation method which satisfies the requirements of section 412(c)(2)(A). An actuarial valuation method is a funding method within the meaning of section 412(c)(3) and the regulations thereunder. Therefore, certain changes affecting the actuarial valuation method are identified in this section as changes in a plan's funding method.

(2) **Exception for certain bonds, etc.** The rules of this section do not apply to bonds or other evidences of indebtedness for which the election described in section 412(c)(2)(B) has been made, nor are such assets counted in applying paragraphs (b) or (c) of this section. Also, an election under section 412(c)(2)(B) is not a change in funding method within the meaning of section 412(c)(5).

(3) **Money purchase pension plan.** A money purchase pension plan must value assets for the purpose of satisfying the requirements of section 412(c)(2)(A) solely on the basis of their fair market value (under paragraph (c) of this section).

(4) **Defined benefit plans.** (i) To satisfy the requirements of section 412(c)(2)(A), an actuarial method valuing assets of a defined benefit plan must meet the requirements of paragraph (b) of this section.

(ii) In general, the purpose of paragraph (b) of this section is to permit use of reasonable actuarial valuation methods designed to mitigate short-run changes in the fair market value of plan assets. The funding of plan benefits and the charges and credits to the funding standard account required by section 412 are generally based upon the assumption that the defined benefit plan will be continued by the employer. Thus, short-run changes in the value of plan assets presumably will offset one another in the long term. Accordingly, in the determination of the amount required to be contributed under section 412 it is generally not necessary to recognize fully each change in fair market value of the assets in the period in which it occurs.

(iii) The asset valuation rules contained in paragraph (b) produce a "smoothing" effect. Thus, investment performance, including appreciation or depreciation in the market value of the assets

occurring in each plan year, may be recognized gradually over several plan years. This "smoothing" is in addition to the "smoothing" effect which results, for example, from amortizing experience losses and gains over 15 or 20 years under section 412(b)(2)(B)(iv) and (3)(B)(ii).

(b) Asset valuation method requirements—(1) Consistent basis. (i) The actuarial asset valuation method must be applied on a consistent basis. Any change in meeting the requirements of this paragraph (b) is a change in funding method subject to section 412(c)(5).

(ii) A method may satisfy the consistency requirement even though computations are based only on the period elapsed since the adoption of the method or on asset values occurring during that period.

(2) Statement of plan's method. The method of determining the actuarial value (but not fair market value) of the assets must be specified in the plan's actuarial report (required under section 6059). The method must be described in sufficient detail so that another actuary employing the method described would arrive at a reasonably similar result. Whether a deviation from the stated actuarial valuation method is a change in funding method is to be determined in accordance with section 412(c)(5) and the regulations thereunder. A deviation to include a type of asset not previously held by the plan would not be a change in funding method.

(3) Consistent valuation dates. The same day or days (such as the first or the last day of a plan year) must be used for all purposes to value the plan's assets for each plan year, or portion of plan year, for which a valuation is made. For purposes of this section, each such day is a valuation date. A change in the day or days used is a change in funding method.

(4) Reflect fair market value. The valuation method must take into account fair market value by making use of the—

(i) Fair market value (determined under paragraph (c) of this section), or

(ii) Average value (determined under paragraph (b)(7) of this section) of the plan's assets as of the applicable asset valuation date. This is done either directly in the computation of their actuarial value or indirectly in the computation of upper or lower limits placed on that value.

(5) Results above and below fair market or average value. A method will not satisfy the requirements of this paragraph (b) if it is designed to produce a result which will be consistently above or below the values described in paragraph (b)(4)(i) and (ii). However, a method designed to produce a result which consistently falls between fair market value and average value will satisfy this requirement. See Example (5) in paragraph (b)(9) of this section for an illustration of a method described in the preceding sentence.

(6) Corridor limits. (i) Regardless of how the method reflects fair market value under paragraph (b)(4), the method must result in an actuarial value of the plan's assets which is not less than a minimum amount and not more than a maximum amount. The minimum amount is the lesser of 80 percent of the current fair market value of plan assets as of the applicable asset valuation date or 85 percent of the average value (as described in subparagraph (7)) of plan assets as of that date. The maximum amount is the greater of 120 percent of the current fair market value of plan assets as of the applicable asset valuation date or 115 percent of the average value of plan assets as of that date.

(ii) Under a plan's method, a preliminary computation of the expected actuarial value may fall outside the prescribed corridor. A method meets the requirements of paragraph (b)(6)(i) of this section in such a case only by adjusting the expected actuarial value to the nearest corridor limit applicable under the method. A plan may use an actuarial valuation method with a narrower corridor than the general corridor required under paragraph (b)(6)(i). The adjustment to the nearest corridor limit of such a method for purposes of this subdivision (ii) would be determined by the narrower corridor stated in the description of the plan's method.

(7) Average value. The average value of plan assets is computed by—

(i) Determining the fair market value of plan assets at least annually,

(ii) Adding the current fair market value of the assets (as of the applicable valuation date) and their adjusted values (as described in paragraph (b)(8) of this section) for a stated period not to exceed the five most recent plan years (including the current year), and

(iii) Dividing this sum by the number of values (including the current fair market value) considered in computing the sum described in subdivision (ii).

(8) Adjusted value. (i) The adjusted value of plan assets for a prior valuation date is their fair market value on that date with certain positive and negative adjustments. These adjustments reflect changes that occur between the prior asset valuation date and the current valuation date. However, no adjustment is made for increases or decreases in the total value of plan assets that result from the purchase, sale, or exchange of plan assets or from the receipt of payment on a debt obligation held by the plan.

(ii) In determining the adjusted value of plan assets for a prior valuation date, there is added to the fair market value of the plan assets of that date the sum of all additions to the plan assets since that date, excluding appreciation in the fair market value of the assets. The additions would include, for example, any contribution to the plan; any interest or dividend paid to the plan; and any asset not taken into account in a prior valuation of assets, but taken into account for the current year, in computing the fair market value of plan assets under paragraph (c) of this section.

(iii) In determining the adjusted value of plan assets for a prior valuation date, there is subtracted from the fair market value of the plan assets on that date the sum of all reductions in plan assets since that date, excluding depreciation in the fair market value of the assets. The reductions would include, for example, any benefit paid from plan assets; any expense paid from plan assets; and any asset taken into account in a prior valuation of assets but not taken into account for the current year, in computing the fair market value of plan assets under paragraph (c) of this section.

(9) Examples. This paragraph (b) may be illustrated by the following examples. In each example, assume that the pension plan uses a consistent actuarial method of valuing its assets within the meaning of paragraph (b)(1), (2), and (3) of this section.

Example (1). Plan A considers the value of its assets to be initial cost, increased by an assumed rate of growth of X percent annually. Under the circumstances, the X-percent factor used by the plan is a reasonable assumption. Thus, this method is not designed to produce results consistently above or below fair market value as prohibited by paragraph (b)(5) of this section. Also, the method requires that the actuarial value be adjusted as required to fall within the corridor under paragraph (b)(6) and (7) of this section. Therefore, the method reflects fair market value as required by paragraph (b)(4) of this section.

Example (2). Plan B computes the actuarial value of its assets as follows: It determines the fair market value of the plan assets. Then the fair market value is adjusted to the extent necessary to make the actuarial value fall within a "5 percent" corridor. This corridor is plus or minus 5 percent of the following amount: the fair market value of the assets at the beginning of the valuation period plus an assumed annual growth of 4 percent with adjustments for contributions and benefit payments during the period. This method reflects fair market value in a manner prescribed by paragraph (b)(4) of this section. If the 4 percent factor used by the plan is a reasonable assumption, this method is not designed to produce results consistently above or below fair market value, and thus it satisfies paragraph (b)(5). However, this method is unacceptable because in some instances it may result in an actuarial value outside the corridor described in paragraph (b)(6) of this section. This method would be permitted if a second corridor were imposed which would adjust the value of the total plan assets to the corridor limits as required by paragraph (b)(6).

Example (3). Plan C values its assets by multiplying their fair market value by an index number. The use of the index results in the hypothetical average value that plan assets present on the valuation date would have had if they had been held during the current and four preceding years, and had appreciated or depreciated at the actual yield rates including appreciation and depreciation experienced by the plan during that period. However, the method requires an adjustment to the extent necessary to bring the resulting actuarial value of the assets inside the corridor described in the statement of the plan's actuarial valuation method. In this case, the stated corridor is 90 to 110 percent of fair market value, a corridor narrower than that described in paragraph (b)(7) of this section. This method is permitted.

Example (4). Plan D values its assets by multiplying their fair market value by 95 percent. Although the method reflects fair market value and the results of this method will always be within the required corridor, it is not acceptable because it will consistently result in a value less than fair market value.

Example (5). Plan E values its assets by using a five-year average method with appropriate adjustments for the period. Under the particular method used by Plan E, assets are not valued below 80 percent of fair market value or above 100 percent of fair market value. If the average produces a value that exceeds 100 percent of fair market value, the excess between 100 and 120 percent is recorded in a "value reserve account." In years after one in which the average exceeds 100 percent of fair market value, amounts are subtracted from this account and added, to the extent necessary, to raise the value produced by the average for that year to 100 percent of fair market value. This method is permitted because it reflects fair market value under paragraph (b)(4) of this section by appropriately computing an average value, it satisfies paragraph (b)(5) by producing a result that falls consistently between fair market value and average value, and it properly reflects the corridor described in paragraph (b)(7).

Example (6). All assets of Plan F are invested in a trust fund and the plan year is the calendar year. The actuarial value is determined by averaging fair market value over 4 years. An actuarial valuation is performed as of December 31, 1988.

(i) The average value as of December 31, 1988, is computed as follows:

	1986	1986	1987	1987	1988	1988
Fair market value: Jan. 1	....	$150,000	....	$196,500	....	$238,000
Contributions	$65,000	....	$62,000	....	$66,000	....
Benefit payments	(22,000)	....	(24,000)	....	(25,000)	....

	1986	1986	1987	1987	1988	1988
Expenses	(6,500)	....	(7,000)	....	(7,500)	....
Interest and dividends	8,000	44,500	7,500	38,500	7,000	240,500
Net realized gains (losses)	....	(2,000)	....	6,000	....	(8,000)
Balancing item [1]	....	4,000	....	(3,000)	....	(42,000)
Fair market value: Dec. 31	....	196,500	....	238,000	....	228,000

[1] This equals the increase (decrease) in unrealized appreciation.

Adjusted values	1985	1986	1987	1988
Fair market value: Dec. 31	$150,000	$196,500	$238,000	$228,000
Net adjustments:				
1988	40,500	40,500	40,500	....
1987	38,500	38,500	....	....
1986	44,500	....	....	....
Total	273,500	275,500	278,500	228,000

Average value: 1988 = $273,500 + $275,500 + $278,500 + $228,000 ÷ 4 = $263,875

(ii) Plan F properly determines an average value under paragraph (b)(7) of this section for use as an actuarial value. Therefore, the valuation method meets the requirements of this section.

Example (7). Plan G computes the actuarial value of the plan assets as follows: The current fair market value of the plan assets is averaged with the most recent prior adjusted actuarial value. This average value is adjusted up or down toward the current fair market value by 20 percent of the difference between it and the current fair market value of the assets. This value is further adjusted to the extent necessary to fall within the corridor described in the statement of the plan's actuarial valuation method. The lower end of the corridor is the lesser of 80 percent of the fair market value of the plan assets or 85 percent of the average value of the plan assets. The higher end of the corridor is the greater of 120 percent of the fair market value of plan assets or 115 percent of the average value of plan assets. Average value for purposes of the corridor is determined under paragraph (b)(7) of this section. Assuming the numerical data of Example (6), the application of the corridor is as follows. The actuarial asset value as of December 31, 1988, must not be less than $182,400 (80 percent of current fair market value, $228,000) nor greater than $303,456 (115 percent of average value, $263,875). This method is permitted because it reflects fair market value in a manner permitted by paragraph (b)(4) of this section, it produces an actuarial value which is neither consistently above nor consistently below fair market or average value to satisfy paragraph (b)(5), and it is appropriately limited by the corridor described in paragraph (b)(6).

(c) Fair market value of assets—(1) General rules. Except as otherwise provided in this paragraph (c), the fair market value of a plan's assets for purposes of this section is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts.

(2) [Reserved]

(d) Methods for taking into account the fair market value of certain agreements. [Reserved]

(e) Effective date and transition rules—(1) Effective date. This section applies to plan years to which section 412, or section 302 of the Employee Retirement Income Security Act of 1974, applies.

(2) Special rule for certain plan years. For plan years beginning prior to November 12, 1980, the amounts required to be determined under section 412 may be computed on the basis of any reasonable actuarial method of asset valuation which takes into account the fair market value of the plan's assets, even if the method does not meet all of the requirements of paragraphs (a) through (c) of this section.

(3) Plan years beginning on or after November 12, 1980. Paragraphs (a) through (c) of this section apply beginning with the first valuation of plan assets made for a plan year to which section 412 applies that begins on or after November 12, 1980. The statement of the plan's actuarial asset valuation method required by paragraph (b)(2) of this section must be included with the plan's actuarial report for that year, in addition to any subsequent reports.

(4) Effect of change of asset valuation method. A plan which is required to change its asset valuation method to comply with paragraphs (a) through (c) of this section must make the change no later than the time when the plan is first required to comply with this section under paragraph (e)(3). A method of adjustment must be used to take account of any difference in the actuarial value of the plan's assets based on the old and new valuation methods. The plan may use either—

(i) A method of adjustment described in paragraph (e)(5) or (e)(6) of this section without prior approval by the Commissioner, or

(ii) Any other method of adjustment if the Commissioner gives prior approval under section 412(c)(5).

(5) **Retroactive recomputation method.** (i) Under this method of adjustment, the plan recomputes the balance of the funding standard account as of the beginning of the first plan year for which it uses its new asset valuation method to comply with paragraphs (a) through (c) of this section. This new balance is recomputed by retroactively applying the plan's new method as of the first day of the first plan year to which section 412 applies.

(ii) Beginning with the first plan year for which it uses its new method, the plan computes the normal cost and amortization charges and credits to the funding standard account based on the retroactive application of its new method as of the first day of the first plan year to which section 412 applies.

(iii) If the recomputed aggregate charges exceed the recomputed aggregate credits to the funding standard account as of the end of the first plan year for which the plan uses its new method, an additional contribution to the plan may be necessary to avoid an accumulated funding deficiency in that year. The use of the retroactive recomputation method may also result in an accumulated funding deficiency for years prior to that first year. In such cases, the rules of section 412(c)(10), relating to the time when certain contributions are deemed to have been made, apply.

(6) **Prospective gain or loss adjustment method.** (i) Under this method of adjustment the plan values its assets under its new method no later than the valuation date for the first plan year beginning after [the publication date of this section]

(ii) Regardless of the type of funding method used by a plan, the difference in the value of the assets under the old and the new asset valuation methods may be treated as arising from an experience loss or gain; or alternatively it may be treated as arising from a change in actuarial assumptions.

(iii) The treatment of this difference as an experience gain or loss or as a change in actuarial assumptions must be consistent with the treatment of such gains, losses, or changes under the funding method used by the plan. Thus, if a plan uses a spread gain type funding method other than the aggregate cost method, the difference in the value of assets under the old and the new asset valuation methods may be either amortized or spread over future periods as a part of normal cost. Examples of this type of funding method are the frozen initial liability cost method and the attained age normal cost method. With an aggregate method, the difference in the value of assets under the old and the new asset valuation methods must be spread over future periods as a part of normal cost.

[T.D. 7734, 45 FR 74718, Nov. 12, 1980]

§ 1.412(c)(3)–1 Reasonable funding methods.

(a) **Introduction—(1) In general.** This section prescribes rules for determining whether or not, in the case of an ongoing plan, a funding method is reasonable for purposes of section 412(c)(3). A method is unreasonable only if it is found to be inconsistent with a rule prescribed in this section. The term "reasonable funding method" under this section has the same meaning as the term "acceptable actuarial cost method" under section 3(31) of the Employee Retirement Income Security Act of 1974 (ERISA).

(2) **Computations included in method.** See § 1.412(c)(1)–1(b) for a discussion of matters that are, and are not, included in the funding method of a plan.

(3) **Plans using shortfall.** The shortfall method is a method of determining charges to the funding standard account by adapting the underlying funding method of certain collectively bargained plans in the manner described in § 1.412(c)(1)–2. As such, the shortfall method is a funding method. The underlying method of a plan that uses the shortfall method must be a reasonable funding method under this section. The rules contained in this section, relating to cost under a reasonable funding method, apply in the shortfall method to the annual computation charge under § 1.412(c)(1)–2(d).

(4) **Scope of funding method.** Except for the shortfall method, a reasonable funding method is applied to the computation of—

(i) The normal cost of a plan for a plan year; and, if applicable,

(ii) The bases established under section 412(b)(2)(B), (C), and (D), and (3)(B) ("amortizable bases").

(b) **General rules for reasonable funding methods—(1) Basic funding formula.** At any time, except as provided by the Commissioner, the present value of future benefits under a reasonable funding method must equal the sum of the following amounts:

(i) The present value of normal costs (taking into account future mandatory employee contribu-

tions, within the meaning of section 411(c)(2)(C), in the case of a contributory plan) over the future working lifetime of participants;

(ii) The sum of the unamortized portions of amortizable bases, if any, treating credit bases under section 412(b)(3)(B) as negative numbers; and

(iii) The plan assets, decreased by a credit balance (and increased by a debit balance) in the funding standard account under section 412(b).

(2) Normal cost. Normal cost under a reasonable funding method must be expressed as—

(i) A level dollar amount, or a level percentage of pay, that is computed from year to year on either an individual basis or an aggregate basis; or

(ii) An amount equal to the present value of benefits accruing under the method for a particular plan year.

(3) Application to shortfall. Paragraph (b)(2) will not fail to be satisfied merely because an amount described in (i) or (ii) is expressed as permitted under the shortfall method.

(c) Additional requirements—(1) Inclusion of all liabilities. Under a reasonable funding method, all liabilities of the plan for benefits, whether vested or not, must be taken into account.

(2) Production of experience gains and losses. If each actuarial assumption is exactly realized under a reasonable funding method, no experience gains or losses are produced.

(3) Plan population—(i) In general. Under a reasonable funding method, the plan population must include three classes of individuals: participants currently employed in the service of the employer; former participants who either terminated service with the employer, or retired, under the plan; and all other individuals currently entitled to benefits under the plan. See § 1.412(c)(3)-1(d)(2) for rules concerning anticipated future participants.

(ii) Limited exclusion for certain recent participants. Under a reasonable funding method, certain individuals may be excluded from the first class of individuals described in paragraph (c)(3)(i) of this section unless otherwise provided by the Commissioner. The excludable individuals are participants who would be excluded from participation by the minimum age or service requirement of section 410 but who, under the terms of the plan, participate immediately upon entering the service of the employer.

(iii) Special exclusion for "rule of parity" cases. Under a reasonable funding method, certain individuals may be excluded from the second class of individuals described in paragraph (c)(3)(i) of this section. The excludable individuals are those former participants who have terminated service with the employer without vested benefits and whose service might be taken into account in future years because the "rule of parity" of section 411(a)(6)(D) does not permit that service to be disregarded. However if the plan's experience as to separated employees' returning to service has been such that the exclusion described in this subparagraph would be unreasonable, the exclusion would no longer apply.

(4) Use of salary scale—(i) General acceptability. The use of a salary scale assumption is not inappropriate merely because of the funding method with which it is used. Therefore, in determining whether actuarial assumptions are reasonable, a salary scale will not be considered to be prohibited merely because a particular funding method is being used.

(ii) Projection to appropriate salary. Under a reasonable funding method, salary scales reflected in projected benefits must be the expected salary on which benefits would be based under the plan at the age when the receipt of benefits is expected to begin.

(5) Treatment of allocable items. Under a reasonable funding method that allocates assets to individual participants to determine costs, the allocation of assets among participants must be reasonable. An initial allocation of assets among participants will be considered reasonable only if it is in proportion to related liabilities. However, the Commissioner may determine, based on the facts and circumstances, that it is unreasonable to continue to allocate assets on this basis beyond the initial year. Under a reasonable funding method that allocates liabilities among different elements of past and future service, the allocation of liabilities must be reasonable.

(d) Prohibited considerations under a reasonable funding method—(1) Anticipated benefit changes—(i) In general. Except as otherwise provided by the Commissioner, a reasonable funding method does not anticipate changes in plan benefits that become effective, whether or not retroactively, in a future plan year or that become effective after the first day of, but during, a current plan year.

(ii) **Exception for collectively bargained plans.** A collectively bargained plan described in section 413(a) may on a consistent basis anticipate benefit increases scheduled to take effect during the term of the collective-bargaining agreement applicable to the plan. A plan's treatment of benefit increases scheduled in a collective bargaining agreement is part of its funding method. Accordingly, a change in a plan's treatment of such benefit increases (for example, ignoring anticipated increases after taking them into account) is a change of funding method.

(2) **Anticipated future participants.** A reasonable funding method must not anticipate the affiliation with the plan of future participants not employed in the service of the employer on the plan valuation date. However, a reasonable funding method may anticipate the affiliation with the plan of current employees who have not satisfied the participation requirements of the plan.

(e) **Special rules for certain funding methods—(1) Applicability of special rules.** Paragraph (e) of this section applies to a funding method that determines normal cost under paragraph (b)(2)(ii) of this section.

(2) **Use of salary scale.** For rules relating to use of a salary scale assumption, see paragraph (c)(4) of this section.

(3) **Allocation of liabilities.** In determining a plan's normal cost and accrued liability for a particular plan year, the projected benefits of the plan must be allocated between past years and future years. Except in the case of a career average pay plan, this allocation must be in proportion to the applicable rates of benefit accrual under the plan. Thus, the allocation to past years is effected by multiplying the projected benefit by a fraction. The numerator of the fraction is the participant's credited years of service. The denominator is the participant's total credited years of service at the anticipated benefit commencement date. Adjustments are made to account for changes in the rate of benefit accrual. An allocation based on compensation is not permitted. In the case of a career average pay plan, an allocation between past and future service benefits must be reasonable.

(f) **Treatment of ancillary benefit costs—(1) General rule.** Under a reasonable funding method, except as otherwise provided by this paragraph (f), ancillary benefit costs must be computed by using the same method used to compute retirement benefit costs under a plan.

(2) **Ancillary benefit defined.** For purposes of this paragraph an ancillary benefit is a benefit that is paid as a result of a specified event which—

(i) Occurs not later than a participant's separation from service, and

(ii) Was detrimental to the participant's health.

Thus, for example, benefits payable if a participant dies or becomes disabled prior to separation from service are ancillary benefits because the events giving rise to the benefits are detrimental to the participant's health. However, an early retirement benefit, a social security supplement (as defined in § 1.411(a)–7(c)(4)(ii)), and the vesting of plan benefits (even if more rapid than is required by section 411) are not ancillary benefits because those benefits do not result from an event which is detrimental to the participant's health.

(3) **Exception for certain insurance contracts.** Under a reasonable funding method, regardless of the method used to compute retirement benefit costs, the cost of an ancillary benefit may equal the premium paid for that benefit under an insurance contract if—

(i) The ancillary benefit is provided under the contract, and

(ii) The benefit is guaranteed under the contract.

(4) **Exception for 1-year term funding and other approved methods.** [Reserved]

(5) **Section 401(h) benefits.** Section 412 does not apply to benefits that are described in section 401(h) and for which a separate account is maintained.

(g) **Examples.** The principles of this section are illustrated by the following examples:

Example (1). Assume that a plan, using funding method A, is in its first year. No contributions have been made to the plan, other than a nominal contribution to establish a corpus for the plan's trust. There is no past service liability, and the normal cost is a constant percentage of an annually determined amount. The constant percentage is 99 percent, and the annually determined amount is the excess of the present value of future benefits over plan assets. The present value of future benefits is $10,000. Under paragraph (b)(1) of this section, the present value of future benefits must equal the present value of future normal costs plus plan assets. (No amortizable bases exist, nor are there credit or debit balances). Under method A, the present value of future normal costs would equal the sum of a series of annually decreasing amounts. Because of the constant percentage factor, the present value of future normal costs over the years can never equal $10,000, the present value of future benefits. In effect, then, assets under method A can never equal the present value of future benefits if all assumptions are exactly realized. Therefore, method A is not a reasonable funding method.

Example (2). Assume that a plan, using funding method B, determines normal cost by computing the present value of benefits expected to be accrued under the plan by the end of 10 years after the valuation date and adding to this the present value of benefits expected to be paid within these 10 years. Plan assets are subtracted from the sum of the two present value amounts. The difference then is divided by the present value of salaries projected over the 10 years. Under paragraph (c)(1) of this section, all liabilities of a plan must be taken into account. Because method B takes into account only benefits paid or accrued by the end of 10 years, it is not a reasonable funding method.

Example (3). Assume that a plan, using funding method C, determines normal cost as a constant percentage of compensation. (This percentage is determined as follows: The excess of projected benefits over accrued benefits is computed. Then the present value of this excess is divided by the present value of future salaries.) However, the accrued liability is computed each year as the present value of accrued benefits. (This computation does not reflect normal cost as a constant percentage of compensation. Thus, normal cost under the plan does not link accrued liabilities under the plan for consecutive years as would be the case, for example, under a unit credit cost method). In determining gains and losses, method C compares the actual unfunded liability (the accrued liability less assets) with the expected unfunded liability (the sum of the actual unfunded liability in the previous year and the normal cost for the previous year less the contribution made for the previous year, all adjusted for interest). Under paragraph (c)(2) of this section, if actuarial assumptions are exactly realized, experience gains and losses must not be produced. Under method C, the use of a constant percentage in computing normal cost (and the expected unfunded liability) coupled with the manner of computing the accrued liability (and the actual unfunded liability) generally produces gains in the earlier years and losses in the later years if each actuarial assumption is exactly realized. Therefore, method C is not a reasonable funding method.

Example (4). Assume that a plan, using funding method D, bases benefits on final average pay. Under method D, the past service liability on any date equals the present value of the accrued benefit on that date based on compensation as of that date. The normal cost for any year equals the present value of a certain amount. That amount is the excess of the projected accrued benefit as of the end of the year over the actual accrued benefit at the beginning of the year. Accrued benefits, projected as of the end of a year, reflect a 1-year salary projection. Under paragraph (c)(4) of this section, salary scales reflected in projected benefits must project salaries to the salary on which benefits would be based under the plan at the age when the receipt of benefits under the plan is expected to begin. Because the plan is not a career average pay plan and compensation is projected only 1 year, method D is not a reasonable funding method. (Under paragraph (c)(4) of this section, the use of a salary scale assumption could be required with a unit credit method if, without the use of a salary scale, assumptions in the aggregate are unreasonable.)

Example (5). Assume that a plan, using method E, a unit credit funding method, calculates a participant's accrued benefit according to the following formula: 2 percent of final salary for the first 10 years of service and 1 percent of final salary for the years of service in excess of 10. Under the plan, no employee may be credited with more than 25 years of service. The actuarial assumptions for the valuation include a salary scale of 5 percent per year. For a participant at age 40 with 15 years of service, a current salary of $20,000 and a normal retirement age of 65, the accrued liability for the retirement benefit is the present value of an annuity of $16,932 per year, commencing at age 65. The $16,932 is calculated as follows:

$$\$20{,}000 \times 3.3864 \times 35\% \times \frac{(10 \times 2) + (5 \times 1)}{(10 \times 2) - (15 \times 1) + (15 \times 0)}$$

(3.3864 is 1.05 raised to the 25th power; the 25th power reflects the difference between normal retirement age and attained age (65–40).)

Salary under this method is projected to the age when the receipt of benefits is expected to begin. Therefore, method E meets the requirement of paragraph (c)(4) of this section. Also, the allocation of benefits under method E between past and future years of service meets the requirements of paragraph (e)(3) of this section.

Example (6). Assume that a plan that has two participants and that previously used the unit credit cost method wishes to change the funding method at the beginning of the plan year to funding method F, a modification of the aggregate cost method. The modification involves determining normal cost for each of the two participants under the plan. Therefore, it requires an allocation of assets to each participant for valuation purposes. The actuary proposes to allocate the assets on hand at the beginning of the plan year of the change in funding method in proportion to the accrued liabilities calculated under the unit credit cost method. The relevant results of the calculations are shown below:

	Employees		
	M	N	Totals
Accrued Liabilities (unit credit method):			
Dollar amount	15,670	906	16,576
Per cent of total	94.53	5.47	100.00
Assets:			
Dollar amount	7,835	453	8,288
Per cent of total	94.53	5.47	100.00

The proposed allocation in proportion to the accrued liabilities under the unit credit cost method satisfies the requirements of paragraph (c)(5) of this section at the beginning of the first plan year for which the new method is used.

Example (7). The facts are the same as in Example (6). However, the actuary proposes to allocate all the assets to employee M, the older employee. Method F, under these facts, is not an acceptable funding method because the allocation is not in proportion to related liabilities as required under paragraph (c)(5) of this section.

[T.D. 7746, 45 FR 86430, Dec. 31, 1980]

§ 1.412(c)(3)–2 Effective dates and transitional rules relating to reasonable funding methods.

(a) Introduction. This section prescribes effective dates for rules relating to reasonable funding methods, under section 412(c)(3) and § 1.412(c)(3)–1. Also, this section sets forth rules concerning adjustments to a plan's funding standard account that are necessitated by a change in funding method, and a provision setting forth procedural requirements for use of an optional phase-in of required changes.

(b) Effective date—(1) General rule. Except as otherwise provided by subparagraph (2) of this

paragraph, § 1.412(c)(3)–1 applies to any valuation of a plan's liabilities (within the meaning of section 412(c)(9)) as of a date after April 30, 1981.

(2) **Exception.** If a collective bargaining agreement which determines contributions to a plan is in effect on April 30, 1981, then § 1.412(c)(3)–1 applies to any valuation of that plan's liabilities as of a date after the earlier of the date on which the last such collective bargaining agreement expires or April 30, 1984.

(3) **Transitional rule.** The reasonableness of a funding method used in making a valuation of a plan's liability as of a date before the effective date determined under subparagraph (1) or (2) of this paragraph is determined on the basis of such published guidance as was available on the date as of which the valuation was made.

(c) **Change of funding method without approval—(1) In general.** A plan that is required to change its funding method to comply with § 1.412(c)(3)–1 is not required to submit the change of funding method for approval as otherwise required by section 412(c)(5). However, this change must be described on Form 5500, Schedule B for the plan year with respect to which the change is first effective.

(2) **Amortization base.** An amortization base must be established in the plan year of the change in method equal to the change in the unfunded liability due to the change (where both unfunded liabilities are based on the same actuarial assumptions). Such a base must be amortized over 30 years in determining the charges or credits to the funding standard account, unless the Commissioner upon application permits amortization over a shorter period.

(d) **Phase-in of additional funding required by new method—(1) In general.** A plan that is required to change its funding method to comply with § 1.412(c)(3)–1 may elect to charge and credit the funding standard account as provided in this paragraph. An election under this paragraph shall be irrevocable.

(2) **Credit in year of change.** In the plan year of the change in method the funding standard account may be credited with an amount not in excess of 0.8 multiplied by the excess (if any) of—

(i) The normal cost under the new method plus the amortization charge (or minus the amortization credit) computed as described in § 1.412(c)(3)–2(c)(2), over

(ii) The normal cost under the prior method, for the plan year of the change in method.

(3) **Credits in the next three years.** In the three years following the year of the change the funding standard account may be credited with an amount not in excess of 0.6, 0.4, and 0.2 respectively in the first, second, and third years, multiplied by either of the following amounts, computed as of the last day of the year of credit—

(i) The excess described in § 1.412(c)(3)–2(d)(2) multiplied by a fraction (not greater than 1), the numerator of which is the number of participants in the year of the credit and the denominator of which is the number of participants in the year of the change, or, at the option of the plan,

(ii) The excess (if any) in the year of credit of—

(A) The net charge to the funding standard account based on the new method, over

(B) The net charge to the funding standing account based on the prior method.

(4) **Computational rules.** For purposes of the calculation described in § 1.412(c)(3)–2(d)(3)(ii), the net charge is the excess of charges under section 412(b)(2)(A) and (B) over the credits under section 412(b)(3)(B) (including the charge or credit described in § 1.412(c)(3)–2(c)) which would be required using the actuarial assumptions and plan benefit structure in effect on the last day of the plan year of change.

(5) **Fifteen-year amortization of credits.** The funding standard account shall be charged with 15-year amortization of each credit described in § 1.412(c)(3)–2(d)(2) and (3) beginning in the year following each such credit.

(6) **Manner of election.** An election under this paragraph shall be made by the claiming of the credits described in § 1.412(c)(3)–2(d)(2) and (3) on Schedule B to Form 5500 and by filing such other information as may be required by the Commissioner.

(e) **Effect on shortfall method.** The charges and credits described in this section apply in the shortfall method to the annual computation charge described in § 1.412(c)(1)–2(d). The amounts described in § 1.412(c)(3)–2(d) shall be determined before the application of the shortfall method. [T.D. 7746, 45 FR 86432, Dec. 31, 1980]

§ 1.412(i)–1 Certain insurance contract plans.

(a) In general. Under section 412(h)(2) of the Internal Revenue Code of 1954, as added by section 1013(a) of the Employee Retirement Income Security Act of 1974 (88 Stat. 914) (hereinafter referred to as "the Act"), an insurance contract plan described in section 412(i) for a plan year is not subject to the minimum funding requirements of section 412 for that plan year. Consequently, if an individual or group insurance contract plan satisfies all of the requirements of paragraph (b)(2) or (c)(2) of this section, whichever are applicable, for the plan year, the plan is not subject to the requirements of section 412 for that plan year. The effective date for section 412 of the Code is determined under section 1017 of the Act. In general, in the case of a plan which was not in existence on January 1, 1974, this section applies for plan years beginning after September 2, 1974, and in the case of a plan in existence on January 1, 1974, to plan years beginning after December 31, 1975.

(b) Individual insurance contract plans. (1) An individual insurance contract plan is described in section 412(i) during a plan year if the plan satisfies the requirements of paragraph (b)(2) of this section for the plan year.

(2) The requirements of this paragraph are:

(i) The plan must be funded exclusively by the purchase from an insurance company or companies (licensed under the law of a State or the District of Columbia to do business with the plan) of individual annuity or individual insurance contracts, or a combination thereof. The purchase may be made either directly by the employer or through the use of a custodial account or trust. A plan shall not be considered to be funded otherwise than exclusively by the purchase of individual annuity or individual insurance contracts merely because the employer makes a payment necessary to comply with the provisions of section 411(c)(2) (relating to accrued benefit from employee contributions).

(ii) The individual annuity or individual insurance contracts issued under the plan must provide for level annual, or more frequent, premium payments to be paid under the plan for the period commencing with the date each individual participating in the plan became a participant and ending not later than the normal retirement age for that individual or, if earlier, the date the individual ceases his participation in the plan. Premium payments may be considered to be level even though items such as experience gains and dividends are applied against premiums. In the case of an increase in benefits, the contracts must provide for level annual payments with respect to such increase to be paid for the period commencing at the time the increase becomes effective. If payment commences on the first payment date under the contract occurring after the date an individual becomes a participant or after the effective date of an increase in benefits, the requirements of this subdivision will be satisfied even though payment does not commence on the date on which the individual's participation commenced or on the effective date of the benefit increase, whichever is applicable. If an individual accrues benefits after his normal retirement age, the requirements of this subdivision are satisfied if payment is made at the time such benefits accrue. If the provisions required by this subdivision are set forth in a separate agreement with the issuer of the individual contracts, they need not be included in the individual contracts.

(iii) The benefits provided by the plan for each individual participant must be equal to the benefits provided under his individual contracts at his normal retirement age under the plan provisions.

(iv) The benefits provided by the plan for each individual participant must be guaranteed by the life insurance company, described in paragraph (b)(2)(i) of this section, issuing the individual contracts to the extent premiums have been paid.

(v) Except as provided in the following sentence, all premiums payable for the plan year, and for all prior plan years, under the insurance or annuity contracts must have been paid before lapse. If the lapse has occurred during the plan year, the requirements of this subdivision will be considered to have been met if reinstatement of the insurance policy, under which the individual insurance contracts are issued, occurs during the year of the lapse and before distribution is made or benefits commence to any participant whose benefits are reduced because of the lapse.

(vi) No rights under the individual contracts may have been subject to a security interest at any time during the plan year. This subdivision shall not apply to contracts which have been distributed to participants if the security interest is created after the date of distribution.

(vii) No policy loans, including loans to individual participants, on any of the individual contracts may be outstanding at any time during the plan year. This subdivision shall not apply to contracts

which have been distributed to participants if the loan is made after the date of distribution. An application of funds by the issuer to pay premiums due under the contracts shall be deemed not to be a policy loan if the amount of the funds so applied, and interest thereon, is repaid during the plan year in which the funds are applied and before distribution is made or benefits commence to any participant whose benefits are reduced because of such application.

(c) Group insurance contract plans. (1) A group insurance contract plan is described in section 412(i) during a plan year if the plan satisfies the requirements of subparagraph (2) for the plan year.

(2) The requirements of this subparagraph are:

(i) The plan must be funded exclusively by the purchase from an insurance company or companies, described in paragraph (b)(2)(i) of this section, of group annuity or group insurance contracts, or a combination thereof. The purchase may be made either directly by the employer or through the use of a custodial account or trust. A plan shall not be considered to be funded otherwise than exclusively by the purchase of group annuity or group insurance contracts merely because the employer makes a payment necessary to comply with the provisions of section 411(c)(2) (relating to accrued benefit derived from employee contributions).

(ii) In the case of a plan funded by a group insurance contract or a group annuity contract the requirements of paragraph (b)(2)(ii) of this section must be satisfied by the group contract issued under the plan. Thus, for example, each individual participant's benefits under the group contract must be provided for by level annual, or more frequent, payments equivalent to the payments required to satisfy such paragraph. The requirements of this subdivision will not be satisfied if benefits for any individual are not provided for by level payments made on his behalf under the group contract.

(iii) The group annuity or group insurance contract must satisfy the requirements of clauses (iii), (iv), (v), (vi), and (vii) of paragraph (b)(2). Thus, for example, each participant's benefits provided by the plan must be equal to his benefits provided under the group contract at his normal retirement age.

(iv)(A) If the plan is funded by a group annuity contract, the value of the benefits guaranteed by the insurance company issuing the contract under the plan with respect to each participant under the contract must not be less than the value of such benefits which the cash surrender value would provide for that participant under any individual annuity contract plan satisfying the requirements of paragraph (b) and approved for sale in the State where the principal office of the plan is located.

(B) If the plan is funded by a group insurance contract, the value of the benefits guaranteed by the insurance company issuing the contract under the plan with respect to each participant under the contract must not be less than the value of such benefits which the cash surrender value would provide for that participant under any individual insurance contract plan satisfying the requirements of paragraph (b) and approved for sale in the State where the principal office of the plan is located.

(v) Under the group annuity or group insurance contract, premiums or other consideration received by the insurance company (and, if a custodial account or trust is used, the custodian or trustee thereof) must be allocated to purchase individual benefits for participants under the plan. A plan which maintains unallocated funds in an auxiliary trust fund or which provides that an insurance company will maintain unallocated funds in a separate account, such as a group deposit administration contract, does not satisfy the requirements of this subdivision.

(d) Combination of plans. A plan which is funded by a combination of individual contracts and a group contract shall be treated as a plan described in section 412(i) for the plan year if the combination, in the aggregate, satisfies the requirements of this section for the plan year.

[T.D. 7746, 45 FR 47676, July 16, 1980; 45 FR 50563, July 30, 1980]

§ 1.413–1 Special rules for collectively bargained plans.

(a) Application of section 413(b) to certain collectively bargained plans—(1) In general. Section 413(b) sets forth special rules applicable to certain pension, profit-sharing, and stock bonus plans (and each trust which is a part of such a plan), hereinafter referred to as "section 413(b) plans", described in paragraph (a)(2) of this section. Notwithstanding any other provision of the Code, a section 413(b) plan is subject to the special rules of section 413(b)(1) through (8) and paragraphs (b) through (i) of this section.

(2) Requirements. Section 413(b) applies to a plan (and each trust which is a part of such plan) if the plan is a single plan which is maintained

pursuant to one or more agreements which the Secretary of Labor finds to be a collective bargaining agreement between employee representatives and one or more employers. A plan which provides benefits for employees of more than one employer is considered a single plan subject to the requirements of section 413(b) and this section if the plan is considered a single plan for purposes of applying section 414(*l*)(see § 1.414(*l*)–1(b)(1)). For purposes of determining whether one or more plans (or agreements) are a single plan, under sections 413(a) and 414(*l*), it is irrelevant that there are in form two or more separate plans (or agreements). For example, a single plan will be considered to exist where agreements are entered into separately by a national labor organization (or one or more local units of such organization), on one hand, and individual employers, on the other hand, if the plan is considered a single plan for purposes of applying section 414(*l*).

(3) Additional rules and effective dates. (i) If a plan is a section 413(b) plan at a relevant time, the rules of section 413(b) and this section apply, and the rules of section 413(c) and § 1.413–2 do not apply to the plan.

(ii) The qualification of a section 413(b) plan, at any relevant time, under section 401(a), 403(a), or 405(a), as modified by section 413(b) and this section, is determined with respect to all employers maintaining the plan. Consequently, the failure by one employer maintaining the plan (or by the plan itself) to satisfy an applicable qualification requirement will result in the disqualification of the plan for all employers maintaining the plan.

(iii) Except as otherwise provided, section 413(a) and (b) and this section apply to a plan for plan years beginning after December 31, 1953.

(b) Participation. Section 410 and the regulations thereunder shall be applied as if all employees of each of the employers who are parties to the collective-bargaining agreement and all such employees who are subject to the same benefit computation formula under the plan were employed by a single employer.

(c) Discrimination, etc.—(1) General rule. Section 401(a)(4) (relating to prohibited discrimination) and section 411(d)(3) (relating to vesting required on termination, partial termination, or discontinuance of contributions) shall be applied as if all the participants in the plan, who are subject to the same benefit computation formula and who are employed by employers who are parties to the collective bargaining agreement, are employed by a single employer.

(2) Application of discrimination rules. Under section 401(a)(4) and the regulations thereunder a plan is not qualified unless the contributions or benefits provided under the plan do not discriminate in favor of officers, shareholders or highly compensated employees (hereinafter referred to collectively as "the prohibited group"). The presence or absence of such discrimination under a plan to which this section applies at any time shall not be determined on an employer-by-employer basis, but rather by testing separately each group of employees who are subject to the same benefit computation formula to determine if there is discrimination within such group. Consequently, discrimination in contributions or benefits among two or more different groups or among employees in different groups covered by the plan may be present without causing the plan to be disqualified. However, the presence of prohibited discrimination within one such group will result in the disqualification of the plan for all groups. Section 401(a)(4) and the regulations thereunder provide rules relating to the determination of which employees are members of the prohibited group and to the determination of discrimination in contributions or benefits which are applicable to a plan to which this section applies. The determination of whether or not an individual employee is a highly compensated employee shall be based on the relationship of the compensation of the employee to the compensation of all the other employees of all employers who are maintaining the plan and have employees covered under the same benefit computation formula, whether or not such other employees are covered by the plan or are covered under the same benefit computation formula, rather than to the compensation of all the other employees of the employer of such individual employee.

(3) Application of termination, etc., rules. Section 411(d)(3) and the regulations thereunder (relating to vesting required in the case of a termination, partial termination, or complete discontinuance of contributions) apply to a plan subject to the provisions of this section. The requirements of section 411(d)(3) shall be applied as if all participants in the plan who are subject to the same benefit computation formula and who are employed by employers who are parties to the collective bargaining agreement are employed by a single employer. The determination of whether or not there is a termination, partial termination, or complete discontinuance of contributions shall be made separately for each such group of participants who are treated as employed by a single employer. Consequently, if there are two or more

groups of participants, a termination, partial termination, or complete discontinuance can take place under a plan with respect to one group of participants but not with respect to another such group of participants or for the entire plan. See § 1.411(d)–2 for rules prescribed under section 411(d)(3).

(4) **Effective dates and transitional rules.** (i) Section 413(b)(2) and this paragraph apply to a plan for plan years beginning after December 31, 1953.

(ii) In applying the rules of this paragraph to a plan for plan years to which section 411 does not apply, section 401(a)(7) (as in effect on September 1, 1974) shall be substituted for section 411(d)(3). See § 1.401–6 for rules prescribed under section 401(a)(7) as in effect on September 1, 1974. See § 1.411(a)–2 for the effective dates of section 411.

(5) **Examples.** The provisions of this paragraph are illustrated by the following examples:

Example (1). Plan A is a defined benefit plan subject to the provisions of this section and covers two groups of participants, local unions 1 and 2. Each local union has negotiated its own bargaining agreement with employers X, Y, and Z to provide its own benefit computation formula. The following table indicates the composition of the plan A participants:

	Employer X	Employer Y	Employer Z	Total
Local union 1 ..	20	10	70	100
Local union 2 ..	30	70	100	200

Under the rules of subparagraph (2) of this paragraph, the determination of whether contributions or benefits provided under the plan discriminate in favor of the prohibited group is made by applying the rules of section 401(a)(4) separately to participants who are members of local union 1 and local union 2. Thus, plan A will satisfy the qualification requirements of section 401(a)(4) if, within local union 1 and local union 2, respectively, plan benefits do not discriminate in favor of participants who are prohibited group employees within local union 1 and local union 2. Under the rules of subparagraph (2) of this paragraph, the determination under section 401(a)(4) of whether or not any individual employee, included within the 300 participants in plan A, is a highly compensated employee is based on the relationship of the compensation of such individual employee to the compensation of all the employees of Employers X, Y, and Z, whether or not such employees are participants in plan A. Thus, if there are 20 participants who are prohibited group employees within the 100 participants of local union 1, discrimination is determined by comparing the benefits of the 20 prohibited group participants to the benefits of the other 80 participants within local union 1. The same comparison would have to be made for the local union 2 participants between the prohibited group participants and the other participants in local union 2. Discrimination in benefits, if any, between the participants in local union 1 and local union 2, or among the employees of X, Y, or Z, would not affect the qualification of plan A under section 401(a)(4).

Example (2). Assume the same facts as in example (1). Employer X withdraws from the plan. Under subparagraph (3) of this paragraph, whether or not as a result of the withdrawal there is a partial termination under section 411(d)(3) is to be determined by applying the requirements of such section separately to the local union 1 and local union 2 participants. See § 1.411(d)–2 for the requirements relating to partial terminations. The application of such requirements raises the following possibilities with respect to the plan: (1) A partial termination as to local union 1, (2) a partial termination as to local union 2, (3) a partial termination as to both local unions 1 and 2, or (4) no partial termination for either local union.

Example (3). Assume the same facts as in example (1). Plan A is amended to cease future benefit accruals under the plan for local union 1 participants. Under subparagraph (3) of the paragraph, whether or not as a result of the cessation there is a partial termination under section 411(d)(3) is to be determined by applying the requirements of such section separately to the local union 1 and local union 2 participants.

Example (4). Plan A is a defined benefit plan that provides for two normal retirement benefits, X and 2X. A participant receives benefit X if the collective bargaining agreement covering his employment provides for a contribution rate, M. If such agreement provides for a contribution rate of N, the participant receives benefit 2X. Benefit X and benefit 2X constitute separate benefit computation formulas.

Example (5). Plan B is a defined benefit plan that provides for a normal retirement benefit, X. Benefit X is provided for all plan participants even though there are two collective bargaining agreements providing for different contribution rates, M and N. Plan B has a single benefit computation formula, even though there are two contribution rates.

(d) **Exclusive benefit.** Under section 401(a), a plan is not qualified unless the plan is for the exclusive benefit of the employees (and their beneficiaries) of the employer establishing and maintaining the plan. Other qualification requirements under section 401(a) require the application of the exclusive benefit rule (for example, section 401(a)(2), which precludes diversion of plan assets). For purposes of applying the requirements of section 401(a) in determining whether a plan subject to this section is, with respect to each employer establishing and maintaining the plan, for the exclusive benefit of its employees (and their beneficiaries), all of the employees participating in the plan shall be treated as employees of each such employer. Thus, for example, contributions by employer A to a plan subject to this section could be allocated to employees of other employers maintaining the plan without violating the requirements of section 401(a)(2), because all the employees participating in the plan are deemed to be employees of A.

(e) **Vesting.** Section 411 (other than section 411(d)(3) relating to termination or partial termination; discontinuance of contributions) and the regulations thereunder shall be applied as if all employers who have been parties to the collective-bargaining agreement constituted a single employer. The application of any rules with respect to breaks in service under section 411 shall be made

under regulations prescribed by the Secretary of Labor. Thus, for example, all the hours which an employee worked for each employer in a collectively-bargained plan would be aggregated in computing the employee's hours of service under the plan. See also 29 CFR Part 2530 (Department of Labor regulations relating to minimum standards for employee pension benefit plans.)

(f)–(h) [Reserved]

(i) Employees of labor unions—(1) General rule. For purposes of section 413(b) and this section, employees of employee representatives shall be treated as employees of an employer establishing and maintaining a plan to which section 413(b) and this section apply if, with respect to the employees of such representatives, the plan satisfies the nondiscrimination requirements of section 401(a)(4) (determined without regard to section 413(b)(2)) and the minimum participation and coverage requirements of section 410 (determined without regard to section 413(b)(1)). For purposes of the preceding sentence, the plan and any affiliated employee health or welfare plan shall be deemed to be an employee representative. If employees of employee representatives, the plan, or an affiliated employee health or welfare plan are covered by the plan and are not treated as employees of an employer establishing and maintaining the plan under the provisions of this paragraph, the plan fails to satisfy the qualification requirements of section 401(a). In addition, in order for such a plan to be qualified, the plan must satisfy the requirements of section 413(b)(1) and (2), relating to participation and discrimination, respectively; see paragraphs (b) and (c) of this section. For purposes of this paragraph, an affiliated health or welfare plan is a health or welfare plan that is maintained under the same collective bargaining agreement or agreements, and that covers the same membership.

(2) Effective dates and transitional rules. (i) Section 413(b)(8) and this paragraph apply to a plan for plan years beginning after December 31, 1953.

(ii) In applying the rules of this paragraph to a plan for plan years to which section 410 does not apply, section 401(a)(3) (as in effect on September 1, 1974) shall be substituted for section 410. See § 1.401–3 for rules prescribed under section 401(a)(3) as in effect on September 1, 1974. See § 1.410(a)–2 for the effective dates of section 410.

(3) Examples. The provisions of this paragraph are illustrated by the following examples:

Example (1). Plan A is a defined benefit plan, maintained pursuant to a collective bargaining agreement between employers, X, Y, and Z and labor union, L, which covers members of L employed by X, Y, and Z. In 1978, plan A is amended to cover, under the same benefit formula, all five employees of L who have satisfied the minimum age and service requirements of the plans (age 25 and 1 year of service). Assume that plan A is subject to section 413(b) and satisfies the requirements of section 413(b)(1) and (2). Assume further that with respect to employees of L, plan A (i) satisfies the nondiscrimination requirements of section 401(a)(4), (ii) meets the minimum participation requirements of section 410(a), and (iii) meets the minimum coverage requirements of section 410(b)(1)(A). Under the rules of subparagraph (1) of this paragraph, because such requirements are all satisfied, the employees of L are treated as employees of an employer establishing and maintaining plan A.

Example (2). Assume the same facts as example (1), except that plan A is amended to cover only one of the five employees of L, none of whom is covered by any other plan. Assume further that, under plan A, L does not satisfy the minimum percentage coverage requirement of section 410(b)(1)(A) with respect to employees of L. Assume further that the compensation of the one L employee who is covered by the plan is such that he is highly compensated relative to the four employees of L not covered by the plan. Consequently, L does not satisfy the minimum coverage requirements of section 410(b)(1)(B), with respect to employees of L. Under the rules of subparagraph (1) of this paragraph, the employees of L cannot be treated as employees of an employer establishing and maintaining the A plan because such coverage requirements are not satisfied by L. Consequently, the A plan fails to satisfy the qualification requirements of section 401(a).

[T.D. 7501, 42 FR 42340, Aug. 23, 1977, as amended by 42 FR 47198, Sept. 20, 1977; T.D. 7654, 44 FR 65063, Nov. 9, 1979]

§ 1.413–2 Special rules for plans maintained by more than one employer.

(a) Application of section 413(c)—(1) In general. Section 413(c) describes certain plans (and each trust which is a part of any such plan) hereinafter referred to as "section 413(c) plans." A plan (and each trust which is a part of such plan) is deemed to be a section 413(c) plan if it is described in subparagraph (2) of this paragraph. Notwithstanding any other provision of the code (not specifically in conflict with the special rules hereinafter mentioned), a section 413(c) plan is subject to the special rules of section 413(c)(1) through (6) and paragraphs (b) through (g) of this section.

(2) Section 413(c) plan. A plan (and each trust which is a part of such plan) is a section 413(c) plan if—

(i) The plan is a single plan, within the meaning of section 413(a) and § 1.413–1(a)(2), and

(ii) The plan is maintained by more than one employer.
